Evidence for CNO Processed Material in the Accretion Disk of GP Comae. *T. R. Marsh, Keith Horne, & Simon Rosen.* 366, 535, 9-F1 (1991)
A Search for Periodicities in the X-Ray Emission from Cataclysmic Variables. *Michael Eracleous, Joseph Patterson, & Jules Halpern.* 370, 330, 51-D1 (1991)
Near-Infrared Time-resolved Spectroscopy of the Cataclysmic Variable YY Draconis. *Mario Mateo, Paula Szkody, & Peter Garnavich.* 370, 370, 51-G8 (1991)
Helium Star Cataclysmics. *Icko Iben, Jr., & Alexander V. Tutukov.* 370, 615, 56-B5 (1991)
On the X-Ray–emitting Boundary Layer of the Dwarf Nova VW Hydri. *Christopher W. Mauche, Richard A. Wade, Ronald S. Polidan, Hans van der Woerd, & Frits B. S. Paerels.* 372, 659, 83-G7 (1991)
The Near-Infrared Spectra of Low-Mass X-Ray Binaries and Related Objects. *A. P. Cowley, P. C. Schmidtke, D. Crampton, J. B. Hutchings, & M. Bolte.* 373, 228, 88-G1 (1991)
The Interoutburst Behavior of Cataclysmic Variables. *Paula Szkody, Janet A. Mattei, Elizabeth O. Waagen, & Clay Stablein.* 76, 359, 29-E1 (1991)
High-Resolution *IUE* Spectra of the Nova-like Variable IX Velorum. *Christopher W. Mauche.* 373, 624, 95-F7 (1991)
The Pulse-timing and Emission-Line Orbits of the White Dwarf in the Cataclysmic Variable AE Aquarii. *Edward L. Robinson, Allen W. Shafter, & S. Balachandran.* 374, 298, 101-G1 (1991)
Rotation and Emission Lines in Stars and Accretion Disks. *Keith Horne & Steven H. Saar.* 374, L55, 110-D6 (1991)
The White Dwarf Mass Distribution in Classical Nova Systems. *Hans Ritter, Michael Politano, Mario Livio, & Ronald F. Webbink.* 376, 177, 127-B10 (1991)
Eclipse Studies of the Dwarf Nova HT Cassiopeiae. I. Observations and System Parameters. *Keith Horne, Janet H. Wood, & Rae F. Stiening.* 378, 271, 154-C11 (1991)
Spin Evolution and Magnetic Fields in Cataclysmic Variables. *Andrew R. King & Jean-Pierre Lasota.* 378, 674, 160-G1 (1991)
The Eclipsing AM Herculis Variable H1907+690. *R. A. Remillard, B. A. Stroozas, S. Tapia, & A. Silber.* 379, 715, 173-E13 (1991)
Spin-up of the White Dwarf in the Intermediate Polar 3A 0729+103. *Jyoti Singh, P. C. Agrawal, K. M. V. Apparao, P. Vivekananda Rao, & M. B. K. Sarma.* 380, 208, 178-E11 (1991)

Spectroscopy of Z Camelopardalis in Outburst with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Arthur F. Davidsen, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Richard C. Henry, Gerard A. Kriss, Jeffrey W. Kruk, H. Warren Moos, Olaf Vancura, Henry C. Ferguson, & Randy A. Kimble.* 381, L25, 194-D5 (1991)

V795 Herculis (=PG 1711+336), A Peculiar Intermediate Polar without Strong X-Ray Emission. *Erho Zhang, Edward L. Robinson, Tod F. Ramseyer, Mathew D. Shetrone, & Rae F. Stiening.* 381, 534, 197-C10 (1991)

X-Ray Spectra of Cataclysmic Variables from the *Einstein Observatory*. *Michael Eracleous, Jules Halpern, & Joseph Patterson.* 382, 290, 203-G1 (1991)

High-Speed Multicolor Photometry of V834 Centaurus. *John Middleditch, James N. Imamura, Michael T. Wolff, & Thomas Y. Steiman-Cameron.* 382, 315, 204-B1 (1991)

STARS: EARLY-TYPE

On Winds and X-Rays of O-Type Stars. *Tomasz Chlebowski & Catharine D. Garmany.* 368, 241, 26-B1 (1991)

Search for Vega-like Nearby Stars with 12 Micron Excess. *Hartmut H. Aumann & Ronald G. Probst.* 368, 264, 26-D1 (1991)

Detection of Small-Amplitude Pulsations in HD 34656 (O7 II). *A. W. Fullerton, D. R. Gies, & C. T. Bolton.* 368, L35, 35-C1 (1991)

Criteria for the Spectral Classification of B Stars in the Ultraviolet. *Janet Rountree & George Sonneborn.* 369, 515, 44-B5 (1991)

IRAS 23545+6508, a Dissociating Star: Prototype for a New Observational Class? *P. E. Dewdney, R. S. Roger, C. R. Purton, & W. H. McCutcheon.* 370, 243, 50-C1 (1991)

Echelle Spectroscopy of CD −41° 13967: The Young Central Star of a New Planetary Nebula. *James K. McCarthy, R. Michael Rich, S. R. Becker, K. Butler, D. Husfeld, & H. G. Groth.* 371, 380, 64-G1 (1991)

Central Star Temperatures of Low-Excitation Planetary Nebulae. *James B. Kaler & George H. Jacoby.* 372, 215, 76-F1 (1991)

DD 13: A Very Young and Heavily Reddened Early O Star in the Large Magellanic Cloud. *Peter S. Conti & Edward L. Fitzpatrick.* 373, 100, 87-C5 (1991)

IUE Observations of Early-Type Stars at High Galactic Latitudes. *D. A. Quin, P. J. F. Brown, E. S. Conlon, P. L. Dufton, & F. P. Keenan.* 375, 342, 115-B7 (1991)

UBV Photometry of OB$^+$ Stars in the Southern Milky Way. *J. S. Drilling.* 76, 1033, 39-C11 (1991)

First Results from the Goddard High-Resolution Spectrograph: Evidence for Photospheric Microturbulence in Early O Stars: Are Surface Gravities Systematically Underestimated? *I. Hubeny, S. R. Heap, & B. Altner.* 377, L33, 143-D11 (1991)

Photoionization Modeling of Magellanic Cloud Planetary Nebulae. II. *M. A. Dopita & S. J. Meatheringham.* 377, 480, 145-F6 (1991)

Observations of Stellar Winds from Hot Stars at 1.3 Millimeters. *Claus Leitherer & Carmelle Robert.* 377, 629, 147-E1 (1991)

Predicted Extreme-Ultraviolet Line Emission for Nearby Main-Sequence B Stars. *J. J. MacFarlane, J. P. Cassinelli, B. Y. Welsh, P. W. Vedder, J. V. Vallerga, & W. L. Waldron.* 380, 564, 185-C1 (1991)

A Non–Local Thermodynamic Equilibrium, Line-blanketed Synthetic Spectrum of Iota Herculis: C, Al, and Si Lines. *James A. Grigsby.* 380, 606, 185-F9 (1991)

Direct Evidence for Stellar Wind X-Ray Absorption in O Stars. *Wayne L. Waldron.* 382, 603, 209-A9 (1991)

A Model for the Infrared Emission from an OB Star Cluster Environment. *D. Leisawitz.* 77, 451, 51-B1 (1991)

Model Atmospheres for Rotating B Stars. *George W. Collins II, Ryland J. Truax, & Steven R. Cranmer.* 77, 541, 52-B5 (1991)

A Comparison of the Properties of an Unbiased Sample of OB Associations in the Local Group Galaxies M33 and NGC 6822. *Christine D. Wilson.* 384, L29, 11-B1 (1992)

Non–LTE, Line-blanketed Model Atmospheres for Late O- and Early B-Type Stars. *James A. Grigsby, Nancy D. Morrison, & Lawrence S. Anderson.* 78, 205, 4-D9 (1992)

Constraints on the Surface Magnetic Fields of Hot Stars with Winds. *Murugesapillai Maheswaran & Joseph P. Cassinelli.* 386, 695, 33-G13 (1992)

Carbon, Nitrogen, and Oxygen Abundances in Early B-Type Stars. *Douglas R. Gies & David L. Lambert.* 387, 673, 47-B1 (1992)

π^0-Decay Gamma-Ray Emission from Winds of Massive Stars. *Richard L. White & Wan Chen.* 387, L81, 48-D6 (1992)

Stellar Wind Collision and X-Ray Generation in Massive Binaries. *V. V. Usov.* 389, 635, 69-C10 (1992)

Time Series Observations of O Stars. I. *IUE* Observations of Variability in the Stellar Wind of ζ Puppis. *R. K. Prinja, L. A. Balona, C. T. Bolton, R. A. Crowe, M. S. Fieldus, A. W. Fullerton, D. R. Gies, I. D. Howarth, D. McDavid, & A. H. N. Reid.* 390, 266, 77-C6 (1992)

Hα Observations of Early-Type Stars. *S. Scuderi, G. Bonanno, R. Di Benedetto, D. Spadaro, & N. Panagia.* 392, 201, 103-D7 (1992)

Upper Limit to the Mass of Pulsationally Stable Stars with Uniform Chemical Composition. *Richard B. Stothers.* 392, 706, 111-A7 (1992)

An Opacity Mechanism for the Pulsations of OB Stars. *Arthur N. Cox, Siobahn M. Morgan, Forrest J. Rogers, & Carlos A. Iglesias.* 393, 272, 117-E3 (1992)

Ultraviolet and Optical Spectral Morphology of Melnick 42 and Radcliffe 136a in 30 Doradus. *Nolan R. Walborn, Dennis C. Ebbets, Joel Wm. Parker, Joy Nichols-Bohlin, & Richard L. White.* 393, L13, 120-C1 (1992)

X-Ray Emission from Single Magnetic Early-Type Stars. *V. V. Usov & D. B. Melrose.* 395, 575, 150-B1 (1992)

An *Einstein Observatory* SAO-based Catalog of B-Type Stars. *F. Grillo, S. Sciortino, G. Micela, G. S. Vaiana, & F. R. Harnden, Jr.* 81, 795, 46-G13 (1992)

Newly Identified Main-Sequence A Stars with Circumstellar Dust. *K.-P. Cheng, F. C. Bruhweiler, Y. Kondo, & C. A. Grady.* 396, L83, 167-C1 (1992)

A Homogeneous Catalog of New *UBV* and Hβ Photometry of B- and A-Type Stars in and around the Scorpius-Centaurus OB Association. *Robert W. Slawson, Robert J. Hill, & John D. Landstreet.* 82, 117, 50-E9 (1992)

The Case Low-Dispersion Northern Sky Survey. XIII. A Region in Central Bootes and Corona Borealis. *C. B. Stephenson, Peter Pesch, & D. Jack MacConnell.* 82, 471, 55-D3 (1992)

Two-Stage Starbursts in the Large Magellanic Cloud: N11 as a Once and Future 30 Doradus. *Nolan R. Walborn & Joel Wm. Parker.* 399, L87, 201-C5 (1992)

The Origin of Distant B-Type Stars in the Galactic Halo. *E. S. Conlon, P. L. Dufton, F. P. Keenan, R. J. H. McCausland, & D. Holmgren.* 400, 273, 212-C13 (1992)

Particle Acceleration and Nonthermal Radio Emission in Binaries of Early-Type Stars. *D. Eichler & V. Usov.* 402, 271, 4-D11 (1993)

The Circumstellar Gas Surrounding 51 Ophiuchi: A Candidate Proto–Planetary System Similar to β Pictoris. *C. A. Grady & J. M. S. Silvis.* 402, L61, 12-G1 (1993)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. IV. ι Orionis. *Douglas R. Gies, Michael S. Wiggs, & William G. Bagnuolo, Jr.* 403, 752, 25-B4 (1993)

Evidence for Processed Material in the Atmospheres of Large Magellanic Cloud B Supergiants. *Edward L. Fitzpatrick & Bruce Bohannan.* 404, 734, 38-B1 (1993)

First Detection of Ionized Helium Absorption Lines in Infrared *K* Band Spectra of O-Type Stars. *Peter S. Conti, David L. Block, T. R. Geballe, & Margaret Murray Hanson.* 406, L21, 60-G5 (1993)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. III. 29 UW Canis Majoris. *Michael S. Wiggs & Douglas R. Gies.* 407, 252, 72-B11 (1993)

Far-Ultraviolet Stellar Photometry: A Field in Monoceros. *Edward G. Schmidt & George R. Carruthers.* 408, 484, 91-C1 (1993)

Dynamics of the Envelopes of Be Stars and Shell Stars in the Equatorial Plane: A Potential Similarity and Difference Based upon the Continuous Energy Distribution. *J. M. Marlborough, Haiqi Chen, & L. B. F. M. Waters.* 408, 646, 93-C1 (1993)

Equatorial Disk Formation around Rotating Stars Due to Ram Pressure Confinement by the Stellar Wind. *J. E. Bjorkman & J. P. Cassinelli.* 409, 429, 102-C10 (1993)

Ultraviolet Properties of Individual Hot Stars in Globular Cluster Cores. I. NGC 1904 (M79). *B. Altner & T. A. Matilsky.* 410, 116, 113-E8 (1993)

A Search for Young Stars in the Halo of M31. *R. J. H. McCausland, E. S. Conlon, P. L. Dufton, A. Fitzsimmons, M. J. Irwin, & F. P. Keenan.* 411, 650, 137-G1 (1993)

Goddard High-Resolution Spectrograph Observations of Narrow Discrete Stellar Wind Absorption Features in the Ultraviolet Spectrum of the O7.5 III Star ξ Persei. *Steven N. Shore, Bruce Altner, C. T. Bolton, Jason A. Cardelli, & Dennis C. Ebbets.* 411, 864, 140-E5 (1993)

The Effects of Zonal Atmospheric Currents on the Spectra of Rotating Early-Type Stars. *Steven R. Cranmer & George W. Collins II.* 412, 720, 152-F12 (1993)

What are the Mass-Loss Rates of O Stars? *Henny J. G. L. M. Lamers & Claus Leitherer.* 412, 771, 153-D5 (1993)

Broad-Band X-Ray Telescope Spectroscopy of ζ Puppis. *M. F. Corcoran, J. H. Swank, P. J. Serlemitsos, E. Boldt, R. Petre, F. E. Marshall, K. Jahoda, R. Mushotzky, A. Szymkowiak, K. Arnaud, A. P. Smale, K. Weaver, & S. S. Holt.* 412, 792, 153-F1 (1993)

An H II Region beyond the Optical Disk of the Galaxy. *E. J. de Geus, S. N. Vogel, S. W. Digel, & R. A. Gruendl.* 413, L97, 168-F7 (1993)

Intense Extreme Ultraviolet Emission from the B Star ε Canis Majoris. *John V. Vallerga, Peter W. Vedder, & Barry Y. Welsh.* 414, L65, 185-C11 (1993)

LS II +34°26 is a Low-Mass Post–Asymptotic Giant Branch B Supergiant and Not a Massive Population I B Star Located near the Outer Edge of the Galaxy. *M. Parthasarathy.* 414, L109, 186-A7 (1993)

The Evolution of Stellar Coronae: Initial Results from a *ROSAT* PSPC Observation of IC 2391. *Brian M. Patten & Theodore Simon.* 415, L123, 200-D1 (1993)

Time-Series Observations of O Stars. II. Optical Observations of ζ Ophiuchi. *A. H. N. Reid, C. T. Bolton, R. A. Crowe, M. S. Fieldus, A. W. Fullerton, D. R. Gies, I. D. Howarth, D. McDavid, R. K. Prinja, & K. C. Smith.* 417, 320, 221-E1 (1993)

Time-Series Observations of O Stars. III. *IUE* and *HST* Spectroscopy of ζ Ophiuchi and Implications for the "Photospheric Connection." *Ian D. Howarth, C. T. Bolton, R. A. Crowe, D. C. Ebbets, M. S. Fieldus, A. W. Fullerton, D. R. Gies, D. McDavid, R. K. Prinja, A. H. N. Reid, S. N. Shore, & K. C. Smith.* 417, 338, 221-F10 (1993)

The Diffuse Ionized Interstellar Medium: Structures Resulting from Ionization by O Stars. *Walter Warren Miller III & Donald P. Cox.* 417, 579, 226-E7 (1993)

Angular Momentum Transfer by Tidally Forced Oscillations in Massive Main-Sequence Stars. *Umin Lee.* 417, 697, 228-A13 (1993)

Model Atmosphere and Kinematical Analyses of Early-Type, High Galactic Latitude Stellar Candidates from the UKST *UBVRI* Survey. *N. C. Hambly, E. S. Conlon, P. L. Dufton, F. P. Keenan, J. E. Little, & L. Miller.* 417, 706, 228-B10 (1993)

The Weak *s*-Component and Nucleosynthesis in Massive Stars. *C. M. Raiteri, R. Gallino, M. Busso, D. Neuberger, & F. Käppeler.* 419, 207, 248-G1 (1993)

The Abundances of the Elements in Sharp-lined Early-Type Stars from *IUE* High-Dispersion Spectrograms. I. Cr, Mn, Fe, Ni, and Co. *Saul J. Adelman, Charles R. Cowley, David S. Leckrone, Scott W. Roby, & Glenn M. Wahlgren.* 419, 276, 249-E11 (1993)

Far-Ultraviolet Stellar Photometry: A Field in Orion. *Edward G. Schmidt & George R. Carruthers.* 89, 259, 53-B2 (1993)

MK Spectral Types for OB^+ Stars in the Southern Milky Way. *Jyotsna Vijapurkar & John S. Drilling.* 89, 293, 53-E8 (1993)

Differential Rotation and the Convective Core Mass of Upper Main-Sequence Stars. *Maurice J. Clement.* 420, 797, 12-G3 (1994)

On the Determination of the Number of O Stars in H II Regions and Starburst Galaxies. *William D. Vacca.* 421, 140, 17-F13 (1994)

Clumping and Mass Loss in Hot Star Winds. *Anthony F. J. Moffat & Carmelle Robert.* 421, 310, 19-G1 (1994)

Mapping the Radio Emission from Massive Young Stellar Objects. *Melvin G. Hoare, Janet E. Drew, Tom B. Muxlow, & Richard J. Davis.* 421, L51, 22-B7 (1994)

X-Ray Emission from Near–Main-Sequence B Stars. *J. P. Cassinelli, D. H. Cohen, J. J. MacFarlane, W. T. Sanders, & B. Y. Welsh.* 421, 705, 27-A8 (1994)

HD 53975: An O-Type Spectroscopic Binary with a Large Mass Ratio. *D. R. Gies, A. W. Fullerton, C. T. Bolton, W. G. Bagnuolo, Jr., M. E. Hahula, & R. Wiemker.* 422, 823, 42-B6 (1994)

Tomographic Separation of Composite Spectra. II. The Components of 29 UW Canis Majoris. *William G. Bagnuolo, Jr., Douglas R. Gies, Michael E. Hahula, Rafael Wiemker, & Michael S. Wiggs.* 423, 446, 51-F7 (1994)

HST UV Imaging of the Starburst Regions in the Wolf-Rayet Galaxy He 2-10: Newly Formed Globular Clusters? *Peter S. Conti & William D. Vacca.* 423, L97, 60-D5 (1994)

K-Band Spectroscopy of OB Stars: A Preliminary Classification. *Margaret Murray Hanson & Peter S. Conti.* 423, L139, 61-C7 (1994)

Two-dimensional Hydrodynamical Simulations of Wind-compressed Disks around Rapidly Rotating B Stars. *Stanley P. Owocki, Steven R. Cranmer, & John M. Blondin.* 424, 887, 75-G2 (1994)

O Star Giant Bubbles in M33. *M. S. Oey & Philip Massey.* 425, 635, 89-E1 (1994)

The Initial Mass Function for Massive Stars in the Magellanic Clouds. I. *UBV* Photometry and Color-Magnitude Diagrams for 14 OB Associations. *Robert J. Hill, Barry F. Madore, & Wendy L. Freedman.* 91, 583, 27-C8 (1994)

Chemical Evolution of the Orion Association. II. The Carbon, Nitrogen, Oxygen, Silicon, and Iron Abundances of Main-Sequence B Stars. *Katia Cunha & David L. Lambert.* 426, 170, 98-C5 (1994)

Low-Velocity Variability in the Stellar Wind of HD 152408 (O8: Iafpe). *Raman K. Prinja & A. W. Fullerton.* 426, 345, 100-D12 (1994)

Spectrum of IC 2149 and Its Central Star. *Walter A. Feibelman, Siek Hyung, & Lawrence H. Aller.* 426, 653, 106-E6 (1994)

Evolution of Solitary Density Waves in Stellar Winds of Early-Type Stars: A Simple Explanation of Discrete Absorption Component Behavior. *Wayne L. Waldron, Larry Klein, & Bruce Altner.* 426, 725, 107-D10 (1994)

Optical and H I Observations of High-Velocity Gas toward HD 203664. *J. E. Little, P. L. Dufton, F. P. Keenan, E. S. Conlon, & R. D. Davies.* 427, 267, 113-C8 (1994)

An *IUE* Survey of Interstellar H I Lyman-Alpha Absorption. II. Interpretations. *Athanassios Diplas & Blair D. Savage.* 427, 274, 113-D1 (1994)

On the Existence of a Surface Boundary Layer in a Slowly Rotating, Early-Type Star. *Monique Tassoul.* 427, 388, 114-F3 (1994)

Hubble Space Telescope Fine Guidance Sensor Interferometric Observations of the Core of 30 Doradus. *M. G. Lattanzi, J. L. Hershey, R. Burg, L. G. Taff, S. T. Holfeltz, B. Bucciarelli, I. N. Evans, R. Gilmozzi, J. Pringle, & N. R. Walborn.* 427, L21, 117-D1 (1994)

The Role of Radiative Acceleration in Outflows from Broad Absorption Line QSOs. I. Comparison with O Star Winds. *Nahum Arav & Zhi-Yun Li.* 427, 700, 121-D7 (1994)

Circumstellar Dust Emission Models. *Mark G. Wolfire & Ed Churchwell.* 427, 889, 123-F6 (1994)

The Initial Mass Function for Massive Stars in the Magellanic Clouds. II. Interstellar Reddening toward 14 OB Associations. *Robert J. Hill, Barry F. Madore, & Wendy L. Freedman.* 429, 192, 146-D12 (1994)

Vega: A Rapidly Rotating Pole-on Star. *Austin F. Gulliver, Graham Hill, & Saul J. Adelman.* 429, L81, 158-C9 (1994)

An *IUE* Survey of Interstellar H I Lyα Absorption. I. Column Densities. *Athanassios Diplas & Blair D. Savage.* 93, 211, 44-F1 (1994)

Galactic Stars Applied to Tests of the Criterion for Convection and Semiconvection in an Inhomgeneous Star. *Richard B. Stothers & Chao-wen Chin.* 431, 797, 188-E6 (1994)

A Multisite *UBV* Photometric Campaign on 53 Persei in 1991 January. *L. Huang, Z. Guo, J. Hao, J. R. Percy, M. S. Fieldus, R. Fried, K Pavlovski, H. Božić, Ž. Ružić, M. Paparó, & B. Vetö.* 431, 850, 189-C5 (1994)

Atmospheric Parameters of Field Subdwarf B Stars. *Rex A. Saffer, P. Bergeron, D. Koester, & James Liebert.* 432, 351, 197-E1 (1994)

ROSAT HRI Observations of Hot Stars in the Orion Nebula. *Jean-Pierre Caillault, Marc Gagné, & John R. Stauffer.* 432, 386, 198-A2 (1994)

Ultraviolet Spectral Classification and Stellar Winds in a Sample of Be and Standard Stars. *Arne Slettebak.* 94, 163, 54-A5 (1994)

Analysis of Helium-rich Subdwarf O Stars. I. NLTE Models, Methods, and Fits for 21 Palomar Green Survey sdO's. *P. Thejll, F. Bauer, R. Saffer, J. Liebert, D. Kunze, & H. L. Shipman.* 433, 819, 221-C12 (1994)

First *Hubble Space Telescope* Observations of the Brightest Stars in the Virgo Galaxy M100 = NGC 4321. *Wendy L. Freedman, Barry F. Madore, Peter B. Stetson, Shaun M. G. Hughes, Jon A. Holtzman, Jeremy R. Mould, John T. Trauger, John S. Gallagher III, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Laura Ferrarese, Holland Ford, J. A. Graham, Richard E. Griffiths, J. Jeff Hester, Robert Hill, John G. Hoessel, John Huchra, Robert C. Kennicutt, Paul A. Scowen, Bill Sparks, Karl R. Stapelfeldt, Alan M. Watson, & Jim Westphal.* 435, L31, 251-G9 (1994)

GHRS Spectroscopy of Individual Stars in R136a. *Sara R. Heap, Dennis Ebbets, Eliot M. Malumuth, Stephen P. Maran, Alex de Koter, & Ivan Hubeny.* 435, L39, 252-A11 (1994)

Theoretical Modeling of GHRS Observations of the Of/WN-Type Star R136a5. *Alex de Koter, Ivan Hubeny, Sara R. Heap, & Thierry Lanz.* 435, L71, 252-F9 (1994)

ASCA Solid State Imaging Spectrometer Observations of O Stars. *M. F. Corcoran, W. L. Waldron, J. J. MacFarlane, W. Chen, A. M. T. Pollock, K. Torii, S. Kitamoto, N. Miura, M. Egoshi, & Y. Ohno.* 436, L95, 270-B1 (1994)

An Atlas of Ultraviolet P Cygni Profiles. *Theodore P. Snow, Henny J. G. L. M. Lamers, Douglas M. Lindholm, & Andrew P. Odell.* 95, 163, 66-C8 (1994)

On the Massive Star–forming Capacity of Molecular Clouds. *José Franco, Steven N. Shore, & Guillermo Tenorio-Tagle.* 436, 795, 276-E6 (1994)

Studies of Binary Stars in the Magellanic Clouds. II. Spectroscopic Orbits of Four Massive Eclipsing Binaries. *Virpi S. Niemela & Lilia P. Bassino.* 437, 332, 287-F11 (1994)

X-Ray–induced Ionization in the Winds of Near–Main-Sequence O and B Stars. *J. J. MacFarlane, D. H. Cohen, & P. Wang.* 437, 351, 288-A11 (1994)

Reaction Rates for $^{18}O(\alpha,\gamma)^{22}Ne$, $^{22}Ne(\alpha,\gamma)^{26}Mg$, and $^{22}Ne(\alpha,n)^{25}Mg$ in Stellar Helium Burning and *s*-Process Nucleosynthesis in Massive Stars. *F. Käppeler, M. Wiescher, U. Giesen, J. Görres, I. Baraffe, M. El Eid, C. M. Raiteri, M. Busso, R. Gallino, M. Limongi, & A. Chieffi.* 437, 396, 288-E10 (1994)

Massive Stars in the Field and Associations of the Magellanic Clouds: The Upper Mass Limit, the Initial Mass Function, and a Critical Test of Main-Sequence Stellar Evolutionary Theory. *Philip Massey, Cornelia C. Lang, Kathleen DeGioia-Eastwood, & Catharine D. Garmany.* 438, 188, 4-A2 (1995)

HD 93521, ζ Ophiuchi, and the Effects of Rapid Rotation on the Atmospheres and Winds of O9.5 V Stars. *Derck Massa.* 438, 376, 6-F1 (1995)

Photoevaporating Stellar Envelopes Observed with Rayleigh Beacon Adaptive Optics. *P. R. McCullough, R. Q. Fugate, J. C. Christou, B. L. Ellerbroek, C. H. Higgins, J. M. Spinhirne, R. A. Cleis, & J. F. Moroney.* 438, 394, 6-G11 (1995)

EUVE Spectroscopy of ε Canis Majoris (B2 II) from 70 to 730 Å. *J. P. Cassinelli, D. H. Cohen, J. J. MacFarlane, J. E. Drew, A. E. Lynas-Gray, M. G. Hoare, J. V. Vallerga, B. Y. Welsh, P. W. Vedder, I. Hubeny, & T. Lanz.* 438, 932, 17-A8 (1995)

Stellar Evolution with Arbitrary Rotation Laws. II. Massive Star Evolution to Core Hydrogen Exhaustion. *Robert G. Deupree.* 439, 357, 26-B1 (1995)

Stellar-Wind Variability in *IUE* Spectra of 68 Cygni. *Ian D. Howarth & Keith C. Smith.* 439, 431, 27-B3 (1995)

Non-LTE Line-blanketed Model Atmospheres of Hot Stars. I. Hybrid Complete Linearization/Accelerated Lambda Iteration Method. *I. Hubeny & T. Lanz.* 439, 875, 36-F8 (1995)

Resolution of Massive Compact Clusters in the 30 Doradus Periphery with the *Hubble Space Telescope*. *Nolan R. Walborn, John W. MacKenty, Abhijit Saha, Richard L. White, & Joel Wm. Parker.* 439, L47, 40-D5 (1995)

Hα Emission and Absorption from a Localized Region above the Surface of a Be Star. *J. M. Marlborough.* 440, 303, 45-C12 (1995)

The Effect of Oblateness and Gravity Darkening on the Radiation Driving in Winds from Rapidly Rotating B Stars. *Steven R. Cranmer & Stanley P. Owocki.* 440, 308, 45-D6 (1995)

Meridional Circulation in Rotating Stars. XI. Single-Cell Pattern versus Double-Cell Pattern. *Monique Tassoul & Jean-Louis Tassoul.* 440, 789, 54-A4 (1995)

Far-Ultraviolet Stellar Photometry: Fields in Sagittarius and Scorpius. *Edward G. Schmidt & George R. Carruthers.* 96, 605, 10-A8 (1995)

A Comparison of Near-Infrared Spectra of the Galactic Center Compact He I Emission-Line Sources and Early-Type Mass-losing Stars. *R. D. Blum, D. L. DePoy, & K. Sellgren.* 441, 603, 70-D7 (1995)

High-Density CN Filaments in NGC 2023. *A. Fuente, J. Martín-Pintado, & R. Gaume.* 442, L33, 85-A11 (1995)

The Threshold for Stellar Winds in Hot Main-Sequence Stars. *James A. Grigsby & Nancy D. Morrison.* 442, 794, 91-B7 (1995)

Of-Type Stars HD 16691 and HD 190429 Show WN-like Spectra in Infrared *K* Band. *Peter S. Conti, Margaret Murray Hanson, Patrick W. Morris, Allan J. Willis, & Stephen J. Fossey.* 445, L35, 140-F11 (1995)

Studies of Hot B Subdwarfs. X. The Distribution and Space Density of Hot, Hydrogen-rich Subdwarfs Determined from the Palomar-Green Survey. *B. Villeneuve, F. Wesemael, G. Fontaine, C. Carignan, & R. F. Green.* 446, 646, 165-A13 (1995)

New Insights into Nonradiative Heating in Late A Star Chromospheres. *Frederick M. Walter, Lynn D. Matthews, & Jeffrey L. Linsky.* 447, 353, 177-C6 (1995)

Two New Wolf-Rayet Stars and a Luminous Blue Variable Star in the Quintuplet (AFGL 2004) near the Galactic Center. *Donald F. Figer, Ian S. McLean, & Mark Morris.* 447, L29, 180-G9 (1995)

HST/GHRS Observations of the β Pictoris System: Basic Parameters of the Age of the System. *Thierry Lanz, Sara R. Heap, & Ivan Hubeny.* 447, L41, 181-B5 (1995)

A 325 Square Degree Survey of B-Type Stars at High Galactic Latitudes. *J. E. Little, P. L. Dufton, F. P. Keenan, N. C. Hambly, E. S. Conlon, P. J. F. Brown, & L. Miller.* 447, 783, 186-F11 (1995)

Binary Models for the Solar Neighborhood and Magellanic Cloud W-R Populations. *William W. Dalton & Craig L. Sarazin.* 448, 369, 197-C6 (1995)

Identification of Ionizing Sources and Young Stellar Objects in M17. *Margaret Murray Hanson & Peter S. Conti.* 448, L45, 200-A9 (1995)

The Relation between Rotational Velocities and Spectral Peculiarities among A-Type Stars. *Helmut A. Abt & Nidia I. Morrell.* 99, 135, 36-A1 (1995)

Atlas of Synthetic Ultraviolet Spectra of Massive Star Populations. *Claus Leitherer, Carmelle Robert, & Timothy M. Heckman.* 99, 173, 36-F1 (1995)

A Photometric and Spectroscopic Survey for Young Stars in the Halo of M31. *N. C. Hambly, A. Fitzsimmons, F. P. Keenan, P. L. Dufton, P. J. F. Brown, M. J. Irwin, & W. R. J. Rolleston.* 448, 628, 203-D9 (1995)

Tomographic Separation of Composite Spectra. III. Ultraviolet Detection of the Hot Companion of φ Persei. *Michelle L. Thaller, William G. Bagnuolo, Jr., Douglas R. Gies, & Laura R. Penny.* 448, 878, 207-A10 (1995)

Far-Ultraviolet (912–1900 Å) Energy Distribution in Early-Type Main-Sequence Stars. *M. Chavez, R. Stalio, & J. B. Holberg.* 449, 280, 214-A7 (1995)

CNO Abundances and the Evolutionary Status of Galactic, A-Type Supergiants. *Kim A. Venn.* 449, 839, 224-C11 (1995)

The Massive Star Populations in Ionized Gas Shells in M33 and M31. *Deidre A. Hunter, Danielle M. Boyd, & Walter N. Hawley.* 99, 551, 42-F9 (1995)

Radio Continuum Measurements of Southern Early-Type Stars. *Claus Leitherer, Jessica M. Chapman, & Bärbel Koribalski.* 450, 289, 232-A7 (1995)

Wind-Wind Interaction in the Close Wolf-Rayet Binary CQ Cephei (WN6+O9 II–Ib). *S. V. Marchenko, A. F. J. Moffat, P. R. J. Eenens, G. M. Hill, & A. Grandchamps.* 450, 811, 241-G10 (1995)

Studies of Hot B Subdwarfs. XI. A Redetermination of the Density of Hot, Hydrogen-rich Subdwarfs in the Galactic Plane. *B. Villeneuve, F. Wesemael, & G. Fontaine.* 450, 851, 242-F7 (1995)

Are Galaxies Optically Thin to Their Own Lyman-Continuum Radiation? I. M33. *Kanan Patel & Christine D. Wilson.* 451, 607, 255-E11 (1995)

The Massive Stars of I Zw 18 as Seen in *Hubble Space Telescope* Images. *Deidre A. Hunter & Harley A. Thronson, Jr.* 452, 238, 265-D1 (1995)

The *IUE* MEGA Campaign: Wind Variability and Rotation in Early-Type Stars. *D. Massa, A. W. Fullerton, J. S. Nichols, S. P. Owocki, R. K. Prinja, N. St-Louis, A. J. Willis, B. Altner, C. T. Bolton, J. P. Cassinelli, D. Cohen, R. G. Cooper, A. Feldmeier, K. G. Gayley, T. Harries, S. R. Heap, R. N. Henriksen, I. D. Howarth, I. Hubeny, E. Kambe, L. Kaper, G. Koenigsberger, S. Marchenko, S. R. McCandliss, A. F. J. Moffat, T. Nugis, J. Puls, C. Robert, R. E. Schulte-Ladbeck, L. J. Smith, M. A. Smith, W. L. Waldron, & R. L. White.* 452, L53, 270-C8 (1995)

The *IUE* MEGA Campaign: Wind Structure and Variability of HD 50896 (WN5). *Nicole St-Louis, M. J. Dalton, S. V. Marchenko, A. F. J. Moffat, & A. J. Willis.* 452, L57, 270-D3 (1995)

The *IUE* MEGA Campaign: Modulated Structure in the Wind of HD 64760 (B0.5 Ib). *Raman K. Prinja, Derck Massa, & Alexander W. Fullerton.* 452, L61, 270-D13 (1995)

The *IUE* MEGA Campaign: The Rotationally Modulated Wind of ζ Puppis. *Ian D. Howarth, Raman K. Prinja, & Derck Massa.* 452, L65, 270-E6 (1995)

Wind Variability of B Supergiants. I. The Rapid Rotator HD 64760 (B0.5 Ib). *Derck Massa, Raman K. Prinja, & Alexander W. Fullerton.* 452, 842, 276-C7 (1995)

C IV and O VI Transitions in the Region λλ1100–2000 and Examples Found in *IUE* Spectra of Hot Stars. *Walter A. Feibelman & Sveneric Johansson.* 100, 405, 51-F3 (1995)

A Study of the Spectra of Seven Of Stars. I. Radial Velocities. *Anne B. Underhill.* 100, 433, 52-A10 (1995)

A Study of the Spectra of Seven Of Stars. II. Line Profiles and Equivalent Widths. *Anne B. Underhill.* 100, 461, 52-C13 (1995)

Are Galaxies Optically Thin to Their Own Lyman-Continuum Radiation? II. NGC 6822. *Kanan Patel & Christine D. Wilson.* 453, 162, 283-D13 (1995)

The Solution Topology of Radiation-driven Winds. I. The X-Type Nature of the CAK Critical Point. *J. E. Bjorkman.* 453, 369, 286-B13 (1995)

Periodic Variations in Ultraviolet Spectral Lines of the B0.5 Ib Star HD 64760: Evidence for Corotating Wind Streams Rooted in Surface Variations. *Stanley P. Owocki, Steven R. Cranmer, & Alexander W. Fullerton.* 453, L37, 289-G1 (1995)

The Initial Mass Function and Massive Star Evolution in the OB Associations of the Northern Milky Way. *Philip Massey, Kelsey E. Johnson, & Kathleen DeGioia-Eastwood.* 454, 151, 301-C12 (1995)

An Improved Line-Strength Parameterization in Hot-Star Winds. *Kenneth G. Gayley.* 454, 410, 305-A4 (1995)

A Reconnaissance of the 900–1200 Å Spectra of Early O Stars in the Magellanic Clouds. *Nolan R. Walborn, Knox S. Long, Daniel J. Lennon, & Rolf-Peter Kudritzki.* 454, L27, 307-F9 (1995)

Terminal Velocities and the Bistability of Stellar Winds. *Henny J. G. L. M. Lamers, Theodore P. Snow, & Douglas M. Lindholm.* 455, 269, 321-G7 (1995)

A Non-LTE Analysis of the ζ Aurigae B-Type Secondary. I. Determination of the Fundamental Stellar Parameters. *Philip D. Bennett, Alexander Brown, & Jeffrey L. Linsky.* 455, 317, 322-D14 (1995)

Interstellar Extinction from 0.35 to 2.2 Microns: A Study Based on Luminous Southern Stars. *Lida He, D. C. B. Whittet, D. Kilkenny, & J. H. Spencer Jones.* 101, 335, 58-D12 (1995)

STARS: ECLIPSING BINARIES

The Orbital Ephemeris and Eclipse Transitions of the Low-Mass X-Ray Binary EXO 0748−676. *A. N. Parmar, A. P. Smale, F. Verbunt, & R. H. D. Corbet.* 366, 253, 4-B9 (1991)

Interpreting Epsilon Aurigae. *Sean M. Carroll, Edward F. Guinan, George P. McCook, & Robert A. Donahue.* 367, 278, 15-E1 (1991)

Multimission Observations of 4U 1538−52. *L. R. Cominsky & F. Moraes.* 370, 670, 56-F10 (1991)

Analysis and Solution of the Light and Radial Velocity Curves of the Contact Binary TY Bootis. *E. F. Milone, G. Groisman, D. J. I. Fry, & D. H. Bradstreet.* 370, 677, 56-G5 (1991)

A Light Synthesis Study of W Ursae Majoris. *Albert P. Linnell.* 374, 307, 102-A1 (1991)

On the Nature of the Anomalously Slow Apsidal Motion of DI Herculis. *Kh. F. Khaliullin, S. A. Khodykin, & A. I. Zakharov.* 375, 314, 114-G1 (1991)

Mass Loss in the 96 Day Binary UU Cancri. *Joel A. Eaton, Douglas S. Hall, & R. Kent Honeycutt.* 376, 289, 128-E1 (1991)

Simultaneous Light and Radial Velocity Curve Solutions for U Cephei. *J. B. Rafert & N. L. Markworth.* 377, 278, 141-D5 (1991)

On the Nature and Evolution of the Windy Binary Pulsar PSR 1744−24A. *Jacob Shaham & Marco Tavani.* 377, 588, 147-A11 (1991)

Eclipse Studies of the Dwarf Nova HT Cassiopeiae. I. Observations and System Parameters. *Keith Horne, Janet H. Wood, & Rae F. Stiening.* 378, 271, 154-C11 (1991)

IUE Investigation of Mass Flow in the Interacting Binary U Sagittae. *George E. McCluskey, Jr., Carolina Paciencia Salas McCluskey, & Yoji Kondo.* 378, 281, 154-D9 (1991)

Evidence for External Plasma around the K Dwarf Component of the Eclipsing Binary V471 Tauri. *Arthur Young, Lee Rottler, & Andrew Skumanich.* 378, L25, 157-D1 (1991)

The Ultraviolet Light Curves of W Ursae Majoris. *Albert P. Linnell.* 379, 338, 167-C3 (1991)

Wind Collision Effects in the Early-Type Close Binaries HD 47129 and AO Cassiopeiae. *Jorge Sahade & Estela Brandi.* 379, 706, 173-E1 (1991)

The Eclipsing AM Herculis Variable H1907+690. *R. A. Remillard, B. A. Stroozas, S. Tapia, & A. Silber.* 379, 715, 173-E13 (1991)

Does SV Centauri Harbor an Accretion Disk? *Albert P. Linnell & Xania Scheick.* 379, 721, 173-F7 (1991)

High-Precision Timing of Millisecond Pulsars. II. Astrometry, Orbital Evolution, and Eclipses of PSR 1957+20. *M. F. Ryba & J. H. Taylor.* 380, 557, 185-B7 (1991)

A Connection between Long-Term Luminosity Variations and Orbital Period Changes in Chromospherically Active Binaries. *Douglas S. Hall.* 380, L85, 188-F1 (1991)

Outflow Hydrodynamics in the Eclipsing Millisecond Pulsar Binaries PSR 1957+20 and PSR 1744−24A. *Marco Tavani & Leigh Brookshaw.* 381, L21, 194-C13 (1991)

IUE Spectra of the Eclipsing Binary NN Serpentis. *Janet H. Wood & Thomas R. Marsh.* 381, 551, 197-E1 (1991)

A Test of the Starspot Hypothesis for W-Type W Ursae Majoris Light Curves. *Albert P. Linnell.* 383, 330, 216-C8 (1991)

STARS: EMISSION-LINE

The Near-Infrared Spectra of Low-Mass X-Ray Binaries and Related Objects. *A. P. Cowley, P. C. Schmidtke, D. Crampton, J. B. Hutchings, & M. Bolte.* 373, 228, 88-G1 (1991)

Bowen Fluorescence in AM Herculis Stars. *Jonathan Schachter, Alexei V. Filippenko, Steven M. Kahn, & Frits B. S. Paerels.* 373, 633, 95-G4 (1991)

Ultraviolet High-Excitation Fe II Fluorescence Lines Excited by O VI, C IV, and H I Resonance Emission As Seen in *IUE* Spectra. *Walter A. Feibelman, Frederick C. Bruhweiler, & Sveneric Johansson.* 373, 649, 96-A8 (1991)

Rotation and Emission Lines in Stars and Accretion Disks. *Keith Horne & Steven H. Saar.* 374, L55, 110-D6 (1991)

The Many Faces of F Stars: A Rotational Modulation Study of Capella, Procyon, and Caph with the *International Ultraviolet Explorer*. *Thomas R. Ayres.* 375, 704, 121-D11 (1991)

Ultraviolet Fe VII Absorption and Fe II Emission Lines of Central Stars of Planetary Nebulae. *Kwang-Ping Cheng, Walter A. Feibelman, & Frederick C. Bruhweiler.* 377, 235, 140-G7 (1991)

Heating Mechanism(s) for Transition Layers in Giants. *Erika Böhm-Vitense & José Mena-Werth.* 378, 718, 161-C8 (1991)

Predicted Extreme-Ultraviolet Line Emission for Nearby Main-Sequence B Stars. *J. J. MacFarlane, J. P. Cassinelli, B. Y. Welsh, P. W. Vedder, J. V. Vallerga, & W. L. Waldron.* 380, 564, 185-C1 (1991)

N III Line Emission in Planetary Nebulae: Not Bowen Fluorescence. *S. O. Kastner & A. K. Bhatia.* 381, L59, 199-D7 (1991)

STARS: EMISSION-LINE, BE

Dynamics of the Envelopes of Be Stars in the Equatorial Plane. *Haiqi Chen, J. M. Marlborough, & L. B. F. M. Waters.* 384, 605, 9-F1 (1992)

A Catalog of Co-added *IRAS* Fluxes of Orion Population Stars. *Wm. Bruce Weaver & Gordon Jones.* 78, 239, 4-G7 (1992)

Winds from T Tauri Stars. II. Balmer Line Profiles for Inner Disk Winds. *Nuria Calvet, Lee Hartmann, & Robert Hewett.* 386, 229, 27-A9 (1992)

Balmer Line Profiles for Infalling T Tauri Envelopes. *Nuria Calvet & Lee Hartmann.* 386, 239, 27-B8 (1992)

Properties of the Massive X-Ray Binary 4U 1700−37 = HD 153919. *S. R. Heap & M. F. Corcoran.* 387, 340, 41-B11 (1992)

PSR 1259−63: A Binary Radio Pulsar with a Be Star Companion. *Simon Johnston, R. N. Manchester, A. G. Lyne, M. Bailes, V. M. Kaspi, Qiao Guojun, & N. D'Amico.* 387, L37, 43-E1 (1992)

Time Variations in Millimeter-Wave Radio Recombination Lines from the Be Star MWC 349A. *M. A. Gordon.* 387, 701, 47-D5 (1992)

The 3 Micron Spectrum of the Classical Be Star β Monocerotis A. *K. Sellgren & R. G. Smith.* 388, 178, 51-B13 (1992)

Fe II Fluorescence and Anomalous C IV Doublet Intensities in Symbiotic Novae. *A. G. Michalitsianos, M. Kafatos, & S. R. Meier.* 389, 649, 69-D12 (1992)

The X-Ray Outburst from X0115+634 in 1990 February. *Keisuke Tamura, Hiroshi Tsunemi, Shunji Kitamoto, Kiyoshi Hayashida, & Fumiaki Nagase.* 389, 676, 69-G1 (1992)

N III Line Emission in Planetary Nebulae: Continuum Fluorescence. *G. J. Ferland.* 389, L63, 73-D1 (1992)

Carbon and Nitrogen Abundances Determined from Transition Layer Lines. *Erika Böhm-Vitense & José Mena-Werth.* 390, 253, 77-B4 (1992)

Propagating Absorption Enhancements in the Wind of the Extreme Of Supergiant HD 151804. *A. W. Fullerton, D. R. Gies, & C. T. Bolton.* 390, 650, 83-D1 (1992)

Hα Observations of Early-Type Stars. *S. Scuderi, G. Bonanno, R. Di Benedetto, D. Spadaro, & N. Panagia.* 392, 201, 103-D7 (1992)

Physical Properties of Be Star Envelopes from Balmer and Fe II Emission Lines. *Arne Slettebak, George W. Collins II, & Ryland Truax.* 81, 335, 39-D13 (1992)

Emission-Line Studies of Young Stars. III. Correlations with the Infrared Excess. *Fred Hamann & S. E. Persson.* 394, 628, 137-C5 (1992)

Dynamics of the Envelopes of Be Stars in the Equatorial Plane. II. The Influence of a Weak Magnetic Field on the Azimuthal Motion of a Slowly

Expanding Wind. *Haiqi Chen & J. M. Marlborough.* 397, 242, 171-A3 (1992)

Emission-Line Studies of Young Stars. I. The T Tauri Stars. *Fred Hamann & S. E. Persson.* 82, 247, 52-F9 (1992)

Emission-Line Studies of Young Stars. II. The Herbig Ae/Be Stars. *Fred Hamann & S. E. Persson.* 82, 285, 53-C11 (1992)

Herbig Ae/Be Stars: Intermediate-Mass Stars Surrounded by Massive Circumstellar Accretion Disks. *Lynne A. Hillenbrand, Stephen E. Strom, Frederick J. Vrba, & Jocelyn Keene.* 397, 613, 178-F1 (1992)

The Near-Infrared [Fe II] Lines of MWC 922. *Richard J. Rudy, Peter Erwin, George S. Rossano, & R. C. Puetter.* 398, 278, 185-C1 (1992)

Polarization and the Envelopes of B[e] Supergiants in the Magellanic Clouds. *A. M. Magalhães.* 398, 286, 185-C11 (1992)

EXOSAT Observations of the Be/X-Ray Binary 4U 2206+54. *Priyamvada Saraswat & Krishna M. V. Apparao.* 401, 678, 231-A1 (1992)

Evidence for a Bipolar Nebula around the Peculiar B[e] Star HD 45677 from Ultraviolet Spectropolarimetry. *R. E. Schulte-Ladbeck, D. S. Shepherd, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, M. Taylor, & B. A. Whitney.* 401, L105, 233-D12 (1992)

The Distant Future of Solar Activity: A Case Study of β Hydri. II. Chromospheric Activity and Variability. *D. Dravins, P. Linde, K. Fredga, & G. F. Gahm.* 403, 396, 18-F9 (1993)

The Evolutionary Status of the Pulsar–Be Star Binary PSR 1259−63. *A. R. King.* 405, 727, 52-B5 (1993)

Dynamic Processes in Be Star Atmospheres. I. "Dimple" Formation in the He sci λ6678 Line of λ Eridani. *Myron A. Smith & Ronald S. Polidan.* 408, 323, 87-B8 (1993)

Dynamics of the Envelopes of Be Stars and Shell Stars in the Equatorial Plane: A Potential Similarity and Difference Based upon the Continuous Energy Distribution. *J. M. Marlborough, Haiqi Chen, & L. B. F. M. Waters.* 408, 646, 93-C1 (1993)

Equatorial Disk Formation around Rotating Stars Due to Ram Pressure Confinement by the Stellar Wind. *J. E. Bjorkman & J. P. Cassinelli.* 409, 429, 102-C10 (1993)

The Origin of Forbidden Line Emission from Young Stellar Objects. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 409, 748, 108-D3 (1993)

A Giant X-Ray Flare on λ Eridani (B2e). *Myron A. Smith, Carol A. Grady, Geraldine J. Peters, & Eric D. Feigelson.* 409, L49, 111-D1 (1993)

Ultraviolet Continuum Variability and Visual Flickering in the Peculiar Object MWC 560. *A. G. Michalitsianos, M. Perez, S. N. Shore, S. P. Maran, M. Karovska, G. Sonneborn, J. R. Webb, Thomas G. Barnes III, Marian L. Frueh, R. J. Oliversen, & S. G. Starrfield.* 409, L53, 111-D8 (1993)

Magnetohydrodynamic Flows in Be Stars: Variable Energy Flux and Heat Input Distribution. *María Elena Iglesias & Adela E. Ringuelet.* 411, 342, 131-E3 (1993)

Rigorous Treatment of the Radiative Transfer Problem in Stellar Winds: Significance of the Velocity Law and the Chromosphere in the Hα Profile. *Lydia S. Cidale & Adela E. Ringuelet.* 411, 874, 140-F5 (1993)

A High-Sensitivity Survey of Radio Continuum Emission from Herbig Ae/Be Stars. *Stephen L. Skinner, Alexander Brown, & Ron T. Stewart.* 87, 217, 29-G13 (1993)

Ultraviolet Spectropolarimetry of the Be Star PP Carinae with the Wisconsin Ultraviolet Photo-Polarimeter Experiment. *K. S. Bjorkman, M. R. Meade, K. H. Nordsieck, C. M. Anderson, B. L. Babler, G. C. Clayton, A. D. Code, A. M. Magalhães, R. E. Schulte-Ladbeck, M. Taylor, & B. A. Whitney.* 412, 810, 153-G11 (1993)

Detection of Accreting Gas toward HD 45677: A Newly Recognized, Herbig Be Proto–Planetary System. *C. A. Grady, K. S. Bjorkman, D. Shepherd, R. E. Schulte-Ladbeck, M. R. Pérez, D. de Winter, & P. S. Thé.* 415, L39, 192-B6 (1993)

On the Interpretation of the Ultraviolet Spectra of Symbiotic Stars and Recurrent Novae. I. *Steven N. Shore & Jason P. Aufdenberg.* 416, 355, 205-D10 (1993)

The Asymmetric Envelope of γ Cassiopeiae Observed with the Mk III Optical Interferometer. *A. Quirrenbach, C. A. Hummel, D. F. Buscher, J. T. Armstrong, D. Mozurkewich, & N. M. Elias II.* 416, L25, 207-D7 (1993)

Detection, Identification, and Observed Properties of Large Magellanic Cloud Supersoft X-Ray Sources. *A. P. Cowley, P. C. Schmidtke, J. B. Hutchings, D. Crampton, & T. K. McGrath.* 418, L63, 245-B13 (1993)

Expanding Atmospheric Model Including a Chromosphere. I. Study of the Infrared Excess in Be Stars. *Andrea C. Vázquez, Lydia S. Cidale, & Adela E. Ringuelet.* 419, 286, 249-F10 (1993)

Helium Line Emission from Be Stars. *Krishna M. V. Apparao & S. P. Tarafdar.* 420, 803, 12-G12 (1994)

A Study of the Spectrum of HD 108, An Unusual Of Star. *Anne B. Underhill.* 420, 869, 13-F6 (1994)

The Nature of the Radio Recombination Line Emission from MWC 349A. *M. A. Gordon.* 421, 314, 19-G7 (1994)

Ca II H and K and Hα Emissions in Chromospherically Active Binary Systems (RS Canum Venaticorum and BY Draconis). *M. J. Fernández-Figueroa, D. Montes, E. De Castro, & M. Cornide.* 90, 433, 8-B6 (1994)

Rotation and Magnetic Fields during the Evolution of Massive Stars through B[e] and Wolf-Rayet Phases. *Murugesapillai Maheswaran & Joseph Cassinelli.* 421, 718, 27-B9 (1994)

Be Stars in Young Clusters. *Shaukat N. Goderya & Edward G. Schmidt.* 426, 159, 98-B3 (1994)

A New Transient Pulsar in the Small Magellanic Cloud with an Unusual X-Ray Spectrum. *John P. Hughes.* 427, L25, 117-D8 (1994)

Detection of X-Ray Emission from the PSR 1259−63/SS 2883 Binary System. *Lynn Cominsky, Mallory Roberts, & Simon Johnston.* 427, 978, 124-G2 (1994)

The Envelopes of Be Stars Driven by Optically Thin Lines. *Haiqi Chen & J. M. Marlborough.* 427, 1005, 125-B7 (1994)

Rotation in the Ionized Envelope of MWC 349A. *Luis F. Rodríguez & Timothy S. Bastian.* 428, 324, 132-B12 (1994)

Imaging Spectroscopy with High Spatial Resolution. *Naoshi Baba, Susumu Kuwamura, Noriaki Miura, & Yuji Norimoto.* 431, L111, 192-A1 (1994)

Emission-Line Studies of Young Stars. IV. The Optical Forbidden Lines. *Fred Hamann.* 93, 485, 49-D4 (1994)

Dynamic Processes in Be Star Atmospheres. II. He I $2P$–nD Line Formation in λ Eridani (Outburst). *Myron A. Smith, Ivan Hubeny, Thierry Lanz, & Thomas Meylan.* 432, 392, 198-A10 (1994)

Variable Extinction in HD 45677 and the Evolution of Dust Grains in Pre–Main-Sequence Disks. *Michael L. Sitko, Elaine M. Halbedel, Geoffrey F. Lawrence, J. Allyn Smith, & Ken Yanow.* 432, 753, 205-D3 (1994)

Near-Infrared (J, H, K) Imaging of Herbig Ae/Be Stars. *Wenbin Li, Neal J. Evans II, Paul M. Harvey, & Cecilia Colomé.* 433, 199, 210-G3 (1994)

Regimes of High-Energy Shock Emission from the Be Star/Pulsar System PSR 1259−63. *Marco Tavani, Jonathan Arons, & Victoria M. Kaspi.* 433, L37, 215-B1 (1994)

Ultraviolet Spectral Classification and Stellar Winds in a Sample of Be and Standard Stars. *Arne Slettebak.* 94, 163, 54-A5 (1994)

The Theoretical Polarization of Pure Scattering Axisymmetric Circumstellar Envelopes. *G. K. Fox.* 435, 372, 248-E1 (1994)

X-Ray Emission of the Pulsar–Be Star Binary PSR 1259−63. *Andrew King & Lynn Cominsky.* 435, 411, 249-B3 (1994)

[Fe II] 1.53 and 1.64 Micron Emission from Pre–Main-Sequence Stars. *Fred Hamann, Michal Simon, John S. Carr, & Lisa Prato.* 436, 292, 265-C10 (1994)

Einstein X-Ray Observations of Herbig Ae/Be Stars. *F. Damiani, G. Micela, S. Sciortino, & F. R. Harnden, Jr.* 436, 807, 276-F12 (1994)

The Effects of Gravity Darkening on the Ultraviolet Continuum Polarization Produced by Circumstellar Disks. *J. E. Bjorkman & K. S. Bjorkman.* 436, 818, 277-A1 (1994)

Near-Infrared Spectra of Compact Stellar Wind Sources at the Galactic Center. *S. Libonate, J. L. Pipher, W. J. Forrest, & M. L. N. Ashby.* 439, 202, 24-A10 (1995)

Discovery of Candidate Cataclysmic Variables in the Post–Core-Collapse Globular Cluster NGC 6397. *Adrienne M. Cool, Jonathan E. Grindlay, Haldan N. Cohn, Phyllis M. Lugger, & Shawn D. Slavin.* 439, 695, 34-B10 (1995)

Hα Emission and Absorption from a Localized Region above the Surface of a Be Star. *J. M. Marlborough.* 440, 303, 45-C12 (1995)

The Growth of Solids, Destruction of Molecules, and Shielding of Radiation in the Young Stellar Disk of HD 45677. *Thomas M. Brown, Richard Buss, Jr., Carol Grady, & Karen Bjorkman.* 440, 865, 55-A11 (1995)

LkHα 198 Revisited. *Harold M. Butner & Antonella Natta.* 440, 874, 55-B10 (1995)

X-Ray Emission from the PSR B1259−63 System near Apastron. *J. Greiner, M. Tavani, & T. Belloni.* 441, L43, 67-B9 (1995)

The Transient Accretion Disk in the Algol-Type Binary U Sagittae. *Geary E. Albright & Mercedes T. Richards.* 441, 806, 73-B2 (1995)

H I, CO, and *IRAS* Observations of NGC 7023. *C. Rogers, Mark H. Heyer, & P. E. Dewdney.* 442, 694, 89-F10 (1995)

Dynamic Processes in Be Star Atmospheres. III. Rapid Multiwavelength Variability in γ Cassiopeiae. *Myron A. Smith.* 442, 812, 91-D2 (1995)

Effects of Prescattering Attenuation on Spectropolarimetric Line Profiles. *Kenneth Wood & J. E. Bjorkman.* 443, 348, 100-A3 (1995)

Emission-Line Pre–Main-Sequence Stars and X-Ray Sources in Orion. *Steven H. Pravdo & Lorella Angelini.* 447, 342, 177-B3 (1995)

The Subarcsecond 10 Micron Size of LkHα 101: Constraints on Circumstellar Dust. *R. M. Danen, C. R. Gwinn, & E. E. Bloemhof.* 447, 391, 177-F13 (1995)

Tomographic Separation of Composite Spectra. III. Ultraviolet Detection of the Hot Companion of φ Persei. *Michelle L. Thaller, William G. Bagnuolo, Jr., Douglas R. Gies, & Laura R. Penny.* 448, 878, 207-A10 (1995)

A Study of the Spectra of Seven Of Stars. I. Radial Velocities. *Anne B. Underhill.* 100, 433, 52-A10 (1995)

A Study of the Spectra of Seven Of Stars. II. Line Profiles and Equivalent Widths. *Anne B. Underhill.* 100, 461, 52-C13 (1995)

Expanding Atmospheric Model Including a Chromosphere. II. Be Stars: Center-to-Limb Variation of the Emergent Intensity. *Lydia S. Cidale & Andrea C. Vázquez.* 453, 393, 286-E4 (1995)

X-Ray Detection of PSR B1259−63 at Periastron. *V. M. Kaspi, M. Tavani, F. Nagase, M. Hirayama, M. Hoshino, T. Aoki, N. Kawai, & J. Arons.* 453, 424, 287-A1 (1995)

STARS: EVOLUTION

Application of Oxygen-enhanced Evolutionary Sequences to the Horizontal Branch of M15. *Ben Dorman, Young-Wook Lee, & Don A. VandenBerg.* 366, 115, 2-D11 (1991)

Stellar Population Synthesis Revisited. *Stéphane Charlot & Gustavo Bruzual A.* 367, 126, 13-E5 (1991)

s-Process Nucleosynthesis in Massive Stars and the Weak Component. I. Evolution and Neutron Captures in a 25 $M_\odot$ Star. *C. M. Raiteri, M. Busso, R. Gallino, G. Picchio, & L. Pulone.* 367, 228, 14-G13 (1991)

Evolutionary Models of Halo Stars with Rotation. I. Evidence for Differential Rotation with Depth in Stars. *Marc H. Pinsonneault, Constantine P. Deliyannis, & Pierre Demarque.* 367, 239, 15-A12 (1991)

Stellar Evolution and Period Changes in RR Lyrae Stars. *Young-Wook Lee.* 367, 524, 19-G7 (1991)

Instabilities and Clumping in SN 1987A. I. Early Evolution in Two Dimensions. *Bruce Fryxell, Ewald Müller, & David Arnett.* 367, 619, 21-A5 (1991)

Wolf-Rayet Stars as Starting Points or as Endpoints of the Evolution of Massive Stars? *H. J. G. L. M. Lamers, A. Maeder, W. Schmutz, & J. P. Cassinelli.* 368, 538, 31-F12 (1991)

Neutron Star Thermal Evolution. *Kenneth A. Van Riper.* 75, 449, 6-G7 (1991)

Asteroseismology of White Dwarf Stars. I. Adiabatic Results. *P. A. Bradley & D. E. Winget.* 75, 463, 7-A13 (1991)

Star Clusters in the Clouds of Magellan. *Sidney van den Bergh.* 369, 1, 36-A11 (1991)

Star Formation in Taurus-Auriga: The High-Mass Stars. *Frederick M. Walter & William T. Boyd.* 370, 318, 51-C1 (1991)

Multicolor CCD Imaging of Supergiants in the Disk of NGC 253. *T. J. Davidge, O. Le Fèvre, & C. C. Clark.* 370, 559, 55-D7 (1991)

Helium Star Cataclysmics. *Icko Iben, Jr., & Alexander V. Tutukov.* 370, 615, 56-B5 (1991)

Lithium in the Most Extreme Halo Stars; Trends with Metallicity. *Constantine P. Deliyannis & Pierre Demarque.* 370, L89, 59-E5 (1991)

Lithium, Age, and Metallicity in Open Clusters. *Ann Merchant Boesgaard.* 370, L95, 59-E12 (1991)

He Stars and He-accreting CO White Dwarfs. *Marco Limongi & Amedeo Tornambè.* 371, 317, 64-A9 (1991)

Carbon Isotope Ratios along the Giant Branch of M67. *Kalpana Krishnaswamy Gilroy & Jeffery A. Brown.* 371, 578, 68-F7 (1991)

Diffusion and Mixing of Lithium and Helium in Population II Dwarfs. *Charles R. Proffitt & Georges Michaud.* 371, 584, 68-G1 (1991)

Nitrogen Abundances in Carbon-rich Stars That Are Progenitors to Planetary Nebulae. *M. Jura.* 372, 208, 76-E7 (1991)

Steady State Energy Sources in Neutron Stars. *Kenneth A. Van Riper.* 372, 251, 77-A13 (1991)

Modification of Stellar Populations in Post–Core-Collapse Globular Clusters. *S. Djorgovski, G. Piotto, E. S. Phinney, & D. F. Chernoff.* 372, L41, 79-E11 (1991)

Double Core Evolution. IV. The Late Stages of Evolution of a 2 $M_\odot$ Red Giant with a 1 $M_\odot$ Companion. *Ronald E. Taam & Peter Bodenheimer.* 373, 246, 89-A10 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

Stellar Evolutionary Models from the Zero-Age Main Sequence to the First Thermal Pulse. *John C. Lattanzio.* 76, 215, 27-B9 (1991)

Blue Loops during Core Helium Burning as the Consequence of Moderate Convective Envelope Overshooting in Stars of Intermediate to High Mass. *Richard B. Stothers & Chao-wen Chin.* 374, 288, 101-F3 (1991)

LMC SMP 64: The Youngest Planetary Nebula? *M. A. Dopita & S. J. Meatheringham.* 374, L21, 103-E1 (1991)

Shell Helium Burning in Low-Mass Stars. I. Models in Thermal Equilibrium. *Masayuki Y. Fujimoto & Icko Iben, Jr.* 374, 631, 107-A1 (1991)

Isochrones for H-burning Globular Cluster Stars. II. The Metallicity Range $-2.3 < [Fe/H] < -0.5$. *Oscar Straniero & Alessandro Chieffi.* 76, 525, 32-D1 (1991)

Chemical Abundances in Planetary Nebulae: Basic Data and Correlations between Elements. *M. Perinotto.* 76, 687, 34-C9 (1991)

Detection of a Galactic Color Gradient for Blue Horizontal-Branch Stars of the Halo Field and Implications for the Halo Age and Density Distributions. *George W. Preston, Stephen A. Shectman, & Timothy C. Beers.* 375, 121, 112-E1 (1991)

The *p*-Mode Oscillation Spectra of an Evolving 1 $M\odot$ Sun-like Star. *D. B. Guenther.* 375, 352, 115-C8 (1991)

Brown Dwarfs in Young Stellar Clusters. *Guy S. Stringfellow.* 375, L21, 117-C7 (1991)

Period Changes and Evolution in RV Tauri Stars. *John R. Percy, Dimitar D. Sasselov, Amy Alfred, & Greg Scott.* 375, 691, 121-C7 (1991)

The Chromospheric Emission–Age Relation for Stars of the Lower Main Sequence and Its Implications for the Star Formation Rate. *David R. Soderblom, Douglas K. Duncan, & Dean R. H. Johnson.* 375, 722, 121-F5 (1991)

From Wind to Superwind: The Evolution of Mass-Loss Rates for Mira Models. *G. H. Bowen & L. A. Willson.* 375, L53, 124-C1 (1991)

On the Formation of Globular Clusters. I. Dynamical Limits on Globular Cluster Metallicities. *J. H. Brown, A. Burkert, & James W. Truran.* 376, 115, 126-D1 (1991)

Rotational Evolution of Solar-Type Stars. I. Main-Sequence Evolution. *K. B. MacGregor & M. Brenner.* 376, 204, 127-D13 (1991)

The Evolution of He-burning Stars: Horizontal and Asymptotic Branches in Galactic Globulars. *V. Castellani, A. Chieffi, & L. Pulone.* 76, 911, 37-C5 (1991)

Collisions of Giant Stars with Compact Objects: Hydrodynamical Calculations. *Frederic A. Rasio & Stuart L. Shapiro.* 377, 559, 146-F1 (1991)

A Detection of the Evolutionary Time Scale of the DA White Dwarf G117-B15A with the Whole Earth Telescope. *S. O. Kepler, D. E. Winget, R. E. Nather, P. A. Bradley, A. D. Grauer, G. Fontaine, P. Bergeron, G. Vauclair, C. F. Claver, T. M. K. Marar, S. Seetha, B. N. Ashoka, T. Mazeh, E. Leibowitz, N. Dolez, M. Chevreton, M. A. Barstow, J. C. Clemens, S. J. Kleinman, A. E. Sansom, R. W. Tweedy, A. Kanaan, B. P. Hine, J. L. Provencal, F. Wesemael, M. A. Wood, P. Brassard, J.-E. Solheim, & P.-I. Emanuelsen.* 378, L45, 162-E7 (1991)

On the Sodium Excess in the Atmospheres of Yellow Supergiants. *N. Prantzos, A. Coc, & J. P. Thibaud.* 379, 729, 173-G1 (1991)

The Stellar Content and Structure of the Globular Cluster NGC 5053. *Gregory G. Fahlman, Harvey B. Richer, & James Nemec.* 380, 124, 177-E11 (1991)

The *K* Parameter and Evolution of the Radio Pulsars. *Wen Xu & Xinji Wu.* 380, 550, 185-A12 (1991)

Evolutionary Sequences of Stellar Models of Intermediate and High Mass Including Convective Core Overshooting. *Chao-wen Chin & Richard B. Stothers.* 77, 299, 48-C1 (1991)

On Equation of State Interpolation Errors in Stellar Interior Calculations. *Ben Dorman, Alan W. Irwin, & Brian B. Pedersen.* 381, 228, 191-G4 (1991)

Advanced Evolutionary Phases of Large-Metallicity Low-Mass Stars and the Problem of the Ultraviolet Excess of Elliptical Galaxies. *Marco Castellani & Amedeo Tornambè.* 381, 393, 195-E9 (1991)

Soft X-Ray Pulses from Neutron Star Glitches. *Kenneth A. Van Riper, Richard I. Epstein, & Guy S. Miller.* 381, L47, 199-C1 (1991)

Detection of the Helium Flash Gap in the Integrated $(U - B)$ versus $(B - V)$ Diagram for 624 Large Magellanic Cloud Clusters. *E. Bica, J. J. Clariá, H. Dottori, J. F. C. Santos, Jr., & A. Piatti.* 381, L51, 199-C7 (1991)

Metal Opacities and Convective Core Overshooting in Population I Stars. *Richard B. Stothers & Chao-wen Chin.* 381, L67, 199-E7 (1991)

Wide Binaries in the Woolley Catalog. *Ira Wasserman & Martin D. Weinberg.* 382, 149, 202-A12 (1991)

Asymptotic Theory for the Spatial Distribution of Protostellar Emission. *Fred C. Adams.* 382, 544, 208-C8 (1991)

Massive Star Evolution and SN 1987A. *David Arnett.* 383, 295, 215-G8 (1991)

About the Stage of Evolution of Wolf-Rayet Stars. *Anne B. Underhill.* 383, 729, 223-C6 (1991)

Evolution of Compact Binary Systems with X-Ray Heating. *Amos Harpaz & Saul Rappaport.* 383, 739, 223-D3 (1991)

A Conjecture Regarding the Evolution of Dwarf Stars into Red Giants. *P. P. Eggleton & R. C. Cannon.* 383, 757, 223-E12 (1991)

Post–Asymptotic Giant Branch Nonradial Instability Strips. *Letizia Stanghellini, Arthur N. Cox, & Sumner Starrfield.* 383, 766, 223-F10 (1991)

Observational Tests of Convective Core Overshooting in Stars of Intermediate to High Mass in the Galaxy. *Richard B. Stothers.* 383, 820, 224-D8 (1991)

Implications of Helium Diffusion for Globular Cluster Isochrones and Luminosity Functions. *Charles R. Proffitt & Don A. VandenBerg.* 77, 473, 51-C10 (1991)

Subgiant CH Stars. II. Chemical Compositions and the Evolutionary Connection with Barium Stars. *R. Earle Luck & Howard E. Bond.* 77, 515, 51-G1 (1991)

Local Distribution of Old Neutron Stars. *Zsolt Frei, Xiaolan Huang, & Bohdan Paczyński.* 384, 105, 2-C10 (1992)

A Magnitude-limited Survey of Cepheid Companions in the Ultraviolet. *Nancy Remage Evans.* 384, 220, 3-F4 (1992)

The Multiple Molecular Winds of CRL 2688. *K. Young, G. Serabyn, T. G. Phillips, G. R. Knapp, R. Güsten, & A. Schulz.* 385, 265, 15-B13 (1992)

Classical Nova Models with Accretion Heating at Accretion Rates of 10^{-9} and 10^{-10} $M\odot$ per Year. *Dina Prialnik & Attay Kovetz.* 385, 665, 21-D1 (1992)

The Frequencies of Supernovae in Binaries. *Alexander V. Tutukov, Lev R. Yungelson, & Icko Iben, Jr.* 386, 197, 26-E9 (1992)

The Evolution through H and He Burning of Galactic Cluster Stars. *Vittorio Castellani, Alessandro Chieffi, & Oscar Straniero.* 78, 517, 9-G11 (1992)

On the Instability Strip of the Cepheid Stars. *C. Chiosi, P. Wood, G. Bertelli, & A. Bressan.* 387, 320, 41-A1 (1992)

Unusual 3 Micron Emission Features in Three Proto–Planetary Nebulae. *T. R. Geballe, A. G. G. M. Tielens, S. Kwok, & B. J. Hrivnak.* 387, L89, 48-E1 (1992)

X-Ray Activity as Statistical Age Indicator: The Disk G–K Giants. *G. Micela, A. Maggio, & G. S. Vaiana.* 388, 171, 51-B5 (1992)

Short- and Intermediate-Period Oxygen-rich Miras. *M. Jura & S. G. Kleinmann.* 79, 105, 14-D3 (1992)

The Effect of Helium Diffusion on the Ages of Globular Clusters. *Brian Chaboyer, Constantine P. Deliyannis, Pierre Demarque, M. H. Pinsonneault, & Ata Sarajedini.* 388, 372, 55-A6 (1992)

The Star Formation History of the Large Magellanic Cloud. *Gianpaolo Bertelli, Mario Mateo, Cesare Chiosi, & Alessandro Bressan.* 388, 400, 55-C11 (1992)

The Evolution of High-Metallicity Horizontal-Branch Stars and the Origin of the Ultraviolet Light in Elliptical Galaxies. *E. Horch, P. Demarque, & M. Pinsonneault.* 388, L53, 59-B7 (1992)

The Contribution of Advanced Post-Hayashi Track Evolutionary Phases to the Ultraviolet Light of Elliptical Galaxies. *Marco Castellani, Marco Limongi, & Amedeo Tornambè.* 389, 227, 62-G1 (1992)

Type I Supernovae and Accretion-induced Collapses from Cataclysmic Variables? *Mario Livio & James W. Truran.* 389, 695, 70-A10 (1992)

Supernova Rates and the Reddening of Wolf-Rayet Stars. *Sidney van den Bergh.* 390, 133, 75-F1 (1992)

Stellar Evolution in Blue Populous Clusters of the Small Magellanic Cloud and the Problems of Envelope Semiconvection and Convective Core Overshooting. *Richard B. Stothers & Chao-wen Chin.* 390, 136, 75-F6 (1992)

Possible Observational Consequences of Primordial Binaries in Globular Clusters. *Ronald E. Taam & D. N. C. Lin.* 390, 440, 80-G6 (1992)

Presupernova Evolution in Massive Interacting Binaries. *Ph. Podsiadlowski, P. C. Joss, & J. J. L. Hsu.* 391, 246, 89-A10 (1992)

Maximum Rates of Period Change for DA White Dwarf Models with Carbon and Oxygen Cores. *P. A. Bradley, D. E. Winget, & M. A. Wood.* 391, L33, 92-C1 (1992)

Oxygen-enhanced Models for Globular Cluster Stars. I. Evolutionary Tracks. *Don A. VandenBerg.* 391, 685, 96-E5 (1992)

The Age and Chemical Evolution of High-Redshift QSOs. *Fred Hamann & Gary Ferland.* 391, L53, 99-C7 (1992)

Lithium Abundances in Classical and Weak T Tauri Stars. *Antonio Magazzù, Rafael Rebolo, & Yakov V. Pavlenko.* 392, 159, 103-A1 (1992)

Are There Two Kinds of Blue Stragglers in Globular Clusters? *Charles D. Bailyn.* 392, 519, 108-F9 (1992)

Setting the Clock of Stellar Models. *G. Bertelli, A. Bressan, & C. Chiosi.* 392, 522, 108-F13 (1992)

The Nonexponential Evolution of Pulsar Magnetic Fields. *Shigeto Wakatsuki, Atsushi Hikita, Naohiro Sato, & Naoki Itoh.* 392, 628, 110-A10 (1992)

The Evolution of Intermediate-Mass Protostars. II. Influence of the Accretion Flow. *Francesco Palla & Steven W. Stahler.* 392, 667, 110-E5 (1992)

The Creation of Superrich Lithium Giants. *I.-Juliana Sackmann & Arnold I. Boothroyd.* 392, L71, 113-D3 (1992)

The Structure of Horizontal-Branch Models. I. The Zero-Age Horizontal Branch. *Ben Dorman.* 80, 701, 33-B5 (1992)

Breakdown of the Core Mass–Luminosity Relation at High Luminosities on the Asymptotic Giant Branch. *Arnold I. Boothroyd & I.-Juliana Sackmann.* 393, L21, 120-D1 (1992)

Evolutionary Models and the p-Mode Oscillation Spectrum of α Centauri A and B. *Peter Edmonds, Lawrence Cram, Pierre Demarque, D. B. Guenther, & Marc H. Pinsonneault.* 394, 313, 131-G9 (1992)

Oxygen-enhanced Models for Globular Cluster Stars. II. Isochrones and Luminosity Functions. *Peter A. Bergbusch & Don A. VandenBerg.* 81, 163, 37-C11 (1992)

Optical and Infrared Imaging of Stars in the Metal-rich Globular Clusters NGC 6304 and NGC 6316. *T. J. Davidge, William E. Harris, T. J. Bridges, & D. A. Hanes.* 81, 251, 38-D5 (1992)

Ages of Globular Clusters and Helium Diffusion. *Brian Chaboyer, Ata Sarajedini, & Pierre Demarque.* 394, 515, 135-F12 (1992)

Early Expansion and Luminosity Evolution of Supernovae. *Roger A. Chevalier.* 394, 599, 136-G5 (1992)

Two Ultramassive White Dwarfs Found among Candidates for Magnetic Fields. *Gary D. Schmidt, P. Bergeron, James Liebert, & Rex A. Saffer.* 394, 603, 136-G11 (1992)

The Binary System L151−81A/B: A Potential Test of Accretion Theory. *M. A. Wood & T. D. Oswalt.* 394, L53, 139-D1 (1992)

Mass Loss and a Possible Population II Lithium Dip. *David S. P. Dearborn, David N. Schramm, & L. M. Hobbs.* 394, L61, 139-E1 (1992)

Abundances for Giant Stars in the Draco Dwarf Galaxy. *Matthew D. Lehnert, R. A. Bell, James E. Hesser, & J. B. Oke.* 395, 466, 148-C9 (1992)

Lithium Dilution through Main-Sequence Mass Loss. *Fritz J. Swenson & John Faulkner.* 395, 654, 151-D3 (1992)

Helium Diffusion in the Sun. *J. N. Bahcall & M. H. Pinsonneault.* 395, L119, 154-D7 (1992)

Hubble Space Telescope FOS Observations of KPD 0005+5106: A Subluminous WN-WC Descendant with Ongoing Mass Outflow? *Edward M. Sion & Ronald A. Downes.* 396, L79, 167-B7 (1992)

Helium Gravitational Settling in the Envelopes of Evolving Main-Sequence A and F Stars. *Jacques Richer, Georges Michaud, & Charles R. Proffitt.* 82, 329, 54-A1 (1992)

A Formulation of Convection for Stellar Structure and Evolution Calculations without the Mixing-Length Theory Approximations. I. Application to the Sun. *Thomas Joseph Lydon, Peter A. Fox, & Sabatino Sofia.* 397, 701, 179-G3 (1992)

The Age of the Small Magellanic Cloud Cluster Lindsay 11. *J. R. Mould, J. B. Jensen, & G. S. Da Costa.* 82, 489, 55-E11 (1992)

Nucleosynthesis and Mixing on the Asymptotic Giant Branch. I. MS and S Stars with and without Tc. *M. Busso, R. Gallino, D. L. Lambert, C. M. Raiteri, & V. V. Smith.* 399, 218, 198-A1 (1992)

Populations of Low-Mass Black Hole Binaries. *Roger W. Romani.* 399, 621, 205-F1 (1992)

On the Pulsational Stability of the Pre–White Dwarf Star PG 1707+427. *Albert D. Grauer, Richard F. Green, & James Liebert.* 399, 686, 206-D7 (1992)

Pulsar Death Lines and Death Valley. *Kaiyou Chen & Malvin Ruderman.* 402, 264, 4-D1 (1993)

Stellar Evolution as a Probe of Neutrino Properties. *V. Castellani & S. Degl'Innocenti.* 402, 574, 9-F7 (1993)

Companions to Bright S and MS Stars: Technetium Deficiency and Binarity. *Hollis R. Johnson, Thomas B. Ake, & Mudhaffer M. Ameen.* 402, 667, 10-G11 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. I. Stellar Evolution, Lithium Abundance, and Photospheric Structure. *D. Dravins, L. Lindegren, Å. Nordlund, & D. A. VandenBerg.* 403, 385, 18-E10 (1993)

Improved Solar Models Constructed with a Formulation of Convection for Stellar Structure and Evolution Calculations without the Mixing-Length Theory Approximations. *Thomas Joseph Lydon, Peter A. Fox, & Sabatino Sofia.* 403, L79, 27-E8 (1993)

Stellar Models and the Brightening of P Cygni. *Mounib F. El Eid & Dieter H. Hartmann.* 404, 271, 31-C5 (1993)

The Detectability of Brown Dwarfs: Predictions and Uncertainties. *L. Nelson, S. Rappaport, & P. C. Joss.* 404, 723, 38-A1 (1993)

Evidence for Processed Material in the Atmospheres of Large Magellanic Cloud B Supergiants. *Edward L. Fitzpatrick & Bruce Bohannan.* 404, 734, 38-B1 (1993)

Gamma-Ray Bursts from Stellar Mass Accretion Disks around Black Holes. *S. E. Woosley.* 405, 273, 44-E1 (1993)

Evolution and Seismology of Procyon. *D. B. Guenther & P. Demarque.* 405, 298, 44-G6 (1993)

Spectral Evolution of Stellar Populations Using Isochrone Synthesis. *Gustavo Bruzual A., & Stéphane Charlot.* 405, 538, 49-F11 (1993)

Beryllium and Boron Constraints on an Early Galactic Bright Phase. *Brian D. Fields, David N. Schramm, & James W. Truran.* 405, 559, 50-A7 (1993)

An Expanded Set of Brown Dwarf and Very Low Mass Star Models. *A. Burrows, W. B. Hubbard, D. Saumon, & J. I. Lunine.* 406, 158, 57-B1 (1993)

Rotation of Young Solar-Type Stars in the Orion Nebula Region. *Douglas K. Duncan.* 406, 172, 57-C1 (1993)

A Model for the Dramatic Decline of FG Sagittae. *Icko Iben, Jr., & Mario Livio.* 406, L15, 60-F8 (1993)

Far-Ultraviolet Radiation from Disk Globular Clusters. *R. Michael Rich, Dante Minniti, & James W. Liebert.* 406, 489, 63-G9 (1993)

The Potential for Asteroseismology of DB White Dwarf Stars. *P. A. Bradley, D. E. Winget, & M. A. Wood.* 406, 661, 66-B1 (1993)

Mass Loss in Globular Cluster Red Giants: An Evolutionary Investigation. *M. Castellani & V. Castellani.* 407, 649, 78-F1 (1993)

On Symbiotic Stars and Type Ia Supernovae. *Scott J. Kenyon, Mario Livio, Joanna Mikołajewska, & Christopher A. Tout.* 407, L81, 82-E9 (1993)

The Age of the Large Magellanic Cloud Cluster NGC 2031. *J. R. Mould, D. A. Xystus, & G. S. Da Costa.* 408, 108, 84-D8 (1993)

Origin and Radio Pulse Properties of Millisecond Pulsars. *Kaiyou Chen & Malvin Ruderman.* 408, 179, 85-C12 (1993)

Thermal Evolution of Neutron Stars with Internal Frictional Heating. *Hideyuki Umeda, Noriaki Shibazaki, Ken'ichi Nomoto, & Sachiko Tsuruta.* 408, 186, 85-D7 (1993)

The Infrared Temporal Evolution of FG Sagittae. *Charles E. Woodward, G. F. Lawrence, R. D. Gehrz, Terry J. Jones, H. A. Kobulnicky, James Cole, Tracy Hodge, & Harley A. Thronson, Jr.* 408, L37, 89-B8 (1993)

Dynamical Instability as the Cause of the Massive Outbursts in η Carinae and Other Luminous Blue Variables. *Richard B. Stothers & Chao-wen Chin.* 408, L85, 95-C5 (1993)

On Partial Mixing Zones in Horizontal-Branch Stellar Cores. *Ben Dorman & Robert T. Rood.* 409, 387, 101-G3 (1993)

On the Stellar Progenitor of the Type Ib Supernova 1984L. *E. Baron, Timothy R. Young, & David Branch.* 409, 417, 102-B10 (1993)

Old Stellar Populations. IV. Empirical Fitting Functions for Features in the Spectra of G and K Stars. *Javier Gorgas, S. M. Faber, David Burstein, J. Jesús Gonzalez, Stéphane Courteau, & Charles Prosser.* 86, 153, 15-F13 (1993)

The Evolution of Angular Momentum among Zero-Age Main-Sequence Solar-Type Stars. *David R. Soderblom, John R. Stauffer, Keith B. MacGregor, & Burton F. Jones.* 409, 624, 106-F13 (1993)

Theoretical Models for Massive Stars in Young Magellanic Cloud Stellar Clusters. *Enzo Brocato & Vittorio Castellani.* 410, 99, 113-D1 (1993)

Search for Ionized Cores in Proto–Planetary Nebulae, and the Asymptotic Giant Branch to Planetary Nebula Transition. *Hans Ulrich Käufl, Alvio Renzini, & Letizia Stanghellini.* 410, 251, 115-C1 (1993)

Reddening Errors and the Post–Main-Sequence Distribution of Stars in the H-R Diagram of the Large Magellanic Cloud. *N. Rathnasree.* 410, L99, 126-B5 (1993)

Sub–Giant Branch Evolution and Efficient Central Energy Transport. *John Faulkner & Fritz J. Swenson.* 411, 200, 129-F3 (1993)

Spectra of Low-Mass Helium Star Models and the Type Ic Supernova SN 1987M. *Douglas A. Swartz, Alexei V. Filippenko, Ken'ichi Nomoto, & J. Craig Wheeler.* 411, 313, 131-B8 (1993)

IRC +10420: A Cool Hypergiant near the Top of the H-R Diagram. *Terry Jay Jones, Roberta M. Humphreys, Robert D. Gehrz, Geoffrey F. Lawrence, Franz-Josef Zickgraf, Harvey Moseley, Sean Casey, William J. Glaccum, Carol J. Koch, Robert Pina, Barbara Jones, Kim Venn, Otmar Stahl, & Sumner G. Starrfield.* 411, 323, 131-C6 (1993)

The Effect of Livermore Opal Opacities on the Evolutionary Masses of RR Lyrae Stars. *Sukyoung Yi, Young-Wook Lee, & Pierre Demarque.* 411, L25, 133-G8 (1993)

Convection and Neutrino Emission in the Late Stages of Massive Star Evolution. *Maurice B. Aufderheide.* 411, 813, 140-A1 (1993)

The Evolution of Massive Stars Including Mass Loss: Presupernova Models and Explosion. *S. E. Woosley, Norbert Langer, & Thomas A. Weaver.* 411, 823, 140-A14 (1993)

Interacting Massive Binaries, H-R Diagram of the Large Magellanic Cloud and SN 1987A. *N. Rathnasree.* 411, 848, 140-D1 (1993)

The Ultraviolet Radiation in Metal-rich Elliptical Galaxies. *Uffe Gråe Jørgensen & Peter Thejll.* 411, L67, 142-C5 (1993)

Iron and Molecular Opacities and the Evolution of Population I Stars. *Richard B. Stothers & Chao-wen Chin.* 412, 294, 145-F13 (1993)

Abundance Inhomogeneities and Atmospheric Structure in CN-Bimodal Globular Cluster Giants. *Jeremy J. Drake, Bertrand Plez, & Verne V. Smith.* 412, 612, 151-D1 (1993)

Long-Period Oxygen-rich Optical Miras in the Solar Neighborhood. *M. Jura, A. Yamamoto, & S. G. Kleinmann.* 413, 298, 160-A2 (1993)

On the Li and Be Tests for Brown Dwarfs. *L. A. Nelson, S. Rappaport, & E. Chiang.* 413, 364, 160-G1 (1993)

Lithium in the Binary Halo Star HD 89499. *Suchitra Balachandran, Bruce W. Carney, Anne M. Fry, Laura K. Fullton, & Ruth C. Peterson.* 413, 368, 160-G7 (1993)

Bolometric Temperatures of Young Stellar Objects. *P. C. Myers & E. F. Ladd.* 413, L47, 162-G1 (1993)

Inhomogeneous Chemical Evolution of the Galactic Disk. *Guy Malinie, Dieter H. Hartmann, Donald D. Clayton, & Grant J. Mathews.* 413, 633, 164-D1 (1993)

Evolution of Low- and Intermediate-Mass Stars to the End of the Asymptotic Giant Branch with Mass Loss. *E. Vassiliadis & P. R. Wood.* 413, 641, 164-D11 (1993)

CNO Abundances and the Evolutionary Status of Three A-Type Supergiants. *Kim A. Venn.* 414, 316, 174-A1 (1993)

The α-enhanced Isochrones and Their Impact on the Fits to the Galactic Globular Cluster System. *Maurizio Salaris, Alessandro Chieffi, & Oscar Straniero.* 414, 580, 178-D10 (1993)

Reaction Rates of the *s*-Process Neutron Sources $^{22}Ne(\alpha, n)^{25}Mg$ and $^{13}C(\alpha, n)^{16}O$. *H. W. Drotleff, A. Denker, H. Knee, M. Soiné, G. Wolf, J. W. Hammer, U. Greife, C. Rolfs, & H. P. Trautvetter.* 414, 735, 180-D3 (1993)

Type II Supernovae from 8–10 $M_\odot$ Asymptotic Giant Branch Stars. *Masaaki Hashimoto, Kohichi Iwamoto, & Ken'ichi Nomoto.* 414, L105, 186-A1 (1993)

Trace of Planetary Nebula Evolution by Distance-independent Parameters. *C. Y. Zhang & S. Kwok.* 88, 137, 42-B9 (1993)

On Why Intermediate-Mass Stars Become Giants after the Exhaustion of Hydrogen in Their Cores. *Icko Iben, Jr.* 415, 767, 197-D5 (1993)

A Method for Quantitative Detection of Hot Horizontal Branches in Early-Type Galaxies. *Guy Worthey.* 415, L91, 199-G6 (1993)

The "Type IIb" Supernova 1993J in M81: A Close Relative of Type Ib Supernovae. *Alexei V. Filippenko, Thomas Matheson, & Luis C. Ho.* 415, L103, 200-A8 (1993)

On the Origin of the Eclipsing Pulsar PSR B1718−19 and Its Wind. *R. A. M. J. Wijers & B. Paczyński.* 415, L115, 200-C1 (1993)

Diffusion of Lithium and Beryllium in Evolving, Nonrotating Main-Sequence A and F Stars. *Jacques Richer & Georges Michaud.* 416, 312, 205-A5 (1993)

The Age of the Large Magellanic Cloud Cluster NGC 1953. *J. R. Mould, D. A. Xystus, G. S. Da Costa, & R. A. Schommer.* 416, 582, 210-E12 (1993)

An Evolutionary Scenario for Primeval Stellar Populations. *Santi Cassisi & Vittorio Castellani.* 88, 509, 47-B1 (1993)

Population Synthesis and the Ultraviolet Spectrum of Elliptical Galaxies. *Gladis Magris C., & Gustavo Bruzual A.* 417, 102, 218-E6 (1993)

The Tip of the Red Giant Branch as a Distance Indicator for Resolved Galaxies. *Myung Gyoon Lee, Wendy L. Freedman, & Barry F. Madore.* 417, 553, 226-B13 (1993)

Model Atmosphere and Kinematical Analyses of Early-Type, High Galactic Latitude Stellar Candidates from the UKST *UBVRI* Survey. *N. C. Hambly, E. S. Conlon, P. L. Dufton, F. P. Keenan, J. E. Little, & L. Miller.* 417, 706, 228-B10 (1993)

Formation and Evolution of Binary Planetary Nebula Nuclei and Related Objects. *Icko Iben, Jr., & Alexander V. Tutukov.* 418, 343, 235-C12 (1993)

The Pre–Main-Sequence Evolution of Intermediate-Mass Stars. *Francesco Palla & Steven W. Stahler.* 418, 414, 236-B10 (1993)

Our Sun. III. Present and Future. *I.-Juliana Sackmann, Arnold I. Boothroyd, & Kathleen E. Kraemer.* 418, 457, 236-F6 (1993)

Synthetic UV Lines of Si IV, C IV, and He II from a Population of Massive Stars in Starburst Galaxies. *Carmelle Robert, Claus Leitherer, & Timothy M. Heckman.* 418, 749, 241-G7 (1993)

On the Formation of O-Ne White Dwarfs in Metal-rich Close Binary Systems. *Inma Dominguez, Amedeo Tornambè, & Jordi Isern.* 419, 268, 249-E1 (1993)

Ultraviolet Radiation from Evolved Stellar Populations. I. Models. *Ben Dorman, Robert T. Rood, & Robert W. O'Connell.* 419, 596, 255-B8 (1993)

The Evolution of Accreting Stars with Turbulent Mixing. *M. Y. Fujimoto.* 419, 768, 257-B13 (1993)

Observations of [S IV] and the O/S Abundance Ratio in Two Halo Population Planetary Nebulae. *Donald R. Garnett & John H. Lacy.* 419, L93, 259-F8 (1993)

Theoretical Light Curves of Type IIb Supernova 1993J. *Toshikazu Shigeyama, Tomoharu Suzuki, Shiomi Kumagai, Ken'ichi Nomoto, Hideyuki Saio, & Hitoshi Yamaoka.* 420, 341, 5-B5 (1994)

The Rate of the Proton-Proton Reaction. *Marc Kamionkowski & John N. Bahcall.* 420, 884, 13-G11 (1994)

Hot or Not? Theoretical Blue Edges for DA and DB White Dwarf Models. *P. A. Bradley & D. E. Winget.* 421, 236, 19-A1 (1994)

Evolutionary Sequences of Very Hot, Low-Mass, Accreting White Dwarfs with Application to Symbiotic Variables and Ultrasoft/Supersoft Low-Luminosity X-Ray Sources. *Edward M. Sion & Sumner G. Starrfield.* 421, 261, 19-C1 (1994)

Young Open Clusters as Probes of the Star Formation Process. I. An Atlas of Open Cluster Photometry. *Randy L. Phelps & Kenneth A. Janes.* 90, 31, 1-D6 (1994)

Rotation and Magnetic Fields during the Evolution of Massive Stars through B[e] and Wolf-Rayet Phases. *Murugesapillai Maheswaran & Joseph Cassinelli.* 421, 718, 27-B9 (1994)

More Missing Stellar Opacity? *Richard B. Stothers & Chao-wen Chin.* 421, L91, 29-F9 (1994)

The Origin and Evolution of Short-Period Miras in the Solar Neighborhood: Constraints on the Life Cycle of Old Stars. *M. Jura.* 422, 102, 31-C12 (1994)

Double-Core Evolution. V. Three-dimensional Effects in the Merger of a Red Giant with a Dwarf Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 422, 729, 40-G13 (1994)

The Classical Hyades Lithium Problem Resolved? *Fritz J. Swenson, John Faulkner, Carlos A. Iglesias, Forrest J. Rogers, & David R. Alexander.* 422, L79, 45-B6 (1994)

The Horizontal-Branch Stars in Globular Clusters. II. The Second Parameter Phenomenon. *Young-Wook Lee, Pierre Demarque, & Robert Zinn.* 423, 248, 49-B9 (1994)

Cooling White Dwarfs in Galactic Globulars. *V. Castellani, S. Degl'Innocenti, & M. Romaniello.* 423, 266, 49-D1 (1994)

Predictions of a Population of Cataclysmic Variables in Globular Clusters. *R. Di Stefano & S. Rappaport.* 423, 274, 49-D13 (1994)

Equilibrium, Stability, and Orbital Evolution of Close Binary Systems. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 423, 344, 50-D9 (1994)

Sub–Chandrasekhar Mass Models for Type Ia Supernovae. *S. E. Woosley & Thomas A. Weaver.* 423, 371, 50-F10 (1994)

Mass Loss during the RR Lyrae Phase of the Horizontal Branch: Mass Dispersion on the Horizontal Branch and RR Lyrae Period Changes. *Rebecca A. Koopmann, Young-Wook Lee, Pierre Demarque, & Jamie M. Howard.* 423, 380, 50-G7 (1994)

Deep Infrared Array Photometry of Globular Clusters. I. M4. *T. J. Davidge & D. A. Simons.* 423, 640, 56-D13 (1994)

A Scenario for a Large Number of Low-Mass Black Holes in the Galaxy. *G. E. Brown & H. A. Bethe.* 423, 659, 56-F11 (1994)

Constraints on the Origin of Dwarf Carbon Stars. *Paul J. Green & Bruce Margon.* 423, 723, 57-E7 (1994)

Binary Radiopulsars with Black Holes. *V. M. Lipunov, K. A. Postnov, M. E. Prokhorov, & E. Yu. Osminkin.* 423, L121, 60-G9 (1994)

Mid-Infrared Images of the Post–Asymptotic Giant Branch Star HD 161796. *C. J. Skinner, M. M. Meixner, G. W. Hawkins, E. Keto, J. G. Jernigan, & J. F. Arens.* 423, L135, 61-B11 (1994)

Chemical Evolution of the Solar Neighborhood with Yields Dependent on Metallicity. *Leticia Carigi.* 424, 181, 64-B12 (1994)

Isotopic Carbon Ratios among M71 Bright Red Giants. *Michael M. Briley, Verne V. Smith, & David L. Lambert.* 424, L119, 79-D7 (1994)

Detection of Lithium in the Cool Halo Dwarfs Groombridge 1830 and HD 134439: Implications for Internal Stellar Mixing and Cosmology. *Constantine P. Deliyannis, Sean G. Ryan, Timothy C. Beers, & Julie A. Thorburn.* 425, L21, 85-D3 (1994)

Rapid Cooling and the Structure of Neutron Stars. *James M. Lattimer, Kenneth A. Van Riper, Madappa Prakash, & Manju Prakash.* 425, 802, 91-F12 (1994)

Be Stars in Young Clusters. *Shaukat N. Goderya & Edward G. Schmidt.* 426, 159, 98-B3 (1994)

The Gap in the Color-Magnitude Diagram of NGC 2420: A Test of Convective Overshoot and Cluster Age. *Pierre Demarque, Ata Sarajedini, & X.-J. Guo.* 426, 165, 98-B12 (1994)

Luminous Blue Variables at Quiescence: The Zone of Avoidance in the Hertzsprung-Russell Diagram. *Richard B. Stothers & Chao-wen Chin.* 426, L43, 103-E13 (1994)

The Determination of the Core Mass at the Helium Flash in Globular Cluster Stars. *Allen V. Sweigart.* 426, 612, 106-A11 (1994)

Formation and Evolution of Luminous Supersoft X-Ray Sources. *S. Rappaport, R. Di Stefano, & J. D. Smith.* 426, 692, 107-A13 (1994)

Post–Asymptotic Giant Branch Evolution of Low- to Intermediate-Mass Stars. *E. Vassiliadis & P. R. Wood.* 92, 125, 33-A4 (1994)

Are Wide Pre–Main-Sequence Binaries Coeval? *Patrick Hartigan, Karen M. Strom, & Stephen E. Strom.* 427, 961, 124-E10 (1994)

Geometry and Physical Conditions in the Stellar Wind of AG Carinae. *Claus Leitherer, Richard Allen, Bruce Altner, Augusto Damineli, Laurent Drissen, Thais Idiart, Olivia Lupie, Antonella Nota, Carmelle Robert, Werner Schmutz, & Steven N. Shore.* 428, 292, 131-G4 (1994)

A Thermal Pulse in Progress in the Nucleus of the Large Magellanic Cloud Planetary Nebula N66. *M. Peña, S. Torres-Peimbert, M. Peimbert, M. T. Ruiz, & J. Maza.* 428, L9, 134-B13 (1994)

Red Giant Stragglers and He White Dwarfs in Galactic Globulars. *V. Castellani, V. Luridiana, & M. Romaniello.* 428, 633, 138-B7 (1994)

The Axisymmetric Stellar Wind of AG Carinae. *Regina E. Schulte-Ladbeck, Geoffrey C. Clayton, D. John Hillier, Tim J. Harries, & Ian D. Howarth.* 429, 846, 156-B13 (1994)

CCD Photometry for Six Metal-rich Galactic Globular Clusters. *Ata Sarajedini & John E. Norris.* 93, 161, 44-A2 (1994)

The Galactic Open Cluster NGC 7419 and Its Five Red Supergiants. *Alain Beauchamp, Anthony F. J. Moffat, & Laurent Drissen.* 93, 187, 44-D3 (1994)

Pulsation and Stability of RR Lyrae Stars. I. Instability Strip. *G. Bono & R. F. Stellingwerf.* 93, 233, 45-A5 (1994)

Star Formation in NGC 4449: MAMA-Detector UV Imagery and Fabry-Perot Balmer-Line Imagery. *Robert S. Hill, Allen T. Home, Andrew M. Smith, Fred C. Bruhweiler, K. P. Cheng, Paul M. N. Hintzen, & Ronald J. Oliversen.* 430, 568, 168-G5 (1994)

A Pulsational Approach to the Luminosity of RR Lyrae Variables. *V. Castellani & R. De Santis.* 430, 624, 169-E11 (1994)
The Puzzle of Silicon, Titanium, and Magnesium Anomalies in Meteoritic Silicon Carbide Grains. *Roberto Gallino, Claudia M. Raiteri, Maurizio Busso, & Francesca Matteucci.* 430, 858, 172-E13 (1994)
Double Core Evolution. VI. Effects of Gravitational Torques. *Ronald E. Taam, Peter Bodenheimer, & Michał Różyczka.* 431, 247, 179-B13 (1994)
Gravitational Radiation from Pairs of Realistic, Nonaccreting Compact Stars. *N. K. Spyrou & K. D. Kokkotas.* 431, 254, 179-C8 (1994)
Helium-accreting Degenerate Dwarfs as Presupernovae and Scenarios for the Ultrasoft X-Ray Sources. *Icko Iben, Jr., & A. V. Tutukov.* 431, 264, 179-D6 (1994)
Merging Neutron Stars. I. Initial Results for Coalescence of Noncorotating Systems. *M. B. Davies, W. Benz, T. Piran, & F. K. Thielemann.* 431, 742, 187-G1 (1994)
Abundances, Planetary Nebulae, and Stellar Evolution. *Lawrence H. Aller.* 432, 427, 201-C1 (1994)
Four Experiments on Thermal Instabilities in Stellar Envelopes. *Alvio Renzini & Claudio Ritossa.* 433, 293, 212-A5 (1994)
Convection, Nucleosynthesis, and Core Collapse. *Grant Bazan & David Arnett.* 433, L41, 215-B9 (1994)
^{7}Li Abundances in Halo Stars: Testing Stellar Evolution Models and the Primordial ^{7}Li Abundance. *Brian Chaboyer & P. Demarque.* 433, 510, 217-C11 (1994)
Episodic Mass Transfer in Binaries with X-Ray Heating. *A. Harpaz & S. Rappaport.* 434, 283, 229-C13 (1994)
On the Formation and Evolution of Super–Asymptotic Giant Branch Stars with Cores Processed by Carbon Burning. I. Spica to Antares. *Enrique García-Berro & Icko Iben, Jr.* 434, 306, 229-F4 (1994)
A CCD Survey for Faint High-Latitude Carbon Stars. *Paul J. Green, Bruce Margon, Scott F. Anderson, & Kem H. Cook.* 434, 319, 229-G6 (1994)
Lithium in a Short-Period Tidally Locked Binary of M67: Implications for Stellar Evolution, Galactic Lithium Evolution, and Cosmology. *Constantine P. Deliyannis, Jeremy R. King, Ann M. Boesgaard, & Sean G. Ryan.* 434, L71, 241-G1 (1994)
The Luminosity Functions of Embedded Stellar Clusters. I. Method of Solution and Analytic Results. *André B. Fletcher & Steven W. Stahler.* 435, 313, 247-F11 (1994)
The Luminosity Functions of Embedded Stellar Clusters. II. Numerical Results. *André B. Fletcher & Steven W. Stahler.* 435, 329, 248-A3 (1994)
GHRS Spectroscopy of Individual Stars in R136a. *Sara R. Heap, Dennis Ebbets, Eliot M. Malumuth, Stephen P. Maran, Alex de Koter, & Ivan Hubeny.* 435, L39, 252-A11 (1994)
WFPC2 Observations of the Double Cluster NGC 1850 in the Large Magellanic Cloud. *R. Gilmozzi, E. K. Kinney, S. P. Ewald, N. Panagia, & M. Romaniello.* 435, L43, 252-B7 (1994)
Far-Ultraviolet Imaging of the Globular Cluster NGC 6681 with WFPC2. *Alan M. Watson, Jeremy R. Mould, John S. Gallagher III, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Richard E. Griffiths, J. Jeff Hester, John G. Hoessel, Jon A. Holtzman, Paul A. Scowen, Karl R. Stapelfeldt, John T. Trauger, & James A. Westphal.* 435, L55, 252-D4 (1994)
Sodium in Weak G-Band Giants. *Jeremy J. Drake & David L. Lambert.* 435, 797, 257-A13 (1994)
Classical Cepheids with Terminal Age Main-Sequence Companions: Constraints on Evolution. *Nancy Remage Evans.* 436, 273, 265-A12 (1994)
Comprehensive Stellar Population Models and the Disentanglement of Age and Metallicity Effects. *Guy Worthey.* 95, 107, 65-E2 (1994)
A Study of Carina OB2 Association. II. Analysis and Discussion of the Data. *Beatriz García.* 436, 705, 275-B13 (1994)
Solar Neutrinos: Sensitivity to Pre–Main-Sequence Evolution and to the Depth of the Convective Zone. *John N. Bahcall & Ami Glasner.* 437, 485, 289-F13 (1994)
The Radio Lifetime of Supernova Remnants and the Distribution of Pulsar Velocities at Birth. *D. A. Frail, W. M. Goss, & J. B. Z. Whiteoak.* 437, 781, 296-D2 (1994)
Optically Thick Winds in Nova Outbursts. *Mariko Kato & Izumi Hachisu.* 437, 802, 296-F1 (1994)
Formation and Evolution of Massive Stars. *Martin Beech & R. Mitalas.* 95, 517, 71-D9 (1994)
Massive Stars in the Field and Associations of the Magellanic Clouds: The Upper Mass Limit, the Initial Mass Function, and a Critical Test of Main-Sequence Stellar Evolutionary Theory. *Philip Massey, Cornelia C. Lang, Kathleen DeGioia-Eastwood, & Catharine D. Garmany.* 438, 188, 4-A2 (1995)
Optical Spectroscopy of Carbon-rich Proto–Planetary Nebulae. *Bruce J. Hrivnak.* 438, 341, 6-B10 (1995)
Consequential Angular Momentum Loss and the Period Gap of Cataclysmic Variables. *A. R. King & U. Kolb.* 439, 330, 25-F7 (1995)
Stellar Evolution with Arbitrary Rotation Laws. II. Massive Star Evolution to Core Hydrogen Exhaustion. *Robert G. Deupree.* 439, 357, 26-B1 (1995)
On the Luminosity Function, Lifetimes, and Origin of Blue Stragglers in Globular Clusters. *Charles D. Bailyn & Marc H. Pinsonneault.* 439, 705, 34-C13 (1995)
Tests of Two Convection Theories for Red Giant and Red Supergiant Envelopes. *Richard B. Stothers & Chao-wen Chin.* 440, 297, 45-C3 (1995)
On the Formation of Globular Clusters. II. Early Dynamical Evolution. *J. H. Brown, A. Burkert, & J. W. Truran.* 440, 666, 52-D4 (1995)
Radiative ^{13}C Burning in Asymptotic Giant Branch Stars and *s*-Processing. *O. Straniero, R. Gallino, M. Busso, A. Chieffi, C. M. Raiteri, M. Limongi, & M. Salaris.* 440, L85, 58-B3 (1995)
Ultraviolet Radiation from Evolved Stellar Populations. II. The Ultraviolet Upturn Phenomenon in Elliptical Galaxies. *Ben Dorman, Robert W. O'Connell, & Robert T. Rood.* 442, 105, 78-F6 (1995)
The RR Lyrae Fundamental Red Edge. *G. Bono, F. Caputo, V. Castellani, M. Marconi, L. Staiano, & R. F. Stellingwerf.* 442, 159, 79-D1 (1995)
Magnetic Field Evolution in White Dwarfs: The Hall Effect and Complexity of the Field. *A. G. Muslimov, H. M. Van Horn, & M. A. Wood.* 442, 758, 90-F2 (1995)
Temperatures, Gravities, and Masses for a Sample of Bright DA White Dwarfs and the Initial-to-Final Mass Relation. *Angela Bragaglia, Alvio Renzini, & P. Bergeron.* 443, 735, 108-A7 (1995)
The Radio Detection of SN 1968D in NGC 6946. *Scott D. Hyman, Schuyler D. Van Dyk, Kurt W. Weiler, & Richard A. Sramek.* 443, L77, 112-A2 (1995)
Hydrodynamics of Semiconvection. *William J. Merryfield.* 444, 318, 117-G7 (1995)
On Orbital Circularization in Late-Type Close Binaries. *Jean-Louis Tassoul.* 444, 338, 118-B8 (1995)
The FU Orionis Outburst as a Thermal Accretion Event: Observational Constraints for Protostellar Disk Models. *K. R. Bell, D. N. C. Lin, L. W. Hartmann, & S. J. Kenyon.* 444, 376, 118-F8 (1995)
Absolute Ages of Globular Clusters and the Age of the Universe. *Brian Chaboyer.* 444, L9, 121-C1 (1995)
The Minimum Mass Ratio of W Ursae Majoris Binaries. *Frederic A. Rasio.* 444, L41, 121-G1 (1995)
Extreme Nitrogen Enrichment in the Asymmetrical Planetary Nebula M1-75. *Martín A. Guerrero, Letizia Stanghellini, & Arturo Manchado.* 444, L49, 122-A1 (1995)
Deep Infrared Array Photometry of Globular Clusters. III. M13. *T. J. Davidge & W. E. Harris.* 445, 211, 135-D7 (1995)
Double Core Evolution. VII. The Infall of a Neutron Star through the Envelope of Its Massive Star Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 445, 367, 137-E9 (1995)
Calibration of Stellar Models. *Alessandro Chieffi, Oscar Straniero, & Maurizio Salaris.* 445, L39, 140-G4 (1995)
Thick to Thin: The Evolutionary Connection between PG 1159 Stars and the Thin Helium–enveloped Pulsating White Dwarf GD 358. *Benjamin T. Dehner & Steven D. Kawaler.* 445, L141, 151-F9 (1995)
The Hot End of Evolutionary Horizontal Branches. *V. Castellani, S. Degl'Innocenti, & L. Pulone.* 446, 228, 156-C8 (1995)
The Ionized Masses of Planetary Nebulae. *David Buckley & Stephen E. Schneider.* 446, 279, 157-B2 (1995)
New Evolutionary Tracks for Very Low Mass Stars. *I. Baraffe, G. Chabrier, F. Allard, & P. H. Hauschildt.* 446, L35, 160-F6 (1995)
The Uncertainties in the Age of Globular Clusters from Their Helium Abundance and Mass Loss. *Xiangdong Shi.* 446, 637, 165-A1 (1995)
Nucleosynthesis and Mixing on the Asymptotic Giant Branch. II. Carbon and Barium Stars in the Galactic Disk. *M. Busso, D. L. Lambert, L. Beglio, R. Gallino, C. M. Raiteri, & V. V. Smith.* 446, 775, 166-F13 (1995)
HST/GHRS Observations of the β Pictoris System: Basic Parameters of the Age of the System. *Thierry Lanz, Sara R. Heap, & Ivan Hubeny.* 447, L41, 181-B5 (1995)
The Intermediate Stellar Mass Population in R136 Determined from *Hubble Space Telescope* Planetary Camera 2 Images. *Deidre A. Hunter, Edward J.*

Shaya, Jon A. Holtzman, Robert M. Light, Earl J. O'Neil, Jr., & Roger Lynds. 448, 179, 194-E7 (1995)

Discrete Mass Loss in a Low-Mass Binary with a Rapidly Spinning Neutron Star. *Alexander Muslimov & Marek J. Sarna.* 448, 289, 196-B12 (1995)

Frictional Heating and Neutron Star Thermal Evolution. *Kenneth A. Van Riper, Bennett Link, & Richard I. Epstein.* 448, 294, 196-C6 (1995)

The Presupernova Evolution and Explosion of Helium Stars That Experience Mass Loss. *S. E. Woosley, Norbert Langer, & Thomas A. Weaver.* 448, 315, 196-E7 (1995)

Binary Models for the Solar Neighborhood and Magellanic Cloud W-R Populations. *William W. Dalton & Craig L. Sarazin.* 448, 369, 197-C6 (1995)

Carbon Isotope Ratios in Very Lithium-rich K Giants. *L. da Silva, R. de la Reza, & B. Barbuy.* 448, L41, 200-A1 (1995)

Identification of Emission-Line Stars in 30 Doradus Using *HST* Observations. *Joel Wm. Parker, Sara R. Heap, & Eliot M. Malumuth.* 448, 705, 204-D11 (1995)

Nebulae around Luminous Blue Variables: A Unified Picture. *Antonella Nota, Mario Livio, Mark Clampin, & Regina Schulte-Ladbeck.* 448, 788, 205-E11 (1995)

Prompt Subsidence of a Proto–Neutron Star into a Black Hole. *N. K. Glendenning.* 448, 797, 205-G9 (1995)

RR Lyrae Variable Stars: Pulsational Constraints Relevant to the Oosterhoff Controversy. *Giuseppe Bono, Filippina Caputo, Vittorio Castellani, & Marcella Marconi.* 448, L115, 209-E3 (1995)

Variable Stars in Magellanic Cloud Clusters. II. NGC 1850. *K. M. Sebo & P. R. Wood.* 449, 164, 212-D8 (1995)

A Model for the Space Density of Dwarf Carbon Stars. *Martijn de Kool & Paul J. Green.* 449, 236, 213-D10 (1995)

Light Curve Studies of SN 1993J and SN 1994I. *Timothy R. Young, E. Baron, & David Branch.* 449, L51, 216-G4 (1995)

CNO Abundances and the Evolutionary Status of Galactic, A-Type Supergiants. *Kim A. Venn.* 449, 839, 224-C11 (1995)

More on the Properties of Star Models Evolving off the Hayashi Track: The Metallicity and Evolutionary Phase Dependence. *Marco Castellani, Marco Limongi, & Amedeo Tornambè.* 450, 275, 231-G1 (1995)

Full Adaptive Optics Images of ADS 9731 and μ Cassiopeiae: Orbits and Masses. *Jack D. Drummond, Julian C. Christou, & Robert Q. Fugate.* 450, 380, 233-B12 (1995)

The Type Ic Supernova 1994I in M51: Detection of Helium and Spectral Evolution. *Alexei V. Filippenko, Aaron J. Barth, Thomas Matheson, Lee Armus, Michael Brown, Brian R. Espey, Xiao-Ming Fan, Robert W. Goodrich, Luis C. Ho, Vesa T. Junkkarinen, David C. Koo, Matthew D. Lehnert, André R. Martel, Joseph M. Mazzarella, Joseph S. Miller, Graeme H. Smith, David Tytler, & Gregory D. Wirth.* 450, L11, 235-E3 (1995)

Ages for Globular Clusters with Predominantly Red Horizontal Branches. *Ata Sarajedini, Young-Wook Lee, & Dong-Han Lee.* 450, 712, 240-E7 (1995)

Sodium Enrichment in A–F Type Supergiants. *Mounib F. El Eid & Arthur E. Champagne.* 451, 298, 250-A9 (1995)

Double Core Evolution. VIII. The Spiral-in of a Main-Sequence Star through the Envelope of an Asymptotic Giant Branch Companion. *Harold W. Yorke, Peter Bodenheimer, & Ronald E. Taam.* 451, 308, 250-B8 (1995)

A Model of the Galactic X-Ray Binary Population. I. High-Mass X-Ray Binaries. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 100, 217, 49-B1 (1995)

Lithium Abundances in δ Scuti Stars and Their Relationship with the Lithium Dip. *Stephen C. Russell.* 451, 747, 257-D13 (1995)

A Period-Luminosity Relation for the Slow Variations of Luminous Blue Variables. *Richard B. Stothers & Chao-wen Chin.* 451, L61, 260-E7 (1995)

Evolutionary Paths in Multiple-Shell Planetary Nebulae. *Letizia Stanghellini & Anna Pasquali.* 452, 286, 266-B1 (1995)

Evidence of Higher Primordial Lithium from Keck Observations of M92. *Constantine P. Deliyannis, Ann Merchant Boesgaard, & Jeremy R. King.* 452, L13, 269-D10 (1995)

Evolutionary Tests of the Planetary Nebula Luminosity Function. *Letizia Stanghellini.* 452, 515, 271-G1 (1995)

Chemical Evolution of the Orion Association. III. The Lithium Abundance of F and G Stars. *Katia Cunha, Verne V. Smith, & David L. Lambert.* 452, 634, 273-D11 (1995)

The Massive Post–Red Supergiants IRC +10420 and HD 179821. *Joel H. Kastner & David A. Weintraub.* 452, 833, 276-B7 (1995)

Can Dust Formation in Evolved Stars Be Suppressed near Active Galactic Nuclei? *T. W. Hartquist, R. H. Durisen, J. E. Dyson, J. M. C. Rawlings, D. A. Williams, & R. J. R. Williams.* 453, 77, 282-C3 (1995)

Radio Detection of Late-Type (G–K) Dwarf Stars in the Pleiades. *Jeremy Lim & Stephen M. White.* 453, 207, 284-A5 (1995)

Properties of the Exceptionally Long-Period AM Herculis System RX J0515.41+0104.6. *J. Frank, J.-P. Lasota, & G. Chanmugam.* 453, 446, 287-C1 (1995)

Flare Production of ^{6}Li in Population II Stars. *Constantine P. Deliyannis & Robert A. Malaney.* 453, 810, 295-A14 (1995)

Lithium in Short-Period Tidally Locked Binaries: A Test of Rotationally Induced Mixing. *Sean G. Ryan & Constantine P. Deliyannis.* 453, 819, 295-B12 (1995)

The Initial Mass Function and Massive Star Evolution in the OB Associations of the Northern Milky Way. *Philip Massey, Kelsey E. Johnson, & Kathleen DeGioia-Eastwood.* 454, 151, 301-C12 (1995)

Observations of the Ultraviolet-Bright Star in 47 Tucanae with the Hopkins Ultraviolet Telescope. *W. Van Dyke Dixon, Arthur F. Davidsen, & Henry C. Ferguson.* 454, L47, 308-B9 (1995)

Pre–Main-Sequence Evolution in the Taurus-Auriga Molecular Cloud. *Scott J. Kenyon & Lee Hartmann.* 101, 117, 54-D3 (1995)

The Evolution and Explosion of Massive Stars. II. Explosive Hydrodynamics and Nucleosynthesis. *S. E. Woosley & Thomas A. Weaver.* 101, 181, 55-B1 (1995)

The OPAL Equation of State and Low-Metallicity Isochrones. *Brian Chaboyer & Yong-Cheol Kim.* 454, 767, 312-C9 (1995)

An Age Estimate for the β Pictoris Analog HR 4796A. *John R. Stauffer, Lee W. Hartmann, & David Barrado y Navascues.* 454, 910, 314-D1 (1995)

The Nonexponential Evolution of Pulsar Magnetic Fields. III. Comparison with the New Velocity Measurement. *Naoki Itoh, Takemi Kotouda, & Kentaro Hiraki.* 455, 244, 321-D13 (1995)

Radio-Frequency Continuum Emission from Evolved Stars. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 455, 293, 322-B12 (1995)

The Extremely Low Luminosity White Dwarf ESO 439−26. *María Teresa Ruiz, P. Bergeron, S. K. Leggett, & Claudio Anguita.* 455, L159, 334-C13 (1995)

Are Blue Stragglers Mixed during Collisions? *Alison Procter Sills, Charles D. Bailyn, & Pierre Demarque.* 455, L163, 334-D6 (1995)

STARS: FAINT BLUE

The Case Low-Dispersion Northern Sky Survey. XII. A Region in Southern Canes Venatici. *Peter Pesch, N. Sanduleak, & C. B. Stephenson.* 76, 1043, 40-B1 (1991)

STARS: FLARE

Flares on Mira Stars? *Bradley E. Schaefer.* 366, L39, 6-E1 (1991)

Nonthermal Radio Emission from the X-Ray–Bright K5 IV Star 1E 1751+7046. *Stephen L. Skinner.* 368, 272, 26-D11 (1991)

Dynamic Magnetic Reconnection at an X-Type Neutral Point. *I. J. D. Craig & A. N. McClymont.* 371, L41, 66-F1 (1991)

The Extraordinary 1989 December 14/15 Optical Flare Events on V711 Tauri. *Gregory W. Henry & Douglas S. Hall.* 373, L9, 91-B7 (1991)

The Great Flare of 1985 April 12 on AD Leonis. *Suzanne L. Hawley & Bjørn R. Pettersen.* 378, 725, 161-D1 (1991)

Avalanches and the Distribution of Solar Flares. *Edward T. Lu & Russell J. Hamilton.* 380, L89, 188-F5 (1991)

Numerical Simulations of Flares on M Dwarf Stars. I. Hydrodynamics and Coronal X-Ray Emission. *Chung-Chieh Cheng & Roberto Pallavicini.* 381, 234, 191-G12 (1991)

The Origin of the Far-Ultraviolet Continuum in Solar and Stellar Flares. *K. J. H. Phillips, G. E. Bromage, & J. G. Doyle.* 385, 731, 22-B11 (1992)

X-Ray–heated Models of Stellar Flare Atmospheres: Theory and Comparison with Observations. *Suzanne L. Hawley & George H. Fisher.* 78, 565, 10-F1 (1992)

Transient Periodicities in X-Ray–active Red Dwarfs: First Results from Mount Cuba and Interpretation with an Oscillating Loop Model. *D. J. Mullan, R. B. Herr, & S. Bhattacharyya.* 391, 265, 89-C1 (1992)

Detection of a Proton Beam during the Impulsive Phase of a Stellar Flare. *Bruce E. Woodgate, Richard D. Robinson, Kenneth G. Carpenter, Stephen P. Maran, & Steven N. Shore.* 397, L95, 181-C1 (1992)

Another Canonical Time Variation of X-Rays from Black Hole Candidates in the Very High Flare State? *Sigenori Miyamoto, Sayuri Iga, Shunji Kitamoto, & Yasuhide Kamado.* 403, L39, 20-D13 (1993)

A Giant X-Ray Flare on λ Eridani (B2e). *Myron A. Smith, Carol A. Grady, Geraldine J. Peters, & Eric D. Feigelson.* 409, L49, 111-D1 (1993)

A Search for Proton Beams during Flares on AU Microscopii. *R. D. Robinson, K. G. Carpenter, B. E. Woodgate, & S. P. Maran.* 414, 872, 182-B5 (1993)

Extreme Ultraviolet Explorer Deep Survey Observations of a Large Flare on AU Microscopii. *Scott L. Cully, Oswald H. W. Siegmund, Peter W. Vedder, & John V. Vallerga.* 414, L49, 185-B1 (1993)

Simultaneous Optical and *ROSAT* Soft X-Ray Observations of Impulsive Bursts on the Flare Star UV Ceti. *J. H. M. M. Schmitt, Bernhard Haisch, & H. Barwig.* 419, L81, 259-E7 (1993)

A Far-Ultraviolet Flare on a Pleiades G Dwarf. *T. R. Ayres, J. R. Stauffer, Theodore Simon, R. A. Stern, S. K. Antiochos, G. S. Basri, J. A. Bookbinder, A. Brown, G. A. Doschek, J. L. Linsky, L. W. Ramsey, & F. M. Walter.* 420, L33, 7-E4 (1994)

ROSAT Observations of Stellar Flares. *J. H. M. M. Schmitt.* 90, 735, 12-G12 (1994)

Radio Evidence for Nonthermal Particle Acceleration on Stars of Late Spectral Type. *Kenneth R. Lang.* 90, 753, 13-B5 (1994)

Evidence for Particle Acceleration in a Magnetized White Dwarf from Radio and Gamma-Ray Observations. *O. C. De Jager.* 90, 775, 13-D3 (1994)

ROSAT All-Sky Survey Observations of X-Ray Variability in Cool Giant Stars. *Bernhard Haisch & J. H. M. M. Schmitt.* 426, 716, 107-C13 (1994)

High-Velocity Plasma in the Transition Region of AU Microscopii: Evidence for Magnetic Reconnection and Saturated Heating during Quiescent and Flaring Conditions. *Jeffrey L. Linsky & Brian E. Wood.* 430, 342, 163-D8 (1994)

X-Ray Emission on Hybrid Stars: *ROSAT* Observations of α Trianguli Australis and ι Aurigae. *V. Kashyap, R. Rosner, F. R. Harnden, Jr., A. Maggio, G. Micela, & S. Sciortino.* 431, 402, 181-A13 (1994)

A Coronal Mass Ejection Model for the 1992 July 15 Flare on AU Microscopii Observed by the *Extreme Ultraviolet Explorer*. *Scott L. Cully, George H. Fisher, Mark J. Abbott, & Oswald H. W. Siegmund.* 435, 449, 249-E11 (1994)

An *ASCA* Observation of the Castor System. *Eric V. Gotthelf, Lalit Jalota, Koji Mukai, & Nicholas E. White.* 436, L91, 270-A5 (1994)

Correlations between the Flaring Radio Emission and Starspot Distribution of UX Arietis. *Nicholas M. Elias II, Andreas Quirrenbach, Arno Witzel, Christian E. Naundorf, Ralf Wegner, Edward F. Guinan, & George P. McCook.* 439, 983, 38-B13 (1995)

Heating and Ionization of Stellar Chromospheres by Nonthermal Proton Beams: Implications for Impulsive Phase, Redshifted Lyman-α Radiation in Stellar Flares. *Jeffrey W. Brosius, Richard D. Robinson, & Stephen P. Maran.* 441, 385, 64-E13 (1995)

Dynamic Processes in Be Star Atmospheres. III. Rapid Multiwavelength Variability in γ Cassiopeiae. *Myron A. Smith.* 442, 812, 91-D2 (1995)

Coronal Heating in Flare Stars: Resonant MHD Absorption? *D. J. Mullan & M. Johnson.* 444, 350, 118-C12 (1995)

A Search for Stellar Flares in Gamma-Ray Bursts Observed by BATSE and *Ulysses*. *P. Li, K. Hurley, G. J. Fishman, C. Kouveliotou, & D. Hartmann.* 446, 267, 156-G12 (1995)

The Statistical Physics of Solar Active Regions and the Fundamental Nature of Solar Flares. *Edward T. Lu.* 446, L109, 171-E3 (1995)

Emission-Line Pre–Main-Sequence Stars and X-Ray Sources in Orion. *Steven H. Pravdo & Lorella Angelini.* 447, 342, 177-B3 (1995)

Constraints on Energy Storage and Release Models for Astrophysical Transients and Solar Flares. *Edward T. Lu.* 447, 416, 178-B8 (1995)

Extreme-Ultraviolet Spectroscopy and Photometry of EQ Pegasi. *Brunella C. Monsignori Fossi, Massimo Landini, Antonella Fruscione, & Jean Dupuis.* 449, 376, 215-C7 (1995)

A Search for Microflaring Activity on dMe Flare Stars. I. Observations of the dM8e Star CN Leonis. *R. D. Robinson, K. G. Carpenter, J. W. Percival, & J. A. Bookbinder.* 451, 795, 258-B6 (1995)

The Correlation of Solar Flare Temperature and Emission Measure Extrapolated to the Case of Stellar Flares. *U. Feldman, J. M. Laming, & G. A. Doschek.* 451, L79, 261-A8 (1995)

Radio Detection of Late-Type (G–K) Dwarf Stars in the Pleiades. *Jeremy Lim & Stephen M. White.* 453, 207, 284-A5 (1995)

Simultaneous *Extreme-Ultraviolet Explorer* and Optical Observations of AD Leonis: Evidence for Large Coronal Loops and the Neupert Effect in Stellar Flares. *Suzanne L. Hawley, George H. Fisher, Theodore Simon, Scott L. Cully, Susana E. Deustua, Marek Jablonski, Christopher M. Johns-Krull, Bjørn R. Pettersen, Verne Smith, William J. Spiesman, & Jeffrey Valenti.* 453, 464, 287-D14 (1995)

Flare Production of ^{6}Li in Population II Stars. *Constantine P. Deliyannis & Robert A. Malaney.* 453, 810, 295-A14 (1995)

Stellar Activity at the End of the Main Sequence: GHRS Observations of the M8 Ve Star VB 10. *Jeffrey L. Linsky, Brian E. Wood, Alexander Brown, Mark S. Giampapa, & Carol Ambruster.* 455, 670, 331-B10 (1995)

STARS: FORMATION

Abundances of Hydrogen Sulfide in Star-forming Regions. *Y. C. Minh, L. M. Ziurys, W. M. Irvine, & D. McGonagle.* 366, 192, 3-D9 (1991)

On the [O/Fe] versus [Fe/H] Relationship and the Progenitors of Type I Supernovae. *C. Abia, R. Canal, & J. Isern.* 366, 198, 3-E1 (1991)

Far-Infrared and Submillimeter-Wavelength Observations of Star-forming Dense Cores. I. Spectra. *E. F. Ladd, Fred C. Adams, S. Casey, J. A. Davidson, G. A. Fuller, D. A. Harper, P. C. Myers, & R. Padman.* 366, 203, 3-E7 (1991)

The Star-forming Disk and CO Bar in M101. *Jeffrey D. P. Kenney, Nick Z. Scoville, & Christine D. Wilson.* 366, 432, 8-C1 (1991)

Thermal Instabilities in Proto–Globular Clusters Resulting from Time-dependent Potentials. *Stephen D. Murray & Douglas N. C. Lin.* 367, 149, 13-G6 (1991)

Spectroscopy of Taurus Cloud Brown Dwarf Candidates. *John Stauffer, Terry Herter, Donald Hamilton, George H. Rieke, Marcia J. Rieke, Ron Probst, & William Forrest.* 367, L23, 17-D7 (1991)

Effect of a QSO on the Interstellar Medium of Its Host Galaxy. *Smita Shanbhag.* 367, 462, 19-B5 (1991)

Nitrogen Abundance in Comet Halley. *Susan Wyckoff, Stephen C. Tegler, & Lisa Engel.* 367, 641, 21-C1 (1991)

Magnetic Flux Loss from Interstellar Clouds with Various Grain-Size Distributions. *Ryoichi Nishi, Takenori Nakano, & Toyoharu Umebayashi.* 368, 181, 25-C11 (1991)

Excitation of Millimeter and Submillimeter Water Masers. *David A. Neufeld & Gary J. Melnick.* 368, 215, 25-F11 (1991)

Star Clusters in the Clouds of Magellan. *Sidney van den Bergh.* 369, 1, 36-A11 (1991)

A Cosmos Study of IC 1613. *Paul W. Hodge, Toby R. Smith, Paul B. Eskridge, Harvey T. MacGillivray, & Steven M. Beard.* 369, 372, 42-D5 (1991)

Ionization Fronts and Shocked Flows: The Structure of the Orion Nebula at 0.1″. *J. Jeff Hester, R. Gilmozzi, C. R. O'Dell, S. M. Faber, Bel Campbell, Arthur Code, Douglas G. Currie, G. Edward Danielson, S. P. Ewald, Edward J. Groth, Jon A. Holtzman, T. Kelsall, Tod R. Lauer, Robert M. Light, Roger Lynds, Earl J. O'Neil, Jr., Edward J. Shaya, & James A. Westphal.* 369, L75, 46-C7 (1991)

OB Star Formation and H I Production in Molecular Clouds in M33. *Christine D. Wilson & Nick Scoville.* 370, 184, 49-D11 (1991)

Molecular Hydrogen in the Vicinity of NGC 7538 IRS 1 and IRS 2: Temperature and Ortho-to-Para Ratio. *Susan Hoban, Dennis C. Reuter, Michael J. Mumma, & Alex D. Storrs.* 370, 228, 50-A10 (1991)

Star Formation in Taurus-Auriga: The High-Mass Stars. *Frederick M. Walter & William T. Boyd.* 370, 318, 51-C1 (1991)

Star Formation and the Nature of Bipolar Outflows. *Frank H. Shu, Steven P. Ruden, Charles J. Lada, & Susana Lizano.* 370, L31, 53-E1 (1991)

The Effect of an External Disk on the Orbital Elements of a Central Binary. *P. Artymowicz, C. J. Clarke, S. H. Lubow, & J. E. Pringle.* 370, L35, 53-E7 (1991)

A Study of Star Formation in the Disks of Sa Galaxies. *Nelson Caldwell, Robert Kennicutt, Andrew C. Phillips, & Robert A. Schommer.* 370, 526, 54-G12 (1991)

Protostellar Condensations in the Core of NGC 2024. *D. C. Lis, J. E. Carlstrom, & T. G. Phillips.* 370, 583, 55-F5 (1991)

Does Accretion Cease When a Star Approaches Breakup? *Robert Popham & Ramesh Narayan.* 370, 604, 56-A6 (1991)

N_2H^+ in Orion: Chemical Clues to the Dynamics of the Quiescent Gas. *M. Womack, L. M. Ziurys, & S. Wyckoff.* 370, L99, 59-F1 (1991)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. I. The Issues, Formulation of the Problem, and Method of Solution. *Telemachos Ch. Mouschovias & Scott A. Morton.* 371, 296, 63-G1 (1991)

The Rate and Efficiency of High-Mass Star Formation along the Hubble Sequence. *Nicholas A. Devereux & Judith S. Young.* 371, 515, 68-A1 (1991)

Thermal and Nonthermal Motions in Dense Cores. *P. C. Myers, E. F. Ladd, & G. A. Fuller.* 372, L95, 85-E9 (1991)

The Extinction to the H_2 Line Emission in the DR 21 Outflow Source. *Daniel Nadeau, Martin Riopel, & T. R. Geballe.* 372, L103, 85-F5 (1991)
Dynamical Evolution and Molecular Abundances of Interstellar Clouds. *Sheo S. Prasad, Karen R. Heere, & Shankar P. Tarafdar.* 373, 123, 87-E5 (1991)
A Millimeter-Wave Line Study of L1287: A Case of Induced Star Formation by Stellar Wind Compression? *Ji Yang, Tomofumi Umemoto, Takahiro Iwata, & Yasuo Fukui.* 373, 137, 87-F7 (1991)
Magnetic Braking, Ambipolar Diffusion, Cloud Cores, and Star Formation: Natural Length Scales and Protostellar Masses. *Telemachos Ch. Mouschovias.* 373, 169, 88-B3 (1991)
VLBI Observations of Interstellar Ammonia Masers. *Preethi Pratap, Karl M. Menten, Mark J. Reid, James M. Moran, & C. Malcolm Walmsley.* 373, L13, 91-B12 (1991)
Collisional Pumping of H_2O Masers in Star-forming Regions. *Nikolaos D. Kylafis & Colin A. Norman.* 373, 525, 94-D13 (1991)
Nitric Oxide in Star-forming Regions: Further Evidence for Interstellar N-O Bonds. *L. M. Ziurys, D. McGonagle, Y. Minh, & W. M. Irvine.* 373, 535, 94-E11 (1991)
The Dense, Inner Part of the Protostellar Disk: Protostar Candidates in GGD 27 IRS. *Takuya Yamashita, Yasuhiro Murata, Ryohei Kawabe, Norio Kaifu, & Motohide Tamura.* 373, 560, 95-A1 (1991)
Probing the Core of Cepheus A: Millimeter and Submillimeter Observations. *G. H. Moriarty-Schieven, R. L. Snell, & V. A. Hughes.* 374, 169, 100-B3 (1991)
Two Micron Morphology of Candidate Protostars. *Motohide Tamura, Ian Gatley, William Waller, & Michael W. Werner.* 374, L25, 103-E7 (1991)
The Collapse of Cylindrical Isothermal and Polytropic Clouds with Rotation. *Ian Bonnell & Pierre Bastien.* 374, 610, 106-F5 (1991)
Rosseland and Planck Mean Opacities of a Zero-Metallicity Gas. *Paolo Lenzuni, David F. Chernoff, & Edwin E. Salpeter.* 76, 759, 35-B13 (1991)
The Evolution of Intermediate-Mass Protostars. I. Basic Results. *Francesco Palla & Steven W. Stahler.* 375, 288, 114-E1 (1991)
The Properties of NGC 2777: Are Companion Galaxies Young? *Halton Arp & Jack W. Sulentic.* 375, 569, 119-G1 (1991)
The Dynamical Evolution of the Protosolar Nebula. *Steven P. Ruden & James B. Pollack.* 375, 740, 121-G11 (1991)
The Equilibria and Evolutions of Magnetized, Rotating, Isothermal Clouds. V. The Effect of the Toroidal Field. *Kohji Tomisaka.* 376, 190, 127-C11 (1991)
NGC 1333 IRAS 4: A Very Young, Low-Luminosity Binary System. *Göran Sandell, Colin Aspin, William D. Duncan, Adrian P. G. Russell, & E. Ian Robson.* 376, L17, 130-C1 (1991)
Dense Cores in Dark Clouds. VI. Shapes. *P. C. Myers, G. A. Fuller, A. A. Goodman, & P. J. Benson.* 376, 561, 133-D1 (1991)
Testing Models of Low-Mass Star Formation: High-Resolution Far-Infrared Observations of L1551 IRS 5. *Harold M. Butner, Neal J. Evans II, Daniel F. Lester, Russell M. Levreault, & Stephen E. Strom.* 376, 636, 134-C6 (1991)
A Numerical Study of Star Formation in Interacting Disk Galaxies. *J. Christopher Mihos, Douglas O. Richstone, & Gregory D. Bothun.* 377, 72, 139-A1 (1991)
Two Micron Spectroscopy of Infrared Sources in NGC 2071. *D. M. Walther, T. R. Geballe, & E. I. Robson.* 377, 246, 141-A9 (1991)
The Molecular Structure of a Starburst: ^{13}CO in the Nucleus of Maffei 2. *Robert L. Hurt & Jean L. Turner.* 377, 434, 145-B8 (1991)
On Molecular Cloud Scaling Laws and Star Formation. *R. N. Henriksen.* 377, 500, 146-A1 (1991)
U-shaped Outflow in the Lynds 1221 Dark Cloud: An Example of Interaction of Outflows with Ambient Molecular Clouds. *Tomofumi Umemoto, Naomi Hirano, Osamu Kameya, Yasuo Fukui, Nario Kuno, & Keiya Takakubo.* 377, 510, 146-A13 (1991)
The Dense Molecular Envelope around the Compact H II Region G5.89−0.39 (W28 A2). *Yolanda Gómez, Luis F. Rodríguez, Guido Garay, & James M. Moran.* 377, 519, 146-B9 (1991)
Fragmentation of Elongated Cylindrical Clouds. III. Formation of Binary and Multiple Systems. *Ian Bonnell, Hugo Martel, Pierre Bastien, Jean-Pierre Arcoragi, & Willy Benz.* 377, 553, 146-E5 (1991)
Compact Starbursts in Ultraluminous Infrared Galaxies. *J. J. Condon, Z.-P. Huang, Q. F. Yin, & T. X. Thuan.* 378, 65, 151-G5 (1991)
Topography of the Galactic Disk: Z-Structure and Large-Scale Star Formation. *Emilio J. Alfaro, Jesús Cabrera-Caño, & Antonio J. Delgado.* 378, 106, 152-C10 (1991)
Fragmentation of Elongated Cylindrical Clouds. I. Isothermal Clouds. *Pierre Bastien, Jean-Pierre Arcoragi, Willy Benz, Ian Bonnell, & Hugo Martel.* 378, 255, 154-B5 (1991)
Infrared Polarization Images of Star-forming Regions. I. The Ubiquity of Bipolar Structure. *M. Tamura, Ian Gatley, R. R. Joyce, M. Ueno, H. Suto, & M. Sekiguchi.* 378, 611, 160-A1 (1991)
Massive Star Formation and Superwinds in IRAS 19254−7245 (The "Superantennae"). *Luis Colina, Sebastian Lípari, & F. Macchetto.* 379, 113, 164-D5 (1991)
An Observational Connection between Circumstellar Disk Mass and Molecular Outflows. *Sylvie Cabrit & Philippe André.* 379, L25, 169-C6 (1991)
A Catalog of Bright-rimmed Clouds with *IRAS* Point Sources: Candidates for Star Formation by Radiation-driven Implosion. I. The Northern Hemisphere. *Koji Sugitani, Yasuo Fukui, & Katsuo Ogura.* 77, 59, 44-B1 (1991)
Star Formation and the Molecular Content of IC 342. *Leslie J. Sage & P. M. Solomon.* 380, 392, 183-B7 (1991)
Millimeter Continuum Observations of Galactic Center Giant Molecular Cloud Cores. *D. C. Lis, J. E. Carlstrom, & Jocelyn Keene.* 380, 429, 183-E7 (1991)
Fragmentation of Elongated Cylindrical Clouds. II. Polytropic Clouds. *Jean-Pierre Arcoragi, Ian Bonnell, Hugo Martel, Willy Benz, & Pierre Bastien.* 380, 476, 184-B7 (1991)
The Discovery of a New, Very Strong, and Widespread Interstellar Methanol Maser Line. *Karl M. Menten.* 380, L75, 188-E1 (1991)
The Starburst Ring around the Seyfert Nucleus in NGC 7469. *A. S. Wilson, T. T. Helfer, C. A. Haniff, & M. J. Ward.* 381, 79, 190-A6 (1991)
Orbit Crowding of Molecular Gas at a Bar-Spiral Arm Transition Zone in M83. *Jeffrey D. P. Kenney & Steven D. Lord.* 381, 118, 190-D13 (1991)
Recent Star Formation in the Interacting Galaxy System NGC 520. *S. A. Stanford.* 381, 409, 195-G1 (1991)
On the Evolution of Gravitationally Unstable Protostellar Disks. *Leslie Tomley, Patrick Cassen, & Thomas Steiman-Cameron.* 382, 530, 208-B6 (1991)
Asymptotic Theory for the Spatial Distribution of Protostellar Emission. *Fred C. Adams.* 382, 544, 208-C8 (1991)
First Observations of the CO $J = 6$–5 Transition in Starburst Galaxies. *A. I. Harris, R. E. Hills, J. Stutzki, U. U. Graf, A. P. G. Russell, & R. Genzel.* 382, L75, 211-C7 (1991)
The Formation of Primordial Binaries in Globular Clusters by Star-Disk Interactions. *Stephen D. Murray, C. J. Clarke, & J. E. Pringle.* 383, 192, 214-D7 (1991)
Time-dependent Radio Sources in the Star-forming Region Cepheus A (East). *V. A. Hughes.* 383, 280, 215-F1 (1991)
Gravitational Fragmentation: A Comparison with W49A. *Eric R. Keto, John C. Lattanzio, & Joe J. Monaghan.* 383, 639, 222-B12 (1991)
Aperture Synthesis CS(2–1) Observations of a Young Stellar Object GL 490: Accretion Flow in Gas Disk. *Akiko Nakamura, Ryohei Kawabe, Yoshimi Kitamura, Masato Ishiguro, Yasuhiro Murata, & Nagayoshi Ohashi.* 383, L81, 226-F5 (1991)
^{13}CO in IC 342: Evidence for a Spiral Density Wave in the Nucleus. *Jean L. Turner & Robert L. Hurt.* 384, 72, 1-G13 (1992)
The Zeeman Effect in Astrophysical Water Masers and the Observation of Strong Magnetic Fields in Regions of Star Formation. *Gerald E. Nedoluha & William D. Watson.* 384, 185, 3-C5 (1992)
The Origin of the Optical Emission Lines Associated with Extragalactic Radio Sources. *S. M. Viegas & Elisabete M. de Gouveia Dal Pino.* 384, 467, 8-A1 (1992)
On the Origin of Submillimeter Emission from Young Stars in Taurus-Auriga. *Mary Barsony & Scott J. Kenyon.* 384, L53, 11-D1 (1992)
A Study of the Stellar Population in the Chamaeleon Dark Clouds. *Lisa S. Gauvin & Karen M. Strom.* 385, 217, 14-F1 (1992)
The Molecular Core in G34.3+0.2: Millimeter Interferometric Observations of HCO^+, $H^{13}CN$, $HC^{15}N$, and SO. *Patricia Carral & William J. Welch.* 385, 244, 15-A4 (1992)
Discovery of Outflows from Young Stellar Objects in Bok Globules. *João Lin Yun & Dan P. Clemens.* 385, L21, 17-C6 (1992)
Origin of Far-Infrared Emission in Seyfert and Starburst Galaxies. *Hideaki Mouri & Yoshiaki Taniguchi.* 386, 68, 25-A1 (1992)
Numerical Models for the Collapse and Fragmentation of Centrally Condensed Molecular Cloud Cores. *Elizabeth A. Myhill & William M. Kaula.* 386, 578, 32-E4 (1992)
A Survey of CS $J = 7 \rightarrow 6$ in Regions of Massive Star Formation. *René Plume, D. T. Jaffe, & Neal J. Evans II.* 78, 505, 9-F5 (1992)

Evolution of Spiral Galaxies. I. Halo-Disk Connection for the Evolution of the Solar Neighborhood. *Federico Ferrini, Francesca Matteucci, Chiara Pardi, & Umberto Penco.* 387, 138, 38-F5 (1992)

A Triggering Mechanism for Enhanced Star Formation in Colliding Galaxies. *Chanda J. Jog & P. M. Solomon.* 387, 152, 38-G6 (1992)

Properties of Swept-up Molecular Outflows. *Colin R. Masson & Lawrence M. Chernin.* 387, L47, 43-F1 (1992)

The Molecular Hydrogen Emission around L1551 IRS 5: Shock- Heated Molecular Gas at the Base of the Molecular Outflow. *Takuya Yamashita & Motohide Tamura.* 387, L93, 48-E5 (1992)

The Star Formation History of the Large Magellanic Cloud. *Gianpaolo Bertelli, Mario Mateo, Cesare Chiosi, & Alessandro Bressan.* 388, 400, 55-C11 (1992)

The Stability of Accretion Tori. IV. Fission and Fragmentation of Slender, Self-gravitating Annuli. *Dimitris M. Christodoulou & Ramesh Narayan.* 388, 451, 56-A1 (1992)

Subarcsecond Mid-Infrared Imaging of the Nuclei of the Infrared Bright Galaxies NGC 1614 and NGC 7469. *Eric Keto, Roger Ball, John Arens, Garrett Jernigan, & Margaret Meixner.* 389, 223, 62-F9 (1992)

The Juggler: A Three-lobed Near-Infrared Reflection Nebula toward CRL 2136 = OH 17.6+0.2. *Joel H. Kastner, David A. Weintraub, & C. Aspin.* 389, 357, 64-D1 (1992)

Thermal Dust Imaging: The Onset of Asymmetry in the Ultracompact H II Region G5.89−0.39. *Roger Ball, John F. Arens, J. Garrett Jernigan, Eric Keto, & Margaret M. Meixner.* 389, 616, 69-B1 (1992)

Star Formation and the Distribution of H I and Infrared Emission in M51. *Richard J. Rand, Shrinivas R. Kulkarni, & W. Rice.* 390, 66, 74-G9 (1992)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. II. Results and a Length Scale for Protostellar Cores. *Telemachos Ch. Mouschovias & Scott A. Morton.* 390, 144, 75-G1 (1992)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. III. A Further Parameter Study and Magnetically Controlled Accretion Rate. *Telemachos Ch. Mouschovias & Scott A. Morton.* 390, 166, 76-A11 (1992)

Probing the Circumstellar Environments of Very Young Low-Mass Stars Using Water Masers. *S. Terebey, S. N. Vogel, & P. C. Myers.* 390, 181, 76-C1 (1992)

Bipolar Outflow in B335: The Small-Scale Structure. *Naomi Hirano, Osamu Kameya, Takashi Kasuga, & Tomofumi Umemoto.* 390, L85, 85-B1 (1992)

Ambipolar Diffusion and Star Formation: Formation and Contraction of Axisymmetric Cloud Cores. I. Formulation of the Problem and Method of Solution. *Robert A. Fiedler & Telemachos Ch. Mouschovias.* 391, 199, 88-D12 (1992)

Far-Ultraviolet MAMA Detector Imagery and Emission-Line CCD Imagery of NGC 6240. *Andrew M. Smith, Robert S. Hill, Frederick J. Vrba, & J. Gethyn Timothy.* 391, L81, 99-F5 (1992)

Initiation of Bipolar Flows by Magnetic Field Twisting in Protostellar Nebulae. *William I. Newman, Alice L. Newman, & Richard V. E. Lovelace.* 392, 622, 110-A1 (1992)

The Outflow in the L1157 Dark Cloud: Evidence for Shock Heating of the Interacting Gas. *T. Umemoto, T. Iwata, Y. Fukui, H. Mikami, S. Yamamoto, O. Kameya, & N. Hirano.* 392, L83, 113-E6 (1992)

Detection of SiO Emission in the L1157 Dark Cloud. *Hitomi Mikami, Tomofumi Umemoto, Satoshi Yamamoto, & Shuji Saito.* 392, L87, 113-E11 (1992)

The Formation of Primordial Degenerate Protostars. *Paolo Lenzuni, David F. Chernoff, & Edwin E. Salpeter.* 393, 232, 117-A11 (1992)

Global Star Formation in the L1630 Molecular Cloud. *Elizabeth A. Lada.* 393, L25, 120-D7 (1992)

Water Masers in W49N—The Youngest Stellar Jet? *Mordecai-Mark Mac Low & Moshe Elitzur.* 393, L33, 120-E6 (1992)

Color Gradients in Cooling Flows in Clusters of Galaxies. *Brian R. McNamara & Robert W. O'Connell.* 393, 579, 123-B1 (1992)

In Search of Evidence for Protostellar Collapse: A Systematic Study of Line Formation in Low-Mass Dense Cores. *Shudong Zhou.* 394, 204, 130-E4 (1992)

Planar H_2O Masers in Star-forming Regions. *Moshe Elitzur, David J. Hollenbach, & Christopher F. McKee.* 394, 221, 130-F10 (1992)

Star Formation in Protogalactic Clouds. *Douglas N. C. Lin & Stephen D. Murray.* 394, 523, 135-G8 (1992)

Implications of Ultraviolet Imaging Telescope Observations for Star Formation Histories in NGC 1275. *Eric P. Smith, Robert W. O'Connell, Ralph C. Bohlin, Kwang-Ping Cheng, Robert H. Cornett, Jesse K. Hill, Robert S. Hill, Paul Hintzen, Wayne B. Landsman, Susan G. Neff, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L49, 145-D9 (1992)

Evidence for a Wind-swept Cavity in HH 34? *Alexander Rudolph & William J. Welch.* 395, 488, 148-F3 (1992)

Global Aspects of Dynamics and Star Formation in Taurus. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 395, 501, 148-G13 (1992)

Twin Peaks of CO Emission in the Central Regions of Barred Galaxies. *Jeffrey D. P. Kenney, Christine D. Wilson, Nick Z. Scoville, Nicholas A. Devereux, & Judith S. Young.* 395, L79, 153-G5 (1992)

Extremely High Velocity CO Emission from NGC 2071. *Lawrence M. Chernin & Colin R. Masson.* 396, L35, 160-F8 (1992)

Density Structure and Star Formation in Dense Cores with Thermal and Nonthermal Motions. *P. C. Myers & G. A. Fuller.* 396, 631, 165-C1 (1992)

On the Use of Far-Infrared Luminosity as a Star Formation Indicator in Galaxies. *Marc Sauvage & Trinh X. Thuan.* 396, L69, 167-A9 (1992)

On the Detectability of the Gas of Other Solar Nebulae. *Toshihiro Omodaka, Yoshimi Kitamura, & Eiko Kawazoe.* 396, L87, 167-C7 (1992)

[C I] Emission at $z = 2.286$ in the Protogalaxy IRAS F10214+4724. *Robert L. Brown & Paul A. Vanden Bout.* 397, L11, 173-B10 (1992)

IRAS F10214+4724: An Extended CO Emission Source at $z = 2.2867$. *Robert L. Brown & Paul A. Vanden Bout.* 397, L19, 173-C6 (1992)

Dusty Disks in the Multiple Systems UZ Tauri and GG Tauri. *M. Simon & S. Guilloteau.* 397, L47, 173-F9 (1992)

IRAS Observations and the Stellar Content of H II Regions in the Large Magellanic Cloud. *Kathleen DeGioia-Eastwood.* 397, 542, 177-F7 (1992)

Resolving the Forbidden-Line Emission Regions of Young Stellar Objects: DD Tauri. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 397, L107, 181-D7 (1992)

High-Velocity HCO^+ Emission from L1551 IRS 5: Evidence for Wind-Cloud Interactions. *Alexander Rudolph.* 397, L111, 181-D13 (1992)

^{26}Al and Time Scales of the Solar Nebula. *Kurt Liffman.* 398, L111, 194-F1 (1992)

Large Infrared and Optical Color Gradients in the Cartwheel Ring Galaxy: Evidence for the First Epoch of Star Formation in the Wake of an Expanding Ring. *P. M. Marcum, P. N. Appleton, & J. L. Higdon.* 399, 57, 195-G3 (1992)

Near-resonant Excitation and Propagation of Eccentric Density Waves by External Forcing. *Eve C. Ostriker, Frank H. Shu, & Fred C. Adams.* 399, 192, 197-E13 (1992)

Infrared Line Diagnostics of Active Galactic Nuclei. *Luigi Spinoglio & Matthew A. Malkan.* 399, 504, 204-B11 (1992)

Corrugations and Star Formation Activity: The Carina-Sagittarius Arm. *Emilio J. Alfaro, Jesús Cabrera-Caño, & Antonio J. Delgado.* 399, 576, 205-A9 (1992)

Galaxy Formation and Physical Bias. *Renyue Cen & Jeremiah P. Ostriker.* 399, L113, 207-F7 (1992)

Cool Mass-losing Boundary Layers of T Tauri Accretion Disks. *Claude Bertout & Oded Regev.* 399, L163, 208-E1 (1992)

Models of Star Formation in Interacting and Merging Disk Galaxies. *J. Christopher Mihos, Douglas O. Richstone, & Gregory D. Bothun.* 400, 153, 210-G4 (1992)

Globular Cluster Formation: The Fossil Record. *Stephen D. Murray & Douglas N. C. Lin.* 400, 265, 212-C3 (1992)

Interacting H_2O Masers in Star-forming Regions. *Nikolaos D. Kylafis & Konstantinos G. Pavlakis.* 400, 344, 213-B12 (1992)

Starbursts Triggered by Central Overpressure in Interacting Galaxies. *Chanda J. Jog & Mousumi Das.* 400, 476, 216-C1 (1992)

Fragmentation of Elongated Cylindrical Clouds. IV. Clouds with Solid-Body Rotation about an Arbitrary Axis. *Ian Bonnell, Jean-Pierre Arcoragi, Hugo Martel, & Pierre Bastien.* 400, 579, 217-E8 (1992)

A Binary Origin for FU Orionis Stars. *Ian Bonnell & Pierre Bastien.* 401, L31, 227-E1 (1992)

VLBI Observations of the 6.7 GHz Methanol Masers toward W3(OH). *K. M. Menten, M. J. Reid, P. Pratap, J. M. Moran, & T. L. Wilson.* 401, L39, 227-F1 (1992)

Fragmentation of Elongated Cylindrical Clouds. V. Dependence of Mass Ratios on Initial Conditions. *Ian Bonnell & Pierre Bastien.* 401, 654, 230-F1 (1992)

Protostellar Hydrodynamics: Constructing and Testing a Spatially and Temporally Second-Order–accurate Method. I. Spherical Coordinates. *Alan P. Boss & Elizabeth A. Myhill.* 83, 311, 62-B13 (1992)

Tidally Triggered Galaxy Formation. II. Galaxy Number Counts. *Cedric Lacey, Bruno Guiderdoni, Brigitte Rocca-Volmerange, & Joseph Silk.* 402, 15, 1-C6 (1993)

Dust Temperature Distributions in Star-forming Condensations. *Taoling Xie, Paul F. Goldsmith, Ronald L. Snell, & Weimin Zhou.* 402, 216, 3-F11 (1993)

Millimeter-Wavelength Aperture Synthesis Observations of Massive Star-forming Regions in Sagittarius B2. *D. C. Lis, P. F. Goldsmith, J. E. Carlstrom, & N. Z. Scoville.* 402, 238, 4-A12 (1993)

Gravitational Formation Times and Stellar Mass Distributions for Stars of Mass 0.3–30 $M_{\odot}$. *P. C. Myers & G. A. Fuller.* 402, 635, 10-E1 (1993)

OH and H_2O Masers in Sagittarius B1: Evidence for Ongoing Star Formation. *David M. Mehringer, Patrick Palmer, & W. M. Goss.* 402, L69, 13-A1 (1993)

Magnetic Nonthermal Activity in the T Tauri System. *Robert B. Phillips, Colin J. Lonsdale, & Eric D. Feigelson.* 403, L43, 20-E5 (1993)

An *IUE* Search for Star Formation in Ellipticals with Gaseous Disks. *Francesco Bertola, David Burstein, Lucio M. Buson, & Alvio Renzini.* 403, 577, 22-G1 (1993)

Formation of Globular Clusters from Gas in Large-Scale Unorganized Motion in Galaxies. *Yasuki Kumai, Baidyanath Basu, & Mitsuaki Fujimoto.* 404, 144, 29-G1 (1993)

Evidence for Protostellar Collapse in B335. *Shudong Zhou, Neal J. Evans II, Carsten Kömpe, & C. M. Walmsley.* 404, 232, 30-F11 (1993)

PIG (Partially Ionized Globule) Anatomy: Density and Temperature Structure of the Bright-rimmed Globule IC 1396E. *E. Serabyn, R. Güsten, & L. Mundy.* 404, 247, 31-A1 (1993)

Magnetic Field in a Low-Mass Protostar Disk: Millimeter Polarimetry of IRAS 16293−2422. *Motohide Tamura, Saeko S. Hayashi, Takuya Yamashita, William D. Duncan, & James H. Hough.* 404, L21, 33-F1 (1993)

Molecular Cloud Cores in the Orion A Cloud. I. Nobeyama CS (1–0) Survey. *Ken'ichi Tatematsu, Tomofumi Umemoto, Osamu Kameya, Naomi Hirano, Tetsuo Hasegawa, Masahiko Hayashi, Takahiro Iwata, Norio Kaifu, Hitomi Mikami, Yasuhiro Murata, Makoto Nakano, Takenori Nakano, Nagayoshi Ohashi, Kazuyoshi Sunada, Hiroshi Takaba, & Satoshi Yamamoto.* 404, 643, 37-A5 (1993)

Discovery of a Rotating Protoplanetary Gas Disk around the Young Star GG Tauri. *R. Kawabe, M. Ishiguro, T. Omodaka, Y. Kitamura, & S. M. Miyama.* 404, L63, 40-E1 (1993)

CO Lines toward NGC 2024 and Other Star-forming Regions: A Closer Look at the Warm Gas Component. *U. U. Graf, A. Eckart, R. Genzel, A. I. Harris, A. Poglitsch, A. P. G. Russell, & J. Stutzki.* 405, 249, 44-B13 (1993)

An *IRAS* Survey of Star-forming Regions toward Cygnus. *Sten F. Odenwald & Phil R. Schwartz.* 405, 706, 51-G7 (1993)

The Internal Mass Distribution of a Giant Molecular Cloud without Star Formation. *Jonathan P. Williams & Leo Blitz.* 405, L75, 54-E1 (1993)

N_2H^+ in the Orion Ambient Ridge: Cloud Clumping versus Rotation. *Maria Womack, L. M. Ziurys, & L. J. Sage.* 406, L29, 61-A1 (1993)

Dense Cores in Dark Clouds. VIII. Velocity Gradients. *A. A. Goodman, P. J. Benson, G. A. Fuller, & P. C. Myers.* 406, 528, 64-D3 (1993)

Heavy-Element Abundances and Massive Star Formation. *Boqi Wang & Joseph Silk.* 406, 580, 65-B1 (1993)

Fragmentation of Elongated Cylindrical Clouds. VI. Comparison with Observations. *Ian Bonnell & Pierre Bastien.* 406, 614, 65-E1 (1993)

The Circumstellar Density Distribution of L1551NE. *M. Barsony & C. J. Chandler.* 406, L71, 68-E1 (1993)

Near-Infrared Observations of the HH 111 Region. *Roland Gredel & Bo Reipurth.* 407, L29, 75-D1 (1993)

Chemical and Luminosity Evolution, and Counts of Galaxies in a Merger Model. *P. Colín & D. N. Schramm.* 407, 510, 77-A1 (1993)

Dynamical Instabilities in Two-Phase Media and the Minimum Masses of Stellar Systems. *Stephen D. Murray, Simon D. M. White, John M. Blondin, & Douglas N. C. Lin.* 407, 588, 77-G11 (1993)

Infrared and Optical Imaging of *IRAS* Sources with CO Outflow: A Snapshot of Early Star Formation. *H. Chen, A. T. Tokunaga, K. M. Strom, & K.-W. Hodapp.* 407, 639, 78-E4 (1993)

Embedded Star Clusters Associated with Luminous *IRAS* Point Sources. *John M. Carpenter, Ronald L. Snell, F. Peter Schloerb, & M. F. Skrutskie.* 407, 657, 78-F11 (1993)

Centrifugally Driven Winds from Protostellar Disks. I. Wind Model and Thermal Structure. *Pedro N. Safier.* 408, 115, 84-E6 (1993)

The Spectral Energy Distribution of Star-forming Regions. *Ralf Siebenmorgen.* 408, 218, 85-G3 (1993)

Multiplicity and the Ages of the Stars in the Taurus Star-forming Region. *M. Simon, A. M. Ghez, & Ch. Leinert.* 408, L33, 89-B1 (1993)

Infrared Images of the Young Cluster NGC 2264. *Charles J. Lada, Erick T. Young, & Thomas P. Greene.* 408, 471, 91-A11 (1993)

Massive Star Formation near the Galactic Center and the Fate of the Stellar Remnants. *Mark Morris.* 408, 496, 91-D1 (1993)

Chemical Differentiation between Star-forming Regions: The Orion Hot Core and Compact Ridge. *P. Caselli, T. I. Hasegawa, & Eric Herbst.* 408, 548, 92-A11 (1993)

Gas and Dust in the Pre–Main-Sequence Multiple System GG Tauri. *D. W. Koerner, A. I. Sargent, & S. V. W. Beckwith.* 408, L93, 95-D7 (1993)

Near-Infrared Discovery of the L810 Nebula Illuminator. *João Lin Yun, Dan P. Clemens, Mark J. McCaughrean, & Marcia Rieke.* 408, L101, 95-E9 (1993)

21 Centimeter Study of Spiral Galaxies in Clusters. III. Neutral Gas Content, Star Formation, and Radio Continuum Properties. *Marco Scodeggio & Giuseppe Gavazzi.* 409, 110, 98-C8 (1993)

Evolution of Elliptical Galaxies. I. The Multiphase Model. *Federico Ferrini & Bianca Maria Poggianti.* 410, 44, 112-F4 (1993)

A Similarity Solution to the Kinematic $\alpha^2\omega$ Dynamo Equation with Time-dependent Coefficients. *Chung-Ming Ko.* 410, 128, 113-F8 (1993)

Collapse and Fragmentation of Molecular Cloud Cores. I. Moderately Centrally Condensed Cores. *Alan P. Boss.* 410, 157, 114-B1 (1993)

Discovery of New Objects in the Orion Nebula on *HST* Images: Shocks, Compact Sources, and Protoplanetary Disks. *C. R. O'Dell, Zheng Wen, & Xihai Hu.* 410, 696, 122-C11 (1993)

The Formation of Protostellar Disks. I. 1 $M_{\odot}$. *Harold W. Yorke, Peter Bodenheimer, & Gregory Laughlin.* 411, 274, 130-E13 (1993)

The Inner-Disk and Stellar Properties of the Young Stellar Object WL 16. *John S. Carr, Alan T. Tokunaga, Joan Najita, Frank H. Shu, & Alfred E. Glassgold.* 411, L37, 134-A13 (1993)

Bifurcation Analysis of a Simple Analytic Model of Self-propagating Star Formation. *Thomas Neukirch & Michael Hesse.* 411, 840, 140-C5 (1993)

An Alternative to Unseen Companions to T Tauri Stars. *Alan P. Boss & Harold W. Yorke.* 411, L99, 142-F11 (1993)

Starburst Modeling of M82: Test Case for a Biased Initial Mass Function. *G. H. Rieke, K. Loken, M. J. Rieke, & P. Tamblyn.* 412, 99, 143-C9 (1993)

Magnetohydrodynamic Wave Propagation in One-dimensional Nonhomogeneous, Self-gravitating Clouds. *Marco Fatuzzo & Fred C. Adams.* 412, 146, 143-G10 (1993)

Synthesis Images of 6.7 GHz Methanol Masers. *R. P. Norris, J. B. Whiteoak, J. L. Caswell, M. H. Wieringa, & R. G. Gough.* 412, 222, 144-G8 (1993)

Infrared Luminosity Functions for the Young Stellar Population Associated with the L1641 Molecular Cloud. *Karen M. Strom, Stephen E. Strom, & K. M. Merrill.* 412, 233, 145-A8 (1993)

Subarcsecond Images of CW Tauri: Constraints on Disk Size and Jet Formation. *Ana I. Gómez de Castro.* 412, L43, 148-E5 (1993)

Stellar Birthrate in the Galaxy: Constraints from X-Ray Flux-limited Surveys. *G. Micela, S. Sciortino, & F. Favata.* 412, 618, 151-D10 (1993)

Radio Continuum and Radio Recombination Line Observations of Sagittarius B2. *David M. Mehringer, Patrick Palmer, W. M. Goss, & F. Yusef-Zadeh.* 412, 684, 152-C11 (1993)

The Stability of Accretion Tori. V. Unstable Modes and Avoided Crossings in Extended, Self-gravitating Annuli. *Dimitris M. Christodoulou.* 412, 696, 152-D13 (1993)

The Discovery of Two FU Orionis Objects in L1641. *Karen M. Strom & Stephen E. Strom.* 412, L63, 155-D1 (1993)

Infrared CO Emission from Young Stars: High-Resolution Spectroscopy. *C. J. Chandler, J. E. Carlstrom, N. Z. Scoville, W. R. F. Dent, & T. R. Geballe.* 412, L71, 155-D13 (1993)

The Molecular Gas and Star Formation in *IRAS* Bright Early-Type Disk Galaxies. I. NGC 7625. *Jonathan G. Li, E. R. Seaquist, J. M. Wrobel, Zhong Wang, & L. J. Sage.* 413, 150, 158-A6 (1993)

Fragmentation and Kinematics of the W49N Cloud Core. *E. Serabyn, R. Güsten, & A. Schulz.* 413, 571, 163-E9 (1993)

The Detection of a New Methanol Maser Transition at 9.9 GHz. *V. I. Slysh, S. V. Kalenskii, & I. E. Val'tts.* 413, L133, 169-C6 (1993)

The Faintest Stars: The Luminosity and Mass Functions at the Bottom of the Main Sequence. *Christopher G. Tinney.* 414, 279, 173-D12 (1993)

The Small-Scale Structure and Kinematics of B335. *Claire J. Chandler & Anneila I. Sargent.* 414, L29, 175-E13 (1993)

Induced Star Formation in a Radio Lobe of 3C 285? *Wil J. M. van Breugel & Arjun Dey.* 414, 563, 178-C3 (1993)

The Embedded Young Stars in the Taurus-Auriga Molecular Cloud. I. Models for Spectral Energy Distributions. *Scott J. Kenyon, Nuria Calvet, & Lee Hartmann.* 414, 676, 179-F1 (1993)

The Embedded Young Stars in the Taurus-Auriga Molecular Cloud. II. Models for Scattered Light Images. *Scott J. Kenyon, Barbara A. Whitney, Mercedes Gomez, & Lee Hartmann.* 414, 773, 180-G9 (1993)

The Triple Radio Continuum Source in Serpens: The Birth of a Herbig-Haro System? *S. Curiel, L. F. Rodríguez, J. M. Moran, & J. Cantó.* 415, 191, 187-D5 (1993)

Star Formation in the L1641 North Cluster. *Klaus-Werner Hodapp & James Deane.* 88, 119, 42-A1 (1993)

Ambipolar Diffusion and Star Formation: Formation and Contraction of Axisymmetric Cloud Cores. II. Results. *Robert A. Fiedler & Telemachos Ch. Mouschovias.* 415, 680, 196-C7 (1993)

Hubble Space Telescope Images of the Subarcsecond Jet in DG Tauri. *J. Kepner, P. Hartigan, C. Yang, & S. Strom.* 415, L119, 200-C8 (1993)

Shear in the IRAS 3282 Outflow. *M. Tafalla, R. Bachiller, J. Martín-Pintado, & M. C. H. Wright.* 415, L139, 200-F1 (1993)

HH 80–81: A Highly Collimated Herbig-Haro Complex Powered by a Massive Young Star. *J. Martí, L. F. Rodríguez, & B. Reipurth.* 416, 208, 203-F1 (1993)

Gravitational Collapse of an Isothermal Sphere. *Prudence N. Foster & Roger A. Chevalier.* 416, 303, 204-G8 (1993)

Star Formation in the Spiral Arms of NGC 4321. II. H I Distribution and Kinematics. *Johan H. Knapen, Jordi Cepa, John E. Beckman, M. Soledad del Rio, & Alan Pedlar.* 416, 563, 210-D1 (1993)

On the Angular Momentum Transport Associated with Convective Eddies in Accretion Disks. *W. Kley, J. C. B. Papaloizou, & D. N. C. Lin.* 416, 679, 211-G7 (1993)

On the Nonaxisymmetric Convective Instabilities in Accretion Disks. *D. N. C. Lin, J. C. B. Papaloizou, & W. Kley.* 416, 689, 212-A4 (1993)

Galactic Chemical Evolution with Nearly Constant Star-Formation Rates. *Sarbani Basu & N. C. Rana.* 417, 145, 219-C1 (1993)

Collapse of Magnetized Molecular Cloud Cores. I. Semianalytical Solution. *Daniele Galli & Frank H. Shu.* 417, 220, 220-C1 (1993)

Collapse of Magnetized Molecular Cloud Cores. II. Numerical Results. *Daniele Galli & Frank H. Shu.* 417, 243, 220-D13 (1993)

Dynamics of Conductive/Cooling Fronts: Cloud Implosion and Thermal Solitons. *A. Ferrara & Yu. Shchekinov.* 417, 595, 226-F13 (1993)

Modeling the Spatial Distribution of Star Formation in Interacting Disk Galaxies. *J. Christopher Mihos, Gregory D. Bothun, & Douglas O. Richstone.* 418, 82, 232-B5 (1993)

The L1448 Molecular Jet. *John Bally, Elizabeth A. Lada, & Adair P. Lane.* 418, 322, 235-A10 (1993)

Synthetic UV Lines of Si IV, C IV, and He II from a Population of Massive Stars in Starburst Galaxies. *Carmelle Robert, Claus Leitherer, & Timothy M. Heckman.* 418, 749, 241-G7 (1993)

On the Formation of Spheroidal Stellar Systems and the Nature of Supersonic Turbulence in Star-forming Regions. *Guillermo Tenorio-Tagle, Casiana Muñoz-Tuñon, & Donald P. Cox.* 418, 767, 242-B3 (1993)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. I. Basic Physics and Formulation of the Problem. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 418, 774, 242-B13 (1993)

A Dynamically Accreting Gas Disk around HL Tauri. *Masahiko Hayashi, Nagayoshi Ohashi, & Shoken M. Miyama.* 418, L71, 245-C13 (1993)

Molecular Hydrogen in the IRAS 03282+3035 Stellar Jet. *John Bally, David Devine, Mark Hereld, & Bernard J. Rauscher.* 418, L75, 245-D7 (1993)

Star Formation at Compressed Interfaces in Turbulent Self-gravitating Clouds. *B. G. Elmegreen.* 419, L29, 252-E1 (1993)

A Well-shaped Bipolar Outflow Shell in Monoceros R2. *Taoling Xie, Paul F. Goldsmith, & Nimesh Patel.* 419, L33, 252-E7 (1993)

Kiloparsec-Scale Radio Emission in Seyfert Galaxies: Evidence for Starburst-driven Superwinds? *S. A. Baum, C. P. O'Dea, D. Dallacassa, A. G. de Bruyn, & A. Pedlar.* 419, 553, 254-F1 (1993)

Protostellar Hydrodynamics: Constructing and Testing a Spatially and Temporally Second-Order Accurate Method. II. Cartesian Coordinates. *Elizabeth A. Myhill & Alan P. Boss.* 89, 345, 54-C12 (1993)

The Stability of Thick, Self-gravitating Disks in Protostellar Systems. *John W. Woodward, Joel E. Tohline, & Izumi Hachisu.* 420, 247, 4-A7 (1994)

Sequential Star Formation in Taurus Molecular Cloud 1. *Tomoyuki Hanawa, Satoshi Yamamoto, & Yasuhiro Hirahara.* 420, 318, 4-G5 (1994)

Vorticity, Angular Momentum, and Cloud Fragmentation. *J. J. Monaghan.* 420, 692, 11-D7 (1994)

Evolution of Spiral Galaxies. II. The Star Formation History in the Solar Neighborhood. *Maria Chiara Pardi & Federico Ferrini.* 421, 491, 24-C7 (1994)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. II. Numerical Method of Solution. *Scott A. Morton, Telemachos Ch. Mouschovias, & Glenn E. Ciolek.* 421, 561, 25-B6 (1994)

Formation, Early Evolution, and Gravitational Stability of Protoplanetary Disks. *Taishi Nakamoto & Yoshitsugu Nakagawa.* 421, 640, 26-C1 (1994)

The Kinematics of Molecular Outflows. *Steven W. Stahler.* 422, 616, 39-E1 (1994)

Further Studies of Gravitationally Unstable Protostellar Disks. *Leslie Tomley, Thomas Y. Steiman-Cameron, & Patrick Cassen.* 422, 850, 42-D8 (1994)

Wavelength-dependent Kinematics in the Dusty Inclined Galaxy NGC 2146. *F. Prada, J. E. Beckman, C. D. McKeith, J. Castles, & A. Greve.* 423, L35, 53-E8 (1994)

Star Formation in the Galactic Center Dust Ridge. *D. C. Lis, K. M. Menten, E. Serabyn, & R. Zylka.* 423, L39, 53-F1 (1994)

A Molecular Jet from LkHα 234. *George F. Mitchell & Henry E. Matthews.* 423, L55, 53-G8 (1994)

A Numerical Study of Viscous Flows in Axisymmetric α-Accretion Disks. *Michał Różyczka, Peter Bodenheimer, & K. R. Bell.* 423, 736, 57-F10 (1994)

Fueling Nuclear Activity in Disk Galaxies: Starbursts and Monsters. *Clayton H. Heller & Isaac Shlosman.* 424, 84, 63-B1 (1994)

Submillimeter Continuum Survey of the Galactic Center. *D. C. Lis & J. E. Carlstrom.* 424, 189, 64-C8 (1994)

A Multiwavelength Study of Star Formation in the L1495E Cloud in Taurus. *Karen M. Strom & Stephen E. Strom.* 424, 237, 64-G4 (1994)

The W3 IRS 5 Cluster: Radio Continuum and Water Maser Observations. *M. J. Claussen, R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 424, L41, 69-E13 (1994)

The Formation of Stellar Groups and Clusters in Molecular Cloud Cores. *Kanan Patel & Ralph E. Pudritz.* 424, 688, 73-D7 (1994)

On the Size and Formation Mechanism of the Largest Star-forming Complexes in Spiral and Irregular Galaxies. *Debra Meloy Elmegreen, Bruce G. Elmegreen, Cornelia Lang, & Carnella Stephens.* 425, 57, 80-G11 (1994)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. III. Typical Axisymmetric Solutions. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 425, 142, 82-A6 (1994)

Discovery of Three Binary Millisecond Pulsars. *M. Bailes, P. A. Harrison, D. R. Lorimer, S. Johnston, A. G. Lyne, R. N. Manchester, N. D'Amico, L. Nicastro, T. M. Tauris, & C. Robinson.* 425, L41, 85-F5 (1994)

Evidence for HCO^+ Infall toward T Tauri? *Huib Jan van Langevelde, Ewine F. van Dishoeck, & Geoffrey A. Blake.* 425, L45, 85-F11 (1994)

The Massive Molecular Outflow from CRL 2136 IRS 1. *Joel H. Kastner, David A. Weintraub, Ronald L. Snell, G. Sandell, C. Aspin, D. H. Hughes, & F. Baas.* 425, 695, 90-C9 (1994)

A Near-Infrared Study of the Monoceros R2 Star Formation Region. *Eric M. Howard, Judith L. Pipher, & William J. Forrest.* 425, 707, 90-D12 (1994)

Starbursts by Gravitational Collapse in the Inner Lindblad Resonance Rings of Galaxies. *B. G. Elmegreen.* 425, L73, 94-C8 (1994)

Successive Ejection Events in the L1551 Molecular Outflow. *R. Bachiller, M. Tafalla, & J. Cernicharo.* 425, L93, 94-F1 (1994)

Radio Continuum and Radio Recombination Line Observations of W51. *David M. Mehringer.* 91, 713, 29-A2 (1994)

General Analytic Results for Nonlinear Waves and Solitons in Molecular Clouds. *Fred C. Adams, Marco Fatuzzo, & Richard Watkins.* 426, 629, 106-C5 (1994)

Molecular Lines in Bok Globules and around Herbig Ae/Be Stars. *F. Scappini, G. G. C. Palumbo, G. Bruni, & P. Bergman.* 427, 259, 113-B12 (1994)

Are Cosmic Rays Effective for Ionization of Protoplanetary Disks? *Arkady Z. Dolginov & Tomasz F. Stepinski.* 427, 377, 114-E3 (1994)

A *Q* Condition for Long-Range Propagating Star Formation. *B. G. Elmegreen.* 427, 384, 114-E12 (1994)

Outflows from Young Stellar Objects in Bok Globules: Maps. *João Lin Yun & Dan P. Clemens.* 92, 145, 33-C5 (1994)

A Catalog of Bright-rimmed Clouds with *IRAS* Point Sources: Candidates for Star Formation by Radiation-driven Implosion. II. The Southern Hemisphere. *Koji Sugitani & Katsuo Ogura.* 92, 163, 33-D11 (1994)

H II Regions in M81 Group Dwarf Galaxies. *Bryan W. Miller & Paul Hodge.* 427, 656, 120-G11 (1994)

Gravitational Instability and Disk Star Formation. *Boqi Wang & Joseph Silk.* 427, 759, 122-B4 (1994)

Structure and Evolution of Magnetically Supported Molecular Clouds: Evidence for Ambipolar Diffusion in the Barnard 1 Cloud. *R. M. Crutcher, Telemachos Ch. Mouschovias, T. H. Troland, & Glenn E. Ciolek.* 427, 839, 123-A13 (1994)

A Protostellar Jet Model for the Water Masers in W49N. *Mordecai-Mark Mac Low, Moshe Elitzur, James M. Stone, & Arieh Königl.* 427, 914, 124-A7 (1994)

Using FU Orionis Outbursts to Constrain Self-regulated Protostellar Disk Models. *K. R. Bell & D. N. C. Lin.* 427, 987, 125-A1 (1994)

CS Multitransitional Study of Density Distribution in Star-forming Regions. II. The S140 Region. *Shudong Zhou, Harold M. Butner, Neal J. Evans II, Rolf Güsten, Marc L. Kutner, & Lee G. Mundy.* 428, 219, 130-G10 (1994)

Gravitational Instabilities in a Proto–Planetary Disk Including the Effects of Magnetic Fields. *Hyerim Noh, Ethan T. Vishniac, & William D. Cochran.* 428, 275, 131-E9 (1994)

Determining Structure in Molecular Clouds. *Jonathan P. Williams, Eugène J. de Geus, & Leo Blitz.* 428, 693, 139-A1 (1994)

A Parsec-Scale "Superjet" and Quasi-periodic Structure in the HH 34 Outflow? *John Bally & David Devine.* 428, L65, 142-F8 (1994)

A Multiwavelength Study of IRAS 19550+3248: A Protostar Possibly Formed by a Cloud-Cloud Collision. *Bon-Chul Koo, Youngung Lee, G. A. Fuller, Myung Gyoon Lee, Suk-Minn Kwon, & Jae-Hoon Jung.* 429, 233, 147-A7 (1994)

A Connection between Submillimeter Continuum Flux and Separation in Young Binaries. *Eric L. N. Jensen, Robert D. Mathieu, & Gary A. Fuller.* 429, L29, 150-D9 (1994)

Radial Motions of Molecular Gas in the W49 Cloud Core. *James M. Jackson & Kathleen E. Kraemer.* 429, L37, 150-E7 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. I. A Generalized Model. *Frank Shu, Joan Najita, Eve Ostriker, Frank Wilkin, Steven Ruden, & Susana Lizano.* 429, 781, 155-D5 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. II. Formulation of the Dynamical Problem. *Frank H. Shu, Joan Najita, Steven P. Ruden, & Susana Lizano.* 429, 797, 155-E9 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. III. Numerical Solution of the Sub-Alfvénic Region. *Joan R. Najita & Frank H. Shu.* 429, 808, 155-F9 (1994)

A Large-Scale Cloud Collision in the Galactic Center Molecular Cloud Near Sagittarius B2. *Tetsuo Hasegawa, Fumio Sato, John B. Whiteoak, & Ryosuke Miyawaki.* 429, L77, 158-C1 (1994)

High-Resolution Observations of a New Ammonia Maser Line in G9.62+0.19. *P. Hofner, S. Kurtz, E. Churchwell, C. M. Walmsley, & R. Cesaroni.* 429, L85, 158-D1 (1994)

The Relationship between Past and Present Star Formation in Galactic Disks from CCD Surface Photometry. *Stuart D. Ryder & Michael A. Dopita.* 430, 142, 160-G8 (1994)

On the Law of Star Formation in Disk Galaxies. *Michael A. Dopita & Stuart D. Ryder.* 430, 163, 161-B3 (1994)

Interaction, Star Formation, and H I Deficiency in E + S Pairs. *A. V. Zasov & Jack W. Sulentic.* 430, 179, 161-C8 (1994)

The True Nucleus of NGC 253 Revealed by High-Resolution Near-Infrared Imaging. *Bruce J. Sams III, R. Genzel, A. Eckart, L. Tacconi-Garman, & R. Hofmann.* 430, L33, 165-E5 (1994)

Protostellar Collapse in a Self-gravitating Sheet. *Lee Hartmann, Alan Boss, Nuria Calvet, & Barbara Whitney.* 430, L49, 165-G5 (1994)

Cepheus A HW2: A Powerful Thermal Radio Jet. *Luis F. Rodríguez, Guido Garay, Salvador Curiel, Solange Ramírez, José M. Torrelles, Yolanda Gómez, & Arturo Velázquez.* 430, L65, 166-B2 (1994)

Star Formation in NGC 4449: MAMA-Detector UV Imagery and Fabry-Perot Balmer-Line Imagery. *Robert S. Hill, Allen T. Home, Andrew M. Smith, Fred C. Bruhweiler, K. P. Cheng, Paul M. N. Hintzen, & Ronald J. Oliversen.* 430, 568, 168-G5 (1994)

Coagulation of Grains in Static and Collapsing Protostellar Clouds. *S. J. Weidenschilling & T. V. Ruzmaikina.* 430, 713, 170-F6 (1994)

On the Influence of Bars and Star Formation on Galactic Abundance Gradients. *D. Friedli, W. Benz, & R. Kennicutt.* 430, L105, 174-F3 (1994)

Detection of Formaldehyde Maser Emission near the Ultracompact H II Region G29.96−0.02. *Preethi Pratap, Karl M. Menten, & Lewis E. Snyder.* 430, L129, 175-A13 (1994)

The Early Evolution of Protostellar Disks. *Steven W. Stahler, D. G. Korycansky, Maxwell J. Brothers, & Jihad Touma.* 431, 341, 180-C11 (1994)

Self-similar, Spherical Collapse of a Nonrotating Magnetized Cloud. *Tzihong Chiueh & Jien-Kuo Chou.* 431, 380, 180-F13 (1994)

A Comparison of CO ($J = 1 \rightarrow 0$) and CO ($J = 2 \rightarrow 1$) Emission in the Milky Way Molecular Ring. *Jean E. Chiar, Marc L. Kutner, Frances Verter, & James Leous.* 431, 658, 186-F13 (1994)

Spectroscopic Signatures of Infall in Young Protostellar Systems. *Christopher K. Walker, Gopal Narayanan, & Alan P. Boss.* 431, 767, 188-B5 (1994)

Galaxy Properties in Different Environments. II. Star Formation in Bulges of Late-Type Spirals. *M. G. Pastoriza, E. Bica, M. Maia, Ch. Bonatto, & H. Dottori.* 432, 128, 194-G3 (1994)

Evolution of Galaxies in Clusters. *Stéphane Charlot & Joseph Silk.* 432, 453, 201-E6 (1994)

The Distribution and Nature of Star Formation Regions in NGC 1792. *Michael Dahlem, Dominik J. Bomans, & Jean-Marie Will.* 432, 590, 203-C10 (1994)

VLA Recombination Line Observations of the Cometary H II Region G34.3+0.2: Dynamics and Physical Properties. *Ralph A. Gaume, Alan L. Fey, & Mark J. Claussen.* 432, 648, 204-B1 (1994)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. I. Axisymmetric Solutions. *Shantanu Basu & Telemachos Ch. Mouschovias.* 432, 720, 205-A6 (1994)

Dense Clumps in the Monoceros R2 Outflow. *M. Tafalla, R. Bachiller, & M. C. H. Wright.* 432, L127, 207-B13 (1994)

Supercloud Formation by Gravitational Collapse of Magnetic Gas in the Crest of a Spiral Density Wave. *B. G. Elmegreen.* 433, 39, 208-F5 (1994)

Galactic Magnetic Field Strengths and Star Formation Parameters. *J. P. Vallée.* 433, 778, 220-G1 (1994)

Protostellar Accretion Disks Resolved with the JCMT-CSO Interferometer. *O. P. Lay, J. E. Carlstrom, R. E. Hills, & T. G. Phillips.* 434, L75, 241-G9 (1994)

A K' Imaging Survey of Molecular Outflow Sources. *Klaus-Werner Hodapp.* 94, 615, 60-D12 (1994)

Past and Future Star Formation in Disk Galaxies. *Robert C. Kennicutt, Jr., Peter Tamblyn, & Charles W. Congdon.* 435, 22, 243-E5 (1994)

A New Look at the Dark Cloud L1251: Sensitive Observations of the Molecular Emission. *Fumio Sato, Akira Mizuno, Tomoo Nagahama, Toshikazu Onishi, Yoshinori Yonekura, & Yasuo Fukui.* 435, 279, 247-B11 (1994)

VLA Spectral Line Observations of the H II Complex G34.3+0.2. *Alan L. Fey, Ralph A. Gaume, Gerald E. Nedoluha, & Mark J. Claussen.* 435, 738, 256-C3 (1994)

Is HL Tauri an FU Orionis System in Quiescence? *D. N. C. Lin, M. Hayashi, K. R. Bell, & N. Ohashi.* 435, 821, 257-D4 (1994)

When Star Formation Stops: Galaxy Edges and Low Surface Brightness Disks. *B. G. Elmegreen & A. Parravano.* 435, L121, 260-A3 (1994)

Mass-Loss Rates, Ionization Fractions, Shock Velocities, and Magnetic Fields of Stellar Jets. *Patrick Hartigan, Jon A. Morse, & John Raymond.* 436, 125, 263-A6 (1994)

Nonaxisymmetric Evolution in Protostellar Disks. *Gregory Laughlin & Peter Bodenheimer.* 436, 335, 265-G13 (1994)

On the Massive Star–forming Capacity of Molecular Clouds. *José Franco, Steven N. Shore, & Guillermo Tenorio-Tagle.* 436, 795, 276-E6 (1994)

Circumprotostellar Environments. II. Envelopes, Activity, and Evolution. *G. H. Moriarty-Schieven, P. G. Wannier, Jocelyn Keene, & M. Tamura.* 436, 800, 276-F1 (1994)

A Molecular Outflow Driven by an Optical Jet. *George F. Mitchell, Tatsuhiko I. Hasegawa, William R. F. Dent, & Henry E. Matthews.* 436, L177, 282-A11 (1994)

Discovery of a Molecular Hydrogen Jet near IC 348. *Mark J. McCaughrean, John T. Rayner, & Hans Zinnecker.* 436, L189, 282-C9 (1994)

Shocked Molecular Gas around the Extremely Young Source IRAS 03282+3035. *R. Bachiller, S. Terebey, T. Jarrett, J. Martín-Pintado, C. A. Beichman, & D. Van Buren.* 437, 296, 287-C2 (1994)

Resonantly Driven Nonlinear Density Waves in Protostellar Disks. *Chi Yuan & Pat Cassen.* 437, 338, 287-G6 (1994)

Star-forming Galaxy Models: Blending Star Formation into TREESPH. *J. Christopher Mihos & Lars Hernquist.* 437, 611, 294-B9 (1994)

Formation and Evolution of Massive Stars. *Martin Beech & R. Mitalas.* 95, 517, 71-D9 (1994)

Collapse and Fragmentation of Magnetized Cylindrical Clouds. *Kohji Tomisaka.* 438, 226, 4-E3 (1995)

Jeans Mass for Anisotropic Matter. *L. Herrera & N. O. Santos.* 438, 308, 5-F7 (1995)

A Theory for the Initial Mass Function. *Joseph Silk.* 438, L41, 10-C13 (1995)

The NGC 7538 IRS 1 Region of Star Formation: Observations of the H66α Recombination Line with a Spatial Resolution of 300 AU. *R. A. Gaume, W. M. Goss, H. R. Dickel, T. L. Wilson, & K. J. Johnston.* 438, 776, 15-A1 (1995)

Multiple Star Formation in Bok Globule CB 34. *João F. Alves & João L. Yun.* 438, L107, 20-C1 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. II. Collapse Induced by Stellar Shock Waves. *Alan P. Boss.* 439, 224, 24-C7 (1995)

ROSAT X-Ray Sources Embedded in the ρ Ophiuchi Cloud Core. *Sophie Casanova, Thierry Montmerle, Eric D. Feigelson, & Philippe André.* 439, 752, 35-A7 (1995)

Spectral Energy of First Protostellar Cores: Detecting "Class −I" Protostars with *ISO* and *SIRTF*. *Alan P. Boss & Harold W. Yorke.* 439, L55, 40-E11 (1995)

Discovery of a Possible Wolf-Rayet Star at the Galactic Center. *R. D. Blum, K. Sellgren, & D. L. DePoy.* 440, L17, 48-D1 (1995)

Hot Spots in the NGC 2071 Molecular Outflow. *Lawrence M. Chernin & W. J. Welch.* 440, L21, 48-D8 (1995)

Water Masers in the L1448C Outflow. *Lawrence M. Chernin.* 440, L97, 58-C9 (1995)

Dense Gas in High-Latitude Molecular Clouds. *William T. Reach, Marc W. Pound, David J. Wilner, & Youngung Lee.* 441, 244, 62-F5 (1995)

A Molecular Line Study of NGC 1333/IRAS 4. *Geoffrey A. Blake, Göran Sandell, Ewine F. van Dishoeck, T. D. Groesbeck, Lee G. Mundy, & Colin Aspin.* 441, 689, 71-D13 (1995)

A Turbulent Model for the Interstellar Medium. I. Threshold Star Formation and Self-Gravity. *Enrique Vázquez-Semadeni, Thierry Passot, & Annick Pouquet.* 441, 702, 71-F1 (1995)

The Relationship of Dense Gas to Star Formation in the Monoceros OB1 Dark Cloud. *Grace A. Wolf-Chase, Christopher K. Walker, & Charles J. Lada.* 442, 197, 79-G9 (1995)

Yet Another Theory for the Origin of Halo Globular Clusters and Spheroid Stars. *Mario Vietri & Enrico Pesce.* 442, 618, 88-D8 (1995)

Powerful Jets and Weak Outflows: HH 1–2 and HH 34. *Lawrence M. Chernin & Colin R. Masson.* 443, 181, 97-E11 (1995)

The Formation of Protostellar Disks. II. Disks around Intermediate-Mass Stars. *Harold W. Yorke, Peter Bodenheimer, & Gregory Laughlin.* 443, 199, 97-G7 (1995)

Ammonia Emission from Bow Shocks in the L1157 Outflow. *M. Tafalla & R. Bachiller.* 443, L37, 102-G4 (1995)

A New Criterion for Bar-forming Instability in Rapidly Rotating Gaseous and Stellar Systems. I. Axisymmetric Form. *Dimitris M. Christodoulou, Isaac Shlosman, & Joel E. Tohline.* 443, 551, 105-D8 (1995)

A New Criterion for Bar-forming Instability in Rapidly Rotating Gaseous and Stellar Systems. II. Nonaxisymmetric Form. *Dimitris M. Christodoulou, Isaac Shlosman, & Joel E. Tohline.* 443, 563, 105-E10 (1995)

Ultraviolet to Optical Spectral Distributions of Northern Star-forming Galaxies. *Kerry McQuade, Daniela Calzetti, & Anne L. Kinney.* 97, 331, 16-C5 (1995)

Star Formation Activity in Spiral Galaxy Disks and the Properties of Radio Halos: Observational Evidence for a Direct Dependence. *Michael Dahlem, Ute Lisenfeld, & Götz Golla.* 444, 119, 115-A3 (1995)

Infrared Imaging and Spectroscopy of NGC 7469. *R. Genzel, L. Weitzel, L. E. Tacconi-Garman, M. Blietz, M. Cameron, A. Krabbe, D. Lutz, & A. Sternberg.* 444, 129, 115-B3 (1995)

Nonaxisymmetric Secular Instabilities Driven by Star/Disk Coupling. *James N. Imamura, Joseph Toman, Richard H. Durisen, Brian K. Pickett, & Shelby Yang.* 444, 363, 118-E4 (1995)

Noncoeval Star Formation, Starbursts, and the Growth of Supershells in OB Associations. *J. Michael Shull & Jon M. Saken.* 444, 663, 125-D9 (1995)

Line Broadening in the W3(OH) Champagne Flow. *E. R. Keto, W. J. Welch, M. J. Reid, & P. T. P. Ho.* 444, 765, 127-A8 (1995)

Fragmentation of Filamentary Molecular Clouds with Longitudinal Magnetic Fields: Formation of Disks and Their Collapse. *Fumitaka Nakamura, Tomoyuki Hanawa, & Takenori Nakano.* 444, 770, 127-B2 (1995)

Hydromagnetic Waves and the Linewidth-Size Relation in Interstellar Molecular Clouds. *Telemachos Ch. Mouschovias & Dimitrios Psaltis.* 444, L105, 131-A8 (1995)

Growth of Protoplanetary Disks around Young Stellar Objects. *Taishi Nakamoto & Yoshitsugu Nakagawa.* 445, 330, 137-A12 (1995)

An Extremely High Velocity Multipolar Outflow around IRAS 20050+2720. *R. Bachiller, A. Fuente, & M. Tafalla.* 445, L51, 141-A13 (1995)

The L1551NE Molecular Outflow. *G. H. Moriarty-Schieven, H. M. Butner, & P. G. Wannier.* 445, L55, 141-B6 (1995)

Complex Molecules in Sagittarius B2(N): The Importance of Grain Chemistry. *Yanti Miao, David M. Mehringer, Yi-Jehng Kuan, & Lewis E. Snyder.* 445, L59, 141-B13 (1995)

Numerical Simulations of Stratified Compressible Convection with Internal Heating and Disklike Variable Gravity. *W. Cabot, K. W. Thompson, & J. B. Pollack.* 98, 315, 26-C4 (1995)

What is Powering the Orion Kleinmann-Low Infrared Nebula? *Karl M. Menten & Mark J. Reid.* 445, L157, 152-A12 (1995)

Overall Distribution of Dense Molecular Gas and Star Formation in the Taurus Cloud Complex. *A. Mizuno, T. Onishi, Y. Yonekura, T. Nagahama, H. Ogawa, & Y. Fukui.* 445, L161, 152-B7 (1995)

Phase-Transition Theory of Instabilities. I. Second-Harmonic Instability and Bifurcation Points. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 472, 162-E12 (1995)

Phase-Transition Theory of Instabilities. II. Fourth-Harmonic Bifurcations and λ-Transitions. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 485, 162-G3 (1995)

Phase-Transition Theory of Instabilities. III. The Third-Harmonic Bifurcation on the Jacobi Sequence and the Fission Problem. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 500, 163-A8 (1995)

Phase-Transition Theory of Instabilities. IV. Critical Points on the Maclaurin Sequence and Nonlinear Fission Processes. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 510, 163-B7 (1995)

Are Nuclear Hot Spots in Galaxies Sites of Sequential Star Formation? *V. Korchagin, A. K. Kembhavi, Y. D. Mayya, & T. P. Prabhu.* 446, 574, 164-A10 (1995)

The Line Width–Size Relation in Massive Cloud Cores. *P. Caselli & P. C. Myers.* 446, 665, 165-C7 (1995)

Two New Wolf-Rayet Stars and a Luminous Blue Variable Star in the Quintuplet (AFGL 2004) near the Galactic Center. *Donald F. Figer, Ian S. McLean, & Mark Morris.* 447, L29, 180-G9 (1995)

Were There Significant Starburst Episodes near the Galactic Center? *Dieter H. Hartmann.* 447, 646, 185-A11 (1995)

Dust Evaporation in Protostellar Cores. *Paolo Lenzuni, Hans-Peter Gail, & Thomas Henning.* 447, 848, 187-E10 (1995)

The Nuclear Cluster of the Milky Way: Star Formation and Velocity Dispersion in the Central 0.5 Parsec. *A. Krabbe, R. Genzel, A. Eckart, F. Najarro, D. Lutz, M. Cameron, H. Kroker, L. E. Tacconi-Garman, N. Thatte, L. Weitzel, S. Drapatz, T. Geballe, A. Sternberg, & R. Kudritzki.* 447, L95, 190-F7 (1995)

A Circumstellar H_2O Maser Associated with the Circumnuclear Molecular Disk at the Galactic Center? *Deborah A. Levine, Donald F. Figer, Mark Morris, & Ian S. McLean.* 447, L101, 190-G7 (1995)

The Location of Stellar Clusters in the Big Dent: An Age Gradient along the Z-Axis. *Jesús Cabrera-Caño, Edmundo Moreno, José Franco, & Emilio J. Alfaro.* 448, 149, 194-B11 (1995)

Modeling Line Profiles of Protostellar Collapse in B335 with the Monte Carlo Method. *Minho Choi, Neal J. Evans II, Erik M. Gregersen, & Yangsheng Wang.* 448, 742, 204-A9 (1995)

Protostellar Collapse with a Shock. *John C. Tsai & Juliana J. L. Hsu.* 448, 774, 205-D8 (1995)

Large Proper Motions and Ejection of New Condensations in the HH 80–81 Thermal Radio Jet. *J. Martí, L. F. Rodríguez, & Bo Reipurth.* 449, 184, 212-F6 (1995)

Gravitational Infall in the Dense Cores L1527 and L483. *P. C. Myers, R. Bachiller, P. Caselli, G. A. Fuller, D. Mardones, M. Tafalla, & D. J. Wilner.* 449, L65, 217-B1 (1995)

Sub-Arcsecond Imaging of W3(OH) at 87.7 GHz. *D. J. Wilner, W. J. Welch, & J. R. Forster.* 449, L73, 217-C1 (1995)

A Merger Model and Globular Cluster Formation. *Sangjin Lee, David N. Schramm, & Grant J. Mathews.* 449, 616, 221-C1 (1995)

The Sagittarius B2 Star-forming Region. I. Sensitive 1.3 Centimeter Continuum Observations. *R. A. Gaume, M. J. Claussen, C. G. De Pree, W. M. Goss, & D. M. Mehringer.* 449, 663, 221-G5 (1995)

Dust Emission from Protostars: The Disk and Envelope of HH 24 MMS. *Claire J. Chandler, David W. Koerner, Anneila I. Sargent, & Douglas O. S. Wood.* 449, L139, 227-D1 (1995)

The Onset of the Cold H I Phase in Disks of Protogalaxies. *Edvige Corbelli & Edwin E. Salpeter.* 450, 32, 228-E3 (1995)

The Mass of a Star Formed in a Cloud Core: Theory and Its Application to the Orion A Cloud. *Takenori Nakano, Tetsuo Hasegawa, & Colin Norman.* 450, 183, 230-E7 (1995)

Star Formation in the Gemini OB1 Molecular Cloud Complex. *John M. Carpenter, Ronald L. Snell, & F. Peter Schloerb.* 450, 201, 230-G5 (1995)

Exponential Tails in the Centroid Velocity Distributions of Star-forming Regions. *Mark S. Miesch & John M. Scalo.* 450, L27, 235-G9 (1995)

Ammonia Maser in a Molecular Outflow toward W51. *Q. Zhang & Paul T. P. Ho.* 450, L63, 244-G1 (1995)

H II Regions in Four Galaxies in and near the Local Group. *Paul Hodge & Bryan W. Miller.* 451, 176, 248-D9 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. III. Initial Differential Rotation. *Alan P. Boss & Elizabeth A. Myhill.* 451, 218, 249-A6 (1995)

The Density Structure in the Rosette Molecular Cloud: Signposts of Evolution. *Jonathan P. Williams, Leo Blitz, & Anthony A. Stark.* 451, 252, 249-D9 (1995)

Vortices in Circumstellar Disks. *Fred C. Adams & Richard Watkins.* 451, 314, 250-C3 (1995)

A Model of the Galactic X-Ray Binary Population. II. Low-Mass X-Ray Binaries in the Galactic Disk. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 100, 233, 49-C5 (1995)

Sequential Star Formation in OB Associations: The Role of Molecular Cloud Turbulence. *Bruce G. Elmegreen, Toshiya Kimura, & Makoto Tosa.* 451, 675, 256-E1 (1995)

Si Emission in a Jetlike Molecular Outflow toward L1157. *Q. Zhang, Paul T. P. Ho, M. C. H. Wright, & D. J. Wilner.* 451, L71, 260-G1 (1995)

CCS Observations of the Protostellar Envelope of B335. *T. Velusamy, T. B. H. Kuiper, & W. D. Langer.* 451, L75, 260-G11 (1995)

Interpretation of ^{26}Al in Meteoritic Inclusions. *Donald D. Clayton & Liping Jin.* 451, L87, 261-B12 (1995)

Triggered Star Formation and the Dynamics of a Superbubble in the LMC: The OB Association LH 47/48 in DEM 152. *M. S. Oey & Philip Massey.* 452, 210, 264-G11 (1995)

High-Resolution Far-Infrared Mapping of the Star-forming Region RCW 122C. *C. Y. Zhang, P. M. Harvey, Beverly J. Smith, C. Colomé, & J. DiFrancesco.* 452, 308, 266-D1 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. II. A Parameter Study. *Shantanu Basu & Telemachos Ch. Mouschovias.* 452, 386, 267-D7 (1995)

Aperture Synthesis Imaging of the Circumstellar Dust Disk around DO Tauri. *D. W. Koerner, C. J. Chandler, & A. I. Sargent.* 452, L69, 270-E14 (1995)

NGC 1333 IRAS 4: Further Multiplicity Revealed with the CSO-JCMT Interferometer. *O. P. Lay, J. E. Carlstrom, & R. E. Hills.* 452, L73, 270-F7 (1995)

On Coagulation and the Stellar Mass Spectrum. *Eric J. Allen & Pierre Bastien.* 452, 652, 273-F5 (1995)

Disk Accretion and Mass Loss from Young Stars. *Patrick Hartigan, Suzan Edwards, & Louma Ghandour.* 452, 736, 274-G4 (1995)

Constraints on Circumstellar Disk Masses in the Trapezium Cluster. *Lee G. Mundy, Leslie W. Looney, & Elizabeth A. Lada.* 452, L137, 280-D12 (1995)

Are Galaxies Optically Thin to Their Own Lyman-Continuum Radiation? II. NGC 6822. *Kanan Patel & Christine D. Wilson.* 453, 162, 283-D13 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. III. Effect of the Initial Mass-to-Flux Ratio. *Shantanu Basu & Telemachos Ch. Mouschovias.* 453, 271, 284-G9 (1995)

Study of Structure and Small-Scale Fragmentation in TMC-1. *W. D. Langer, T. Velusamy, T. B. H. Kuiper, S. Levin, E. Olsen, & V. Migenes.* 453, 293, 285-B9 (1995)

Aperture Synthesis ^{12}CO and ^{13}CO Observations of DM Tauri: 350 AU Radius Circumstellar Gas Disk. *M. Saito, R. Kawabe, M. Ishiguro, S. M. Miyama, M. Hayashi, T. Handa, Y. Kitamura, & T. Omodaka.* 453, 384, 286-D6 (1995)

Warm Molecular Gas Associated with Cometary H II Regions. *Yolanda Gómez, Guido Garay, & Susana Lizano.* 453, 727, 293-G8 (1995)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. IV. Effect of Ultraviolet Ionization and Magnetically Controlled Infall Rate. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 454, 194, 302-A10 (1995)

The Star Formation Histories and Efficiencies of Two Giant H II Regions in M33. *Christine D. Wilson & Brenda C. Matthews.* 455, 125, 320-A1 (1995)

Momentum Distribution in Molecular Outflows. *Lawrence M. Chernin & Colin R. Masson.* 455, 182, 320-F3 (1995)

Encounters with Protostellar Disks. II. Disruption and Binary Formation. *Clayton H. Heller.* 455, 252, 321-E10 (1995)

Young Star Clusters in Bright-rimmed Clouds: Small-Scale Sequential Star Formation? *Koji Sugitani, Motohide Tamura, & Katsuo Ogura.* 455, L39, 324-G9 (1995)

Vibrational Ground-State SiO J = 1–0 Emission in Orion IRc2 Imaged with the VLA. *Claire J. Chandler & Christopher G. De Pree.* 455, L67, 325-E13 (1995)

Magnetocentrifugally Driven Flows from Young Stars and Disks. V. Asymptotic Collimation into Jets. *Frank H. Shu, Joan Najita, Eve C. Ostriker, & Hsien Shang.* 455, L155, 334-C6 (1995)

Photon Heating of Envelopes around Young Stellar Objects: An Explanation for CO J = 6–5. *Marco Spaans, Michiel R. Hogerheijde, Lee G. Mundy, & Ewine F. van Dishoeck.* 455, L167, 334-D12 (1995)

SiO Emission from a 1000 AU Disk in Orion KL. *M. C. H. Wright, R. L. Plambeck, L. G. Mundy, & L. W. Looney.* 455, L185, 334-G3 (1995)

Subarcsecond-Resolution 86 GHz Continuum Maps of Orion KL. *R. L. Plambeck, M. C. H. Wright, L. G. Mundy, & L. W. Looney.* 455, L189, 334-G10 (1995)

STARS: FUNDAMENTAL PARAMETERS

On the Mass Discrepancy of the Cepheid Stars. *C. Chiosi, P. R. Wood, G. Bertelli, A. Bressan, & M. Mateo.* 385, 205, 14-E1 (1992)

The Inverse Planckian Transform and Temperature Spectra. *Luis Salas.* 385, 288, 15-D12 (1992)

The Luminosity of the Double-Mode Cepheid Y Carinae. *Nancy Remage Evans.* 385, 680, 21-E6 (1992)

The Baade-Wesselink Method and the Distances to RR Lyrae Stars. VII. The Field Stars SW Andromedae and DX Delphini and a Comparison of Recent Baade-Wesselink Analyses. *Rodney V. Jones, Bruce W. Carney, Jesper Storm, & David W. Latham.* 386, 646, 33-C14 (1992)

The Baade-Wesselink Method and the Distances to RR Lyrae Stars. VIII. Comparisons with Other Techniques and Implications for Globular Cluster Distances and Ages. *Bruce W. Carney, Jesper Storm, & Rodney V. Jones.* 386, 663, 33-E5 (1992)

Spectroscopy and Spectral Types for 387 Stellar Objects from the Large, Bright QSO Survey. *Christopher Berg, Gary Wegner, Craig B. Foltz, Frederic H. Chaffee, Jr., & Paul C. Hewett.* 78, 409, 8-B7 (1992)

Candidate Brown Dwarfs in the Hyades. *Claia Bryja, Terry J. Jones, Roberta M. Humphreys, Geoffrey Lawrence, Robert L. Pennington, & William Zumach.* 388, L23, 52-C1 (1992)

A Theoretical Calibration of the Planetary Nebular Cosmic Distance Scale. *Michael A. Dopita, George H. Jacoby, & E. Vassiliadis.* 389, 27, 60-D1 (1992)

New Calibrators for the Cepheid Period-Luminosity Relation. *Nancy Remage Evans.* 389, 657, 69-E8 (1992)

The Luminosity of Supernovae of Type Ia. I. Apparent Magnitudes at Maximum Light. *Sidney van den Bergh & John Pazder.* 390, 34, 74-D13 (1992)

A Measurement of the Primordial Helium Abundance Using μ Cassiopeiae. *James W. Haywood, Dennis J. Hegyi, & Donald H. Gudehus.* 392, 172, 103-B1 (1992)

Upper Limit to the Mass of Pulsationally Stable Stars with Uniform Chemical Composition. *Richard B. Stothers.* 392, 706, 111-A7 (1992)
MAP-based Trigonometric Parallaxes of Open Clusters. II. The Hyades: 51 Tauri. *George Gatewood, Michael Castelaz, Joost Kiewiet de Jonge, Timothy Persinger, John Stein, & Bruce Stephenson.* 392, 710, 111-A12 (1992)
Breakdown of the Core Mass–Luminosity Relation at High Luminosities on the Asymptotic Giant Branch. *Arnold I. Boothroyd & I.-Juliana Sackmann.* 393, L21, 120-D1 (1992)
A Spectroscopic Determination of the Mass Distribution of DA White Dwarfs. *P. Bergeron, Rex A. Saffer, & James Liebert.* 394, 228, 130-G5 (1992)
Two Ultramassive White Dwarfs Found among Candidates for Magnetic Fields. *Gary D. Schmidt, P. Bergeron, James Liebert, & Rex A. Saffer.* 394, 603, 136-G11 (1992)
Astro-1 Ultraviolet Imaging of the 30 Doradus and SN 1987A Fields with the Ultraviolet Imaging Telescope. *Kwang-Ping Cheng, Andrew G. Michalitsianos, Paul Hintzen, Ralph C. Bohlin, Robert W. O'Connell, Robert H. Cornett, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L29, 145-A1 (1992)
On the Absolute Magnitude of RR Lyrae Stars: UU Ceti, RV Phoenicis, and W Tucanae. *C. Cacciari, G. Clementini, & J. A. Fernley.* 396, 219, 157-G5 (1992)
A Homogeneous Catalog of New *UBV* and Hβ Photometry of B- and A-Type Stars in and around the Scorpius-Centaurus OB Association. *Robert W. Slawson, Robert J. Hill, & John D. Landstreet.* 82, 117, 50-E9 (1992)
Spectral Synthesis in the Ultraviolet. IV. A Library of Mean Stellar Groups. *Michael N. Fanelli, Robert W. O'Connell, David Burstein, & Chi-Chao Wu.* 82, 197, 52-A1 (1992)
Infrared Colors of Low-Mass Stars. *S. K. Leggett.* 82, 351, 54-C1 (1992)
Infrared Emission from Dust Structures Surrounding Herbig Ae/Be Stars. *F. Berrilli, G. Corciulo, G. Ingrosso, D. Lorenzetti, B. Nisini, & F. Strafella.* 398, 254, 185-A1 (1992)
Discovery of a Sub-Megagauss Magnetic White Dwarf through Spectropolarimetry. *Gary D. Schmidt, H. S. Stockman, & Paul S. Smith.* 398, L57, 188-A7 (1992)
The Young Large Magellanic Cloud Cluster NGC 2214 with a Single Supergiant Branch. *Myung Gyoon Lee.* 399, L133, 208-B1 (1992)
A Catalog of Faint A, F, and G Stars at the South Galactic Pole. *Phillip K. Lu, Jeffrey Miller, & Donald Platt.* 83, 203, 59-E3 (1992)
Carbon Star Luminosity Indicators. *Paul J. Green, Bruce Margon, Scott F. Anderson, & D. Jack MacConnell.* 400, 659, 218-E12 (1992)
A Distance-independent Calibration of the Luminosity of Type Ia Supernovae and the Hubble Constant. *Bruno Leibundgut & Philip A. Pinto.* 401, 49, 221-F1 (1992)
On the Mass-Ratio Distribution of Spectroscopic Binaries with Solar-Type Primaries. *Tsevi Mazeh, Dorit Goldberg, Antoine Duquennoy, & Michel Mayor.* 401, 265, 224-C9 (1992)
Photometric and Spectroscopic Analysis of High Galactic Latitude Molecular Clouds. I. Distances and Extinctions of Stars toward 25 Selected Regions. *B. E. Penprase.* 83, 273, 61-E7 (1992)
M Dwarf Spectra from 0.6 to 1.5 Microns: A Spectral Sequence, Model Atmosphere Fitting, and the Temperature Scale. *J. Davy Kirkpatrick, Douglas M. Kelly, George H. Rieke, James Liebert, France Allard, & Rainer Wehrse.* 402, 643, 10-E11 (1993)
Angular Diameter Measurements of Cool Giant Stars in Strong TiO Bands and in the Continuum. *A. Quirrenbach, D. Mozurkewich, J. T. Armstrong, D. F. Buscher, & C. A. Hummel.* 406, 215, 57-F9 (1993)
Multiplicity and the Ages of the Stars in the Taurus Star-forming Region. *M. Simon, A. M. Ghez, & Ch. Leinert.* 408, L33, 89-B1 (1993)
Circumstellar Material in Algol: A Study of the Balmer Line Profiles. *Mercedes T. Richards.* 86, 255, 17-D3 (1993)
Spectrophotometry of Wolf-Rayet Stars. I. Continuum Energy Distributions. *Patrick W. Morris, Kenneth R. Brownsberger, Peter S. Conti, Philip Massey, & William D. Vacca.* 412, 324, 146-B10 (1993)
MK Spectral Types for OB$^+$ Stars in the Southern Milky Way. *Jyotsna Vijapurkar & John S. Drilling.* 89, 293, 53-E8 (1993)
The Masses of V838 Herculis (Nova Herculis 1991) and QZ Aurigae. *Paula Szkody & Doug Ingram.* 420, 830, 13-C3 (1994)
The Enigmatic Supernova S Andromedae. *Sidney van den Bergh.* 424, 345, 66-B8 (1994)
Cygnus X-3 as a Benchmark for Fundamental Properties of Wolf-Rayet Stars. *Anatol M. Cherepashchuk & Anthony F. J. Moffat.* 424, L53, 69-G6 (1994)
Stellar Spectral Classification Using Automated Schemes. *R. K. Gulati, Ranjan Gupta, Pradeep Gothoskar, & Shyam Khobragade.* 426, 340, 100-D5 (1994)
The Effectiveness of Oscillation Frequencies in Constraining Stellar Model Parameters. *Timothy M. Brown, J. Christensen-Dalsgaard, Barbara Weibel-Mihalas, & Ronald L. Gilliland.* 427, 1013, 125-C3 (1994)
The Temperature and Granulation Stability of η Cephei. *David F. Gray.* 428, 765, 139-F13 (1994)
The Detection of Pulsed X-Ray Emission from a Nearby Radio Pulsar. *S. Yancopoulos, T. T. Hamilton, & D. J. Helfand.* 429, 832, 156-A9 (1994)
A Pulsational Approach to the Luminosity of RR Lyrae Variables. *V. Castellani & R. De Santis.* 430, 624, 169-E11 (1994)
An Asteroseismological Determination of the Structure of the DBV White Dwarf GD 358. *P. A. Bradley & D. E. Winget.* 430, 850, 172-E2 (1994)
On Cepheid Diameter and Distance Measurement. *Dimitar D. Sasselov & Margarita Karovska.* 432, 367, 197-F6 (1994)
On the Application of the Baade-Wesselink Method to RR Lyrae Stars. *G. Bono, F. Caputo, & R. F. Stellingwerf.* 432, L51, 199-G7 (1994)
Ultraviolet Spectral Classification and Stellar Winds in a Sample of Be and Standard Stars. *Arne Slettebak.* 94, 163, 54-A5 (1994)
Further Mid-Infrared Study of the ρ Ophiuchi Cloud Young Stellar Population: Luminosities and Masses of Pre–Main-Sequence Stars. *Thomas P. Greene, Bruce A. Wilking, Philippe André, Erick T. Young, & Charles J. Lada.* 434, 614, 236-C6 (1994)
Old Stellar Populations. V. Absorption Feature Indices for the Complete Lick/IDS Sample of Stars. *Guy Worthey, S. M. Faber, J. Jesús González, & D. Burstein.* 94, 687, 61-E4 (1994)
Constraints to the Masses of Brown Dwarf Candidates from the Lithium Test. *Eduardo L. Martín, Rafael Rebolo, & Antonio Magazzù.* 436, 262, 264-G9 (1994)
Comprehensive Stellar Population Models and the Disentanglement of Age and Metallicity Effects. *Guy Worthey.* 95, 107, 65-E2 (1994)
A Study of Carina OB2 Association. II. Analysis and Discussion of the Data. *Beatriz García.* 436, 705, 275-B13 (1994)
On Possible Implications of Orbital Parallaxes of Wide Orbit Binary Pulsars and Their Measurability. *S. M. Kopeikin.* 439, L5, 29-E11 (1995)
Infrared Zeeman Analysis of ϵ Eridani. *Jeff A. Valenti, Geoffrey W. Marcy, & Gibor Basri.* 439, 939, 37-E9 (1995)
Time-dependent Behavior and Physical Conditions of the LMC Planetary Nebula N66. *M. Peña, M. Peimbert, S. Torres-Peimbert, M. T. Ruiz, & J. Maza.* 441, 343, 64-B1 (1995)
A Spectroscopic Database for Stephenson-Sanduleak Southern Luminous Stars. *B. Cameron Reed & Amy E. Beatty.* 97, 189, 13-D8 (1995)
Temperatures, Gravities, and Masses for a Sample of Bright DA White Dwarfs and the Initial-to-Final Mass Relation. *Angela Bragaglia, Alvio Renzini, & P. Bergeron.* 443, 735, 108-A7 (1995)
Magnetic Moments and Angular Momenta of Stars and Planets. *C. N. Arge, D. J. Mullan, & A. Z. Dolginov.* 443, 795, 108-G1 (1995)
Masses of DA White Dwarfs with Gravitational Redshift Determinations. *P. Bergeron, James Liebert, & M. S. Fulbright.* 444, 810, 127-F1 (1995)
Bolometric Temperature and Young Stars in the Taurus and Ophiuchus Complexes. *H. Chen, P. C. Myers, E. F. Ladd, & D. O. S. Wood.* 445, 377, 137-F9 (1995)
The Mass Ratios of Cepheid Binaries. *Nancy Remage Evans.* 445, 393, 138-A1 (1995)
The Case Low-Dispersion Northern Sky Survey. XV. A Region in Ursa Major and Canes Venatici. *Peter Pesch, C. B. Stephenson, & D. Jack MacConnell.* 98, 41, 21-E5 (1995)
Neural Network Classification of the Near-Infrared Spectra of A-Type Stars. *Wm. Bruce Weaver & Ana V. Torres-Dodgen.* 446, 300, 157-D1 (1995)
HST/GHRS Observations of the β Pictoris System: Basic Parameters of the Age of the System. *Thierry Lanz, Sara R. Heap, & Ivan Hubeny.* 447, L41, 181-B5 (1995)
PSR J0045−7319: A Dual-Line Binary Radio Pulsar. *J. F. Bell, M. S. Bessell, B. W. Stappers, M. Bailes, & V. M. Kaspi.* 447, L117, 191-B6 (1995)
Variation of Gravitational Delay in Pulsar Timing Observations due to Proper Motion of Foreground Stars and Measurement of Stellar Mass. *Kouji Ohnishi, Mizuhiko Hosokawa, Toshio Fukushima, & Mine Takeuti.* 448, 271, 196-A1 (1995)
The Relation between Rotational Velocities and Spectral Peculiarities among A-Type Stars. *Helmut A. Abt & Nidia I. Morrell.* 99, 135, 36-A1 (1995)
The Effect of the Stellar Size on Microlensing at the Baade Window. *Hans J. Witt.* 449, 42, 210-F13 (1995)

The 11 Micron Emissions of Carbon Stars. *J. H. Goebel, P. Cheeseman, & F. Gerbault.* 449, 246, 213-E9 (1995)

Atmospheric Parameters and LTE Abundances for 22 Galactic, A-Type Supergiants. *Kim A. Venn.* 99, 659, 44-A6 (1995)

An Infrared Spectroscopic Survey of the ρ Ophiuchi Young Stellar Cluster: Masses and Ages from the H-R Diagram. *Thomas P. Greene & Michael R. Meyer.* 450, 233, 231-C3 (1995)

Whole Earth Telescope Observations and Seismological Analysis of the Pre–White Dwarf PG 2131+066. *S. D. Kawaler, M. S. O'Brien, J. C. Clemens, R. E. Nather, D. E. Winget, T. K. Watson, K. Yanagida, J. S. Dixson, P. A. Bradley, M. A. Wood, D. J. Sullivan, S. J. Kleinman, E. Meištas, E. M. Leibowitz, P. Moskalik, S. Zoła, G. Pajdosz, J. Krzesiński, J.-E. Solheim, A. Bruvold, D. O'Donoghue, M. Katz, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, A. Kanaan, S. O. Kepler, O. Giovannini, J. L. Provencal, & C. J. Hansen.* 450, 350, 232-G1 (1995)

MAP-based Trigonometric Parallaxes of Altair and Vega. *George Gatewood & Joost Kiewiet de Jonge.* 450, 364, 233-A4 (1995)

Full Adaptive Optics Images of ADS 9731 and μ Cassiopeiae: Orbits and Masses. *Jack D. Drummond, Julian C. Christou, & Robert Q. Fugate.* 450, 380, 233-B12 (1995)

Accurate Multiconfiguration Hartree-Fock Calculations of Oscillator Strengths in Light Atoms: The Boron (B II) Line at 1362 Å. *Michel Godefroid, Jeppe Olsen, Per Jönsson, & Charlotte Froese Fischer.* 450, 473, 234-E3 (1995)

Wind-Wind Interaction in the Close Wolf-Rayet Binary CQ Cephei (WN6+O9 II–Ib). *S. V. Marchenko, A. F. J. Moffat, P. R. J. Eenens, G. M. Hill, & A. Grandchamps.* 450, 811, 241-G10 (1995)

Empirical Approach to Cepheid Period-Luminosity-Color and Period-Luminosity Relations by Surface Brightness. *G. P. Di Benedetto.* 452, 195, 264-F7 (1995)

Are the Nearby and Photometric Stellar Luminosity Functions Different? *Pavel Kroupa.* 453, 350, 286-A2 (1995)

A Millisecond Pulsar in a 6 Hour Orbit: PSR J0751+1807. *S. C. Lundgren, A. F. Zepka, & J. M. Cordes.* 453, 419, 286-G10 (1995)

Extreme Ultraviolet Emission from the Millisecond Pulsar J0437−4715. *J. Edelstein, R. S. Foster, & S. Bowyer.* 454, 442, 305-D4 (1995)

New Far-Ultraviolet Intrinsic Spectral Fluxes of Hot Stars and Their Photospheric Temperatures. *Richard H. Buss, Jr., J. W. Kruk, & H. C. Ferguson.* 454, L55, 308-C12 (1995)

A Non-LTE Analysis of the ζ Aurigae B-Type Secondary. I. Determination of the Fundamental Stellar Parameters. *Philip D. Bennett, Alexander Brown, & Jeffrey L. Linsky.* 455, 317, 322-D14 (1995)

STARS: U GEMINORUM

A Study of the Ultraviolet Evolution of U Geminorum between Outbursts. *Alan L. Kiplinger, Edward M. Sion, & Paula Szkody.* 366, 569, 10-B1 (1991)

STARS: GENERAL

Interior Opacities and the Standard Solar Model. *John Faulkner & Fritz J. Swenson.* 386, L55, 36-D1 (1992)

Do Quiescent Soft X-Ray Transients Contain Millisecond Radio Pulsars? *L. Stella, S. Campana, M. Colpi, S. Mereghetti, & M. Tavani.* 423, L47, 53-F11 (1994)

STARS: GIANTS

The Chemical Composition of Blue Horizontal Branch Stars in M4 and NGC 6397. *David L. Lambert, Andrew McWilliam, & Verne V. Smith.* 386, 685, 33-G1 (1992)

Discovery of a Fast Wind from a Field Population II Giant Star. *A. K. Dupree, Dimitar D. Sasselov, & John B. Lester.* 387, L85, 48-D11 (1992)

Mass Loss from OH/IR Stars: Models for the Infrared Emission of Circumstellar Dust Shells. *K. Justtanont & A. G. G. M. Tielens.* 389, 400, 64-G10 (1992)

Asymptotic Giant Branch Stars in the Central Regions of M32. *T. J. Davidge & J.-L. Nieto.* 391, L13, 92-A1 (1992)

Constraints on the Galactic Bulge Using *IRAS* Variable Point Sources. *Martin D. Weinberg.* 392, L67, 113-C10 (1992)

The Creation of Superrich Lithium Giants. *I.-Juliana Sackmann & Arnold I. Boothroyd.* 392, L71, 113-D3 (1992)

SiC Particles from Asymptotic Giant Branch Stars: Mg Burning and the *s*-Process. *Lawrence E. Brown & Donald D. Clayton.* 392, L79, 113-E1 (1992)

SO and SO_2 in Mass-Loss Envelopes of Red Giants: Probes of Nonequilibrium Circumstellar Chemistry and Mass-Loss Rates. *Raghvendra Sahai & Peter G. Wannier.* 394, 320, 132-A3 (1992)

Abundances for Giant Stars in the Draco Dwarf Galaxy. *Matthew D. Lehnert, R. A. Bell, James E. Hesser, & J. B. Oke.* 395, 466, 148-C9 (1992)

Sodium, Aluminum, and Oxygen Abundance Variations in Giants in the Globular Cluster M4. *Jeremy J. Drake, Verne V. Smith, & Nicholas B. Suntzeff.* 395, L95, 154-A10 (1992)

Lithium and Rapid Rotation in Chromospherically Active Single Giants. *Francis C. Fekel & Suchitra Balachandran.* 403, 708, 24-E4 (1993)

A Spectroscopic and Photometric Study of FK Comae in 1989. *David P. Huenemoerder, Lawrence W. Ramsey, Derek L. Buzasi, & Harold L. Nations.* 404, 316, 31-G1 (1993)

Angular Diameter Measurements of Cool Giant Stars in Strong TiO Bands and in the Continuum. *A. Quirrenbach, D. Mozurkewich, J. T. Armstrong, D. F. Buscher, & C. A. Hummel.* 406, 215, 57-F9 (1993)

On Partial Mixing Zones in Horizontal-Branch Stellar Cores. *Ben Dorman & Robert T. Rood.* 409, 387, 101-G3 (1993)

Chromospheric Heating by Acoustic Shocks: A Confrontation of GHRS Observations of α Tauri (K5 III) with Ab Initio Calculations. *P. G. Judge & M. Cuntz.* 409, 776, 108-F13 (1993)

The *s*-Process between A = 120 and 124: Signature of Neutron Density and Temperature in Red Giants. *F. Käppeler, W. Schanz, K. Wisshak, & G. Reffo.* 410, 370, 116-F3 (1993)

Abundance Inhomogeneities and Atmospheric Structure in CN-Bimodal Globular Cluster Giants. *Jeremy J. Drake, Bertrand Plez, & Verne V. Smith.* 412, 612, 151-D1 (1993)

Long-Period Radial Velocity Variations in Three K Giants. *Artie P. Hatzes & William D. Cochran.* 413, 339, 160-D13 (1993)

High-Dispersion Spectroscopy of Giants in Metal-poor Globular Clusters. I. Iron Abundances. *Dante Minniti, Doug Geisler, Ruth C. Peterson, & Juan J. Claria.* 413, 548, 163-C8 (1993)

Reaction Rates of the *s*-Process Neutron Sources ^{22}Ne(α, n)^{25}Mg and ^{13}C(α, n)^{16}O. *H. W. Drotleff, A. Denker, H. Knee, M. Soiné, G. Wolf, J. W. Hammer, U. Greife, C. Rolfs, & H. P. Trautvetter.* 414, 735, 180-D3 (1993)

On Why Intermediate-Mass Stars Become Giants after the Exhaustion of Hydrogen in Their Cores. *Icko Iben, Jr.* 415, 767, 197-D5 (1993)

ROSAT X-Ray Detection of ϵ Taurus: Revisiting the Coronal and Transition Region Emission of the Hyades Giants. *A. Collura, A. Maggio, G. Micela, S. Sciortino, F. R. Harnden, Jr., & R. Rosner.* 416, 204, 203-E8 (1993)

An Evolutionary Scenario for Primeval Stellar Populations. *Santi Cassisi & Vittorio Castellani.* 88, 509, 47-B1 (1993)

Abundances in CH Subgiants: Evidence of Mass Transfer onto Main-Sequence Companions. *Verne V. Smith, Howard Coleman, & David L. Lambert.* 417, 287, 221-A13 (1993)

The Tip of the Red Giant Branch as a Distance Indicator for Resolved Galaxies. *Myung Gyoon Lee, Wendy L. Freedman, & Barry F. Madore.* 417, 553, 226-B13 (1993)

Spectroscopy of Giants in the Sextans Dwarf Spheroidal Galaxy. *Nicholas B. Suntzeff, Mario Mateo, Donald M. Terndrup, Edward W. Olszewski, Doug Geisler, & W. Weller.* 418, 208, 233-E12 (1993)

The Extreme Ultraviolet Spectrum of Alpha Aurigae (Capella). *A. K. Dupree, N. S. Brickhouse, G. A. Doschek, J. C. Green, & J. C. Raymond.* 418, L41, 238-E10 (1993)

Spectroscopy of Chromospheric Lines of Giants in the Globular Cluster NGC 6752. *A. K. Dupree, Lee Hartmann, Graeme H. Smith, A. W. Rodgers, W. H. Roberts, & D. B. Zucker.* 421, 542, 24-G9 (1994)

An Observational Estimate of the Probability of Encounters between Mass-losing Evolved Stars and Molecular Clouds. *Joel H. Kastner & P. C. Myers.* 421, 605, 25-G3 (1994)

Radial Velocities of M Giants at 300 Parsec Projected Radius from the Galactic Center. *R. D. Blum, J. S. Carr, D. L. DePoy, K. Sellgren, & D. M. Terndrup.* 422, 111, 31-D9 (1994)

Standard and Nonstandard Plasma Neutrino Emission Revisited. *Martin Haft, Georg Raffelt, & Achim Weiss.* 425, 222, 83-A8 (1994)

The First Detailed Abundance Analysis of Galactic Bulge K Giants in Baade's Window. *Andrew McWilliam & R. Michael Rich.* 91, 749, 29-D1 (1994)

The Determination of the Core Mass at the Helium Flash in Globular Cluster Stars. *Allen V. Sweigart.* 426, 612, 106-A11 (1994)

ROSAT All-Sky Survey Observations of X-Ray Variability in Cool Giant Stars. *Bernhard Haisch & J. H. M. M. Schmitt.* 426, 716, 107-C13 (1994)

The Temperature and Granulation Stability of η Cephei. *David F. Gray.* 428, 765, 139-F13 (1994)

Induced Nucleation of Carbon Dust in Red Giant Stars. *Brian J. Cadwell, Hai Wang, Eric D. Feigelson, & Michael Frenklach.* 429, 285, 147-E10 (1994)

Predictions of Oxygen Isotope Ratios in Stars and of Oxygen-rich Interstellar Grains in Meteorites. *Arnold I. Boothroyd, I.-Juliana Sackmann, & G. J. Wasserburg.* 430, L77, 166-C7 (1994)

The Metallicity of M4: Accurate Spectroscopic Fundamental Parameters for Four Giants. *J. J. Drake, V. V. Smith, & N. B. Suntzeff.* 430, 610, 169-D8 (1994)

Chromospheric Heating and Metal Deficiency in Cool Giants: Theoretical Results versus Observations. *M. Cuntz, W. Rammacher, & P. Ulmschneider.* 432, 690, 204-E12 (1994)

The Radial Velocity Variability of the K Giant β Ophiuchi. I. The Detection of Low-Amplitude, Short-Period Pulsations. *Artie P. Hatzes & William D. Cochran.* 432, 763, 205-E1 (1994)

Four Experiments on Thermal Instabilities in Stellar Envelopes. *Alvio Renzini & Claudio Ritossa.* 433, 293, 212-A5 (1994)

Sodium in Weak G-Band Giants. *Jeremy J. Drake & David L. Lambert.* 435, 797, 257-A13 (1994)

Molecular Rotational Line Profiles from Oxygen-rich Red Giant Winds. *K. Justtanont, C. J. Skinner, & A. G. G. M. Tielens.* 435, 852, 257-G6 (1994)

Missing Opacity in the Atmospheric Models of Red Giants. *C. Ian Short & John B. Lester.* 436, L165, 281-G1 (1994)

Lithium Abundances in Strong Lithium K Giant Stars: LTE and Non-LTE Analyses. *Ramiro de la Reza & Licio da Silva.* 439, 917, 37-C3 (1995)

STARS: HERTZSPRUNG-RUSSELL DIAGRAM

On the Instability Strip of the Cepheid Stars. *C. Chiosi, P. Wood, G. Bertelli, & A. Bressan.* 387, 320, 41-A1 (1992)

The Evolution of Intermediate-Mass Protostars. II. Influence of the Accretion Flow. *Francesco Palla & Steven W. Stahler.* 392, 667, 110-E5 (1992)

Stellar Models and the Brightening of P Cygni. *Mounib F. El Eid & Dieter H. Hartmann.* 404, 271, 31-C5 (1993)

The Structure of the Core of 47 Tucanae from *Hubble Space Telescope* Observations. *Guido De Marchi, Francesco Paresce, & Francesco R. Ferraro.* 85, 293, 11-B3 (1993)

The Distance to Nearby Galaxy NGC 3109 Based on the Tip of the Red Giant Branch. *Myung Gyoon Lee.* 408, 409, 90-C8 (1993)

Reddening Errors and the Post–Main-Sequence Distribution of Stars in the H-R Diagram of the Large Magellanic Cloud. *N. Rathnasree.* 410, L99, 126-B5 (1993)

Interacting Massive Binaries, H-R Diagram of the Large Magellanic Cloud and SN 1987A. *N. Rathnasree.* 411, 848, 140-D1 (1993)

Bolometric Temperatures of Young Stellar Objects. *P. C. Myers & E. F. Ladd.* 413, L47, 162-G1 (1993)

The Tip of the Red Giant Branch as a Distance Indicator for Resolved Galaxies. *Myung Gyoon Lee, Wendy L. Freedman, & Barry F. Madore.* 417, 553, 226-B13 (1993)

The Population of Massive Stars in R136 from Faint Object Camera Ultraviolet Observations. *Guido De Marchi, Antonella Nota, Claus Leitherer, Roberto Ragazzoni, & Cesare Barbieri.* 419, 658, 255-G10 (1993)

The Stellar Population in the Core of M15. *Guido De Marchi & Francesco Paresce.* 422, 597, 39-C6 (1994)

An Ultraviolet-Visible Investigation of the Globular Cluster NGC 1851. *Ronald A. Parise, Stephen P. Maran, Wayne B. Landsman, Ralph C. Bohlin, Kwang-Ping Cheng, Michael R. Greason, Paul M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 423, 305, 49-G7 (1994)

The Initial Mass Function for Massive Stars in the Magellanic Clouds. I. *UBV* Photometry and Color-Magnitude Diagrams for 14 OB Associations. *Robert J. Hill, Barry F. Madore, & Wendy L. Freedman.* 91, 583, 27-C8 (1994)

The Gap in the Color-Magnitude Diagram of NGC 2420: A Test of Convective Overshoot and Cluster Age. *Pierre Demarque, Ata Sarajedini, & X.-J. Guo.* 426, 165, 98-B12 (1994)

Color-Magnitude Diagram Distribution of the Bulge Red Clump Stars: Evidence for the Galactic Bar. *K. Z. Stanek, M. Mateo, A. Udalski, M. Szymański, J. Kałużny, & M. Kubiak.* 429, L73, 158-B9 (1994)

Constraints to the Masses of Brown Dwarf Candidates from the Lithium Test. *Eduardo L. Martín, Rafael Rebolo, & Antonio Magazzù.* 436, 262, 264-G9 (1994)

Classical Cepheids with Terminal Age Main-Sequence Companions: Constraints on Evolution. *Nancy Remage Evans.* 436, 273, 265-A12 (1994)

Comprehensive Stellar Population Models and the Disentanglement of Age and Metallicity Effects. *Guy Worthey.* 95, 107, 65-E2 (1994)

A Study of Carina OB2 Association. II. Analysis and Discussion of the Data. *Beatriz García.* 436, 705, 275-B13 (1994)

Formation and Evolution of Massive Stars. *Martin Beech & R. Mitalas.* 95, 517, 71-D9 (1994)

Very Low Mass Stars and White Dwarfs in NGC 6397. *Francesco Paresce, Guido De Marchi, & Martino Romaniello.* 440, 216, 44-B13 (1995)

Magnitude Offset between Lensed Stars and Observed Stars: A New Probe of the Structure of the Galactic Bar. *K. Z. Stanek.* 441, L29, 66-G3 (1995)

The Hot End of Evolutionary Horizontal Branches. *V. Castellani, S. Degl'Innocenti, & L. Pulone.* 446, 228, 156-C8 (1995)

The Intermediate Stellar Mass Population in R136 Determined from *Hubble Space Telescope* Planetary Camera 2 Images. *Deidre A. Hunter, Edward J. Shaya, Jon A. Holtzman, Robert M. Light, Earl J. O'Neil, Jr., & Roger Lynds.* 448, 179, 194-E7 (1995)

An Infrared Spectroscopic Survey of the ρ Ophiuchi Young Stellar Cluster: Masses and Ages from the H-R Diagram. *Thomas P. Greene & Michael R. Meyer.* 450, 233, 231-C3 (1995)

Ages for Globular Clusters with Predominantly Red Horizontal Branches. *Ata Sarajedini, Young-Wook Lee, & Dong-Han Lee.* 450, 712, 240-E7 (1995)

STARS: HIGH-VELOCITY

Two High-Velocity Stars Shot Out from the Core of the Globular Cluster 47 Tucanae. *G. Meylan, P. Dubath, & M. Mayor.* 383, 587, 221-E4 (1991)

STARS: HORIZONTAL-BRANCH

Application of Oxygen-enhanced Evolutionary Sequences to the Horizontal Branch of M15. *Ben Dorman, Young-Wook Lee, & Don A. VandenBerg.* 366, 115, 2-D11 (1991)

Evolutionary Models of Halo Stars with Rotation. I. Evidence for Differential Rotation with Depth in Stars. *Marc H. Pinsonneault, Constantine P. Deliyannis, & Pierre Demarque.* 367, 239, 15-A12 (1991)

Stellar Evolution and Period Changes in RR Lyrae Stars. *Young-Wook Lee.* 367, 524, 19-G7 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

The Globular Cluster ω Centauri: The Origin of the Mysterious Correlation between the RR Lyrae Luminosity and [Fe/H]. *Young-Wook Lee.* 373, L43, 97-B7 (1991)

Detection of a Galactic Color Gradient for Blue Horizontal-Branch Stars of the Halo Field and Implications for the Halo Age and Density Distributions. *George W. Preston, Stephen A. Shectman, & Timothy C. Beers.* 375, 121, 112-E1 (1991)

The Evolution of He-burning Stars: Horizontal and Asymptotic Branches in Galactic Globulars. *V. Castellani, A. Chieffi, & L. Pulone.* 76, 911, 37-C5 (1991)

Photoelectric *UBV* Photometry of Stars Selected in the HK Objective-Prism Survey. *George W. Preston, Stephen A. Shectman, & Timothy C. Beers.* 76, 1001, 38-G5 (1991)

Population Studies. X. Constraints on the Mass and Extent of the Galaxy's Dark Corona. *John E. Norris & M. R. S. Hawkins.* 380, 104, 177-C11 (1991)

JHK Imaging of a Field in Baade's Window. *T. J. Davidge.* 380, 116, 177-E1 (1991)

The Galactic Globular Cluster System: Theoretical Constraints for α-enhanced Compositions. *D. Bencivenni, F. Caputo, M. Manteiga, & M. L. Quarta.* 380, 484, 184-C1 (1991)

The Chemical Composition of Blue Horizontal Branch Stars in M4 and NGC 6397. *David L. Lambert, Andrew McWilliam, & Verne V. Smith.* 386, 685, 33-G1 (1992)

The Evolution of High-Metallicity Horizontal-Branch Stars and the Origin of the Ultraviolet Light in Elliptical Galaxies. *E. Horch, P. Demarque, & M. Pinsonneault.* 388, L53, 59-B7 (1992)

The Structure of Horizontal-Branch Models. I. The Zero-Age Horizontal Branch. *Ben Dorman.* 80, 701, 33-B5 (1992)

Oxygen-enhanced Models for Globular Cluster Stars. III. Horizontal-Branch Sequences. *Ben Dorman.* 81, 221, 38-A3 (1992)

Optical and Infrared Imaging of Stars in the Metal-rich Globular Clusters NGC 6304 and NGC 6316. *T. J. Davidge, William E. Harris, T. J. Bridges, & D. A. Hanes.* 81, 251, 38-D5 (1992)

An Ultraviolet Imaging Telescope Study of the Globular Cluster M79 (NGC 1904). *Robert S. Hill, Jesse K. Hill, Wayne B. Landsman, Ralph C. Bohlin, K.-P. Cheng, Paul M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L17, 144-F1 (1992)

Ultraviolet Properties of Individual Hot Stars in Globular Cluster Cores. I. NGC 1904 (M79). *B. Altner & T. A. Matilsky.* 410, 116, 113-E8 (1993)

The Case Low-Dispersion Northern Sky Survey. XIV. A–F Stars in a Region in Southern Canes Venatici. *D. Jack MacConnell, C. B. Stephenson, & Peter Pesch.* 86, 453, 20-D9 (1993)

The Proto-Galaxy, Globular Clusters, and Quasars. *Sidney van den Bergh.* 411, 178, 129-C13 (1993)

The Effect of Livermore Opal Opacities on the Evolutionary Masses of RR Lyrae Stars. *Sukyoung Yi, Young-Wook Lee, & Pierre Demarque.* 411, L25, 133-G8 (1993)

The Ultraviolet Radiation in Metal-rich Elliptical Galaxies. *Uffe Grå Jørgensen & Peter Thejll.* 411, L67, 142-C5 (1993)

A Method for Quantitative Detection of Hot Horizontal Branches in Early-Type Galaxies. *Guy Worthey.* 415, L91, 199-G6 (1993)

Ultraviolet Morphologies of Globular Clusters Observed with the Ultraviolet Imaging Telescope. *Eric P. Smith, Wayne B. Landsman, Robert S. Hill, Ralph C. Bohlin, Kwang-Ping Cheng, Paul Hintzen, Stephen P. Maran, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 418, 850, 243-B8 (1993)

The Horizontal-Branch Stars in Globular Clusters. II. The Second Parameter Phenomenon. *Young-Wook Lee, Pierre Demarque, & Robert Zinn.* 423, 248, 49-B9 (1994)

Oosterhoff Dichotomy in the Galaxy and Globular Clusters in the Large Magellanic Cloud. *Giuseppe Bono, Filippina Caputo, & Robert F. Stellingwerf.* 423, 294, 49-F8 (1994)

An Ultraviolet-Visible Investigation of the Globular Cluster NGC 1851. *Ronald A. Parise, Stephen P. Maran, Wayne B. Landsman, Ralph C. Bohlin, Kwang-Ping Cheng, Michael R. Greason, Paul M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 423, 305, 49-G7 (1994)

Mass Loss during the RR Lyrae Phase of the Horizontal Branch: Mass Dispersion on the Horizontal Branch and RR Lyrae Period Changes. *Rebecca A. Koopmann, Young-Wook Lee, Pierre Demarque, & Jamie M. Howard.* 423, 380, 50-G7 (1994)

The Determination of the Core Mass at the Helium Flash in Globular Cluster Stars. *Allen V. Sweigart.* 426, 612, 106-A11 (1994)

The Global Second Parameter Phenomenon and the Origin of the Ultraviolet Radiation from Elliptical Galaxies. *Young-Wook Lee.* 430, L113, 174-G3 (1994)

Atmospheric Parameters of Field Subdwarf B Stars. *Rex A. Saffer, P. Bergeron, D. Koester, & James Liebert.* 432, 351, 197-E1 (1994)

On the Application of the Baade-Wesselink Method to RR Lyrae Stars. *G. Bono, F. Caputo, & R. F. Stellingwerf.* 432, L51, 199-G7 (1994)

Far-Ultraviolet Imaging of the Globular Cluster NGC 6681 with WFPC2. *Alan M. Watson, Jeremy R. Mould, John S. Gallagher III, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Richard E. Griffiths, J. Jeff Hester, John G. Hoessel, Jon A. Holtzman, Paul A. Scowen, Karl R. Stapelfeldt, John T. Trauger, & James A. Westphal.* 435, L55, 252-D4 (1994)

Ultraviolet Radiation from Evolved Stellar Populations. II. The Ultraviolet Upturn Phenomenon in Elliptical Galaxies. *Ben Dorman, Robert W. O'Connell, & Robert T. Rood.* 442, 105, 78-F6 (1995)

The RR Lyrae Fundamental Red Edge. *G. Bono, F. Caputo, V. Castellani, M. Marconi, L. Staiano, & R. F. Stellingwerf.* 442, 159, 79-D1 (1995)

Transient Phenomena and Modal Stability in RR Lyrae and BL Herculis Variable Stars. *G. Bono, V. Castellani, & R. F. Stellingwerf.* 445, L145, 151-G3 (1995)

Synthetic Mean Colors for RR Lyrae Variables. *Giuseppe Bono, Filippina Caputo, & Robert F. Stellingwerf.* 99, 263, 37-F8 (1995)

RR Lyrae Variable Stars: Pulsational Constraints Relevant to the Oosterhoff Controversy. *Giuseppe Bono, Filippina Caputo, Vittorio Castellani, & Marcella Marconi.* 448, L115, 209-E3 (1995)

Are the Luminosities of RR Lyrae Stars Affected by Second Parameter Effects? *Sidney van den Bergh.* 451, L65, 260-F1 (1995)

Rotation and Oxygen Line Strengths in Blue Horizontal-Branch Stars. *Ruth C. Peterson, Robert T. Rood, & Deborah A. Crocker.* 453, 214, 284-B1 (1995)

STARS: IMAGING

Multiple Jets from the Young Star IRAS 21334+5039. *Howard A. Smith & Jacqueline Fischer.* 398, L99, 194-D1 (1992)

The Asymmetric Envelope of γ Cassiopeiae Observed with the Mk III Optical Interferometer. *A. Quirrenbach, C. A. Hummel, D. F. Buscher, J. T. Armstrong, D. Mozurkewich, & N. M. Elias II.* 416, L25, 207-D7 (1993)

Mid-Infrared Images of the Post–Asymptotic Giant Branch Star HD 161796. *C. J. Skinner, M. M. Meixner, G. W. Hawkins, E. Keto, J. G. Jernigan, & J. F. Arens.* 423, L135, 61-B11 (1994)

Estimating the Cramér-Rao Bound for Restored Astronomical Observations. *T. S. Zaccheo, R. A. Gonsalves, S. M. Ebstein, & P. Nisenson.* 439, L43, 40-C11 (1995)

The Dust Disk around the Vega-Excess Star SAO 26804. *C. J. Skinner, R. J. Sylvester, J. R. Graham, M. J. Barlow, M. Meixner, E. Keto, J. F. Arens, & J. G. Jernigan.* 444, 861, 128-C13 (1995)

The Discovery of a Jetlike Feature from the Massive Star Herschel 36. *B. Stecklum, T. Henning, A. Eckart, R. R. Howell, & M. G. Hoare.* 445, L153, 152-A3 (1995)

Vertical Disk Structure in HL Tauri. *Steven V. W. Beckwith & Christoph C. Birk.* 449, L59, 217-A4 (1995)

STARS: INDIVIDUAL

Constellation Name: α Andromedae

Determination of the Visual Orbit of the Spectroscopic Binary α Andromedae with Submilliarcsecond Precison. *Xiaopei Pan, Michael Shao, M. Mark Colavita, J. Thomas Armstrong, David Mozurkewich, Maddali Vivekanand, Craig S. Denison, Richard S. Simon, & Kenneth J. Johnston.* 384, 624, 9-G9 (1992)

Constellation Name: ϕ Andromedae

Imaging Spectroscopy with High Spatial Resolution. *Naoshi Baba, Susumu Kuwamura, Noriaki Miura, & Yuji Norimoto.* 431, L111, 192-A1 (1994)

Constellation Name: AR Andromedae

A Radial Velocity Study of the Dwarf Nova AR Andromedae: Comparison of the Quiescent and Outburst States. *A. W. Shafter, J. M. Veal, & E. L. Robinson.* 440, 853, 54-G10 (1995)

Constellation Name: PX Andromedae

PX Andromedae and the SW Sexantis Phenomenon. *Coel Hellier & E. L. Robinson.* 431, L107, 191-G6 (1994)

Constellation Name: SW Andromedae

The Baade-Wesselink Method and the Distances to RR Lyrae Stars. VII. The Field Stars SW Andromedae and DX Delphini and a Comparison of Recent Baade-Wesselink Analyses. *Rodney V. Jones, Bruce W. Carney, Jesper Storm, & David W. Latham.* 386, 646, 33-C14 (1992)

Constellation Name: Z Andromedae

The Active Phase of the Hot Component of Z Andromedae. *T. Fernández-Castro, R. González-Riestra, A. Cassatella, A. R. Taylor, & E. R. Seaquist.* 442, 366, 82-B4 (1995)

Constellation Name: AE Aquarii

The Pulse-timing and Emission-Line Orbits of the White Dwarf in the Cataclysmic Variable AE Aquarii. *Edward L. Robinson, Allen W. Shafter, & S. Balachandran.* 374, 298, 101-G1 (1991)

The Unusual X-Ray Pulse Timing of AE Aquarii. *O. C. de Jager.* 378, 286, 154-E1 (1991)

AE Aquarii: An Emitter of Pulsed TeV Gamma Rays Resembling Optical Emission during Flares. *P. J. Meintjes, B. C. Raubenheimer, O. C. de Jager, C. Brink, H. I. Nel, A. R. North, G. van Urk, & B. Visser.* 401, 325, 225-A11 (1992)

Optical Spectrophotometry of Oscillations and Flickering in AE Aquarii. *William F. Welsh, Keith Horne, & J. B. Oke.* 406, 229, 57-G12 (1993)

The Spectrum and Variability of Radio Emission from AE Aquarii. *Meil Abada-Simon, Alain Lecacheux, Tim S. Bastian, Jay A. Bookbinder, & George A. Dulk.* 406, 692, 66-D12 (1993)

On the Location of the Oscillations in AE Aquarii. *William F. Welsh, Keith Horne, & Richard Gomer.* 410, L39, 118-D1 (1993)

Evidence for Particle Acceleration in a Magnetized White Dwarf from Radio and Gamma-Ray Observations. *O. C. De Jager.* 90, 775, 13-D3 (1994)

The Ultraviolet Pulsations of the Cataclysmic Variable AE Aquarii as Observed with the *Hubble Space Telescope*. *Michael Eracleous, Keith Horne,*

Edward L. Robinson, Er-Ho Zhang, Thomas R. Marsh, & Janet H. Wood. 433, 313, 212-C1 (1994)

Simultaneous Optical and TeV Gamma-Ray Observations of the Cataclysmic Variable AE Aquarii. *P. J. Meintjes, O. C. de Jager, B. C. Raubenheimer, H. I. Nel, A. R. North, D. A. H. Buckley, & C. Koen.* 434, 292, 229-E1 (1994)

Constellation Name: FO Aquarii

Spectroscopy of FO Aquarii: Evidence for Reprocessing in a Hot Wind. *Phillip J. Martell & Ronald H. Kaitchuck.* 366, 286, 4-E5 (1991)

On Martell and Kaitchuck's Model for the Intermediate Polar FO Aquarii. *Koji Mukai & Coel Hellier.* 391, 295, 89-E10 (1992)

Constellation Name: R Aquarii

First Results from the Faint Object Camera: Imaging the Core of R Aquarii. *F. Paresce, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 369, L67, 46-B7 (1991)

Ultraviolet and Optical Spectroscopy of the R Aquarii Symmetrical Jet. *J. M. Hollis, R. J. Oliversen, M. Kafatos, A. G. Michalitsianos, & R. M. Wagner.* 377, 227, 140-F11 (1991)

R Aquarii: Hα Map of Subarcsecond Inner Structure. *E. K. Hege, C. K. Allen, & W. J. Cocke.* 381, 543, 197-D6 (1991)

Comparing Restored *HST* and VLA Imagery of R Aquarii. *J. M. Hollis, J. E. Dorband, & F. Yusef-Zadeh.* 386, 293, 27-G3 (1992)

The Structure of the Inner Arcsecond of R Aquarii Observed with the *Hubble Space Telescope*. *Denis Burgarella & Francesco Paresce.* 389, L29, 66-D10 (1992)

Evidence Signaling the Start of Enhanced Counterjet Flow in the Symbiotic System R Aquarii. *A. G. Michalitsianos, M. Perez, & M. Kafatos.* 423, 441, 51-E13 (1994)

Ultraviolet Temporal Variability of the Peculiar Star R Aquarii. *S. R. Meier & M. Kafatos.* 451, 359, 250-G5 (1995)

Constellation Name: UU Aquarii

Multicolor Eclipse Studies of UU Aquarii. I. Observations and System Parameters. *R. Baptista, J. E. Steiner, & D. Cieslinski.* 433, 332, 212-D8 (1994)

Constellation Name: Aquila X-1

Detection of Coherent 7.6 Hz Oscillations during a Burst from Aquila X-1. *R. J. Schoelkopf & R. L. Kelley.* 375, 696, 121-D1 (1991)

Thermonuclear Flash Model for Long X-Ray Tails from Aquila X-1. *Ikko Fushiki, Ronald E. Taam, S. E. Woosley, & D. Q. Lamb.* 390, 634, 83-B9 (1992)

The Unstable Long-Term Periodicity of Aquila X-1. *Shunji Kitamoto, Hiroshi Tsunemi, Sigenori Miyamoto, & Diane Roussel-Dupre.* 403, 315, 17-F13 (1993)

Constellation Name: α Aquilae

A Search for Chromospheric Emission in A-Type Stars Using the Goddard High-Resolution Spectrograph. *Theodore Simon, Wayne B. Landsman, & Ronald L. Gilliland.* 428, 319, 132-B5 (1994)

Chromospheric Models for Altair (A7 IV–V). *R. Freire Ferrero, P. Gouttebroze, S. Catalano, E. Marilli, F. Bruhweiler, Y. Kondo, K. van der Hucht, & A. Talavera.* 439, 1011, 38-E12 (1995)

Constellation Name: 20 Aquilae

The Diffuse Interstellar Cloud toward HD 179406 (20 Aquilae). *Margaret Murray Hanson, Theodore P. Snow, & John H. Black.* 392, 571, 109-C12 (1992)

Constellation Name: V603 Aquilae

Possible First Detection of Ultraviolet Pulses from an Intermediate Polar: V603 Aquila. *A. Schwarzenberg-Czerny, A. Udalski, & R. Monier.* 401, L19, 227-C7 (1992)

The 1991 V603 Aquilae Campaign: Superhumps and *P*-Dots. *Joseph Patterson, Gino Thomas, David R. Skillman, & Marcos Diaz.* 86, 235, 17-B7 (1993)

Constellation Name: V794 Aquilae

The High-State/Low-State Transition in V794 Aquilae. *R. Kent Honeycutt, John K. Cannizzo, & Jeff W. Robertson.* 425, 835, 92-B9 (1994)

Constellation Name: Nova Aquilae 1995

Hopkins Ultraviolet Telescope Observations of Nova Circini 1995 and Nova Aquilae 1995. *Bradford W. Greeley, William P. Blair, & Knox S. Long.* 454, L43, 308-B1 (1995)

Constellation Name: UX Arietis

Flaring and Quiescent Radio Emission of UX Arietis: A Time-dependent Model. *F. Chiuderi Drago & E. Franciosini.* 410, 301, 115-G3 (1993)

Correlations between the Flaring Radio Emission and Starspot Distribution of UX Arietis. *Nicholas M. Elias II, Andreas Quirrenbach, Arno Witzel, Christian E. Naundorf, Ralf Wegner, Edward F. Guinan, & George P. McCook.* 439, 983, 38-B13 (1995)

Constellation Name: α Aurigae

The Many Faces of F Stars: A Rotational Modulation Study of Capella, Procyon, and Caph with the *International Ultraviolet Explorer*. *Thomas R. Ayres.* 375, 704, 121-D11 (1991)

Extreme Ultraviolet Spectroscopy of Capella. *James C. Green, Erik Wilkinson, Thomas R. Ayres, & Webster Cash.* 397, L99, 181-C8 (1992)

Goddard High-Resolution Spectrograph Observations of the Local Interstellar Medium and the Deuterium/Hydrogen Ratio along the Line of Sight toward Capella. *Jeffrey L. Linsky, Alexander Brown, Ken Gayley, Athanassios Diplas, Blair D. Savage, Thomas R. Ayres, Wayne Landsman, Steven N. Shore, & Sara R. Heap.* 402, 694, 11-C1 (1993)

The Hydrogen Lyman-Alpha Emission of Capella. *Thomas R. Ayres, A. Brown, K. G. Gayley, & Jeffrey L. Linsky.* 402, 710, 11-D5 (1993)

The Extreme Ultraviolet Spectrum of Alpha Aurigae (Capella). *A. K. Dupree, N. S. Brickhouse, G. A. Doschek, J. C. Green, & J. C. Raymond.* 418, L41, 238-E10 (1993)

The Extreme Ultraviolet Spectrograph: A Radial Groove Grating, Sounding Rocket–borne, Astronomical Instrument. *Erik Wilkinson, James C. Green, & Webster Cash.* 89, 211, 51-F5 (1993)

The Transition Regions of Capella. *Jeffrey L. Linsky, Brian E. Wood, Philip Judge, Alexander Brown, Catherine Andrulis, & Thomas R. Ayres.* 442, 381, 82-C9 (1995)

A Reanalysis of the SWP-HI *IUE* Observations of Capella. *Brian E. Wood & Thomas R. Ayres.* 443, 329, 99-F7 (1995)

New Model of Iron Spectra in the Extreme Ultraviolet and Application to SERTS and *EUVE* Observations: A Solar Active Region and Capella. *N. S. Brickhouse, J. C. Raymond, & B. W. Smith.* 97, 551, 19-F4 (1995)

Deuterium and the Local Interstellar Medium Properties for the Procyon and Capella Lines of Sight. *Jeffrey L. Linsky, Athanassios Diplas, Brian E. Wood, Alexander Brown, Thomas R. Ayres, & Blair D. Savage.* 451, 335, 250-E2 (1995)

Constellation Name: ϵ Aurigae

Interpreting Epsilon Aurigae. *Sean M. Carroll, Edward F. Guinan, George P. McCook, & Robert A. Donahue.* 367, 278, 15-E1 (1991)

Constellation Name: ι Aurigae

X-Ray Emission on Hybrid Stars: *ROSAT* Observations of α Trianguli Australis and ι Aurigae. *V. Kashyap, R. Rosner, F. R. Harnden, Jr., A. Maggio, G. Micela, & S. Sciortino.* 431, 402, 181-A13 (1994)

Constellation Name: ζ Aurigae

On the Chromospheric Structure of ζ Aurigae. *Joel A. Eaton.* 404, 305, 31-F1 (1993)

A Non-LTE Analysis of the ζ Aurigae B-Type Secondary. I. Determination of the Fundamental Stellar Parameters. *Philip D. Bennett, Alexander Brown, & Jeffrey L. Linsky.* 455, 317, 322-D14 (1995)

Constellation Name: AB Aurigae

Spatially Resolved Mid-Infrared Observations of Circumstellar Dust around AB Aurigae. *Kenneth A. Marsh, Jeffrey E. Van Cleve, M. J. Mahoney, T. L. Hayward, & J. R. Houck.* 451, 777, 257-G10 (1995)

Constellation Name: KR Aurigae

Quasi-periodic Oscillations in the Cataclysmic Variable KR Aurigae. *Jyoti Singh, P. Vivekananda Rao, P. C. Agrawal, K. M. V. Apparao, R. K. Manchanda, B. B. Sanwal, & M. B. K. Sarma.* 419, 337, 250-D3 (1993)

Constellation Name: QZ Aurigae

The Masses of V838 Herculis (Nova Herculis 1991) and QZ Aurigae. *Paula Szkody & Doug Ingram.* 420, 830, 13-C3 (1994)

A Multicolor Eclipse Study of the Classical Nova QZ Aurigae (Nova Aurigae 1964). *R. D. Campbell & A. W. Shafter.* 440, 336, 45-G1 (1995)

Constellation Name: RW Aurigae

Asymmetries in Bipolar Jets from Young Stars. *Gerhard A. Hirth, Reinhard Mundt, Josef Solf, & Thomas P. Ray.* 427, L99, 127-B11 (1994)

Constellation Name: SU Aurigae

A Synoptic Study of Hα Line Profile Variability in the T Tauri Star SU Aurigae. *Mark S. Giampapa, Gibor S. Basri, Christopher M. Johns, & Catherine L. Imhoff.* 89, 321, 54-A8 (1993)

The Line Profile Variability of SU Aurigae. *Christopher M. Johns & Gibor Basri.* 449, 341, 214-G3 (1995)

Constellation Name: SX Aurigae

A Spectrum Synthesis Program for Binary Stars. *Albert P. Linnell & Ivan Hubeny.* 434, 738, 238-A4 (1994)

Constellation Name: α Bootis

Digging in the Coronal Graveyard: A *ROSAT* Observation of the Red Giant Arcturus. *Thomas R. Ayres, Thomas A. Fleming, & Juergen H. M. M. Schmitt.* 376, L45, 137-C7 (1991)

The Nonsolar Abundance Ratios of Arcturus Deduced from Spectrum Synthesis. *Ruth C. Peterson, Cristina M. Dalle Ore, & Robert L. Kurucz.* 404, 333, 32-A8 (1993)

Short-Period Radial Velocity Variations of α Bootis: Evidence for Radial Pulsations. *Artie P. Hatzes & William D. Cochran.* 422, 366, 34-E11 (1994)

Generation of Mass Loss in K Giants: The Failure of Global Oscillation Modes and Possible Implications. *G. Sutmann & M. Cuntz.* 442, L61, 94-E7 (1995)

Constellation Name: η Bootis

Modeling Solar-like Oscillations in η Bootis. *Jørgen Christensen-Dalsgaard, Timothy R. Bedding, & Hans Kjeldsen.* 443, L29, 102-F1 (1995)

Constellation Name: ξ Bootis

Can the Starpatch on ξ Bootis A Be Explained by Using Tangential Flows? *Clifford G. Toner & Barry J. LaBonte.* 368, 633, 33-A10 (1991)

Constellation Name: CN Bootis

Digging in the Coronal Graveyard: A *ROSAT* Observation of the Red Giant Arcturus. *Thomas R. Ayres, Thomas A. Fleming, & Juergen H. M. M. Schmitt.* 376, L45, 137-C7 (1991)

Constellation Name: TY Bootis

Analysis and Solution of the Light and Radial Velocity Curves of the Contact Binary TY Bootis. *E. F. Milone, G. Groisman, D. J. I. Fry, & D. H. Bradstreet.* 370, 677, 56-G5 (1991)

Constellation Name: α Camelopardalis

The Visual and Ultraviolet Polarimetric Data of α Camelopardalis and κ Cassiopeia: Evidence of Shocked Regions. *Geoffrey K. Fox, John C. Brown, & Karen S. Bjorkman.* 447, 889, 188-B8 (1995)

Constellation Name: BY Camelopardalis

Broad-Band X-Ray Telescope Observations of the Magnetic Cataclysmic Variable H0538+608 = BY Camelopardalis. *T. R. Kallman, E. M. Schlegel, P. J. Serlemitsos, R. Petre, F. Marshall, K. Jahoda, E. A. Boldt, S. S. Holt, R. F. Mushotzky, J. Swank, A. E. Szymkowiak, R. L. Kelley, A. Smale, K. Arnaud, K. Weaver, & F. B. Paerels.* 411, 869, 140-E12 (1993)

Phase-resolved *IUE* and Optical Observations of the Polar BY Camelopardalis. *D. B. Zucker, J. C. Raymond, A. Silber, P. Mason, S. Curiel, S. Vrtilek, & E. Schlegel.* 449, 310, 214-D1 (1995)

Constellation Name: TX Camelopardalis

Observation of a Ring Structure in SiO Maser Emission from Late-Type Stars. *P. J. Diamond, A. J. Kemball, W. Junor, A. Zensus, J. Benson, & V. Dhawan.* 430, L61, 166-A10 (1994)

Constellation Name: Z Camelopardalis

Spectroscopy of Z Camelopardalis in Outburst with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Arthur F. Davidsen, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Richard C. Henry, Gerard A. Kriss, Jeffrey W. Kruk, H. Warren Moos, Olaf Vancura, Henry C. Ferguson, & Randy A. Kimble.* 381, L25, 194-D5 (1991)

Constellation Name: 53 Camelopardalis

A Crucial Test of the Diffusion Model: 53 Camelopardalis. *J. Babel & G. Michaud.* 366, 560, 10-A5 (1991)

The Abundances of Pt, Au, and Hg in the Chemically Peculiar HgMn-Type Stars κ Cancri and χ Lupi. *Glenn M. Wahlgren, David S. Leckrone, Sveneric G. Johansson, Maria Rosberg, & Tomas Brage.* 444, 438, 119-E11 (1995)

Constellation Name: UU Cancri

Mass Loss in the 96 Day Binary UU Cancri. *Joel A. Eaton, Douglas S. Hall, & R. Kent Honeycutt.* 376, 289, 128-E1 (1991)

Constellation Name: β Canis Majoris

The Interstellar Tunnel of Neutral-free Gas toward β Canis Majoris. *Barry Y. Welsh.* 373, 556, 94-G8 (1991)

Constellation Name: ε Canis Majoris

Intense Extreme Ultraviolet Emission from the B Star ε Canis Majoris. *John V. Vallerga, Peter W. Vedder, & Barry Y. Welsh.* 414, L65, 185-C11 (1993)

EUVE Spectroscopy of ε Canis Majoris (B2 II) from 70 to 730 Å. *J. P. Cassinelli, D. H. Cohen, J. J. MacFarlane, J. E. Drew, A. E. Lynas-Gray, M. G. Hoare, J. V. Vallerga, B. Y. Welsh, P. W. Vedder, I. Hubeny, & T. Lanz.* 438, 932, 17-A8 (1995)

ε Canis Majoris and the Ionization of the Local Cloud. *J. V. Vallerga & B. Y. Welsh.* 444, 702, 126-A9 (1995)

Constellation Name: 29 Canis Majoris

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. III. 29 UW Canis Majoris. *Michael S. Wiggs & Douglas R. Gies.* 407, 252, 72-B11 (1993)

Constellation Name: 29 UW Canis Majoris

Tomographic Separation of Composite Spectra. II. The Components of 29 UW Canis Majoris. *William G. Bagnuolo, Jr., Douglas R. Gies, Michael E. Hahula, Rafael Wiemker, & Michael S. Wiggs.* 423, 446, 51-F7 (1994)

Constellation Name: EZ Canis Majoris

On the Wind Geometry of the Wolf-Rayet Star EZ Canis Majoris. *R. E. Schulte-Ladbeck, K. H. Nordsieck, M. Taylor, M. A. Nook, K. S. Bjorkman, A. M. Magalhães, & C. M. Anderson.* 382, 301, 204-A1 (1991)

The First Linear Polarization Spectra of Wolf-Rayet Stars in the Ultraviolet: EZ Canis Majoris and θ Muscae. *R. E. Schulte-Ladbeck, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, D. Shepherd, M. Taylor, & B. A. Whitney.* 391, L37, 92-C6 (1992)

Photometry, Polarimetry, Spectroscopy, and Spectropolarimetry of the Enigmatic Wolf-Rayet Star EZ Canis Majoris. *Carmelle Robert, Anthony F. J. Moffat, Laurent Drissen, Robert Lamontagne, Wilhelm Seggewiss, Virpi S. Niemela, Miguel A. Cerruti, Paul Barrett, Jeremy Bailey, Jorge Garcia, & Santiago Tapia.* 397, 277, 171-D1 (1992)

The Spectrum of EZ Canis Majoris (HD 50896) to the Lyman Limit with the Hopkins Ultraviolet Telescope. *Stephan R. McCandliss, Richard H. Buss, Jr., William P. Blair, Charles W. Bowers, Arthur F. Davidsen, Paul D. Feldman, & Jeffrey W. Kruk.* 416, 372, 205-F3 (1993)

Constellation Name: VY Canis Majoris

Circular and Linear Polarization of the SiO Masers in VY Canis Majoris. *G. C. McIntosh, C. Read Predmore, & Nimesh A. Patel.* 428, L29, 134-E1 (1994)

Constellation Name: Z Canis Majoris

The High State of the FU Orionis Variable Z Canis Majoris. *F. V. Hessman, J. Eislöffel, R. Mundt, L. W. Hartmann, W. Herbst, & J. Krautter.* 370, 384, 52-A10 (1991)

Optical Spectroscopy of Z Canis Majoris, V1057 Cygni, and FU Orionis: Accretion Disks and Signatures of Disk Winds. *Alan D. Welty, Stephen E. Strom, Suzan Edwards, Scott J. Kenyon, & Lee W. Hartmann.* 397, 260, 171-B11 (1992)

A Binary Origin for FU Orionis Stars. *Ian Bonnell & Pierre Bastien.* 401, L31, 227-E1 (1992)

Spectrum of the "Invisible" Companion of Z Canis Majoris Revealed in Polarized Light. *Barbara A. Whitney, Geoffrey C. Clayton, Regina E. Schulte-Ladbeck, Nuria Calvet, Lee Hartmann, & Scott J. Kenyon.* 417, 687, 228-A1 (1993)

Constellation Name: α Canis Minoris

Detection of Possible *p*-Mode Oscillations on Procyon. *Timothy M. Brown, Ronald L. Gilliland, Robert W. Noyes, & Lawrence W. Ramsey.* 368, 599, 32-E8 (1991)

The Many Faces of F Stars: A Rotational Modulation Study of Capella, Procyon, and Caph with the *International Ultraviolet Explorer*. *Thomas R. Ayres.* 375, 704, 121-D11 (1991)

Evolution and Seismology of Procyon. *D. B. Guenther & P. Demarque.* 405, 298, 44-G6 (1993)

Detection of Radio Continuum Emission from Procyon. *Stephen A. Drake, Theodore Simon, & Alexander Brown.* 406, 247, 58-B5 (1993)

Acoustic Heating of the Chromosphere and Cool Corona in the F Star α Canis Minoris (Procyon). *D. J. Mullan & Q. Q. Cheng.* 435, 435, 249-D7 (1994)

Stellar Coronal Abundances. II. The First Ionization Potential Effect and Its Absence in the Corona of Procyon. *Jeremy J. Drake, J. Martin Laming, & Kenneth G. Widing.* 443, 393, 100-E2 (1995)

Deuterium and the Local Interstellar Medium Properties for the Procyon and Capella Lines of Sight. *Jeffrey L. Linsky, Athanassios Diplas, Brian E. Wood, Alexander Brown, Thomas R. Ayres, & Blair D. Savage.* 451, 335, 250-E2 (1995)

Constellation Name: AM Canum Venaticorum

On the Certification of AM Canum Venaticorum as a Cataclysmic Variable. *Joseph Patterson, Emily Sterner, Jules P. Halpern, & John C. Raymond.* 384, 234, 3-G6 (1992)

Evidence for Accretion Disk Precession in the Cataclysmic Binary AM Canum Venaticorum. *Joseph Patterson, Jules Halpern, & Anouk Shambrook.* 419, 803, 257-E13 (1993)

The Unusual Helium Variable AM Canum Venaticorum. *J. L. Provencal, D. E. Winget, R. E. Nather, E. L. Robinson, J.-E. Solheim, J. C. Clemens, P. A. Bradley, S. J. Kleinman, A. Kanaan, C. F. Claver, C. J. Hansen, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. M. Leibowitz, E. G. Meištas, A. Bruvold, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, A. E. Sansom, R. W. Tweedy, G. Fontaine, P. Bergeron, S. O. Kepler, M. A. Wood, & A. D. Grauer.* 445, 927, 148-A11 (1995)

Constellation Name: RS Canum Venaticorum

Radio Continuum and X-Ray Properties of the Coronae of RS Canum Venaticorum and Related Active Binary Systems. *Stephen A. Drake, Theodore Simon, & Jeffrey L. Linsky.* 82, 311, 53-F5 (1992)

Constellation Name: η Carinae

η Carinae: A New Model. *J. M. Borgwald & M. W. Friedlander.* 408, 230, 86-A3 (1993)

Dynamical Instability as the Cause of the Massive Outbursts in η Carinae and Other Luminous Blue Variables. *Richard B. Stothers & Chao-wen Chin.* 408, L85, 95-C5 (1993)

The Radio Source around η Carinae. *S. M. White, R. A. Duncan, J. Lim, G. J. Nelson, S. A. Drake, & M. R. Kundu.* 429, 380, 148-G1 (1994)

Intense Radio Outburst from the Supermassive Star η Carinae. *R. A. Duncan, S. M. White, J. Lim, G. J. Nelson, S. A. Drake, & M. R. Kundu.* 441, L73, 76-A6 (1995)

The Homunculus of η Carinae: An Interacting Stellar Winds Paradigm. *Adam Frank, Bruce Balick, & Kris Davidson.* 441, L77, 76-B2 (1995)

First Detection of X-Ray Variability of η Carinae. *M. F. Corcoran, G. L. Rawley, J. H. Swank, & R. Petre.* 445, L121, 151-C9 (1995)

Constellation Name: θ Carinae

Interstellar Absorption along the Line of Sight to Theta Carinae Using *Copernicus* Observations. *M. M. Allen, E. B. Jenkins, & T. P. Snow.* 83, 261, 61-D1 (1992)

Constellation Name: l Carinae

Emission Lines in the Long-Period Cepheid l Carinae. *Erika Böhm-Vitense & Stanley G. Love.* 420, 401, 5-G5 (1994)

Constellation Name: AG Carinae

Mapping AG Carinae: Long-Slit Spectroscopy and Coronographic Imaging of the Nebula and Jet. *Antonella Nota, Claus Leitherer, Mark Clampin, Perry Greenfield, & David A. Golimowski.* 398, 621, 191-G6 (1992)

Geometry and Physical Conditions in the Stellar Wind of AG Carinae. *Claus Leitherer, Richard Allen, Bruce Altner, Augusto Damineli, Laurent Drissen, Thais Idiart, Olivia Lupie, Antonella Nota, Carmelle Robert, Werner Schmutz, & Steven N. Shore.* 428, 292, 131-G4 (1994)

The Axisymmetric Stellar Wind of AG Carinae. *Regina E. Schulte-Ladbeck, Geoffrey C. Clayton, D. John Hillier, Tim J. Harries, & Ian D. Howarth.* 429, 846, 156-B13 (1994)

Constellation Name: IW Carinae

The Chemical Composition of the RV Tauri Variable IW Carinae. *Sunetra Giridhar, N. Kameswara Rao, & David L. Lambert.* 437, 476, 289-F1 (1994)

Constellation Name: OY Carinae

HST Eclipse Mapping of Dwarf Nova OY Carinae in Quiescence: An "Fe II Curtain" with Mach $\simeq 6$ Velocity Dispersion Veils the White Dwarf. *Keith Horne, T. R. Marsh, F. H. Cheng, Ivan Hubeny, & Thierry Lanz.* 426, 294, 99-G1 (1994)

Constellation Name: PP Carinae

Ultraviolet Spectropolarimetry of the Be Star PP Carinae with the Wisconsin Ultraviolet Photo-Polarimeter Experiment. *K. S. Bjorkman, M. R. Meade, K. H. Nordsieck, C. M. Anderson, B. L. Babler, G. C. Clayton, A. D. Code, A. M. Magalhães, R. E. Schulte-Ladbeck, M. Taylor, & B. A. Whitney.* 412, 810, 153-G11 (1993)

Constellation Name: Y Carinae

The Luminosity of the Double-Mode Cepheid Y Carinae. *Nancy Remage Evans.* 385, 680, 21-E6 (1992)

Constellation Name: γ Cassiopeiae

The Asymmetric Envelope of γ Cassiopeiae Observed with the Mk III Optical Interferometer. *A. Quirrenbach, C. A. Hummel, D. F. Buscher, J. T. Armstrong, D. Mozurkewich, & N. M. Elias II.* 416, L25, 207-D7 (1993)

Dynamic Processes in Be Star Atmospheres. III. Rapid Multiwavelength Variability in γ Cassiopeiae. *Myron A. Smith.* 442, 812, 91-D2 (1995)

Constellation Name: κ Cassiopeiae

First Ultraviolet Spectropolarimetry of Hot Supergiants. *M. Taylor, A. D. Code, K. H. Nordsieck, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, R. E. Schulte-Ladbeck, & B. A. Whitney.* 382, L85, 211-D5 (1991)

The Visual and Ultraviolet Polarimetric Data of α Camelopardalis and κ Cassiopeia: Evidence of Shocked Regions. *Geoffrey K. Fox, John C. Brown, & Karen S. Bjorkman.* 447, 889, 188-B8 (1995)

Constellation Name: β Cassiopeiae

The Many Faces of F Stars: A Rotational Modulation Study of Capella, Procyon, and Caph with the *International Ultraviolet Explorer*. *Thomas R. Ayres.* 375, 704, 121-D11 (1991)

Constellation Name: μ Cassiopeiae

A Measurement of the Primordial Helium Abundance Using μ Cassiopeiae. *James W. Haywood, Dennis J. Hegyi, & Donald H. Gudehus.* 392, 172, 103-B1 (1992)

Full Adaptive Optics Images of ADS 9731 and μ Cassiopeiae: Orbits and Masses. *Jack D. Drummond, Julian C. Christou, & Robert Q. Fugate.* 450, 380, 233-B12 (1995)

Constellation Name: ϕ Cassiopeiae

A Determination of the Basic Atmospheric Parameters of ϕ Cassiopeiae. *Patricia Rosenzweig & Lawrence Anderson.* 411, 207, 129-F13 (1993)

Constellation Name: AO Cassiopeiae

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. I. AO Cassiopeiae. *Douglas R. Gies & Michael S. Wiggs.* 375, 321, 114-G10 (1991)

Tomographic Separation of Composite Spectra: The Components of the O-Star Spectroscopic Binary AO Cassiopeiae. *William G. Bagnuolo, Jr., & Douglas R. Gies.* 376, 266, 128-C1 (1991)

Wind Collision Effects in the Early-Type Close Binaries HD 47129 and AO Cassiopeiae. *Jorge Sahade & Estela Brandi.* 379, 706, 173-E1 (1991)

Constellation Name: HT Cassiopeiae

Eclipse Studies of the Dwarf Nova HT Cassiopeiae. I. Observations and System Parameters. *Keith Horne, Janet H. Wood, & Rae F. Stiening.* 378, 271, 154-C11 (1991)

Eclipse Studies of the Dwarf Nova HT Cassiopeiae. II. White Dwarf and Accretion Disk. *Janet H. Wood, Keith Horne, & Stephane Vennes.* 385, 294, 15-E6 (1992)

The K-Band Surface Brightness of Late-Type Stars and the Distance to Cataclysmic Variables. *Tod F. Ramseyer.* 425, 243, 83-C5 (1994)

Constellation Name: R Cassiopeiae

A 7 Micron Dust Emission Feature in Oxygen-rich Circumstellar Shells. *J. H. Goebel, J. D. Bregman, & F. C. Witteborn.* 430, 317, 163-B3 (1994)

Constellation Name: V705 Cassiopeiae

The Infrared Spectrum of the Optically Thin Dust Shell of V705 Cassiopeiae (Nova Cassiopeiae 1993). *R. D. Gehrz, M. A. Greenhouse, T. L. Hayward, J. R. Houck, C. G. Mason, & C. E. Woodward.* 448, L119, 209-E9 (1995)

Constellation Name: Centaurus X-4

Li Abundances in Late-Type Companions to Neutron Stars and Black Hole Candidates. *Eduardo L. Martín, Rafael Rebolo, Jorge Casares, & Philip A. Charles.* 435, 791, 257-A4 (1994)

Constellation Name: Centaurus X-3

An X-Ray Excited Wind in Centaurus X-3. *C. S. R. Day & Ian R. Stevens.* 403, 322, 17-G9 (1993)

Upper Limits on TeV Gamma-Ray Emission from Centaurus A, Vela X-1, Centaurus X-3, and Circinus X-1. *W. H. Allen, I. A. Bond, E. Budding, M. J. Conway, A. Daniel, K. B. Fenton, H. Fujii, Z. Fujii, N. Hayashida, K. Hibino, M. Honda, J. E. Humble, S. Kabe, K. Kasahara, T. Kifune, G. D. Lythe, A. Masaike, Y. Matsubara, K. Mitsui, Y. Miura, M. Mori, Y. Muraki, M. Nagano, T. Nakamura, M. Nishizawa, P. M. Norris, S. Ogio, To. Saito, M. Sakata, H. Sato, H. M. Shimizu, M. Spencer, J. R.*

Storey, T. Tanimori, M. Teshima, S. Torii, A. Wadsworth, Y. Watase, M. D. Woodhams, Y. Yamamoto, P. C. M. Yock, & T. Yuda (The JANZOS Collaboration). 405, 554, 50-A1 (1993)

The Discovery of Pulsed Iron Line Emission from Centaurus X-3. *C. S. R. Day, F. Nagase, K. Asai, & T. Takeshima.* 408, 656, 93-D1 (1993)

Constellation Name: α Centauri

Evolutionary Models and the p-Mode Oscillation Spectrum of α Centauri A and B. *Peter Edmonds, Lawrence Cram, Pierre Demarque, D. B. Guenther, & Marc H. Pinsonneault.* 394, 313, 131-G9 (1992)

A Formulation of Convection for Stellar Structure and Evolution Calculations without the Mixing-Length Theory Approximations. II. Application to α Centauri A and B. *Thomas Joseph Lydon, Peter A. Fox, & Sabatino Sofia.* 413, 390, 161-B6 (1993)

Extreme Ultraviolet Emission from Late-Type Stars: Initial Results from *Extreme Ultraviolet Explorer*. *Peter W. Vedder, Robert J. Patterer, Patrick Jelinsky, Alex Brown, & Stuart Bowyer.* 414, L61, 185-C5 (1993)

Constellation Name: SV Centauri

Does SV Centauri Harbor an Accretion Disk? *Albert P. Linnell & Xania Scheick.* 379, 721, 173-F7 (1991)

Constellation Name: V834 Centauri

X-Ray to Infrared Observations of the AM Herculis System E1405−451 (V834 Centauri). *R. M. Sambruna, L. Chiappetti, A. Treves, J. M. Bonnet-Bidaud, P. Bouchet, L. Maraschi, C. Motch, & M. Mouchet.* 374, 744, 108-C10 (1991)

High-Speed Multicolor Photometry of V834 Centaurus. *John Middleditch, James N. Imamura, Michael T. Wolff, & Thomas Y. Steiman-Cameron.* 382, 315, 204-B1 (1991)

Transition in the X-Ray Light Curve of the AM Herculis System V834 Centauri (E1405−451): 1985–1986 *EXOSAT* Observations. *Rita M. Sambruna, Arvind N. Parmar, Lucio Chiappetti, Laura Maraschi, & Aldo Treves.* 424, 947, 76-E7 (1994)

Constellation Name: V854 Centauri

The Unusual Ultraviolet Chromospheric Spectrum of the R Coronae Borealis Star, V854 Centauri (NSV 6708), at Minimum Light. *Geoffrey C. Clayton, Barbara A. Whitney, S. Adam Stanford, John S. Drilling, & P. G. Judge.* 384, L19, 6-C8 (1992)

Constellation Name: Cepheus A2

Further Mapping of the Radio Emission from Massive Young Stellar Objects. *Melvin G. Hoare & Simon T. Garrington.* 449, 874, 224-F11 (1995)

Constellation Name: DH Cephei

Circumstellar Material around the Massive Close Binary DH Cephei. *M. F. Corcoran.* 366, 308, 4-G8 (1991)

Constellation Name: CX Cephei

A Spectroscopic Study of the Short-Period Eclipsing Wolf-Rayet Binary CX Cephei (WN5+O5 V). *David Lewis, Anthony F. J. Moffat, Jaymie M. Matthews, Carmelle Robert, & Sergey V. Marchenko.* 405, 312, 45-A11 (1993)

Constellation Name: U Cephei

Simultaneous Light and Radial Velocity Curve Solutions for U Cephei. *J. B. Rafert & N. L. Markworth.* 377, 278, 141-D5 (1991)

Constellation Name: VW Cephei

Photometric Imaging of VW Cephei. *Paul D. Hendry, Stefan W. Mochnacki, & Andrew Collier Cameron.* 399, 246, 198-C8 (1992)

Constellation Name: η Cephei

The Temperature and Granulation Stability of η Cephei. *David F. Gray.* 428, 765, 139-F13 (1994)

Constellation Name: β Ceti

ASCA X-Ray Spectra of the Active Single Stars β Ceti and π^1 Ursae Majoris. *S. A. Drake, K. P. Singh, N. E. White, & Theodore Simon.* 436, L87, 269-G11 (1994)

Constellation Name: o Ceti

Distribution of Dust about o Ceti and α Orionis Based on 11 Micron Spatial Interferometry. *M. Bester, W. C. Danchi, C. G. Degiacomi, C. H. Townes, & T. R. Geballe.* 367, L27, 17-E1 (1991)

Asymmetries in the Atmosphere of Mira. *M. Karovska, P. Nisenson, C. Papaliolios, & R. P. Boyle.* 374, L51, 110-D1 (1991)

Speckle Observations of Mira's Companion. *M. Karovska, P. Nisenson, & J. Beletic.* 402, 311, 5-A7 (1993)

Evidence for the Cospatial Origin of SiO Masers in Different Rotational Transitions. *G. C. McIntosh & C. Read Predmore.* 404, L71, 40-E11 (1993)

Constellation Name: τ Ceti

The Activity Cycle of τ Ceti. *David F. Gray & Sallie L. Baliunas.* 427, 1042, 125-E8 (1994)

Constellation Name: Z Chamaeleontis

Hubble Space Telescope Observations of the Dwarf Nova Z Chamaeleontis through Two Eruption Cycles. *E. L. Robinson, Janet H. Wood, R. C. Bless, J. C. Clemens, J. F. Dolan, J. L. Elliot, M. J. Nelson, J. W. Percival, M. J. Taylor, G. W. van Citters, & E. Zhang.* 443, 295, 99-C9 (1995)

A Study of the Long-Term Behavior of the SU Ursae Majoris Dwarf Novae VW Hydri and Z Chamaeleontis. *Pritiraj Mohanty & Eric M. Schlegel.* 449, 330, 214-F1 (1995)

Constellation Name: Circinus X-1

Upper Limits on TeV Gamma-Ray Emission from Centaurus A, Vela X-1, Centaurus X-3, and Circinus X-1. *W. H. Allen, I. A. Bond, E. Budding, M. J. Conway, A. Daniel, K. B. Fenton, H. Fujii, Z. Fujii, N. Hayashida, K. Hibino, M. Honda, J. E. Humble, S. Kabe, K. Kasahara, T. Kifune, G. D. Lythe, A. Masaike, Y. Matsubara, K. Mitsui, Y. Miura, M. Mori, Y. Muraki, M. Nagano, T. Nakamura, M. Nishizawa, P. M. Norris, S. Ogio, To. Saito, M. Sakata, H. Sato, H. M. Shimizu, M. Spencer, J. R. Storey, T. Tanimori, M. Teshima, S. Torii, A. Wadsworth, Y. Watase, M. D. Woodhams, Y. Yamamoto, P. C. M. Yock, & T. Yuda (The JANZOS Collaboration).* 405, 554, 50-A1 (1993)

Constellation Name: Nova Circini 1995

Hopkins Ultraviolet Telescope Observations of Nova Circini 1995 and Nova Aquilae 1995. *Bradford W. Greeley, William P. Blair, & Knox S. Long.* 454, L43, 308-B1 (1995)

Constellation Name: μ Columbae

High-Resolution Ultraviolet Observations of the Interstellar Diffuse Clouds toward μ Columbae. *Ulysses J. Sofia, Blair D. Savage, & Jason A. Cardelli.* 413, 251, 159-D3 (1993)

Constellation Name: AL Comae

Two Unusual Cataclysmic Variables at High Galactic Latitude: CP Eridani and AL Comae. *Timothy M. C. Abbott, Edward L. Robinson, Gary J. Hill, & Carole A. Haswell.* 399, 680, 206-D1 (1992)

Constellation Name: FK Comae

A Spectroscopic and Photometric Study of FK Comae in 1989. *David P. Huenemoerder, Lawrence W. Ramsey, Derek L. Buzasi, & Harold L. Nations.* 404, 316, 31-G1 (1993)

The Shape of FK Comae Berenices: Evidence for a Recently Coalesced Binary. *Alan D. Welty & Lawrence W. Ramsey.* 435, 848, 257-F13 (1994)

Constellation Name: GP Comae Berenices

Evidence for CNO Processed Material in the Accretion Disk of GP Comae. *T. R. Marsh, Keith Horne, & Simon Rosen.* 366, 535, 9-F1 (1991)

Constellation Name: σ^2 Coronae Borealis

Coordinated *Ginga*, *IUE*, and VLA Observations of Stellar Activity in σ^2 Coronae Borealis. *R. A. Stern, Y. Uchida, F. Walter, O. Vilhu, D. Hannikainen, A. Brown, A. Veale, & B. M. Haisch.* 391, 760, 97-D7 (1992)

Constellation Name: T Coronae Borealis

The Secondary Outburst Maximum of T Coronae Borealis: Implications for the Physics of Accretion Disks. *John K. Cannizzo & Scott J. Kenyon.* 386, L17, 29-C7 (1992)

The Nature of the Recurrent Nova T Coronae Borealis: Ultraviolet Evidence for a White Dwarf Accretor. *Pier Luigi Selvelli, Angelo Cassatella, & Roberto Gilmozzi.* 393, 289, 117-F12 (1992)

The Secondary Outburst Maximum of T Coronae Borealis: Hydrodynamic Simulations of the Blob and Accretion Disk. *Maximilian Ruffert, John K. Cannizzo, & Scott J. Kenyon.* 419, 780, 257-D1 (1993)

Constellation Name: U Coronae Borealis

Doppler Tomography of the Gas Stream in Short-Period Algol Binaries. *Mercedes T. Richards, Geary E. Albright, & Larissa M. Bowles.* 438, L103, 20-B8 (1995)

Constellation Name: TV Corvi

Ultraviolet Observations of SW Ursae Majoris, BC Ursae Majoris, and TV Corvi (1217–18): *IUE* Spectroscopy and Outburst Light Curves. *Steve B. Howell, Paula Szkody, George Sonneborn, Robert Fried, Janet*

Mattei, Ronald J. Oliversen, Doug Ingram, & Guy M. Hurst. 453, 454, 287-D1 (1995)

Constellation Name: TT Crateris

TT Crateris: A Long-Period, Double-lined Dwarf Nova. *Paula Szkody, Robert E. Williams, Bruce Margon, Steve B. Howell, & Mario Mateo.* 387, 357, 41-D4 (1992)

Constellation Name: γ Crucis

GHRS Observations of Cool, Low-Gravity Stars. II. Flow and Turbulent Velocities in the Outer Atmosphere of γ Crucis (M3.4 III). *Kenneth G. Carpenter, Richard D. Robinson, & Philip G. Judge.* 444, 424, 119-D7 (1995)

Constellation Name: Cygnus X-1

Shot Model Parameters for Cygnus X-1 through Phase Portrait Fitting. *James C. Lochner, J. H. Swank, & A. E. Szymkowiak.* 376, 295, 128-E9 (1991)

SMM/HXRBS Observations of Cygnus X-1 from 1986 December to 1988 April. *R. A. Schwartz, L. E. Orwig, B. R. Dennis, J. C. Ling, & W. A. Wheaton.* 376, 312, 128-G1 (1991)

An Ionized Accretion Disk in Cygnus X-1. *C. Done, J. S. Mulchaey, R. F. Mushotzky, & K. A. Arnaud.* 395, 275, 143-E5 (1992)

A Self-consistent Model for the Long-Term Gamma-Ray Spectral Variability of Cygnus X-1. *Fulvio Melia & Ranjeev Misra.* 411, 797, 139-F8 (1993)

High-Energy Spectrum of Cygnus X-1 Revisited. *F. Haardt, C. Done, G. Matt, & A. C. Fabian.* 411, L95, 142-F5 (1993)

The X-Ray Spectrum of Cygnus X-1. *F. E. Marshall, R. F. Mushotzky, R. Petre, & P. J. Serlemitsos.* 419, 301, 250-A2 (1993)

Hard X-Ray Timing Observation of the Crab Pulsar and Cygnus X-1. *P. Ubertini, A. Bazzano, M. Cocchi, C. La Padula, V. F. Polcaro, R. Staubert, & E. Kendziorra.* 421, 269, 19-C11 (1994)

Structure of X-Ray Shots of Cygnus X-1 in Its Low State. *Hitoshi Negoro, Sigenori Miyamoto, & Shunji Kitamoto.* 423, L127, 61-A13 (1994)

Discovery of a Low-Frequency Broad Quasi-periodic Oscillation Peak in the Power Density Spectrum of Cygnus X-1 with *Granat*/SIGMA. *A. Vikhlinin, E. Churazov, M. Gilfanov, R. Sunyaev, A. Dyachkov, N. Khavenson, R. Kremnev, K. Sukhanov, J. Ballet, P. Laurent, L. Salotti, A. Claret, J. F. Olive, M. Denis, P. Mandrou, & J. P. Roques.* 424, 395, 66-F14 (1994)

Observations of Cygnus X-1 by COMPTEL during 1991. *M. McConnell, D. Forrest, J. Ryan, W. Collmar, V. Schönfelder, H. Steinle, A. Strong, R. van Dijk, W. Hermsen, & K. Bennett.* 424, 933, 76-D1 (1994)

Phase Lags in Cygnus X-1. *M. Coleman Miller.* 441, 770, 72-E6 (1995)

Large Hysteretic Behavior of Stellar Black Hole Candidate X-Ray Binaries. *Sigenori Miyamoto, Shunji Kitamoto, Kiyoshi Hayashida, & Wataru Egoshi.* 442, L13, 84-F1 (1995)

Hot Accretion Disks with Electron-Positron Pair Winds. *Ranjeev Misra & Fulvio Melia.* 449, 813, 224-A1 (1995)

Statistics of X-Ray Fluctuations from Cygnus X-1: Reservoirs in the Disk? *H. Negoro, S. Kitamoto, M. Takeuchi, & S. Mineshige.* 452, L49, 270-C1 (1995)

Constellation Name: Cygnus X-2

Resolving the Iron K Line in Cygnus X-2: An Observation with BBXRT. *A. P. Smale, C. Done, R. F. Mushotzky, K. A. Weaver, P. J. Serlemitsos, F. E. Marshall, R. Petre, K. M. Jahoda, E. A. Boldt, J. H. Swank, A. E. Szymkowiak, R. L. Kelley, & K. Arnaud.* 410, 796, 123-F1 (1993)

Dynamically Comptonized Spectra from Near-critical Accretion onto Neutron Stars. *Luca Zampieri, Roberto Turolla, & Aldo Treves.* 419, 311, 250-B1 (1993)

Accretion Disk Structure and Branch Behavior of Cygnus X-2. *Akira Hirano, Shunji Kitamoto, Tatsuya T. Yamada, Shin Mineshige, & Jun Fukue.* 446, 350, 158-A10 (1995)

Burstlike Events in the Z Source Cygnus X-2. *E. Kuulkers, M. van der Klis, & J. van Paradijs.* 450, 748, 241-A11 (1995)

Constellation Name: Cygnus X-3

Problems of Ultra–High-Energy Particle Acceleration in Cygnus X-3: A Critical Reappraisal. *Abhas Mitra.* 370, 345, 51-E7 (1991)

Mayflower Mine 1500 GV Detector: Cosmic-Ray Anisotropy and Search for Cygnus X-3. *D. J. Cutler & D. E. Groom.* 376, 322, 128-G12 (1991)

Is There a Recycled Old Pulsar in Cygnus X-3? *Abhas Mitra.* 384, 255, 4-B3 (1992)

Time Variations in the X-Rays from Cygnus X-3 Observed with *Ginga*. *Shunji Kitamoto, Seiko Mizobuchi, Koujun Yamashita, & Hiroshi Nakamura.* 384, 263, 4-B13 (1992)

Evidence for Time Variability of PeV Energy Flux from Cygnus X-3: Ooty Observations during the Period 1984–1987. *S. C. Tonwar, S. K. Gupta, M. R. Rajeev, B. V. Sreekantan, & R. Srivatsan.* 390, 273, 77-D1 (1992)

What Drives the Mass Transfer in Cygnus X-3? *Abhas Mitra.* 390, 645, 83-C8 (1992)

A Search for TeV Emission from Cygnus X-3. *K. S. O'Flaherty, M. F. Cawley, D. J. Fegan, R. C. Lamb, M. J. Lang, D. A. Lewis, M. Punch, P. T. Reynolds, G. Vacanti, & T. C. Weekes.* 396, 674, 165-F9 (1992)

Search for Periodic Gamma-Ray Emission from Cygnus X-3 by the Egret Telescope on the *Compton Gamma-Ray Observatory*. *P. F. Michelson, D. L. Bertsch, J. Chiang, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, P. W. Kwok, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, C. von Montigny, P. L. Nolan, K. Pinkau, H. Rothermel, E. Schneid, M. Sommer, P. Sreekumar, & D. J. Thompson.* 401, 724, 231-E1 (1992)

Positron Annihilation Radiation from X-Ray Binary Systems. *Mei Wu, Chun-sheng Zhang, & Ti-pei Li.* 404, 276, 31-C11 (1993)

Cygnus X-3 in an "Ultrahigh" X-Ray State with No Detected Kα Line Emission. *A. P. Smale, R. F. Mushotzky, E. M. Schlegel, K. A. Weaver, P. J. Serlemitsos, F. E. Marshall, R. Petre, & K. Jahoda.* 418, 894, 243-F7 (1993)

The Status of Ultra–High-Energy Gamma-Ray Observations. *R. J. Protheroe.* 90, 883, 14-F10 (1994)

Generalized Spectral Model for 1–100 keV X-Ray Emission from Cygnus X-3 Based on *EXOSAT* Data. *M. R. Rajeev, V. R. Chitnis, A. R. Rao, & K. P. Singh.* 424, 376, 66-E7 (1994)

Cygnus X-3 as a Benchmark for Fundamental Properties of Wolf-Rayet Stars. *Anatol M. Cherepashchuk & Anthony F. J. Moffat.* 424, L53, 69-G6 (1994)

On the New Theory of Ultra–High-Energy Gamma-Ray Production in Cygnus X-3. *Abhas Mitra.* 425, 782, 91-E1 (1994)

Compton Reflection in Scorpius X-1 and Cygnus X-3? *Michael Maisack, Eckhard Kendziorra, Hongchao Pan, Gerry Skinner, Jakob Englhauser, Claus Reppin, Valeri Efremov, & Rashid Sunyaev.* 92, 473, 38-B7 (1994)

Ionization Structure of Cygnus X-3: A Massive Iron-depleted Companion? *Nobuo Terasawa & Hiroshi Nakamura.* 92, 477, 38-B13 (1994)

Correlation between X-Ray Intensity and Radio Outbursts of Cygnus X-3. *Hiroaki Watanabe, Shunji Kitamoto, Sigenori Miyamoto, R. L. Fiedler, E. B. Waltman, K. J. Johnston, & F. D. Ghigo.* 433, 350, 212-F1 (1994)

Interstellar Scattering toward Cygnus X-3: Measurements of Anisotrophy and of the Inner Scale. *L. A. Molnar, R. L. Mutel, M. J. Reid, & K. J. Johnston.* 438, 708, 14-A2 (1995)

VLBI Observations of Cygnus X-3 during the 1985 October Radio Outburst. *C. J. Schalinski, K. J. Johnston, A. Witzel, R. E. Spencer, R. Fiedler, E. Waltman, G. G. Pooley, R. Hjellming, & L. A. Molnar.* 447, 752, 186-D1 (1995)

Constellation Name: Cygnus XR-1

A Reanalysis of the Orbital Inclination of Cygnus XR-1 Determined Polarimetrically. *Joseph F. Dolan.* 384, 249, 4-A9 (1992)

Constellation Name: CG Cygni

A Connection between Long-Term Luminosity Variations and Orbital Period Changes in Chromospherically Active Binaries. *Douglas S. Hall.* 380, L85, 188-F1 (1991)

Long-Term Starspot Activity of Short-Period RS Canum Venaticorum Stars. V. CG Cygni. *M. Zeilik, S. Gordon, E. Jaderlund, M. Ledlow, D. L. Summers, P. A. Heckert, E. Budding, & T. S. Banks.* 421, 303, 19-F8 (1994)

Constellation Name: CH Cygni

ROSAT PSPC Observations of the Symbiotic CH Cygni. *D. A. Leahy & K. Volk.* 440, 847, 54-G1 (1995)

Constellation Name: P Cygni

First Ultraviolet Spectropolarimetry of Hot Supergiants. *M. Taylor, A. D. Code, K. H. Nordsieck, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, R. E. Schulte-Ladbeck, & B. A. Whitney.* 382, L85, 211-D5 (1991)

Stellar Models and the Brightening of P Cygni. *Mounib F. El Eid & Dieter H. Hartmann.* 404, 271, 31-C5 (1993)

Properties and Variability of the Stellar Wind from P Cygni. *S. Scuderi, G. Bonanno, D. Spadaro, N. Panagia, H. J. G. L. M. Lamers, & A. de Koter.* 437, 465, 289-E1 (1994)

Constellation Name: SS Cygni

Spectral Evolution of Accretion Disks of Dwarf Novae. III. Outburst Cycle of SS Cygni. *F. H. Cheng & D. N. C. Lin.* 389, 714, 70-C5 (1992)

On the Long-Term Behavior of SS Cygni. *John K. Cannizzo & Janet A. Mattei.* 401, 642, 230-E1 (1992)

Mass Transfer Rate and Outburst Cycle of SS Cygni. *Alexander Hempelmann & Jürgen Kurths.* 412, L41, 148-E1 (1993)

The Accretion Disk Limit Cycle Model: Toward an Understanding of the Long-Term Behavior of SS Cygni. *John K. Cannizzo.* 419, 318, 250-B10 (1993)

EUVE Observations of the Anomalous 1993 August Outburst of SS Cygni. *Christopher W. Mauche, John C. Raymond, & Janet A. Mattei.* 446, 842, 167-F7 (1995)

Constellation Name: V367 Cygni

Elliptical Polarimetry of the Interacting Binary Star V367 Cygni. *Nicholas M. Elias II.* 410, 785, 123-E1 (1993)

Constellation Name: V404 Cygni

High-Speed Photometry of V404 Cygni in Outburst. *Eric Gotthelf, Joseph Patterson, & Richard J. Stover.* 374, 340, 102-C11 (1991)

Optical Identification of the X-Ray Source GS 2023+338 as V404 Cygni. *R. Mark Wagner, Sumner G. Starrfield, Steve B. Howell, Tobias J. Kreidl, S. J. Bus, A. Cassatella, R. Bertram, & R. Fried.* 378, 293, 154-E10 (1991)

Radio Observations of the 1989 Transient Event in V404 Cygni (= GS 2023+338). *Xiaohong Han & R. M. Hjellming.* 400, 304, 212-F6 (1992)

Periodic Photometric Variability of the Black Hole Binary V404 Cygni. *R. Mark Wagner, T. J. Kreidl, S. B. Howell, & S. G. Starrfield.* 401, L97, 233-C13 (1992)

ROSAT Observations of the Black Hole Candidate V404 Cygni in Quiescence. *R. Mark Wagner, S. G. Starrfield, R. M. Hjellming, S. B. Howell, & T. J. Kreidl.* 429, L25, 150-D3 (1994)

Constellation Name: V444 Cygni

Colliding Winds from Early-Type Stars in Binary Systems. *Ian R. Stevens, John M. Blondin, & A. M. T. Pollock.* 386, 265, 27-E1 (1992)

Polarization Eclipse Model of the Wolf-Rayet Binary V444 Cygni with Constraints on the Stellar Radii and an Estimate of the Wolf-Rayet Mass-Loss Rate. *N. St-Louis, A. F. J. Moffat, L. Lapointe, Yu. S. Efimov, N. M. Shakhovskoy, G. K. Fox, & V. Piirola.* 410, 342, 116-C10 (1993)

The Wolf-Rayet Binary V444 Cygni under the Spectroscopic Microscope. I. Improved Characteristics of the Components and Their Interaction Seen in He I. *Sergey V. Marchenko, Anthony F. J. Moffat, & Gloria Koenigsberger.* 422, 810, 42-A5 (1994)

Line Profile Variations from Atmospheric Eclipses: Constraints on the Wind Structure in Wolf-Rayet Stars. *L. H. Auer & G. Koenigsberger.* 436, 859, 277-E5 (1994)

Constellation Name: V503 Cygni

A Spectroscopic Study of DV Ursae Majoris (US 943), AY Piscium (PG 0134+070), and V503 Cygni. *Paula Szkody & Steve B. Howell.* 403, 743, 25-A6 (1993)

Constellation Name: V1016 Cygni

Transition Probabilities for the UV0.01 Multiplet in N III. *Tomas Brage, Charlotte Froese Fischer, & Philip G. Judge.* 445, 457, 138-G7 (1995)

Constellation Name: V1057 Cygni

Optical Spectroscopy of Z Canis Majoris, V1057 Cygni, and FU Orionis: Accretion Disks and Signatures of Disk Winds. *Alan D. Welty, Stephen E. Strom, Suzan Edwards, Scott J. Kenyon, & Lee W. Hartmann.* 397, 260, 171-B11 (1992)

Constellation Name: V1500 Cygni

Synchronization of the Magnetic Nova V1500 Cygni. *Gary D. Schmidt & H. S. Stockman.* 371, 749, 70-G7 (1991)

Detection of the Hot White Dwarf in the Magnetic Nova V1500 Cygni with the *Hubble Space Telescope*. *Gary D. Schmidt, James Liebert, & H. S. Stockman.* 441, 414, 65-A11 (1995)

Constellation Name: V1727 Cygni

X-Ray Emission from 4U 2129+47 (=V1727 Cygni) in Quiescence. *Michael R. Garcia.* 435, 407, 249-A9 (1994)

Constellation Name: V1853 Cygni

High-Resolution Spectroscopy of V1853 Cygni (LS II +34°26): Birth of a Planetary Nebula? *Verne V. Smith & David L. Lambert.* 424, L123, 79-D13 (1994)

Constellation Name: V1974 Cygni

The Photometric Period of V1974 Cygni (Nova Cygni 1992). *James A. DeYoung & Richard E. Schmidt.* 431, L47, 183-A3 (1994)

Constellation Name: Nova Cygni 1975

The Temporal Evolution of the 4–14 Micron Spectrum of V1974 Cygni (Nova Cygni 1992). *R. D. Gehrz, Charles E. Woodward, M. A. Greenhouse, S. Starrfield, D. H. Wooden, F. C. Witteborn, S. A. Sandford, L. J. Allamandola, J. D. Bregman, & M. Klapisch.* 421, 762, 27-F6 (1994)

Constellation Name: Nova Cygni 1978

Optically Thick Winds in Nova Outbursts. *Mariko Kato & Izumi Hachisu.* 437, 802, 296-F1 (1994)

Constellation Name: Nova Cygni 1992

The Early Bolometric Evolution of Nova Cygni 1992. *Steven N. Shore, George Sonneborn, Sumner Starrfield, Rosario Gonzalez-Riestra, & Ronald S. Polidan.* 421, 344, 20-B13 (1994)

Non–LTE Model Atmosphere Analysis of Nova Cygni 1992. *P. H. Hauschildt, S. Starrfield, S. Austin, R. M. Wagner, S. N. Shore, & G. Sonneborn.* 422, 831, 42-C1 (1994)

Ultraviolet Photometry of Nova Cygni 1992 Obtained with the High Speed Photometer. *M. Taylor, R. C. Bless, H. Ögelman, J. L. Elliot, J. S. Gallagher, M. J. Nelson, J. W. Percival, E. L. Robinson, & G. W. van Citters.* 424, L45, 69-F6 (1994)

Spectropolarimetry of Nova Cygni 1992: Evidence for an Asymmetric Geometry. *K. S. Bjorkman, K. A. Johansen, K. H. Nordsieck, J. S. Gallagher, & A. J. Barger.* 425, 247, 83-C12 (1994)

The Temporal Evolution of the 1–5 Micron Spectrum of V1974 Cygni (Nova Cygni 1992). *Charles E. Woodward, Matthew A. Greenhouse, R. D. Gehrz, Y. J. Pendleton, R. R. Joyce, D. Van Buren, J. Fischer, N. J. Jennerjohn, & C. D. Kaminski.* 438, 921, 16-G7 (1995)

Constellation Name: Nova V1974 Cygni

The X-Ray Halo of Nova V1974 Cygni (Nova Cygni 1992) and the Nature of Interstellar Dust. *John S. Mathis, David Cohen, John P. Finley, & J. Krautter.* 449, 320, 214-E1 (1995)

Constellation Name: 32 Cygni

Interpretation of Anomalous Ultraviolet Transitions of Fe II Observed in Laboratory Fourier Transform Spectra and Stellar *HST* and *IUE* Spectra. *Sveneric Johansson, Tomas Brage, David S. Leckrone, Gillian Nave, & Glenn M. Wahlgren.* 446, 361, 158-C1 (1995)

Constellation Name: 68 Cygni

Stellar-Wind Variability in *IUE* Spectra of 68 Cygni. *Ian D. Howarth & Keith C. Smith.* 439, 431, 27-B3 (1995)

Constellation Name: DX Delphini

The Baade-Wesselink Method and the Distances to RR Lyrae Stars. VII. The Field Stars SW Andromedae and DX Delphini and a Comparison of Recent Baade-Wesselink Analyses. *Rodney V. Jones, Bruce W. Carney, Jesper Storm, & David W. Latham.* 386, 646, 33-C14 (1992)

Constellation Name: AB Doradus

Directivity of the Radio Emission from the K1 Dwarf Star AB Doradus. *Jeremy Lim, Stephen M. White, Graham J. Nelson, & Arnold O. Benz.* 430, 332, 163-C9 (1994)

Spectroscopic *EUVE* Observations of the Active Star AB Doradus. *Slavek M. Rucinski, Rolf Mewe, Jelle S. Kaastra, Osmi Vilhu, & Stephen M. White.* 449, 900, 225-B11 (1995)

Constellation Name: σ Draconis

The Activity Cycle of σ Draconis. *David F. Gray, Sallie L. Baliunas, G. W. Lockwood, & Brian A. Skiff.* 400, 681, 219-A1 (1992)

Constellation Name: AG Draconis

Extended Variability of the Symbiotic Star AG Draconis. *M. Kafatos, S. R. Meier, & I. Martin.* 84, 201, 4-B7 (1993)

Constellation Name: X Draconis

Search for an Optical Counterpart of the Source of GRB 911001. *S. Klose.* 446, 357, 158-B6 (1995)

Constellation Name: YY Draconis

Near-Infrared Time-resolved Spectroscopy of the Cataclysmic Variable YY Draconis. *Mario Mateo, Paula Szkody, & Peter Garnavich.* 370, 370, 51-G8 (1991)

Rapid Oscillations in Cataclysmic Variables. VIII. YY Draconis (=3A 1148+719. *J. Patterson, D. A. Schwartz, J. P. Pye, W. P. Blair, G. A. Williams, & J.-P. Caillault.* 392, 233, 103-G3 (1992)

Constellation Name: ϵ Eridani

The Fundamental Parameters of the Chromospherically Active K2 Dwarf ϵ Eridani. *Jeremy J. Drake & Geoffrey Smith.* 412, 797, 153-F9 (1993)

Infrared Zeeman Analysis of ϵ Eridani. *Jeff A. Valenti, Geoffrey W. Marcy, & Gibor Basri.* 439, 939, 37-E9 (1995)

Magnetic Activity Variations of ϵ Eridani. *David F. Gray & Sallie L. Baliunas.* 441, 436, 65-D4 (1995)

Constellation Name: λ Eridani

Circumstellar Material around λ Eridani (B2e). I. Geometry and Kinematics during 1987–1988. *Myron A. Smith, Geraldine J. Peters, & C. A. Grady.* 367, 302, 15-G1 (1991)

Dynamic Processes in Be Star Atmospheres. I. "Dimple" Formation in the He sci λ6678 Line of λ Eridani. *Myron A. Smith & Ronald S. Polidan.* 408, 323, 87-B8 (1993)

A Giant X-Ray Flare on λ Eridani (B2e). *Myron A. Smith, Carol A. Grady, Geraldine J. Peters, & Eric D. Feigelson.* 409, L49, 111-D1 (1993)

Dynamic Processes in Be Star Atmospheres. II. He I $2P$–nD Line Formation in λ Eridani (Outburst). *Myron A. Smith, Ivan Hubeny, Thierry Lanz, & Thomas Meylan.* 432, 392, 198-A10 (1994)

Constellation Name: ν Eridani

Analysis of *Voyager* Spectra of the β Cephei Star ν Eridani. *A. Porri, R. Stalio, B. Ali, R. S. Polidan, & C. Morossi.* 424, 401, 66-G7 (1994)

Constellation Name: CP Eridani

Two Unusual Cataclysmic Variables at High Galactic Latitude: CP Eridani and AL Comae. *Timothy M. C. Abbott, Edward L. Robinson, Gary J. Hill, & Carole A. Haswell.* 399, 680, 206-D1 (1992)

Constellation Name: EF Eridani

Bowen Fluorescence in AM Herculis Stars. *Jonathan Schachter, Alexei V. Filippenko, Steven M. Kahn, & Frits B. S. Paerels.* 373, 633, 95-G4 (1991)

Constellation Name: UZ Fornacis

Extreme Ultraviolet Light Curves of UZ Fornacis: Evidence for Accretion Stream Absorption and Vertical Extent of the Accretion Spot. *John K. Warren, Martin M. Sirk, & John V. Vallerga.* 445, 909, 147-F13 (1995)

Constellation Name: U Geminorum

A Study of the Ultraviolet Evolution of U Geminorum between Outbursts. *Alan L. Kiplinger, Edward M. Sion, & Paula Szkody.* 366, 569, 10-B1 (1991)

Observations of the White Dwarf in the U Geminorum System with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Charles W. Bowers, Arthur F. Davidsen, Gerard A. Kriss, Edward M. Sion, & Ivan Hubeny.* 405, 327, 45-C1 (1993)

Cooling of the White Dwarf in U Geminorum between Outbursts. *Knox S. Long, Edward M. Sion, Min Huang, & Paula Szkody.* 424, L49, 69-F13 (1994)

Hubble Space Telescope Goddard High-Resolution Spectrograph Observation of U Geminorum during Quiescence: Evidence for a Slowly Rotating White Dwarf. *Edward M. Sion, Knox S. Long, Paula Szkody, & Min Huang.* 430, L53, 165-G12 (1994)

Hopkins Ultraviolet Telescope Observations of U Geminorum Far from Outburst. *Knox S. Long, William P. Blair, & John C. Raymond.* 454, L39, 308-A8 (1995)

Constellation Name: YY Geminorum

An *ASCA* Observation of the Castor System. *Eric V. Gotthelf, Lalit Jalota, Koji Mukai, & Nicholas E. White.* 436, L91, 270-A5 (1994)

Constellation Name: σ Geminorum

Doppler Imaging Stars with Moderate Rotation: The Spot Distribution on σ Geminorum. *Artie P. Hatzes.* 410, 777, 123-D7 (1993)

Constellation Name: α Gruis

Tomography/Power Spectrum Techniques for Removal of Fixed Pattern Noise from *Hubble Space Telescope* Spectra. *Cheng-Hsuan Lyu, Frederick C. Bruhweiler, & Andrew M. Smith.* 447, 880, 188-A10 (1995)

Constellation Name: Hercules X-1

Phase Coherence for TeV/PeV Binary Sources. *D. A. Lewis, R. C. Lamb, & S. D. Biller.* 369, 479, 43-F4 (1991)

A Model for the 35 Day Variations in the Pulse Profile of Hercules X-1. *J. A. Petterson, R. E. Rothschild, & D. E. Gruber.* 378, 696, 161-A11 (1991)

A Model of Pulsed Gamma Radiation from the X-Ray Binary Hercules X-1/HZ Herculis. *F. A. Aharonian & A. M. Atoyan.* 381, 220, 191-F8 (1991)

Search for TeV Gamma-Ray Emission from Hercules X-1. *P. T. Reynolds, M. F. Cawley, D. J. Fegan, A. M. Hillas, P. W. Kwok, R. C. Lamb, M. J. Lang, D. A. Lewis, D. J. Macomb, K. S. O'Flaherty, G. Vacanti, & T. C. Weekes.* 382, 640, 209-E7 (1991)

Decrease in the Orbital Period of Hercules X-1. *John E. Deeter, Paul E. Boynton, Sigenori Miyamoto, Shunji Kitamoto, Fumiaki Nagase, & Nobuyuki Kawai.* 383, 324, 216-C1 (1991)

An X-Ray Spectroscopic Study of the Pre-Eclipse Dips of Hercules X-1. *C. S. Choi, F. Nagase, F. Makino, T. Dotani, & K. W. Min.* 422, 799, 41-G5 (1994)

Evidence of Circumstellar Matter Surrounding the Hercules X-1 System. *C. S. Choi, T. Dotani, F. Nagase, F. Makino, J. E. Deeter, & K. W. Min.* 427, 400, 114-G5 (1994)

Spectral Evolution during Pre-Eclipse Dips in Hercules X-1. *D. A. Leahy, A. Yoshida, & M. Matsuoka.* 434, 341, 230-B6 (1994)

Iron Line Intensity Variations of Hercules X-1 over the Pulse Phase and the 35 Day Cycle. *C. S. Choi, F. Nagase, F. Makino, T. Dotani, S. Kitamoto, & S. Takahama.* 437, 449, 289-C6 (1994)

Five Eclipses of Hercules X-1 Observed by *Ginga*. *D. A. Leahy.* 450, 339, 232-F1 (1995)

An Archival Study of *Hubble Space Telescope* Observations of Hercules X-1/HZ Herculis. *F. H. Cheng, S. D. Vrtilek, & John C. Raymond.* 452, 825, 276-A10 (1995)

Constellation Name: 30 Herculis

The Chromospheric Structure of the Cool Giant Star g Herculis. *Donald G. Luttermoser, Hollis R. Johnson, & Joel A. Eaton.* 422, 351, 34-D7 (1994)

Constellation Name: AM Herculis

Possible Detection of TeV Gamma Rays from AM Herculis. *C. L. Bhat, R. K. Kaul, H. S. Rawat, V. K. Senecha, R. C. Rannot, M. L. Sapru, A. K. Tickoo, & H. Razdan.* 369, 475, 43-E12 (1991)

Bowen Fluorescence in AM Herculis Stars. *Jonathan Schachter, Alexei V. Filippenko, Steven M. Kahn, & Frits B. S. Paerels.* 373, 633, 95-G4 (1991)

Simultaneous Soft and Hard X-Ray Spectroscopy of AM Herculis with *EXOSAT*: Discovery of Photospheric Absorption Features. *Frits Paerels, John Heise, & André van Teeseling.* 426, 313, 100-A10 (1994)

ORFEUS Observations of AM Herculis. *John C. Raymond, Christopher W. Mauche, Stuart Bowyer, & Mark Hurwitz.* 440, 331, 45-F7 (1995)

Constellation Name: DI Herculis

On the Nature of the Anomalously Slow Apsidal Motion of DI Herculis. *Kh. F. Khaliullin, S. A. Khodykin, & A. I. Zakharov.* 375, 314, 114-G1 (1991)

Constellation Name: DQ Herculis

Taking the Pulse of DQ Herculis. *Phillip J. Martell, Keith Horne, Christopher M. Price, & Richard H. Gomer.* 448, 380, 197-D6 (1995)

The 71 Second Oscillation in the Light Curve of the Old Nova DQ Herculis. *E. Zhang, E. L. Robinson, R. F. Stiening, & Keith Horne.* 454, 447, 305-D12 (1995)

Constellation Name: HZ Herculis

Search for TeV Gamma-Ray Emission from Hercules X-1. *P. T. Reynolds, M. F. Cawley, D. J. Fegan, A. M. Hillas, P. W. Kwok, R. C. Lamb, M. J. Lang, D. A. Lewis, D. J. Macomb, K. S. O'Flaherty, G. Vacanti, & T. C. Weekes.* 382, 640, 209-E7 (1991)

Ultraviolet Spectra of HZ Herculis/Hercules X-1 from *HST*: Hot Gas during Total Eclipse of the Neutron Star. *Scott F. Anderson, Stefanie Wachter, Bruce Margon, Ronald A. Downes, William P. Blair, & Jules P. Halpern.* 436, 319, 265-F5 (1994)

Constellation Name: U Herculis

Observation of a Ring Structure in SiO Maser Emission from Late-Type Stars. *P. J. Diamond, A. J. Kemball, W. Junor, A. Zensus, J. Benson, & V. Dhawan.* 430, L61, 166-A10 (1994)

Constellation Name: V446 Herculis

Periodic Outbursts in the Old Nova V446 Herculis. *R. K. Honeycutt, J. W. Robertson, & G. W. Turner.* 446, 838, 167-E13 (1995)

Constellation Name: V795 Herculis

V795 Herculis (=PG 1711+336), A Peculiar Intermediate Polar without Strong X-Ray Emission. *Erho Zhang, Edward L. Robinson, Tod F. Ramseyer, Mathew D. Shetrone, & Rae F. Stiening.* 381, 534, 197-C10 (1991)

Constellation Name: V838 Herculis

ROSAT Observation of the Decline of V838 Herculis (Nova Herculis 1991). *Paula Szkody & D. W. Hoard.* 429, 857, 156-C12 (1994)

Constellation Name: Nova DQ Herculis

On the Mass of Nova DQ Herculis (1934). *Keith Horne, William F. Welsh, & Richard A. Wade.* 410, 357, 116-E1 (1993)

Constellation Name: Nova Herculis 1991

The Peculiar, Fast Nova Herculis 1991. *Charles E. Woodward, R. D. Gehrz, Terry J. Jones, & G. F. Lawrence.* 384, L41, 11-C1 (1992)

The Presence of an Accretion Disk in the Eclipsing Binary System Nova Herculis 1991 Three Weeks after Outburst. *Elia M. Leibowitz, Haim Mendelson, Ezra Mashal, Dina Prialnik, & Waltraut C. Seitter.* 385, L49, 23-D1 (1992)

8–13 Micron Spectroscopy of Nova Herculis 1991. *David K. Lynch, John A. Hackwell, & Ray W. Russell.* 398, 632, 192-A5 (1992)

The Optical Light Curve of Nova Herculis 1991 and of Other Classical Novae. *Elia M. Leibowitz.* 411, L29, 134-A1 (1993)

Nova Herculis 1991: Thermonuclear Runaway on a Massive ONeMg White Dwarf. *Thomas Matheson, Alexei V. Filippenko, & Luis C. Ho.* 418, L29, 238-D6 (1993)

The Masses of V838 Herculis (Nova Herculis 1991) and QZ Aurigae. *Paula Szkody & Doug Ingram.* 420, 830, 13-C3 (1994)

Infrared Photometry and Spectrophotometry of Nova Herculis 1991 (= V838 Herculis): Observations of the Formation of Dust in the Ejecta of a Very Fast Nova. *Thomas E. Harrison & Guy S. Stringfellow.* 437, 827, 297-A3 (1994)

Constellation Name: β Hydri

The Distant Future of Solar Activity: A Case Study of β Hydri. I. Stellar Evolution, Lithium Abundance, and Photospheric Structure. *D. Dravins, L. Lindegren, Å. Nordlund, & D. A. VandenBerg.* 403, 385, 18-E10 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. II. Chromospheric Activity and Variability. *D. Dravins, P. Linde, K. Fredga, & G. F. Gahm.* 403, 396, 18-F9 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. III. Transition Region, Corona, and Stellar Wind. *D. Dravins, P. Linde, T. R. Ayres, J. L. Linsky, B. Monsignori-Fossi, T. Simon, & F. Wallinder.* 403, 412, 18-G13 (1993)

X-Ray Emission from the Sun in Its Youth and Old Age. *J. D. Dorren, M. Güdel, & E. F. Guinan.* 448, 431, 198-B3 (1995)

Constellation Name: V Hydrae

Evidence for Rapid Rotation of the Carbon Star V Hydrae. *Cecilia Barnbaum, Mark Morris, & Claudine Kahane.* 450, 862, 242-G7 (1995)

Constellation Name: VW Hydri

On the X-Ray–emitting Boundary Layer of the Dwarf Nova VW Hydri. *Christopher W. Mauche, Richard A. Wade, Ronald S. Polidan, Hans van der Woerd, & Frits B. S. Paerels.* 372, 659, 83-G7 (1991)

A Study of the Long-Term Behavior of the SU Ursae Majoris Dwarf Novae VW Hydri and Z Chamaeleontis. *Pritiraj Mohanty & Eric M. Schlegel.* 449, 330, 214-F1 (1995)

Constellation Name: AR Lacertae

A Study of the Spatial and Spectral Characteristics of the Corona of AR Lacertae. *R. Ottmann, J. H. M. M. Schmitt, & M. Kürster.* 413, 710, 165-C6 (1993)

Extreme Ultraviolet Explorer Observations of the RS Canum Venaticorum Systems AR Lacertae and II Pegasi. *R. J. Patterer, P. W. Vedder, P. Jelinsky, A. Brown, & S. Bowyer.* 414, L57, 185-B13 (1993)

Constellation Name: SW Lacertae

Analysis of the *IUE* Satellite and the Ground-based Observations of SW Lacertae. *Jang Hae Jeong, Yong Woon Kang, Woo Baik Lee, & Eon Chang Sung.* 421, 779, 27-G13 (1994)

Constellation Name: AD Leonis

The Great Flare of 1985 April 12 on AD Leonis. *Suzanne L. Hawley & Bjørn R. Pettersen.* 378, 725, 161-D1 (1991)

Simultaneous *Extreme-Ultraviolet Explorer* and Optical Observations of AD Leonis: Evidence for Large Coronal Loops and the Neupert Effect in Stellar Flares. *Suzanne L. Hawley, George H. Fisher, Theodore Simon, Scott L. Cully, Susana E. Deustua, Marek Jablonski, Christopher M. Johns-Krull, Bjørn R. Pettersen, Verne Smith, William J. Spiesman, & Jeffrey Valenti.* 453, 464, 287-D14 (1995)

Constellation Name: CN Leonis

A Search for Microflaring Activity on dMe Flare Stars. I. Observations of the dM8e Star CN Leonis. *R. D. Robinson, K. G. Carpenter, J. W. Percival, & J. A. Bookbinder.* 451, 795, 258-B6 (1995)

Constellation Name: DP Leonis

Eclipse Mapping of the Accreting Magnetic White Dwarf in DP Leonis with *HST*. *H. S. Stockman, Gary D. Schmidt, James Liebert, & J. B. Holberg.* 430, 323, 163-B11 (1994)

X-Ray Variability and Period Determinations in the Eclipsing Polar DP Leonis. *Craig R. Robinson & France A. Córdova.* 437, 436, 289-B4 (1994)

Constellation Name: R Leonis

The Spatial Size of the SiO Masers in R Leonis Derived from Lunar Occultations. *J. Cernicharo, W. Brunswig, G. Paubert, & S. Liechti.* 423, L143, 61-C13 (1994)

Constellation Name: χ Lupi

First Results from the Goddard High-Resolution Spectrograph: High-Resolution Observations of the 1942 Å Resonance Line of Hg II in the Chemically Peculiar B Star, χ Lupi. *David S. Leckrone, Glenn M. Wahlgren, & Sveneric G. Johansson.* 377, L37, 143-E1 (1991)

First Results from the Goddard High-Resolution Spectrograph: A Demonstration of Spectral Resolution and Experiments with Deconvolution. *Glenn M. Wahlgren, David S. Leckrone, Steven N. Shore, Don J. Lindler, Ronald L. Gilliland, & Dennis C. Ebbets.* 377, L41, 143-E6 (1991)

Comparison of New Experimental and Astrophysical *f*-Values for Some Ru II Lines, Observed in *HST* Spectra of χ Lupi. *Sveneric G. Johansson, Ali Joueizadeh, Ulf Litzén, Jörgen Larsson, Anders Persson, Claes-Göran Wahlström, Sune Svanberg, David S. Leckrone, & Glenn M. Wahlgren.* 421, 809, 28-C8 (1994)

An Optical Region Elemental Abundance Analysis of the Chemically Peculiar HgMn Star χ Lupi. *Glenn M. Wahlgren, Saul J. Adelman, & Richard D. Robinson.* 434, 349, 230-C3 (1994)

The Pursuit of Heavy Elements in the HgMn-Type Star χ Lupi: Observations with the GHRS in the COSTAR Era. *Glenn M. Wahlgren, Tomas Brage, Ronald L. Gilliland, Sveneric G. Johansson, David S. Leckrone, Don J. Lindler, & Ulf Litzén.* 435, L67, 252-F3 (1994)

The Abundances of Pt, Au, and Hg in the Chemically Peculiar HgMn-Type Stars κ Cancri and χ Lupi. *Glenn M. Wahlgren, David S. Leckrone, Sveneric G. Johansson, Maria Rosberg, & Tomas Brage.* 444, 438, 119-E11 (1995)

Interpretation of Anomalous Ultraviolet Transitions of Fe II Observed in Laboratory Fourier Transform Spectra and Stellar *HST* and *IUE* Spectra. *Sveneric Johansson, Tomas Brage, David S. Leckrone, Gillian Nave, & Glenn M. Wahlgren.* 446, 361, 158-C1 (1995)

Constellation Name: α Lyrae

Metallic Line Profiles of the A0 V Star Vega. *Austin F. Gulliver, Saul J. Adelman, Charles R. Cowley, & J. Murray Fletcher.* 380, 223, 178-G1 (1991)

Line Shapes of Rotating Stars with Application to Alpha Lyrae. *G. H. Elste.* 384, 284, 4-D10 (1992)

A New Solar Irradiance Calibration from 3295 Å to 8500 Å Derived from Absolute Spectrophotometry of Vega. *G. W. Lockwood, H. Tüg, & N. M. White.* 390, 668, 83-E9 (1992)

Vega: A Rapidly Rotating Pole-on Star. *Austin F. Gulliver, Graham Hill, & Saul J. Adelman.* 429, L81, 158-C9 (1994)

Constellation Name: β Lyrae

Ultraviolet Light Curves of β Lyrae: Comparison of *OAO* A-2, *IUE*, and *Voyager* Observations. *Yoji Kondo, George E. McCluskey, Jeffrey M. S. Silvis, Ronald S. Polidan, Carolina P. S. McCluskey, & Joel A. Eaton.* 421, 787, 28-A9 (1994)

Constellation Name: AU Microscopii

A Search for Proton Beams during Flares on AU Microscopii. *R. D. Robinson, K. G. Carpenter, B. E. Woodgate, & S. P. Maran.* 414, 872, 182-B5 (1993)

Observing Stellar Coronae with the Goddard High Resolution Spectrograph. I. The dMe Star AU Microscopii. *S. P. Maran, R. D. Robinson, S. N. Shore, J. W. Brosius, K. G. Carpenter, B. E. Woodgate, J. L. Linsky, A. Brown, P. B. Byrne, M. R. Kundu, S. White, J. C. Brandt, R. A. Shine, & F. M. Walter.* 421, 800, 28-B10 (1994)

High-Velocity Plasma in the Transition Region of AU Microscopii: Evidence for Magnetic Reconnection and Saturated Heating during Quiescent and Flaring Conditions. *Jeffrey L. Linsky & Brian E. Wood.* 430, 342, 163-D8 (1994)

A Coronal Mass Ejection Model for the 1992 July 15 Flare on AU Microscopii Observed by the *Extreme Ultraviolet Explorer*. *Scott L. Cully, George H. Fisher, Mark J. Abbott, & Oswald H. W. Siegmund.* 435, 449, 249-E11 (1994)

Constellation Name: β Monocerotis A

The 3 Micron Spectrum of the Classical Be Star β Monocerotis A. *K. Sellgren & R. G. Smith.* 388, 178, 51-B13 (1992)

Constellation Name: U Monocerotis

Period Changes and Evolution in RV Tauri Stars. *John R. Percy, Dimitar D. Sasselov, Amy Alfred, & Greg Scott.* 375, 691, 121-C7 (1991)

Constellation Name: θ Muscae

The First Linear Polarization Spectra of Wolf-Rayet Stars in the Ultraviolet: EZ Canis Majoris and θ Muscae. *R. E. Schulte-Ladbeck, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, D. Shepherd, M. Taylor, & B. A. Whitney.* 391, L37, 92-C6 (1992)

Constellation Name: Nova Muscae 1991

Periodic Variability in the Optical Counterpart of X-Ray Nova Muscae 1991. *Charles D. Bailyn.* 391, 298, 89-F1 (1992)

Discovery and X-Ray Properties of GS 1124−683 (=Nova Muscae). *Shunji Kitamoto, Hiroshi Tsunemi, Sigenori Miyamoto, & Kiyoshi Hayashida.* 394, 609, 137-A6 (1992)

The *Hubble Space Telescope* Observations of X-Ray Nova Muscae 1991 and Its Spectral Evolution. *F. H. Cheng, Keith Horne, N. Panagia, C. R. Shrader, R. Gilmozzi, F. Paresce, & N. Lund.* 397, 664, 179-C11 (1992)

Another Canonical Time Variation of X-Rays from Black Hole Candidates in the Very High Flare State? *Sigenori Miyamoto, Sayuri Iga, Shunji Kitamoto, & Yasuhide Kamado.* 403, L39, 20-D13 (1993)

Time-dependent Disk Accretion in X-Ray Nova Muscae 1991. *Shin Mineshige, Akira Hirano, Shunji Kitamoto, Tatsuya T. Yamada, & Jun Fukue.* 426, 308, 100-A3 (1994)

Secondary Maxima of Black Hole X-Ray Transients: A Clue to Understanding X-Ray Irradiation. *S. Mineshige.* 431, L99, 191-F7 (1994)

Quiescent Accretion Disks in Black Hole X-Ray Novae. *Jerome A. Orosz, Charles D. Bailyn, Ronald A. Remillard, Jeffrey E. McClintock, & Craig B. Foltz.* 436, 848, 277-D3 (1994)

Constellation Name: GQ Muscae

On the Magnetic Nature of GQ Muscae. *M. P. Diaz & J. E. Steiner.* 425, 252, 83-D5 (1994)

The Soft X-Ray Turnoff of Nova Muscae 1983. *L. Shanley, H. Ögelman, J. S. Gallagher, M. Orio, & J. Krautter.* 438, L95, 20-A8 (1995)

Constellation Name: S Muscae

Absorption-Line Profiles in a Companion Spectrum of a Mass-losing Cool Supergiant. *Liliya L. Rodrigues & Erika Böhm-Vitense.* 401, 695, 231-B10 (1992)

Constellation Name: RS Ophiuchi

Theoretical Light Curve for the Recurrent Nova RS Ophiuchi—Determination of the White Dwarf Mass, Composition, and Distance. *Mariko Kato.* 369, 471, 43-E6 (1991)

Is Drag Luminosity Effective in Recurrent Novae? *Mariko Kato & Izumi Hachisu.* 373, 620, 95-F1 (1991)

Constellation Name: ζ Ophiuchi

Interstellar $^{12}C/^{13}C$ Ratio Revisited. *Philippe Crane, Dennis J. Hegyi, & David L. Lambert.* 378, 181, 153-C1 (1991)

Interstellar Gas Phase Abundance of Carbon, Oxygen, Nitrogen, Copper, Gallium, Germanium, and Krypton toward ζ Ophiuchi. *Jason A. Cardelli, Blair D. Savage, & Dennis C. Ebbets.* 383, L23, 219-D1 (1991)

Kinematics and Morphology of Material Occulting ζ Ophiuchi. *H. S. Liszt.* 390, 226, 76-G1 (1992)

Fractionation of CO in the Diffuse Clouds toward ζ Ophiuchi. *Yaron Sheffer, S. R. Federman, David L. Lambert, & Jason A. Cardelli.* 397, 482, 176-G3 (1992)

Ultraviolet Observations of the Gas Phase Abundances in the Diffuse Clouds toward ζ Ophiuchi at 3.5 Kilometers per Second Resolution. *Blair D. Savage, Jason A. Cardelli, & Ulysses J. Sofia.* 401, 706, 231-C9 (1992)

Abundance of Interstellar Carbon toward ζ Ophiuchi. *Jason A. Cardelli, John S. Mathis, Dennis C. Ebbets, & Blair D. Savage.* 402, L17, 6-D1 (1993)

Density, Temperature, and Isotopic Abundance in Molecular Gas around ζ Ophiuchi. *Harvey S. Liszt.* 414, 242, 173-A10 (1993)

Time-Series Observations of O Stars. II. Optical Observations of ζ Ophiuchi. *A. H. N. Reid, C. T. Bolton, R. A. Crowe, M. S. Fieldus, A. W. Fullerton, D. R. Gies, I. D. Howarth, D. McDavid, R. K. Prinja, & K. C. Smith.* 417, 320, 221-E1 (1993)

Time-Series Observations of O Stars. III. *IUE* and *HST* Spectroscopy of ζ Ophiuchi and Implications for the "Photospheric Connection." *Ian D. Howarth, C. T. Bolton, R. A. Crowe, D. C. Ebbets, M. S. Fieldus, A. W. Fullerton, D. R. Gies, D. McDavid, R. K. Prinja, A. H. N. Reid, S. N. Shore, & K. C. Smith.* 417, 338, 221-F10 (1993)

Interstellar Detection of the Intersystem Line Si II] λ2335 toward ζ Ophiuchi. *Jason A. Cardelli, Ulysses J. Sofia, Blair D. Savage, Francis P. Keenan, & Philip L. Dufton.* 420, L29, 7-D13 (1994)

Interstellar Carbon Monoxide toward ζ Ophiuchi. *David L. Lambert, Yaron Sheffer, Ronald L. Gilliland, & S. R. Federman.* 420, 756, 12-C10 (1994)

Al III, Si IV, and C IV Absorption toward ζ Ophiuchi: Evidence for Photoionized and Collisionally Ionized Gas. *Kenneth R. Sembach, Blair D. Savage, & Edward B. Jenkins.* 421, 585, 25-D12 (1994)

A Statistical Equilibrium Analysis of Interstellar CO toward ζ Ophiuchi as Recorded by the Goddard High Resolution Spectrograph. *Cheng-Hsuan Lyu, Andrew M. Smith, & Frederick C. Bruhweiler.* 426, 254, 99-C7 (1994)

HD 93521, ζ Ophiuchi, and the Effects of Rapid Rotation on the Atmospheres and Winds of O9.5 V Stars. *Derck Massa.* 438, 376, 6-F1 (1995)

Vibrationally Excited H_2, HCl, and NO^+ in the Diffuse Clouds toward ζ Ophiuchi. *S. R. Federman, Jason A. Cardelli, Ewine F. van Dishoeck, David L. Lambert, & J. H. Black.* 445, 325, 137-A4 (1995)

Atomic Physics with the Goddard High-Resolution Spectrograph on the *Hubble Space Telescope*. I. Oscillator Strengths for Neutral Sulfur. *S. R. Federman & Jason A. Cardelli.* 452, 269, 265-G6 (1995)

Constellation Name: ρ Ophiuchi

The Anomalous Extinction Curve in the Direction of ρ Ophiuchi from 950 to 1180 Å. *James C. Green, Theodore P. Snow, Timothy A. Cook, Webster C. Cash, & Orion Poplawski.* 395, 289, 143-E9 (1992)

Constellation Name: ρ Ophiuchi A

Submillimeter Continuum Observations of ρ Ophiuchi A: The Candidate Protostar VLA 1623 and Prestellar Clumps. *Philippe André, Derek Ward-Thompson, & Mary Barsony.* 406, 122, 56-F3 (1993)

Constellation Name: V2214 Ophiuchi 1988

Nova V2214 Ophiuchi 1988: A Magnetic Nova inside the Period Gap. *R. Baptista, F. J. Jablonski, D. Cieslinski, & J. E. Steiner.* 406, L67, 68-D9 (1993)

Constellation Name: 51 Ophiuchi

The Circumstellar Gas Surrounding 51 Ophiuchi: A Candidate Proto–Planetary System Similar to β Pictoris. *C. A. Grady & J. M. S. Silvis.* 402, L61, 12-G1 (1993)

Detection of Silicates in the 51 Ophiuchi System. *S. B. Fajardo-Acosta, C. M. Telesco, & R. F. Knacke.* 417, L33, 223-B9 (1993)

Constellation Name: α Orionis

Distribution of Dust about o Ceti and α Orionis Based on 11 Micron Spatial Interferometry. *M. Bester, W. C. Danchi, C. G. Degiacomi, C. H. Townes, & T. R. Geballe.* 367, L27, 17-E1 (1991)

The Temperature of the Circumstellar Envelope of Alpha Orionis. *Bernadette Rodgers & Alfred E. Glassgold.* 382, 606, 209-B1 (1991)

Spatially Resolved Spectra of Silicate Dust around α Orionis. *G. C. Sloan, G. L. Grasdalen, & Paul D. LeVan.* 404, 328, 32-A3 (1993)

Detection of O I and Si II Far-Infrared Fine-Structure Emission from α Orionis. *Michael R. Haas & Alfred E. Glassgold.* 410, L111, 126-C9 (1993)

Neutral Carbon in the Circumstellar Envelope of α Orionis. *P. J. Huggins, R. Bachiller, P. Cox, & T. Forveille.* 424, L127, 79-E5 (1994)

GHRS Observations of Cool, Low-Gravity Stars. I. The Far-Ultraviolet Spectrum of α Orionis (M2 Iab). *Kenneth G. Carpenter, Richard D. Robinson, Glenn M. Wahlgren, Jeffrey L. Linsky, & Alexander Brown.* 428, 329, 132-C6 (1994)

A 7 Micron Dust Emission Feature in Oxygen-rich Circumstellar Shells. *J. H. Goebel, J. D. Bregman, & F. C. Witteborn.* 430, 317, 163-B3 (1994)

Constellation Name: δ Orionis

ASCA Solid State Imaging Spectrometer Observations of O Stars. *M. F. Corcoran, W. L. Waldron, J. J. MacFarlane, W. Chen, A. M. T. Pollock, K. Torii, S. Kitamoto, N. Miura, M. Egoshi, & Y. Ohno.* 436, L95, 270-B1 (1994)

Constellation Name: λ Orionis

ASCA Solid State Imaging Spectrometer Observations of O Stars. *M. F. Corcoran, W. L. Waldron, J. J. MacFarlane, W. Chen, A. M. T. Pollock, K. Torii, S. Kitamoto, N. Miura, M. Egoshi, & Y. Ohno.* 436, L95, 270-B1 (1994)

Constellation Name: ι Orionis

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. IV. ι Orionis. *Douglas R. Gies, Michael S. Wiggs, & William G. Bagnuolo, Jr.* 403, 752, 25-B4 (1993)

Constellation Name: θ^1 Orionis C

A Large, Periodic Variation in the Stellar Wind of θ^1 Orionis C. *Nolan R. Walborn & Joy S. Nichols.* 425, L29, 85-E1 (1994)

ROSAT HRI Observations of Hot Stars in the Orion Nebula. *Jean-Pierre Caillault, Marc Gagné, & John R. Stauffer.* 432, 386, 198-A2 (1994)

Photoevaporating Stellar Envelopes Observed with Rayleigh Beacon Adaptive Optics. *P. R. McCullough, R. Q. Fugate, J. C. Christou, B. L. Ellerbroek, C. H. Higgins, J. M. Spinhirne, R. A. Cleis, & J. F. Moroney.* 438, 394, 6-G11 (1995)

Constellation Name: χ^1 Orionis

The Extreme Ultraviolet Coronal Spectrum of the Solar-Type Star χ^1 Orionis. *Bernhard Haisch, Jeremy J. Drake, & J. H. M. M. Schmitt.* 421, L39, 22-A5 (1994)

Constellation Name: FU Orionis

On the Near-Infrared Spectrum of FU Orionis. *Nuria Calvet, Lee Hartmann, & Scott J. Kenyon.* 383, 752, 223-E6 (1991)

On the Interpretation of the Spectrum of FU Orionis. *P. P. Petrov & G. H. Herbig.* 392, 209, 103-E1 (1992)

Optical Spectroscopy of Z Canis Majoris, V1057 Cygni, and FU Orionis: Accretion Disks and Signatures of Disk Winds. *Alan D. Welty, Stephen E. Strom, Suzan Edwards, Scott J. Kenyon, & Lee W. Hartmann.* 397, 260, 171-B11 (1992)

Constellation Name: AG Pegasi

AG Pegasi: A Multishell Radio Source. *H. T. Kenny, A. R. Taylor, & E. R. Seaquist.* 366, 549, 9-G7 (1991)

Constellation Name: τ Pegasi

τ Pegasi: A Fourier Representation of Line-Profile Variations. *E. J. Kennelly, G. A. H. Walker, & William J. Merryfield.* 400, L71, 220-E8 (1992)

Constellation Name: EE Pegasi

A Spectrum Synthesis Program for Binary Stars. *Albert P. Linnell & Ivan Hubeny.* 434, 738, 238-A4 (1994)

Constellation Name: EQ Pegasi

Extreme-Ultraviolet Spectroscopy and Photometry of EQ Pegasi. *Brunella C. Monsignori Fossi, Massimo Landini, Antonella Fruscione, & Jean Dupuis.* 449, 376, 215-C7 (1995)

Constellation Name: II Pegasi

Extreme Ultraviolet Explorer Observations of the RS Canum Venaticorum Systems AR Lacertae and II Pegasi. *R. J. Patterer, P. W. Vedder, P. Jelinsky, A. Brown, & S. Bowyer.* 414, L57, 185-B13 (1993)

Absolute Measurements of Starspot Area and Temperature: II Pegasi in 1989 October. *James E. Neff, Douglas O'Neal, & Steven H. Saar.* 452, 879, 276-G6 (1995)

Constellation Name: RU Pegasi

Concurrent X-Ray and Optical Observations of Two Dwarf Novae during Eruption. *A. Silber, S. D. Vrtilek, & J. C. Raymond.* 425, 829, 92-B1 (1994)

Constellation Name: α Persei

Ginga Observations of X-Ray Flares on Algol. *R. A. Stern, Y. Uchida, S. Tsuneta, & F. Nagase.* 400, 321, 212-G13 (1992)

Circumstellar Material in Algol: A Study of the Balmer Line Profiles. *Mercedes T. Richards.* 86, 255, 17-D3 (1993)

VLBI Astrometric Identification of the Radio-emitting Region in Algol and Determination of the Orientation of the Close Binary. *Jean-François Lestrade, Robert B. Phillips, Mark W. Hodges, & Robert A. Preston.* 410, 808, 123-G1 (1993)

High Angular Resolution Measurements of Algol. *Xiaopei Pan, Michael Shao, & M. Mark Colavita.* 413, L129, 169-C1 (1993)

Doppler Tomography of the Gas Stream in Short-Period Algol Binaries. *Mercedes T. Richards, Geary E. Albright, & Larissa M. Bowles.* 438, L103, 20-B8 (1995)

Hydrodynamic Simulations of the Mass Transfer in Algol. *John M. Blondin, Mercedes T. Richards, & Michael L. Malinowski.* 445, 939, 148-B13 (1995)

The Radial Velocity Variability of α Persei: A Low-Amplitude Cepheid outside the Instability Strip? *Artie P. Hatzes & William D. Cochran.* 452, 401, 267-E11 (1995)

Constellation Name: ϕ Persei

Tomographic Separation of Composite Spectra. III. Ultraviolet Detection of the Hot Companion of ϕ Persei. *Michelle L. Thaller, William G. Bagnuolo, Jr., Douglas R. Gies, & Laura R. Penny.* 448, 878, 207-A10 (1995)

Constellation Name: ζ Persei

The Interstellar $^{12}CN/^{13}CN$ Ratio toward ζ Persei. *Mary Elizabeth Kaiser, Isabel Hawkins, & Edward L. Wright.* 379, 267, 166-D1 (1991)

Constellation Name: ξ Persei

First Results from the Goddard High-Resolution Spectrograph: Element Abundances as a Function of Velocity in the Neutral Gas toward ξ Persei. *Blair D. Savage, Jason A. Cardelli, Frederick C. Bruhweiler, Andrew M. Smith, Dennis C. Ebbets, & Kenneth R. Sembach.* 377, L53, 143-F6 (1991)

First Results from the Goddard High-Resolution Spectrograph: Elemental Abundances in the Diffuse Clouds toward ξ Persei. *Jason A. Cardelli, Blair D. Savage, Frederick C. Bruhweiler, Andrew M. Smith, Dennis C. Ebbets, Kenneth R. Sembach, & Ulysses J. Sofia.* 377, L57, 143-F11 (1991)

Goddard High-Resolution Spectrograph Observations of Narrow Discrete Stellar Wind Absorption Features in the Ultraviolet Spectrum of the O7.5 III Star ξ Persei. *Steven N. Shore, Bruce Altner, C. T. Bolton, Jason A. Cardelli, & Dennis C. Ebbets.* 411, 864, 140-E5 (1993)

Constellation Name: GK Persei

Disk Instability and Outburst Properties of the Intermediate Polar GK Persei. *Soon-Wook Kim, J. Craig Wheeler, & Shin Mineshige.* 384, 269, 4-C7 (1992)

Disk Instability and the Time-dependent X-Ray Emission from the Intermediate Polar GK Persei. *Insu Yi, Soon-Wook Kim, Ethan T. Vishniac, & J. Craig Wheeler.* 391, L25, 92-B6 (1992)

On High Mass Accretion Rates in Magnetized Column Accretion onto White Dwarfs. *Insu Yi.* 422, 289, 33-F5 (1994)

Disk-Overflow Accretion in GK Persei? *Coel Hellier & Mario Livio.* 424, L57, 69-G12 (1994)

The Hard X-Ray Emission Spectra from Accretion Columns in Intermediate Polars. *Insu Yi & Ethan T. Vishniac.* 435, 829, 257-E1 (1994)

Nova Persei 1901: Detection of the Site of Its Brightest Light Echo. *R. W. Tweedy.* 438, 917, 16-F13 (1995)

Constellation Name: IX Persei

ASCA and *ROSAT* Observations of NRAO 140 and IX Persei. *T. J. Turner, I. M. George, G. M. Madejski, S. Kitamoto, & T. Suzuki.* 445, 660, 144-B11 (1995)

Constellation Name: V Persei

Eclipse Maps of the Accretion Disk in the Classical Nova V Persei. *Janet H. Wood, Timothy M. C. Abbott, & Allen W. Shafter.* 393, 729, 124-G10 (1992)

Constellation Name: X Persei

A Broad-Band X-Ray Telescope Spectrum of the Massive X-Ray Binary X Persei. *Eric M. Schlegel, Peter J. Serlemitsos, Keith Jahoda, Frank Marshall, Robert Petre, Elihu Boldt, Richard Mushotzky, Jean Swank, Andrew Szymkowiak, Alan Smale, & Kim Weaver.* 407, 744, 79-F13 (1993)

Constellation Name: 53 Persei

A Multisite *UBV* Photometric Campaign on 53 Persei in 1991 January. *L. Huang, Z. Guo, J. Hao, J. R. Percy, M. S. Fieldus, R. Fried, K Pavlovski, H. Božić, Ž. Ružić, M. Paparó, & B. Vetö.* 431, 850, 189-C5 (1994)

Constellation Name: Nova Persei 1992

SIGMA Observations of the Bright X-Ray Transient Nova Persei: A New Black Hole Candidate? *J. P. Roques, L. Bouchet, E. Jourdain, P. Mandrou, A. Goldwurm, J. Ballet, A. Claret, F. Lebrun, A. Finoguenov, E. Churazov, M. Gilfanov, R. Sunyaev, B. Novikov, I. Chulkov, N. Kuleshova, & I. Tserenin.* 92, 451, 37-G2 (1994)

Noise Variability of the Hard X-Ray Transient Nova Persei. *M. Denis, J.-F. Olive, P. Mandrou, J. P. Roques, J. Ballet, A. Goldwurm, Ph. Laurent, B. Cordier, A. Vikhlinin, E. Churazov, M. Gilfanov, R. Sunyaev, A. Dyachkov, N. Khavenson, R. Kremnev, & V. Kovtunenko.* 92, 459, 38-A1 (1994)

Hard X-Ray Variability of X-Ray Nova Persei 1992: *Granat*/SIGMA Results. *A. Vikhlinin, E. Churazov, M. Gilfanov, R. Sunyaev, A. Finoguenov, A. Dyachkov, R. Kremnev, K. Sukhanov, J. Ballet, A. Goldwurm,*

B. Cordier, A. Claret, M. Denis, J. F. Olive, J. P. Roques, & P. Mandrou. 441, 779, 72-F7 (1995)

Constellation Name: AI Phoenicis

The Eclipsing Binary AI Phoenicis: New Results Based on an Improved Light Curve Analysis Program. *E. F. Milone, C. R. Stagg, & R. L. Kurucz.* 79, 123, 14-E11 (1992)

Constellation Name: β Pictoris

Mass Outflow in the Nearby Proto–Planetary System β Pictoris. *Frederick C. Bruhweiler, Yoji Kondo, & C. A. Grady.* 371, L27, 66-D7 (1991)

Infrared Observations and Thermal Models of the β Pictoris Disk. *D. E. Backman, F. C. Gillett, & F. C. Witteborn.* 385, 670, 21-D8 (1992)

Coronagraphic Imaging of the β Pictoris Circumstellar Disk: Evidence of Changing Disk Structure within 100 AU. *David A. Golimowski, Samuel T. Durrance, & Mark Clampin.* 411, L41, 134-B6 (1993)

The Silicates in the Disk of β Pictoris. *R. F. Knacke, S. B. Fajardo-Acosta, C. M. Telesco, J. A. Hackwell, D. K. Lynch, & R. W. Russell.* 418, 440, 236-D13 (1993)

HST/GHRS Observations of the β Pictoris System: Basic Parameters of the Age of the System. *Thierry Lanz, Sara R. Heap, & Ivan Hubeny.* 447, L41, 181-B5 (1995)

Constellation Name: AY Piscium

A Spectroscopic Study of DV Ursae Majoris (US 943), AY Piscium (PG 0134+070), and V503 Cygni. *Paula Szkody & Steve B. Howell.* 403, 743, 25-A6 (1993)

Constellation Name: TX Piscium

Dust Temperatures in the Circumstellar Shell of TX Piscium. *J. Wirsich.* 377, 285, 141-E1 (1991)

A Deep Envelope Composition for TX Piscium? *J. H. Goebel, D. Goorvitch, H. P. Larson, & D. R. Alexander.* 402, 680, 11-B1 (1993)

The Photodissociation of Circumstellar HCN and SiS. *J. Wirsich.* 424, 370, 66-D14 (1994)

Constellation Name: VZ Piscium

A Study of the Chromospherically Active, Short-Period Binary VZ Piscium. *Bruce J. Hrivnak, Edward F. Guinan, & Wenxian Lu.* 455, 300, 322-C8 (1995)

Constellation Name: ζ Puppis

Time Series Observations of O Stars. I. *IUE* Observations of Variability in the Stellar Wind of ζ Puppis. *R. K. Prinja, L. A. Balona, C. T. Bolton, R. A. Crowe, M. S. Fieldus, A. W. Fullerton, D. R. Gies, I. D. Howarth, D. McDavid, & A. H. N. Reid.* 390, 266, 77-C6 (1992)

Broad-Band X-Ray Telescope Spectroscopy of ζ Puppis. *M. F. Corcoran, J. H. Swank, P. J. Serlemitsos, E. Boldt, R. Petre, F. E. Marshall, K. Jahoda, R. Mushotzky, A. Szymkowiak, K. Arnaud, A. P. Smale, K. Weaver, & S. S. Holt.* 412, 792, 153-F1 (1993)

Evolution of Solitary Density Waves in Stellar Winds of Early-Type Stars: A Simple Explanation of Discrete Absorption Component Behavior. *Wayne L. Waldron, Larry Klein, & Bruce Altner.* 426, 725, 107-D10 (1994)

Constellation Name: CP Puppis

CP Puppis: No Ordinary Old Nova. *James C. White II, R. Kent Honeycutt, & Keith Horne.* 412, 278, 145-E6 (1993)

ROSAT Observation of the Old Classical Nova CP Puppis. *Şölen Balman, Marina Orio, & Hakki Ögelman.* 449, L47, 216-F11 (1995)

Constellation Name: VV Puppis

The Quasi-periodic Oscillations of VV Puppis. *James N. Imamura, John Middleditch, Jeffrey D. Scargle, Thomas Y. Steiman-Cameron, Laura A. Whitlock, Michael T. Wolff, & Kent S. Wood.* 419, 793, 257-E1 (1993)

Extreme Ultraviolet Spectroscopy and Photometry of VV Puppis during a High Accretion State. *Stéphane Vennes, Paula Szkody, Edward M. Sion, & Knox S. Long.* 445, 921, 148-A1 (1995)

Constellation Name: V347 Puppis

Optical, *IUE*, and *ROSAT* Observations of the Eclipsing Nova-like Variable V347 Puppis (LB 1800). *Christopher W. Mauche, John C. Raymond, David A. H. Buckley, Martine Mouchet, Jerry Bonnell, Denis J. Sullivan, Jean-Marc Bonnet-Bidaud, & Wolfram H. Bunk.* 424, 347, 66-B12 (1994)

Constellation Name: T Pyxidis

Is Drag Luminosity Effective in Recurrent Novae? *Mariko Kato & Izumi Hachisu.* 373, 620, 95-F1 (1991)

The Photometric Period of the Recurrent Nova T Pyxidis. *Bradley E. Schaefer, Arlo U. Landolt, Nikolaus Vogt, David Buckley, Brian Warner, Alistair R. Walker, & Howard E. Bond.* 81, 321, 39-C9 (1992)

Constellation Name: FG Sagittae

The Infrared Temporal Evolution of FG Sagittae. *Charles E. Woodward, G. F. Lawrence, R. D. Gehrz, Terry J. Jones, H. A. Kobulnicky, James Cole, Tracy Hodge, & Harley A. Thronson, Jr.* 408, L37, 89-B8 (1993)

Constellation Name: U Sagittae

IUE Investigation of Mass Flow in the Interacting Binary U Sagittae. *George E. McCluskey, Jr., Carolina Paciencia Salas McCluskey, & Yoji Kondo.* 378, 281, 154-D9 (1991)

Doppler Tomography of the Gas Stream in Short-Period Algol Binaries. *Mercedes T. Richards, Geary E. Albright, & Larissa M. Bowles.* 438, L103, 20-B8 (1995)

The Transient Accretion Disk in the Algol-Type Binary U Sagittae. *Geary E. Albright & Mercedes T. Richards.* 441, 806, 73-B2 (1995)

Constellation Name: WZ Sagittae

Hubble Space Telescope FOS Spectroscopy of the Ultrashort-Period Dwarf Nova WZ Sagittae: The Underlying Degenerate. *Edward M. Sion, F. H. Cheng, Knox S. Long, Paula Szkody, Ron L. Gilliland, Min Huang, & Ivan Hubeny.* 439, 957, 37-G3 (1995)

Constellation Name: RY Sagittarii

An Ultraviolet and Visible Spectroscopic Study of a Pulsational Cycle of RY Sagittarii. *Geoffrey C. Clayton, W. A. Lawson, P. L. Cottrell, Barbara A. Whitney, S. Adam Stanford, & Frank de Ruyter.* 432, 785, 205-F13 (1994)

Constellation Name: VX Sagittarii

Interferometric Observations of the SiO Masers and Dust Shell of VX Sagittarii. *L. J. Greenhill, F. Colomer, J. M. Moran, D. C. Backer, W. C. Danchi, & M. Bester.* 449, 365, 215-B7 (1995)

Constellation Name: V505 Sagittarii

Secondaries of Eclipsing Binaries. VII. The Spectroscopic Triple and Visual Double V505 Sagittarii. *Jocelyn Tomkin.* 387, 631, 46-E1 (1992)

Constellation Name: Scorpius X-1

The Ultraviolet Spectrum of Scorpius X-1 as Observed by *IUE*: 1978–1988. *T. R. Kallman, J. C. Raymond, & S. D. Vrtilek.* 370, 717, 57-C11 (1991)

Observations of Scorpius X-1 with *IUE*: Ultraviolet Results from a Multiwavelength Campaign. *S. D. Vrtilek, W. Penninx, J. C. Raymond, F. Verbunt, P. Hertz, K. Wood, W. H. G. Lewin, & K. Mitsuda.* 376, 278, 128-D1 (1991)

The Radio "Lobes" of Scorpius X-1 Are Unrelated Background Sources. *E. B. Fomalont & B. J. Geldzahler.* 383, 289, 215-G1 (1991)

Hard X-Ray Observation of Scorpius X-1. *P. Ubertini, A. Bazzano, M. Cocchi, C. La Padula, & R. K. Sood.* 386, 710, 34-B4 (1992)

X-Ray Variability of Scorpius X-1 during a Multiwavelength Campaign. *P. Hertz, B. Vaughan, K. S. Wood, J. P. Norris, K. Mitsuda, P. F. Michelson, & T. Dotani.* 396, 201, 157-E12 (1992)

Compton Reflection in Scorpius X-1 and Cygnus X-3? *Michael Maisack, Eckhard Kendziorra, Hongchao Pan, Gerry Skinner, Jakob Englhauser, Claus Reppin, Valeri Efremov, & Rashid Sunyaev.* 92, 473, 38-B7 (1994)

A Search for an X-Ray Scattering Halo around Scorpius X-1. *Dennis Gallagher, Webster Cash, & James Green.* 439, 976, 38-B2 (1995)

Constellation Name: α Scorpii

Direct Measurement of the Inner Radius of the Dust Shell around the Cool Supergiant Star α Scorpii. *E. E. Bloemhof & R. M. Danen.* 440, L93, 58-C2 (1995)

Constellation Name: π Scorpii

Ultraviolet Interstellar Lines in the Spectrum of π Scorpii Recorded at 2 Kilometers per Second Resolution. *Charles L. Joseph & Edward B. Jenkins.* 368, 201, 25-E9 (1991)

Dense Clumps of Ionized Gas near π Scorpii, as Revealed by the Fine-Structure Excitation of N II. *Frank Bertoldi & Edward B. Jenkins.* 388, 495, 56-D9 (1992)

Constellation Name: U Scorpii

Is Drag Luminosity Effective in Recurrent Novae? *Mariko Kato & Izumi Hachisu.* 373, 620, 95-F1 (1991)

Spectroscopy of the Recurrent Nova U Scorpii. *Helen M. Johnston & Shrinivas R. Kulkarni.* 396, 267, 158-D4 (1992)

An Improved Orbital Period for the Recurrent Nova U Scorpii. *Bradley E. Schaefer & F. A. Ringwald.* 447, L45, 181-C1 (1995)

Constellation Name: T Scorpii

Cataclysmic and Close Binaries in Star Clusters. III. Recovery of the Quiescent Nova 1860 A.D. (T Scorpii) in the Core of the Globular Cluster M80. *Michael M. Shara & Laurent Drissen.* 448, 203, 195-A1 (1995)

Constellation Name: V926 Scorpii

A Study of the Hα Line in X1735−444. *Alan P. Smale & Robin H. D. Corbet.* 383, 853, 224-G6 (1991)

Constellation Name: R Scuti

Period Changes and Evolution in RV Tauri Stars. *John R. Percy, Dimitar D. Sasselov, Amy Alfred, & Greg Scott.* 375, 691, 121-C7 (1991)

Constellation Name: RY Scuti

RY Scuti: Infrared and Radio Observations of the Mass-Loss Wind of a Massive Binary Star System. *R. D. Gehrz, T. L. Hayward, J. R. Houck, J. W. Miles, R. M. Hjellming, T. J. Jones, Charles E. Woodward, Ricarda Prentice, W. J. Forrest, S. Libonate, & S. Solomon.* 439, 417, 26-G11 (1995)

Constellation Name: NN Serpentis

IUE Spectra of the Eclipsing Binary NN Serpentis. *Janet H. Wood & Thomas R. Marsh.* 381, 551, 197-E1 (1991)

Constellation Name: W Serpentis

Goddard High-Resolution Spectrograph Observations of the Interacting Binary System W Serpentis. *J. L. Weiland, S. N. Shore, E. A. Beaver, R. W. Lyons, & E. I. Rosenblatt.* 447, 401, 177-G13 (1995)

Constellation Name: α Tauri

First Results from the Goddard High-Resolution Spectrograph: The Chromosphere of α Tauri. *Kenneth G. Carpenter, Richard D. Robinson, Glenn M. Wahlgren, Thomas B. Ake, Dennis C. Ebbets, Jeffrey L. Linsky, Alexander Brown, & Frederick M. Walter.* 377, L45, 143-E11 (1991)

First Ultraviolet Spectropolarimetry of Be Stars from the Wisconsin Ultraviolet Photo-Polarimeter Experiment. *K. S. Bjorkman, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, G. C. Clayton, A. M. Magalhães, M. R. Meade, M. A. Nook, R. E. Schulte-Ladbeck, M. Taylor, & B. A. Whitney.* 383, L67, 226-E1 (1991)

Chromospheric Heating by Acoustic Shocks: A Confrontation of GHRS Observations of α Tauri (K5 III) with Ab Initio Calculations. *P. G. Judge & M. Cuntz.* 409, 776, 108-F13 (1993)

The "Monochromatic Density Diagnostic" Technique: First Detection of Multiple Density Components in the Chromosphere of α Tauri. *P. G. Judge.* 430, 351, 163-E5 (1994)

Constellation Name: ζ Tauri

First Ultraviolet Spectropolarimetry of Be Stars from the Wisconsin Ultraviolet Photo-Polarimeter Experiment. *K. S. Bjorkman, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, G. C. Clayton, A. M. Magalhães, M. R. Meade, M. A. Nook, R. E. Schulte-Ladbeck, M. Taylor, & B. A. Whitney.* 383, L67, 226-E1 (1991)

Constellation Name: BP Tauri

The Lithium Abundance of the T Tauri Star BP Tauri. *Douglas K. Duncan.* 373, 250, 89-B1 (1991)

Constellation Name: CW Tauri

Subarcsecond Images of CW Tauri: Constraints on Disk Size and Jet Formation. *Ana I. Gómez de Castro.* 412, L43, 148-E5 (1993)

Constellation Name: DD Tauri

Resolving the Forbidden-Line Emission Regions of Young Stellar Objects: DD Tauri. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 397, L107, 181-D7 (1992)

Constellation Name: DG Tauri

10 AU Scale Halo Structure around DG Tauri. *Wen Ping Chen, R. R. Howell, M. Simon, & J. A. Benson.* 387, L43, 43-E8 (1992)

High-Resolution Long-Slit Spectral Imaging of the Mass Outflows in the Immediate Vicinity of DG Tauri. *J. Solf & K. H. Böhm.* 410, L31, 118-F13 (1993)

Hubble Space Telescope Images of the Subarcsecond Jet in DG Tauri. *J. Kepner, P. Hartigan, C. Yang, & S. Strom.* 415, L119, 200-C8 (1993)

Constellation Name: DM Tauri

Detection of a Circumstellar Gas around DM Tauri: A Protoplanetary Disk around a Single Star? *Toshihiro Handa, Shoken M. Miyama, Takuya Yamashita, Toshihiro Omodaka, Yoshimi Kitamura, Masahiko Hayashi, Toshikazu Onishi, Ronald L. Snell, Stephen E. Strom, Karen M. Strom, Michael F. Skrutskie, Suzan Edwards, Nagayoshi Ohashi, Kazuyoshi Sunada, Masao Saito, Yasuo Fukui, Akira Mizuno, Jun-ichi Watanabe, & Hirokazu Kataza.* 449, 894, 225-B1 (1995)

Constellation Name: DO Tauri

Asymmetries in Bipolar Jets from Young Stars. *Gerhard A. Hirth, Reinhard Mundt, Josef Solf, & Thomas P. Ray.* 427, L99, 127-B11 (1994)

Aperture Synthesis Imaging of the Circumstellar Dust Disk around DO Tauri. *D. W. Koerner, C. J. Chandler, & A. I. Sargent.* 452, L69, 270-E14 (1995)

Radio Continuum Detection of the Exciting Sources of the DG Tauri B and L1551NE Outflows. *Luis F. Rodríguez, Guillem Anglada, & Alejandro Raga.* 454, L149, 316-F5 (1995)

Constellation Name: DP Tauri

Asymmetries in Bipolar Jets from Young Stars. *Gerhard A. Hirth, Reinhard Mundt, Josef Solf, & Thomas P. Ray.* 427, L99, 127-B11 (1994)

Constellation Name: FM Tauri

Subarcsecond Images of CW Tauri: Constraints on Disk Size and Jet Formation. *Ana I. Gómez de Castro.* 412, L43, 148-E5 (1993)

Constellation Name: GG Tauri

Gas and Dust in the Pre–Main-Sequence Multiple System GG Tauri. *D. W. Koerner, A. I. Sargent, & S. V. W. Beckwith.* 408, L93, 95-D7 (1993)

Detection of Circumstellar Gas Associated with GG Tauri. *M. F. Skrutskie, R. L. Snell, K. M. Strom, S. E. Strom, S. Edwards, Y. Fukui, A. Mizuno, M. Hayashi, & N. Ohashi.* 409, 422, 102-C1 (1993)

Constellation Name: HL Tauri

Upper Limits to the Detection of Ammonia from Protoplanetary Disks around HL Tauri and L1551-IRS 5. *José F. Gómez, José M. Torrelles, Paul T. P. Ho, Luis F. Rodríguez, & Jorge Cantó.* 414, 333, 174-B6 (1993)

Is HL Tauri an FU Orionis System in Quiescence? *D. N. C. Lin, M. Hayashi, K. R. Bell, & N. Ohashi.* 435, 821, 257-D4 (1994)

Vertical Disk Structure in HL Tauri. *Steven V. W. Beckwith & Christoph C. Birk.* 449, L59, 217-A4 (1995)

WFPC2 Imaging of the Circumstellar Nebulosity of HL Tauri. *Karl R. Stapelfeldt, Christopher J. Burrows, John E. Krist, John T. Trauger, J. Jeff Hester, Jon A. Holtzman, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, John S. Gallagher III, Richard E. Griffiths, John G. Hoessel, Jeremy R. Mould, Paul A. Scowen, Alan M. Watson, & James A. Westphal.* 449, 888, 225-A4 (1995)

Constellation Name: IK Tauri

Detection of Ammonia Emission toward Oxygen-rich Evolved Stars. *Karl M. Menten & Javier Alcolea.* 448, 416, 197-G10 (1995)

Constellation Name: T Tauri

Near-Infrared Polarized Images of a Nebula around T Tauri. *David A. Weintraub, Joel H. Kastner, B. Zuckerman, & Ian Gatley.* 391, 784, 97-F7 (1992)

A Sub-Arcsecond–Scale Spectroscopic Study of the Complex Mass Outflows in the Vicinity of T Tauri. *K.-H. Böhm & J. Solf.* 430, 277, 162-E6 (1994)

Constellation Name: UZ Tauri

10 Micron Imaging of UZ Tauri: Evidence for Circumstellar Disk Clearing due to a Close Companion Star. *A. M. Ghez, J. P. Emerson, J. R. Graham, M. Meixner, & C. J. Skinner.* 434, 707, 237-E3 (1994)

Constellation Name: V410 Tauri

Doppler Imaging of the Cool Spot Distribution on the Weak T Tauri Star V410 Tauri. *Artie P. Hatzes.* 451, 784, 258-A6 (1995)

Constellation Name: V471 Tauri

Inefficient Accretion by the DA2 White Dwarf in V471 Tauri. *D. J. Mullan, H. L. Shipman, E. M. Sion, & J. MacDonald.* 374, 707, 107-G8 (1991)

Evidence for External Plasma around the K Dwarf Component of the Eclipsing Binary V471 Tauri. *Arthur Young, Lee Rottler, & Andrew Skumanich.* 378, L25, 157-D1 (1991)

Whole Earth Telescope Observations of V471 Tauri: The Nature of the White Dwarf Variations. *J. C. Clemens, R. E. Nather, D. E. Winget, E. L. Robinson, M. A. Wood, C. F. Claver, J. Provencal, S. J. Kleinman, P. A. Bradley, M. L. Frueh, A. D. Grauer, B. P. Hine, G. Fontaine, N. Achilleos, D. T. Wickramasinghe, T. M. K. Marar, S. Seetha, B. N. Ashoka, D. O'Donoghue, B. Warner, D. W. Kurtz, P. Martinez, G. Vauclair, M. Chevreton, M. A. Barstow, A. Kanaan, S. O. Kepler, T. Augusteijn, J. van Paradijs, & C. J. Hansen.* 391, 773, 97-E8 (1992)

Clumping and Mass Loss in Hot Star Winds. *Anthony F. J. Moffat & Carmelle Robert.* 421, 310, 19-G1 (1994)

Constellation Name: V773 Tauri

Subarcsecond Images of CW Tauri: Constraints on Disk Size and Jet Formation. *Ana I. Gómez de Castro.* 412, L43, 148-E5 (1993)

Constellation Name: 51 Tauri

MAP-based Trigonometric Parallaxes of Open Clusters. II. The Hyades: 51 Tauri. *George Gatewood, Michael Castelaz, Joost Kiewiet de Jonge, Timothy Persinger, John Stein, & Bruce Stephenson.* 392, 710, 111-A12 (1992)

Constellation Name: RR Telescopii

Al II Emission-Line Strengths in Low-Density Astrophysical Plasmas. *F. P. Keenan, L. K. Harra, K. M. Aggarwal, & W. A. Feibelman.* 385, 375, 16-E1 (1992)

An Improved Ultraviolet Spectral Line List for the Symbiotic Star RR Telescopii. *G. A. Doschek & W. A. Feibelman.* 87, 331, 31-C7 (1993)

IUE Short-Wavelength High-Dispersion Line List for the Symbiotic Nova RR Telescopii. *Jason P. Aufdenberg.* 87, 337, 31-D3 (1993)

Transition Probabilities for the UV0.01 Multiplet in N III. *Tomas Brage, Charlotte Froese Fischer, & Philip G. Judge.* 445, 457, 138-G7 (1995)

Simultaneous Observation of Direct and Raman-scattered O VI Lines in the Symbiotic Nova RR Telescopii. *Brian R. Espey, Regina E. Schulte-Ladbeck, Gerard A. Kriss, Fred Hamann, Hans M. Schmid, & Joni J. Johnson.* 454, L61, 308-D8 (1995)

Constellation Name: Triangulum Australe X-1

SIGMA Observation of Hard X-Ray Emission from the Ultrasoft X-Ray Transient Triangulum Australe X-1 (A1524−62). *D. Barret, J. P. Roques, P. Mandrou, L. Bouchet, F. Lebrun, A. Goldwurm, P. Laurent, J. Paul, R. Sunyaev, E. Churazov, M. Gilfanov, A. Diachkov, N. Kavenson, B. Novikov, I. Chulkov, & A. Kuznetsov.* 392, L19, 106-C7 (1992)

Constellation Name: α Trianguli Australis

X-Ray Emission on Hybrid Stars: *ROSAT* Observations of α Trianguli Australis and ι Aurigae. *V. Kashyap, R. Rosner, F. R. Harnden, Jr., A. Maggio, G. Micela, & S. Sciortino.* 431, 402, 181-A13 (1994)

A Semiempirical Determination of the Wind Velocity Structure for the Hybrid-Chromosphere Star α Trianguli Australis. *Graham M. Harper, Brian E. Wood, Jeffrey L. Linsky, Philip D. Bennett, Thomas R. Ayres, & Alexander Brown.* 452, 407, 267-F6 (1995)

Constellation Name: KX Trianguli Australis

The Ultraviolet Spectrum of KX Trianguli Australis. *Walter A. Feibelman.* 375, 335, 115-A12 (1991)

Constellation Name: BS 47 Tuscanae

Observations of the Ultraviolet-Bright Star in 47 Tucanae with the Hopkins Ultraviolet Telescope. *W. Van Dyke Dixon, Arthur F. Davidsen, & Henry C. Ferguson.* 454, L47, 308-B9 (1995)

Constellation Name: π^1 Ursae Majoris

ASCA X-Ray Spectra of the Active Single Stars β Ceti and π^1 Ursae Majoris. *S. A. Drake, K. P. Singh, N. E. White, & Theodore Simon.* 436, L87, 269-G11 (1994)

Constellation Name: υ Ursae Majoris

Nightly Variations of Nonradial Oscillations in the Delta Scuti Star υ Ursae Majoris. *S. G. Korzennik, R. W. Noyes, T. Brown, P. Nisenson, & S. Horner.* 443, L25, 102-E7 (1995)

Constellation Name: SU Ursae Majoris

Concurrent X-Ray and Optical Observations of Two Dwarf Novae during Eruption. *A. Silber, S. D. Vrtilek, & J. C. Raymond.* 425, 829, 92-B1 (1994)

Constellation Name: SW Ursae Majoris

Ultraviolet Observations of SW Ursae Majoris, BC Ursae Majoris, and TV Corvi (1217–18): *IUE* Spectroscopy and Outburst Light Curves. *Steve B. Howell, Paula Szkody, George Sonneborn, Robert Fried, Janet Mattei, Ronald J. Oliversen, Doug Ingram, & Guy M. Hurst.* 453, 454, 287-D1 (1995)

Constellation Name: W Ursae Majoris

A Light Synthesis Study of W Ursae Majoris. *Albert P. Linnell.* 374, 307, 102-A1 (1991)

The Ultraviolet Light Curves of W Ursae Majoris. *Albert P. Linnell.* 379, 338, 167-C3 (1991)

A Test of the Starspot Hypothesis for W-Type W Ursae Majoris Light Curves. *Albert P. Linnell.* 383, 330, 216-C8 (1991)

Constellation Name: B Ursae Majoris

Ultraviolet Observations of SW Ursae Majoris, BC Ursae Majoris, and TV Corvi (1217–18): *IUE* Spectroscopy and Outburst Light Curves. *Steve B. Howell, Paula Szkody, George Sonneborn, Robert Fried, Janet Mattei, Ronald J. Oliversen, Doug Ingram, & Guy M. Hurst.* 453, 454, 287-D1 (1995)

Constellation Name: BE Ursae Majoris

The Spectacular Emission-Line Reflection Effect of BE Ursae Majoris. *Donald H. Ferguson & Thomas A. James.* 94, 723, 62-A1 (1994)

BE Ursae Majoris: Precataclysmic Binary System and Planetary Nucleus. *James Liebert, R. W. Tweedy, R. Napiwotzki, & M. S. Fulbright.* 441, 424, 65-B11 (1995)

Constellation Name: DV Ursae Majoris

A Spectroscopic Study of DV Ursae Majoris (US 943), AY Piscium (PG 0134+070), and V503 Cygni. *Paula Szkody & Steve B. Howell.* 403, 743, 25-A6 (1993)

Constellation Name: TX Ursae Majoris

Circumstellar Material in TX Ursae Majoris. *Geary E. Albright & Mercedes T. Richards.* 414, 830, 181-E6 (1993)

Constellation Name: UX Ursae Majoris

Hubble Space Telescope and *R*-Band Eclipse Maps of the UX Ursae Majoris Accretion Disk. *R. Baptista, Keith Horne, R. W. Hilditch, K. O. Mason, & J. E. Drew.* 448, 395, 197-E13 (1995)

Constellation Name: α Ursae Minoris

Goodbye to Polaris the Cepheid. *J. D. Fernie, Karl W. Kamper, & S. Seager.* 416, 820, 213-F1 (1993)

Constellation Name: Vela X-1

Upper Limits on TeV Gamma-Ray Emission from Centaurus A, Vela X-1, Centaurus X-3, and Circinus X-1. *W. H. Allen, I. A. Bond, E. Budding, M. J. Conway, A. Daniel, K. B. Fenton, H. Fujii, Z. Fujii, N. Hayashida, K. Hibino, M. Honda, J. E. Humble, S. Kabe, K. Kasahara, T. Kifune, G. D. Lythe, A. Masaike, Y. Matsubara, K. Mitsui, Y. Miura, M. Mori, Y. Muraki, M. Nagano, T. Nakamura, M. Nishizawa, P. M. Norris, S. Ogio, To. Saito, M. Sakata, H. Sato, H. M. Shimizu, M. Spencer, J. R. Storey, T. Tanimori, M. Teshima, S. Torii, A. Wadsworth, Y. Watase, M. D. Woodhams, Y. Yamamoto, P. C. M. Yock, & T. Yuda (The JANZOS Collaboration).* 405, 554, 50-A1 (1993)

TeV Gamma-Ray Properties of Vela X-1. *B. C. Raubenheimer, A. R. North, O. C. de Jager, P. J. Meintjes, & H. I. Nel.* 428, 777, 140-A1 (1994)

Variable Soft X-Ray Absorption and Excess of Vela X-1. *H. C. Pan, P. Kretschmar, G. K. Skinner, E. Kendziorra, R. A. Sunyaev, & K. N. Borozdin.* 92, 448, 37-F11 (1994)

Constellation Name: γ_2 Velorum

Ultraviolet Observations of Selective Wind Eclipses in γ Velorum and Evidence for Colliding Winds. *N. St-Louis, A. J. Willis, & I. R. Stevens.* 415, 298, 188-F8 (1993)

Constellation Name: KO Velorum

A New Candidate Orbital Period for KO Velorum (E1013−477). *K. Mukai & R. H. D. Corbet.* 378, 701, 161-B3 (1991)

X-Ray to Infrared Observations of the Cataclysmic Variable KO Velorum (E1013−477). *R. M. Sambruna, L. Chiappetti, A. Treves, J. M. Bonnet-Bidaud, P. Bouchet, L. Maraschi, C. Motch, M. Mouchet, & S. Van Amerongen.* 391, 750, 97-C9 (1992)

Constellation Name: IX Velorum

High-Resolution *IUE* Spectra of the Nova-like Variable IX Velorum. *Christopher W. Mauche.* 373, 624, 95-F7 (1991)

Observations of the Bright Novalike Variable IX Velorum with the Hopkins Ultraviolet Telescope. *Knox S. Long, Richard A. Wade, William P. Blair, Arthur F. Davidsen, & Ivan Hubeny.* 426, 704, 107-B13 (1994)

Constellation Name: Nova Velorum 1993

Minioutbursts from the Black Hole Candidate Nova Velorum 1993. *Charles D. Bailyn & Jerome A. Orosz.* 440, L73, 57-G8 (1995)

Constellation Name: H Virginis

The 1992 Outburst of the SU Ursae Majoris–Type Dwarf Nova HV Virginis. *Elia M. Leibowitz, Haim Mendelson, Albert Bruch, Hilmar W. Duerbeck, Waltraut C. Seitter, & Gerold A. Richter.* 421, 771, 27-G3 (1994)

Constellation Name: PW Vulpeculae

PW Vulpeculae: A Nova with Nearly Solar Abundances. *Pedro Saizar, Sumner Starrfield, Gary J. Ferland, R. Mark Wagner, James W. Truran, Scott J.*

Kenyon, Warren M. Sparks, Robert E. Williams, & L. L. Stryker. 367, 310, 15-G11 (1991)

Constellation Name: QU Vulpeculae

A Multiwavelength Study of Nova QU Vulpeculae 1984. *Pedro Saizar, Sumner Starrfield, Gary J. Ferland, R. Mark Wagner, James W. Truran, Scott J. Kenyon, Warren M. Sparks, Robert E. Williams, & L. L. Stryker.* 398, 651, 192-B13 (1992)

Hot Gas and the Origin of the Nebular Continuum in Novae. *Pedro Saizar & Gary J. Ferland.* 425, 755, 91-B10 (1994)

QU Vulpeculae: An Eclipsing Neon Nova in the Period Gap. *A. W. Shafter, K. A. Misselt, P. Szkody, & M. Politano.* 448, L33, 199-F13 (1995)

Constellation Name: QV Vulpeculae

The Peculiar Infrared Temporal Development of Nova Vulpeculae 1987 (QV Vulpeculae). *R. D. Gehrz, T. J. Jones, C. E. Woodward, M. A. Greenhouse, R. M. Wagner, T. E. Harrison, T. L. Hayward, & J. Benson.* 400, 671, 218-G1 (1992)

Constellation Name: RS Vulpeculae

Doppler Tomography of the Gas Stream in Short-Period Algol Binaries. *Mercedes T. Richards, Geary E. Albright, & Larissa M. Bowles.* 438, L103, 20-B8 (1995)

Bright Star Number: HR 10

A Search for Circumstellar Dust around HR 10, a Proposed β Pictoris Star. *Kwang-Ping Cheng, C. A. Grady, & Frederick C. Bruhweiler.* 366, L87, 11-E7 (1991)

Bright Star Number: HR 1362

HR 1362: The Evolved 53 Camelopardalis. *K. Stępień.* 416, 368, 205-E11 (1993)

Bright Star Number: HR 3126

An Infrared Study of the Remarkable Dusty M Star HR 3126. *J. E. Chiar, D. C. B. Whittet, D. K. Aitken, P. F. Roche, C. H. Smith, H. J. Walker, P. A. Whitelock, & C. Wright.* 409, 404, 102-A8 (1993)

Bright Star Number: HR 4796

The Fate of the Solid Matter Orbiting HR 4796A. *M. Jura, A. M. Ghez, Russel J. White, D. W. McCarthy, R. C. Smith, & P. G. Martin.* 445, 451, 138-F11 (1995)

An Age Estimate for the β Pictoris Analog HR 4796A. *John R. Stauffer, Lee W. Hartmann, & David Barrado y Navascues.* 454, 910, 314-D1 (1995)

Bright Star Number: HR 8427

The Equations of Ellipsoidal Star Variability Applied to HR 8427. *Steven L. Morris & Stephen A. Naftilan.* 419, 344, 250-D13 (1993)

Henry Draper Number: HD 108

A Study of the Spectrum of HD 108, An Unusual Of Star. *Anne B. Underhill.* 420, 869, 13-F6 (1994)

A Study of the Spectrum of HD 108, An Unusual Of Star. *Anne B. Underhill.* 420, 869, 13-F6 (1994)

Henry Draper Number: HD 698

The Orbital Parameters and the *IUE* Spectrum of the Single-lined Spectroscopic Binary HD 698. *Jorge Sahade, Rodolfo Barbá, & Yoji Kondo.* 81, 303, 39-B1 (1992)

Henry Draper Number: HD 2909

Study of Spectroscopic Binaries with TODCOR. II. The Highly Eccentric Binary HD 2909. *Tsevi Mazeh, Shay Zucker, Dorit Goldberg, David W. Latham, Robert P. Stefanik, & Bruce W. Carney.* 449, 909, 225-C10 (1995)

Henry Draper Number: HD 5980

Remarkable Long-Term Changes in the Small Magellanic Cloud Wolf-Rayet System HD 5980. *G. Koenigsberger, A. F. J. Moffat, N. St-Louis, L. H. Auer, L. Drissen, & W. Seggewiss.* 436, 301, 265-D8 (1994)

Ultraviolet Observations of the Eruption in the Small Magellanic Cloud Wolf-Rayet System HD 5980. *Gloria Koenigsberger, Ed Guinan, Lawrence Auer, & Leonid Georgiev.* 452, L107, 279-G11 (1995)

Henry Draper Number: HD 6833

Discovery of a Fast Wind from a Field Population II Giant Star. *A. K. Dupree, Dimitar D. Sasselov, & John B. Lester.* 387, L85, 48-D11 (1992)

Henry Draper Number: HD 7252

Ultraviolet Interstellar Polarization Observed with the *Hubble Space Telescope*. *W. B. Somerville, R. G. Allen, D. J. Carnochan, Lida He, D. McNally, P. G. Martin, D. H. Morgan, K. Nandy, J. R. Walsh, D. C. B. Whittet, R. Wilson, & M. J. Wolff.* 427, L47, 117-F13 (1994)

Henry Draper Number: HD 12545

Multiple Starspots and the Solar Analogy: A New Approach and Applications to HD 12545. *Zeki Eker.* 445, 526, 142-C10 (1995)

Henry Draper Number: HD 19445

The ^{6}Li/^{7}Li Ratio in the Metal-poor Halo Dwarfs HD 19445 and HD 84937. *Verne V. Smith, David L. Lambert, & Poul E. Nissen.* 408, 262, 86-D1 (1993)

Henry Draper Number: HD 29647

Diffuse Band Profiles in the Spectrum of HD 29647: Evidence for a Molecular Origin? *Theodore P. Snow & C. G. Seab.* 382, 189, 202-E7 (1991)

Henry Draper Number: HD 34656

Detection of Small-Amplitude Pulsations in HD 34656 (O7 II). *A. W. Fullerton, D. R. Gies, & C. T. Bolton.* 368, L35, 35-C1 (1991)

Henry Draper Number: HD 35155

An Interactive Companion to the S Star HD 35155. *Thomas B. Ake III, Hollis R. Johnson, & Mudhaffer M. Ameen.* 383, 842, 224-F7 (1991)

Henry Draper Number: HD 37043

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. IV. ι Orionis. *Douglas R. Gies, Michael S. Wiggs, & William G. Bagnuolo, Jr.* 403, 752, 25-B4 (1993)

Henry Draper Number: HD 37903

High-Density CN Filaments in NGC 2023. *A. Fuente, J. Martín-Pintado, & R. Gaume.* 442, L33, 85-A11 (1995)

Henry Draper Number: HD 38218

The Mid-Infrared Spectrum of the Carbon Star HD 38218 and Its Possible Relation to Polycyclic Aromatic Hydrocarbons. *Richard H. Buss, Jr., A. G. G. M. Tielens, & Theodore P. Snow.* 372, 281, 77-D8 (1991)

Henry Draper Number: HD 39060

First Results from the Goddard High-Resolution Spectrograph: Resolved Velocity and Density Structure in the β Pictoris Circumstellar Gas. *A. Boggess, Frederick C. Bruhweiler, C. A. Grady, Dennis C. Ebbets, Yoji Kondo, L. M. Trafton, John C. Brandt, & S. R. Heap.* 377, L49, 143-F1 (1991)

Henry Draper Number: HD 44179

Spatial Structure in the 10 Micron Spectrum of HD 44179 (The Red Rectangle). *G. L. Grasdalen, G. C. Sloan, & P. D. LeVan.* 384, L25, 6-D1 (1992)

Spatially Resolved Spectra of the Unidentified Infrared Features around HD 44179 (The Red Rectangle). *G. C. Sloan, G. L. Grasdalen, & Paul D. LeVan.* 409, 412, 102-B3 (1993)

3.3 and 11.3 Micron Images of HD 44179: Evidence for an Optically Thick Polycyclic Aromatic Hydrocarbon Disk. *Jesse D. Bregman, David Rank, Pasquale Temi, Doug Hudgins, & Laura Kay.* 411, 794, 139-F1 (1993)

Henry Draper Number: HD 45677

Evidence for a Bipolar Nebula around the Peculiar B[e] Star HD 45677 from Ultraviolet Spectropolarimetry. *R. E. Schulte-Ladbeck, D. S. Shepherd, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, M. Taylor, & B. A. Whitney.* 401, L105, 233-D12 (1992)

Detection of Accreting Gas toward HD 45677: A Newly Recognized, Herbig Be Proto–Planetary System. *C. A. Grady, K. S. Bjorkman, D. Shepherd, R. E. Schulte-Ladbeck, M. R. Pérez, D. de Winter, & P. S. Thé.* 415, L39, 192-B6 (1993)

Variable Extinction in HD 45677 and the Evolution of Dust Grains in Pre–Main-Sequence Disks. *Michael L. Sitko, Elaine M. Halbedel, Geoffrey F. Lawrence, J. Allyn Smith, & Ken Yanow.* 432, 753, 205-D3 (1994)

The Growth of Solids, Destruction of Molecules, and Shielding of Radiation in the Young Stellar Disk of HD 45677. *Thomas M. Brown, Richard Buss, Jr., Carol Grady, & Karen Bjorkman.* 440, 865, 55-A11 (1995)

Henry Draper Number: HD 47129

Wind Collision Effects in the Early-Type Close Binaries HD 47129 and AO Cassiopeiae. *Jorge Sahade & Estela Brandi.* 379, 706, 173-E1 (1991)

Tomographic Separation of Composite Spectra. I. The Components of Plaskett's Star. *William G. Bagnuolo, Jr., Douglas R. Gies, & Michael S. Wiggs.* 385, 708, 21-G12 (1992)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. II. Plaskett's Star (HD 47129). *Michael S. Wiggs & Douglas R. Gies.* 396, 238, 158-A12 (1992)

Plaskett's Star (HD 47129): More and More Curious. *Anne B. Underhill.* 410, 365, 116-E11 (1993)

Henry Draper Number: HD 50896

HD 50896: Blobs in a Wind with a Collapsed Companion or Rotating Disk with Central Filaments? *Anne B. Underhill & Stephenson Yang.* 368, 588, 32-D9 (1991)

Polarization Variability among Wolf-Rayet Stars. VIII. Emission Lines versus Continuum in WR+O Binaries. *Anthony F. J. Moffat & Vilppu Piirola.* 413, 724, 165-D8 (1993)

Henry Draper Number: HD 53975

HD 53975: An O-Type Spectroscopic Binary with a Large Mass Ratio. *D. R. Gies, A. W. Fullerton, C. T. Bolton, W. G. Bagnuolo, Jr., M. E. Hahula, & R. Wiemker.* 422, 823, 42-B6 (1994)

Henry Draper Number: HD 56925

On the Wind-powered Nebula NGC 2359 and the WN Star HD 56925. *Yang Chen, Zhen-ru Wang, & Qin-yue Qu.* 438, 950, 17-C1 (1995)

Henry Draper Number: HD 60435

High-Speed Ultraviolet Photometry of HD 60435. *M. Taylor, M. J. Nelson, R. C. Bless, J. F. Dolan, J. L. Elliot, J. W. Percival, E. L. Robinson, & G. W. van Citters.* 413, L125, 169-B10 (1993)

Sudden Luminous Blue Variable–Like Behavior of the Wolf-Rayet Binary System HD 5980 in the Small Magellanic Cloud. *Rodolfo H. Barbá, Virpi S. Niemela, Gustavo Baume, & R. A. Vazquez.* 446, L23, 160-D13 (1995)

Henry Draper Number: HD 60535

Nonperiodic Variations in Astrophysical Systems: Investigating Frequency Evolution. *Patricia T. Boyd, Patricia H. Carter, Robert Gilmore, & Joseph F. Dolan.* 445, 861, 147-A12 (1995)

Henry Draper Number: HD 62542

Interstellar Extinction in the Infrared: The Molecular Cloud toward HD 62542. *D. C. B. Whittet, P. G. Martin, E. L. Fitzpatrick, & D. Massa.* 408, 573, 92-C11 (1993)

Henry Draper Number: HD 64740

Highly Ionized Gas in the Gum Nebula and Elsewhere: A Comparison of *IUE* and *Copernicus* Satellite Results. *Richard J. Edgar & Blair D. Savage.* 396, 124, 156-F4 (1992)

Henry Draper Number: HD 64760

The *IUE* MEGA Campaign: Modulated Structure in the Wind of HD 64760 (B0.5 Ib). *Raman K. Prinja, Derck Massa, & Alexander W. Fullerton.* 452, L61, 270-D13 (1995)

Wind Variability of B Supergiants. I. The Rapid Rotator HD 64760 (B0.5 Ib). *Derck Massa, Raman K. Prinja, & Alexander W. Fullerton.* 452, 842, 276-C7 (1995)

Periodic Variations in Ultraviolet Spectral Lines of the B0.5 Ib Star HD 64760: Evidence for Corotating Wind Streams Rooted in Surface Variations. *Stanley P. Owocki, Steven R. Cranmer, & Alexander W. Fullerton.* 453, L37, 289-G1 (1995)

Henry Draper Number: HD 66811

The *IUE* MEGA Campaign: The Rotationally Modulated Wind of ζ Puppis. *Ian D. Howarth, Raman K. Prinja, & Derck Massa.* 452, L65, 270-E6 (1995)

Henry Draper Number: HD 68273

Composition of Interstellar Clouds in the Disk and Halo. II. γ^2 Velorum. *Edward L. Fitzpatrick & Lyman Spitzer, Jr.* 427, 232, 112-G8 (1994)

Henry Draper Number: HD 72088

Evidence for a Thermally Unstable Shock Wave in the Vela Supernova Remnant. *John C. Raymond, George Wallerstein, & Bruce Balick.* 383, 226, 214-G5 (1991)

Henry Draper Number: HD 72089

High-Velocity, High-Excitation Neutral Carbon in a Cloud in the Vela Supernova Remnant. *Edward B. Jenkins & George Wallerstein.* 440, 227, 44-C13 (1995)

Henry Draper Number: HD 72127

Variable Interstellar Absorption toward HD 72127A. II. 1981–1988. *L. M. Hobbs, R. Ferlet, D. E. Welty, & G. Wallerstein.* 378, 586, 159-F1 (1991)

Interstellar Lines in HD 72127A and B: A Binary Star behind the Vela Supernova Remnant. *George Wallerstein, Andrew Vanture, & Edward B. Jenkins.* 455, 590, 330-A9 (1995)

Henry Draper Number: HD 84937

The ^{6}Li/^{7}Li Ratio in the Metal-poor Halo Dwarfs HD 19445 and HD 84937. *Verne V. Smith, David L. Lambert, & Poul E. Nissen.* 408, 262, 86-D1 (1993)

Henry Draper Number: HD 89499

Lithium in the Binary Halo Star HD 89499. *Suchitra Balachandran, Bruce W. Carney, Anne M. Fry, Laura K. Fullton, & Ruth C. Peterson.* 413, 368, 160-G7 (1993)

Henry Draper Number: HD 93521

Highly Ionized Atoms toward HD 93521. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 391, L41, 92-C11 (1992)

Composition of Interstellar Clouds in the Disk and Halo. I. HD 93521. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 409, 299, 100-G3 (1993)

Neutrino Decay and the Heat Budget of the Warm Interstellar Medium. *D. W. Sciama.* 409, L25, 104-D9 (1993)

Evidence for a Disk in the Wind of HD 93521: UV Line Profiles from an Axisymmetric Model. *J. E. Bjorkman, R. Ignace, T. M. Tripp, & J. P. Cassinelli.* 435, 416, 249-B12 (1994)

HD 93521, ζ Ophiuchi, and the Effects of Rapid Rotation on the Atmospheres and Winds of O9.5 V Stars. *Derck Massa.* 438, 376, 6-F1 (1995)

Henry Draper Number: HD 93721

Detection of a Local High-Velocity Absorption-Line System toward HD 93721. *B. E. Penprase & J. C. Blades.* 391, 276, 89-D1 (1992)

Henry Draper Number: HD 97152

Polarization Variability among Wolf-Rayet Stars. VIII. Emission Lines versus Continuum in WR+O Binaries. *Anthony F. J. Moffat & Vilppu Piirola.* 413, 724, 165-D8 (1993)

Henry Draper Number: HD 98800

Study of Spectroscopic Binaries with TODCOR. IV. The Multiplicity of the Young Nearby Star HD 98800. *Guillermo Torres, Robert P. Stefanik, David W. Latham, & T. Mazeh.* 452, 870, 276-F7 (1995)

Henry Draper Number: HD 100018

Study of Spectroscopic Binaries with TODCOR. III. Application to Triple-lined Systems. *Shay Zucker, Guillermo Torres, & Tsevi Mazeh.* 452, 863, 276-E10 (1995)

Henry Draper Number: HD 100276

Highly Ionized Gas in the Galactic Disk: The $l = 295°$, $b = 0°$ Interarm Direction. *Kenneth R. Sembach.* 434, 244, 228-G3 (1994)

Henry Draper Number: HD 103779

Highly Ionized Gas in the Galactic Disk: The $l = 295°$, $b = 0°$ Interarm Direction. *Kenneth R. Sembach.* 434, 244, 228-G3 (1994)

Henry Draper Number: HD 104705

Highly Ionized Gas in the Galactic Disk: The $l = 295°$, $b = 0°$ Interarm Direction. *Kenneth R. Sembach.* 434, 244, 228-G3 (1994)

Henry Draper Number: HD 114710

Evidence of Differential Surface Rotation in the Solar-Type Star HD 114710. *Robert A. Donahue & Sallie L. Baliunas.* 393, L63, 127-D1 (1992)

Henry Draper Number: HD 116852

Gas Kinematics and Ionization along the Extended Sight Line to HD 116852. *Kenneth R. Sembach & Blair D. Savage.* 431, 201, 178-F1 (1994)

Henry Draper Number: HD 129333

HD 129333: The Sun in Its Infancy. *J. David Dorren & Edward F. Guinan.* 428, 805, 140-C9 (1994)

X-Ray Emission from the Sun in Its Youth and Old Age. *J. D. Dorren, M. Güdel, & E. F. Guinan.* 448, 431, 198-B3 (1995)

Henry Draper Number: HD 135345

A Cool Supergiant with Anomalous Behavior of the 2800 Mg II Doublet. *G. A. Gurzadyan, Y. Kondo, S. S. Rustambekyan, Yervant Terzian, & Mario R. Perez.* 378, 298, 154-F1 (1991)

Henry Draper Number: HD 140283

First Detection of Beryllium in a Very Metal Poor Star: A Test of the Standard Big Bang Model. *Gerard Gilmore, Bengt Edvardsson, & P. E. Nissen.* 378, 17, 151-C1 (1991)

Henry Draper Number: HD 147889

Diffuse Band Profiles in the ρ Ophiuchi Cloud. *C. Gregory Seab & Theodore P. Snow, Jr.* 443, 698, 107-E1 (1995)

A Search for Interstellar C_3 in the Translucent Cloud toward HD 147889. *L. Matthew Haffner & David M. Meyer.* 453, 450, 287-C8 (1995)

Henry Draper Number: HD 148937

Hubble Space Telescope Imaging of the Wind-blown Lobe NGC 6165. *Paul Scowen, Jeff Hester, Arthur Code, Glen Mackie, C. Roger Lynds, & Earl J. O'Neil, Jr.* 450, 196, 230-F9 (1995)

Henry Draper Number: HD 149881

Composition of Interstellar Clouds in the Disk and Halo. III. HD 149881. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 445, 196, 135-C3 (1995)

Henry Draper Number: HD 151804

Propagating Absorption Enhancements in the Wind of the Extreme Of Supergiant HD 151804. *A. W. Fullerton, D. R. Gies, & C. T. Bolton.* 390, 650, 83-D1 (1992)

Henry Draper Number: HD 152270

Polarization Variability among Wolf-Rayet Stars. VIII. Emission Lines versus Continuum in WR+O Binaries. *Anthony F. J. Moffat & Vilppu Piirola.* 413, 724, 165-D8 (1993)

Henry Draper Number: HD 152408

Low-Velocity Variability in the Stellar Wind of HD 152408 (O8: Iafpe). *Raman K. Prinja & A. W. Fullerton.* 426, 345, 100-D12 (1994)

Henry Draper Number: HD 153919

Properties of the Massive X-Ray Binary 4U 1700−37 = HD 153919. *S. R. Heap & M. F. Corcoran.* 387, 340, 41-B11 (1992)

Henry Draper Number: HD 156359

Ultraviolet Interstellar Absorption toward HD 156359, a Halo Star at 11 Kiloparsecs in the Direction $l = 329°$ and $b = -15°$. *Kenneth R. Sembach, Blair D. Savage, & Derck Massa.* 372, 81, 75-A11 (1991)

Probing the Galactic Disk and Halo. II. Hot Interstellar Gas toward the Inner Galaxy Star HD 156359. *Kenneth R. Sembach, Blair D. Savage, & Limin Lu.* 439, 672, 33-F12 (1995)

Henry Draper Number: HD 161056

Ultraviolet Interstellar Polarization Observed with the *Hubble Space Telescope*. *W. B. Somerville, R. G. Allen, D. J. Carnochan, Lida He, D. McNally, P. G. Martin, D. H. Morgan, K. Nandy, J. R. Walsh, D. C. B. Whittet, R. Wilson, & M. J. Wolff.* 427, L47, 117-F13 (1994)

Henry Draper Number: HD 161796

Mid-Infrared Images of the Post–Asymptotic Giant Branch Star HD 161796. *C. J. Skinner, M. M. Meixner, G. W. Hawkins, E. Keto, J. G. Jernigan, & J. F. Arens.* 423, L135, 61-B11 (1994)

Henry Draper Number: HD 167756

Highly Ionized Gas Absorption in the Disk and Halo toward HD 167756 at 3.5 Kilometers per Second Resolution. *Blair D. Savage, Kenneth R. Sembach, & Jason A. Cardelli.* 420, 183, 3-C1 (1994)

Gas Phase Abundances and Conditions along the Sight Line to the Low-Halo, Inner Galaxy Star HD 167756. *Jason A. Cardelli, Kenneth R. Sembach, & Blair D. Savage.* 440, 241, 44-E2 (1995)

Henry Draper Number: HD 179821

Discovery of an Extended Nebula around AFGL 2343 (HD 179821) at 10 Microns. *G. W. Hawkins, C. J. Skinner, M. M. Meixner, J. G. Jernigan, J. F. Arens, E. Keto, & J. R. Graham.* 452, 314, 266-D10 (1995)

The Massive Post–Red Supergiants IRC +10420 and HD 179821. *Joel H. Kastner & David A. Weintraub.* 452, 833, 276-B7 (1995)

Henry Draper Number: HD 183143

The Diffuse Interstellar Bands. VIII. New Features between 6000 and 8650 Å. *G. H. Herbig & K. D. Leka.* 382, 193, 202-E12 (1991)

Spectropolarimetry of the 5797 Å Diffuse Interstellar Band. *A. J. Adamson & D. C. B. Whittet.* 398, L69, 188-C1 (1992)

HR 1362: The Evolved 53 Camelopardalis. *K. Stępień.* 416, 368, 205-E11 (1993)

Henry Draper Number: HD 190603

Velocity Structure in Optical CH^+ Lines toward HD 190603 and Implications for the Formation of CH^+. *M. M. Allen & Theodore P. Snow.* 391, 152, 87-G13 (1992)

Henry Draper Number: HD 190918

A Study of the Moderately Wide Wolf-Rayet Spectroscopic Binary HD 190918. *Anne B. Underhill & Grant M. Hill.* 432, 770, 205-E10 (1994)

Henry Draper Number: HD 191765

The Wind Geometry of the Wolf-Rayet Star HD 191765. *R. E. Schulte-Ladbeck, K. H. Nordsieck, M. Taylor, K. S. Bjorkman, A. M. Magalhães, & M. J. Wolff.* 387, 347, 41-C6 (1992)

Intensive High-Precision Photometric Monitoring of the Variable WN6 Wolf-Rayet Star HD 191765. *I. I. Antokhin, T. R. Irsmambetova, A. F. J. Moffat, A. M. Cherepashchuk, & S. V. Marchenko.* 82, 395, 54-G9 (1992)

Henry Draper Number: HD 192641

The Spectrum of the Peculiar WC7+OB Star HD 192641. *Anne B. Underhill.* 398, 636, 192-A10 (1992)

Henry Draper Number: HD 193793

Colliding Winds from Early-Type Stars in Binary Systems. *Ian R. Stevens, John M. Blondin, & A. M. T. Pollock.* 386, 265, 27-E1 (1992)

An Eight-Year Study of the Radio Emission from the Wolf-Rayet Binary HD 193793 = WR 140. *Richard L. White & Robert H. Becker.* 451, 352, 250-F8 (1995)

Henry Draper Number: HD 194279

Spectropolarimetry of the 5797 Å Diffuse Interstellar Band. *A. J. Adamson & D. C. B. Whittet.* 398, L69, 188-C1 (1992)

Henry Draper Number: HD 197770

A Search for Polarization in Diffuse Interstellar Bands toward HD 197770. *A. J. Adamson & D. C. B. Whittet.* 448, L49, 200-B3 (1995)

Henry Draper Number: HD 200775

H I, CO, and *IRAS* Observations of NGC 7023. *C. Rogers, Mark H. Heyer, & P. E. Dewdney.* 442, 694, 89-F10 (1995)

Henry Draper Number: HD 203664

Optical and H I Observations of High-Velocity Gas toward HD 203664. *J. E. Little, P. L. Dufton, F. P. Keenan, E. S. Conlon, & R. D. Davies.* 427, 267, 113-C8 (1994)

Properties of the +70 Kilometers per Second Cloud toward HD 203664. *Kenneth R. Sembach.* 445, 314, 136-G3 (1995)

Henry Draper Number: HD 204827

Ultraviolet Interstellar Linear Polarization. II. The Wavelength Dependence. *Geoffrey C. Clayton, Michael J. Wolff, R. G. Allen, & O. L. Lupie.* 445, 947, 148-C11 (1995)

Henry Draper Number: HD 210121

Ultraviolet, Optical, and Infrared Observations of the High-Latitude Molecular Cloud toward HD 210121. *Daniel E. Welty & James R. Fowler.* 393, 193, 116-D13 (1992)

Henry Draper Number: HDE 269227

Non–LTE Analysis of the Ofpe/WN9 Star HDE 269227 (R84). *Werner Schmutz, Claus Leitherer, Ivan Hubeny, Manfred Vogel, Wolf-Rainer Hamann, & Ulf Wessolowski.* 372, 664, 84-A1 (1991)

Henry Draper Number: HDE 283572

Multiwavelength Study of the Magnetically Active T Tauri Star HD 283447. *Eric D. Feigelson, Alan D. Welty, Catherine L. Imhoff, Jeffrey C. Hall, Paul B. Etzel, Robert B. Phillips, & Colin J. Lonsdale.* 432, 373, 197-G1 (1994)

Henry Draper Number: HDE 311884

Ultraviolet Variability of the Massive W-R Binary System HDE 311884 = WR 47. *Gloria Koenigsberger, Anthony F. J. Moffat, & Lawrence H. Auer.* 376, 272, 128-C9 (1991)

Name: Arcturus

Missing Opacity in the Atmospheric Models of Red Giants. *C. Ian Short & John B. Lester.* 436, L165, 281-G1 (1994)

Name: Algol

Consequences of the Star-Stream Interaction in Algol. *Mercedes T. Richards.* 387, 329, 41-A12 (1992)

ASCA Observations of the Coronal X-Ray Emission of Algol. *A. Antunes, F. Nagase, & N. E. White.* 436, L83, 269-G3 (1994)

Name: Altair

MAP-based Trigonometric Parallaxes of Altair and Vega. *George Gatewood & Joost Kiewiet de Jonge.* 450, 364, 233-A4 (1995)

Name: Betelgeuse

Neutral Carbon in the Circumstellar Envelope of α Orionis. *P. J. Huggins, R. Bachiller, P. Cox, & T. Forveille.* 424, L127, 79-E5 (1994)

Name: Castor

An *ASCA* Observation of the Castor System. *Eric V. Gotthelf, Lalit Jalota, Koji Mukai, & Nicholas E. White.* 436, L91, 270-A5 (1994)

Name: Elias 1

Silicates and Aromatic Hydrocarbons in the 10 Micron Spectrum of the Taurus Dark Cloud Source Elias 1. *Martha S. Hanner, Timothy Y. Brooke, & Alan T. Tokunaga.* 433, L97, 224-C7 (1994)

Name: Feige 7

Exploring the Peculiar Magnetic Field of Feige 7. *N. Achilleos, D. T. Wickramasinghe, James Liebert, Rex A. Saffer, & A. D. Grauer.* 396, 273, 158-D13 (1992)

Name: Feige 55

The Binary Double-degenerate Nature of the Bright DAO White Dwarf Feige 55. *J. B. Holberg, Rex A. Saffer, R. W. Tweedy, & M. A. Barstow.* 452, L133, 280-D4 (1995)

Name: Geminga

Locating Very High Energy Gamma-Ray Sources with Arcminute Accuracy. *C. W. Akerlof, M. F. Cawley, M. Chantell, D. J. Fegan, K. Harris, A. M. Hillas, D. G. Jennings, R. C. Lamb, M. A. Lawrence, M. J. Lang, D. A. Lewis, D. I. Meyer, G. Mohanty, K. S. O'Flaherty, M. Punch, P. T. Reynolds, M. S. Schubnell, T. C. Weekes, & T. Whitaker.* 377, L97, 150-E6 (1991)

Name: Gliese 105A

Detection of a Very Low Mass Companion to the Astrometric Binary Gliese 105A. *D. A. Golimowski, T. Nakajima, S. R. Kulkarni, & B. R. Oppenheimer.* 444, L101, 131-A1 (1995)

Hubble Space Telescope Observations of the Very Low Mass Companion to Gliese 105A. *David A. Golimowski, William G. Fastie, Daniel J. Schroeder, & Alan Uomoto.* 452, L125, 280-C1 (1995)

Name: Gliese 586A

The Orbital Evolution of Highly Eccentric Binaries. *Itzhak Goldman & Tsevi Mazeh.* 429, 362, 148-E7 (1994)

Name: Haro 6-10

Disks around Pre–Main-Sequence Binary Systems: The Case of Haro 6-10. *François Ménard, Jean-Louis Monin, Françoise Angelucci, & Daniel Rouan.* 414, L117, 186-B5 (1993)

Name: Hubble 4

Circularly Polarized Radio Emission from the T Tauri Star Hubble 4. *Stephen L. Skinner.* 408, 660, 93-D6 (1993)

Name: Melnick 42

First Results from the Goddard High-Resolution Spectrograph: Spectroscopic Determination of Stellar Parameters of Melnick 42, an O3f Star in the Large Magellanic Cloud. *S. R. Heap, B. Altner, D. Ebbets, I. Hubeny, J. B. Hutchings, R. P. Kudritzki, S. A. Voels, S. Haser, A. Pauldrach, J. Puls, & K. Butler.* 377, L29, 143-D6 (1991)

First Results from the Goddard High-Resolution Spectrograph: Evidence for Photospheric Microturbulence in Early O Stars: Are Surface Gravities Systematically Underestimated? *I. Hubeny, S. R. Heap, & B. Altner.* 377, L33, 143-D11 (1991)

Ultraviolet and Optical Spectral Morphology of Melnick 42 and Radcliffe 136a in 30 Doradus. *Nolan R. Walborn, Dennis C. Ebbets, Joel Wm. Parker, Joy Nichols-Bohlin, & Richard L. White.* 393, L13, 120-C1 (1992)

Theoretical Modeling of GHRS Observations of the Of/WN-Type Star R136a5. *Alex de Koter, Ivan Hubeny, Sara R. Heap, & Thierry Lanz.* 435, L71, 252-F9 (1994)

Theoretical Modeling of GHRS Observations of the Of/WN-Type Star R136a5. *Alex de Koter, Ivan Hubeny, Sara R. Heap, & Thierry Lanz.* 435, L71, 252-F9 (1994)

Name: Rapid Burster 1730−335

On the Nature of Photospheric Oscillations in Strong X-Ray Bursts. *Iosif Lapidus, Luciano Nobili, & Roberto Turolla.* 431, L103, 191-F13 (1994)

Name: Sanders 1045

Lithium in a Short-Period Tidally Locked Binary of M67: Implications for Stellar Evolution, Galactic Lithium Evolution, and Cosmology. *Constantine P. Deliyannis, Jeremy R. King, Ann M. Boesgaard, & Sean G. Ryan.* 434, L71, 241-G1 (1994)

Name: Vega

MAP-based Trigonometric Parallaxes of Altair and Vega. *George Gatewood & Joost Kiewiet de Jonge.* 450, 364, 233-A4 (1995)

Alphanumeric: 1608−522

On the Nature of Photospheric Oscillations in Strong X-Ray Bursts. *Iosif Lapidus, Luciano Nobili, & Roberto Turolla.* 431, L103, 191-F13 (1994)

Alphanumeric: 1755−338

New Features of the X-Ray Dip Source 1755−338. *Kwang-Il Seon, Kyoung-Wook Min, Kenji Yoshida, Fumiyoshi Makino, Michiel van der Klis, Jan van Paradijs, & Walter H. G. Lewin.* 454, 463, 305-F3 (1995)

Alphanumeric: 2127+119

On the Nature of Photospheric Oscillations in Strong X-Ray Bursts. *Iosif Lapidus, Luciano Nobili, & Roberto Turolla.* 431, L103, 191-F13 (1994)

Alphanumeric: A0535+26

Accretion Mechanisms in the Be/X-Ray Transient System A0535+26. *C. Motch, L. Stella, E. Janot-Pacheco, & M. Mouchet.* 369, 490, 43-G5 (1991)

Observation of A0535+26 at Energies above 150 keV with the Figaro II Experiment. *G. Cusumano, T. Mineo, B. Sacco, L. Scarsi, G. Gerardi, B. Agrinier, E. Barouch, R. Comte, B. Parlier, J. L. Masnou, E. Massaro, G. Matt, E. Costa, M. Salvati, P. Mandrou, M. Niel, & J. F. Olive.* 398, L103, 194-E1 (1992)

The Soft Gamma-Ray Spectrum of A0535+26: Detection of an Absorption Feature at 110 keV by OSSE. *J. E. Grove, M. S. Strickman, W. N. Johnson, J. D. Kurfess, R. L. Kinzer, C. H. Starr, G. V. Jung, E. Kendziorra, P. Kretschmar, M. Maisack, & R. Staubert.* 438, L25, 10-A9 (1995)

Alphanumeric: A0620−00

On the Mass of the Compact Object in the Black Hole Binary A0620−00. *Carole A. Haswell, Edward L. Robinson, Keith Horne, Rae F. Stiening, & Timothy M. C. Abbott.* 411, 802, 139-G1 (1993)

Quiescent Accretion Disks in Black Hole X-Ray Novae. *Jerome A. Orosz, Charles D. Bailyn, Ronald A. Remillard, Jeffrey E. McClintock, & Craig B. Foltz.* 436, 848, 277-D3 (1994)

Quiescent Accretion Disks in Black Hole X-Ray Novae. *Jerome A. Orosz, Charles D. Bailyn, Ronald A. Remillard, Jeffrey E. McClintock, & Craig B. Foltz.* 436, 848, 277-D3 (1994)

The Dim Inner Accretion Disk of the Quiescent Black Hole A0620−00. *Jeffrey E. McClintock, Keith Horne, & Ronald A. Remillard.* 442, 358, 82-A6 (1995)

Alphanumeric: A1524−62

SIGMA Observation of Hard X-Ray Emission from the Ultrasoft X-Ray Transient Triangulum Australe X-1 (A1524−62). *D. Barret, J. P. Roques, P. Mandrou, L. Bouchet, F. Lebrun, A. Goldwurm, P. Laurent, J. Paul, R. Sunyaev, E. Churazov, M. Gilfanov, A. Diachkov, N. Kavenson, B. Novikov, I. Chulkov, & A. Kuznetsov.* 392, L19, 106-C7 (1992)

Alphanumeric: A1742−294

Detection of the A1742−294 X-Ray Burster above 35 keV. *E. Churazov, M. Gilfanov, R. Sunyaev, B. Novickov, I. Chulkov, V. Kovtunenko, A. Sheikhet, K. Sukhanov, A. Goldwurm, B. Cordier, J. Paul, P. O. Petrucci, E. Jourdain, J. P. Roques, L. Bouchet, & P. Mandrou.* 443, 341, 99-G8 (1995)

Alphanumeric: 3A 0729+103

Spin-up of the White Dwarf in the Intermediate Polar 3A 0729+103. *Jyoti Singh, P. C. Agrawal, K. M. V. Apparao, P. Vivekananda Rao, & M. B. K. Sarma.* 380, 208, 178-E11 (1991)

Alphanumeric: ADS 9731

Rayleigh Beacon Adaptive Optics Imaging of ADS 9731: Measurements of the Isoplanatic Field of View. *Julian C. Christou, Brent Ellerbroek, Robert Q. Fugate, Domenico Bonaccini, & Ruggero Stanga.* 450, 369, 233-A12 (1995)

Full Adaptive Optics Images of ADS 9731 and μ Cassiopeiae: Orbits and Masses. *Jack D. Drummond, Julian C. Christou, & Robert Q. Fugate.* 450, 380, 233-B12 (1995)

Alphanumeric: ADS 11300

Binary Star Observations with the *Hubble Space Telescope* Fine Guidance Sensors. I. ADS 11300. *O. G. Franz, T. J. N. Kreidl, L. W. Wasserman, A. J. Bradley, G. F. Benedict, P. D. Hemenway, W. H. Jefferys, B. McArthur, J. E. McCartney, E. Nelan, P. J. Shelus, D. Story, A. L. Whipple, R. L. Duncombe, L. W. Fredrick, & Wm. F. van Altena.* 377, L17, 143-C6 (1991)

Alphanumeric: Ap 0323+4853

Spectroscopy of a Brown Dwarf Candidate in the α Persei Open Cluster. *Rafael Rebolo, Eduardo L. Martín, & Antonio Magazzù.* 389, L83, 73-E11 (1992)

Alphanumeric: AS 296

Ultraviolet Observations of the Symbiotic Star AS 296. *A. Gutiérrez-Moreno, H. Moreno, & W. A. Feibelman.* 395, 295, 143-G1 (1992)

Alphanumeric: BD +08° 102

RE 0044+09: A New K Dwarf Rapid Rotator with a White Dwarf Companion? *Barry J. Kellett, Gordon E. Bromage, Alexander Brown, Robin D. Jeffries,*

David J. James, David Kilkenny, Russell M. Robb, David Wonnacott, Christopher Lloyd, & C. Clayton. 438, 364, 6-D13 (1995)

Alphanumeric: BD −13°3442

Stellar Oxygen Abundances. III. The Oxygen Abundance of the Very Metal Poor Halo Star BD −13°3442. *Jeremy R. King.* 436, 331, 265-G6 (1994)

Alphanumeric: BD +28°4211

Absolute Far-Ultraviolet Spectrophotometry of Hot Subluminous Stars from *Voyager*. *J. B. Holberg, B. Ali, T. E. Carone, & R. S. Polidan.* 375, 716, 121-E11 (1991)

Alphanumeric: BD +75°325

First Results from the Goddard High-Resolution Spectrograph: Evidence for Photospheric Microturbulence in Early O Stars: Are Surface Gravities Systematically Underestimated? *I. Hubeny, S. R. Heap, & B. Altner.* 377, L33, 143-D11 (1991)

Alphanumeric: CD −38°10980

The Circumstellar Nature of the Metallic Features in a Hot DA White Dwarf. *J. B. Holberg, F. C. Bruhweiler, & J. Andersen.* 443, 753, 108-C1 (1995)

Alphanumeric: CD −41°13967

Echelle Spectroscopy of CD −41° 13967: The Young Central Star of a New Planetary Nebula. *James K. McCarthy, R. Michael Rich, S. R. Becker, K. Butler, D. Husfeld, & H. G. Groth.* 371, 380, 64-G1 (1991)

Alphanumeric: 2CG 006−00

No Evidence for TeV Gamma Radiation from 2CG 006−00. *H. I. Nel, B. C. Raubenheimer, O. C. de Jager, R. Buccheri, M. Busetta, A. R. North, & C. Brink.* 368, 585, 32-D4 (1991)

Alphanumeric: DD 13

DD 13: A Very Young and Heavily Reddened Early O Star in the Large Magellanic Cloud. *Peter S. Conti & Edward L. Fitzpatrick.* 373, 100, 87-C5 (1991)

Alphanumeric: CRL 2688

Detection of Radio Continuum Emission from Circumstellar Dust around CRL 2688 and IRC +10216. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 429, L33, 150-E1 (1994)

Alphanumeric: CS 22892−052

Ultra-Metal-poor Halo Stars: The Remarkable Spectrum of CS 22892−052. *Christopher Sneden, George W. Preston, Andrew McWilliam, & Leonard Searle.* 431, L27, 182-E13 (1994)

Evidence of Heavy Element Nucleosynthesis Early in the History of the Galaxy: The Ultra-metal-poor Star CS 22892−052. *John J. Cowan, Debra L. Burris, Christopher Sneden, Andrew McWilliam, & George W. Preston.* 439, L51, 40-E3 (1995)

Alphanumeric: 1E 1024.0−5732

On the Nature of the X-Ray Emission from 1E 1024.0−5732/Wack 2134: The First X-Ray–selected Wolf-Rayet Star. *Sandro Mereghetti, Tomaso Belloni, Michael Shara, & Laurent Drissen.* 424, 943, 76-E1 (1994)

Alphanumeric: 1E 1740.7−2942

Low-Flux Hard State of 1E 1740.7−2942. *E. Churazov, M. Gilfanov, R. Sunyaev, M. Pavlinsky, S. Grebenev, A. Dyachkov, V. Kovtunenko, R. Kremnev, M. Niel, P. Mandrou, G. Vedrenne, J. P. Roques, B. Cordier, A. Goldwurm, F. Lebrun, & J. Paul.* 407, 752, 79-G9 (1993)

Can Isolated Stellar-Mass Black Holes Explain the Hard X-Ray Sources in the Galactic Center Region? *Sergio Campana & Sandro Mereghetti.* 413, L89, 168-E10 (1993)

Formation of a Jet in the Galactic Center Black Hole Candidate 1E 1740.7−2942. *Ranjeev Misra & Fulvio Melia.* 419, L25, 252-D9 (1993)

Near-Infrared Observations of the 1E 1740.7−2942 Field at the Galactic Center. *Joseph W. Haller & Fulvio Melia.* 423, L109, 60-F5 (1994)

Observations of 1E 1740.7−2942 with *ROSAT* and the VLA. *William A. Heindl, Thomas A. Prince, & John M. Grunsfeld.* 430, 829, 172-B12 (1994)

Hot Accretion Disks with Electron-Positron Pair Winds. *Ranjeev Misra & Fulvio Melia.* 449, 813, 224-A1 (1995)

Alphanumeric: 1E 1751+7046

Nonthermal Radio Emission from the X-Ray–Bright K5 IV Star 1E 1751+7046. *Stephen L. Skinner.* 368, 272, 26-D11 (1991)

Alphanumeric: 1E 2259+586

Phase Coherence for TeV/PeV Binary Sources. *D. A. Lewis, R. C. Lamb, & S. D. Biller.* 369, 479, 43-F4 (1991)

The Spectrum and Pulses of 1E 2259+586 from *ASCA* and BBXRT Observations. *R. H. D. Corbet, A. P. Smale, M. Ozaki, K. Koyama, & K. Iwasawa.* 443, 786, 108-F3 (1995)

Alphanumeric: 1ES 1113+432

1ES 1113+432: Luminous, Soft X-Ray Outburst from a Nearby Cataclysmic Variable (AR Ursae Majoris). *R. A. Remillard, J. F. Schachter, A. D. Silber, & P. Slane.* 426, 288, 99-F5 (1994)

Alphanumeric: ESO 207-61

ESO 207-61: A Brown Dwarf Candidate in the Hyades Moving Group. *María Teresa Ruiz, Marianne Y. Takamiya, & Miguel Roth.* 367, L59, 22-C7 (1991)

Alphanumeric: ESO 439-26

The Extremely Low Luminosity White Dwarf ESO 439−26. *María Teresa Ruiz, P. Bergeron, S. K. Leggett, & Claudio Anguita.* 455, L159, 334-C13 (1995)

Alphanumeric: EUVE 0720−317

Discovery of a New White Dwarf in a Binary System (EUVE 0720−317) in the *Extreme Ultraviolet Explorer* Survey and Implications for the Late Stages of Stellar Evolution. *Stéphane Vennes & John R. Thorstensen.* 433, L29, 214-G13 (1994)

Alphanumeric: EXO 0748−676

The Orbital Ephemeris and Eclipse Transitions of the Low-Mass X-Ray Binary EXO 0748−676. *A. N. Parmar, A. P. Smale, F. Verbunt, & R. H. D. Corbet.* 366, 253, 4-B9 (1991)

Ginga Observations of the Dipping Low-Mass X-Ray Binaries XB 1916−053 and EXO 0748−676. *Alan P. Smale, Koji Mukai, O. Rees Williams, Mark H. Jones, & Robin H. D. Corbet.* 400, 330, 213-A10 (1992)

Optical and X-Ray Observations of the Low-Mass X-Ray Binary EXO 0748−676. *Brian Thomas, Robin Corbet, Thomas Augusteijn, Paul Callanan, & Alan P. Smale.* 408, 651, 93-C7 (1993)

Is the Changing Orbital Period of EXO 0748−676 Evidence for a Triple System? *R. H. D. Corbet, K. Asai, T. Dotani, & F. Nagase.* 436, L15, 268-D13 (1994)

Eclipse Timings of the Low-Mass X-Ray Binary EXO 0748−676: Statistical Arguments against Orbital Period Changes. *Paul Hertz, Kent S. Wood, & Lynn Cominsky.* 438, 385, 6-F13 (1995)

Alphanumeric: EXO 2030+375

Flares in the X-Ray Source EXO 2030+375. *Krishna M. V. Apparao.* 375, 701, 121-D7 (1991)

Alphanumeric: G25.5+0.2

High-Velocity Gas Associated with the Massive, Evolved Star G25.5+0.2. *D. S. Shepherd, E. Churchwell, & W. M. Goss.* 448, 426, 198-A9 (1995)

Alphanumeric: G29-38

The Infrared and Optical Pulsations of G29-38. *Joseph Patterson, B. Zuckerman, E. E. Becklin, D. J. Tholen, & T. Hawarden.* 374, 330, 102-C1 (1991)

Observational Limits on Companions to G29-38. *S. J. Kleinman, R. E. Nather, D. E. Winget, J. C. Clemens, P. A. Bradley, A. Kanaan, J. L. Provencal, C. F. Claver, T. K. Watson, K. Yanagida, J. S. Dixson, M. A. Wood, D. J. Sullivan, E. Meištas, E. M. Leibowitz, P. Moskalik, S. Zola, G. Pajdosz, J. Krzesinski, J.-E. Solheim, A. Bruvold, D. O'Donoghue, M. Katz, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, S. O. Kepler, O. Giovannini, C. J. Hansen, & S. D. Kawaler.* 436, 875, 277-G1 (1994)

Alphanumeric: G62-46

G62-46: An Unresolved Double Degenerate Binary Containing a Magnetic DA Component. *P. Bergeron, María-Teresa Ruiz, & S. K. Leggett.* 407, 733, 79-E13 (1993)

Alphanumeric: G117-B15A

The Pulsation Index, Effective Temperature, and Thickness of the Hydrogen Layer in the Pulsating DA White Dwarf G117-B15A. *E. L. Robinson, T. M. Mailloux, E. Zhang, D. Koester, R. F. Stiening, R. C. Bless, J. W. Percival, M. J. Taylor, & G. W. van Citters.* 438, 908, 16-F1 (1995)

Alphanumeric: G191-B2B

Absolute Far-Ultraviolet Spectrophotometry of Hot Subluminous Stars from *Voyager*. *J. B. Holberg, B. Ali, T. E. Carone, & R. S. Polidan.* 375, 716, 121-E11 (1991)

The Hopkins Ultraviolet Telescope: Performance and Calibration during the Astro-1 Mission. *Arthur F. Davidsen, Knox S. Long, Samuel T. Durrance, William P. Blair, Charles W. Bowers, Steven J. Conard, Paul D. Feldman,*

Henry C. Ferguson, Glen H. Fountain, Randy A. Kimble, Gerard A. Kriss, H. Warren Moos, & Kenneth A. Potocki. 392, 264, 104-C1 (1992)

Extreme Ultraviolet Spectroscopy of G191-B2B: Direct Observation of Ionization Edges. *Erik Wilkinson, James C. Green, & Webster Cash.* 397, L51, 173-F13 (1992)

Extreme Ultraviolet Observations of G191-B2B and the Local Interstellar Medium with the Hopkins Ultraviolet Telescope. *Randy A. Kimble, Arthur F. Davidsen, William P. Blair, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Henry C. Ferguson, Richard C. Henry, Gerard A. Kriss, Jeffrey W. Kruk, Knox S. Long, H. Warren Moos, & Olaf Vancura.* 404, 663, 37-B13 (1993)

The Extreme Ultraviolet Spectrograph: A Radial Groove Grating, Sounding Rocket–borne, Astronomical Instrument. *Erik Wilkinson, James C. Green, & Webster Cash.* 89, 211, 51-F5 (1993)

The Discovery of Ni v in the Photospheres of the Hot DA White Dwarfs RE 2214−492 and G191-B2B. *J. B. Holberg, I. Hubeny, M. A. Barstow, T. Lanz, E. M. Sion, & R. W. Tweedy.* 425, L105, 94-G5 (1994)

ORFEUS Observations of G191-B2B: Neutral and Ionized Gas in the Local Interstellar Medium. *M. Hurwitz & S. Bowyer.* 446, 812, 167-C4 (1995)

Alphanumeric: G217-037

The Incidence of Magnetism among White Dwarfs: The First Stars below 100 Kilogauss. *Gary D. Schmidt & Paul S. Smith.* 423, L63, 54-B3 (1994)

Alphanumeric: G226-29

Whole Earth Telescope Observations of the DAV White Dwarf G226-29. *S. O. Kepler, O. Giovannini, M. A. Wood, R. E. Nather, D. E. Winget, A. Kanaan, S. J. Kleinman, P. A. Bradley, J. L. Provencal, J. C. Clemens, C. F. Claver, T. K. Watson, K. Yanagida, K. Krisciunas, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. Leibowitz, H. Mendelson, T. Mazeh, P. Moskalik, J. Krzesiński, G. Pajdosz, S. Zoła, J.-E. Solheim, P.-I. Emanuelsen, N. Dolez, G. Vauclair, M. Chevreton, J.-R. Fremy, M. A. Barstow, A. E. Sansom, R. W. Tweedy, D. T. Wickramasinghe, L. Ferrario, D. J. Sullivan, A. J. van der Peet, D. A. H. Buckley, & A.-L. Chen.* 447, 874, 188-A1 (1995)

Alphanumeric: G227-35

The Strong Magnetic Field in G227-35. *Marshall H. Cohen, Angela Putney, & Robert W. Goodrich.* 405, L67, 54-D5 (1993)

Alphanumeric: GD 50

The Isolated Massive DA White Dwarf GD 50. *P. Bergeron, K. M. Kidder, J. B. Holberg, James Liebert, F. Wesemael, & Rex A. Saffer.* 372, 267, 77-C5 (1991)

Alphanumeric: GD 165

Companions to White Dwarfs: Very Low Mass Stars and the Brown Dwarf Candidate GD 165B. *B. Zuckerman & E. E. Becklin.* 386, 260, 27-D7 (1992)

Alphanumeric: GD 165B

The Unique Spectrum of the Brown Dwarf Candidate GD 165B and Comparison to the Spectra of Other Low-Luminosity Objects. *J. Davy Kirkpatrick, Todd J. Henry, & James Liebert.* 406, 701, 66-E10 (1993)

Alphanumeric: GD 323

GD 323: New Observations and Analysis of the Prototype DAB White Dwarf. *D. Koester, James Liebert, & Rex A. Saffer.* 422, 783, 41-E10 (1994)

Alphanumeric: GD 358

A Critical Analysis of the Ultraviolet Temperature Scale of the Helium-dominated DB and DBV White Dwarfs. *Peter Thejll, Stéphane Vennes, & Harry L. Shipman.* 370, 355, 51-F5 (1991)

Dynamo Generation of a Magnetic Field in the White Dwarf GD 358. *J. Andrew Markiel, John H. Thomas, & H. M. Van Horn.* 430, 834, 172-C7 (1994)

Whole Earth Telescope Observations of the DBV White Dwarf GD 358. *D. E. Winget, R. E. Nather, J. C. Clemens, J. L. Provencal, S. J. Kleinman, P. A. Bradley, C. F. Claver, J. S. Dixson, M. H. Montgomery, C. J. Hansen, B. P. Hine, P. Birch, M. Candy, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. M. Leibowitz, D. O'Donoghue, B. Warner, D. A. H. Buckley, P. Tripe, G. Vauclair, N. Dolez, M. Chevreton, T. Serre, R. Garrido, S. O. Kepler, A. Kanaan, T. Augusteijn, M. A. Wood, P. Bergeron, & A. D. Grauer.* 430, 839, 172-D1 (1994)

An Asteroseismological Determination of the Structure of the DBV White Dwarf GD 358. *P. A. Bradley & D. E. Winget.* 430, 850, 172-E2 (1994)

Thick to Thin: The Evolutionary Connection between PG 1159 Stars and the Thin Helium–enveloped Pulsating White Dwarf GD 358. *Benjamin T. Dehner & Steven D. Kawaler.* 445, L141, 151-F9 (1995)

Dynamo Generation of Magnetic Fields in White Dwarfs. *John H. Thomas, J. Andrew Markiel, & H. M. Van Horn.* 453, 403, 286-F3 (1995)

Alphanumeric: GD 659

The *EUVE* and *IUE* Spectra of the Hot DA White Dwarf GD 659. *J. B. Holberg, M. A. Barstow, F. C. Bruhweiler, & E. M. Sion.* 453, 313, 285-D12 (1995)

Alphanumeric: GL 490

Aperture Synthesis CS(2–1) Observations of a Young Stellar Object GL 490: Accretion Flow in Gas Disk. *Akiko Nakamura, Ryohei Kawabe, Yoshimi Kitamura, Masato Ishiguro, Yasuhiro Murata, & Nagayoshi Ohashi.* 383, L81, 226-F5 (1991)

Alphanumeric: GRO J0422+32

10 Micron Detection of the Hard X-Ray Transient GRO J0422+32: Free-Free Emission from an X-Ray–driven Accretion Disk Wind? *J. van Paradijs, C. M. Telesco, C. Kouveliotou, & G. J. Fishman.* 429, L19, 150-C10 (1994)

Secondary Maxima of Black Hole X-Ray Transients: A Clue to Understanding X-Ray Irradiation. *S. Mineshige.* 431, L99, 191-F7 (1994)

Observations of the X-Ray Nova GRO J0422+32. I. Outburst and the Decay to Quiescence. *Paul J. Callanan, Michael R. Garcia, Jeffrey E. McClintock, Ping Zhao, Ronald A. Remillard, Charles D. Bailyn, Jerome A. Orosz, B. Alan Harmon, & William S. Paciesas.* 441, 786, 72-G3 (1995)

Orbital Parameters of the Candidate Black Hole Binary GRO J0422+32. *Jerome A. Orosz & Charles D. Bailyn.* 446, L59, 170-D12 (1995)

The Mass of the Probable Black Hole in the X-Ray Nova GRO J0422+32. *Alexei V. Filippenko, Thomas Matheson, & Luis C. Ho.* 455, 614, 330-D1 (1995)

Alphanumeric: GRS 1009−45

Minioutbursts from the Black Hole Candidate Nova Velorum 1993. *Charles D. Bailyn & Jerome A. Orosz.* 440, L73, 57-G8 (1995)

Alphanumeric: GRS 1758−258

Can Isolated Stellar-Mass Black Holes Explain the Hard X-Ray Sources in the Galactic Center Region? *Sergio Campana & Sandro Mereghetti.* 413, L89, 168-E10 (1993)

Evidence for a Soft X-Ray Excess in the Spectrum of GRS 1758−258. *S. Mereghetti, T. Belloni, & A. Goldwurm.* 433, L21, 214-F12 (1994)

Alphanumeric: GRS 1915+105

Localization and Spectrum of the X-Ray Transient Source GRS 1915+105. *A. Finoguenov, E. Churazov, M. Gilfanov, R. Sunyaev, A. Vikhlinin, A. Dyachkov, N. Khavenson, I. Tserenin, M. C. Schmitz-Fraysse, M. Denis, J. P. Roques, P. Mandrou, A. Claret, J. Ballet, B. Cordier, & A. Goldwurm.* 424, 940, 76-D10 (1994)

Discovery and Observations by WATCH of the X-Ray Transient GRS 1915+105. *Alberto J. Castro-Tirado, Søren Brandt, Niels Lund, Igor Lapshov, Rashid A. Sunyaev, Aleksei A. Shlyapnikov, Sergei Guziy, & Elena P. Pavlenko.* 92, 469, 38-B1 (1994)

The Velocity of the Emitting Plasma of the Superluminal Galactic Source GRS 1915+105. *Gianluigi Bodo & Gabriele Ghisellini.* 441, L69, 75-G13 (1995)

Alphanumeric: GRW +70°8247

Thomson Scattering in a Magnetic Field. II. Arbitrary Field Orientation. *Barbara A. Whitney.* 369, 451, 43-C10 (1991)

Alphanumeric: GS 1124−68

Another Canonical Time Variation of X-Rays from Black Hole Candidates in the Very High Flare State? *Sigenori Miyamoto, Sayuri Iga, Shunji Kitamoto, & Yasuhide Kamado.* 403, L39, 20-D13 (1993)

Alphanumeric: GS 1124−683

Normalized Power Spectral Densities of Two X-Ray Components from GS 1124−683. *Sigenori Miyamoto, Shunji Kitamoto, Sayuri Iga, Kiyoshi Hayashida, & Kentaro Terada.* 435, 398, 248-G10 (1994)

Large Hysteretic Behavior of Stellar Black Hole Candidate X-Ray Binaries. *Sigenori Miyamoto, Shunji Kitamoto, Kiyoshi Hayashida, & Wataru Egoshi.* 442, L13, 84-F1 (1995)

Alphanumeric: GS 2000+25

A Black Hole in the X-Ray Nova GS 2000+25. *Alexei V. Filippenko, Thomas Matheson, & Aaron J. Barth.* 455, L139, 334-A4 (1995)

Alphanumeric: GX 5−1

Column Accretion with Radiation Drag and the Two-Branch Spectrum of the Low-Mass X-Ray Binary GX 5−1. *J. H. You, T. Lu, C. Y. Wei, & T. G. Wang.* 394, 283, 131-E1 (1992)

Another Canonical Time Variation of X-Rays from Black Hole Candidates in the Very High Flare State? *Sigenori Miyamoto, Sayuri Iga, Shunji Kitamoto, & Yasuhide Kamado.* 403, L39, 20-D13 (1993)

The Time-Delay Spectrum of GX 5−1 in Its Horizontal Branch. *B. Vaughan, M. van der Klis, W. H. G. Lewin, R. A. M. J. Wijers, J. van Paradijs, T. Dotani, & K. Mitsuda.* 421, 738, 27-D6 (1994)

Alphanumeric: GX 301−2

The X-Ray Properties of GX 301−2 (4U 1223−62). *F. Haberl.* 376, 245, 128-A5 (1991)

Alphanumeric: GX 339−4

A Jet Model for a Very High State of GX 339−4. *Sigenori Miyamoto & Shunji Kitamoto.* 374, 741, 108-C6 (1991)

X-Ray Variability of GX 339−4 in Its Very High State. *Sigenori Miyamoto, Kazuhiro Kimura, Shunji Kitamoto, Tadayasu Dotani, & Ken Ebisawa.* 383, 784, 224-A3 (1991)

Another Canonical Time Variation of X-Rays from Black Hole Candidates in the Very High Flare State? *Sigenori Miyamoto, Sayuri Iga, Shunji Kitamoto, & Yasuhide Kamado.* 403, L39, 20-D13 (1993)

Sigma Hard X-Ray Observations of GX 339−4 during the Hard State and a Transition to the Soft State. *L. Bouchet, E. Jourdain, P. Mandrou, J. P. Roques, Ph. Laurent, F. Lebrun, J. Paul, L. Salotti, R. Sunyaev, E. Churazov, M. Gilfanov, N. Khavenson, A. Diachkov, I. Chulkov, B. Novikov, & A. Kuznetsov.* 407, 739, 79-F7 (1993)

Observation of GX 339−4 Hard State Outbursts in 1991 and 1992. *B. A. Harmon, C. A. Wilson, W. S. Paciesas, G. N. Pendleton, M. S. Briggs, B. C. Rubin, M. H. Finger, G. J. Fishman, M. N. Brock, R. B. Wilson, & C. A. Meegan.* 425, L17, 85-C11 (1994)

OSSE Observations of GX 339−4. *D. A. Grabelsky, S. M. Matz, W. R. Purcell, M. P. Ulmer, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, & G. V. Jung.* 441, 800, 73-A6 (1995)

Large Hysteretic Behavior of Stellar Black Hole Candidate X-Ray Binaries. *Sigenori Miyamoto, Shunji Kitamoto, Kiyoshi Hayashida, & Wataru Egoshi.* 442, L13, 84-F1 (1995)

Alphanumeric: 1H 1752+081

1H 1752+081: An Eclipsing Cataclysmic Variable with a Small Accretion Disk. *Andrew D. Silber, Ronald A. Remillard, Keith Horne, & Hale V. Bradt.* 424, 955, 76-F3 (1994)

Alphanumeric: H1−36

Detection of the H92α Radio Recombination Line from the Symbiotic Star H1−36 Arae. *T. S. Bastian.* 387, L77, 48-D1 (1992)

Alphanumeric: H0253+193

The Infrared Counterpart of the Eclipsing X-Ray Binary H0253+193. *B. Zuckerman, E. E. Becklin, I. S. McLean, & Joseph Patterson.* 400, 665, 218-F7 (1992)

Binary Structure and Accretion Flow of the New Intermediate Polar H0253+193. *Yuichi Kamata & Katsuji Koyama.* 405, 307, 45-A3 (1993)

Alphanumeric: H0459+246

The X-Ray Selected Cataclysmic Variables H0459+246 and H0857−242. *R. A. Remillard, H. V. Bradt, R. J. V. Brissenden, D. A. H. Buckley, D. A. Schwartz, A. Silber, B. A. Stroozas, & I. R. Tuohy.* 428, 785, 140-A11 (1994)

Alphanumeric: H0538+608

Ginga Observation of an AM Herculis Type Source H0538+608. *M. Ishida, A. Silber, H. V. Bradt, R. A. Remillard, K. Makishima, & T. Ohashi.* 367, 270, 15-D6 (1991)

H0538+608 (= BY Camelopardalis): An Asynchronously Rotating AM Herculis Binary? *A. Silber, H. V. Bradt, M. Ishida, T. Ohashi, & R. A. Remillard.* 389, 704, 70-B7 (1992)

Alphanumeric: H0857−242

The X-Ray Selected Cataclysmic Variables H0459+246 and H0857−242. *R. A. Remillard, H. V. Bradt, R. J. V. Brissenden, D. A. H. Buckley, D. A. Schwartz, A. Silber, B. A. Stroozas, & I. R. Tuohy.* 428, 785, 140-A11 (1994)

Alphanumeric: H1907+690

The Eclipsing AM Herculis Variable H1907+690. *R. A. Remillard, B. A. Stroozas, S. Tapia, & A. Silber.* 379, 715, 173-E13 (1991)

Alphanumeric: He 3-519

He 3-519: A Peculiar Post-LBV, Pre-WN Star? *Kris Davidson, Roberta M. Humphreys, Arsen Hajian, & Yervant Terzian.* 411, 336, 131-D9 (1993)

Alphanumeric: HH 34

Evidence for a Wind-swept Cavity in HH 34? *Alexander Rudolph & William J. Welch.* 395, 488, 148-F3 (1992)

The Bow Shock and Mach Disk of HH 34. *Jon A. Morse, Patrick Hartigan, Gerald Cecil, John C. Raymond, & Steve Heathcote.* 399, 231, 198-B3 (1992)

Circumstellar Molecular Gas of the HH 34 and HH 111 Exciting Stars. *Karl R. Stapelfeldt & Nicholas Z. Scoville.* 408, 239, 86-B1 (1993)

The Molecular Environment of the HH 34 System. *G. Anglada, R. Estalella, R. Mauersberger, J. M. Torrelles, L. F. Rodríguez, J. Cantó, P. T. P. Ho, & P. D'Alessio.* 443, 682, 107-C9 (1995)

Alphanumeric: HH 34*

A Parsec-Scale "Superjet" and Quasi-periodic Structure in the HH 34 Outflow? *John Bally & David Devine.* 428, L65, 142-F8 (1994)

Alphanumeric: HH 46/47

Observations of Entrainment and Time Variability in the HH 47 Jet. *Patrick Hartigan, Jon A. Morse, Steve Heathcote, & Gerald Cecil.* 414, L121, 186-B11 (1993)

Alphanumeric: HH 46 IRS

A Nearly Unipolar CO Outflow from the HH 46–47 System. *Lawrence M. Chernin & Colin R. Masson.* 382, L93, 211-E3 (1991)

Alphanumeric: HH 47A

Fabry-Perot Observations and New Models of the HH 47A and HH 47D Bow Shocks. *Jon A. Morse, Patrick Hartigan, Steve Heathcote, John C. Raymond, & Gerald Cecil.* 425, 738, 91-A1 (1994)

Alphanumeric: HH 47D

Fabry-Perot Observations and New Models of the HH 47A and HH 47D Bow Shocks. *Jon A. Morse, Patrick Hartigan, Steve Heathcote, John C. Raymond, & Gerald Cecil.* 425, 738, 91-A1 (1994)

Alphanumeric: HH 111

Circumstellar Molecular Gas of the HH 34 and HH 111 Exciting Stars. *Karl R. Stapelfeldt & Nicholas Z. Scoville.* 408, 239, 86-B1 (1993)

The Bow Shock and Mach Disk of HH 111V. *Jon A. Morse, Steve Heathcote, Gerald Cecil, Patrick Hartigan, & John C. Raymond.* 410, 764, 123-C5 (1993)

Alphanumeric: HZ 43

Extreme Ultraviolet Observations of HZ 43 and the Local H/He Ratio with the Hopkins Ultraviolet Telescope. *Randy A. Kimble, Arthur F. Davidsen, Knox S. Long, & Paul D. Feldman.* 408, L41, 89-C1 (1993)

Alphanumeric: IRAS 03282+3035

Molecular Hydrogen in the IRAS 03282+3035 Stellar Jet. *John Bally, David Devine, Mark Hereld, & Bernard J. Rauscher.* 418, L75, 245-D7 (1993)

Alphanumeric: IRAS 05338−0624

The Circumstellar Environment of IRAS 05338−0624. *Joseph P. McMullin, Lee G. Mundy, & Geoff A. Blake.* 437, 305, 287-D6 (1994)

Dust Emission from L1641N: An Optically Thick Circumstellar Disk? *H. Chen, J.-H. Zhao, & N. Ohashi.* 450, L71, 245-A1 (1995)

Alphanumeric: IRAS 16293−2422

IRAS 16293−2422: A Very Young Binary System? *Lee G. Mundy, Alwyn Wootten, Bruce A. Wilking, Geoffrey A. Blake, & Anneila I. Sargent.* 385, 306, 15-F5 (1992)

Magnetic Field in a Low-Mass Protostar Disk: Millimeter Polarimetry of IRAS 16293−2422. *Motohide Tamura, Saeko S. Hayashi, Takuya Yamashita, William D. Duncan, & James H. Hough.* 404, L21, 33-F1 (1993)

Vibrationally Excited CS: A New Probe of Conditions in Young Protostellar Systems. *Christopher K. Walker, Philip R. Maloney, & E. Serabyn.* 437, L127, 299-E3 (1994)

Molecular Abundances and Low-Mass Star Formation. II. Organic and Deuterated Species toward IRAS 16293−2422. *Ewine F. van Dishoeck, Geoffrey A. Blake, David J. Jansen, & T. D. Groesbeck.* 447, 760, 186-D12 (1995)

Alphanumeric: IRAS 17380−3031

IRAS 17380−3031: A New Dusty Late WC-Type Wolf-Rayet Star. *Martin Cohen, K. A. van der Hucht, P. M. Williams, & P. S. Thé.* 378, 302, 154-F7 (1991)

Alphanumeric: IRC +10216

CN and HCN in the Infrared Spectrum of IRC +10216. *G. R. Wiedemann, Kenneth H. Hinkle, John J. Keady, D. Deming, & D. E. Jennings.* 382, 321, 204-B10 (1991)

High Spatial Resolution Maps of Circumstellar SiC_2 in IRC +10216. *P. D. Gensheimer, Lauren Likkel, & L. E. Snyder.* 388, L31, 52-C11 (1992)

A Sensitive Search for Rotational Lines of Vibrationally Excited HC_5N in IRC +10°216. *M. B. Bell, P. A. Feldman, & L. W. Avery.* 396, 643, 165-D1 (1992)

The Excitation Temperature of HC_9N in the Circumstellar Envelope of IRC +10216. *M. B. Bell, L. W. Avery, J. M. MacLeod, & H. E. Matthews.* 400, 551, 217-B12 (1992)

Mass-Loss Rates for *IRAS*-bright Red Giants: A Revised Model of Circumstellar CO Emission. *Joel H. Kastner.* 401, 337, 225-B11 (1992)

A Spectral Line Survey of IRC +10216 at Millimeter and Submillimeter Wavelengths. *L. W. Avery, T. Amano, M. B. Bell, P. A. Feldman, J. W. C. Johns, J. M. MacLeod, H. E. Matthews, D. C. Morton, J. K. G. Watson, B. E. Turner, S. S. Hayashi, G. D. Watt, & A. S. Webster.* 83, 363, 62-G3 (1992)

The IRC +10216 Circumstellar Envelope. III. Infrared Molecular Line Profiles. *J. J. Keady & S. T. Ridgway.* 406, 199, 57-E5 (1993)

The Formation of Cyanopolyyne Molecules in IRC +10216. *Isabelle Cherchneff, Alfred E. Glassgold, & Gary A. Mamon.* 410, 188, 114-D12 (1993)

Atomic Carbon in the Envelope of IRC +10216. *Jocelyn Keene, K. Young, T. G. Phillips, Thomas H. Büttgenbach, & John E. Carlstrom.* 415, L131, 200-E1 (1993)

The Location of Warm HC_3N and Warm HC_5N Gas in the Circumstellar Envelope of IRC +10216. *M. B. Bell.* 417, 305, 221-C9 (1993)

The Formation of Carbon Chain Molecules in IRC +10216. *Isabelle Cherchneff & Alfred E. Glassgold.* 419, L41, 252-F9 (1993)

A Laboratory Approach to the Interstellar Sulfide Dust Problem. *B. Begemann, J. Dorschner, T. Henning, H. Mutschke, & E. Thamm.* 423, L71, 54-C1 (1994)

Submillimeter Molecular Line Observations of IRC +10216: Searches for MgH, SiH_2, and HCO^+, and Detection of Hot HCN. *L. W. Avery, M. B. Bell, C. T. Cunningham, P. A. Feldman, R. H. Hayward, J. M. McLeod, H. E. Matthews, & J. D. Wade.* 426, 737, 107-E12 (1994)

Detection of Radio Continuum Emission from Circumstellar Dust around CRL 2688 and IRC +10216. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 429, L33, 150-E1 (1994)

The Molecular Emission-Line Spectrum of IRC +10216 between 330 and 358 GHz. *T. D. Groesbeck, T. G. Phillips, & Geoffrey A. Blake.* 94, 147, 53-F12 (1994)

Exotic Fluoride Molecules in IRC +10216: Confirmation of AlF and Searches for MgF and CaF. *L. M. Ziurys, A. J. Apponi, & T. G. Phillips.* 433, 729, 220-B7 (1994)

The Particle-Size Distribution in the Dust Ejected from IRC +10216. *M. Jura.* 434, 713, 237-E12 (1994)

Broken Symmetry: The Structure of the Dust Envelope of IRC +10216. *Joel H. Kastner & David A. Weintraub.* 434, 719, 237-F7 (1994)

^{26}Al and Circumstellar Envelopes. *A. E. Glassgold.* 438, L111, 20-C9 (1995)

Full Synthesis Maps of Circumstellar SiC_2 in IRC +10216. *P. D. Gensheimer, Lauren Likkel, & L. E. Snyder.* 439, 445, 27-C3 (1995)

The Distribution of HCN, $H^{13}CN$, and CN in IRC +10216. *Aditya Dayal & John H. Bieging.* 439, 996, 38-D7 (1995)

Modeling the Light-Travel-Time Effect on the Far-Infrared Size of IRC +10216. *Edward L. Wright & Frederick K. Baganoff.* 440, 322, 45-E9 (1995)

The Structure of the Dust Shells around IRC +10216. *G. C. Sloan & M. P. Egan.* 444, 452, 119-G1 (1995)

Detection of MgCN in IRC +10216: A New Metal-bearing Free Radical. *L. M. Ziurys, A. J. Apponi, M. Guélin, & J. Cernicharo.* 445, L47, 141-A5 (1995)

Alphanumeric: IRC +10420

VLA Observations of 1612 and 1665 MHz OH Masers Associated with IRC +10420. *G. E. Nedoluha & P. F. Bowers.* 392, 249, 104-A9 (1992)

IRC +10420: A Cool Hypergiant near the Top of the H-R Diagram. *Terry Jay Jones, Roberta M. Humphreys, Robert D. Gehrz, Geoffrey F. Lawrence, Franz-Josef Zickgraf, Harvey Moseley, Sean Casey, William J. Glaccum, Carol J. Koch, Robert Pina, Barbara Jones, Kim Venn, Otmar Stahl, & Sumner G. Starrfield.* 411, 323, 131-C6 (1993)

Observations of 13.5 Micron Rotation-Vibration Lines of SiS in IRC +10216. *R. J. Boyle, J. J. Keady, D. E. Jennings, K. L. Hirsch, & G. R. Wiedemann.* 420, 863, 13-E12 (1994)

Detection of Ammonia Emission toward Oxygen-rich Evolved Stars. *Karl M. Menten & Javier Alcolea.* 448, 416, 197-G10 (1995)

The Massive Post–Red Supergiants IRC +10420 and HD 179821. *Joel H. Kastner & David A. Weintraub.* 452, 833, 276-B7 (1995)

Alphanumeric: IRS 7

A Gaseous Tail Ablated from the Supergiant IRS 7 near the Galactic Center. *E. Serabyn, J. H. Lacy, & J. M. Achtermann.* 378, 557, 159-C9 (1991)

Alphanumeric: KS 1731−260

Sigma Detection of Hard X-Ray Emission from the Soft Transient Type I X-Ray Burster KS 1731−260. *D. Barret, L. Bouchet, P. Mandrou, J. P. Roques, B. Cordier, Ph. Laurent, F. Lebrun, J. Paul, R. Sunyaev, E. Churazov, M. Gilfanov, A. Diachkov, N. Khavenson, B. Novikov, I. Chulkov, & A. Kuznetsov.* 394, 615, 137-B1 (1992)

Alphanumeric: L151−81A/B

The Binary System L151−81A/B: A Potential Test of Accretion Theory. *M. A. Wood & T. D. Oswalt.* 394, L53, 139-D1 (1992)

Alphanumeric: L1551 IRS 5

High-Velocity HCO^+ Emission from L1551 IRS 5: Evidence for Wind-Cloud Interactions. *Alexander Rudolph.* 397, L111, 181-D13 (1992)

Upper Limits to the Detection of Ammonia from Protoplanetary Disks around HL Tauri and L1551-IRS 5. *José F. Gómez, José M. Torrelles, Paul T. P. Ho, Luis F. Rodríguez, & Jorge Cantó.* 414, 333, 174-B6 (1993)

The Circumstellar Molecular Core around L1551 IRS 5. *G. A. Fuller, E. F. Ladd, R. Padman, P. C. Myers, & Fred C. Adams.* 454, 862, 313-F7 (1995)

Alphanumeric: L1551NE

The Circumstellar Density Distribution of L1551NE. *M. Barsony & C. J. Chandler.* 406, L71, 68-E1 (1993)

Radio Continuum Detection of the Exciting Sources of the DG Tauri B and L1551NE Outflows. *Luis F. Rodríguez, Guillem Anglada, & Alejandro Raga.* 454, L149, 316-F5 (1995)

Alphanumeric: LB 1497

Gravitational Redshift for the Pleiad White Dwarf LB 1497. *Gary Wegner, I. Neill Reid, & Robert K. McMahan, Jr.* 376, 186, 127-C6 (1991)

Alphanumeric: LB 11146

Discovery of a Magnetic/Nonmagnetic Double-degenerate Binary System. *James Liebert, P. Bergeron, Gary D. Schmidt, & Rex A. Saffer.* 418, 426, 236-C10 (1993)

Alphanumeric: LHS 1044

Discovery of Two Cool Magnetic White Dwarfs. *P. Bergeron, María-Teresa Ruiz, & S. K. Leggett.* 400, 315, 212-G5 (1992)

Alphanumeric: LHS 1126

The Peculiar Cool White Dwarf LHS 1126 Revisited. *P. Bergeron, María-Teresa Ruiz, S. K. Leggett, D. Saumon, & F. Wesemael.* 423, 456, 51-G5 (1994)

Alphanumeric: LHS 1734

Discovery of Two Cool Magnetic White Dwarfs. *P. Bergeron, María-Teresa Ruiz, & S. K. Leggett.* 400, 315, 212-G5 (1992)

Alphanumeric: LkHα 101

The LkHα 101 Infrared Cluster. *M. Barsony, J. M. Schombert, & K. Kis-Halas.* 379, 221, 165-G1 (1991)

The 1.0–1.3 Micron Spectrum of LkHα 101. *Richard J. Rudy, Peter Erwin, George S. Rossano, & R. C. Puetter.* 383, 344, 216-D7 (1991)

Mapping the Radio Emission from Massive Young Stellar Objects. *Melvin G. Hoare, Janet E. Drew, Tom B. Muxlow, & Richard J. Davis.* 421, L51, 22-B7 (1994)

The Subarcsecond 10 Micron Size of LkHα 101: Constraints on Circumstellar Dust. *R. M. Danen, C. R. Gwinn, & E. E. Bloemhof.* 447, 391, 177-F13 (1995)

Further Mapping of the Radio Emission from Massive Young Stellar Objects. *Melvin G. Hoare & Simon T. Garrington.* 449, 874, 224-F11 (1995)

Alphanumeric: LkHα 198

Infrared Studies of Pre–Main-Sequence Intermediate-Mass Stars: LkHα 198. *Antonella Natta, Francesco Palla, Harold M. Butner, Neal J. Evans II, & Paul M. Harvey.* 391, 805, 98-A1 (1992)

A Deeply Embedded Companion to LkHα 198. *P. O. Lagage, G. Olofsson, S. Cabrit, C. J. Cesarsky, L. Nordh, & J. M. Rodriguez Espinosa.* 417, L79, 230-D6 (1993)

LkHα 198 Revisited. *Harold M. Butner & Antonella Natta.* 440, 874, 55-B10 (1995)

Alphanumeric: LkHα 234

Discovery of a Deeply Embedded Companion to LkHα 234. *David A. Weintraub, Joel H. Kastner, & Ashwin Mahesh.* 420, L87, 15-F1 (1994)

Alphanumeric: LMC R136

Gas near the Center of 30 Doradus As Revealed by *Hubble Space Telescope* Images. *Deidre A. Hunter, Edward J. Shaya, Paul Scowen, J. Jeff Hester, Edward J. Groth, Roger Lynds, & Earl J. O'Neil, Jr.* 444, 758, 126-F11 (1995)

Alphanumeric: LMC X-1

A Broad-Band X-Ray Telescope Observation of the Black Hole Candidate LMC X-1. *Eric M. Schlegel, F. E. Marshall, R. F. Mushotzky, A. P. Smale, K. A. Weaver, P. J. Serlemitsos, R. Petre, & K. M. Jahoda.* 422, 243, 33-B5 (1994)

Alphanumeric: LMC X-3

Discovery of a Long-Term Periodic Variation in LMC X-3. *A. P. Cowley, P. C. Schmidtke, K. Ebisawa, F. Makino, R. A. Remillard, D. Crampton, J. B. Hutchings, S. Kitamoto, & A. Treves.* 381, 526, 197-C1 (1991)

Ultraviolet Observations of the Accretion Disk in LMC X-3. *A. P. Cowley, P. C. Schmidtke, J. B. Hutchings, & D. Crampton.* 429, 826, 156-A1 (1994)

Alphanumeric: LMC X-4

ROSAT Observations of Scattered X-Rays from LMC X-4 in Its Low State. *Jonathan W. Woo, George W. Clark, & Alan M. Levine.* 449, 880, 224-G7 (1995)

Alphanumeric: LS II +34°26

LS II +34°26 is a Low-Mass Post–Asymptotic Giant Branch B Supergiant and Not a Massive Population I B Star Located near the Outer Edge of the Galaxy. *M. Parthasarathy.* 414, L109, 186-A7 (1993)

Alphanumeric: LP 907−037

The Incidence of Magnetism among White Dwarfs: The First Stars below 100 Kilogauss. *Gary D. Schmidt & Paul S. Smith.* 423, L63, 54-B3 (1994)

Alphanumeric: M33 X-7

Accurate Period Determination of an Eclipsing Binary X-Ray Source in M33. *Eric Schulman, Joel N. Bregman, Alfonso Collura, Fabio Reale, & Giovanni Peres.* 418, L67, 245-C6 (1993)

Alphanumeric: MCT 0128−3846

Hot Degenerates in the Montreal-Cambridge-Tololo Survey. II. Two New Hybrid White Dwarfs, MCT 0128−3846 and MCT 0453−2933, and the Nature of the DAB Stars. *F. Wesemael, P. Bergeron, R. Lamontagne, G. Fontaine, A. Beauchamp, S. Demers, M. J. Irwin, J. B. Holberg, S. O. Kepler, & S. Vennes.* 429, 369, 148-F2 (1994)

Alphanumeric: MCT 0453−2933

Hot Degenerates in the Montreal-Cambridge-Tololo Survey. II. Two New Hybrid White Dwarfs, MCT 0128−3846 and MCT 0453−2933, and the Nature of the DAB Stars. *F. Wesemael, P. Bergeron, R. Lamontagne, G. Fontaine, A. Beauchamp, S. Demers, M. J. Irwin, J. B. Holberg, S. O. Kepler, & S. Vennes.* 429, 369, 148-F2 (1994)

Alphanumeric: MWC 349

Positions of the Radio Recombination Line Masers in MWC 349. *P. Planesas, J. Martín-Pintado, & E. Serabyn.* 386, L23, 29-D1 (1992)

Simulated Ratio Recombination Line Emission at 1.3 Centimeters toward MWC 349. *J. Martín-Pintado, R. Gaume, R. Bachiller, K. Johnston, & P. Planesas.* 418, L79, 245-E2 (1993)

Modeling of the Hydrogen Maser Disk in MWC 349. *Victor O. Ponomarev, Howard A. Smith, & Vladimir S. Strelnitski.* 424, 976, 77-A1 (1994)

Alphanumeric: MWC 349A

Time Variations in Millimeter-Wave Radio Recombination Lines from the Be Star MWC 349A. *M. A. Gordon.* 387, 701, 47-D5 (1992)

The Nature of the Radio Recombination Line Emission from MWC 349A. *M. A. Gordon.* 421, 314, 19-G7 (1994)

Rotation in the Ionized Envelope of MWC 349A. *Luis F. Rodríguez & Timothy S. Bastian.* 428, 324, 132-B12 (1994)

Alphanumeric: MWC 560

Observations of the Peculiar Object MWC 560 in Outburst. *A. G. Michalitsianos, S. P. Maran, R. J. Oliversen, B. Bopp, E. Kontizas, A. Dapergolas, & M. Kontizas.* 371, 761, 71-A7 (1991)

Ultraviolet Continuum Variability and Visual Flickering in the Peculiar Object MWC 560. *A. G. Michalitsianos, M. Perez, S. N. Shore, S. P. Maran, M. Karovska, G. Sonneborn, J. R. Webb, Thomas G. Barnes III, Marian L. Frueh, R. J. Oliversen, & S. G. Starrfield.* 409, L53, 111-D8 (1993)

Alphanumeric: MWC 922

The Near-Infrared [Fe II] Lines of MWC 922. *Richard J. Rudy, Peter Erwin, George S. Rossano, & R. C. Puetter.* 398, 278, 185-C1 (1992)

Alphanumeric: MXB 1728−34

SIGMA Hard X-Ray Observations of the Burst Source MXB 1728−34. *A. Claret, A. Goldwurm, B. Cordier, J. Paul, J.-P. Roques, L. Bouchet, M.-C. Schmitz-Fraysse, P. Mandrou, E. Churazov, M. Gilfanov, R. Sunyaev, N. Khavenson, A. Diachkov, B. Novikov, R. Kremnev, & V. Kovtunenko.* 423, 436, 51-E5 (1994)

Alphanumeric: NGC 7538 IRS 9

An Extremely High Velocity CO Outflow from NGC 7538 IRS 9. *George F. Mitchell & Tatsuhiko I. Hasegawa.* 371, L33, 66-E1 (1991)

Alphanumeric: OH 231.8+4.2

Detection of Ammonia Emission toward Oxygen-rich Evolved Stars. *Karl M. Menten & Javier Alcolea.* 448, 416, 197-G10 (1995)

Alphanumeric: PG 0136+251

Two Ultramassive White Dwarfs Found among Candidates for Magnetic Fields. *Gary D. Schmidt, P. Bergeron, James Liebert, & Rex A. Saffer.* 394, 603, 136-G11 (1992)

Alphanumeric: PG 0917+342

Spectroscopic Observations of the Cataclysmic Variable PG 0917+342: An Ultra–Short-Period Nova-like System. *Danuta Dobrzycka & Steve B. Howell.* 388, 614, 57-G6 (1992)

Superhumps in Cataclysmic Binaries. II. PG 0917+342. *David R. Skillman & Joseph Patterson.* 417, 298, 221-B13 (1993)

Alphanumeric: PG 1159−035

Asteroseismology of the DOV Star PG 1159−035 with the Whole Earth Telescope. *D. E. Winget, R. E. Nather, J. C. Clemens, J. Provencal, S. J. Kleinman, P. A. Bradley, M. A. Wood, C. F. Claver, M. L. Frueh, A. D. Grauer, B. P. Hine, C. J. Hansen, G. Fontaine, N. Achilleos, D. T. Wickramasinghe, T. M. K. Marar, S. Seetha, B. N. Ashoka, D. O'Donoghue, B. Warner, D. W. Kurtz, D. A. Buckley, J. Brickhill, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, J. E. Solheim, A. Kanaan, S. O. Kepler, G. W. Henry, & S. D. Kawaler.* 378, 326, 155-A10 (1991)

Thick to Thin: The Evolutionary Connection between PG 1159 Stars and the Thin Helium-enveloped Pulsating White Dwarf GD 358. *Benjamin T. Dehner & Steven D. Kawaler.* 445, L141, 151-F9 (1995)

Alphanumeric: PG 1413+015

Spectroscopic Observations of the Detached Binary PG 1413+015. *Michael S. Fulbright, James Liebert, P. Bergeron, & Richard Green.* 406, 240, 58-A11 (1993)

Alphanumeric: PG 1658+441

Two Ultramassive White Dwarfs Found among Candidates for Magnetic Fields. *Gary D. Schmidt, P. Bergeron, James Liebert, & Rex A. Saffer.* 394, 603, 136-G11 (1992)

Alphanumeric: PG 1707+427

On the Pulsational Stability of the Pre–White Dwarf Star PG 1707+427. *Albert D. Grauer, Richard F. Green, & James Liebert.* 399, 686, 206-D7 (1992)

Alphanumeric: PG 2131+066

Whole Earth Telescope Observations and Seismological Analysis of the Pre–White Dwarf PG 2131+066. *S. D. Kawaler, M. S. O'Brien, J. C. Clemens, R. E. Nather, D. E. Winget, T. K. Watson, K. Yanagida, J. S. Dixson, P. A. Bradley, M. A. Wood, D. J. Sullivan, S. J. Kleinman, E. Meištas, E. M. Leibowitz, P. Moskalik, S. Zoła, G. Pajdosz, J. Krzesiński, J.-E. Solheim, A. Bruvold, D. O'Donoghue, M. Katz, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, A. Kanaan, S. O. Kepler, O. Giovannini, J. L. Provencal, & C. J. Hansen.* 450, 350, 232-G1 (1995)

Alphanumeric: PSR 0655+64

Spectroscopy of the White Dwarf Companions of PSR 0655+64 and PSR 0820+02. *M. H. van Kerkwijk & S. R. Kulkarni.* 454, L141, 316-E3 (1995)

Alphanumeric: PSR 0656+14

The Proper Motion of the Soft X-Ray–emitting Radio Pulsar PSR 0656+14. *R. J. Thompson, Jr., F. A. Córdova, R. M. Hjellming, & E. B. Fomalont.* 366, L83, 11-E1 (1991)

Alphanumeric: PSR 0820+02

Spectroscopy of the White Dwarf Companions of PSR 0655+64 and PSR 0820+02. *M. H. van Kerkwijk & S. R. Kulkarni.* 454, L141, 316-E3 (1995)

Alphanumeric: PSR 0833−45

Explosion of a Rotating Neutron Star near the Minimum Mass. *Monica Colpi, Stuart L. Shapiro, & Saul A. Teukolsky.* 369, 422, 43-A5 (1991)

HEAO 3 Upper Limits to Pulsed Gamma-Ray Emission from PSR 1509−58 and PSR 0833−45. *M. P. Ulmer, W. R. Purcell, W. A. Wheaton, & W. A. Mahoney.* 369, 485, 43-F12 (1991)

Alphanumeric: PSR 1509−58

HEAO 3 Upper Limits to Pulsed Gamma-Ray Emission from PSR 1509−58 and PSR 0833−45. *M. P. Ulmer, W. R. Purcell, W. A. Wheaton, & W. A. Mahoney.* 369, 485, 43-F12 (1991)

Alphanumeric: PSR 1744−24A

Mechanisms for Pulsar Eclipse. *David Eichler.* 370, L27, 53-D11 (1991)

On the Nature and Evolution of the Windy Binary Pulsar PSR 1744−24A. *Jacob Shaham & Marco Tavani.* 377, 588, 147-A11 (1991)

Alphanumeric: PSR 1855+09

High-Precision Timing of Millisecond Pulsars. I. Astrometry and Masses of the PSR 1855+09 System. *M. F. Ryba & J. H. Taylor.* 371, 739, 70-F9 (1991)

Alphanumeric: PSR 1937+21

Refractive Interstellar Scintillation and Millisecond Pulsar Timing. *Wayne Hu, Roger W. Romani, & Daniel R. Stinebring.* 366, L33, 6-D9 (1991)

Alphanumeric: PSR 1957+20

Mechanisms for Pulsar Eclipse. *David Eichler.* 370, L27, 53-D11 (1991)

High-Precision Timing of Millisecond Pulsars. II. Astrometry, Orbital Evolution, and Eclipses of PSR 1957+20. *M. F. Ryba & J. H. Taylor.* 380, 557, 185-B7 (1991)

The Continuum Eclipse of PSR 1957+20. *A. S. Fruchter & W. M. Goss.* 384, L47, 11-C9 (1992)

Alphanumeric: PSR B1758−23

A Young, Glitching Pulsar near the Direction of W28. *V. M. Kaspi, A. G. Lyne, R. N. Manchester, S. Johnston, N. D'Amico, & S. L. Shemar.* 409, L57, 111-E1 (1993)

Alphanumeric: PSR B1802−07

The Masses of Two Binary Neutron Star Systems. *S. E. Thorsett, Z. Arzoumanian, M. M. McKinnon, & J. H. Taylor.* 405, L29, 47-E8 (1993)

Alphanumeric: PSR B2303+46

The Masses of Two Binary Neutron Star Systems. *S. E. Thorsett, Z. Arzoumanian, M. M. McKinnon, & J. H. Taylor.* 405, L29, 47-E8 (1993)

Alphanumeric: R127

The Asymmetric Wind of R127. *R. E. Schulte-Ladbeck, C. Leitherer, G. C. Clayton, C. Robert, M. R. Meade, L. Drissen, A. Nota, & W. Schmutz.* 407, 723, 79-E1 (1993)

Coronographic Imaging of the Bipolar Nebula around the Luminous Blue Variable R127. *Mark Clampin, Antonella Nota, David A. Golimowski, Claus Leitherer, & Samuel T. Durrance.* 410, L35, 118-C5 (1993)

Alphanumeric: R136a2

GHRS Spectroscopy of Individual Stars in R136a. *Sara R. Heap, Dennis Ebbets, Eliot M. Malumuth, Stephen P. Maran, Alex de Koter, & Ivan Hubeny.* 435, L39, 252-A11 (1994)

Alphanumeric: R136a5

GHRS Spectroscopy of Individual Stars in R136a. *Sara R. Heap, Dennis Ebbets, Eliot M. Malumuth, Stephen P. Maran, Alex de Koter, & Ivan Hubeny.* 435, L39, 252-A11 (1994)

Alphanumeric: RE 0623−377

Two New Extremely Iron-rich Hot DA White Dwarfs and the Nature of the EUV Opacity. *J. B. Holberg, M. A. Barstow, D. A. H. Buckley, A. Chen, S. Dreizler, M. C. Marsh, D. O'Donoghue, E. M. Sion, R. W. Tweedy, G. Vauclair, & K. Werner.* 416, 806, 213-D13 (1993)

Alphanumeric: RE 0751+14

The Discovery of Variable Polarization over the 13.9 Minute Spin Period of the Intermediate Polar RE 0751+14. *V. Piirola, P. Hakala, & G. V. Coyne, S.J.* 410, L107, 126-C3 (1993)

Alphanumeric: RE 1149+28

Asymmetric Mass Accretion in the Magnetic Cataclysmic Variable RE 1149+28. *Steve B. Howell, Martin M. Sirk, Roger F. Malina, J. P. D. Mittaz, & K. O. Mason.* 439, 991, 38-C11 (1995)

Alphanumeric: RE 1938−461

Extreme Ultraviolet Explorer Observations of the Magnetic Cataclysmic Variable RE 1938−461. *John K. Warren, John V. Vallerga, Christopher W. Mauche, Koji Mukai, & Oswald H. W. Siegmund.* 414, L69, 185-D2 (1993)

Alphanumeric: RE 2107−05

A Broad Observational Study of the Eclipsing Magnetic Cataclysmic Variable RE 2107−05. *Jason Glenn, Steve B. Howell, Gary D. Schmidt, James Liebert, Albert D. Grauer, & R. Mark Wagner.* 424, 967, 76-G3 (1994)

Alphanumeric: RE 2214−492

Two New Extremely Iron-rich Hot DA White Dwarfs and the Nature of the EUV Opacity. *J. B. Holberg, M. A. Barstow, D. A. H. Buckley, A. Chen, S. Dreizler, M. C. Marsh, D. O'Donoghue, E. M. Sion, R. W. Tweedy, G. Vauclair, & K. Werner.* 416, 806, 213-D13 (1993)

The Discovery of Ni V in the Photospheres of the Hot DA White Dwarfs RE 2214−492 and G191-B2B. *J. B. Holberg, I. Hubeny, M. A. Barstow, T. Lanz, E. M. Sion, & R. W. Tweedy.* 425, L105, 94-G5 (1994)

Alphanumeric: RJ 051542+0104.7

RJ 051542+0104.7: A New Magnetic, Eclipsing, Cataclysmic Variable. *Peter M. Garnavich, Paula Szkody, Russell M. Robb, David R. Zurek, & D. W. Hoard.* 435, L141, 260-C11 (1994)

Alphanumeric: RNO 91

Infrared Spectroscopy and Imaging Polarimetry of the Disk around the T Tauri Star RNO 91. *David A. Weintraub, Stephen C. Tegler, Joel H. Kastner, & Terrence Rettig.* 423, 674, 57-A3 (1994)

Alphanumeric: RX J0045.4+4154

RX J0045.4+4154: A Recurrent Supersoft X-Ray Transient in M31. *N. E. White, P. Giommi, J. Heise, L. Angelini, & S. Fantasia.* 445, L125, 151-D5 (1995)

Alphanumeric: RX J0515.41+0104.6

The Long-Period AM Herculis–like Cataclysmic Variable RXJ 051541+0104.6. *Frederick M. Walter, Scott J. Wolk, & Nancy R. Adams.* 440, 834, 54-E10 (1995)

Properties of the Exceptionally Long-Period AM Herculis System RX J0515.41+0104.6. *J. Frank, J.-P. Lasota, & G. Chanmugam.* 453, 446, 287-C1 (1995)

Alphanumeric: RX J0515.6+0105

RX J0515.6+0105: An Unusual, Eclipsing, Magnetic Cataclysmic Variable. *A. W. Shafter, K. Reinsch, K. Beuermann, K. A. Misselt, D. A. H. Buckley, V. Burwitz, & A. D. Schwope.* 443, 319, 99-E8 (1995)

Alphanumeric: S-154

S-154 in the Large Magellanic Cloud: Spectral Evolution from a Luminous Fe II Variable to a Symbiotic-like Star. *R. A. Remillard, E. Rosenthal, I. R. Tuohy, D. A. Schwartz, D. A. H. Buckley, & R. J. V. Brissenden.* 396, 668, 165-F1 (1992)

Alphanumeric: S106IR

Mapping the Radio Emission from Massive Young Stellar Objects. *Melvin G. Hoare, Janet E. Drew, Tom B. Muxlow, & Richard J. Davis.* 421, L51, 22-B7 (1994)

Alphanumeric: 2S 0114+65

EXOSAT Observations of the X-Ray Source 2S 0114+65. *Krishna M. V. Apparao, P. Bisht, & K. P. Singh.* 371, 772, 71-B6 (1991)

ROSAT/Optical Observations of 2S 0114+65: A Study of the 2.8 Hour Periodic Outbursts. *John P. Finley, MaryJane Taylor, & Tomaso Belloni.* 429, 356, 148-D13 (1994)

Alphanumeric: 2S 0921−630

Radiation Hydrodynamic Models of Eclipsing Low-Mass X-Ray Binaries. *Stephen D. Murray, D. Tod Woods, John I. Castor, Richard I. Klein, & Christopher F. McKee.* 454, L133, 316-D2 (1995)

Alphanumeric: 2S 1543−624

X-Ray Spectral Study of Two X-Ray Binaries: 4U 1957+11 and 2S 1543−624. *Kulinder P. Singh, Krishna M. V. Apparao, & Ralph P. Kraft.* 421, 753, 27-E9 (1994)

Alphanumeric: SAO 26804

The Dust Disk around the Vega-Excess Star SAO 26804. *C. J. Skinner, R. J. Sylvester, J. R. Graham, M. J. Barlow, M. Meixner, E. Keto, J. F. Arens, & J. G. Jernigan.* 444, 861, 128-C13 (1995)

Alphanumeric: SAO 244567

Narrowband *HST* Imagery of the Young Planetary Nebula Henize 1357. *M. Bobrowsky.* 426, L47, 103-F5 (1994)

Alphanumeric: SGR 0525−66

Postburst Nebular Emission of Soft Gamma-Ray Repeaters. *Marco Tavani.* 431, L83, 191-D10 (1994)

Physics of Magnetospheric Emission in Soft Gamma-Ray Repeaters. *Fulvio Melia & Marco Fatuzzo.* 438, 904, 16-E7 (1995)

Alphanumeric: SGR 1806−20

Soft Gamma Repeater 1806−20: Weak Evidence for a Periodicity following the Bursts. *A. Ulmer, E. E. Fenimore, R. I. Epstein, C. Ho, R. W. Klebesadel, J. G. Laros, & F. Delgado.* 418, 395, 235-G13 (1993)

Postburst Nebular Emission of Soft Gamma-Ray Repeaters. *Marco Tavani.* 431, L83, 191-D10 (1994)

The X-Ray Spectrum of the Soft Gamma Repeater 1806−20. *E. E. Fenimore, J. G. Laros, & A. Ulmer.* 432, 742, 205-C3 (1994)

Characteristics of the Persistent Emission of SGR 1806−20. *T. Sonobe, T. Murakami, S. R. Kulkarni, T. Aoki, & A. Yoshida.* 436, L23, 268-F1 (1994)

Optical and Infrared Observations of SGR 1806−20. *S. R. Kulkarni, K. Matthews, G. Neugebauer, I. N. Reid, M. H. van Kerkwijk, & G. Vasisht.* 440, L61, 57-E12 (1995)

A Luminous Companion to SGR 1806−20. *M. H. van Kerkwijk, S. R. Kulkarni, K. Matthews, & G. Neugebauer.* 444, L33, 121-F1 (1995)

Alphanumeric: SMC R31

Hubble Space Telescope Spectra of the Phase-modulated Wind in the SMC O+WR Binary R31. *J. B. Hutchings, L. Bianchi, & S. C. Morris.* 410, 803, 123-F10 (1993)

Alphanumeric: SMC X-1

The Discovery of an X-Ray Burst and a Study of Aperiodic Variability from SMC X-1. *L. Angelini, L. Stella, & N. E. White.* 371, 332, 64-C1 (1991)

Observations of the Small Magellanic Cloud by the *Vela 5B* X-Ray Monitor. *L. Whitlock & James C. Lochner.* 437, 841, 297-B7 (1994)

Wind Dynamics in SMC X-1. I. Hydrodynamic Simulation. *John M. Blondin & Jonathan W. Woo.* 445, 889, 147-D13 (1995)

Wind Dynamics in SMC X-1. II. *Ginga* and *ROSAT* Observations. *Jonathan W. Woo, George W. Clark, John M. Blondin, Timothy R. Kallman, & Fumiaki Nagase.* 445, 896, 147-E10 (1995)

Alphanumeric: SN 1937C

Discovery of Cepheids in IC 4182: Absolute Peak Brightness of SN Ia 1937C and the Value of H_0. *A. Saha, Lukas Labhardt, Hans Schwengeler, F. D. Macchetto, N. Panagia, Allan Sandage, & G. A. Tammann.* 425, 14, 80-C6 (1994)

Alphanumeric: SN 1978K

SN 1978K: An Extraordinary Supernova in the Nearby Galaxy NGC 1313. *Stuart Ryder, Lister Staveley-Smith, Michael Dopita, Robert Petre, Edward Colbert, David Malin, & Eric Schlegel.* 416, 167, 203-B6 (1993)

Alphanumeric: SN 1979C

The 10 Year Radio Light Curves for SN 1979C. *Kurt W. Weiler, Schuyler D. Van Dyk, Nino Panagia, Richard A. Sramek, & Jennifer L. Discenna.* 380, 161, 178-B1 (1991)

Alphanumeric: SN 1984L

The Late-Time Light Curve of SN 1984L. *Douglas A. Swartz & J. Craig Wheeler.* 379, L13, 169-B7 (1991)

Alphanumeric: SN 1987A

Instabilities and Clumping in SN 1987A. I. Early Evolution in Two Dimensions. *Bruce Fryxell, Ewald Müller, & David Arnett.* 367, 619, 21-A5 (1991)

First Results from the Faint Object Camera: SN 1987A. *P. Jakobsen, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, W. B. Sparks, R. P. Kirshner, & N. Panagia.* 369, L63, 46-B1 (1991)

A Large Supershell H II Region Complex in the Large Magellanic Cloud and the Interstellar Environment of SN 1987A. *Frederick C. Bruhweiler, Michelle A. Fitzurka, & Theodore R. Gull.* 370, 551, 55-C9 (1991)

Bremsstrahlung and Energetic Electrons in Supernovae. *Donald D. Clayton & Lih-Sin The.* 375, 221, 113-F12 (1991)

Analysis of SN 1987A Polarimetry. *David J. Jeffery.* 375, 264, 114-C5 (1991)

Properties of the SN 1987A Circumstellar Ring and the Distance to the Large Magellanic Cloud. *N. Panagia, R. Gilmozzi, F. Macchetto, H.-M. Adorf, & R. P. Kirshner.* 380, L23, 181-D1 (1991)

Circumstellar Emission from SN 1987A. *Peter Lundqvist & Claes Fransson.* 380, 575, 185-D1 (1991)

Catalog of SN 1987A Polarimetry Corrected for Interstellar Polarization. *David J. Jeffery.* 77, 405, 50-B5 (1991)

Rayleigh-Taylor Instability in the Asymmetric Supernova Explosion. *Shoichi Yamada & Katsuhiko Sato.* 382, 594, 208-G12 (1991)

Massive Star Evolution and SN 1987A. *David Arnett.* 383, 295, 215-G8 (1991)

Hydrogen Recombination at High Optical Depth and the Spectrum of SN 1987A. *Yueming Xu, Richard McCray, Ernesto Oliva, & Sofia Randich.* 386, 181, 26-D3 (1992)

Excitation of Pressure Modes in Common Envelopes. *Noam Soker.* 386, 190, 26-E1 (1992)

Compton Telescope Observations of Gamma Rays from SN 1987A. *Farid Ait-Ouamer, Alan D. Kerrick, Terrence J. O'Neill, O. Tumay Tumer, Allen D. Zych, & R. Stephen White.* 386, 715, 34-B11 (1992)

Postexplosion Hydrodynamics of SN 1987A. *Marc Herant & Willy Benz.* 387, 294, 40-E9 (1992)

The [O I] λλ6300,6364 Doublet of SN 1987A. *Hongwei Li & Richard McCray.* 387, 309, 40-F12 (1992)

Line Fluorescence from the Ring around SN 1987A. *Eli Dwek & James E. Felten.* 387, 551, 45-E1 (1992)

Gamma-Ray Deposition and Nonthermal Excitation in Supernovae. *Cecilia Kozma & Claes Fransson.* 390, 602, 82-G1 (1992)

The Ring around SN 1987A and Rotation of the Progenitor. *Y. Eriguchi, H. Yamaoka, K. Nomoto, & M. Hashimoto.* 392, 243, 104-A1 (1992)

Postcollapse Hydrodynamics of SN 1987A: Two-dimensional Simulations of the Early Evolution. *Marc Herant, Willy Benz, & Stirling Colgate.* 395, 642, 151-B13 (1992)

Carbon Monoxide in SN 1987A. *Weihong Liu, A. Dalgarno, & S. Lepp.* 396, 679, 165-G1 (1992)

Formation of the Circumstellar Shell around SN 1987A. *John M. Blondin & Peter Lundqvist.* 405, 337, 45-C13 (1993)

The Ca II Emission Lines of SN 1987A. *Hongwei Li & Richard McCray.* 405, 730, 52-B9 (1993)

Interacting Massive Binaries, H-R Diagram of the Large Magellanic Cloud and SN 1987A. *N. Rathnasree.* 411, 848, 140-D1 (1993)

Evidence for Hydrated Silicates toward SN 1987A. *Ralf Timmermann & Harold P. Larson.* 415, 820, 198-A13 (1993)

Magnetic Shaping of Planetary Nebulae and Other Stellar Wind Bubbles. *Roger A. Chevalier & Ding Luo.* 421, 225, 18-G1 (1994)

X-Ray Enhancement of SN 1987A Due to Interaction with Its Ringlike Nebula. *Kuniaki Masai & Ken'ichi Nomoto.* 424, 924, 76-C3 (1994)

Nickel Bubble Instability and Mixing in SN 1987A. *Mikhail Basko.* 425, 264, 83-E5 (1994)

Silicon Monoxide in SN 1987A. *Weihong Liu & A. Dalgarno.* 428, 769, 139-G5 (1994)

Galactic Stars Applied to Tests of the Criterion for Convection and Semiconvection in an Inhomgeneous Star. *Richard B. Stothers & Chao-wen Chin.* 431, 797, 188-E6 (1994)

Energy Deposition and K-Shell Ionization of Supernovae. *Lih-Sin The, William T. Bridgman, & Donald D. Clayton.* 93, 531, 50-C3 (1994)

Ultraviolet Observations of SN 1987A with the *IUE* Satellite. *Chun S. J. Pun, Robert P. Kirshner, George Sonneborn, Peter Challis, George Nassiopoulos, Richard Arquilla, D. Michael Crenshaw, Chris Shrader, Terry Teays, Angelo Cassatella, Roberto Gilmozzi, Antonio Talavera, Willem Wamsteker, Claes Fransson, & Nino Panagia.* 99, 223, 37-B13 (1995)

The Oxygen Temperature of SN 1987A. *Weihong Liu & A. Dalgarno.* 454, 472, 305-G1 (1995)

Alphanumeric: SN 1988A

SN 1988A in M58: Departure from ^{56}Co Decay 700 Days after Explosion. *P. Ruiz-Lapuente, M. Kidger, G. Gómez, R. Canal, & R. López.* 378, L41, 162-E1 (1991)

Alphanumeric: SN 1990N

Premaximum Observations of the Type Ia SN 1990N. *Bruno Leibundgut, Robert P. Kirshner, Alexei V. Filippenko, Joseph C. Shields, Craig B. Foltz, Mark M. Phillips, & George Sonneborn.* 371, L23, 66-D1 (1991)

Possible Models for the Type Ia Supernova 1990N. *Toshikazu Shigeyama, Ken'ichi Nomoto, Hitoshi Yamaoka, & Friedrich-Karl Thielemann.* 386, L13, 29-C1 (1992)

Alphanumeric: SN 1991T

The Peculiar Type Ia SN 1991T: Detonation of a White Dwarf? *Alexei V. Filippenko, Michael W. Richmond, Thomas Matheson, Joseph C. Shields, E. Margaret Burbidge, Ross D. Cohen, Mark Dickinson, Matthew A. Malkan, Brant Nelson, Jochen Pietz, David Schlegel, Patrick Schmeer, Hyron Spinrad, Charles C. Steidel, Hien D. Tran, & William Wren.* 384, L15, 6-C1 (1992)

Alphanumeric: SR 3

Diffuse Band Profiles in the ρ Ophiuchi Cloud. *C. Gregory Seab & Theodore P. Snow, Jr.* 443, 698, 107-E1 (1995)

Alphanumeric: SS 433

Magnetic Focusing of Precessing Jets. *Christopher S. Kochanek.* 371, 289, 63-F7 (1991)

Constraints on the Physical Properties of Optical Bullets in SS 433. *John C. Brown, Joseph P. Cassinelli, & George W. Collins II.* 378, 307, 154-G1 (1991)

Spiral Shocks and Subday Variability in SS 433. *Sandip K. Chakrabarti & T. Matsuda.* 390, 639, 83-C1 (1992)

The Nature of the Doppler Shift Residuals and Some Peculiar Phenomena of SS 433. *T. Iijima.* 410, 295, 115-F10 (1993)

Interaction of a Jet with a Radiation Pressure–dominated Atmosphere: The Case of SS 433. *Nahum Arav & Mitchell C. Begelman.* 413, 700, 165-B8 (1993)

Search for Gamma-Ray Emission Lines from SS 433. II. 1980–1989. *B. J. Geldzahler & H. A. Geller.* 420, 655, 10-G9 (1994)

An Analysis of the Radial Velocity Residuals for Various Models of SS 433. *George W. Collins II & Christopher J. Garasi.* 431, 836, 189-B1 (1994)

Inertial Confinement of Astrophysical Jets. *W. Peter & D. Eichler.* 438, 244, 4-F11 (1995)

Alphanumeric: SVS 13

An Optical/Infrared Outburst in the Exciting Source of HH 7–11. *Jochen Eislöffel, Eike Günther, Frederic V. Hessman, Reinhard Mundt, Ralf Poetzel, John S. Carr, Steven Beckwith, & Tom P. Ray.* 383, L19, 219-C7 (1991)

Alphanumeric: 4U 0115+63

Phase Coherence for TeV/PeV Binary Sources. *D. A. Lewis, R. C. Lamb, & S. D. Biller.* 369, 479, 43-F4 (1991)

Search for TeV Emission from 4U 0115+63. *D. J. Macomb, M. F. Cawley, D. J. Fegan, A. M. Hillas, P. W. Kwok, R. C. Lamb, M. J. Lang, D. A. Lewis, P. T. Reynolds, G. Vacanti, & T. C. Weekes.* 376, 738, 135-D12 (1991)

Alphanumeric: 4U 0142+61

The Discovery of 8.7 Second Pulsations from the Ultrasoft X-Ray Source 4U 0142+61. *G. L. Israel, S. Mereghetti, & L. Stella.* 433, L25, 214-G5 (1994)

Alphanumeric: 4U 0614+09

Spectral Variations in the Low-Mass X-Ray Binary 4U 0614+09. *K. P. Singh & K. M. V. Apparao.* 431, 826, 189-A1 (1994)

EXOSAT Observations of the Low-Luminosity X-Ray Burster 4U 0614+091: Evidence for a Hard Power-Law Tail. *Didier Barret & Jonathan E. Grindlay.* 440, 841, 54-F6 (1995)

Alphanumeric: 4U 1538−52

Multimission Observations of 4U 1538−52. *L. R. Cominsky & F. Moraes.* 370, 670, 56-F10 (1991)

Alphanumeric: 4U 1608−52

Recurrence Times and Periodicities in 4U 1608−52 as Observed by *VELA 5B*. *James C. Lochner & Diane Roussel-Dupré.* 435, 840, 257-F1 (1994)

Alphanumeric: 4U 1626−67

Neon Line Emission in the X-Ray Spectrum of the Pulsar 4U 1626−67. *L. Angelini, N. E. White, F. Nagase, T. R. Kallman, A. Yoshida, T. Takeshima, C. Becker, & F. Paerels.* 449, L41, 216-F3 (1995)

Alphanumeric: 4U 1630−47

Periodic Outbursts from the Ultrasoft X-Ray Transient 4U 1630−47. *A. N. Parmar, L. Angelini, & N. E. White.* 452, L129, 280-C10 (1995)

Alphanumeric: 4U 1957+11

X-Ray Spectral Study of Two X-Ray Binaries: 4U 1957+11 and 2S 1543−624. *Kulinder P. Singh, Krishna M. V. Apparao, & Ralph P. Kraft.* 421, 753, 27-E9 (1994)

Alphanumeric: 4U 2206+54

EXOSAT Observations of the Be/X-Ray Binary 4U 2206+54. *Priyamvada Saraswat & Krishna M. V. Apparao.* 401, 678, 231-A1 (1992)

Alphanumeric: 4U/MXB 1820−30

Winds from Neutron Stars and Strong Type I X-Ray Bursts. *Luciano Nobili, Roberto Turolla, & Iosif Lapidus.* 433, 276, 211-F11 (1994)

Alphanumeric: WD 0552−041

Continuous Absorption by He_2^+ and H_2^+ in Cool White Dwarfs. *P. C. Stancil.* 430, 360, 163-F3 (1994)

Stellar Activity at the End of the Main Sequence: GHRS Observations of the M8 Ve Star VB 10. *Jeffrey L. Linsky, Brian E. Wood, Alexander Brown, Mark S. Giampapa, & Carol Ambruster.* 455, 670, 331-B10 (1995)

Alphanumeric: WD 0637+477

Discovery of a Sub-Megagauss Magnetic White Dwarf through Spectropolarimetry. *Gary D. Schmidt, H. S. Stockman, & Paul S. Smith.* 398, L57, 188-A7 (1992)

Alphanumeric: WD 0752−676

Continuous Absorption by He_2^+ and H_2^+ in Cool White Dwarfs. *P. C. Stancil.* 430, 360, 163-F3 (1994)

Alphanumeric: WD 0950+139

JHK Photometry of WD 0950+139. *Michael S. Fulbright & James Liebert.* 410, 275, 115-E1 (1993)

Alphanumeric: WD 1334+039

Continuous Absorption by He_2^+ and H_2^+ in Cool White Dwarfs. *P. C. Stancil.* 430, 360, 163-F3 (1994)

Alphanumeric: WDHS 1

A Very Hot, Hydrogen-rich, White Dwarf Planetary Nucleus. *James Liebert, P. Bergeron, & R. W. Tweedy.* 424, 817, 75-A3 (1994)

Alphanumeric: WGA J1047.1+6335

A New Magnetic Cataclysmic Variable: WGA J1047.1+6335. *K. P. Singh, P. Szkody, P. Barrett, N. E. White, E. Fierce, A. Silber, D. W. Hoard, P. J. Hakala, V. Piirola, & K. Sohl.* 453, L95, 298-F4 (1995)

Alphanumeric: WGA J1802.1+1804

Identification of the Soft X-Ray Source WGA J1802.1+1804 with a New Magnetic Cataclysmic Variable. *Paula Szkody, Andrew Silber, D. W. Hoard, E. Fierce, K. P. Singh, P. Barrett, E. Schlegel, & V. Piirola.* 455, L43, 325-A6 (1995)

Alphanumeric: WL 16

The 8–13 Micron Spectrum of the Young Stellar Object WL 16. *M. S. Hanner, A. T. Tokunaga, & T. R. Geballe.* 395, L111, 154-C12 (1992)

Alphanumeric: WR 6

The Structure of Wolf-Rayet Winds. I. Observation of Ionization Stratification in WR 6 and WR 111. *Regina E. Schulte-Ladbeck, Philippe R. J. Eenens, & Kevin Davis.* 454, 917, 314-D11 (1995)

Alphanumeric: WR 111

The Structure of Wolf-Rayet Winds. I. Observation of Ionization Stratification in WR 6 and WR 111. *Regina E. Schulte-Ladbeck, Philippe R. J. Eenens, & Kevin Davis.* 454, 917, 314-D11 (1995)

Alphanumeric: X1323−619

Discovery with the Sigma Telescope of Hard X-Rays from the Globular Cluster Terzan 2. *D. Barret, S. Mereghetti, J. P. Roques, P. Mandrou, L. Salotti, F. Lebrun, Ph. Laurent, J. Ballet, E. Churazov, M. Gifanov, R. Sunyaev, N. Khavenson, I. Chulkov, B. Novikov, A. Kuznetzov, & A. Dyachkov.* 379, L21, 169-C1 (1991)

Alphanumeric: X1822−371

Radiation Hydrodynamic Models of Eclipsing Low-Mass X-Ray Binaries. *Stephen D. Murray, D. Tod Woods, John I. Castor, Richard I. Klein, & Christopher F. McKee.* 454, L133, 316-D2 (1995)

Alphanumeric: X1850−087

X-Ray Spectrum and Time Variation of X1850−087 in the Globular Cluster NGC 6712. *Shunji Kitamoto, Hiroshi Tsunemi, & Diane Roussel-Dupre.* 391, 220, 88-F7 (1992)

Alphanumeric: XB 1916−053

Ginga Observations of the Dipping Low-Mass X-Ray Binaries XB 1916−053 and EXO 0748−676. *Alan P. Smale, Koji Mukai, O. Rees Williams, Mark H. Jones, & Robin H. D. Corbet.* 400, 330, 213-A10 (1992)

STARS: INTERIORS

Application of Oxygen-enhanced Evolutionary Sequences to the Horizontal Branch of M15. *Ben Dorman, Young-Wook Lee, & Don A. VandenBerg.* 366, 115, 2-D11 (1991)

Mixing Length and Opacity Effects: Deep Convective Envelopes on the Asymptotic Giant Branch. *I.-Juliana Sackmann & Arnold I. Boothroyd.* 366, 529, 9-E7 (1991)

Evolutionary Models of Halo Stars with Rotation. I. Evidence for Differential Rotation with Depth in Stars. *Marc H. Pinsonneault, Constantine P. Deliyannis, & Pierre Demarque.* 367, 239, 15-A12 (1991)

Cold Nuclear Fusion in Dense Metallic Hydrogen. *Charles J. Horowitz.* 367, 288, 15-E13 (1991)

Adiabatic Properties of Pulsating DA White Dwarfs. I. The Treatment of the Brunt-Väisälä Frequency and the Region of Period Formation. *P. Brassard, G. Fontaine, F. Wesemael, S. D. Kawaler, & M. Tassoul.* 367, 601, 20-F11 (1991)

Instabilities and Clumping in SN 1987A. I. Early Evolution in Two Dimensions. *Bruce Fryxell, Ewald Müller, & David Arnett.* 367, 619, 21-A5 (1991)

Neutron Star Thermal Evolution. *Kenneth A. Van Riper.* 75, 449, 6-G7 (1991)

Asteroseismology of White Dwarf Stars. I. Adiabatic Results. *P. A. Bradley & D. E. Winget.* 75, 463, 7-A13 (1991)

Numerical Simulations of Off-Center Detonations in Helium Shells. *Eli Livne & Ami S. Glasner.* 370, 272, 50-E12 (1991)

Turbulent Compressible Convection. *Fausto Cattaneo, Nicholas H. Brummell, Juri Toomre, Andrea Malagoli, & Neal E. Hurlburt.* 370, 282, 50-F10 (1991)

Stellar Turbulent Convection: A New Model and Applications. *V. M. Canuto & I. Mazzitelli.* 370, 295, 51-A1 (1991)

Helium Star Cataclysmics. *Icko Iben, Jr., & Alexander V. Tutukov.* 370, 615, 56-B5 (1991)

Meridional Circulation and Diffusion in A and Early F Stars. *Paul Charbonneau & Georges Michaud.* 370, 693, 57-A10 (1991)

Lithium in the Most Extreme Halo Stars; Trends with Metallicity. *Constantine P. Deliyannis & Pierre Demarque.* 370, L89, 59-E5 (1991)

He Stars and He-accreting CO White Dwarfs. *Marco Limongi & Amedeo Tornambè.* 371, 317, 64-A9 (1991)

Carbon Isotope Ratios along the Giant Branch of M67. *Kalpana Krishnaswamy Gilroy & Jeffery A. Brown.* 371, 578, 68-F7 (1991)

Diffusion and Mixing of Lithium and Helium in Population II Dwarfs. *Charles R. Proffitt & Georges Michaud.* 371, 584, 68-G1 (1991)

The Shock Process and Light-Element Production in Supernova Envelopes. *Lawrence E. Brown, David S. Dearborn, David N. Schramm, Jon T. Larsen, & Shin Kurokawa.* 371, 648, 69-F1 (1991)

s-Process Nucleosynthesis in Massive Stars and the Weak Component. II. Carbon Burning and Galactic Enrichment. *C. M. Raiteri, M. Busso, R. Gallino, & G. Picchio.* 371, 665, 69-G6 (1991)

How Much Hydrogen Is There in a White Dwarf? *James MacDonald & Stéphane Vennes.* 371, 719, 70-E1 (1991)

White Dwarf and Neutron Star Interior Solutions in the Nonsymmetric Gravitational Theory. *L. M. Campbell, J. W. Moffat, & P. Savaria.* 372, 241, 77-A1 (1991)

Steady State Energy Sources in Neutron Stars. *Kenneth A. Van Riper.* 372, 251, 77-A13 (1991)

The Isolated Massive DA White Dwarf GD 50. *P. Bergeron, K. M. Kidder, J. B. Holberg, James Liebert, F. Wesemael, & Rex A. Saffer.* 372, 267, 77-C5 (1991)

Qualitative Explanations of Red Giant Formation. *R. Bhaskar & Anil Nigam.* 372, 592, 83-A10 (1991)

The Lithium Abundance of M67 Blue Stragglers: A Constraint on the Blue Straggler Phenomenon. *C. J. Pritchet & J. W. Glaspey.* 373, 105, 87-C12 (1991)

Analysis of Radiation Pressure Effects in Pulsating Stars through Perturbative Limit Cycle Solutions. *A. Costa, D. Gómez, & C. Ferro Fontán.* 373, 237, 88-G13 (1991)

Double Core Evolution. IV. The Late Stages of Evolution of a 2 $M_{\odot}$ Red Giant with a 1 $M_{\odot}$ Companion. *Ronald E. Taam & Peter Bodenheimer.* 373, 246, 89-A10 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

Stellar Evolutionary Models from the Zero-Age Main Sequence to the First Thermal Pulse. *John C. Lattanzio.* 76, 215, 27-B9 (1991)

Structure and Stability of Rotating Relativistic Neutron Stars. *F. Weber, N. K. Glendenning, & M. K. Weigel.* 373, 579, 95-B10 (1991)

Ionization by High-Energy Particles and the Electron Scattering Opacity in Supernovae. *Douglas A. Swartz.* 373, 604, 95-D11 (1991)

Model Light Curves of Linear Type II Supernovae. *Douglas A. Swartz, J. Craig Wheeler, & Robert P. Harkness.* 374, 266, 101-D7 (1991)

Blue Loops during Core Helium Burning as the Consequence of Moderate Convective Envelope Overshooting in Stars of Intermediate to High Mass. *Richard B. Stothers & Chao-wen Chin.* 374, 288, 101-F3 (1991)

Shell Helium Burning in Low-Mass Stars. I. Models in Thermal Equilibrium. *Masayuki Y. Fujimoto & Icko Iben, Jr.* 374, 631, 107-A1 (1991)

Thermonuclear Reactions in Dense Stellar Matter: Electron Screening Revisited. *Setsuo Ichimaru & Shuji Ogata.* 374, 647, 107-B5 (1991)

Hydrodynamic Pulsation Models of Yellow Supergiant Stars in the Post-Asymptotic Giant Branch. *Toshiki Aikawa.* 374, 700, 107-F13 (1991)

The Stretching of Magnetic Flux Tubes in the Convective Overshoot Region. *George H. Fisher, Alexander N. McClymont, & Dean-Yi Chou.* 374, 766, 108-E10 (1991)

Isochrones for H-burning Globular Cluster Stars. II. The Metallicity Range $-2.3 < [Fe/H] < -0.5$. *Oscar Straniero & Alessandro Chieffi.* 76, 525, 32-D1 (1991)

The Evolution of Intermediate-Mass Protostars. I. Basic Results. *Francesco Palla & Steven W. Stahler.* 375, 288, 114-E1 (1991)

Rotational Evolution of Solar-Type Stars. I. Main-Sequence Evolution. *K. B. MacGregor & M. Brenner.* 376, 204, 127-D13 (1991)

The Effects of Thermal Radiation on Some General Relativistic Stellar Models. *J. M. Aguirregabiria, J. Ibáñez, A. Di Prisco, & L. Herrera.* 376, 662, 134-E8 (1991)

The RRd Masses Revisited. *Norman R. Simon & Arthur N. Cox.* 376, 717, 135-C1 (1991)

Li Depletion in F Stars by Internal Gravity Waves. *Ramón J. García López & Hendrik C. Spruit.* 377, 268, 141-C7 (1991)

Lithium Abundances in Carbon Stars. *Grant R. Denn, R. Earle Luck, & David L. Lambert.* 377, 657, 147-G5 (1991)

Neutrino-heated Stars and Broad-Line Emission from Active Galactic Nuclei. *James MacDonald, Todor Stanev, & Peter L. Biermann.* 378, 30, 151-D4 (1991)

Discovery and Seismological Interpretation of Low-Amplitude Modes in the Pulsating DO White Dwarf PG 1707+427 (V817 Herculis). *G. Fontaine, P. Bergeron, G. Vauclair, P. Brassard, F. Wesemael, S. D. Kawaler, A. D. Grauer, & D. E. Winget.* 378, L49, 162-F1 (1991)

Lithium in Halo Stars: Constraining the Effects of Helium Diffusion on Globular Cluster Ages and Cosmology. *Constantine P. Deliyannis & Pierre Demarque.* 379, 216, 165-F7 (1991)

On the Sodium Excess in the Atmospheres of Yellow Supergiants. *N. Prantzos, A. Coc, & J. P. Thibaud.* 379, 729, 173-G1 (1991)

High-Mass Stars with Degenerate Neutron Cores. *Garrett T. Biehle.* 380, 167, 178-B9 (1991)

The Galactic Globular Cluster System: Theoretical Constraints for α-enhanced Compositions. *D. Bencivenni, F. Caputo, M. Manteiga, & M. L. Quarta.* 380, 484, 184-C1 (1991)

Three-dimensional Compressible Hydrodynamic Convection in the Sun and Stars. *Murshed Hossain & D. J. Mullan.* 380, 631, 186-A10 (1991)

Evolutionary Sequences of Stellar Models of Intermediate and High Mass Including Convective Core Overshooting. *Chao-wen Chin & Richard B. Stothers.* 77, 299, 48-C1 (1991)

On Equation of State Interpolation Errors in Stellar Interior Calculations. *Ben Dorman, Alan W. Irwin, & Brian B. Pedersen.* 381, 228, 191-G4 (1991)

Advanced Evolutionary Phases of Large-Metallicity Low-Mass Stars and the Problem of the Ultraviolet Excess of Elliptical Galaxies. *Marco Castellani & Amedeo Tornambè.* 381, 393, 195-E9 (1991)

Soft X-Ray Pulses from Neutron Star Glitches. *Kenneth A. Van Riper, Richard I. Epstein, & Guy S. Miller.* 381, L47, 199-C1 (1991)

Metal Opacities and Convective Core Overshooting in Population I Stars. *Richard B. Stothers & Chao-wen Chin.* 381, L67, 199-E7 (1991)
Rayleigh-Taylor Instability in the Asymmetric Supernova Explosion. *Shoichi Yamada & Katsuhiko Sato.* 382, 594, 208-G12 (1991)
Massive Star Evolution and SN 1987A. *David Arnett.* 383, 295, 215-G8 (1991)
Effects of Negatively Charged Massive Particles on Primordial Stars. *R. N. Boyd & G. M. Fuller.* 383, 615, 221-G12 (1991)
A Conjecture Regarding the Evolution of Dwarf Stars into Red Giants. *P. P. Eggleton & R. C. Cannon.* 383, 757, 223-E12 (1991)
Effects of Drag Luminosity in the Common Envelope Phase of Slow Novae. *Mariko Kato & Izumi Hachisu.* 383, 761, 223-F3 (1991)
Post–Asymptotic Giant Branch Nonradial Instability Strips. *Letizia Stanghellini, Arthur N. Cox, & Sumner Starrfield.* 383, 766, 223-F10 (1991)
Observational Tests of Convective Core Overshooting in Stars of Intermediate to High Mass in the Galaxy. *Richard B. Stothers.* 383, 820, 224-D8 (1991)
Implications of Helium Diffusion for Globular Cluster Isochrones and Luminosity Functions. *Charles R. Proffitt & Don A. VandenBerg.* 77, 473, 51-C10 (1991)
Thermal Structure of Neutron Stars with Very Low Accretion Rates. *J. L. Zdunik, P. Haensel, B. Paczyński, & J. Miralda-Escudé.* 384, 129, 2-E12 (1992)
Evolutionary Models of Halo Stars with Rotation. II. Effects of Metallicity on Lithium Depletion, and Possible Implications for the Primordial Lithium Abundance. *M. H. Pinsonneault, Constantine P. Deliyannis, & P. Demarque.* 78, 179, 4-B3 (1992)
Two-Component Gravitating Systems and Red Giant–like Structure. *Masayuki Y. Fujimoto & Kohji Tomisaka.* 385, 445, 18-F10 (1992)
The Frequencies of Supernovae in Binaries. *Alexander V. Tutukov, Lev R. Yungelson, & Icko Iben, Jr.* 386, 197, 26-E9 (1992)
The Structure and Evolution of Thorne-Żytkow Objects. *R. C. Cannon, P. P. Eggleton, A. N. Żytkow, & P. Podsiadlowski.* 386, 206, 26-F5 (1992)
The Evolution through H and He Burning of Galactic Cluster Stars. *Vittorio Castellani, Alessandro Chieffi, & Oscar Straniero.* 78, 517, 9-G11 (1992)
s-Processing in Massive Stars as a Function of Metallicity and Interpretation of Observational Trends. *C. M. Raiteri, R. Gallino, & M. Busso.* 387, 263, 40-C1 (1992)
Postexplosion Hydrodynamics of SN 1987A. *Marc Herant & Willy Benz.* 387, 294, 40-E9 (1992)
Angular Momentum Transport in Magnetized Stellar Radiative Zones. I. Numerical Solutions to the Core Spin-up Model Problem. *P. Charbonneau & K. B. MacGregor.* 387, 639, 46-E11 (1992)
Effects of Fe/C Phase Separation on the Ages of White Dwarfs. *Z. W. Xu & H. M. Van Horn.* 387, 662, 47-A1 (1992)
Carbon, Nitrogen, and Oxygen Abundances in Early B-Type Stars. *Douglas R. Gies & David L. Lambert.* 387, 673, 47-B1 (1992)
The Effect of Helium Diffusion on the Ages of Globular Clusters. *Brian Chaboyer, Constantine P. Deliyannis, Pierre Demarque, M. H. Pinsonneault, & Ata Sarajedini.* 388, 372, 55-A6 (1992)
The Contribution of Advanced Post-Hayashi Track Evolutionary Phases to the Ultraviolet Light of Elliptical Galaxies. *Marco Castellani, Marco Limongi, & Amedeo Tornambè.* 389, 227, 62-G1 (1992)
On the Interior Structure of Contact Binaries and the Light-Curve Paradox. *Jean-Louis Tassoul.* 389, 375, 64-E9 (1992)
Further Improvements of a New Model for Turbulent Convection in Stars. *V. M. Canuto & I. Mazzitelli.* 389, 724, 70-D1 (1992)
Downflows and Entropy Gradient Reversal in Deep Convection. *Kwing L. Chan & Detlef Gigas.* 389, L87, 73-F3 (1992)
Radiative Atomic Rosseland Mean Opacity Tables. *Forrest J. Rogers & Carlos A. Iglesias.* 79, 507, 20-G11 (1992)
Mixing in Ejecta of Supernovae. I. General Properties of Two-dimensional Rayleigh-Taylor Instabilities and Mixing Width in Ejecta of Supernovae. *Izumi Hachisu, Takuya Matsuda, Ken'ichi Nomoto, & Toshikazu Shigeyama.* 390, 230, 76-G7 (1992)
Criterion for Convection in an Inhomogeneous Star. *Richard B. Stothers & Chao-wen Chin.* 390, L33, 78-E9 (1992)
Adiabatic Properties of Pulsating DA White Dwarfs. II. Mode Trapping in Compositionally Stratified Models. *P. Brassard, G. Fontaine, F. Wesemael, & C. J. Hansen.* 80, 369, 27-E3 (1992)
Oxygen-enhanced Models for Globular Cluster Stars. I. Evolutionary Tracks. *Don A. VandenBerg.* 391, 685, 96-E5 (1992)
Turbulent Convection with Overshooting: Reynolds Stress Approach. *V. M. Canuto.* 392, 218, 103-F1 (1992)
Setting the Clock of Stellar Models. *G. Bertelli, A. Bressan, & C. Chiosi.* 392, 522, 108-F13 (1992)
Dynamo Action in Stratified Convection with Overshoot. *Åke Nordlund, Axel Brandenburg, Richard L. Jennings, Michel Rieutord, Juha Ruokolainen, Robert F. Stein, & Ilkka Tuominen.* 392, 647, 110-C6 (1992)
The Evolution of Intermediate-Mass Protostars. II. Influence of the Accretion Flow. *Francesco Palla & Steven W. Stahler.* 392, 667, 110-E5 (1992)
Upper Limit to the Mass of Pulsationally Stable Stars with Uniform Chemical Composition. *Richard B. Stothers.* 392, 706, 111-A7 (1992)
The Structure of Horizontal-Branch Models. I. The Zero-Age Horizontal Branch. *Ben Dorman.* 80, 701, 33-B5 (1992)
The Formation of Primordial Degenerate Protostars. *Paolo Lenzuni, David F. Chernoff, & Edwin E. Salpeter.* 393, 232, 117-A11 (1992)
Minimum Mass for D and H Burning during Slow Accretion. *E. E. Salpeter.* 393, 258, 117-C12 (1992)
Tidal Disruption of a Star by a Massive Disk (The Axisymmetric Roche Problem). *John W. Woodward, Srivaths Sankaran, & Joel E. Tohline.* 394, 248, 131-B1 (1992)
Self-consistent Models of Wolf-Rayet Stars as Helium Stars with Optically Thick Winds. *Mariko Kato & Icko Iben, Jr.* 394, 305, 131-F13 (1992)
Evolutionary Models and the *p*-Mode Oscillation Spectrum of α Centauri A and B. *Peter Edmonds, Lawrence Cram, Pierre Demarque, D. B. Guenther, & Marc H. Pinsonneault.* 394, 313, 131-G9 (1992)
Oxygen-enhanced Models for Globular Cluster Stars. II. Isochrones and Luminosity Functions. *Peter A. Bergbusch & Don A. VandenBerg.* 81, 163, 37-C11 (1992)
Oxygen-enhanced Models for Globular Cluster Stars. III. Horizontal-Branch Sequences. *Ben Dorman.* 81, 221, 38-A3 (1992)
Models of White Dwarfs Distorted by Differential Rotation and Magnetic Fields. *V. S. Geroyannis & A. A. Hadjopoulos.* 81, 377, 40-B13 (1992)
Light-Curve Analysis of Classical Novae. *Mariko Kato & Icko Iben, Jr.* 394, L47, 139-C7 (1992)
A Comparative Study of Synchronization and Circularization in Close Binaries. *Jean-Louis Tassoul & Monique Tassoul.* 395, 259, 143-D1 (1992)
On the Efficiency of Ekman Pumping for Synchronization in Close Binaries. *Monique Tassoul & Jean-Louis Tassoul.* 395, 604, 150-E5 (1992)
Field Theoretical Model for Nuclear and Neutron Matter. V. Slowly Rotating Warm Cores in Neutron Stars. *José V. Romero, J. Díaz Alonso, José M^{a}. Ibáñez, Juan A. Miralles, & Armando Pérez.* 395, 612, 150-F5 (1992)
Neutrino Energy Loss in Stellar Interiors. IV. Plasma Neutrino Process for Strongly Degenerate Electrons. *Naoki Itoh, Haruhiko Mutoh, Atsushi Hikita, & Yasuharu Kohyama.* 395, 622, 150-G5 (1992)
Adiabatic Properties of Pulsating DA White Dwarfs. IV. An Extensive Survey of the Period Structure of Evolutionary Models. *P. Brassard, G. Fontaine, F. Wesemael, & M. Tassoul.* 81, 747, 45-D3 (1992)
Solar Spin-down with Internal Magnetic Fields. *P. Charbonneau & K. B. MacGregor.* 397, L63, 174-A3 (1992)
A Formulation of Convection for Stellar Structure and Evolution Calculations without the Mixing-Length Theory Approximations. I. Application to the Sun. *Thomas Joseph Lydon, Peter A. Fox, & Sabatino Sofia.* 397, 701, 179-G3 (1992)
Spin-Orbit Interaction Effects on the Rosseland Mean Opacity. *Carlos A. Iglesias, Forrest J. Rogers, & Brian G. Wilson.* 397, 717, 180-A7 (1992)
Relativistic Two-Moment Neutrino Transport. *J. Cernohorsky & Ch. G. van Weert.* 398, 190, 184-C1 (1992)
Coalescing Binary Neutron Stars. *Christopher S. Kochanek.* 398, 234, 184-F7 (1992)
The Quasi-static Evolution of ONeMg Cores: Explosive Ignition Densities and the Collapse/Explosion Alternative. *Ramon Canal, Jordi Isern, & Javier Labay.* 398, L49, 187-G7 (1992)
Determining the Nuclear Equation of State from Neutron-Star Masses and Radii. *Lee Lindblom.* 398, 569, 191-C1 (1992)
Excitation of Gravity Waves in Common Envelopes. *Noam Soker.* 399, 185, 197-E3 (1992)
Implications of $^3P_2$ Superfluidity in the Interior of Neutron Stars. *H. F. Chau, K. S. Cheng, & K. Y. Ding.* 399, 213, 197-G9 (1992)
Nucleosynthesis and Mixing on the Asymptotic Giant Branch. I. MS and S Stars with and without Tc. *M. Busso, R. Gallino, D. L. Lambert, C. M. Raiteri, & V. V. Smith.* 399, 218, 198-A1 (1992)
On Nonlinear Radial Oscillations in Convective RR Lyrae Stars. I. The Mathematical Description. *Michael Gehmeyr.* 399, 265, 198-E1 (1992)

On Nonlinear Radial Oscillations in Convective RR Lyrae Stars. II. Comparison of a Radiative and a Convective Model. *Michael Gehmeyr.* 399, 272, 198-E11 (1992)

The Case of G226-29: Evidence for a Pulsating DA White Dwarf with a Thick Hydrogen Layer? *G. Fontaine, P. Brassard, P. Bergeron, & F. Wesemael.* 399, L91, 201-C13 (1992)

Constraints on Element Mixing in Classical Novae. *Masayuki Y. Fujimoto & Icko Iben, Jr.* 399, 646, 206-A1 (1992)

Why Stars Inflate to and Deflate from Red Giant Dimensions. *Alvio Renzini, Laura Greggio, Claudio Ritossa, & Lilia Ferrario.* 400, 280, 212-D8 (1992)

Nuclear Solid Crust on Rotating Strange Quark Stars. *N. K. Glendenning & F. Weber.* 400, 647, 218-D11 (1992)

Rosseland Mean Opacities for Variable Compositions. *Forrest J. Rogers & Carlos A. Iglesias.* 401, 361, 225-E1 (1992)

Superfluid Vortex Creep and Rotational Dynamics of Neutron Stars. *Bennett Link, Richard I. Epstein, & Gordon Baym.* 403, 285, 17-D7 (1993)

Luminosity Functions for Very Low Mass Stars and Brown Dwarfs. *Gregory Laughlin & Peter Bodenheimer.* 403, 303, 17-E13 (1993)

A Study of Metal Abundance Patterns in Cool White Dwarfs. II. Simulations of Accretion Episodes. *J. Dupuis, G. Fontaine, C. Pelletier, & F. Wesemael.* 84, 73, 2-B5 (1993)

Decrease of Gravitational Mass Due to Neutrino Emission and Shock Revival in Supernovae. *Itzhak Goldman & Shmuel Nussinov.* 403, 706, 24-D13 (1993)

Improved Solar Models Constructed with a Formulation of Convection for Stellar Structure and Evolution Calculations without the Mixing-Length Theory Approximations. *Thomas Joseph Lydon, Peter A. Fox, & Sabatino Sofia.* 403, L79, 27-E8 (1993)

Stellar Models and the Brightening of P Cygni. *Mounib F. El Eid & Dieter H. Hartmann.* 404, 271, 31-C5 (1993)

Evidence for Processed Material in the Atmospheres of Large Magellanic Cloud B Supergiants. *Edward L. Fitzpatrick & Bruce Bohannan.* 404, 734, 38-B1 (1993)

Evolution and Seismology of Procyon. *D. B. Guenther & P. Demarque.* 405, 298, 44-G6 (1993)

Type II Supernovae and Boltzmann Neutrino Transport: The Infall Phase. *Anthony Mezzacappa & Stephen W. Bruenn.* 405, 637, 51-B1 (1993)

A Numerical Method for Solving the Neutrino Boltzmann Equation Coupled to Spherically Symmetric Stellar Core Collapse. *Anthony Mezzacappa & Stephen W. Bruenn.* 405, 669, 51-D7 (1993)

Particle Transport and the λ Bootis Phenomenon. I. The Diffusion/Mass-Loss Model Revisited. *P. Charbonneau.* 405, 720, 52-A9 (1993)

Large-Eddy Simulations of Compressible Convection on Massively Parallel Computers. *Xin Xie & Juri Toomre.* 405, 747, 52-D1 (1993)

An Expanded Set of Brown Dwarf and Very Low Mass Star Models. *A. Burrows, W. B. Hubbard, D. Saumon, & J. I. Lunine.* 406, 158, 57-B1 (1993)

A Model for the Dramatic Decline of FG Sagittae. *Icko Iben, Jr., & Mario Livio.* 406, L15, 60-F8 (1993)

Hydrodynamical Simulations of Rotating Stars. I. A Model for Subgrid-Scale Flow. *Maurice J. Clement.* 406, 651, 66-A3 (1993)

The Potential for Asteroseismology of DB White Dwarf Stars. *P. A. Bradley, D. E. Winget, & M. A. Wood.* 406, 661, 66-B1 (1993)

A Theory of Nonlocal Mixing-Length Convection. I. The Moment Formalism. *Scott A. Grossman, Ramesh Narayan, & David Arnett.* 407, 284, 72-F1 (1993)

On the Generation of Sound by Turbulent Convection. I. A Numerical Experiment. *Thomas J. Bogdan, Fausto Cattaneo, & Andrea Malagoli.* 407, 316, 73-A7 (1993)

Mass Loss in Globular Cluster Red Giants: An Evolutionary Investigation. *M. Castellani & V. Castellani.* 407, 649, 78-F1 (1993)

Thermal Evolution of Neutron Stars with Internal Frictional Heating. *Hideyuki Umeda, Noriaki Shibazaki, Ken'ichi Nomoto, & Sachiko Tsuruta.* 408, 186, 85-D7 (1993)

Neutron Star Dynamos and the Origins of Pulsar Magnetism. *Christopher Thompson & Robert C. Duncan.* 408, 194, 85-E4 (1993)

Unstable Degenerates Revisited. *John Faulkner.* 408, 600, 92-F5 (1993)

On Partial Mixing Zones in Horizontal-Branch Stellar Cores. *Ben Dorman & Robert T. Rood.* 409, 387, 101-G3 (1993)

Energy Generation in Convective Shells of Low-Mass, Low-Metallicity Asymptotic Giant Branch Stars. *Grant Bazan & John C. Lattanzio.* 409, 762, 108-E6 (1993)

Theoretical Models for Massive Stars in Young Magellanic Cloud Stellar Clusters. *Enzo Brocato & Vittorio Castellani.* 410, 99, 113-D1 (1993)

Search for Ionized Cores in Proto–Planetary Nebulae, and the Asymptotic Giant Branch to Planetary Nebula Transition. *Hans Ulrich Käufl, Alvio Renzini, & Letizia Stanghellini.* 410, 251, 115-C1 (1993)

Stellar Core Collapse: A Boltzmann Treatment of Neutrino-Electron Scattering. *Anthony Mezzacappa & Stephen W. Bruenn.* 410, 740, 123-A7 (1993)

Theoretical Models of Cepheid Variables and Their BVI_C Colors and Magnitudes. *C. Chiosi, P. R. Wood, & N. Capitanio.* 86, 541, 21-E11 (1993)

Sub–Giant Branch Evolution and Efficient Central Energy Transport. *John Faulkner & Fritz J. Swenson.* 411, 200, 129-F3 (1993)

Spectra of Low-Mass Helium Star Models and the Type Ic Supernova SN 1987M. *Douglas A. Swartz, Alexei V. Filippenko, Ken'ichi Nomoto, & J. Craig Wheeler.* 411, 313, 131-B8 (1993)

Convection and Neutrino Emission in the Late Stages of Massive Star Evolution. *Maurice B. Aufderheide.* 411, 813, 140-A1 (1993)

The Evolution of Massive Stars Including Mass Loss: Presupernova Models and Explosion. *S. E. Woosley, Norbert Langer, & Thomas A. Weaver.* 411, 823, 140-A14 (1993)

Radiative Accelerations on Iron Using Opacity Project Data. *G. Alecian, G. Michaud, & J. Tully.* 411, 882, 140-G1 (1993)

SN 1987A: An Empirical and Analytic Approach. *Hans A. Bethe.* 412, 192, 144-D11 (1993)

Iron and Molecular Opacities and the Evolution of Population I Stars. *Richard B. Stothers & Chao-wen Chin.* 412, 294, 145-F13 (1993)

Collisions and Close Encounters between Massive Main-Sequence Stars. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 412, 593, 151-B7 (1993)

Radiative Opacities for Carbon- and Oxygen-rich Mixtures. *Carlos A. Iglesias & Forrest J. Rogers.* 412, 752, 153-B8 (1993)

On the Li and Be Tests for Brown Dwarfs. *L. A. Nelson, S. Rappaport, & E. Chiang.* 413, 364, 160-G1 (1993)

Particle Transport and the λ Bootis Phenomenon. II. An Accretion/Diffusion Model. *S. Turcotte & P. Charbonneau.* 413, 376, 161-A3 (1993)

A Formulation of Convection for Stellar Structure and Evolution Calculations without the Mixing-Length Theory Approximations. II. Application to α Centauri A and B. *Thomas Joseph Lydon, Peter A. Fox, & Sabatino Sofia.* 413, 390, 161-B6 (1993)

Evolution of Low- and Intermediate-Mass Stars to the End of the Asymptotic Giant Branch with Mass Loss. *E. Vassiliadis & P. R. Wood.* 413, 641, 164-D11 (1993)

Thermal Evolution of Neutron Stars with Internal Heating in the Superfluid Core. *Armen D. Sedrakian & David M. Sedrakian.* 413, 658, 164-F1 (1993)

CNO Abundances and the Evolutionary Status of Three A-Type Supergiants. *Kim A. Venn.* 414, 316, 174-A1 (1993)

The α-enhanced Isochrones and Their Impact on the Fits to the Galactic Globular Cluster System. *Maurizio Salaris, Alessandro Chieffi, & Oscar Straniero.* 414, 580, 178-D10 (1993)

The QCD Phase Transition and Supernova Core Collapse. *N. A. Gentile, M. B. Aufderheide, G. J. Mathews, F. D. Swesty, & G. M. Fuller.* 414, 701, 180-A3 (1993)

An Analytical Model for the Plateau Stage of Type II Supernovae. *D. V. Popov.* 414, 712, 180-B3 (1993)

A Hydrodynamical Model for the Explosion of a Neutron Star Just below the Minimum Mass. *Monica Colpi, Stuart L. Shapiro, & Saul A. Teukolsky.* 414, 717, 180-B10 (1993)

Reaction Rates of the *s*-Process Neutron Sources ^{22}Ne(α, n)^{25}Mg and ^{13}C(α, n)^{16}O. *H. W. Drotleff, A. Denker, H. Knee, M. Soiné, G. Wolf, J. W. Hammer, U. Greife, C. Rolfs, & H. P. Trautvetter.* 414, 735, 180-D3 (1993)

Type II Supernovae from 8–10 $M_\odot$ Asymptotic Giant Branch Stars. *Masaaki Hashimoto, Kohichi Iwamoto, & Ken'ichi Nomoto.* 414, L105, 186-A1 (1993)

Vortex Pinning by Quenched Randomness in Neutron Stars. *Eric Chevalier.* 414, L113, 186-A13 (1993)

Neutrino Energy Loss in Stellar Interiors. V. Recombination Neutrino Process. *Yasuharu Kohyama, Naoki Itoh, Akihiko Obama, & Haruhiko Mutoh.* 415, 267, 188-C9 (1993)

Convection above the Neutrinosphere in Type II Supernovae. *D. S. Miller, J. R. Wilson, & R. W. Mayle.* 415, 278, 188-D12 (1993)

Neutrino Emission from the Bubble Phase of Stellar Nuclear Matter. *L. B. Leinson.* 415, 759, 197-C8 (1993)

On Why Intermediate-Mass Stars Become Giants after the Exhaustion of Hydrogen in Their Cores. *Icko Iben, Jr.* 415, 767, 197-D5 (1993)

Diffusion of Lithium and Beryllium in Evolving, Nonrotating Main-Sequence A and F Stars. *Jacques Richer & Georges Michaud.* 416, 312, 205-A5 (1993)

Turbulent Convection with Overshooting: Reynolds Stress Approach. II. *V. M. Canuto.* 416, 331, 205-B12 (1993)

Simulation of Compressible Convection: A Comparative Study of Boundary Conditions. *Murshed Hossain & D. J. Mullan.* 416, 733, 212-E1 (1993)

Prevention of High-Luminosity Carbon Stars by Hot Bottom Burning. *Arnold I. Boothroyd, I.-Juliana Sackmann, & Sean C. Ahern.* 416, 762, 212-G6 (1993)

An Evolutionary Scenario for Primeval Stellar Populations. *Santi Cassisi & Vittorio Castellani.* 88, 509, 47-B1 (1993)

Cooling and Spin-down of Pulsars with Evolving Rotating Equilibrium Configuration. II. Effects of Equations of State. *N. Chong & K. S. Cheng.* 417, 279, 221-A3 (1993)

Angular Momentum Transfer by Tidally Forced Oscillations in Massive Main-Sequence Stars. *Umin Lee.* 417, 697, 228-A13 (1993)

Angular Momentum Transport in Magnetized Stellar Radiative Zones. II. The Solar Spin-down. *P. Charbonneau & K. B. MacGregor.* 417, 762, 228-G13 (1993)

Formation and Evolution of Binary Planetary Nebula Nuclei and Related Objects. *Icko Iben, Jr., & Alexander V. Tutukov.* 418, 343, 235-C12 (1993)

The Pre–Main-Sequence Evolution of Intermediate-Mass Stars. *Francesco Palla & Steven W. Stahler.* 418, 414, 236-B10 (1993)

An Improved Numerical Method for Nonadiabatic Nonradial Oscillations: An Application to White Dwarf Stars. *Umin Lee & P. A. Bradley.* 418, 855, 243-C1 (1993)

Preservation of the Supernova Shock. *Hans A. Bethe.* 419, 197, 248-E14 (1993)

The Weak *s*-Component and Nucleosynthesis in Massive Stars. *C. M. Raiteri, R. Gallino, M. Busso, D. Neuberger, & F. Käppeler.* 419, 207, 248-G1 (1993)

Compressible Convection with Ionization. I. Stability, Flow Asymmetries, and Energy Transport. *Mark P. Rast & Juri Toomre.* 419, 224, 249-A6 (1993)

Compressible Convection with Ionization. II. Thermal Boundary-Layer Instability. *Mark P. Rast & Juri Toomre.* 419, 240, 249-B10 (1993)

On the Formation of O-Ne White Dwarfs in Metal-rich Close Binary Systems. *Inma Dominguez, Amedeo Tornambè, & Jordi Isern.* 419, 268, 249-E1 (1993)

The Evolution of Accreting Stars with Turbulent Mixing. *M. Y. Fujimoto.* 419, 768, 257-B13 (1993)

A Theory of Nonlocal Mixing-Length Convection. II. Generalized Smoothed Particle Hydrodynamics Simulations. *Scott A. Grossman & Ramesh Narayan.* 89, 361, 54-E1 (1993)

Theoretical Light Curves of Type IIb Supernova 1993J. *Toshikazu Shigeyama, Tomoharu Suzuki, Shiomi Kumagai, Ken'ichi Nomoto, Hideyuki Saio, & Hitoshi Yamaoka.* 420, 341, 5-B5 (1994)

The Conductive Propagation of Nuclear Flames. II. Convectively Bounded Flames in C+O and O+Ne+Mg Cores. *F. X. Timmes, S. E. Woosley, & Ronald E. Taam.* 420, 348, 5-B13 (1994)

Observational Prospects for Massive Stars with Degenerate Neutron Cores. *Garrett T. Biehle.* 420, 364, 5-D6 (1994)

Differential Rotation and the Convective Core Mass of Upper Main-Sequence Stars. *Maurice J. Clement.* 420, 797, 12-G3 (1994)

Comparative Pulsation Calculations with OP and Opal Opacities. *Shashi M. Kanbur & Norman R. Simon.* 420, 880, 13-G5 (1994)

Hot or Not? Theoretical Blue Edges for DA and DB White Dwarf Models. *P. A. Bradley & D. E. Winget.* 421, 236, 19-A1 (1994)

Penetration below a Convection Zone. *Neal E. Hurlburt, Juri Toomre, Josep M. Massaguer, & Jean-Paul Zahn.* 421, 245, 19-A12 (1994)

New Pre–Main-Sequence Tracks for $M \leq 2.5 M\odot$ as Tests of Opacities and Convection Model. *Francesca D'Antona & Italo Mazzitelli.* 90, 467, 8-D14 (1994)

An Iterative Technique for Computing Rotating White Dwarf Models. *V. S. Geroyannis & P. J. Papasotiriou.* 90, 501, 9-A9 (1994)

Element Diffusion in the Solar Interior. *Anne A. Thoul, John N. Bahcall, & Abraham Loeb.* 421, 828, 28-E3 (1994)

More Missing Stellar Opacity? *Richard B. Stothers & Chao-wen Chin.* 421, L91, 29-F9 (1994)

Relativistic Equation of State of Nuclear Matter for the Supernova Explosion and the Birth of Neutron Stars. *K. Sumiyoshi & H. Toki.* 422, 700, 40-E7 (1994)

The Classical Hyades Lithium Problem Resolved? *Fritz J. Swenson, John Faulkner, Carlos A. Iglesias, Forrest J. Rogers, & David R. Alexander.* 422, L79, 45-B6 (1994)

Cooling White Dwarfs in Galactic Globulars. *V. Castellani, S. Degl'Innocenti, & M. Romaniello.* 423, 266, 49-D1 (1994)

Sub–Chandrasekhar Mass Models for Type Ia Supernovae. *S. E. Woosley & Thomas A. Weaver.* 423, 371, 50-F10 (1994)

Mass Loss during the RR Lyrae Phase of the Horizontal Branch: Mass Dispersion on the Horizontal Branch and RR Lyrae Period Changes. *Rebecca A. Koopmann, Young-Wook Lee, Pierre Demarque, & Jamie M. Howard.* 423, 380, 50-G7 (1994)

A New Urca Process. *Maurice B. Aufderheide, Ikko Fushiki, George M. Fuller, & Thomas A. Weaver.* 424, 257, 65-B1 (1994)

Accretion onto a 1.4 $M_\odot$ White Dwarf: Classical Nova, Recurrent Nova, or Supernova? *Attay Kovetz & Dina Prialnik.* 424, 319, 65-G1 (1994)

Search for Important Weak Interaction Nuclei in Presupernova Evolution. *Maurice B. Aufderheide, Ikko Fushiki, Stanford E. Woosley, & Dieter H. Hartmann.* 91, 389, 23-F3 (1994)

Neutron Star Moments of Inertia. *D. G. Ravenhall & C. J. Pethick.* 424, 846, 75-C8 (1994)

Standard and Nonstandard Plasma Neutrino Emission Revisited. *Martin Haft, Georg Raffelt, & Achim Weiss.* 425, 222, 83-A8 (1994)

Nickel Bubble Instability and Mixing in SN 1987A. *Mikhail Basko.* 425, 264, 83-E5 (1994)

The Hyades Lithium Problem Revisited. *Fritz J. Swenson, John Faulkner, Forrest J. Rogers, & Carlos A. Iglesias.* 425, 286, 83-G3 (1994)

Detection of Lithium in the Cool Halo Dwarfs Groombridge 1830 and HD 134439: Implications for Internal Stellar Mixing and Cosmology. *Constantine P. Deliyannis, Sean G. Ryan, Timothy C. Beers, & Julie A. Thorburn.* 425, L21, 85-D3 (1994)

Rapid Cooling and the Structure of Neutron Stars. *James M. Lattimer, Kenneth A. Van Riper, Madappa Prakash, & Manju Prakash.* 425, 802, 91-F12 (1994)

Postexplosion Hydrodynamics of Supernovae in Red Supergiants. *Marc Herant & S. E. Woosley.* 425, 814, 91-G12 (1994)

The Gap in the Color-Magnitude Diagram of NGC 2420: A Test of Convective Overshoot and Cluster Age. *Pierre Demarque, Ata Sarajedini, & X.-J. Guo.* 426, 165, 98-B12 (1994)

The Determination of the Core Mass at the Helium Flash in Globular Cluster Stars. *Allen V. Sweigart.* 426, 612, 106-A11 (1994)

On the Existence of a Surface Boundary Layer in a Slowly Rotating, Early-Type Star. *Monique Tassoul.* 427, 388, 114-F3 (1994)

Precision Asteroseismology of Pulsating PG 1159 Stars. *Steven D. Kawaler & Paul A. Bradley.* 427, 415, 115-A11 (1994)

Post–Asymptotic Giant Branch Evolution of Low- to Intermediate-Mass Stars. *E. Vassiliadis & P. R. Wood.* 92, 125, 33-A4 (1994)

The Effectiveness of Oscillation Frequencies in Constraining Stellar Model Parameters. *Timothy M. Brown, J. Christensen-Dalsgaard, Barbara Weibel-Mihalas, & Ronald L. Gilliland.* 427, 1013, 125-C3 (1994)

Geminga: A Cooling Superfluid Neutron Star. *Dany Page.* 428, 250, 131-C6 (1994)

Red Giant Stragglers and He White Dwarfs in Galactic Globulars. *V. Castellani, V. Luridiana, & M. Romaniello.* 428, 633, 138-B7 (1994)

A Search for Lithium in Pleiades Brown Dwarf Candidates Using the Keck Hires Echelle. *Geoffrey W. Marcy, Gibor Basri, & James R. Graham.* 428, L57, 142-E7 (1994)

On the Hydrogen Layer Thickness in Pulsating DA White Dwarfs. *G. Fontaine, P. Brassard, F. Wesemael, & M. Tassoul.* 428, L61, 142-F1 (1994)

The Orbital Evolution of Highly Eccentric Binaries. *Itzhak Goldman & Tsevi Mazeh.* 429, 362, 148-E7 (1994)

Opacity, Metallicity, and Cepheid Period Ratios in the Galaxy and Magellanic Clouds. *Norman R. Simon & Shashi M. Kanbur.* 429, 772, 155-C8 (1994)

Theoretical Light Curve of a Type IIp Supernova. *Ronald G. Eastman, S. E. Woosley, Thomas A. Weaver, & Philip A. Pinto.* 430, 300, 162-G8 (1994)

Pulsation and Stability of RR Lyrae Stars. I. Instability Strip. *G. Bono & R. F. Stellingwerf.* 93, 233, 45-A5 (1994)

Double Core Evolution. VI. Effects of Gravitational Torques. *Ronald E. Taam, Peter Bodenheimer, & Michał Różyczka.* 431, 247, 179-B13 (1994)

Gravitational Radiation from Pairs of Realistic, Nonaccreting Compact Stars. *N. K. Spyrou & K. D. Kokkotas.* 431, 254, 179-C8 (1994)

Helium-accreting Degenerate Dwarfs as Presupernovae and Scenarios for the Ultrasoft X-Ray Sources. *Icko Iben, Jr., & A. V. Tutukov.* 431, 264, 179-D6 (1994)

Neutron Star Cooling and Pion Condensation. *Hideyuki Umeda, Ken'ichi Nomoto, Sachiko Tsuruta, Takumi Muto, & Toshitaka Tatsumi.* 431, 309, 180-A3 (1994)

Neutrino Energy Loss in Stellar Interiors. VI. Axial Vector Contribution to the Plasma Neutrino Energy-Loss Rate for Strongly Degenerate Electrons. *Yasuharu Kohyama, Naoki Itoh, Akihiko Obama, & Hiroshi Hayashi.* 431, 761, 188-A11 (1994)

Galactic Stars Applied to Tests of the Criterion for Convection and Semiconvection in an Inhomgeneous Star. *Richard B. Stothers & Chao-wen Chin.* 431, 797, 188-E6 (1994)

Energy Deposition and K-Shell Ionization of Supernovae. *Lih-Sin The, William T. Bridgman, & Donald D. Clayton.* 93, 531, 50-C3 (1994)

Hydrodynamics of Binary Coalescence. I. Polytropes with Stiff Equations of State. *Frederic A. Rasio & Stuart L. Shapiro.* 432, 242, 196-C2 (1994)

The Primordial Abundance of ^{6}Li and ^{9}Be. *Brian Chaboyer.* 432, L47, 199-G1 (1994)

Widespread Water Vapor Emission in Orion. *J. Cernicharo, E. González-Alfonso, J. Alcolea, R. Bachiller, & D. John.* 432, L59, 200-A5 (1994)

Thermonuclear Runaways in Nova Outbursts. II. Effect of Strong, Instantaneous, Local Fluctuations. *Anurag Shankar & David Arnett.* 433, 216, 211-A8 (1994)

Four Experiments on Thermal Instabilities in Stellar Envelopes. *Alvio Renzini & Claudio Ritossa.* 433, 293, 212-A5 (1994)

On Nonlinear Radial Adiabatic Oscillations in Magnetic Polytropes. *M. K. Das, O. J. Mollikutty, & R. K. Tavakol.* 433, 786, 220-G13 (1994)

On the Formation and Evolution of Super–Asymptotic Giant Branch Stars with Cores Processed by Carbon Burning. I. Spica to Antares. *Enrique García-Berro & Icko Iben, Jr.* 434, 306, 229-F4 (1994)

Cooling Theory of Crystallized White Dwarfs. *L. Segretain, G. Chabrier, M. Hernanz, E. García-Berro, J. Isern, & R. Mochkovitch.* 434, 641, 236-F2 (1994)

The Influence of Crystallization on the Luminosity Function of White Dwarfs. *M. Hernanz, E. García-Berro, J. Isern, R. Mochkovitch, L. Segretain, & G. Chabrier.* 434, 652, 236-G2 (1994)

Lithium in a Short-Period Tidally Locked Binary of M67: Implications for Stellar Evolution, Galactic Lithium Evolution, and Cosmology. *Constantine P. Deliyannis, Jeremy R. King, Ann M. Boesgaard, & Sean G. Ryan.* 434, L71, 241-G1 (1994)

Inside the Supernova: A Powerful Convective Engine. *Marc Herant, Willy Benz, W. Raphael Hix, Chris L. Fryer, & Stirling A. Colgate.* 435, 339, 248-B3 (1994)

Upper Limit of the Angular Velocity of Neutron Stars. *Masa-aki Hashimoto, Kazuhiro Oyamatsu, & Yoshiharu Eriguchi.* 436, 257, 264-G1 (1994)

Radiating Scalar Soliton-like Stars in a Pressurized Environment. *M. Esculpi & L. Herrera.* 437, 317, 287-E7 (1994)

Ensemble-averaged Thermonuclear Reaction Rates for Turbulent Convection in Stellar Interiors. *Lawrence D. Cloutman.* 437, 384, 288-D9 (1994)

Reaction Rates for $^{18}O(\alpha,\gamma)^{22}Ne$, $^{22}Ne(\alpha,\gamma)^{26}Mg$, and $^{22}Ne(\alpha,n)^{25}Mg$ in Stellar Helium Burning and *s*-Process Nucleosynthesis in Massive Stars. *F. Käppeler, M. Wiescher, U. Giesen, J. Görres, I. Baraffe, M. El Eid, C. M. Raiteri, M. Busso, R. Gallino, M. Limongi, & A. Chieffi.* 437, 396, 288-E10 (1994)

Optically Thick Winds in Nova Outbursts. *Mariko Kato & Izumi Hachisu.* 437, 802, 296-F1 (1994)

Formation and Evolution of Massive Stars. *Martin Beech & R. Mitalas.* 95, 517, 71-D9 (1994)

Frictional Instabilities in Neutron Star Interiors. *Noriaki Shibazaki & Yuko Mochizuki.* 438, 288, 5-D7 (1995)

Pycnonuclear Reaction Rates in Stellar Interiors: Thermal Enhancement. *Hikaru Kitamura & Setsuo Ichimaru.* 438, 300, 5-E9 (1995)

Gravitational Radiation–driven Secular Instability of Rotating Polytropes. *Shin'ichirou Yoshida & Yoshiharu Eriguchi.* 438, 830, 15-F1 (1995)

Hydrodynamics of Binary Coalescence. II. Polytropes with $\Gamma = 5/3$. *Frederic A. Rasio & Stuart L. Shapiro.* 438, 887, 16-D1 (1995)

Stellar Evolution with Arbitrary Rotation Laws. II. Massive Star Evolution to Core Hydrogen Exhaustion. *Robert G. Deupree.* 439, 357, 26-B1 (1995)

Tests of Two Convection Theories for Red Giant and Red Supergiant Envelopes. *Richard B. Stothers & Chao-wen Chin.* 440, 297, 45-C3 (1995)

Meridional Circulation in Rotating Stars. XI. Single-Cell Pattern versus Double-Cell Pattern. *Monique Tassoul & Jean-Louis Tassoul.* 440, 789, 54-A4 (1995)

A Survey of Lithium in the Red Giants of the Magellanic Clouds. *Verne V. Smith, Bertrand Plez, David L. Lambert, & D. A. Lubowich.* 441, 735, 72-A13 (1995)

Stellar Models with Microscopic Diffusion and Rotational Mixing. II. Application to Open Clusters. *Brian Chaboyer, P. Demarque, & M. H. Pinsonneault.* 441, 876, 74-A13 (1995)

Magnetic Field Evolution in White Dwarfs: The Hall Effect and Complexity of the Field. *A. G. Muslimov, H. M. Van Horn, & M. A. Wood.* 442, 758, 90-F2 (1995)

Analysis of the Type Ia Supernova SN 1994D. *P. Höflich.* 443, 89, 96-D9 (1995)

Discrepancies between OPAL and OP Opacities at High Densities and Temperatures. *Carlos A. Iglesias & Forrest J. Rogers.* 443, 460, 101-D6 (1995)

Modeling Solar-like Oscillations in η Bootis. *Jørgen Christensen-Dalsgaard, Timothy R. Bedding, & Hans Kjeldsen.* 443, L29, 102-F1 (1995)

Hydrodynamics of Semiconvection. *William J. Merryfield.* 444, 318, 117-G7 (1995)

On Orbital Circularization in Late-Type Close Binaries. *Jean-Louis Tassoul.* 444, 338, 118-B8 (1995)

Absolute Ages of Globular Clusters and the Age of the Universe. *Brian Chaboyer.* 444, L9, 121-C1 (1995)

Delayed Detonation Models for Normal and Subluminous Type Ia Supernovae: Absolute Brightness, Light Curves, and Molecule Formation. *P. Höflich, A. M. Khokhlov, & J. C. Wheeler.* 444, 831, 128-A1 (1995)

Double Core Evolution. VII. The Infall of a Neutron Star through the Envelope of Its Massive Star Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 445, 367, 137-E9 (1995)

An Extended Grid of Multicycle Nova Evolution Models. *Dina Prialnik & Attay Kovetz.* 445, 789, 146-B3 (1995)

Implicit General Relativistic Hydrodynamic Methods for Modeling the Late-Time Explosion Mechanism in Core Collapse Supernovae. *F. Douglas Swesty.* 445, 811, 146-D4 (1995)

Effects of Heavy Metals on Astrophysical Opacities. *C. A. Iglesias, B. G. Wilson, F. J. Rogers, W. H. Goldstein, A. Bar-Shalom, & J. Oreg.* 445, 855, 147-A3 (1995)

On Blue Straggler Formation by Direct Collisions of Main-Sequence Stars. *James C. Lombardi, Jr., Frederic A. Rasio, & Stuart L. Shapiro.* 445, L117, 151-C1 (1995)

The Lithium Dip in M67: Comparison with the Hyades, Praesepe, and NGC 752 Clusters. *Suchitra Balachandran.* 446, 203, 156-A6 (1995)

The Hot End of Evolutionary Horizontal Branches. *V. Castellani, S. Degl'Innocenti, & L. Pulone.* 446, 228, 156-C8 (1995)

Nucleosynthesis and Mixing on the Asymptotic Giant Branch. II. Carbon and Barium Stars in the Galactic Disk. *M. Busso, D. L. Lambert, L. Beglio, R. Gallino, C. M. Raiteri, & V. V. Smith.* 446, 775, 166-F13 (1995)

Superfluid Core Rotation in Pulsars. I. Vortex Cluster Dynamics. *Armen D. Sedrakian & David M. Sedrakian.* 447, 305, 176-F1 (1995)

Superfluid Core Rotation in Pulsars. II. Postjump Relaxations. *A. D. Sedrakian, D. M. Sedrakian, J. M. Cordes, & Yervant Terzian.* 447, 324, 176-G10 (1995)

Destabilization of Compressible Convection by Radiation: Quantitative Evaluation. *Q. Q. Cheng, Murshed Hossain, & D. J. Mullan.* 447, 789, 186-G6 (1995)

The Rotational Rates of Blue Stragglers Produced by Physical Stellar Collisions. *Peter J. T. Leonard & Mario Livio.* 447, L121, 191-B11 (1995)

Frictional Heating and Neutron Star Thermal Evolution. *Kenneth A. Van Riper, Bennett Link, & Richard I. Epstein.* 448, 294, 196-C6 (1995)

The Presupernova Evolution and Explosion of Helium Stars That Experience Mass Loss. *S. E. Woosley, Norbert Langer, & Thomas A. Weaver.* 448, 315, 196-E7 (1995)

Radiative Levitation in Hot White Dwarfs: Equilibrium Theory. *P. Chayer, G. Fontaine, & F. Wesemael.* 99, 189, 36-G5 (1995)

On the Generation of Flux-Tube Waves in Stellar Convection Zones. II. Improved Treatment of Longitudinal Tube Wave Generation. *Z. E.*

Musielak, R. Rosner, H. P. Gail, & P. Ulmschneider. 448, 865, 206-G7 (1995)

Propagation of Turbulent Flames in Supernovae. *Alexei M. Khokhlov.* 449, 695, 222-D7 (1995)

An Equation of State for Low-Mass Stars and Giant Planets. *D. Saumon, G. Chabrier, & H. M. Van Horn.* 99, 713, 44-E12 (1995)

Gravitational Radiation from Rotational Collapse of a Supernova Core. *Shoichi Yamada & Katsuhiko Sato.* 450, 245, 231-D4 (1995)

From Strange Stars to Strange Dwarfs. *N. K. Glendenning, Ch. Kettner, & F. Weber.* 450, 253, 231-E1 (1995)

More on the Properties of Star Models Evolving off the Hayashi Track: The Metallicity and Evolutionary Phase Dependence. *Marco Castellani, Marco Limongi, & Amedeo Tornambè.* 450, 275, 231-G1 (1995)

On the Nature of Core-Collapse Supernova Explosions. *Adam Burrows, John Hayes, & Bruce A. Fryxell.* 450, 830, 242-B9 (1995)

Sodium Enrichment in A–F Type Supergiants. *Mounib F. El Eid & Arthur E. Champagne.* 451, 298, 250-A9 (1995)

Double Core Evolution. VIII. The Spiral-in of a Main-Sequence Star through the Envelope of an Asymptotic Giant Branch Companion. *Harold W. Yorke, Peter Bodenheimer, & Ronald E. Taam.* 451, 308, 250-B8 (1995)

A Model of the Galactic X-Ray Binary Population. I. High-Mass X-Ray Binaries. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 100, 217, 49-B1 (1995)

Thermal Instability and Pulsations of the Flame Front in White Dwarfs. *Vitaliy V. Bychkov & Michael A. Liberman.* 451, 711, 257-A7 (1995)

Turbulent Nuclear Flames in Type Ia Supernovae. *J. C. Niemeyer & W. Hillebrandt.* 452, 769, 275-B13 (1995)

Microscopic Instabilities of Nuclear Flames in Type Ia Supernovae. *J. C. Niemeyer & W. Hillebrandt.* 452, 779, 275-C12 (1995)

A Consistent Explanation for $^{12}C/^{13}C$, ^{7}Li, and ^{3}He Anomalies in Red Giant Stars. *C. Charbonnel.* 453, L41, 289-G10 (1995)

Neutrino Capture and Supernova Nucleosynthesis. *George M. Fuller & Bradley S. Meyer.* 453, 792, 294-G7 (1995)

The Evolution and Explosion of Massive Stars. II. Explosive Hydrodynamics and Nucleosynthesis. *S. E. Woosley & Thomas A. Weaver.* 101, 181, 55-B1 (1995)

The OPAL Equation of State and Low-Metallicity Isochrones. *Brian Chaboyer & Yong-Cheol Kim.* 454, 767, 312-C9 (1995)

Type Ia Supernovae: The Flame Is Born. *D. Garcia-Senz & S. E. Woosley.* 454, 895, 314-B7 (1995)

Stellar Activity at the End of the Main Sequence: GHRS Observations of the M8 Ve Star VB 10. *Jeffrey L. Linsky, Brian E. Wood, Alexander Brown, Mark S. Giampapa, & Carol Ambruster.* 455, 670, 331-B10 (1995)

STARS: KINEMATICS

A Complete, Multicolor Survey of Absolute Proper Motions to $B \sim 22.5$: Galactic Structure and Kinematics at the North Galactic Pole. *Steven Raymond Majewski.* 78, 87, 2-F11 (1992)

Velocity Streaming of *IRAS* Main-Sequence Disk Stars and the Episodic Enhancement of Particulate Disks by Interstellar Clouds. *Daniel P. Whitmire, John J. Matese, & Patrick G. Whitman.* 388, 190, 51-D1 (1992)

Short- and Intermediate-Period Oxygen-rich Miras. *M. Jura & S. G. Kleinmann.* 79, 105, 14-D3 (1992)

Evolving, Dynamical Models for Collapsed-Core Globular Clusters: M15 and NGC 6624. *Robert P. Grabhorn, Haldan N. Cohn, Phyllis M. Lugger, & Brian W. Murphy.* 392, 86, 102-B1 (1992)

The Origin of Distant B-Type Stars in the Galactic Halo. *E. S. Conlon, P. L. Dufton, F. P. Keenan, R. J. H. McCausland, & D. Holmgren.* 400, 273, 212-C13 (1992)

Carbon Star Luminosity Indicators. *Paul J. Green, Bruce Margon, Scott F. Anderson, & D. Jack MacConnell.* 400, 659, 218-E12 (1992)

Rotation and Activity among Solar-Type Stars of the Ursa Major Group. *David R. Soderblom & Michel Mayor.* 402, L5, 6-B9 (1993)

Relativistic Matter Distribution around a Black Hole: Astrophysical Consequences. *Ran Zamir.* 403, 278, 17-C12 (1993)

Astrophysical Gasdynamics Confronts Reality: The Shaping of Planetary Nebuale. *Adam Frank, Bruce Balick, Vincent Icke, & Garrelt Mellema.* 404, L25, 33-F7 (1993)

The Detection of an Extended Moving Group near the Galactic Disk. *Patrick Côté, Douglas L. Welch, Philippe Fischer, & M. J. Irwin.* 406, L59, 68-C11 (1993)

G-Star Astropauses: A Test for Interstellar Pressure. *P. C. Frisch.* 407, 198, 71-E1 (1993)

Canada-France-Hawaii Telescope Observations of Globular Cluster Cores: Blue Straggler Stars in M3 (NGC 5272, GC 1339+286). *Michael Bolte, James E. Hesser, & Peter B. Stetson.* 408, L89, 95-C11 (1993)

A Study of Circumstellar Envelopes around Bright Carbon Stars. I. Structure, Kinematics, and Mass-Loss Rate. *H. Olofsson, K. Eriksson, B. Gustafsson, & U. Carlström.* 87, 267, 30-E1 (1993)

Whither the LSR: Anticenter Carbon Star Velocities. *Mark R. Metzger & Paul L. Schechter.* 420, 177, 3-B8 (1994)

Extinction, Ejecta Masses, and Radial Velocities of Novae. *Robert E. Williams.* 426, 279, 99-E8 (1994)

Absolute Proper Motions to $B \sim 22.5$: Evidence for Kinematical Substructure in Halo Field Stars. *Steven R. Majewski, Jeffrey A. Munn, & Suzanne L. Hawley.* 427, L37, 117-E12 (1994)

Modeling the Radial Distribution of Blue Stragglers in M3. *Steinn Sigurdsson, Melvyn B. Davies, & Michael Bolte.* 431, L115, 192-A9 (1994)

WFPC2 Observations of the Globular Cluster M30. *Brian Yanny, Puragra Guhathakurta, Donald P. Schneider, & John N. Bahcall.* 435, L59, 252-D13 (1994)

Kinematics of Metal-poor Stars in the Galaxy. *Timothy C. Beers & Jesper Sommer-Larsen.* 96, 175, 3-G8 (1995)

PSR J2019+2425 and PSR J2322+2057 and the Proper Motions of Millisecond Pulsars. *D. J. Nice & J. H. Taylor.* 441, 429, 65-C7 (1995)

Radial Velocities of Stars in the Globular Cluster M4 and the Cluster Distance. *Ruth C. Peterson, Richard F. Rees, & Kyle M. Cudworth.* 443, 124, 96-G11 (1995)

M Giant Kinematics in Off-Axis Fields between 150 and 300 Parsecs from the Galactic Center. *R. D. Blum, J. S. Carr, K. Sellgren, & D. M. Terndrup.* 449, 623, 221-C11 (1995)

On the Correlation between Proper Motion Velocities and Scintillation Velocities of Radio Pulsars. *Yashwant Gupta.* 451, 717, 257-B2 (1995)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. III. Kinematics of the Bulge Stars. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 453, 837, 295-D7 (1995)

Dynamics of the Galactic Globular Cluster NGC 3201. *Patrick Côté, Douglas L. Welch, Philippe Fischer, & K. Gebhardt.* 454, 788, 312-F3 (1995)

The Nonexponential Evolution of Pulsar Magnetic Fields. III. Comparison with the New Velocity Measurement. *Naoki Itoh, Takemi Kotouda, & Kentaro Hiraki.* 455, 244, 321-D13 (1995)

STARS: LATE-TYPE

CO Fundamental Bands in Late-Type Stars. II. Spectrum Simulations for F–K Stars. *Gunter Wiedemann & Thomas R. Ayres.* 366, 277, 4-D9 (1991)

Mixing Length and Opacity Effects: Deep Convective Envelopes on the Asymptotic Giant Branch. *I.-Juliana Sackmann & Arnold I. Boothroyd.* 366, 529, 9-E7 (1991)

Spectroscopy of Taurus Cloud Brown Dwarf Candidates. *John Stauffer, Terry Herter, Donald Hamilton, George H. Rieke, Marcia J. Rieke, Ron Probst, & William Forrest.* 367, L23, 17-D7 (1991)

Detection of ^{13}C Isotopomers of HC_5N ($J = 9$–8) in the Circumstellar Envelope of IRC +10216. *M. B. Bell & P. A. Feldman.* 367, L33, 17-E8 (1991)

Excitation of Millimeter and Submillimeter Water Masers. *David A. Neufeld & Gary J. Melnick.* 368, 215, 25-F11 (1991)

Nonthermal Radio Emission from the X-Ray–Bright K5 IV Star 1E 1751+7046. *Stephen L. Skinner.* 368, 272, 26-D11 (1991)

Chemical Abundances for Cyanogen-weak Giants. *R. Earle Luck.* 75, 579, 8-F11 (1991)

Circular Polarization in 1612 MHz OH Maser Emission from OH/IR Stars. *Philip J. Zell & John D. Fix.* 369, 506, 44-A9 (1991)

Evolution of the Chromospheres and Winds of Low- and Intermediate-Mass Giant Stars. *P. G. Judge & R. E. Stencel.* 371, 357, 64-E3 (1991)

Carbon Isotope Ratios along the Giant Branch of M67. *Kalpana Krishnaswamy Gilroy & Jeffery A. Brown.* 371, 578, 68-F7 (1991)

Further Limits on Disklike Dark Matter from K Dwarf Kinematics. *Konrad Kuijken.* 372, 125, 75-E7 (1991)

Qualitative Explanations of Red Giant Formation. *R. Bhaskar & Anil Nigam.* 372, 592, 83-A10 (1991)

Rotational Modulation in *IUE* Spectra of Cool Dwarf Chromospheres. I. Data Analysis and Period Search Techniques. *K. L. Hallam, B. Altner, & A. S. Endal.* 372, 610, 83-C1 (1991)

The Halo of the Large Magellanic Cloud: Kinematics of the CH Stars. *A. P. Cowley & F. D. A. Hartwick.* 373, 80, 87-A8 (1991)

X-Ray Emission from Hybrid-Chromosphere Stars. *Alexander Brown, Stephen A. Drake, Michael E. Van Steenberg, & Jeffrey L. Linsky.* 373, 614, 95-E9 (1991)

The Chromospheric Activity of Low-Mass Stars in the Hyades. *John R. Stauffer, Mark S. Giampapa, William Herbst, James M. Vincent, Lee W. Hartmann, & Robert A. Stern.* 374, 142, 99-G1 (1991)

Broad-Band Linear Polarization in Cool Stars. I. Models and Spatial Effects for Magnetic and Scattering Regions. *Juhani Huovelin & Steven H. Saar.* 374, 319, 102-B1 (1991)

Shell Helium Burning in Low-Mass Stars. I. Models in Thermal Equilibrium. *Masayuki Y. Fujimoto & Icko Iben, Jr.* 374, 631, 107-A1 (1991)

Hydrodynamic Pulsation Models of Yellow Supergiant Stars in the Post-Asymptotic Giant Branch. *Toshiki Aikawa.* 374, 700, 107-F13 (1991)

A Critical Appraisal of Published Values of [Fe/H] for K II–IV Stars. *Benjamin J. Taylor.* 76, 715, 34-E12 (1991)

Brown Dwarfs in Young Stellar Clusters. *Guy S. Stringfellow.* 375, L21, 117-C7 (1991)

The Chromospheric Emission–Age Relation for Stars of the Lower Main Sequence and Its Implications for the Star Formation Rate. *David R. Soderblom, Douglas K. Duncan, & Dean R. H. Johnson.* 375, 722, 121-F5 (1991)

First Results from the Goddard High-Resolution Spectrograph: The Chromosphere of α Tauri. *Kenneth G. Carpenter, Richard D. Robinson, Glenn M. Wahlgren, Thomas B. Ake, Dennis C. Ebbets, Jeffrey L. Linsky, Alexander Brown, & Frederick M. Walter.* 377, L45, 143-E11 (1991)

Metallicity and Velocity Distribution of Giants toward the Galactic Poles. *Kavan U. Ratnatunga & Kenneth M. Yoss.* 377, 442, 145-C3 (1991)

321 GHz Submillimeter Water Masers around Evolved Stars. *Karl M. Menten & Gary J. Melnick.* 377, 647, 147-F8 (1991)

Multichannel Astrometric Photometer–based Parallaxes of Evolved Stars: χ Cygni, 51 Andromedae, and OP Andromedae. *John W. Stein.* 377, 669, 148-A5 (1991)

Heating Mechanism(s) for Transition Layers in Giants. *Erika Böhm-Vitense & José Mena-Werth.* 378, 718, 161-C8 (1991)

Galactic Bulge M Giants. IV. 0.5–2.5 Micron Spectrophotometry and Abundances for Stars in Baade's Window. *D. M. Terndrup, Jay A. Frogel, & A. E. Whitford.* 378, 742, 161-E5 (1991)

Excitation of the Hydroxyl Maser in OH/IR Stars. *Dale F. Dickinson.* 379, L29, 169-C11 (1991)

Fe II Emission Lines. I. Chromospheric Spectra of Red Giants. *P. G. Judge & C. Jordan.* 77, 75, 44-E1 (1991)

Abundances in Red Giant Stars: Nitrogen Isotopes in Carbon-rich Molecular Envelopes. *P. G. Wannier, B-G Andersson, H. Olofsson, N. Ukita, & K. Young.* 380, 593, 185-E8 (1991)

Carbon Isotopic Abundances in Giant Stars in the CN-bimodal Globular Clusters NGC 6752 and M4. *Nicholas B. Suntzeff & Verne V. Smith.* 381, 160, 191-A8 (1991)

Numerical Simulations of Flares on M Dwarf Stars. I. Hydrodynamics and Coronal X-Ray Emission. *Chung-Chieh Cheng & Roberto Pallavicini.* 381, 234, 191-G12 (1991)

Abundances of Tc and Related Elements in Stars of Type M, MS, and S. *Andrew D. Vanture, George Wallerstein, Jeffery A. Brown, & Grant Bazan.* 381, 278, 192-D7 (1991)

Stellar Encounters Involving Red Giants in Globular Cluster Cores. *M. B. Davies, W. Benz, & J. G. Hills.* 381, 449, 196-C7 (1991)

Cocoon Stars in the Large Magellanic Cloud. *Neill Reid.* 382, 143, 202-A4 (1991)

Fe II Emission Lines. II. Excitation Mechanisms in Cool Stars. *P. G. Judge, C. Jordan, & U. Feldman.* 384, 613, 9-F10 (1992)

CN and CH Variations on the M5 Subgiant Branch. *Michael M. Briley, Graeme H. Smith, R. A. Bell, J. B. Oke, & James H. Hesser.* 387, 612, 46-C5 (1992)

X-Ray Activity as Statistical Age Indicator: The Disk G–K Giants. *G. Micela, A. Maggio, & G. S. Vaiana.* 388, 171, 51-B5 (1992)

First Conclusive Evidence for Rotational Modulation of Stellar Radio Emission. *Jeremy Lim, Graham J. Nelson, Catarina Castro, David Kilkenny, & François van Wyk.* 388, L27, 52-C7 (1992)

Ionization and Excitation in Cool Giant Stars. I. Hydrogen and Helium. *Donald G. Luttermoser & Hollis R. Johnson.* 388, 579, 57-D7 (1992)

Local Dark Matter from a Carefully Selected Sample. *John N. Bahcall, Chris Flynn, & Andrew Gould.* 389, 234, 62-G9 (1992)

Carbon and Nitrogen Abundances Determined from Transition Layer Lines. *Erika Böhm-Vitense & José Mena-Werth.* 390, 253, 77-B4 (1992)

The Rotation of M Dwarfs. *Geoffrey W. Marcy & Grace H. Chen.* 390, 550, 82-B11 (1992)

Breakdown of the Core Mass–Luminosity Relation at High Luminosities on the Asymptotic Giant Branch. *Arnold I. Boothroyd & I.-Juliana Sackmann.* 393, L21, 120-D1 (1992)

Multiplicity among M Dwarfs. *Debra A. Fischer & Geoffrey W. Marcy.* 396, 178, 157-C13 (1992)

Limits on Detectability of Mass Loss from Cool Dwarfs. *D. J. Mullan, J. G. Doyle, R. O. Redman, & M. Mathioudakis.* 397, 225, 170-F12 (1992)

On the Interaction between Dust and Gas in Late-Type Stellar Atmospheres and Winds. *K. B. MacGregor & R. E. Stencel.* 397, 644, 179-A13 (1992)

Infrared Emission and Mass Loss from Evolved Stars in Elliptical Galaxies. *G. R. Knapp, J. E. Gunn, & C. G. Wynn-Williams.* 399, 76, 196-B3 (1992)

Excitation of Gravity Waves in Common Envelopes. *Noam Soker.* 399, 185, 197-E3 (1992)

Nucleosynthesis and Mixing on the Asymptotic Giant Branch. I. MS and S Stars with and without Tc. *M. Busso, R. Gallino, D. L. Lambert, C. M. Raiteri, & V. V. Smith.* 399, 218, 198-A1 (1992)

Modeling SiO Maser Emission from Late-Type Stars. *Philip Lockett & Moshe Elitzur.* 399, 704, 206-F9 (1992)

Why Stars Inflate to and Deflate from Red Giant Dimensions. *Alvio Renzini, Laura Greggio, Claudio Ritossa, & Lilia Ferrario.* 400, 280, 212-D8 (1992)

High-Excitation ^{29}SiO and ^{30}SiO Maser Emission. *J. Cernicharo & V. Bujarrabal.* 401, L109, 233-E5 (1992)

Oxygen-rich Semiregular and Irregular Variables. *M. Jura & S. G. Kleinmann.* 83, 329, 62-D5 (1992)

CCD Observations of the Hα Line in Late G and K Supergiants and Their Interpretation. *Sushma V. Mallik.* 402, 303, 4-G10 (1993)

Rotation and Activity among Solar-Type Stars of the Ursa Major Group. *David R. Soderblom & Michel Mayor.* 402, L5, 6-B9 (1993)

M Dwarf Spectra from 0.6 to 1.5 Microns: A Spectral Sequence, Model Atmosphere Fitting, and the Temperature Scale. *J. Davy Kirkpatrick, Douglas M. Kelly, George H. Rieke, James Liebert, France Allard, & Rainer Wehrse.* 402, 643, 10-E11 (1993)

The Nonsolar Abundance Ratios of Arcturus Deduced from Spectrum Synthesis. *Ruth C. Peterson, Cristina M. Dalle Ore, & Robert L. Kurucz.* 404, 333, 32-A8 (1993)

Broad-band Linear Polarization in Cool Stars. II. Amplitude and Wavelength Dependence for Magnetic and Scattering Regions. *Steven H. Saar & Juhani Huovelin.* 404, 739, 38-B7 (1993)

Evidence for the Cospatial Origin of SiO Masers in Different Rotational Transitions. *G. C. McIntosh & C. Read Predmore.* 404, L71, 40-E11 (1993)

Discovery of Remarkably Intense Radio Emission from a Young and Rapidly Rotating dMe Star. *Jeremy Lim.* 405, L33, 47-F1 (1993)

X-Ray/Microwave Relation of Different Types of Active Stars. *Manuel Güdel & Arnold O. Benz.* 405, L63, 54-C13 (1993)

The Low-Mass Stellar Content of Galaxies: Constraints through Hybrid Population Synthesis near 1 Micron. *Jean Couture & Eduardo Hardy.* 406, 142, 56-G11 (1993)

Infrared Observations of the Remarkable Main-Sequence Star HD 98800. *B. Zuckerman & E. E. Becklin.* 406, L25, 60-G10 (1993)

High-Excitation SiO Maser Emission in VY Canis Majoris: Detection of the $v = 4$ $J = 5$–4 Transition. *J. Cernicharo, V. Bujarrabal, & J. L. Santarén.* 407, L33, 75-D6 (1993)

Rotation and Chromospheric Emission among F, G, and K Dwarfs of the Pleiades. *David R. Soderblom, John R. Stauffer, J. Dan Hudon, & Burton F. Jones.* 85, 315, 11-D13 (1993)

An Infrared Study of the Remarkable Dusty M Star HR 3126. *J. E. Chiar, D. C. B. Whittet, D. K. Aitken, P. F. Roche, C. H. Smith, H. J. Walker, P. A. Whitelock, & C. Wright.* 409, 404, 102-A8 (1993)

Observations of the Ca II Infrared Triplet in Chromospherically Active Single and Binary Stars. *Robert C. Dempsey, Bernard W. Bopp, Gregory W. Henry, & Douglas S. Hall.* 86, 293, 17-G7 (1993)

Circumstellar Shells Resolved in *IRAS* Survey Data. II. Analysis. *K. Young, T. G. Phillips, & G. R. Knapp.* 409, 725, 108-B3 (1993)

A Highly Sensitive Radio Survey of Symbiotic Stars at 3.6 Centimeters. *E. R. Seaquist, M. Krogulec, & A. R. Taylor.* 410, 260, 115-C12 (1993)

Stellar Coronae at the End of the Main Sequence: A *ROSAT* Survey of the Late M Dwarfs. *Thomas A. Fleming, Mark S. Giampapa, J. H. M. M. Schmitt, & Jay A. Bookbinder.* 410, 387, 116-G8 (1993)

Circumstellar Shells Resolved in the *IRAS* Survey Data. I. Data Processing Procedure, Results, and Confidence Tests. *K. Young, T. G. Phillips, & G. R. Knapp.* 86, 517, 21-B11 (1993)

The *ROSAT* All-Sky Survey of Active Binary Coronae. I. Quiescent Fluxes for the RS Canum Venaticorum Systems. *Robert C. Dempsey, Jeffrey L. Linsky, Thomas A. Fleming, & J. H. M. M. Schmitt.* 86, 599, 22-C3 (1993)

Mg II and Lyα Fluxes in M Dwarfs: Evaluation of an Acoustic Model. *D. J. Mullan & Q. Q. Cheng.* 412, 312, 146-A9 (1993)

The Fundamental Parameters of the Chromospherically Active K2 Dwarf ϵ Eridani. *Jeremy J. Drake & Geoffrey Smith.* 412, 797, 153-F9 (1993)

The *ROSAT* All-Sky Survey of Active Binary Coronae. II. Coronal Temperatures of the RS Canum Venaticorum Systems. *Robert C. Dempsey, Jeffrey L. Linsky, J. H. M. M. Schmitt, & T. A. Fleming.* 413, 333, 160-D5 (1993)

An Interpretation of Cycle Periods of Stellar Chromospheric Activity. *W. H. Soon, S. L. Baliunas, & Q. Zhang.* 414, L33, 175-F6 (1993)

X-Ray Emission at the Low-Mass End: Results from an Extensive *Einstein Observatory* Survey. *M. Barbera, G. Micela, S. Sciortino, F. R. Harnden, Jr., & R. Rosner.* 414, 846, 181-F10 (1993)

Extreme Ultraviolet Explorer Deep Survey Observations of a Large Flare on AU Microscopii. *Scott L. Cully, Oswald H. W. Siegmund, Peter W. Vedder, & John V. Vallerga.* 414, L49, 185-B1 (1993)

Extreme Ultraviolet Explorer Observations of the RS Canum Venaticorum Systems AR Lacertae and II Pegasi. *R. J. Patterer, P. W. Vedder, P. Jelinsky, A. Brown, & S. Bowyer.* 414, L57, 185-B13 (1993)

Extreme Ultraviolet Emission from Late-Type Stars: Initial Results from *Extreme Ultraviolet Explorer*. *Peter W. Vedder, Robert J. Patterer, Patrick Jelinsky, Alex Brown, & Stuart Bowyer.* 414, L61, 185-C5 (1993)

A Tight Correlation between Radio and X-Ray Luminosities of M Dwarfs. *Manuel Güdel, Jürgen H. M. M. Schmitt, Jay A. Bookbinder, & Thomas A. Fleming.* 415, 236, 188-A1 (1993)

The Evolution of Stellar Coronae: Initial Results from a *ROSAT* PSPC Observation of IC 2391. *Brian M. Patten & Theodore Simon.* 415, L123, 200-D1 (1993)

Discovery of Interstellar Water Lines at 437, 439, and 471 GHz: Strong Case for Water Maser Formation behind C-Type Shocks. *Gary J. Melnick, Karl M. Menten, Thomas G. Phillips, & Todd Hunter.* 416, L37, 207-E13 (1993)

The Mount Wilson Observatory Metallicity Index, C_{RV}: Comparison with Other Photometric Systems. *W. H. Soon, Q. Zhang, S. L. Baliunas, & R. L. Kurucz.* 416, 787, 213-C1 (1993)

Chromospheric Activity in Galactic Open Clusters. *A. J. Beasley & L. E. Cram.* 417, 157, 219-D1 (1993)

Optical Spectroscopy of the Dusty K5 V Star HD 98800. *Francis C. Fekel & Bernard W. Bopp.* 419, L89, 259-F3 (1993)

Acoustic Waves in M Dwarfs: Maintaining a Corona. *D. J. Mullan & Q. Q. Cheng.* 420, 392, 5-F8 (1994)

Detection of Rotational Modulation in the Coronal Extreme-Ultraviolet Emission from V711 Tauri? *Jeremy J. Drake, Alex Brown, Robert J. Patterer, Peter W. Vedder, Stuart Bowyer, & Edward F. Guinan.* 421, L43, 22-A10 (1994)

The Discrimination between O- and C-rich Circumstellar Envelopes from Molecular Observations. *V. Bujarrabal, A. Fuente, & A. Omont.* 421, L47, 22-B1 (1994)

Ca II H and K and Hα Emissions in Chromospherically Active Binary Systems (RS Canum Venaticorum and BY Draconis). *M. J. Fernández-Figueroa, D. Montes, E. De Castro, & M. Cornide.* 90, 433, 8-B6 (1994)

Observing Stellar Coronae with the Goddard High Resolution Spectrograph. I. The dMe Star AU Microscopii. *S. P. Maran, R. D. Robinson, S. N. Shore, J. W. Brosius, K. G. Carpenter, B. E. Woodgate, J. L. Linsky, A. Brown, P. B. Byrne, M. R. Kundu, S. White, J. C. Brandt, R. A. Shine, & F. M. Walter.* 421, 800, 28-B10 (1994)

Pumping of Main Line OH Masers in the Circumstellar Envelopes of OH/Infrared Stars. *Alan J. Collison & Gerald E. Nedoluha.* 422, 193, 32-E1 (1994)

Radio Constraints on Coronal Models for dMe Stars. *S. M. White, J. Lim, & M. R. Kundu.* 422, 293, 33-F11 (1994)

The Chromospheric Structure of the Cool Giant Star g Herculis. *Donald G. Luttermoser, Hollis R. Johnson, & Joel A. Eaton.* 422, 351, 34-D7 (1994)

Double-Core Evolution. V. Three-dimensional Effects in the Merger of a Red Giant with a Dwarf Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 422, 729, 40-G13 (1994)

A Millimeter-Wavelength Survey of S Stars for Mass Loss and Chemistry. *John H. Bieging & William B. Latter.* 422, 765, 41-D1 (1994)

ROSAT Observations of Stellar Flares. *J. H. M. M. Schmitt.* 90, 735, 12-G12 (1994)

Quiescent Microwave Emission from Late-Type Stars. *Manuel Güdel.* 90, 743, 13-A8 (1994)

Radio Evidence for Nonthermal Particle Acceleration on Stars of Late Spectral Type. *Kenneth R. Lang.* 90, 753, 13-B5 (1994)

Carbon Monoxide Fundamental Bands in Late-Type Stars. III. Chromosphere or CO-mosphere? *G. Wiedemann, T. R. Ayres, D. E. Jennings, & S. H. Saar.* 423, 806, 58-F6 (1994)

Reflection of Alfvén Waves in Stellar Atmospheres: The Case of Open Magnetic Fields. *Yu-Qing Lou & Robert Rosner.* 424, 429, 67-B11 (1994)

Open Cluster Chemical Composition. I. Later Type Stars in Eight Clusters. *R. Earle Luck.* 91, 309, 22-F4 (1994)

Neutral Carbon in the Circumstellar Envelope of α Orionis. *P. J. Huggins, R. Bachiller, P. Cox, & T. Forveille.* 424, L127, 79-E5 (1994)

The K-Band Surface Brightness of Late-Type Stars and the Distance to Cataclysmic Variables. *Tod F. Ramseyer.* 425, 243, 83-C5 (1994)

Asymptotic Giant Branch Stars in NGC 6822: Probes of Star Formation History. *C. Gallart, A. Aparicio, C. Chiosi, G. Bertelli, & J. M. Vílchez.* 425, L9, 85-B13 (1994)

Fluorescent K I 7699 Å Emission from Circumstellar Shells of Red Giants: Evidence for Highly Asymmetric Winds. *Bertrand Plez & David L. Lambert.* 425, L101, 94-F13 (1994)

A Deep Imaging Survey of the Pleiades with *ROSAT*. *J. R. Stauffer, J.-P. Caillault, M. Gagné, C. F. Prosser, & L. W. Hartmann.* 91, 625, 28-A6 (1994)

A Method of Determining Possible Brightness Variations of the Sun in Past Centuries from Observations of Solar-Type Stars. *Q. Zhang, W. H. Soon, S. L. Baliunas, G. W. Lockwood, B. A. Skiff, & R. R. Radick.* 427, L111, 127-D3 (1994)

GHRS Observations of Cool, Low-Gravity Stars. I. The Far-Ultraviolet Spectrum of α Orionis (M2 Iab). *Kenneth G. Carpenter, Richard D. Robinson, Glenn M. Wahlgren, Jeffrey L. Linsky, & Alexander Brown.* 428, 329, 132-C6 (1994)

Directivity of the Radio Emission from the K1 Dwarf Star AB Doradus. *Jeremy Lim, Stephen M. White, Graham J. Nelson, & Arnold O. Benz.* 430, 332, 163-C9 (1994)

A Volume-limited *ROSAT* Survey of Extreme Ultraviolet Emission from All Nondegenerate Stars within 10 Parsecs. *Brian E. Wood, Alexander Brown, Jeffrey L. Linsky, Barry J. Kellett, Gordon E. Bromage, Simon T. Hodgkin, & John P. Pye.* 93, 287, 45-E5 (1994)

Analytic Lyman-Alpha Wing Diagnostics and the Chromospheric Excitation Balance in Cool Dwarfs. *K. G. Gayley.* 431, 806, 188-F4 (1994)

Zeeman Enhancement of Lines in Extremely Active K Dwarfs. *Gibor Basri & Geoffrey W. Marcy.* 431, 844, 189-B11 (1994)

ROSAT X-Ray Observations of Late-Type Evolved Stars: On the Relationship between Coronal Temperatures and Luminosities. *A. Maggio, S. Sciortino, & F. R. Harnden, Jr.* 432, 701, 204-F11 (1994)

The CO/SiO Radiative Instability in Cool Star Atmospheres Revisited. *M. Cuntz & D. O. Muchmore.* 433, 303, 212-B3 (1994)

Discovery of a New White Dwarf in a Binary System (EUVE 0720−317) in the *Extreme Ultraviolet Explorer* Survey and Implications for the Late Stages of Stellar Evolution. *Stéphane Vennes & John R. Thorstensen.* 433, L29, 214-G13 (1994)

FY Aquilae and the Gamma-Ray Burst GB 790331. *Mike Irwin & Anna N. Żytkow.* 433, L81, 224-A1 (1994)

A Coronal Mass Ejection Model for the 1992 July 15 Flare on AU Microscopii Observed by the *Extreme Ultraviolet Explorer*. *Scott L. Cully, George H. Fisher, Mark J. Abbott, & Oswald H. W. Siegmund.* 435, 449, 249-E11 (1994)

Possible Detection of ^{14}CO in the Carbon Star IRC +10216. *Gregory A. Wright.* 436, L157, 281-F1 (1994)

Missing Opacity in the Atmospheric Models of Red Giants. *C. Ian Short & John B. Lester.* 436, L165, 281-G1 (1994)

Observations of Molecular Envelopes of Late-Type Stars: CRL 618, CRL 2688, CRL 3068, and CIT 6. *Sadafumi Fukasaku, Yasuhiro Hirahara, Akimasa Masuda, Kentarou Kawaguchi, Shin-ichi Ishikawa, Norio Kaifu, & William M. Irvine.* 437, 410, 288-F13 (1994)

Chromospheric Variations in Main-Sequence Stars. II. *S. L. Baliunas, R. A. Donahue, W. H. Soon, J. H. Horne, J. Frazer, L. Woodard-Eklund, M. Bradford, L. M. Rao, O. C. Wilson, Q. Zhang, W. Bennett, J. Briggs, S. M. Carroll, D. K. Duncan, D. Figueroa, H. H. Lanning, T. Misch, J. Mueller, R. W. Noyes, D. Poppe, A. C. Porter, C. R. Robinson, J. Russell, J. C. Shelton, T. Soyumer, A. H. Vaughan, & J. H. Whitney.* 438, 269, 5-B12 (1995)

Determination of Plasma Temperatures and Luminosities Using Multiple Extreme-Ultraviolet and X-Ray Filters. *Brian E. Wood, Alexander Brown, & Jeffrey L. Linsky.* 438, 350, 6-C9 (1995)

RE 0044+09: A New K Dwarf Rapid Rotator with a White Dwarf Companion? *Barry J. Kellett, Gordon E. Bromage, Alexander Brown, Robin D. Jeffries, David J. James, David Kilkenny, Russell M. Robb, David Wonnacott, Christopher Lloyd, & C. Clayton.* 438, 364, 6-D13 (1995)

The Faint X-Ray Sources In and Out of ω Centauri: X-Ray Observations and Optical Identifications. *Adrienne M. Cool, Jonathan E. Grindlay, Charles D. Bailyn, Paul J. Callanan, & Paul Hertz.* 438, 719, 14-B2 (1995)

The RIASS Coronathon: Joint X-Ray and Ultraviolet Observations of Normal F–K Stars. *Thomas R. Ayres, T. A. Fleming, T. Simon, B. M. Haisch, A. Brown, D. Lenz, W. Wamsteker, D. de Martino, C. Gonzalez, J. Bonnell, J. M. Mas-Hesse, C. Rosso, J. H. M. M. Schmitt, J. Trümper, W. Voges, J. Pye, R. C. Dempsey, J. L. Linsky, E. F. Guinan, G. M. Harper, C. Jordan, B. M. Montesinos, I. Pagano, & M. Rodonò.* 96, 223, 4-E7 (1995)

Tests of Two Convection Theories for Red Giant and Red Supergiant Envelopes. *Richard B. Stothers & Chao-wen Chin.* 440, 297, 45-C3 (1995)

Direct Measurement of the Inner Radius of the Dust Shell around the Cool Supergiant Star α Scorpii. *E. E. Bloemhof & R. M. Danen.* 440, L93, 58-C2 (1995)

A Survey of Lithium in the Red Giants of the Magellanic Clouds. *Verne V. Smith, Bertrand Plez, David L. Lambert, & D. A. Lubowich.* 441, 735, 72-A13 (1995)

A Nonlocal Calculation of Circumstellar OH Maser Emission. *Alan J. Collison & Gerald E. Nedoluha.* 442, 311, 81-D6 (1995)

Mg II *h* and *k* Profiles in High-Luminosity, Late-Type Stars. *R. D. Robinson & K. G. Carpenter.* 442, 328, 81-E12 (1995)

Activity Cycles in Cool Stars. I. Observation and Analysis Methods and Case Studies of Four Well-observed Examples. *Jeffrey C. Hall, G. W. Lockwood, & Erika L. Gibb.* 442, 778, 91-A1 (1995)

A Reanalysis of the SWP-HI *IUE* Observations of Capella. *Brian E. Wood & Thomas R. Ayres.* 443, 329, 99-F7 (1995)

On Orbital Circularization in Late-Type Close Binaries. *Jean-Louis Tassoul.* 444, 338, 118-B8 (1995)

GHRS Observations of Cool, Low-Gravity Stars. II. Flow and Turbulent Velocities in the Outer Atmosphere of γ Crucis (M3.4 III). *Kenneth G. Carpenter, Richard D. Robinson, & Philip G. Judge.* 444, 424, 119-D7 (1995)

Infrared Emission and Dynamics of Outflows in Late-Type Stars. *Željko Ivezić & Moshe Elitzur.* 445, 415, 138-C6 (1995)

Model Atmospheres for M (Sub)Dwarf Stars. I. The Base Model Grid. *France Allard & Peter H. Hauschildt.* 445, 433, 138-E2 (1995)

New Evolutionary Tracks for Very Low Mass Stars. *I. Baraffe, G. Chabrier, F. Allard, & P. H. Hauschildt.* 446, L35, 160-F6 (1995)

The Disruption of the Dense Disk in CRL 618. *Jesús Martín-Pintado, Ralph A. Gaume, Kenneth J. Johnston, & Rafael Bachiller.* 446, 687, 165-E4 (1995)

Luminosity Attenuation and Distances of Red Giant Stars. *L. Celis S.* 98, 701, 33-A1 (1995)

Deep Circulation in Red Giant Stars: A Solution to the Carbon and Oxygen Isotope Puzzles? *G. J. Wasserburg, Arnold I. Boothroyd, & I.-Juliana Sackmann.* 447, L37, 181-A11 (1995)

The Giant Branch of ω Centauri. IV. Abundance Patterns Based on Echelle Spectra of 40 Red Giants. *John E. Norris & G. S. Da Costa.* 447, 680, 185-D9 (1995)

Detection of Ammonia Emission toward Oxygen-rich Evolved Stars. *Karl M. Menten & Javier Alcolea.* 448, 416, 197-G10 (1995)

Carbon Isotope Ratios in Very Lithium-rich K Giants. *L. da Silva, R. de la Reza, & B. Barbuy.* 448, L41, 200-A1 (1995)

The B_jRI Photometric System. *Craig A. Gullixson, Patricia C. Boeshaar, J. Anthony Tyson, & Patrick Seitzer.* 99, 281, 38-A1 (1995)

On the Generation of Flux-Tube Waves in Stellar Convection Zones. II. Improved Treatment of Longitudinal Tube Wave Generation. *Z. E. Musielak, R. Rosner, H. P. Gail, & P. Ulmschneider.* 448, 865, 206-G7 (1995)

M Giant Kinematics in Off-Axis Fields between 150 and 300 Parsecs from the Galactic Center. *R. D. Blum, J. S. Carr, K. Sellgren, & D. M. Terndrup.* 449, 623, 221-C11 (1995)

Spectroscopic *EUVE* Observations of the Active Star AB Doradus. *Slavek M. Rucinski, Rolf Mewe, Jelle S. Kaastra, Osmi Vilhu, & Stephen M. White.* 449, 900, 225-B11 (1995)

Equivalent Widths for 54 Red Giants in 47 Tucanae, ω Centauri, NGC 6397, M22, and NGC 6752. *John E. Norris, G. S. Da Costa, & S. J. Tingay.* 99, 637, 43-F9 (1995)

Spectral and Temporal Characteristics of X-Ray–bright Stars in the Pleiades. *Marc Gagné, Jean-Pierre Caillault, & John R. Stauffer.* 450, 217, 231-A11 (1995)

The Chemical Composition of Red Giants. IV. The Neutron Density at the *s*-Process Site. *David L. Lambert, Verne V. Smith, Maurizio Busso, Roberto Gallino, & Oscar Straniero.* 450, 302, 232-B9 (1995)

The X-Ray View of the Low-Mass Stars in the Solar Neighborhood. *Jürgen H. M. M. Schmitt, Thomas A. Fleming, & Mark S. Giampapa.* 450, 392, 233-C13 (1995)

Correlations of Coronal X-Ray Emission with Activity, Mass, and Age of the Nearby K and M Dwarfs. *Thomas A. Fleming, Jürgen H. M. M. Schmitt, & Mark S. Giampapa.* 450, 401, 233-D12 (1995)

Are Variations in the Length of the Activity Cycle Related to Changes in Brightness in Solar-Type Stars? *Sallie Baliunas & Willie Soon.* 450, 896, 243-C8 (1995)

Maps of the Molecular Emission around 18 Evolved Stars. *K. Z. Stanek, G. R. Knapp, K. Young, & T. G. Phillips.* 100, 169, 48-C8 (1995)

A 12 Year Photometric Study of Lower Main-Sequence Hyades Stars. *Richard R. Radick, G. W. Lockwood, B. A. Skiff, & D. T. Thompson.* 452, 332, 266-F6 (1995)

A Semiempirical Determination of the Wind Velocity Structure for the Hybrid-Chromosphere Star α Trianguli Australis. *Graham M. Harper, Brian E. Wood, Jeffrey L. Linsky, Philip D. Bennett, Thomas R. Ayres, & Alexander Brown.* 452, 407, 267-F6 (1995)

Absolute Measurements of Starspot Area and Temperature: II Pegasi in 1989 October. *James E. Neff, Douglas O'Neal, & Steven H. Saar.* 452, 879, 276-G6 (1995)

Can Dust Formation in Evolved Stars Be Suppressed near Active Galactic Nuclei? *T. W. Hartquist, R. H. Durisen, J. E. Dyson, J. M. C. Rawlings, D. A. Williams, & R. J. R. Williams.* 453, 77, 282-C3 (1995)

Radio Detection of Late-Type (G–K) Dwarf Stars in the Pleiades. *Jeremy Lim & Stephen M. White.* 453, 207, 284-A5 (1995)

Far-Infrared Water Line Emissions from Circumstellar Outflows. *Wesley Chen & David A. Neufeld.* 453, L99, 298-F11 (1995)

Asymmetrical Mass Loss from Rotating Red Giant Variables. *S. M. Asida & Y. Tuchman.* 455, 286, 322-B2 (1995)

On the Failure of Standard Emission Measure Analysis for Solar Extreme-Ultraviolet and Ultraviolet Irradiance Spectra. *P. G. Judge, T. N. Woods, P. Brekke, & G. J. Rottman.* 455, L85, 326-A2 (1995)

Stellar Activity at the End of the Main Sequence: GHRS Observations of the M8 Ve Star VB 10. *Jeffrey L. Linsky, Brian E. Wood, Alexander Brown, Mark S. Giampapa, & Carol Ambruster.* 455, 670, 331-B10 (1995)

STARS: LONG-PERIOD VARIABLES

Flares on Mira Stars? *Bradley E. Schaefer.* 366, L39, 6-E1 (1991)

From Wind to Superwind: The Evolution of Mass-Loss Rates for Mira Models. *G. H. Bowen & L. A. Willson.* 375, L53, 124-C1 (1991)

321 GHz Submillimeter Water Masers around Evolved Stars. *Karl M. Menten & Gary J. Melnick.* 377, 647, 147-F8 (1991)

Kinematical Models of Maser Shells Formed by Aspherical Stellar Outflows (U Orionis; OH 231.8+4.2; Orion-IRc2). *P. F. Bowers.* 76, 1099, 40-G9 (1991)

Abundances of Tc and Related Elements in Stars of Type M, MS, and S. *Andrew D. Vanture, George Wallerstein, Jeffery A. Brown, & Grant Bazan.* 381, 278, 192-D7 (1991)

The Mode of Pulsation in Mira Variables Determined by the Observed Acceleration Data. *Y. Tuchman.* 383, 779, 223-G11 (1991)

STARS: LOW-MASS

Spectroscopy of Taurus Cloud Brown Dwarf Candidates. *John Stauffer, Terry Herter, Donald Hamilton, George H. Rieke, Marcia J. Rieke, Ron Probst, & William Forrest.* 367, L23, 17-D7 (1991)

Cooling Flows and the Formation of Massive Halos in cD Galaxies. *Andrea H. Prestwich & Marshall Joy.* 369, L1, 40-A7 (1991)

Lithium in the Most Extreme Halo Stars; Trends with Metallicity. *Constantine P. Deliyannis & Pierre Demarque.* 370, L89, 59-E5 (1991)

Gravitational Microlensing as a Method of Detecting Disk Dark Matter and Faint Disk Stars. *Kim Griest, Charles Alcock, Timothy S. Axelrod, David P. Bennett, Kem H. Cook, Kenneth C. Freeman, Hye-Sook Park, Saul Perlmutter, Bruce A. Peterson, Peter J. Quinn, Alexander W. Rodgers, & Christopher W. Stubbs (The MACHO Collaboration).* 372, L79, 85-D5 (1991)

Globular Cluster Mass Functions. *Harvey B. Richer, Gregory G. Fahlman, Roberto Buonanno, Flavio Fusi Pecci, Leonard Searle, & Ian B. Thompson.* 381, 147, 190-G7 (1991)

The Spectroscopic Properties of Extreme M Dwarfs in the 2 Micron Region. *T. J. Davidge & P. C. Boeshaar.* 403, L47, 20-E10 (1993)

Calibration of Stellar Models. *Alessandro Chieffi, Oscar Straniero, & Maurizio Salaris.* 445, L39, 140-G4 (1995)

STARS: LOW-MASS, BROWN DWARFS

Companions to White Dwarfs: Very Low Mass Stars and the Brown Dwarf Candidate GD 165B. *B. Zuckerman & E. E. Becklin.* 386, 260, 27-D7 (1992)

Candidate Brown Dwarfs in the Hyades. *Claia Bryja, Terry J. Jones, Roberta M. Humphreys, Geoffrey Lawrence, Robert L. Pennington, & William Zumach.* 388, L23, 52-C1 (1992)

Spectroscopy of a Brown Dwarf Candidate in the α Persei Open Cluster. *Rafael Rebolo, Eduardo L. Martín, & Antonio Magazzù.* 389, L83, 73-E11 (1992)

Dark Matter and Brown Dwarfs: Prospects for the Direct Detection of a Brown Dwarf Halo. *Ruth A. Daly & Gail C. McLaughlin.* 390, 423, 80-F1 (1992)

A Near-Infrared Search for Brown Dwarfs in the Pleiades. *D. A. Simons & E. E. Becklin.* 390, 431, 80-F10 (1992)

The Role of the Molecular-metallic Transition of Hydrogen in the Evolution of Jupiter, Saturn, and Brown Dwarfs. *Didier Saumon, William B. Hubbard, Gilles Chabrier, & Hugh M. Van Horn.* 391, 827, 98-B13 (1992)

Effective Temperatures of M Dwarfs. *Graham Berriman, Neill Reid, & S. K. Leggett.* 392, L31, 106-D11 (1992)

Minimum Mass for D and H Burning during Slow Accretion. *E. E. Salpeter.* 393, 258, 117-C12 (1992)

The Faintest Stars. *C. G. Tinney, J. R. Mould, & I. N. Reid.* 396, 173, 157-C6 (1992)

The Radial Velocity of the White Dwarf Giclas 29-38. *C. Barnbaum & B. Zuckerman.* 396, L31, 160-F1 (1992)

Infrared Colors of Low-Mass Stars. *S. K. Leggett.* 82, 351, 54-C1 (1992)

Excitation of Gravity Waves in Common Envelopes. *Noam Soker.* 399, 185, 197-E3 (1992)

Luminosity Functions for Very Low Mass Stars and Brown Dwarfs. *Gregory Laughlin & Peter Bodenheimer.* 403, 303, 17-E13 (1993)

A Spectroscopic Test for Substellar Objects. *Antonio Magazzù, Eduardo L. Martín, & Rafael Rebolo.* 404, L17, 33-E7 (1993)

The Detectability of Brown Dwarfs: Predictions and Uncertainties. *L. Nelson, S. Rappaport, & P. C. Joss.* 404, 723, 38-A1 (1993)

An Expanded Set of Brown Dwarf and Very Low Mass Star Models. *A. Burrows, W. B. Hubbard, D. Saumon, & J. I. Lunine.* 406, 158, 57-B1 (1993)

The Unique Spectrum of the Brown Dwarf Candidate GD 165B and Comparison to the Spectra of Other Low-Luminosity Objects. *J. Davy Kirkpatrick, Todd J. Henry, & James Liebert.* 406, 701, 66-E10 (1993)

A Search for Substellar Companions to Southern Solar-Type Stars. *Kaylene A. Murdoch, J. B. Hearnshaw, & M. Clark.* 413, 349, 160-E11 (1993)

On the Li and Be Tests for Brown Dwarfs. *L. A. Nelson, S. Rappaport, & E. Chiang.* 413, 364, 160-G1 (1993)

The Faintest Stars: From Schmidt Plates to Luminosity Functions. *C. G. Tinney, I. N. Reid, & J. R. Mould.* 414, 254, 173-B12 (1993)

The Faintest Stars: The Luminosity and Mass Functions at the Bottom of the Main Sequence. *Christopher G. Tinney.* 414, 279, 173-D12 (1993)

The Contribution of Disks and Envelopes to the Millimeter Continuum Emission from Very Young Low-Mass Stars. *S. Terebey, C. J. Chandler, & P. André.* 414, 759, 180-F6 (1993)

The Stellar Population in the ρ Ophiuchi Cluster. *F. Comeron, G. H. Rieke, A. Burrows, & M. J. Rieke.* 416, 185, 203-D1 (1993)

Proto–Brown Dwarfs. I. Methods and Results for High-Latitude Clouds. *Marc W. Pound & Leo Blitz.* 418, 328, 235-B9 (1993)

Deep Infrared Array Photometry of Globular Clusters. I. M4. *T. J. Davidge & D. A. Simons.* 423, 640, 56-D13 (1994)

Cool Zero-Metallicity Stellar Atmospheres. *D. Saumon, P. Bergeron, J. I. Lunine, W. B. Hubbard, & A. Burrows.* 424, 333, 66-A8 (1994)

Finite Source Sizes and the Information Content of Macho-Type Lens Search Light Curves. *Robert J. Nemiroff & W. A. D. T. Wickramasinghe.* 424, L21, 69-G8 (1994)

Observational Limits on Ω in Stars, Brown Dwarfs, and Stellar Remnants from Gravitational Microlensing. *Julianne J. Dalcanton, Claude R. Canizares, Arno Granados, Charles C. Steidel, & John T. Stocke.* 424, 550, 71-E5 (1994)

An Optical Study of the Faint End of the Stellar Luminosity Function. *T. H. Jarrett, R. L. Dickman, & W. Herbst.* 424, 852, 75-D2 (1994)

The Influence of H_2O Line Blanketing on the Spectra of Cool Dwarf Stars. *F. Allard, P. H. Hauschildt, S. Miller, & J. Tennyson.* 426, L39, 103-E7 (1994)

The Optical Gravitational Lensing Experiment: The Discovery of Three Further Microlensing Events in the Direction of the Galactic Bulge. *A. Udalski, M. Szymański, J. Kałużny, M. Kubiak, M. Mateo, & W. Krzemiński.* 426, L69, 109-C5 (1994)

A Coronagraphic Search for Brown Dwarfs around Nearby Stars. *T. Nakajima, S. T. Durrance, D. A. Golimowski, & S. R. Kulkarni.* 428, 797, 140-B11 (1994)

A Search for Lithium in Pleiades Brown Dwarf Candidates Using the Keck Hires Echelle. *Geoffrey W. Marcy, Gibor Basri, & James R. Graham.* 428, L57, 142-E7 (1994)

Gravitational Microlensing of the Galactic Bulge Stars. *Marcin Kiraga & Bohdan Paczyński.* 430, L101, 174-E11 (1994)

Oscillations of Red Dwarfs in Evolved Low-Mass Binaries with Neutron Stars. *Marek J. Sarna, Umin Lee, & Alexander G. Muslimov.* 431, 302, 179-G8 (1994)

MACHOs and the Diffuse X-Ray Background. *V. Kashyap, R. Rosner, D. Schramm, & J. Truran.* 431, L87, 191-E2 (1994)

On the Mass of the Dark Compact Objects in the Galactic Disk. *Ph. Jetzer.* 432, L43, 199-F10 (1994)

Baryonic Dark Clusters in Galactic Halos and Their Observable Consequences. *Ira Wasserman & Edwin E. Salpeter.* 433, 670, 219-D5 (1994)

Protostellar Accretion Disks Resolved with the JCMT-CSO Interferometer. *O. P. Lay, J. E. Carlstrom, R. E. Hills, & T. G. Phillips.* 434, L75, 241-G9 (1994)

The Luminosity Function at the End of the Main Sequence: Results of a Deep, Large-Area, CCD Survey for Cool Dwarfs. *J. Davy Kirkpatrick, John T. McGraw, Thomas R. Hess, James Liebert, & Donald W. McCarthy, Jr.* 94, 749, 62-C4 (1994)

M Dwarfs, Microlensing, and the Mass Budget of the Galaxy. *John N. Bahcall, Chris Flynn, Andrew Gould, & Sofia Kirhakos.* 435, L51, 252-C11 (1994)

Magnification Bias in Galactic Microlensing Searches. *Robert J. Nemiroff.* 435, 682, 255-D9 (1994)

Are the OGLE Microlenses in the Galactic Bar? *B. Paczyński, K. Z. Stanek, A. Udalski, M. Szymański, J. Kałużny, M. Kubiak, M. Mateo, & W. Krzemiński.* 435, L113, 259-G3 (1994)

The Detectability of Planetary Companions of Compact Galactic Objects from Their Effects on Microlensed Light Curves of Distant Stars. *Alberto D. Bolatto & Emilio E. Falco.* 436, 112, 262-G1 (1994)

Constraints to the Masses of Brown Dwarf Candidates from the Lithium Test. *Eduardo L. Martín, Rafael Rebolo, & Antonio Magazzù.* 436, 262, 264-G9 (1994)

Observational Limits on Companions to G29-38. *S. J. Kleinman, R. E. Nather, D. E. Winget, J. C. Clemens, P. A. Bradley, A. Kanaan, J. L. Provencal, C. F. Claver, T. K. Watson, K. Yanagida, J. S. Dixson, M. A. Wood, D. J. Sullivan, E. Meištas, E. M. Leibowitz, P. Moskalik, S. Zola, G. Pajdosz, J. Krzesinski, J.-E. Solheim, A. Bruvold, D. O'Donoghue, M. Katz, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, S. O. Kepler, O. Giovannini, C. J. Hansen, & S. D. Kawaler.* 436, 875, 277-G1 (1994)

The Optical Gravitational Lensing Experiment: OGLE No. 7: Binary Microlens or a New Unusual Variable? *A. Udalski, M. Szymański, S. Mao, R. Di Stefano, J. Kałużny, M. Kubiak, M. Mateo, & W. Krzemiński.* 436, L103, 280-D9 (1994)

Jeans Mass for Anisotropic Matter. *L. Herrera & N. O. Santos.* 438, 308, 5-F7 (1995)

On the Mass of the Dark Compact Objects in the Galactic Disk: Erratum. *Ph. Jetzer.* 438, L49, 10-E1 (1995) (Orig. paper in 432, L43, 199-F10 (1994))

Very Low Mass Stars and White Dwarfs in NGC 6397. *Francesco Paresce, Guido De Marchi, & Martino Romaniello.* 440, 216, 44-B13 (1995)

Microlensing by the Galactic Bar. *HongSheng Zhao, David N. Spergel, & R. Michael Rich.* 440, L13, 48-C8 (1995)

Self-Lensing by a Stellar Disk. *Andrew Gould.* 441, 77, 60-D5 (1995)

The Brown Dwarf Candidate ESO 207−61: Its Distance and Very Low Luminosity. *P. A. Ianna & L. W. Fredrick.* 441, L47, 67-C5 (1995)

Dynamical and Observable Constraints on RAMBOs: Robust Associations of Massive Baryonic Objects. *Ben Moore & Joseph Silk.* 442, L5, 84-D10 (1995)

HST Images of the Eclipsing Pulsar B1957+20. *Andrew S. Fruchter, Jay Bookbinder, & Charles D. Bailyn.* 443, L21, 102-D13 (1995)

On Population III Stars as Gravitational Microlensing Objects in the Galactic Halo. *Masayuki Y. Fujimoto, Kiyoshi Sugiyama, Icko Iben, Jr., & David Hollowell.* 444, 175, 115-F13 (1995)

Proto–Brown Dwarfs. II. Results in the Ophiuchus and Taurus Molecular Clouds. *Marc W. Pound & Leo Blitz.* 444, 270, 117-B10 (1995)

Detection of a Very Low Mass Companion to the Astrometric Binary Gliese 105A. *D. A. Golimowski, T. Nakajima, S. R. Kulkarni, & B. R. Oppenheimer.* 444, L101, 131-A1 (1995)

Probable Gravitational Microlensing toward the Galactic Bulge. *C. Alcock, R. A. Allsman, T. S. Axelrod, D. P. Bennett, K. H. Cook, K. C. Freeman, K. Griest, S. L. Marshall, S. Perlmutter, B. A. Peterson, M. R. Pratt, P. J. Quinn, A. W. Rodgers, C. W. Stubbs, & W. Sutherland (The MACHO Collaboration).* 445, 133, 134-B10 (1995)

The Stellar Mass Function of Praesepe. *D. M. Williams, G. H. Rieke, & J. R. Stauffer.* 445, 359, 137-D12 (1995)

New Evolutionary Tracks for Very Low Mass Stars. *I. Baraffe, G. Chabrier, F. Allard, & P. H. Hauschildt.* 446, L35, 160-F6 (1995)

K-Band Microlensing of the Inner Galaxy. *Andrew Gould.* 446, L71, 170-F11 (1995)

On the Minimum Magnification between Caustic Crossings for Microlensing by Binary and Multiple Stars. *Hans J. Witt & Shude Mao.* 447, L105, 191-A1 (1995)

Blending of Light in Gravitational Microlensing Events. *R. Di Stefano & A. A. Esin.* 448, L1, 199-B1 (1995)

The Brown Dwarf Candidate 0918−0023B Is a Distant Compact Galaxy. *E. E. Becklin, B. Macintosh, & B. Zuckerman.* 449, L117, 227-A2 (1995)

An Equation of State for Low-Mass Stars and Giant Planets. *D. Saumon, G. Chabrier, & H. M. Van Horn.* 99, 713, 44-E12 (1995)

MAP-based Trigonometric Parallaxes of Altair and Vega. *George Gatewood & Joost Kiewiet de Jonge.* 450, 364, 233-A4 (1995)

CM Draconis and YY Geminorum: Agreement between Theory and Observation. *Gilles Chabrier & Isabelle Baraffe.* 451, L29, 252-E6 (1995)

Assessing the Environmental Impact on PSR B1620−26 in M4. *Steinn Sigurdsson.* 452, 323, 266-E8 (1995)

NGC 1333 IRAS 4: Further Multiplicity Revealed with the CSO-JCMT Interferometer. *O. P. Lay, J. E. Carlstrom, & R. E. Hills.* 452, L73, 270-F7 (1995)

Hubble Space Telescope Observations of the Very Low Mass Companion to Gliese 105A. *David A. Golimowski, William G. Fastie, Daniel J. Schroeder, & Alan Uomoto.* 452, L125, 280-C1 (1995)

Unification of the Nearby and Photometric Stellar Luminosity Functions. *Pavel Kroupa.* 453, 358, 286-A13 (1995)

The Low-Mass IMF in the ρ Ophiuchi Cluster. *D. M. Williams, F. Comerón, G. H. Rieke, & M. J. Rieke.* 454, 144, 301-C2 (1995)

STARS: LUMINOSITIES

Classical Cepheid Luminosities from Binary Companions. *Nancy Remage Evans.* 372, 597, 83-B1 (1991)

The Globular Cluster ω Centauri: The Origin of the Mysterious Correlation between the RR Lyrae Luminosity and [Fe/H]. *Young-Wook Lee.* 373, L43, 97-B7 (1991)

Brown Dwarfs in Young Stellar Clusters. *Guy S. Stringfellow.* 375, L21, 117-C7 (1991)

Absolute Magnitudes and Kinematic Properties of Cepheids. *Teresa D. Wilson, Thomas G. Barnes III, Suzanne L. Hawley, & William H. Jefferys.* 378, 708, 161-B11 (1991)

STARS: LUMINOSITY FUNCTION, MASS FUNCTION

Constraints on the Age and Evolution of the Galaxy from the White Dwarf Luminosity Function. *M. A. Wood.* 386, 539, 32-B3 (1992)

Evolving, Dynamical Models for Collapsed-Core Globular Clusters: M15 and NGC 6624. *Robert P. Grabhorn, Haldan N. Cohn, Phyllis M. Lugger, & Brian W. Murphy.* 392, 86, 102-B1 (1992)

Multiplicity-corrected Mass Function of Main-Sequence Stars in the Solar Neighborhood. *Sarbani Basu & N. C. Rana.* 393, 373, 118-F10 (1992)

A Spectroscopic Determination of the Mass Distribution of DA White Dwarfs. *P. Bergeron, Rex A. Saffer, & James Liebert.* 394, 228, 130-G5 (1992)

Oxygen-enhanced Models for Globular Cluster Stars. II. Isochrones and Luminosity Functions. *Peter A. Bergbusch & Don A. VandenBerg.* 81, 163, 37-C11 (1992)

The Faintest Stars. *C. G. Tinney, J. R. Mould, & I. N. Reid.* 396, 173, 157-C6 (1992)

Gravitational Formation Times and Stellar Mass Distributions for Stars of Mass 0.3–30 $M_\odot$. *P. C. Myers & G. A. Fuller.* 402, 635, 10-E1 (1993)

Luminosity Functions for Very Low Mass Stars and Brown Dwarfs. *Gregory Laughlin & Peter Bodenheimer.* 403, 303, 17-E13 (1993)

The Detectability of Brown Dwarfs: Predictions and Uncertainties. *L. Nelson, S. Rappaport, & P. C. Joss.* 404, 723, 38-A1 (1993)

The Low-Mass Stellar Content of Galaxies: Constraints through Hybrid Population Synthesis near 1 Micron. *Jean Couture & Eduardo Hardy.* 406, 142, 56-G11 (1993)

Heavy-Element Abundances and Massive Star Formation. *Boqi Wang & Joseph Silk.* 406, 580, 65-B1 (1993)

The Structure of the Core of 47 Tucanae from *Hubble Space Telescope* Observations. *Guido De Marchi, Francesco Paresce, & Francesco R. Ferraro.* 85, 293, 11-B3 (1993)

Massive Star Formation near the Galactic Center and the Fate of the Stellar Remnants. *Mark Morris.* 408, 496, 91-D1 (1993)

Sub–Giant Branch Evolution and Efficient Central Energy Transport. *John Faulkner & Fritz J. Swenson.* 411, 200, 129-F3 (1993)

Infrared Luminosity Functions for the Young Stellar Population Associated with the L1641 Molecular Cloud. *Karen M. Strom, Stephen E. Strom, & K. M. Merrill.* 412, 233, 145-A8 (1993)

A Search for Substellar Companions to Southern Solar-Type Stars. *Kaylene A. Murdoch, J. B. Hearnshaw, & M. Clark.* 413, 349, 160-E11 (1993)

The Faintest Stars: From Schmidt Plates to Luminosity Functions. *C. G. Tinney, I. N. Reid, & J. R. Mould.* 414, 254, 173-B12 (1993)

The Faintest Stars: The Luminosity and Mass Functions at the Bottom of the Main Sequence. *Christopher G. Tinney.* 414, 279, 173-D12 (1993)

The Stellar Population in the ρ Ophiuchi Cluster. *F. Comeron, G. H. Rieke, A. Burrows, & M. J. Rieke.* 416, 185, 203-D1 (1993)

Truncated Initial Mass Function in Starburst Galaxies. *Stéphane Charlot, Frank Ferrari, G. J. Mathews, & Joseph Silk.* 419, L57, 259-C1 (1993)

On the Determination of the Number of O Stars in H II Regions and Starburst Galaxies. *William D. Vacca.* 421, 140, 17-F13 (1994)

Deep Infrared Array Photometry of Globular Clusters. I. M4. *T. J. Davidge & D. A. Simons.* 423, 640, 56-D13 (1994)

An Optical Study of the Faint End of the Stellar Luminosity Function. *T. H. Jarrett, R. L. Dickman, & W. Herbst.* 424, 852, 75-D2 (1994)

Initial Mass Functions from Ultraviolet Stellar Photometry: A Comparison of Lucke and Hodge OB Associations near 30 Doradus with the Nearby Field. *Jesse K. Hill, Joan E. Isensee, Robert H. Cornett, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 425, 122, 81-F5 (1994)

The Initial Mass Function for Massive Stars in the Magellanic Clouds. I. *UBV* Photometry and Color-Magnitude Diagrams for 14 OB Associations. *Robert J. Hill, Barry F. Madore, & Wendy L. Freedman.* 91, 583, 27-C8 (1994)

Hubble Space Telescope Fine Guidance Sensor Interferometric Observations of the Core of 30 Doradus. *M. G. Lattanzi, J. L. Hershey, R. Burg, L. G. Taff, S. T. Holfeltz, B. Bucciarelli, I. N. Evans, R. Gilmozzi, J. Pringle, & N. R. Walborn.* 427, L21, 117-D1 (1994)

The *Hubble Space Telescope* Extragalactic Distance Scale Key Project. II. Photometry of WFC Images of M81. *Shaun M. G. Hughes, Peter B. Stetson, Anne Turner, Robert C. Kennicutt, Jr., Robert Hill, Myung Gyoon Lee, Wendy L. Freedman, Jeremy R. Mould, Barry F. Madore, Laura Ferrarese, Holland C. Ford, John A. Graham, John G. Hoessel, & Garth D. Illingworth.* 428, 143, 130-A5 (1994)

The Initial Mass Function for Massive Stars in the Magellanic Clouds. III. Luminosity and Mass Functions for 14 OB Associations. *Robert J. Hill, Barry F. Madore, & Wendy L. Freedman.* 429, 204, 146-E12 (1994)

The Luminosity Function for Stars with $-0.6 \leq M_V \leq 6.5$ in the Globular Cluster M30: Is There a Problem with Stellar Evolution Models? *Michael Bolte.* 431, 223, 178-G10 (1994)

MACHOs and the Diffuse X-Ray Background. *V. Kashyap, R. Rosner, D. Schramm, & J. Truran.* 431, L87, 191-E2 (1994)

Cooling Theory of Crystallized White Dwarfs. *L. Segretain, G. Chabrier, M. Hernanz, E. García-Berro, J. Isern, & R. Mochkovitch.* 434, 641, 236-F2 (1994)

The Luminosity Function at the End of the Main Sequence: Results of a Deep, Large-Area, CCD Survey for Cool Dwarfs. *J. Davy Kirkpatrick, John T. McGraw, Thomas R. Hess, James Liebert, & Donald W. McCarthy, Jr.* 94, 749, 62-C4 (1994)

The Luminosity Functions of Embedded Stellar Clusters. I. Method of Solution and Analytic Results. *André B. Fletcher & Steven W. Stahler.* 435, 313, 247-F11 (1994)

The Luminosity Functions of Embedded Stellar Clusters. II. Numerical Results. *André B. Fletcher & Steven W. Stahler.* 435, 329, 248-A3 (1994)

WFPC2 Observations of the Double Cluster NGC 1850 in the Large Magellanic Cloud. *R. Gilmozzi, E. K. Kinney, S. P. Ewald, N. Panagia, & M. Romaniello.* 435, L43, 252-B7 (1994)

M Dwarfs, Microlensing, and the Mass Budget of the Galaxy. *John N. Bahcall, Chris Flynn, Andrew Gould, & Sofia Kirhakos.* 435, L51, 252-C11 (1994)

Massive Stars in the Field and Associations of the Magellanic Clouds: The Upper Mass Limit, the Initial Mass Function, and a Critical Test of Main-Sequence Stellar Evolutionary Theory. *Philip Massey, Cornelia C. Lang, Kathleen DeGioia-Eastwood, & Catharine D. Garmany.* 438, 188, 4-A2 (1995)

A Gauss-Hermite Expansion of the Galactic Globular Cluster Luminosity Function. *Roberto G. Abraham & Sidney van den Bergh.* 438, 218, 4-D1 (1995)

The Evolutionary Status of the Stellar Population in the ρ Ophiuchi Cloud Core. *Karen M. Strom, Jeremy Kepner, & Stephen E. Strom.* 438, 813, 15-D7 (1995)

On the Luminosity Function, Lifetimes, and Origin of Blue Stragglers in Globular Clusters. *Charles D. Bailyn & Marc H. Pinsonneault.* 439, 705, 34-C13 (1995)

Measurements of Globular Cluster Specific Frequencies and Luminosity Function Widths in Coma. *John P. Blakeslee & John L. Tonry.* 442, 579, 87-G8 (1995)

White Dwarfs and Mass Segregation in the Core of 47 Tucanae. *Francesco Paresce, Guido De Marchi, & Robert Jedrzejewski.* 442, L57, 94-D12 (1995)

Temperatures, Gravities, and Masses for a Sample of Bright DA White Dwarfs and the Initial-to-Final Mass Relation. *Angela Bragaglia, Alvio Renzini, & P. Bergeron.* 443, 735, 108-A7 (1995)

Proto–Brown Dwarfs. II. Results in the Ophiuchus and Taurus Molecular Clouds. *Marc W. Pound & Leo Blitz.* 444, 270, 117-B10 (1995)

The Stellar Content of 30 Doradus Derived from Spatially Integrated Ultraviolet Spectra: A Test of Spectral Synthesis Models. *William D. Vacca, Carmelle Robert, Claus Leitherer, & Peter S. Conti.* 444, 647, 125-C3 (1995)

Chemical Evolution of Irregular and Blue Compact Galaxies. *Leticia Carigi, Pedro Colín, Manuel Peimbert, & Antonio Sarmiento.* 445, 98, 133-F5 (1995)

Deep Infrared Array Photometry of Globular Clusters. III. M13. *T. J. Davidge & W. E. Harris.* 445, 211, 135-D7 (1995)

The Stellar Mass Function of Praesepe. *D. M. Williams, G. H. Rieke, & J. R. Stauffer.* 445, 359, 137-D12 (1995)

UIT and Optical Imagery of Large Magellanic Cloud Associations LH 52 and LH 53: Ages and Initial Mass Function Slopes. *Robert S. Hill, K.-P. Cheng, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 446, 622, 164-F10 (1995)

The Intermediate Stellar Mass Population in R136 Determined from *Hubble Space Telescope* Planetary Camera 2 Images. *Deidre A. Hunter, Edward J. Shaya, Jon A. Holtzman, Robert M. Light, Earl J. O'Neil, Jr., & Roger Lynds.* 448, 179, 194-E7 (1995)

The Mass of a Star Formed in a Cloud Core: Theory and Its Application to the Orion A Cloud. *Takenori Nakano, Tetsuo Hasegawa, & Colin Norman.* 450, 183, 230-E7 (1995)

On Coagulation and the Stellar Mass Spectrum. *Eric J. Allen & Pierre Bastien.* 452, 652, 273-F5 (1995)

Are the Nearby and Photometric Stellar Luminosity Functions Different? *Pavel Kroupa.* 453, 350, 286-A2 (1995)

Unification of the Nearby and Photometric Stellar Luminosity Functions. *Pavel Kroupa.* 453, 358, 286-A13 (1995)

The Low-Mass IMF in the ρ Ophiuchi Cluster. *D. M. Williams, F. Comerón, G. H. Rieke, & M. J. Rieke.* 454, 144, 301-C2 (1995)

The Initial Mass Function and Massive Star Evolution in the OB Associations of the Northern Milky Way. *Philip Massey, Kelsey E. Johnson, & Kathleen DeGioia-Eastwood.* 454, 151, 301-C12 (1995)

Pre–Main-Sequence Evolution in the Taurus-Auriga Molecular Cloud. *Scott J. Kenyon & Lee Hartmann.* 101, 117, 54-D3 (1995)

STARS: RR LYRAE

Application of Oxygen-enhanced Evolutionary Sequences to the Horizontal Branch of M15. *Ben Dorman, Young-Wook Lee, & Don A. VandenBerg.* 366, 115, 2-D11 (1991)

Stellar Evolution and Period Changes in RR Lyrae Stars. *Young-Wook Lee.* 367, 524, 19-G7 (1991)

Metal Abundances of RR Lyrae Variables in Selected Galactic Star Fields. V. The Lick Astrographic Fields at Intermediate Galactic Latitudes. *Nicholas B. Suntzeff, T. D. Kinman, & Robert P. Kraft.* 367, 528, 19-G13 (1991)

Two Double-Mode RR Lyrae Stars in the Field. *Christine M. Clement, T. D. Kinman, & Nicholas B. Suntzeff.* 372, 273, 77-C13 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

The Globular Cluster ω Centauri: The Origin of the Mysterious Correlation between the RR Lyrae Luminosity and [Fe/H]. *Young-Wook Lee.* 373, L43, 97-B7 (1991)

Detection of a Galactic Color Gradient for Blue Horizontal-Branch Stars of the Halo Field and Implications for the Halo Age and Density Distributions. *George W. Preston, Stephen A. Shectman, & Timothy C. Beers.* 375, 121, 112-E1 (1991)

The Evolution of He-burning Stars: Horizontal and Asymptotic Branches in Galactic Globulars. *V. Castellani, A. Chieffi, & L. Pulone.* 76, 911, 37-C5 (1991)

The RRd Masses Revisited. *Norman R. Simon & Arthur N. Cox.* 376, 717, 135-C1 (1991)

The Metallicity of RR Lyrae Stars in Baade's Window. *Alistair R. Walker & Donald M. Terndrup.* 378, 119, 152-D13 (1991)

Masses of RR*d* Variables Using Livermore OPAL Opacities. *Arthur N. Cox.* 381, L71, 199-F1 (1991)

STARS: MAGNETIC

Rotation and Magnetism in White Dwarfs. *Gary D. Schmidt & Jane E. Norsworthy.* 366, 270, 4-D1 (1991)

Spectroscopy of FO Aquarii: Evidence for Reprocessing in a Hot Wind. *Phillip J. Martell & Ronald H. Kaitchuck.* 366, 286, 4-E5 (1991)

Nonthermal X-Ray Emission from Winds of OB Supergiants. *Wan Chen & Richard L. White.* 366, 512, 9-D1 (1991)

A Crucial Test of the Diffusion Model: 53 Camelopardalis. *J. Babel & G. Michaud.* 366, 560, 10-A5 (1991)

Thomson Scattering in a Magnetic Field. II. Arbitrary Field Orientation. *Barbara A. Whitney.* 369, 451, 43-C10 (1991)

Be Stars: Chromospheres and Cool Envelopes and Their Relation to Magnetic Fields. *A. E. Ringuelet & M. E. Iglesias.* 369, 463, 43-D10 (1991)

Possible Detection of TeV Gamma Rays from AM Herculis. *C. L. Bhat, R. K. Kaul, H. S. Rawat, V. K. Senecha, R. C. Rannot, M. L. Sapru, A. K. Tickoo, & H. Razdan.* 369, 475, 43-E12 (1991)

Three-dimensional Structures of Magnetostatic Atmospheres. III. A General Formulation. *B. C. Low.* 370, 427, 52-E8 (1991)

Disk Accretion onto Magnetic T Tauri Stars. *Arieh Königl.* 370, L39, 53-E13 (1991)

Dynamic Magnetic Reconnection at an X-Type Neutral Point. *I. J. D. Craig & A. N. McClymont.* 371, L41, 66-F1 (1991)

Synchronization of the Magnetic Nova V1500 Cygni. *Gary D. Schmidt & H. S. Stockman.* 371, 749, 70-G7 (1991)

Thomson Scattering in a Magnetic Field. I. Field along z. *Barbara A. Whitney.* 75, 1293, 22-F1 (1991)

Magnetic Two-Photon Scattering and Two-Photon Emission: Cross Sections and Redistribution Functions. *S. G. Alexander & P. Mészáros.* 372, 554, 82-E11 (1991)

Cyclotron Harmonics in Accreting Pulsars and Gamma-Ray Bursters: Effect of Two-Photon Processes. *S. G. Alexander & P. Mészáros.* 372, 565, 82-F9 (1991)

Broad-Band Linear Polarization in Cool Stars. I. Models and Spatial Effects for Magnetic and Scattering Regions. *Juhani Huovelin & Steven H. Saar.* 374, 319, 102-B1 (1991)

Equation of State in a Strong Magnetic Field: Finite Temperature and Gradient Corrections. *Andrew M. Abrahams & Stuart L. Shapiro.* 374, 652, 107-B12 (1991)

A Theory of Gamma-Ray Bursts Based on Resonant Compton Scattering. *Peter Vitello & Charles D. Dermer.* 374, 668, 107-D1 (1991)

V1500 Cygni: A Prediction. *J. I. Katz.* 374, L59, 110-D11 (1991)

The Formation and Detection of Strongly Magnetic White Dwarf Binaries in Globular Clusters. *G. Chanmugam, A. Ray, & K. P. Singh.* 375, 600, 120-B9 (1991)

Cyclotron Line Features in the Spectrum of the Transient X-Ray Pulsar X0115+634. *F. Nagase, T. Dotani, Y. Tanaka, K. Makishima, T. Mihara, T. Sakao, H. Tsunemi, S. Kitamoto, K. Tamura, A. Yoshida, & H. Nakamura.* 375, L49, 124-B11 (1991)

On Turbulent Diffusion of Magnetic Fields and the Loss of Magnetic Flux from Stars. *Samuel I. Vainshtein & Robert Rosner.* 376, 199, 127-D7 (1991)

Rotational Evolution of Solar-Type Stars. I. Main-Sequence Evolution. *K. B. MacGregor & M. Brenner.* 376, 204, 127-D13 (1991)

Spin Evolution and Magnetic Fields in Cataclysmic Variables. *Andrew R. King & Jean-Pierre Lasota.* 378, 674, 160-G1 (1991)

Discovery of a Cyclotron Resonance Feature at 30 keV from the Transient X-Ray Pulsar Cepheus X-4. *T. Mihara, K. Makishima, S. Kamijo, T. Ohashi, F. Nagase, Y. Tanaka, & K. Koyama.* 379, L61, 175-C6 (1991)

Superfluid Hydrodynamics in Rotating Neutron Stars. I. Nondissipative Equations. *Gregory Mendell.* 380, 515, 184-F1 (1991)

Superfluid Hydrodynamics in Rotating Neutron Stars. II. Dissipative Effects. *Gregory Mendell.* 380, 530, 184-G3 (1991)

A Connection between Long-Term Luminosity Variations and Orbital Period Changes in Chromospherically Active Binaries. *Douglas S. Hall.* 380, L85, 188-F1 (1991)

Molecules and Chains in a Strong Magnetic Field: Statistical Treatment. *Andrew M. Abrahams & Stuart L. Shapiro.* 382, 233, 203-B5 (1991)

Neutron Star Crustal Plate Tectonics. II. Evolution of Radio Pulsar Magnetic Fields. *M. Ruderman.* 382, 576, 208-F4 (1991)

Cold Equation of State in a Strong Magnetic Field: Effects of Inverse β-Decay. *Dong Lai & Stuart L. Shapiro.* 383, 745, 223-D11 (1991)

STARS: MAGNETIC FIELDS

Multiple Resonant Scattering in the Compton Upscatter Model of Gamma-Ray Bursts. *J. J. Brainerd.* 384, 545, 9-A1 (1992)

Radio Emission Altitudes in the Pulsar Magnetosphere. *J. A. Phillips.* 385, 282, 15-D5 (1992)

A Mechanism for Orbital Period Modulation in Close Binaries. *James H. Applegate.* 385, 621, 20-G4 (1992)

Constraints on the Surface Magnetic Fields of Hot Stars with Winds. *Murugesapillai Maheswaran & Joseph P. Cassinelli.* 386, 695, 33-G13 (1992)

Angular Momentum Transport in Magnetized Stellar Radiative Zones. I. Numerical Solutions to the Core Spin-up Model Problem. *P. Charbonneau & K. B. MacGregor.* 387, 639, 46-E11 (1992)

Magnetic Fields in Damped Lyα Systems. *A. M. Wolfe, K. M. Lanzetta, & A. L. Oren.* 388, 17, 49-C5 (1992)

First Conclusive Evidence for Rotational Modulation of Stellar Radio Emission. *Jeremy Lim, Graham J. Nelson, Catarina Castro, David Kilkenny, & François van Wyk.* 388, L27, 52-C7 (1992)

Limits on the Magnetic Flux of Pre–Main-Sequence Stars. *Gibor Basri, Geoffrey W. Marcy, & Jeff A. Valenti.* 390, 622, 83-A9 (1992)

The Nonexponential Evolution of Pulsar Magnetic Fields. *Shigeto Wakatsuki, Atsushi Hikita, Naohiro Sato, & Naoki Itoh.* 392, 628, 110-A10 (1992)

Models of White Dwarfs Distorted by Differential Rotation and Magnetic Fields. *V. S. Geroyannis & A. A. Hadjopoulos.* 81, 377, 40-B13 (1992)

Two Ultramassive White Dwarfs Found among Candidates for Magnetic Fields. *Gary D. Schmidt, P. Bergeron, James Liebert, & Rex A. Saffer.* 394, 603, 136-G11 (1992)

Magnetic Field Decay in Isolated Neutron Stars. *Peter Goldreich & Andreas Reisenegger.* 395, 250, 143-C5 (1992)

X-Ray Emission from Single Magnetic Early-Type Stars. *V. V. Usov & D. B. Melrose.* 395, 575, 150-B1 (1992)

The White Dwarf Companion to PSR 0820+02. *D. Koester, G. Chanmugam, & D. Reimers.* 395, L107, 154-C7 (1992)

Exploring the Peculiar Magnetic Field of Feige 7. *N. Achilleos, D. T. Wickramasinghe, James Liebert, Rex A. Saffer, & A. D. Grauer.* 396, 273, 158-D13 (1992)

Properties of Quasi-periodic Oscillations in Accreting Magnetic White Dwarfs. *Kinwah Wu, G. Chanmugam, & G. Shaviv.* 397, 232, 170-G6 (1992)

Dynamics of the Envelopes of Be Stars in the Equatorial Plane. II. The Influence of a Weak Magnetic Field on the Azimuthal Motion of a Slowly Expanding Wind. *Haiqi Chen & J. M. Marlborough.* 397, 242, 171-A3 (1992)

Solar Spin-down with Internal Magnetic Fields. *P. Charbonneau & K. B. MacGregor.* 397, L63, 174-A3 (1992)

Discovery of a Sub-Megagauss Magnetic White Dwarf through Spectropolarimetry. *Gary D. Schmidt, H. S. Stockman, & Paul S. Smith.* 398, L57, 188-A7 (1992)

Implications of $^3P_2$ Superfluidity in the Interior of Neutron Stars. *H. F. Chau, K. S. Cheng, & K. Y. Ding.* 399, 213, 197-G9 (1992)

Discovery of Two Cool Magnetic White Dwarfs. *P. Bergeron, María-Teresa Ruiz, & S. K. Leggett.* 400, 315, 212-G5 (1992)

Possible First Detection of Ultraviolet Pulses from an Intermediate Polar: V603 Aquila. *A. Schwarzenberg-Czerny, A. Udalski, & R. Monier.* 401, L19, 227-C7 (1992)

A Search for Circular Polarization in Cataclysmic Variables. *H. S. Stockman, Gary D. Schmidt, G. Berriman, James Liebert, R. L. Moore, & D. T. Wickramasinghe.* 401, 628, 230-C13 (1992)

Pulsar Death Lines and Death Valley. *Kaiyou Chen & Malvin Ruderman.* 402, 264, 4-D1 (1993)

Magnetic Nonthermal Activity in the T Tauri System. *Robert B. Phillips, Colin J. Lonsdale, & Eric D. Feigelson.* 403, L43, 20-E5 (1993)

Broad-band Linear Polarization in Cool Stars. II. Amplitude and Wavelength Dependence for Magnetic and Scattering Regions. *Steven H. Saar & Juhani Huovelin.* 404, 739, 38-B7 (1993)

Discovery of Remarkably Intense Radio Emission from a Young and Rapidly Rotating dMe Star. *Jeremy Lim.* 405, L33, 47-F1 (1993)

The Strong Magnetic Field in G227-35. *Marshall H. Cohen, Angela Putney, & Robert W. Goodrich.* 405, L67, 54-D5 (1993)

Nova V2214 Ophiuchi 1988: A Magnetic Nova inside the Period Gap. *R. Baptista, F. J. Jablonski, D. Cieslinski, & J. E. Steiner.* 406, L67, 68-D9 (1993)

Resistive Dissipation and Magnetic Field Topology in the Stellar Corona. *E. N. Parker.* 407, 342, 73-C11 (1993)

G62-46: An Unresolved Double Degenerate Binary Containing a Magnetic DA Component. *P. Bergeron, María-Teresa Ruiz, & S. K. Leggett.* 407, 733, 79-E13 (1993)

Magnetic Field Topology in Pulsars. *Jonathan Arons.* 408, 160, 85-B1 (1993)

Origin and Radio Pulse Properties of Millisecond Pulsars. *Kaiyou Chen & Malvin Ruderman.* 408, 179, 85-C12 (1993)

Neutron Star Dynamos and the Origins of Pulsar Magnetism. *Christopher Thompson & Robert C. Duncan.* 408, 194, 85-E4 (1993)

Relativistic Electron-Positron Beams in Gamma-Ray Bursters. *I. A. Smith & Richard I. Epstein.* 410, 315, 116-A6 (1993)

Crustal Magnetic Field Decay in Neutron Stars and the Nature of Superdense Matter. *Vadim A. Urpin & Kenneth A. Van Riper.* 411, L87, 142-E6 (1993)

An Interpretation of Cycle Periods of Stellar Chromospheric Activity. *W. H. Soon, S. L. Baliunas, & Q. Zhang.* 414, L33, 175-F6 (1993)

Extreme Ultraviolet Explorer Observations of the Magnetic Cataclysmic Variable RE 1938−461. *John K. Warren, John V. Vallerga, Christopher W. Mauche, Koji Mukai, & Oswald H. W. Siegmund.* 414, L69, 185-D2 (1993)

Evidence of Magnetic Activity in Short-Period Algol Binaries. *Mercedes T. Richards & Geary E. Albright.* 88, 199, 42-G7 (1993)

Thomas-Fermi Calculations of Atoms and Matter in Magnetic Neutron Stars: Effects of Higher Landau Bands. *Ö. E. Rögnvaldsson, I. Fushiki, E. H. Gudmundsson, C. J. Pethick, & J. Yngvason.* 416, 276, 204-E3 (1993)

HR 1362: The Evolved 53 Camelopardalis. *K. Stępień.* 416, 368, 205-E11 (1993)

Angular Momentum Transport in Magnetized Stellar Radiative Zones. II. The Solar Spin-down. *P. Charbonneau & K. B. MacGregor.* 417, 762, 228-G13 (1993)

Discovery of a Magnetic/Nonmagnetic Double-degenerate Binary System. *James Liebert, P. Bergeron, Gary D. Schmidt, & Rex A. Saffer.* 418, 426, 236-C10 (1993)

Nonthermal Cyclotron Emission from Low-Luminosity Accretion onto Magnetic Neutron Stars. *Robert W. Nelson, E. E. Salpeter, & Ira Wasserman.* 418, 874, 243-D12 (1993)

The Faraday Rotation and Linear Polarization of Light in Stellar Atmospheres. *N. A. Silant'ev.* 419, 294, 249-G6 (1993)

Magnetic Shaping of Planetary Nebulae and Other Stellar Wind Bubbles. *Roger A. Chevalier & Ding Luo.* 421, 225, 18-G1 (1994)

Rotation and Magnetic Fields during the Evolution of Massive Stars through B[e] and Wolf-Rayet Phases. *Murugesapillai Maheswaran & Joseph Cassinelli.* 421, 718, 27-B9 (1994)

Discovery of a Dwarf Carbon Star with a White Dwarf Companion and of a Highly Magnetic Degenerate Star. *James Liebert, Gary D. Schmidt, M. Lesser, J. A. Stepanian, V. A. Lipovetsky, Frederic H. Chaffee, Craig B. Foltz, & P. Bergeron.* 421, 733, 27-C12 (1994)

Radio Constraints on Coronal Models for dMe Stars. *S. M. White, J. Lim, & M. R. Kundu.* 422, 293, 33-F11 (1994)

Quiescent Microwave Emission from Late-Type Stars. *Manuel Güdel.* 90, 743, 13-A8 (1994)

Radiation-driven Acceleration in Photospheres of Nonaccreting Magnetic White Dwarfs. *Vladimir V. Zheleznyakov & A. V. Serber.* 90, 783, 13-D13 (1994)

The Incidence of Magnetism among White Dwarfs: The First Stars below 100 Kilogauss. *Gary D. Schmidt & Paul S. Smith.* 423, L63, 54-B3 (1994)

Reflection of Alfvén Waves in Stellar Atmospheres: The Case of Open Magnetic Fields. *Yu-Qing Lou & Robert Rosner.* 424, 429, 67-B11 (1994)

A Broad Observational Study of the Eclipsing Magnetic Cataclysmic Variable RE 2107−05. *Jason Glenn, Steve B. Howell, Gary D. Schmidt, James Liebert, Albert D. Grauer, & R. Mark Wagner.* 424, 967, 76-G3 (1994)

On the Magnetic Nature of GQ Muscae. *M. P. Diaz & J. E. Steiner.* 425, 252, 83-D5 (1994)

Are Cosmic Rays Effective for Ionization of Protoplanetary Disks? *Arkady Z. Dolginov & Tomasz F. Stepinski.* 427, 377, 114-E3 (1994)

Magnetic Braking in Spin Evolution of Magnetized T Tauri Stars. *Insu Yi.* 428, 760, 139-F6 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. I. A Generalized Model. *Frank Shu, Joan Najita, Eve Ostriker, Frank Wilkin, Steven Ruden, & Susana Lizano.* 429, 781, 155-D5 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. II. Formulation of the Dynamical Problem. *Frank H. Shu, Joan Najita, Steven P. Ruden, & Susana Lizano.* 429, 797, 155-E9 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. III. Numerical Solution of the Sub-Alfvénic Region. *Joan R. Najita & Frank H. Shu.* 429, 808, 155-F9 (1994)

Eclipse Mapping of the Accreting Magnetic White Dwarf in DP Leonis with *HST*. *H. S. Stockman, Gary D. Schmidt, James Liebert, & J. B. Holberg.* 430, 323, 163-B11 (1994)

Dynamo Generation of a Magnetic Field in the White Dwarf GD 358. *J. Andrew Markiel, John H. Thomas, & H. M. Van Horn.* 430, 834, 172-C7 (1994)

Self-similar, Spherical Collapse of a Nonrotating Magnetized Cloud. *Tzihong Chiueh & Jien-Kuo Chou.* 431, 380, 180-F13 (1994)

The Effect of Constant Horizontal Magnetic Fields on Model Atmospheres of Ap Stars. *F. LeBlanc, G. Michaud, & J. Babel.* 431, 388, 180-G9 (1994)

Zeeman Enhancement of Lines in Extremely Active K Dwarfs. *Gibor Basri & Geoffrey W. Marcy.* 431, 844, 189-B11 (1994)

Long-Term Evolution of Crustal Neutron Star Magnetic Fields. *V. A. Urpin, G. Chanmugam, & Yeming Sang.* 433, 780, 220-G5 (1994)

On Nonlinear Radial Adiabatic Oscillations in Magnetic Polytropes. *M. K. Das, O. J. Mollikutty, & R. K. Tavakol.* 433, 786, 220-G13 (1994)

The Unusual Ω of the Millisecond Pulsar 1620−26: The Consequence of a Giant Glitch? *K. S. Cheng, N. Chong, & T. M. Lee.* 434, 733, 237-G10 (1994)

The Nonexponential Evolution of Pulsar Magnetic Fields. II. Velocity–Magnetic Field Correlation. *Naoki Itoh & Kentaro Hiraki.* 435, 784, 256-G8 (1994)

RJ 051542+0104.7: A New Magnetic, Eclipsing, Cataclysmic Variable. *Peter M. Garnavich, Paula Szkody, Russell M. Robb, David R. Zurek, & D. W. Hoard.* 435, L141, 260-C11 (1994)

Orbital Period Variability in the Eclipsing Pulsar Binary PSR B1957+20: Evidence for a Tidally Powered Star. *James H. Applegate & Jacob Shaham.* 436, 312, 265-E8 (1994)

The Soft Gamma-Ray Spectrum of A0535+26: Detection of an Absorption Feature at 110 keV by OSSE. *J. E. Grove, M. S. Strickman, W. N. Johnson, J. D. Kurfess, R. L. Kinzer, C. H. Starr, G. V. Jung, E. Kendziorra, P. Kretschmar, M. Maisack, & R. Staubert.* 438, L25, 10-A9 (1995)

A Method for Estimating the Fractional Area Coverage of Active Regions on Dwarf F and G Stars. *Vincenzo Andretta & Mark S. Giampapa.* 439, 405, 26-F10 (1995)

Infrared Zeeman Analysis of ϵ Eridani. *Jeff A. Valenti, Geoffrey W. Marcy, & Gibor Basri.* 439, 939, 37-E9 (1995)

ORFEUS Observations of AM Herculis. *John C. Raymond, Christopher W. Mauche, Stuart Bowyer, & Mark Hurwitz.* 440, 331, 45-F7 (1995)

Delayed Switch-on of Pulsars. *Alexander Muslimov & Dany Page.* 440, L77, 58-A3 (1995)

Detection of the Hot White Dwarf in the Magnetic Nova V1500 Cygni with the *Hubble Space Telescope*. *Gary D. Schmidt, James Liebert, & H. S. Stockman.* 441, 414, 65-A11 (1995)

Magnetic Activity Variations of ϵ Eridani. *David F. Gray & Sallie L. Baliunas.* 441, 436, 65-D4 (1995)

Surface Temperature of a Magnetized Neutron Star and Interpretation of the *ROSAT* Data. I. Dipolar Fields. *Dany Page.* 442, 273, 81-A1 (1995)

On the Origin of "Dividing Lines" for Late-Type Giants and Supergiants. *R. Rosner, Z. E. Musielak, F. Cattaneo, R. L. Moore, & S. T. Suess.* 442, L25, 84-G11 (1995)

Magnetic Field Evolution in White Dwarfs: The Hall Effect and Complexity of the Field. *A. G. Muslimov, H. M. Van Horn, & M. A. Wood.* 442, 758, 90-F2 (1995)

Magnetized Accretion and Spin Evolution in Classical T Tauri Stars. *Insu Yi.* 442, 768, 90-G2 (1995)

Postaccretion Magnetic Field Evolution of Neutron Stars. *E. J. Young & G. Chanmugam.* 442, L53, 94-D3 (1995)

Generation of Mass Loss in K Giants: The Failure of Global Oscillation Modes and Possible Implications. *G. Sutmann & M. Cuntz.* 442, L61, 94-E7 (1995)

On the Nature of the Spectral Features in Peculiar "DQ" White Dwarfs. *Gary D. Schmidt, P. Bergeron, & Bruce Fegley, Jr.* 443, 274, 99-A10 (1995)

Magnetic Moments and Angular Momenta of Stars and Planets. *C. N. Arge, D. J. Mullan, & A. Z. Dolginov.* 443, 795, 108-G1 (1995)

Starspot Evolution, Differential Rotation, and Magnetic Cycles in the Chromospherically Active Binaries λ Andromedae, σ Geminorum, II Pegasi, and V711 Tauri. *Gregory W. Henry, Joel A. Eaton, Jamesia Hamer, & Douglas S. Hall.* 97, 513, 19-C6 (1995)

Circular Polarization in the Radio Emission of RS Canum Venaticorum Binaries. *Stephen M. White & Elena Franciosini.* 444, 342, 118-C1 (1995)

Geometry and Pulse Profiles of X-Ray Pulsars: Asymmetric Relativistic Fits to 4U 1538−52 and Vela X-1. *T. Bulik, H. Riffert, P. Mészáros, K. Makishima, T. Mihara, & B. Thomas.* 444, 405, 119-B3 (1995)

Extreme Ultraviolet Light Curves of UZ Fornacis: Evidence for Accretion Stream Absorption and Vertical Extent of the Accretion Spot. *John K. Warren, Martin M. Sirk, & John V. Vallerga.* 445, 909, 147-F13 (1995)

New Insights into Nonradiative Heating in Late A Star Chromospheres. *Frederick M. Walter, Lynn D. Matthews, & Jeffrey L. Linsky.* 447, 353, 177-C6 (1995)

A Search for Magnetic Fields among DA White Dwarfs. *Gary D. Schmidt & Paul S. Smith.* 448, 305, 196-D7 (1995)

Off-centered Dipole Models for Three Isolated Magnetic White Dwarfs. *Angela Putney & Stefan Jordan.* 449, 863, 224-E10 (1995)

On the Torque Exerted by a Magnetically Threaded Accretion Disk. *Y.-M. Wang.* 449, L153, 227-F1 (1995)

Are Variations in the Length of the Activity Cycle Related to Changes in Brightness in Solar-Type Stars? *Sallie Baliunas & Willie Soon.* 450, 896, 243-C8 (1995)

The Dynamics of Flux Tubes in a High-β Plasma. II. Buoyancy in Stars and Accretion Disks. *Ethan T. Vishniac.* 451, 816, 258-D12 (1995)

Three New Magnetic White Dwarf Stars. *Angela Putney.* 451, L67, 260-F7 (1995)

Dynamo Generation of Magnetic Fields in White Dwarfs. *John H. Thomas, J. Andrew Markiel, & H. M. Van Horn.* 453, 403, 286-F3 (1995)

The Nonexponential Evolution of Pulsar Magnetic Fields. III. Comparison with the New Velocity Measurement. *Naoki Itoh, Takemi Kotouda, & Kentaro Hiraki.* 455, 244, 321-D13 (1995)

X-Ray Emission from Magnetic Cataclysmic Variables and White Dwarf Mass Estimates. *Kinwah Wu, G. Chanmugam, & G. Shaviv.* 455, 260, 321-F8 (1995)

Magnetocentrifugally Driven Flows from Young Stars and Disks. V. Asymptotic Collimation into Jets. *Frank H. Shu, Joan Najita, Eve C. Ostriker, & Hsien Shang.* 455, L155, 334-C6 (1995)

STARS: MASS LOSS

Circumstellar Material around the Massive Close Binary DH Cephei. *M. F. Corcoran.* 366, 308, 4-G8 (1991)

Using SN 1987A Light Echoes to Determine Mass Loss from the Progenitor. *Arlin P. S. Crotts & William E. Kunkel.* 366, L73, 11-D1 (1991)

Distribution of Dust about o Ceti and α Orionis Based on 11 Micron Spatial Interferometry. *M. Bester, W. C. Danchi, C. G. Degiacomi, C. H. Townes, & T. R. Geballe.* 367, L27, 17-E1 (1991)

On Winds and X-Rays of O-Type Stars. *Tomasz Chlebowski & Catharine D. Garmany.* 368, 241, 26-B1 (1991)

On the Possible Bipolar Nature of 21 Micron *IRAS* Sources. *Bruce J. Hrivnak & S. Kwok.* 368, 564, 32-B1 (1991)

Theoretical Light Curve for the Recurrent Nova RS Ophiuchi—Determination of the White Dwarf Mass, Composition, and Distance. *Mariko Kato.* 369, 471, 43-E6 (1991)

Star Formation and the Nature of Bipolar Outflows. *Frank H. Shu, Steven P. Ruden, Charles J. Lada, & Susana Lizano.* 370, L31, 53-E1 (1991)

Mass Outflow in the Nearby Proto–Planetary System β Pictoris. *Frederick C. Bruhweiler, Yoji Kondo, & C. A. Grady.* 371, L27, 66-D7 (1991)

Mixing Layers in Stellar Outflows. *J. Cantó & A. C. Raga.* 372, 646, 83-F7 (1991)

Magnetic Confinement, Alfvén Wave Reflection, and the Origins of X-Ray and Mass-Loss "Dividing Lines" for Late-Type Giants and Supergiants. *R. Rosner, C.-H. An, Z. E. Musielak, R. L. Moore, & S. T. Suess.* 372, L91, 85-E5 (1991)

Double Core Evolution. IV. The Late Stages of Evolution of a 2 $M_\odot$ Red Giant with a 1 $M_\odot$ Companion. *Ronald E. Taam & Peter Bodenheimer.* 373, 246, 89-A10 (1991)

The Common Envelope Phase in Classical Novae: One-dimensional Models. *Anurag Shankar, Mario Livio, & James W. Truran.* 374, 623, 106-G6 (1991)

From Wind to Superwind: The Evolution of Mass-Loss Rates for Mira Models. *G. H. Bowen & L. A. Willson.* 375, L53, 124-C1 (1991)

Mass Loss in the 96 Day Binary UU Cancri. *Joel A. Eaton, Douglas S. Hall, & R. Kent Honeycutt.* 376, 289, 128-E1 (1991)

Molecular Outflows Associated with Young Stellar Objects in the L1641 Region of Orion. *James A. Morgan, F. Peter Schloerb, Ronald L. Snell, & John Bally.* 376, 618, 134-A12 (1991)

Observations of Stellar Winds from Hot Stars at 1.3 Millimeters. *Claus Leitherer & Carmelle Robert.* 377, 629, 147-E1 (1991)

Constraints on the Physical Properties of Optical Bullets in SS 433. *John C. Brown, Joseph P. Cassinelli, & George W. Collins II.* 378, 307, 154-G1 (1991)

Can Neutron Stars Ablate Their Companions? *Amir Levinson & David Eichler.* 379, 359, 167-E1 (1991)

An Observational Connection between Circumstellar Disk Mass and Molecular Outflows. *Sylvie Cabrit & Philippe André.* 379, L25, 169-C6 (1991)

Interaction of Mass Lost in Globular Clusters with the Halo Medium. *D. J. Faulkner & Graeme H. Smith.* 380, 441, 183-F7 (1991)

Particle Emissivity in Circumstellar Disks. *Steven V. W. Beckwith & Anneila I. Sargent.* 381, 250, 192-B1 (1991)

On the Nature of the Excess 100 Micron Flux Associated with Carbon Stars. *Michael P. Egan & Chun Ming Leung.* 383, 314, 216-B1 (1991)

Time Variations in the X-Rays from Cygnus X-3 Observed with *Ginga*. *Shunji Kitamoto, Seiko Mizobuchi, Koujun Yamashita, & Hiroshi Nakamura.* 384, 263, 4-B13 (1992)

On Mass-Transfer Rates in Classical Nova Precursors. *Icko Iben, Jr., Masayuki Y. Fujimoto, & Jim MacDonald.* 384, 580, 9-D1 (1992)

Spherically Symmetric, Polytropic Flow. *T. Theuns & M. David.* 384, 587, 9-D9 (1992)

The Multiple Molecular Winds of CRL 2688. *K. Young, G. Serabyn, T. G. Phillips, G. R. Knapp, R. Güsten, & A. Schulz.* 385, 265, 15-B13 (1992)

Classical Nova Models with Accretion Heating at Accretion Rates of 10^{-9} and 10^{-10} $M_\odot$ per Year. *Dina Prialnik & Attay Kovetz.* 385, 665, 21-D1 (1992)

Radial Velocities of Carbon Stars: CO versus Optical Measurements. *Cecilia Barnbaum.* 385, 694, 21-F10 (1992)

The Bow Shock Structure of IRS 7: Wind-Wind Collision near the Galactic Center. *Farhad Yusef-Zadeh & Fulvio Melia.* 385, L41, 23-B13 (1992)

Excitation of Pressure Modes in Common Envelopes. *Noam Soker.* 386, 190, 26-E1 (1992)

Winds from T Tauri Stars. II. Balmer Line Profiles for Inner Disk Winds. *Nuria Calvet, Lee Hartmann, & Robert Hewett.* 386, 229, 27-A9 (1992)

Colliding Winds from Early-Type Stars in Binary Systems. *Ian R. Stevens, John M. Blondin, & A. M. T. Pollock.* 386, 265, 27-E1 (1992)

Polarization Variability among Wolf-Rayet Stars. VII. The Single Stars WR 14, WR 25, and WR 69. *Laurent Drissen, Carmelle Robert, & Anthony F. J. Moffat.* 386, 288, 27-F11 (1992)

Positions of the Radio Recombination Line Masers in MWC 349. *P. Planesas, J. Martín-Pintado, & E. Serabyn.* 386, L23, 29-D1 (1992)

Constraints on the Surface Magnetic Fields of Hot Stars with Winds. *Murugesapillai Maheswaran & Joseph P. Cassinelli.* 386, 695, 33-G13 (1992)

The Wind Geometry of the Wolf-Rayet Star HD 191765. *R. E. Schulte-Ladbeck, K. H. Nordsieck, M. Taylor, K. S. Bjorkman, A. M. Magalhães, & M. J. Wolff.* 387, 347, 41-C6 (1992)

An Accreting Black Hole Model for Sagittarius A*. *Fulvio Melia.* 387, L25, 43-C10 (1992)

Properties of Swept-up Molecular Outflows. *Colin R. Masson & Lawrence M. Chernin.* 387, L47, 43-F1 (1992)

Discovery of a Fast Wind from a Field Population II Giant Star. *A. K. Dupree, Dimitar D. Sasselov, & John B. Lester.* 387, L85, 48-D11 (1992)

Dynamics of Wind Bubbles and Superbubbles. I. Slow Winds and Fast Winds. *Bon-Chul Koo & Christopher F. McKee.* 388, 93, 50-C1 (1992)

Dynamics of Wind Bubbles and Superbubbles. II. Analytic Theory. *Bon-Chul Koo & Christopher F. McKee.* 388, 103, 50-C12 (1992)

Mass Loss from OH/IR Stars: Models for the Infrared Emission of Circumstellar Dust Shells. *K. Justtanont & A. G. G. M. Tielens.* 389, 400, 64-G10 (1992)

Stellar Wind Collision and X-Ray Generation in Massive Binaries. *V. V. Usov.* 389, 635, 69-C10 (1992)

Probing the Circumstellar Environments of Very Young Low-Mass Stars Using Water Masers. *S. Terebey, S. N. Vogel, & P. C. Myers.* 390, 181, 76-C1 (1992)

1612 MHz OH Maser Emission from Axisymmetric Circumstellar Envelopes: Miras. *Alan J. Collison & John D. Fix.* 390, 191, 76-C13 (1992)

Time Series Observations of O Stars. I. *IUE* Observations of Variability in the Stellar Wind of ζ Puppis. *R. K. Prinja, L. A. Balona, C. T. Bolton, R. A. Crowe, M. S. Fieldus, A. W. Fullerton, D. R. Gies, I. D. Howarth, D. McDavid, & A. H. N. Reid.* 390, 266, 77-C6 (1992)

What Drives the Mass Transfer in Cygnus X-3? *Abhas Mitra.* 390, 645, 83-C8 (1992)

Propagating Absorption Enhancements in the Wind of the Extreme Of Supergiant HD 151804. *A. W. Fullerton, D. R. Gies, & C. T. Bolton.* 390, 650, 83-D1 (1992)

The Collapse of White Dwarfs to Neutron Stars. *S. E. Woosley & E. Baron.* 391, 228, 88-G1 (1992)

The First Linear Polarization Spectra of Wolf-Rayet Stars in the Ultraviolet: EZ Canis Majoris and θ Muscae. *R. E. Schulte-Ladbeck, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, D. Shepherd, M. Taylor, & B. A. Whitney.* 391, L37, 92-C6 (1992)

Models of Planetary Nebula Spectral Evolution. *Kevin Volk.* 80, 347, 27-B11 (1992)

Hα Observations of Early-Type Stars. *S. Scuderi, G. Bonanno, R. Di Benedetto, D. Spadaro, & N. Panagia.* 392, 201, 103-D7 (1992)

Stellar Wind Paleontology. II. Faint Halos and Historical Mass Ejection in Planetary Nebulae. *Bruce Balick, Guillermo Gonzalez, Adam Frank, & George Jacoby.* 392, 582, 109-D11 (1992)

Ultraviolet and Optical Spectral Morphology of Melnick 42 and Radcliffe 136a in 30 Doradus. *Nolan R. Walborn, Dennis C. Ebbets, Joel Wm. Parker, Joy Nichols-Bohlin, & Richard L. White.* 393, L13, 120-C1 (1992)

Hydromagnetic Disk Winds in Young Stellar Objects and Active Galactic Nuclei. *Guy Pelletier & Ralph E. Pudritz.* 394, 117, 129-D13 (1992)

Self-consistent Models of Wolf-Rayet Stars as Helium Stars with Optically Thick Winds. *Mariko Kato & Icko Iben, Jr.* 394, 305, 131-F13 (1992)

SO and SO_2 in Mass-Loss Envelopes of Red Giants: Probes of Nonequilibrium Circumstellar Chemistry and Mass-Loss Rates. *Raghvendra Sahai & Peter G. Wannier.* 394, 320, 132-A3 (1992)

Prevention of Accretion onto White Dwarfs by Stellar Winds. *James MacDonald.* 394, 619, 137-B8 (1992)

Light-Curve Analysis of Classical Novae. *Mariko Kato & Icko Iben, Jr.* 394, L47, 139-C7 (1992)

Possible Detection of a High-Velocity Neutral Wind in T Tauri. *Abraham Ruiz, José L. Alonso, & I. F. Mirabel.* 394, L57, 139-D7 (1992)

Mass Loss and a Possible Population II Lithium Dip. *David S. P. Dearborn, David N. Schramm, & L. M. Hobbs.* 394, L61, 139-E1 (1992)

Lithium Dilution through Main-Sequence Mass Loss. *Fritz J. Swenson & John Faulkner.* 395, 654, 151-D3 (1992)

A Determination of the Mass of Sagittarius A* from Its Radio Spectral and Source Size Measurements. *Fulvio Melia, J. R. Jokipii, & Ajay Narayanan.* 395, L87, 154-A1 (1992)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. II. Plaskett's Star (HD 47129). *Michael S. Wiggs & Douglas R. Gies.* 396, 238, 158-A12 (1992)

Extremely High Velocity CO Emission from NGC 2071. *Lawrence M. Chernin & Colin R. Masson.* 396, L35, 160-F8 (1992)

Hubble Space Telescope FOS Observations of KPD 0005+5106: A Subluminous WN-WC Descendant with Ongoing Mass Outflow? *Edward M. Sion & Ronald A. Downes.* 396, L79, 167-B7 (1992)

Neutral Winds from Protostars. *Carlo Giovanardi, Susana Lizano, Antonella Natta, Neal J. Evans II, & Carl Heiles.* 397, 214, 170-E13 (1992)

Limits on Detectability of Mass Loss from Cool Dwarfs. *D. J. Mullan, J. G. Doyle, R. O. Redman, & M. Mathioudakis.* 397, 225, 170-F12 (1992)

OH/IR Stars in the Magellanic Clouds. *P. R. Wood, J. B. Whiteoak, S. M. G. Hughes, M. S. Bessell, F. F. Gardner, & A. R. Hyland.* 397, 552, 177-G5 (1992)

Tidal Heating and Mass Loss in Neutron Star Binaries: Implications for Gamma-Ray Burst Models. *P. Mészáros & M. J. Rees.* 397, 570, 178-A12 (1992)

Polarization and the Envelopes of B[e] Supergiants in the Magellanic Clouds. *A. M. Magalhães.* 398, 286, 185-C11 (1992)

Why All Stars Should Possess Circumstellar Temperature Inversions. *Jack D. Scudder.* 398, 319, 185-F11 (1992)

Mapping AG Carinae: Long-Slit Spectroscopy and Coronographic Imaging of the Nebula and Jet. *Antonella Nota, Claus Leitherer, Mark Clampin, Perry Greenfield, & David A. Golimowski.* 398, 621, 191-G6 (1992)

The Nucleus of M31. *Fulvio Melia.* 398, L95, 194-C8 (1992)

Infrared Emission and Mass Loss from Evolved Stars in Elliptical Galaxies. *G. R. Knapp, J. E. Gunn, & C. G. Wynn-Williams.* 399, 76, 196-B3 (1992)

Evidence for Periodic Modulation of Presupernova Mass Loss from the Progenitor of SN 1979C. *Kurt W. Weiler, Schuyler D. Van Dyk, James E. Pringle, & Nino Panagia.* 399, 672, 206-C5 (1992)

Hubble Space Telescope Spectroscopy of OB Stars in M31. *J. B. Hutchings, L. Bianchi, H. J. G. L. M. Lamers, P. Massey, & S. C. Morris.* 400, L35, 214-E1 (1992)

Polycyclic Aromatic Hydrocarbon Formation in Carbon-rich Stellar Envelopes. *Isabelle Cherchneff, John R. Barker, & Alexander G. G. M. Tielens.* 401, 269, 224-D1 (1992)

Polarization Cancellation in the Two-Component Winds from Wolf-Rayet Stars. *M. Taylor & J. P. Cassinelli.* 401, 311, 224-G5 (1992)

Mass-Loss Rates for *IRAS*-bright Red Giants: A Revised Model of Circumstellar CO Emission. *Joel H. Kastner.* 401, 337, 225-B11 (1992)

CO in the Cometary Globules of the Helix Nebula. *P. J. Huggins, R. Bachiller, P. Cox, & T. Forveille.* 401, L43, 227-F7 (1992)

Deposition of Mass, Momentum, and Energy by Massive Stars into the Interstellar Medium. *Claus Leitherer, Carmelle Robert, & Laurent Drissen.* 401, 596, 230-A6 (1992)

Absorption-Line Profiles in a Companion Spectrum of a Mass-losing Cool Supergiant. *Liliya L. Rodrigues & Erika Böhm-Vitense.* 401, 695, 231-B10 (1992)

Evidence for a Bipolar Nebula around the Peculiar B[e] Star HD 45677 from Ultraviolet Spectropolarimetry. *R. E. Schulte-Ladbeck, D. S. Shepherd, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, M. Taylor, & B. A. Whitney.* 401, L105, 233-D12 (1992)

Oxygen-rich Semiregular and Irregular Variables. *M. Jura & S. G. Kleinmann.* 83, 329, 62-D5 (1992)

Particle Acceleration and Nonthermal Radio Emission in Binaries of Early-Type Stars. *D. Eichler & V. Usov.* 402, 271, 4-D11 (1993)

CCD Observations of the Hα Line in Late G and K Supergiants and Their Interpretation. *Sushma V. Mallik.* 402, 303, 4-G10 (1993)

Mass Loss from Pre–Main-Sequence Accretion Disks. I. The Accelerating Wind of FU Orionis. *Nuria Calvet, Lee Hartmann, & Scott J. Kenyon.* 402, 623, 10-D1 (1993)

An X-Ray Excited Wind in Centaurus X-3. *C. S. R. Day & Ian R. Stevens.* 403, 322, 17-G9 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. III. Transition Region, Corona, and Stellar Wind. *D. Dravins, P. Linde, T. R. Ayres, J. L. Linsky, B. Monsignori-Fossi, T. Simon, & F. Wallinder.* 403, 412, 18-G13 (1993)

Model Atmospheres: Tool for Identifying Interstellar Features. *P. C. Frisch, S. E. Slojkowski, T. Rodriguez-Bell, & D. York.* 84, 55, 1-G3 (1993)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. IV. ι Orionis. *Douglas R. Gies, Michael S. Wiggs, & William G. Bagnuolo, Jr.* 403, 752, 25-B4 (1993)

Colliding Wind Binary Systems: Monte Carlo Simulations of Line-Profile Variability. *Ian R. Stevens.* 404, 281, 31-D3 (1993)

Astrophysical Gasdynamics Confronts Reality: The Shaping of Planetary Nebuale. *Adam Frank, Bruce Balick, Vincent Icke, & Garrelt Mellema.* 404, L25, 33-F7 (1993)

Formation of Double-peaked Lines in Stochastic Winds of T Tauri Stars. *A. S. Mitskevich, A. Natta, & V. P. Grinin.* 404, 751, 38-C7 (1993)

Particle Transport and the λ Bootis Phenomenon. I. The Diffusion/Mass-Loss Model Revisited. *P. Charbonneau.* 405, 720, 52-A9 (1993)

Multiline Transfer and the Dynamics of Wolf-Rayet Winds. *L. B. Lucy & D. C. Abbott.* 405, 738, 52-C5 (1993)

The IRC +10216 Circumstellar Envelope. III. Infrared Molecular Line Profiles. *J. J. Keady & S. T. Ridgway.* 406, 199, 57-E5 (1993)

Some Implications of PSR 1259−63. *Christopher S. Kochanek.* 406, 638, 65-G1 (1993)

G-Star Astropauses: A Test for Interstellar Pressure. *P. C. Frisch.* 407, 198, 71-E1 (1993)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. III. 29 UW Canis Majoris. *Michael S. Wiggs & Douglas R. Gies.* 407, 252, 72-B11 (1993)

The Abundance Distribution of C_4H in IRC +10216. *Aditya Dayal & John H. Bieging.* 407, L37, 75-E1 (1993)

Mass Loss in Globular Cluster Red Giants: An Evolutionary Investigation. *M. Castellani & V. Castellani.* 407, 649, 78-F1 (1993)

Nova Dust Nucleation: Kinetics and Photodissociation. *D. J. Johnson, M. W. Friedlander, & J. I. Katz.* 407, 714, 79-D4 (1993)

The Asymmetric Wind of R127. *R. E. Schulte-Ladbeck, C. Leitherer, G. C. Clayton, C. Robert, M. R. Meade, L. Drissen, A. Nota, & W. Schmutz.* 407, 723, 79-E1 (1993)

Winds from Accretion Disks: Ultraviolet Line Formation in Cataclysmic Variables. *Isaac Shlosman & Peter Vitello.* 409, 372, 101-F1 (1993)

Equatorial Disk Formation around Rotating Stars Due to Ram Pressure Confinement by the Stellar Wind. *J. E. Bjorkman & J. P. Cassinelli.* 409, 429, 102-C10 (1993)

The Formation and Evolution of Shocks in Stellar Jets from a Variable Wind. *Patrick Hartigan & John Raymond.* 409, 705, 107-G5 (1993)

Radio and X-Ray Observations of OH 231.8+4.2. *Gregory B. Taylor & Mark Morris.* 409, 720, 108-A9 (1993)

Circumstellar Shells Resolved in *IRAS* Survey Data. II. Analysis. *K. Young, T. G. Phillips, & G. R. Knapp.* 409, 725, 108-B3 (1993)

The Origin of Forbidden Line Emission from Young Stellar Objects. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 409, 748, 108-D3 (1993)

The Structure of Protostellar Accretion Disks and the Origin of Bipolar Flows. *Mark Wardle & Arieh Königl.* 410, 218, 114-G6 (1993)

Hydrodynamics of Winds from Irradiated Companion Stars in Low-Mass X-Ray Binaries. *Marco Tavani & Richard London.* 410, 281, 115-E8 (1993)

Coronographic Imaging of the Bipolar Nebula around the Luminous Blue Variable R127. *Mark Clampin, Antonella Nota, David A. Golimowski, Claus Leitherer, & Samuel T. Durrance.* 410, L35, 118-C5 (1993)

Three-dimensional Simulations of Protostellar Jets. *Elisabete M. de Gouveia Dal Pino & Willy Benz.* 410, 686, 122-B13 (1993)

The Dynamics of Stellar Outflows Dominated by Interaction of Dust and Radiation. *Nathan Netzer & Moshe Elitzur.* 410, 701, 122-D11 (1993)

Wind-driven Angular Momentum Loss in Binary Systems. I. Ballistic Case. *Leigh Brookshaw & Marco Tavani.* 410, 719, 122-F6 (1993)

Mass Loss from Wolf-Rayet Stars Due to Radiation Pressure and Alfvén Waves. *L. C. dos Santos, V. Jatenco-Pereira, & R. Opher.* 410, 732, 122-G11 (1993)

Hubble Space Telescope Spectra of the Phase-modulated Wind in the SMC O+WR Binary R31. *J. B. Hutchings, L. Bianchi, & S. C. Morris.* 410, 803, 123-F10 (1993)

Detection of O I and Si II Far-Infrared Fine-Structure Emission from α Orionis. *Michael R. Haas & Alfred E. Glassgold.* 410, L111, 126-C9 (1993)

Circumstellar Shells Resolved in the *IRAS* Survey Data. I. Data Processing Procedure, Results, and Confidence Tests. *K. Young, T. G. Phillips, & G. R. Knapp.* 86, 517, 21-B11 (1993)

Magnetohydrodynamic Flows in Be Stars: Variable Energy Flux and Heat Input Distribution. *María Elena Iglesias & Adela E. Ringuelet.* 411, 342, 131-E3 (1993)

The Evolution of Massive Stars Including Mass Loss: Presupernova Models and Explosion. *S. E. Woosley, Norbert Langer, & Thomas A. Weaver.* 411, 823, 140-A14 (1993)

Goddard High-Resolution Spectrograph Observations of Narrow Discrete Stellar Wind Absorption Features in the Ultraviolet Spectrum of the O7.5 III Star ξ Persei. *Steven N. Shore, Bruce Altner, C. T. Bolton, Jason A. Cardelli, & Dennis C. Ebbets.* 411, 864, 140-E5 (1993)

Rigorous Treatment of the Radiative Transfer Problem in Stellar Winds: Significance of the Velocity Law and the Chromosphere in the Hα Profile. *Lydia S. Cidale & Adela E. Ringuelet.* 411, 874, 140-F5 (1993)

The Ultraviolet Radiation in Metal-rich Elliptical Galaxies. *Uffe Gråe Jørgensen & Peter Thejll.* 411, L67, 142-C5 (1993)

A Study of Circumstellar Envelopes around Bright Carbon Stars. I. Structure, Kinematics, and Mass-Loss Rate. *H. Olofsson, K. Eriksson, B. Gustafsson, & U. Carlström.* 87, 267, 30-E1 (1993)

Collisions and Close Encounters between Massive Main-Sequence Stars. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 412, 593, 151-B7 (1993)

The Temperature Profile of T Tauri Disks. *Antonella Natta.* 412, 761, 153-C6 (1993)

What are the Mass-Loss Rates of O Stars? *Henny J. G. L. M. Lamers & Claus Leitherer.* 412, 771, 153-D5 (1993)

Broad-Band X-Ray Telescope Spectroscopy of ζ Puppis. *M. F. Corcoran, J. H. Swank, P. J. Serlemitsos, E. Boldt, R. Petre, F. E. Marshall, K. Jahoda, R. Mushotzky, A. Szymkowiak, K. Arnaud, A. P. Smale, K. Weaver, & S. S. Holt.* 412, 792, 153-F1 (1993)

Submillimeter CO Observations of Warm Gas around T Tauri Stars. *K. F. Schuster, A. I. Harris, Nels Anderson, & A. P. G. Russell.* 412, L67, 155-D7 (1993)

Long-Period Oxygen-rich Optical Miras in the Solar Neighborhood. *M. Jura, A. Yamamoto, & S. G. Kleinmann.* 413, 298, 160-A2 (1993)

Evolution of Low- and Intermediate-Mass Stars to the End of the Asymptotic Giant Branch with Mass Loss. *E. Vassiliadis & P. R. Wood.* 413, 641, 164-D11 (1993)

Properties of Jet-driven Molecular Outflows. *Colin R. Masson & Lawrence M. Chernin.* 414, 230, 172-G10 (1993)

LS II +34°26 is a Low-Mass Post–Asymptotic Giant Branch B Supergiant and Not a Massive Population I B Star Located near the Outer Edge of the Galaxy. *M. Parthasarathy.* 414, L109, 186-A7 (1993)

Winds in Central Stars of Planetary Nebulae. *A. Modigliani, P. Patriarchi, & M. Perinotto.* 415, 258, 188-B12 (1993)

Ultraviolet Observations of Selective Wind Eclipses in γ Velorum and Evidence for Colliding Winds. *N. St-Louis, A. J. Willis, & I. R. Stevens.* 415, 298, 188-F8 (1993)

The "Type IIb" Supernova 1993J in M81: A Close Relative of Type Ib Supernovae. *Alexei V. Filippenko, Thomas Matheson, & Luis C. Ho.* 415, L103, 200-A8 (1993)

On the Origin of the Eclipsing Pulsar PSR B1718−19 and Its Wind. *R. A. M. J. Wijers & B. Paczyński.* 415, L115, 200-C1 (1993)

Atomic Carbon in the Envelope of IRC +10216. *Jocelyn Keene, K. Young, T. G. Phillips, Thomas H. Büttgenbach, & John E. Carlstrom.* 415, L131, 200-E1 (1993)

Stellar Mass Loss in Elliptical Galaxies and the Fueling of Active Galactic Nuclei. *Paolo Padovani & Francesca Matteucci.* 416, 26, 201-D2 (1993)

The Asymmetric Envelope of γ Cassiopeiae Observed with the Mk III Optical Interferometer. *A. Quirrenbach, C. A. Hummel, D. F. Buscher, J. T. Armstrong, D. Mozurkewich, & N. M. Elias II.* 416, L25, 207-D7 (1993)

Time-Series Observations of O Stars. III. *IUE* and *HST* Spectroscopy of ζ Ophiuchi and Implications for the "Photospheric Connection." *Ian D. Howarth, C. T. Bolton, R. A. Crowe, D. C. Ebbets, M. S. Fieldus, A. W. Fullerton, D. R. Gies, D. McDavid, R. K. Prinja, A. H. N. Reid, S. N. Shore, & K. C. Smith.* 417, 338, 221-F10 (1993)

Effects of Convection on Pressure Wave Excitation in Common Envelopes. *Noam Soker.* 417, 347, 221-G8 (1993)

Baryon Purity in Cosmological Gamma-Ray Bursts as a Manifestation of Event Horizons. *Amir Levinson & David Eichler.* 418, 386, 235-G1 (1993)

The Extreme Ultraviolet Spectrum of Alpha Aurigae (Capella). *A. K. Dupree, N. S. Brickhouse, G. A. Doschek, J. C. Green, & J. C. Raymond.* 418, L41, 238-E10 (1993)

Three-dimensional Propagation of Transverse Magnetohydrodynamic Perturbations in Relativistic Winds. *Yu-Qing Lou.* 418, 709, 241-C12 (1993)

Synthetic UV Lines of Si IV, C IV, and He II from a Population of Massive Stars in Starburst Galaxies. *Carmelle Robert, Claus Leitherer, & Timothy M. Heckman.* 418, 749, 241-G7 (1993)

Forbidden Line Formation in Hydromagnetic Disk Winds. I. Oblique Shocks. *Rachid Ouyed & Ralph E. Pudritz.* 419, 255, 249-C13 (1993)

On the Formation of O-Ne White Dwarfs in Metal-rich Close Binary Systems. *Inma Dominguez, Amedeo Tornambè, & Jordi Isern.* 419, 268, 249-E1 (1993)

A Well-shaped Bipolar Outflow Shell in Monoceros R2. *Taoling Xie, Paul F. Goldsmith, & Nimesh Patel.* 419, L33, 252-E7 (1993)

Circumstellar CO Emission of Evolved Stars and Mass Loss. *John Kwan & Zoe Webster.* 419, 674, 256-B3 (1993)

Effects of Coronal and Shock-produced X-Rays on the Ionization Distribution in Hot Star Winds. *J. J. MacFarlane, W. L. Waldron, M. F. Corcoran, M. J. Wolff, P. Wang, & J. P. Cassinelli.* 419, 813, 257-F11 (1993)

A Far-Ultraviolet Flare on a Pleiades G Dwarf. *T. R. Ayres, J. R. Stauffer, Theodore Simon, R. A. Stern, S. K. Antiochos, G. S. Basri, J. A. Bookbinder, A. Brown, G. A. Doschek, J. L. Linsky, L. W. Ramsey, & F. M. Walter.* 420, L33, 7-E4 (1994)

Magnetic Shaping of Planetary Nebulae and Other Stellar Wind Bubbles. *Roger A. Chevalier & Ding Luo.* 421, 225, 18-G1 (1994)

Clumping and Mass Loss in Hot Star Winds. *Anthony F. J. Moffat & Carmelle Robert.* 421, 310, 19-G1 (1994)

Mapping the Radio Emission from Massive Young Stellar Objects. *Melvin G. Hoare, Janet E. Drew, Tom B. Muxlow, & Richard J. Davis.* 421, L51, 22-B7 (1994)

Spectroscopy of Chromospheric Lines of Giants in the Globular Cluster NGC 6752. *A. K. Dupree, Lee Hartmann, Graeme H. Smith, A. W. Rodgers, W. H. Roberts, & D. B. Zucker.* 421, 542, 24-G9 (1994)

An Observational Estimate of the Probability of Encounters between Mass-losing Evolved Stars and Molecular Clouds. *Joel H. Kastner & P. C. Myers.* 421, 605, 25-G3 (1994)

X-Ray Emission from Near–Main-Sequence B Stars. *J. P. Cassinelli, D. H. Cohen, J. J. MacFarlane, W. T. Sanders, & B. Y. Welsh.* 421, 705, 27-A8 (1994)

Properties of a B0 I Stellar Wind and Interstellar Grains Derived from *Ginga* Observations of the Binary X-Ray Pulsar 4U 1538−52. *George W. Clark, Jonathan W. Woo, & Fumiaki Nagase.* 422, 336, 34-C3 (1994)

Double-Core Evolution. V. Three-dimensional Effects in the Merger of a Red Giant with a Dwarf Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 422, 729, 40-G13 (1994)

A Millimeter-Wavelength Survey of S Stars for Mass Loss and Chemistry. *John H. Bieging & William B. Latter.* 422, 765, 41-D1 (1994)

Near-Infrared Observations of the HH 46/47 System. *Jochen Eislöffel, Chris J. Davis, Thomas P. Ray, & Reinhard Mundt.* 422, L91, 45-C9 (1994)

Mass Loss during the RR Lyrae Phase of the Horizontal Branch: Mass Dispersion on the Horizontal Branch and RR Lyrae Period Changes. *Rebecca A. Koopmann, Young-Wook Lee, Pierre Demarque, & Jamie M. Howard.* 423, 380, 50-G7 (1994)

Evidence Signaling the Start of Enhanced Counterjet Flow in the Symbiotic System R Aquarii. *A. G. Michalitsianos, M. Perez, & M. Kafatos.* 423, 441, 51-E13 (1994)

A Molecular Jet from LkHα 234. *George F. Mitchell & Henry E. Matthews.* 423, L55, 53-G8 (1994)

Velocity, Obscuration, and Age of Ionized Winds: Can They Be Correlated? *S. C. Beck.* 423, 733, 57-F5 (1994)

Forbidden-Line Formation in Hydromagnetic Disk Winds. II. Line Profiles. *Rachid Ouyed & Ralph E. Pudritz.* 423, 753, 58-A3 (1994)

Mid-Infrared Images of the Post–Asymptotic Giant Branch Star HD 161796. *C. J. Skinner, M. M. Meixner, G. W. Hawkins, E. Keto, J. G. Jernigan, & J. F. Arens.* 423, L135, 61-B11 (1994)

Two-dimensional Hydrodynamical Simulations of Wind-compressed Disks around Rapidly Rotating B Stars. *Stanley P. Owocki, Steven R. Cranmer, & John M. Blondin.* 424, 887, 75-G2 (1994)

Neutral Carbon in the Circumstellar Envelope of α Orionis. *P. J. Huggins, R. Bachiller, P. Cox, & T. Forveille.* 424, L127, 79-E5 (1994)

A Large, Periodic Variation in the Stellar Wind of θ^1 Orionis C. *Nolan R. Walborn & Joy S. Nichols.* 425, L29, 85-E1 (1994)

O Star Giant Bubbles in M33. *M. S. Oey & Philip Massey.* 425, 635, 89-E1 (1994)

Momentum Transfer by Astrophysical Jets. *Lawrence Chernin, Colin Masson, Elisabete M. de Gouveia Dal Pino, & Willy Benz.* 426, 204, 98-F2 (1994)

Asymptotic Domination of Cold Relativistic MHD Winds by Kinetic Energy Flux. *Mitchell C. Begelman & Zhi-Yun Li.* 426, 269, 99-D9 (1994)

Low-Velocity Variability in the Stellar Wind of HD 152408 (O8: Iafpe). *Raman K. Prinja & A. W. Fullerton.* 426, 345, 100-D12 (1994)

Narrowband *HST* Imagery of the Young Planetary Nebula Henize 1357. *M. Bobrowsky.* 426, L47, 103-F5 (1994)

Evolution of Solitary Density Waves in Stellar Winds of Early-Type Stars: A Simple Explanation of Discrete Absorption Component Behavior. *Wayne L. Waldron, Larry Klein, & Bruce Altner.* 426, 725, 107-D10 (1994)

Near-Infrared Imaging of HH 1/2 in Shocked Molecular Hydrogen and [Fe II]. *Chris J. Davis, Jochen Eislöffel, & Thomas P. Ray.* 426, L93, 109-F5 (1994)

Detection of Sodium Cyanide (NaCN) in IRC 10216. *B. E. Turner, T. C. Steimle, & Leo Meerts.* 426, L97, 109-F13 (1994)

Three-dimensional Structure of the Circumstellar Envelope of CRL 618 based on the ^{13}CO J = 1–0 Mapping Observations. *Issei Yamamura, Katsunori M. Shibata, Takashi Kasuga, & Shuji Deguchi.* 427, 406, 114-G13 (1994)

The Role of Radiative Acceleration in Outflows from Broad Absorption Line QSOs. I. Comparison with O Star Winds. *Nahum Arav & Zhi-Yun Li.* 427, 700, 121-D7 (1994)

Detection of X-Ray Emission from the PSR 1259−63/SS 2883 Binary System. *Lynn Cominsky, Mallory Roberts, & Simon Johnston.* 427, 978, 124-G2 (1994)

Multiple Outflows in the Bipolar Planetary Nebula M1-16: A Molecular Line Study. *Raghvendra Sahai, Alwyn Wootten, Hugo E. Schwarz, & W. Wild.* 428, 237, 131-B5 (1994)

Geometry and Physical Conditions in the Stellar Wind of AG Carinae. *Claus Leitherer, Richard Allen, Bruce Altner, Augusto Damineli, Laurent Drissen, Thais Idiart, Olivia Lupie, Antonella Nota, Carmelle Robert, Werner Schmutz, & Steven N. Shore.* 428, 292, 131-G4 (1994)

Rotation in the Ionized Envelope of MWC 349A. *Luis F. Rodríguez & Timothy S. Bastian.* 428, 324, 132-B12 (1994)

A Thermal Pulse in Progress in the Nucleus of the Large Magellanic Cloud Planetary Nebula N66. *M. Peña, S. Torres-Peimbert, M. Peimbert, M. T. Ruiz, & J. Maza.* 428, L9, 134-B13 (1994)

Photoevaporation of Disks around Massive Stars and Application to Ultracompact H II Regions. *David Hollenbach, Doug Johnstone, Susana Lizano, & Frank Shu.* 428, 654, 138-D10 (1994)

Magnetically Driven Jets and Winds: Exact Solutions. *J. Contopoulos & R. V. E. Lovelace.* 429, 139, 145-G7 (1994)

Detection of Radio Continuum Emission from Circumstellar Dust around CRL 2688 and IRC +10216. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 429, L33, 150-E1 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. I. A Generalized Model. *Frank Shu, Joan Najita, Eve Ostriker, Frank Wilkin, Steven Ruden, & Susana Lizano.* 429, 781, 155-D5 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. II. Formulation of the Dynamical Problem. *Frank H. Shu, Joan Najita, Steven P. Ruden, & Susana Lizano.* 429, 797, 155-E9 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. III. Numerical Solution of the Sub-Alfvénic Region. *Joan R. Najita & Frank H. Shu.* 429, 808, 155-F9 (1994)

The Axisymmetric Stellar Wind of AG Carinae. *Regina E. Schulte-Ladbeck, Geoffrey C. Clayton, D. John Hillier, Tim J. Harries, & Ian D. Howarth.* 429, 846, 156-B13 (1994)

Stellar Winds with Non-WKB Alfvén Waves. I. Wind Models for Solar Coronal Conditions. *K. B. MacGregor & P. Charbonneau.* 430, 387, 164-A9 (1994)

The Radiation Gasdynamics of Planetary Nebulae. IV. From the Owl to the Eskimo. *Adam Frank & Garrelt Mellema.* 430, 800, 171-G5 (1994)

Gravitational Damping of Alfvén Waves in Stellar Atmospheres and Winds. *I. K. Khabibrakhmanov & D. J. Mullan.* 430, 814, 172-A7 (1994)

Observations of the Acceleration Regions of OH/IR Stars. *John D. Fix & Mark G. Mulhern.* 430, 824, 172-B5 (1994)

Magnetic Structure of Pulsar Winds. *F. Curtis Michel.* 431, 397, 181-A6 (1994)

From Supersonic Winds to Accretion: Comments on the Stability of Stellar Winds and Related Flows. *M. Velli.* 432, L55, 199-G13 (1994)

Magnetically Driven Relativistic Jets and Winds: Exact Solutions. *J. Contopoulos.* 432, 508, 202-C7 (1994)

SN 1993J: The Early Radio Emission and Evidence for a Changing Presupernova Mass-Loss Rate. *Schuyler D. Van Dyk, Kurt W. Weiler, Richard A. Sramek, Michael P. Rupen, & Nino Panagia.* 432, L115, 207-A9 (1994)

Winds from Neutron Stars and Strong Type I X-Ray Bursts. *Luciano Nobili, Roberto Turolla, & Iosif Lapidus.* 433, 276, 211-F11 (1994)

Ultraviolet Spectral Classification and Stellar Winds in a Sample of Be and Standard Stars. *Arne Slettebak.* 94, 163, 54-A5 (1994)

FY Aquilae and the Gamma-Ray Burst GB 790331. *Mike Irwin & Anna N. Żytkow.* 433, L81, 224-A1 (1994)

Acceleration Efficiency in Line-driven Flows. *Kenneth G. Gayley & Stanley P. Owocki.* 434, 684, 237-B12 (1994)

The Particle-Size Distribution in the Dust Ejected from IRC +10216. *M. Jura.* 434, 713, 237-E12 (1994)

Evidence for a Disk in the Wind of HD 93521: UV Line Profiles from an Axisymmetric Model. *J. E. Bjorkman, R. Ignace, T. M. Tripp, & J. P. Cassinelli.* 435, 416, 249-B12 (1994)

GHRS Spectroscopy of Individual Stars in R136a. *Sara R. Heap, Dennis Ebbets, Eliot M. Malumuth, Stephen P. Maran, Alex de Koter, & Ivan Hubeny.* 435, L39, 252-A11 (1994)

Theoretical Modeling of GHRS Observations of the Of/WN-Type Star R136a5. *Alex de Koter, Ivan Hubeny, Sara R. Heap, & Thierry Lanz.* 435, L71, 252-F9 (1994)

The Dust in the Hydrogen-poor Ejecta of Abell 30. *Kazimierz J. Borkowski, J. Patrick Harrington, William P. Blair, & Jesse D. Bregman.* 435, 722, 256-A6 (1994)

The Shadow Wind in High-Mass X-Ray Binaries. *John M. Blondin.* 435, 756, 256-D13 (1994)

Molecular Rotational Line Profiles from Oxygen-rich Red Giant Winds. *K. Justtanont, C. J. Skinner, & A. G. G. M. Tielens.* 435, 852, 257-G6 (1994)

Mass-Loss Rates, Ionization Fractions, Shock Velocities, and Magnetic Fields of Stellar Jets. *Patrick Hartigan, Jon A. Morse, & John Raymond.* 436, 125, 263-A6 (1994)

[Fe II] 1.53 and 1.64 Micron Emission from Pre–Main-Sequence Stars. *Fred Hamann, Michal Simon, John S. Carr, & Lisa Prato.* 436, 292, 265-C10 (1994)

Line Profile Variations from Atmospheric Eclipses: Constraints on the Wind Structure in Wolf-Rayet Stars. *L. H. Auer & G. Koenigsberger.* 436, 859, 277-E5 (1994)

A Molecular Outflow Driven by an Optical Jet. *George F. Mitchell, Tatsuhiko I. Hasegawa, William R. F. Dent, & Henry E. Matthews.* 436, L177, 282-A11 (1994)

X-Ray–induced Ionization in the Winds of Near–Main-Sequence O and B Stars. *J. J. MacFarlane, D. H. Cohen, & P. Wang.* 437, 351, 288-A11 (1994)

Properties and Variability of the Stellar Wind from P Cygni. *S. Scuderi, G. Bonanno, D. Spadaro, N. Panagia, H. J. G. L. M. Lamers, & A. de Koter.* 437, 465, 289-E1 (1994)

Near-Infrared Imaging of the Jets and Flows Associated with Herbig-Haro Objects HH 91, HH 110, and HH 111. *Christopher J. Davis, Reinhard Mundt, & Jochen Eislöffel.* 437, L55, 292-B1 (1994)

Optically Thick Winds in Nova Outbursts. *Mariko Kato & Izumi Hachisu.* 437, 802, 296-F1 (1994)

HD 93521, ζ Ophiuchi, and the Effects of Rapid Rotation on the Atmospheres and Winds of O9.5 V Stars. *Derck Massa.* 438, 376, 6-F1 (1995)

The Circumstellar Envelope of SN 1987A. I. The Shape of the Double-lobed Nebula and Its Rings and the Distance to the Large Magellanic Cloud. *Arlin P. S. Crotts, William E. Kunkel, & Stephen R. Heathcote.* 438, 724, 14-B11 (1995)

EUVE Spectroscopy of ϵ Canis Majoris (B2 II) from 70 to 730 Å. *J. P. Cassinelli, D. H. Cohen, J. J. MacFarlane, J. E. Drew, A. E. Lynas-Gray, M. G. Hoare, J. V. Vallerga, B. Y. Welsh, P. W. Vedder, I. Hubeny, & T. Lanz.* 438, 932, 17-A8 (1995)

On the Wind-powered Nebula NGC 2359 and the WN Star HD 56925. *Yang Chen, Zhen-ru Wang, & Qin-yue Qu.* 438, 950, 17-C1 (1995)

Lithium in Halo Dwarfs: The Undoing of Diffusion by Mass Loss. *Fritz J. Swenson.* 438, L87, 19-G8 (1995)

Near-Infrared Spectra of Compact Stellar Wind Sources at the Galactic Center. *S. Libonate, J. L. Pipher, W. J. Forrest, & M. L. N. Ashby.* 439, 202, 24-A10 (1995)

Consequential Angular Momentum Loss and the Period Gap of Cataclysmic Variables. *A. R. King & U. Kolb.* 439, 330, 25-F7 (1995)

RY Scuti: Infrared and Radio Observations of the Mass-Loss Wind of a Massive Binary Star System. *R. D. Gehrz, T. L. Hayward, J. R. Houck, J. W. Miles, R. M. Hjellming, T. J. Jones, Charles E. Woodward, Ricarda Prentice, W. J. Forrest, S. Libonate, & S. Solomon.* 439, 417, 26-G11 (1995)

Stellar-Wind Variability in *IUE* Spectra of 68 Cygni. *Ian D. Howarth & Keith C. Smith.* 439, 431, 27-B3 (1995)

^{13}CO Interferometric Observations of the Central Core of CRL 2688. *Issei Yamamura, Takashi Onaka, Fumio Kamijo, Shuji Deguchi, & Nobuharu Ukita.* 439, L13, 29-G4 (1995)

Relativistic, Hot Stellar Winds with Anisotropic Pressure. *Elgouja G. Tsikarishvili, Andria D. Rogava, & David G. Tsiklauri.* 439, 822, 36-A1 (1995)

High-Mass X-Ray Binary Populations. I. Galactic Modeling. *William W. Dalton & Craig L. Sarazin.* 440, 280, 45-A11 (1995)

The Effect of Oblateness and Gravity Darkening on the Radiation Driving in Winds from Rapidly Rotating B Stars. *Steven R. Cranmer & Stanley P. Owocki.* 440, 308, 45-D6 (1995)

Hot Spots in the NGC 2071 Molecular Outflow. *Lawrence M. Chernin & W. J. Welch.* 440, L21, 48-D8 (1995)

Water Masers in the L1448C Outflow. *Lawrence M. Chernin.* 440, L97, 58-C9 (1995)

Time-dependent Behavior and Physical Conditions of the LMC Planetary Nebula N66. *M. Peña, M. Peimbert, S. Torres-Peimbert, M. T. Ruiz, & J. Maza.* 441, 343, 64-B1 (1995)

X-Ray Emission from the PSR B1259−63 System near Apastron. *J. Greiner, M. Tavani, & T. Belloni.* 441, L43, 67-B9 (1995)

A Comparison of Near-Infrared Spectra of the Galactic Center Compact He I Emission-Line Sources and Early-Type Mass-losing Stars. *R. D. Blum, D. L. DePoy, & K. Sellgren.* 441, 603, 70-D7 (1995)

The Homunculus of η Carinae: An Interacting Stellar Winds Paradigm. *Adam Frank, Bruce Balick, & Kris Davidson.* 441, L77, 76-B2 (1995)

Momentum Deposition in Wolf-Rayet Winds: Nonisotropic Diffusion with Effectively Gray Opacity. *Kenneth G. Gayley, Stanley P. Owocki, & Steven R. Cranmer.* 442, 296, 81-C2 (1995)

On the Origin of "Dividing Lines" for Late-Type Giants and Supergiants. *R. Rosner, Z. E. Musielak, F. Cattaneo, R. L. Moore, & S. T. Suess.* 442, L25, 84-G11 (1995)

The Threshold for Stellar Winds in Hot Main-Sequence Stars. *James A. Grigsby & Nancy D. Morrison.* 442, 794, 91-B7 (1995)

Generation of Mass Loss in K Giants: The Failure of Global Oscillation Modes and Possible Implications. *G. Sutmann & M. Cuntz.* 442, L61, 94-E7 (1995)

Powerful Jets and Weak Outflows: HH 1–2 and HH 34. *Lawrence M. Chernin & Colin R. Masson.* 443, 181, 97-E11 (1995)

Outer Layers of a Carbon Star: The View from the *Hubble Space Telescope*. *Hollis R. Johnson, Lisa M. Ensman, David R. Alexander, Eugene H. Avrett, Alexander Brown, Kenneth G. Carpenter, Kjell Eriksson, Bengt Gustafsson, Uffe G. Jørgensen, Philip D. Judge, Jeffrey L. Linsky, Donald G. Luttermoser, Francois Querci, Monique Querci, Richard D. Robinson, & Robert F. Wing.* 443, 281, 99-B6 (1995)

Distinction of Parallel Outflows in L1448 through H_2 Excitation. *Christopher J. Davis & Michael D. Smith.* 443, L41, 102-G14 (1995)

Magnetohydrodynamic Disk-Wind Connection: Self-similar Solutions. *Zhi-Yun Li.* 444, 848, 128-B11 (1995)

Optically Thick Winds: How Is the Mass Flux Determined? *S. Ami Glasner & F. X. Timmes.* 445, 411, 138-B13 (1995)

Infrared Emission and Dynamics of Outflows in Late-Type Stars. *Željko Ivezić & Moshe Elitzur.* 445, 415, 138-C6 (1995)

A CO(3–2) Survey of Nearby Mira Variables. *K. Young.* 445, 872, 147-C1 (1995)

Wind Dynamics in SMC X-1. I. Hydrodynamic Simulation. *John M. Blondin & Jonathan W. Woo.* 445, 889, 147-D13 (1995)

Wind Dynamics in SMC X-1. II. *Ginga* and *ROSAT* Observations. *Jonathan W. Woo, George W. Clark, John M. Blondin, Timothy R. Kallman, & Fumiaki Nagase.* 445, 896, 147-E10 (1995)

Force-free Self-similar Magnetically Driven Relativistic Jets. *J. Contopoulos.* 446, 67, 154-B9 (1995)

The Uncertainties in the Age of Globular Clusters from Their Helium Abundance and Mass Loss. *Xiangdong Shi.* 446, 637, 165-A1 (1995)

The Disruption of the Dense Disk in CRL 618. *Jesús Martín-Pintado, Ralph A. Gaume, Kenneth J. Johnston, & Rafael Bachiller.* 446, 687, 165-E4 (1995)

Similarity Solution for a Supernova Remnant Evolving in an Inhomogeneous Stellar Wind. *Yang Chen, Ning Liu, & Zhen-ru Wang.* 446, 755, 166-D11 (1995)

Infrared CO Emission from Young Stars: Accretion Disks and Neutral Winds. *C. J. Chandler, J. E. Carlstrom, & N. Z. Scoville.* 446, 793, 167-A7 (1995)

Line-driven Instability Growth Rates in Wolf-Rayet Winds. *Kenneth G. Gayley & Stanely P. Owocki.* 446, 801, 167-B4 (1995)

He 3-1475 and Its Jets. *M. Bobrowsky, A. A. Zijlstra, E. K. Grebel, C. G. Tinney, P. te Lintel Hekkert, G. C. Van de Steene, L. Likkel, & T. R. Bedding.* 446, L89, 171-B3 (1995)

The Origin of the Rings around SN 1987A: An Evaluation of the Interacting-Winds Model. *Crystal L. Martin & David Arnett.* 447, 378, 177-E11 (1995)

Thermal Structure of Mixing Layers in Bipolar Outflows. *Susana Lizano & Carlo Giovanardi.* 447, 742, 186-C1 (1995)

Infrared Emission from Globular Clusters: Limits on Stellar Mass Loss and Interstellar Dust. *G. R. Knapp, J. E. Gunn, & A. J. Connolly.* 448, 195, 194-G4 (1995)

Discrete Mass Loss in a Low-Mass Binary with a Rapidly Spinning Neutron Star. *Alexander Muslimov & Marek J. Sarna.* 448, 289, 196-B12 (1995)

The Presupernova Evolution and Explosion of Helium Stars That Experience Mass Loss. *S. E. Woosley, Norbert Langer, & Thomas A. Weaver.* 448, 315, 196-E7 (1995)

High-Velocity Gas Associated with the Massive, Evolved Star G25.5+0.2. *D. S. Shepherd, E. Churchwell, & W. M. Goss.* 448, 426, 198-A9 (1995)

Atlas of Synthetic Ultraviolet Spectra of Massive Star Populations. *Claus Leitherer, Carmelle Robert, & Timothy M. Heckman.* 99, 173, 36-F1 (1995)

The *IUE* Spectrum of the Planetary Nebula NGC 6751. *Walter A. Feibelman.* 448, 766, 205-C11 (1995)

Nebulae around Luminous Blue Variables: A Unified Picture. *Antonella Nota, Mario Livio, Mark Clampin, & Regina Schulte-Ladbeck.* 448, 788, 205-E11 (1995)

IRAS 08159−3543: Optical Detection of the Dusty, Neutral Bipolar Wind of a Luminous Young Stellar Object. *Th. Neckel & H. J. Staude.* 448, 832, 206-D1 (1995)

A Theory of Winds from Wolf-Rayet Stars. *D. Eichler, A. Bar Shalom, & J. Oreg.* 448, 858, 206-F6 (1995)

Magnetohydrodynamic Stellar Winds: A New Class of Solutions. *Néstor O. Rotstein & Constantino Ferro Fontán.* 449, 745, 223-B1 (1995)

Magnetohydrodynamic Stellar Wind Solutions in Curved Magnetic Fields. *Néstor O. Rotstein & Constantino Ferro Fontán.* 449, 764, 223-C9 (1995)

The First 8–13 Micron Spectra of Asymptotic Giant Branch Stars in the Magellanic Clouds. *M. A. T. Groenewegen et al., C. H. Smith, P. R. Wood, A. Omont, & T. Fujiyoshi.* 449, L119, 227-A8 (1995)

Hubble Space Telescope Imaging of the Wind-blown Lobe NGC 6165. *Paul Scowen, Jeff Hester, Arthur Code, Glen Mackie, C. Roger Lynds, & Earl J. O'Neil, Jr.* 450, 196, 230-F9 (1995)

The Structure and Evolution of an Accretion Flow Interacting with the Central Star. *Masayuki Y. Fujimoto.* 450, 262, 231-E13 (1995)

Radio Continuum Measurements of Southern Early-Type Stars. *Claus Leitherer, Jessica M. Chapman, & Bärbel Koribalski.* 450, 289, 232-A7 (1995)

The Type Ic Supernova 1994I in M51: Detection of Helium and Spectral Evolution. *Alexei V. Filippenko, Aaron J. Barth, Thomas Matheson, Lee Armus, Michael Brown, Brian R. Espey, Xiao-Ming Fan, Robert W. Goodrich, Luis C. Ho, Vesa T. Junkkarinen, David C. Koo, Matthew D. Lehnert, André R. Martel, Joseph M. Mazzarella, Joseph S. Miller, Graeme H. Smith, David Tytler, & Gregory D. Wirth.* 450, L11, 235-E3 (1995)

Discovery of Strong Vibrationally Excited Water Masers at 658 GHz toward Evolved Stars. *Karl M. Menten & Ken Young.* 450, L67, 244-G8 (1995)

Maps of the Molecular Emission around 18 Evolved Stars. *K. Z. Stanek, G. R. Knapp, K. Young, & T. G. Phillips.* 100, 169, 48-C8 (1995)

Stellar Contrails in Quasi-stellar Objects: The Origin of Broad Absorption Lines. *Nick Scoville & Colin Norman.* 451, 510, 254-C10 (1995)

Lithium Abundances in δ Scuti Stars and Their Relationship with the Lithium Dip. *Stephen C. Russell.* 451, 747, 257-D13 (1995)

Discovery of an Extended Nebula around AFGL 2343 (HD 179821) at 10 Microns. *G. W. Hawkins, C. J. Skinner, M. M. Meixner, J. G. Jernigan, J. F. Arens, E. Keto, & J. R. Graham.* 452, 314, 266-D10 (1995)

A Semiempirical Determination of the Wind Velocity Structure for the Hybrid-Chromosphere Star α Trianguli Australis. *Graham M. Harper, Brian E. Wood, Jeffrey L. Linsky, Philip D. Bennett, Thomas R. Ayres, & Alexander Brown.* 452, 407, 267-F6 (1995)

The Presupernova H II Region around SN 1987A. *Roger A. Chevalier & Vikram V. Dwarkadas.* 452, L45, 270-B8 (1995)

The *IUE* MEGA Campaign: Wind Variability and Rotation in Early-Type Stars. *D. Massa, A. W. Fullerton, J. S. Nichols, S. P. Owocki, R. K. Prinja, N. St-Louis, A. J. Willis, B. Altner, C. T. Bolton, J. P. Cassinelli, D. Cohen, R. G. Cooper, A. Feldmeier, K. G. Gayley, T. Harries, S. R. Heap, R. N. Henriksen, I. D. Howarth, I. Hubeny, E. Kambe, L. Kaper, G. Koenigsberger, S. Marchenko, S. R. McCandliss, A. F. J. Moffat, T. Nugis, J. Puls, C. Robert, R. E. Schulte-Ladbeck, L. J. Smith, M. A. Smith, W. L. Waldron, & R. L. White.* 452, L53, 270-C8 (1995)

The *IUE* MEGA Campaign: Wind Structure and Variability of HD 50896 (WN5). *Nicole St-Louis, M. J. Dalton, S. V. Marchenko, A. F. J. Moffat, & A. J. Willis.* 452, L57, 270-D3 (1995)

The *IUE* MEGA Campaign: Modulated Structure in the Wind of HD 64760 (B0.5 Ib). *Raman K. Prinja, Derck Massa, & Alexander W. Fullerton.* 452, L61, 270-D13 (1995)

The *IUE* MEGA Campaign: The Rotationally Modulated Wind of ζ Puppis. *Ian D. Howarth, Raman K. Prinja, & Derck Massa.* 452, L65, 270-E6 (1995)

Hubble Space Telescope Observations of the SN 1987A Triple Ring Nebula. *Christopher J. Burrows, John Krist, J. Jeff Hester, Raghvendra Sahai, John T. Trauger, Karl R. Stapelfeldt, John S. Gallagher III, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, Richard E. Griffiths, John G. Hoessel, Jon A. Holtzman, Jeremy R. Mould, Paul A. Scowen, Alan M. Watson, & James A. Westphal.* 452, 680, 274-A11 (1995)

Disk Accretion and Mass Loss from Young Stars. *Patrick Hartigan, Suzan Edwards, & Louma Ghandour.* 452, 736, 274-G4 (1995)

Wind Variability of B Supergiants. I. The Rapid Rotator HD 64760 (B0.5 Ib). *Derck Massa, Raman K. Prinja, & Alexander W. Fullerton.* 452, 842, 276-C7 (1995)

A Study of the Spectra of Seven Of Stars. I. Radial Velocities. *Anne B. Underhill.* 100, 433, 52-A10 (1995)

Can Dust Formation in Evolved Stars Be Suppressed near Active Galactic Nuclei? *T. W. Hartquist, R. H. Durisen, J. E. Dyson, J. M. C. Rawlings, D. A. Williams, & R. J. R. Williams.* 453, 77, 282-C3 (1995)

The Solution Topology of Radiation-driven Winds. I. The X-Type Nature of the CAK Critical Point. *J. E. Bjorkman.* 453, 369, 286-B13 (1995)

Periodic Variations in Ultraviolet Spectral Lines of the B0.5 Ib Star HD 64760: Evidence for Corotating Wind Streams Rooted in Surface Variations. *Stanley P. Owocki, Steven R. Cranmer, & Alexander W. Fullerton.* 453, L37, 289-G1 (1995)

Bipolar Jets from Extremely Young Stars Observed in Molecular Hydrogen Emission. *Klaus-Werner Hodapp & E. F. Ladd.* 453, 715, 293-E13 (1995)

Far-Infrared Water Line Emissions from Circumstellar Outflows. *Wesley Chen & David A. Neufeld.* 453, L99, 298-F11 (1995)

Disk Winds from T Tauri Stars. *John Kwan & Eugene Tademaru.* 454, 382, 304-E5 (1995)

Are Wolf-Rayet Stellar Winds Driven by Radiation Forces? *Shlomi Pistinner & David Eichler.* 454, 404, 304-F8 (1995)

An Improved Line-Strength Parameterization in Hot-Star Winds. *Kenneth G. Gayley.* 454, 410, 305-A4 (1995)

A Reconnaissance of the 900–1200 Å Spectra of Early O Stars in the Magellanic Clouds. *Nolan R. Walborn, Knox S. Long, Daniel J. Lennon, & Rolf-Peter Kudritzki.* 454, L27, 307-F9 (1995)

Stellar Winds with Non-WKB Alfvén Waves. II. Wind Models for Cool, Evolved Stars. *P. Charbonneau & K. B. MacGregor.* 454, 901, 314-C3 (1995)

The Structure of Wolf-Rayet Winds. I. Observation of Ionization Stratification in WR 6 and WR 111. *Regina E. Schulte-Ladbeck, Philippe R. J. Eenens, & Kevin Davis.* 454, 917, 314-D11 (1995)

Wolf-Rayet Bubbles. I. Analytic Solutions. *Guillermo García-Segura & Mordecai-Mark Mac Low.* 455, 145, 320-B13 (1995)

Wolf-Rayet Bubbles. II. Gasdynamical Situations. *Guillermo García-Segura & Mordecai-Mark Mac Low.* 455, 160, 320-D3 (1995)

Momentum Distribution in Molecular Outflows. *Lawrence M. Chernin & Colin R. Masson.* 455, 182, 320-F3 (1995)

Terminal Velocities and the Bistability of Stellar Winds. *Henny J. G. L. M. Lamers, Theodore P. Snow, & Douglas M. Lindholm.* 455, 269, 321-G7 (1995)

Asymmetrical Mass Loss from Rotating Red Giant Variables. *S. M. Asida & Y. Tuchman.* 455, 286, 322-B2 (1995)

Radio-Frequency Continuum Emission from Evolved Stars. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 455, 293, 322-B12 (1995)

Stellar Abundances and Winds of A-Type Supergiant Stars in M33: First Results from the Keck HIRES Spectrograph. *James K. McCarthy, Daniel J. Lennon, Kim A. Venn, Rolf-Peter Kudritzki, Joachim Puls, & Francisco Najarro.* 455, L135, 333-G11 (1995)

Magnetocentrifugally Driven Flows from Young Stars and Disks. V. Asymptotic Collimation into Jets. *Frank H. Shu, Joan Najita, Eve C. Ostriker, & Hsien Shang.* 455, L155, 334-C6 (1995)

Genetic Algorithms in Astronomy and Astrophysics. *P. Charbonneau.* 101, 309, 58-B5 (1995)

STARS: MASSIVE

s-Process Nucleosynthesis in Massive Stars and the Weak Component. I. Evolution and Neutron Captures in a 25 $M_\odot$ Star. *C. M. Raiteri, M. Busso, R. Gallino, G. Picchio, & L. Pulone.* 367, 228, 14-G13 (1991)

Wolf-Rayet Stars as Starting Points or as Endpoints of the Evolution of Massive Stars? *H. J. G. L. M. Lamers, A. Maeder, W. Schmutz, & J. P. Cassinelli.* 368, 538, 31-F12 (1991)

The Proper Motion of the Soft X-Ray–emitting Radio Pulsar PSR 0656+14. *R. J. Thompson, Jr., F. A. Córdova, R. M. Hjellming, & E. B. Fomalont.* 366, L83, 11-E1 (1991)

Application of a General Relativistic Accretion Disk Model to LMC X-1, LMC X-3, X1608−522, and X1636−536. *Ken Ebisawa, Kazuhisa Mitsuda, & Tomoyuki Hanawa.* 367, 213, 14-F8 (1991)

Optical and Radio Observations of the Binary Pulsar 1855+09: Evolution of Pulsar Magnetic Fields and Low-Mass White Dwarf Cooling. *S. R. Kulkarni, S. Djorgovski, & A. R. Klemola.* 367, 221, 14-G4 (1991)

Conditions for Accretion-induced Collapse of White Dwarfs. *Ken'ichi Nomoto & Yoji Kondo.* 367, L19, 17-D1 (1991)

Accretion Powered Pulsars: Continuum Spectra and Light Curves of Settling Accretion Mounds. *David J. Burnard, Jonathan Arons, & Richard I. Klein.* 367, 575, 20-D10 (1991)

Formulae for the Cyclotron Luminosity of Magnetized Plasma Slabs. *G. Chanmugam & Steven H. Langer.* 368, 580, 32-C11 (1991)

Neutron Star Thermal Evolution. *Kenneth A. Van Riper.* 75, 449, 6-G7 (1991)

The Appearance of Highly Relativistic, Spherically Symmetric Stellar Winds. *Marek A. Abramowicz, Igor D. Novikov, & Bohdan Paczyński.* 369, 175, 38-B5 (1991)

Explosion of a Rotating Neutron Star near the Minimum Mass. *Monica Colpi, Stuart L. Shapiro, & Saul A. Teukolsky.* 369, 422, 43-A5 (1991)

Near-critical Spherical Accretion by Neutron Stars: General Relativistic Treatment. *Myeong-Gu Park & Guy S. Miller.* 371, 708, 70-D1 (1991)

High-Precision Timing of Millisecond Pulsars. I. Astrometry and Masses of the PSR 1855+09 System. *M. F. Ryba & J. H. Taylor.* 371, 739, 70-F9 (1991)

Numerical Solution of the General Relativistic Boltzmann Equation for Massive and Massless Particles. *Hugh Harleston & Katherine A. Holcomb.* 372, 225, 76-F13 (1991)

White Dwarf and Neutron Star Interior Solutions in the Nonsymmetric Gravitational Theory. *L. M. Campbell, J. W. Moffat, & P. Savaria.* 372, 241, 77-A1 (1991)

Steady State Energy Sources in Neutron Stars. *Kenneth A. Van Riper.* 372, 251, 77-A13 (1991)

Oscillations of Rotating Neutron Stars. *Tod E. Strohmayer.* 372, 573, 82-G5 (1991)

The Outcome of Explosive Ignition of ONeMg Cores: Supernovae, Neutron Stars, or "Iron" White Dwarfs? *Jordi Isern, Ramon Canal, & Javier Labay.* 372, L83, 85-D9 (1991)

Hard X-Ray Spectra from Gap Accretion onto Neutron Stars. *Włodzimierz Kluźniak & James R. Wilson.* 372, L87, 85-E1 (1991)

Transverse Conductivity of a Relativistic Plasma in Oblique Electric and Magnetic Fields. *Fulvio Melia & Marco Fatuzzo.* 373, 198, 88-D8 (1991)

Rotation of the Neutron-Drip Superfluid in Pulsars: The Interaction and Pinning of Vortices. *P. B. Jones.* 373, 208, 88-E6 (1991)

The Oscillations of Rapidly Rotating Newtonian Stellar Models. II. Dissipative Effects. *James R. Ipser & Lee Lindblom.* 373, 213, 88-E12 (1991)

High-Energy X-Ray Production in a Boundary Layer of an Accreting Neutron Star. *Tomoyuki Hanawa.* 373, 222, 88-F9 (1991)

The Near-Infrared Spectra of Low-Mass X-Ray Binaries and Related Objects. *A. P. Cowley, P. C. Schmidtke, D. Crampton, J. B. Hutchings, & M. Bolte.* 373, 228, 88-G1 (1991)

Structure and Stability of Rotating Relativistic Neutron Stars. *F. Weber, N. K. Glendenning, & M. K. Weigel.* 373, 579, 95-B10 (1991)

Mechanics and Energetics of Vortex Unpinning in Neutron Stars. *Bennett K. Link & Richard I. Epstein.* 373, 592, 95-C11 (1991)

Multipolar Magnetic Fields in Neutron Stars. *Julian H. Krolik.* 373, L69, 97-E4 (1991)

Equation of State in a Strong Magnetic Field: Finite Temperature and Gradient Corrections. *Andrew M. Abrahams & Stuart L. Shapiro.* 374, 652, 107-B12 (1991)

A Theory of Gamma-Ray Bursts Based on Resonant Compton Scattering. *Peter Vitello & Charles D. Dermer.* 374, 668, 107-D1 (1991)

Gamma-Ray Bursts from Colliding Strange Stars. *P. Haensel, B. Paczyński, & P. Amsterdamski.* 375, 209, 113-E10 (1991)

The Shear Modulus of the Neutron Star Crust and Nonradial Oscillations of Neutron Stars. *T. Strohmayer, S. Ogata, H. Iyetomi, S. Ichimaru, & H. M. Van Horn.* 375, 679, 121-B7 (1991)

Model Atmospheres and X-Ray Spectra of Bursting Neutron Stars. *Jerzy Madej.* 376, 161, 127-A4 (1991)

Steady Spherical Hypercritical Accretion onto Neutron Stars. *John C. Houck & Roger A. Chevalier.* 376, 234, 127-G6 (1991)

The X-Ray Properties of GX 301−2 (4U 1223−62). *F. Haberl.* 376, 245, 128-A5 (1991)

Detection of a Feature at 0.44 MeV in the Crab Pulsar Spectrum with FIGARO II: A Redshifted Positron Annihilation Line? *E. Massaro, G. Matt, M. Salvati, E. Costa, P. Mandrou, M. Niel, J. F. Olive, T. Mineo, B. Sacco, L. Scarsi, G. Gerardi, B. Agrinier, E. Barouch, R. Comte, B. Parlier, & J. L. Masnou.* 376, L11, 130-B7 (1991)

Transient Particle Acceleration in Strongly Magnetized Neutron Stars. *Fulvio Melia & Marco Fatuzzo.* 376, 673, 134-F7 (1991)

PSR 0540+23 Revisited: Three Components, Drifting Subpulses, and Mode Switching. *Leszek A. Nowakowski.* 377, 581, 147-A1 (1991)

Equation of State in Metals and Cold Stars: Evaluation of Statistical Models. *Dong Lai, Andrew M. Abrahams, & Stuart L. Shapiro.* 377, 612, 147-C10 (1991)

On Spectra of X-Ray Bursters in the Expansion Phase. *I. I. Lapidus.* 377, L93, 150-E1 (1991)

Radiative-hydrodynamical Simulations of Accretion Disk Coronae. *Fulvio Melia, Gregory J. Zylstra, & Bruce Fryxell.* 377, L101, 150-E11 (1991)

The Contribution of Light Bending and Redshift to the Pulse Characteristics of a Pulsar in the Case of Smaller Neutron Stars. *R. C. Kapoor.* 378, 227, 153-G1 (1991)

Astrophysical Limits for Binding Energy of Strange Matter. *M. I. Krivoruchenko & B. V. Martemyanov.* 378, 628, 160-C1 (1991)

A Mechanism for Gamma-Ray Bursts by Alfvén-Wave Acceleration in a Nonuniform Atmosphere. *K. A. Holcomb & T. Tajima.* 378, 682, 160-G10 (1991)

SN 1988A in M58: Departure from ^{56}Co Decay 700 Days after Explosion. *P. Ruiz-Lapuente, M. Kidger, G. Gómez, R. Canal, & R. López.* 378, L41, 162-E1 (1991)

Searches for Millisecond Pulsations in Low-Mass X-Ray Binaries. *K. S. Wood, J. P. Norris, P. Hertz, B. A. Vaughan, P. F. Michelson, K. Mitsuda, W. H. G. Lewin, J. van Paradijs, W. Penninx, & M. van der Klis.* 379, 295, 166-F9 (1991)

X-Ray–illuminated Stellar Winds: Optically Thick Wind Models for Massive X-Ray Binaries. *Ian R. Stevens.* 379, 310, 167-A1 (1991)

The Inability of the Resonant Compton Upscattering Model of Gamma-Ray Bursts to Produce a Third Cyclotron Harmonic. *J. J. Brainerd.* 379, L57, 175-C1 (1991)

Discovery of a Cyclotron Resonance Feature at 30 keV from the Transient X-Ray Pulsar Cepheus X-4. *T. Mihara, K. Makishima, S. Kamijo, T. Ohashi, F. Nagase, Y. Tanaka, & K. Koyama.* 379, L61, 175-C6 (1991)

The Rate of Neutron Star Binary Mergers in the Universe: Minimal Predictions for Gravity Wave Detectors. *E. S. Phinney.* 380, L17, 181-C6 (1991)

Superfluid Hydrodynamics in Rotating Neutron Stars. I. Nondissipative Equations. *Gregory Mendell.* 380, 515, 184-F1 (1991)

Superfluid Hydrodynamics in Rotating Neutron Stars. II. Dissipative Effects. *Gregory Mendell.* 380, 530, 184-G3 (1991)

Radiative Widths and Splitting of Cyclotron Lines in Superstrong Magnetic Fields. *G. G. Pavlov, V. G. Bezchastnov, P. Mészáros, & S. G. Alexander.* 380, 541, 185-A1 (1991)

High-Precision Timing of Millisecond Pulsars. II. Astrometry, Orbital Evolution, and Eclipses of PSR 1957+20. *M. F. Ryba & J. H. Taylor.* 380, 557, 185-B7 (1991)

X-Ray Detectability of Gamma-Ray Bursts from M31. *Edison P. Liang.* 380, L55, 188-B11 (1991)

The Statistics of Slow Interstellar Accretion onto Neutron Stars. *O. Blaes & M. Rajagopal.* 381, 210, 191-E10 (1991)

Gravitational Radiation from Dual Neutron Star Elliptical Binaries. *Dieter Hils.* 381, 484, 196-F5 (1991)

Soft X-Ray Pulses from Neutron Star Glitches. *Kenneth A. Van Riper, Richard I. Epstein, & Guy S. Miller.* 381, L47, 199-C1 (1991)

Molecules and Chains in a Strong Magnetic Field: Statistical Treatment. *Andrew M. Abrahams & Stuart L. Shapiro.* 382, 233, 203-B5 (1991)

Existence of Scattering Atmospheres near Luminous, Magnetized Compact Objects. *Charles D. Dermer & Steven J. Sturner.* 382, L23, 205-C11 (1991)

Transient Particle Acceleration in Strongly Magnetized Neutron Stars. II. Effects Due to a Dipole Field Geometry. *Marco Fatuzzo & Fulvio Melia.* 382, 570, 208-E10 (1991)

Neutron Star Crustal Plate Tectonics. II. Evolution of Radio Pulsar Magnetic Fields. *M. Ruderman.* 382, 576, 208-F4 (1991)

Neutron Star Crustal Plate Tectonics. III. Cracking, Glitches, and Gamma-Ray Bursts. *M. Ruderman.* 382, 587, 208-G3 (1991)

The Origin of the Planet around PSR 1829−10. *Takashi Nakamura & Tsvi Piran.* 382, L81, 211-C13 (1991)

Deep VLA Images of Globular Clusters. *Helen M. Johnston, Shrinivas R. Kulkarni, & W. M. Goss.* 382, L89, 211-D11 (1991)

Spectral Signatures of the MeV–PeV Radiation from Accreting Neutron Stars. *B. Rudak & P. Mészáros.* 383, 269, 215-E3 (1991)

Decrease in the Orbital Period of Hercules X-1. *John E. Deeter, Paul E. Boynton, Sigenori Miyamoto, Shunji Kitamoto, Fumiaki Nagase, & Nobuyuki Kawai.* 383, 324, 216-C1 (1991)

Cold Equation of State in a Strong Magnetic Field: Effects of Inverse β-Decay. *Dong Lai & Stuart L. Shapiro.* 383, 745, 223-D11 (1991)

Formation of Dense Charged Bunches in Vacuum Gaps. *F. Curtis Michel.* 383, 808, 224-C6 (1991)

V/V_{max} Test Applied to *Ginga* Gamma-Ray Bursts. *Y. Ogasaka, T. Murakami, J. Nishimura, A. Yoshida, & E. E. Fenimore.* 383, L61, 226-D6 (1991)

Local Distribution of Old Neutron Stars. *Zsolt Frei, Xiaolan Huang, & Bohdan Paczyński.* 384, 105, 2-C10 (1992)

Thermal Structure of Neutron Stars with Very Low Accretion Rates. *J. L. Zdunik, P. Haensel, B. Paczyński, & J. Miralda-Escudé.* 384, 129, 2-E12 (1992)

Compton Scattering in a Converging Fluid Flow: Spherical Near-critical Accretion onto Neutron Stars. *Apostolos Mastichiadis & Nikolaos D. Kylafis.* 384, 136, 2-F7 (1992)

The Fate of Accreted CNO Elements in Neutron Star Atmospheres: X-Ray Bursts and Gamma-Ray Lines. *Lars Bildsten, Edwin E. Salpeter, & Ira Wasserman.* 384, 143, 2-G1 (1992)

Multiple Resonant Scattering in the Compton Upscatter Model of Gamma-Ray Bursts. *J. J. Brainerd.* 384, 545, 9-A1 (1992)

The Continuum Eclipse of PSR 1957+20. *A. S. Fruchter & W. M. Goss.* 384, L47, 11-C9 (1992)

Radio Emission Altitudes in the Pulsar Magnetosphere. *J. A. Phillips.* 385, 282, 15-D5 (1992)

Post-Newtonian Frequencies for the Pulsations of Rapidly Rotating Neutron Stars. *Curt Cutler & Lee Lindblom.* 385, 630, 21-A1 (1992)

Radiation Dynamics in X-Ray Binaries. I. Type 1 Bursts. *Mark A. Walker.* 385, 642, 21-B1 (1992)

Radiation Dynamics in X-Ray Binaries. II. Type 2 Bursts. *Mark A. Walker.* 385, 651, 21-B12 (1992)

Radiation Dynamics in X-Ray Binaries. III. Extremely Compact Objects. *Mark A. Walker.* 385, 661, 21-C10 (1992)

The Structure and Evolution of Thorne-Żytkow Objects. *R. C. Cannon, P. P. Eggleton, A. N. Żytkow, & P. Podsiadlowski.* 386, 206, 26-F5 (1992)

Dynamical Model of the Magnetic Field of Neutron Stars. *F. W. Cummings, D. D. Dixon, & P. E. Kaus.* 386, 215, 26-G3 (1992)

On the Power Spectra of the Wind-fed X-Ray Binary Pulsar GX 301−2. *Mauro Orlandini & G. E. Morfill.* 386, 703, 34-A9 (1992)

Vortex Drag and the Spin-up Time Scale for Pulsar Glitches. *Richard I. Epstein & Gordon Baym.* 387, 276, 40-D1 (1992)

Properties of the Massive X-Ray Binary 4U 1700−37 = HD 153919. *S. R. Heap & M. F. Corcoran.* 387, 340, 41-B11 (1992)

Light Curves of Rotating, Oscillating Neutron Stars. *T. E. Strohmayer.* 388, 138, 50-F9 (1992)

Proton Acceleration in Neutron Star Magnetospheres. *I. A. Smith, J. I. Katz, & P. H. Diamond.* 388, 148, 50-G7 (1992)

Gamma-Ray Bursts and Cosmic Rays from Accretion-induced Collapse. *Arnon Dar, Ben Zion Kozlowski, Shmuel Nussinov, & Reuven Ramaty.* 388, 164, 51-A11 (1992)

Energy Dependence of Normal Branch Quasi-periodic Intensity Oscillations in Low-Mass X-Ray Binaries. *Guy S. Miller & Frederick K. Lamb.* 388, 541, 57-A5 (1992)

CNO Destruction by Spallation and Type I X-Ray Bursts. *Jason C. Tillett & James MacDonald.* 388, 555, 57-B7 (1992)

Photon Bubbles: Overstability in a Magnetized Atmosphere. *Jonathan Arons.* 388, 561, 57-C1 (1992)

Rotating Stars: The Angular Momentum Constraints. *Fernando de Felice & Leonardo Di G. Sigalotti.* 389, 386, 64-F7 (1992)

Determining the Coherence of Micropulses. *T. E. Strohmayer, J. M. Cordes, & H. M. Van Horn.* 389, 685, 69-G12 (1992)

On the Optical Counterpart of 1E 1207.4−5209, the Central X-Ray Source of a Ring-shaped Supernova Remnant. *Giovanni F. Bignami, Patrizia A. Caraveo, & Sandro Mereghetti.* 389, L67, 73-D5 (1992)

Gamma-Ray Bursts from Planet-Magnetosphere Systems around Neutron Stars. *Hitoshi Hanami.* 389, L71, 73-D11 (1992)

Postglitch Behavior of the Crab Pulsar: Evidence for External Torque Variations. *Bennett Link, Richard I. Epstein, & Gordon Baym.* 390, L21, 78-D5 (1992)

Remarks on Triaxiality, Spin-up, and Magnetic Field Obliquity of Some Millisecond Pulsars. *W. Y. Chau, K. S. Cheng, & J. L. Zhang.* 390, 486, 81-D1 (1992)

PSR 0655+64: An Astrophysical Laboratory for Testing Relativistic Gravity Theories. *Itzhak Goldman.* 390, 494, 81-D11 (1992)

Application of the Improved Hartle Method for the Construction of General Relativistic Rotating Neutron Star Models. *F. Weber & N. K. Glendenning.* 390, 541, 82-B1 (1992)

Thermonuclear Flash Model for Long X-Ray Tails from Aquila X-1. *Ikko Fushiki, Ronald E. Taam, S. E. Woosley, & D. Q. Lamb.* 390, 634, 83-B9 (1992)

Rapid Cooling of Neutron Stars by Hyperons and Δ Isobars. *Madappa Prakash, Manju Prakash, James M. Lattimer, & C. J. Pethick.* 390, L77, 85-A1 (1992)

On the Thermal Conductivity due to Collisions between Relativistic Degenerate Electrons. *F. X. Timmes.* 390, L107, 85-D9 (1992)

X-Ray Spectrum and Time Variation of X1850−087 in the Globular Cluster NGC 6712. *Shunji Kitamoto, Hiroshi Tsunemi, & Diane Roussel-Dupre.* 391, 220, 88-F7 (1992)

The Collapse of White Dwarfs to Neutron Stars. *S. E. Woosley & E. Baron.* 391, 228, 88-G1 (1992)

Evidence for Neutral Emission above 10^{17} eV from LMC X-4. *R. Meyhandan, B. R. Dawson, R. W. Clay, L. Horton, J. Ulrichs, & M. M. Winn.* 391, 236, 88-G11 (1992)

Formation of Very Strongly Magnetized Neutron Stars: Implications for Gamma-Ray Bursts. *Robert C. Duncan & Christopher Thompson.* 392, L9, 106-B7 (1992)

Shot Noise in Gamma-Ray Bursts. *B. M. Belli.* 393, 266, 117-D9 (1992)

Deep VLA Images of Globular Clusters: NGC 6624. *Helen M. Johnston & Shrinivas R. Kulkarni.* 393, L17, 120-C8 (1992)

Neutron Stars and Gravitational Scalars. *Helmut W. Zaglauer.* 393, 685, 124-D1 (1992)

Column Accretion with Radiation Drag and the Two-Branch Spectrum of the Low-Mass X-Ray Binary GX 5−1. *J. H. You, T. Lu, C. Y. Wei, & T. G. Wang.* 394, 283, 131-E1 (1992)

The Cooling of Neutron Stars by the Direct Urca Process. *Dany Page & James H. Applegate.* 394, L17, 133-C7 (1992)

Detectability of the Gravitational Wave Signal from a Close Neutron Star Binary with Mass Transfer. *Piotr Jaranowski & Andrzej Krolak.* 394, 586, 136-F1 (1992)

A New Class of *g*-Modes in Neutron Stars. *Andreas Reisenegger & Peter Goldreich.* 395, 240, 143-B7 (1992)

Magnetic Field Decay in Isolated Neutron Stars. *Peter Goldreich & Andreas Reisenegger.* 395, 250, 143-C5 (1992)

Field Theoretical Model for Nuclear and Neutron Matter. V. Slowly Rotating Warm Cores in Neutron Stars. *José V. Romero, J. Díaz Alonso, José M^a. Ibáñez, Juan A. Miralles, & Armando Pérez.* 395, 612, 150-F5 (1992)

Postcollapse Hydrodynamics of SN 1987A: Two-dimensional Simulations of the Early Evolution. *Marc Herant, Willy Benz, & Stirling Colgate.* 395, 642, 151-B13 (1992)

Gamma-Ray Bursts as the Death Throes of Massive Binary Stars. *Ramesh Narayan, Bohdan Paczyński, & Tsvi Piran.* 395, L83, 153-G10 (1992)

Ginga Observations of Centaurus X-3. *F. Nagase, R. H. D. Corbet, C. S. R. Day, H. Inoue, T. Takeshima, K. Yoshida, & T. Mihara.* 396, 147, 157-A3 (1992)

Radiative-hydrodynamical Simulations of X-Ray Burst–induced Accretion Disk Coronae. *Fulvio Melia, Gregory J. Zylstra, & Bruce Fryxell.* 396, L27, 160-E8 (1992)

Production of Recycled Pulsars in Globular Clusters via Two-Body Tidal Capture. *R. Di Stefano & S. Rappaport.* 396, 587, 164-F9 (1992)

The Conductive Propagation of Nuclear Flames. I. Degenerate C + O and O + Ne + Mg White Dwarfs. *F. X. Timmes & S. E. Woosley.* 396, 649, 165-D9 (1992)

Pulsar PSR 1744−24A: Timing, Eclipses, and the Evolution of Neutron Star Binaries. *D. J. Nice & S. E. Thorsett.* 397, 249, 171-A12 (1992)

Tidal Heating and Mass Loss in Neutron Star Binaries: Implications for Gamma-Ray Burst Models. *P. Mészáros & M. J. Rees.* 397, 570, 178-A12 (1992)

Are Repeaters Responsible for Gamma-Ray Burst $\langle V/V_{\max} \rangle < 0.5$? *R. E. Lingenfelter & J. C. Higdon.* 397, 576, 178-B7 (1992)

Spin-up of a Rapidly Rotating Star by Angular Momentum Loss: Effects of General Relativity. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 398, 203, 184-D1 (1992)

Coalescing Binary Neutron Stars. *Christopher S. Kochanek.* 398, 234, 184-F7 (1992)

The Quasi-static Evolution of ONeMg Cores: Explosive Ignition Densities and the Collapse/Explosion Alternative. *Ramon Canal, Jordi Isern, & Javier Labay.* 398, L49, 187-G7 (1992)

An Interpretation of the Multipeaked Structure in X-Ray Bursts. *Fulvio Melia & Gregory J. Zylstra.* 398, L53, 188-A1 (1992)

Determining the Nuclear Equation of State from Neutron-Star Masses and Radii. *Lee Lindblom.* 398, 569, 191-C1 (1992)

Implications of $^3P_2$ Superfluidity in the Interior of Neutron Stars. *H. F. Chau, K. S. Cheng, & K. Y. Ding.* 399, 213, 197-G9 (1992)

On the Evolution of Slowly Accreting Neutron Stars. *O. M. Blaes, R. D. Blandford, P. Madau, & L. Yan.* 399, 634, 205-G3 (1992)

Tidal Interactions of Inspiraling Compact Binaries. *Lars Bildsten & Curt Cutler.* 400, 175, 211-B1 (1992)

X-Ray Flashes from M31 Based on Extended Halo Models of Gamma-Ray Bursts. *Hui Li & Edison P. Liang.* 400, L59, 220-D3 (1992)

Hydrodynamical Evolution of Coalescing Binary Neutron Stars. *Frederic A. Rasio & Stuart L. Shapiro.* 401, 226, 223-G9 (1992)

Stellar Encounters Involving Neutron Stars in Globular Cluster Cores. *M. B. Davies, W. Benz, & J. G. Hills.* 401, 246, 224-B1 (1992)

Pulsar Death Lines and Death Valley. *Kaiyou Chen & Malvin Ruderman.* 402, 264, 4-D1 (1993)

Superfluid Vortex Creep and Rotational Dynamics of Neutron Stars. *Bennett Link, Richard I. Epstein, & Gordon Baym.* 403, 285, 17-D7 (1993)

The Unstable Long-Term Periodicity of Aquila X-1. *Shunji Kitamoto, Hiroshi Tsunemi, Sigenori Miyamoto, & Diane Roussel-Dupre.* 403, 315, 17-F13 (1993)

Discovery of the Orbit of the X-Ray Pulsar OAO 1657−415. *Deepto Chakrabarty, John M. Grunsfeld, Thomas A. Prince, Lars Bildsten, Mark H. Finger, Robert B. Wilson, Gerald J. Fishman, Charles A. Meegan, & William S. Paciesas.* 403, L33, 20-D6 (1993)

Can We Observe Accreting, Isolated Neutron Stars? *Omer Blaes & Piero Madau.* 403, 690, 24-C8 (1993)

Decrease of Gravitational Mass Due to Neutrino Emission and Shock Revival in Supernovae. *Itzhak Goldman & Shmuel Nussinov.* 403, 706, 24-D13 (1993)

Electrical and Thermal Conductivities of Dense Matter in the Crystalline Lattice Phase. II. Impurity Scattering. *Naoki Itoh & Yasuharu Kohyama.* 404, 268, 31-C1 (1993)

Numerical Simulations of Two-dimensional and Three-dimensional Wind Accretion Flows of an Isothermal Gas. *Takanori Ishii, Takuya Matsuda, Eiji Shima, Mario Livio, Ulrich Anzer, & Gerhard Börner.* 404, 706, 37-F9 (1993)

Relativistic Fireballs and Their Impact on External Matter: Models for Cosmological Gamma-Ray Bursts. *P. Mészáros & M. J. Rees.* 405, 278, 44-E9 (1993)

The Masses of Two Binary Neutron Star Systems. *S. E. Thorsett, Z. Arzoumanian, M. M. McKinnon, & J. H. Taylor.* 405, L29, 47-E8 (1993)

The Evolutionary Status of the Pulsar–Be Star Binary PSR 1259−63. *A. R. King.* 405, 727, 52-B5 (1993)

Fitting Pulse Profiles of X-Ray Pulsars: The Effects of Relativistic Light Deflection. *H. Riffert, H.-P. Nollert, U. Kraus, & H. Ruder.* 406, 185, 57-D1 (1993)

Properties of Ultracompact Neutron Stars. *Robert J. Nemiroff, Peter A. Becker, & Kent S. Wood.* 406, 590, 65-B13 (1993)

Hydrodynamic Instability and Coalescence of Close Binary Systems. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 406, L63, 68-D3 (1993)

Photoionization of the Hydrogen Atom in Strong Magnetic Fields. *Alexander Yu. Potekhin & George G. Pavlov.* 407, 330, 73-B11 (1993)

A Detailed Study of Sheared Alfvén Waves and Their Possible Application to Gamma-Ray Bursts. *Marco Fatuzzo & Fulvio Melia.* 407, 680, 79-A8 (1993)

The Boltzmann Equation in General Relativistic Rotating Systems: Cooling of Rotating Neutron Stars. *Juan A. Miralles, Kenneth A. Van Riper, & James M. Lattimer.* 407, 687, 79-B1 (1993)

A Broad-Band X-Ray Telescope Spectrum of the Massive X-Ray Binary X Persei. *Eric M. Schlegel, Peter J. Serlemitsos, Keith Jahoda, Frank Marshall, Robert Petre, Elihu Boldt, Richard Mushotzky, Jean Swank, Andrew Szymkowiak, Alan Smale, & Kim Weaver.* 407, 744, 79-F13 (1993)

Magnetic Field Topology in Pulsars. *Jonathan Arons.* 408, 160, 85-B1 (1993)

Magnetic Field Decay from the Core of Neutron Stars: Effects of Interpinning of $^3P_2$ Neutron Superfluid and $^1S_0$ Proton Superconducting Fluid. *K. Y. Ding, K. S. Cheng, & H. F. Chau.* 408, 167, 85-B11 (1993)

Origin and Radio Pulse Properties of Millisecond Pulsars. *Kaiyou Chen & Malvin Ruderman.* 408, 179, 85-C12 (1993)

Thermal Evolution of Neutron Stars with Internal Frictional Heating. *Hideyuki Umeda, Noriaki Shibazaki, Ken'ichi Nomoto, & Sachiko Tsuruta.* 408, 186, 85-D7 (1993)

Neutron Star Dynamos and the Origins of Pulsar Magnetism. *Christopher Thompson & Robert C. Duncan.* 408, 194, 85-E4 (1993)

TeV Gamma Rays from Millisecond Pulsars and the Detectability of Globular Clusters. *I. A. Smith.* 408, 468, 91-A7 (1993)

Helium Destruction and Gamma-Ray Line Emission in Accreting Neutron Stars. *Lars Bildsten, Edwin E. Salpeter, & Ira Wasserman.* 408, 615, 92-G9 (1993)

Postglitch Relaxation of the Vela Pulsar after Its First Eight Large Glitches: A Reevaluation with the Vortex Creep Model. *M. Ali Alpar, H. F. Chau, K. S. Cheng, & David Pines.* 409, 345, 101-D1 (1993)

A Model of Nonthermal Radiation from Accreting X-Ray Pulsars. *P. P. Leung, K. S. Cheng, & P. C. W. Fung.* 410, 309, 115-G12 (1993)

Relativistic Electron-Positron Beams in Gamma-Ray Bursters. *I. A. Smith & Richard I. Epstein.* 410, 315, 116-A6 (1993)

Disk Plus Halo Models of Gamma-Ray Burst Sources. *I. A. Smith & D. Q. Lamb.* 410, L23, 118-A9 (1993)

The Binary Pulsar PSR 1908+00 in NGC 6760. *W. T. S. Deich, J. Middleditch, S. B. Anderson, S. R. Kulkarni, T. A. Prince, & A. Wolszczan.* 410, L95, 126-A13 (1993)

Encounters between Binaries and Neutron Stars. *M. B. Davies, W. Benz, & J. G. Hills.* 411, 285, 130-F13 (1993)

Reliability of Magnetic Inclination Angle Determinations for Pulsars. *M. Coleman Miller & Russell J. Hamilton.* 411, 298, 131-A1 (1993)

Neutron Star Accretion in a Stellar Envelope. *Roger A. Chevalier.* 411, L33, 134-A7 (1993)

Does the Coalescence of White Dwarfs Produce Millisecond Pulsars in Globular Clusters? *Kaiyou Chen & Peter J. T. Leonard.* 411, L75, 142-D3 (1993)

A Turbulent Model of Time Variability in X-Ray Binary Pulsars. *Masahiro Hoshino & Toshiaki Takeshima.* 411, L79, 142-D9 (1993)

The Optical Counterpart of the Bright Nearby Millisecond Pulsar PSR J0437−4715. *Charles D. Bailyn.* 411, L83, 142-E1 (1993)

Crustal Magnetic Field Decay in Neutron Stars and the Nature of Superdense Matter. *Vadim A. Urpin & Kenneth A. Van Riper.* 411, L87, 142-E6 (1993)

The Quasi-periodic Oscillations and Very Low Frequency Noise of Scorpius X-1 as Transient Chaos: A Dripping Handrail? *Jeffrey D. Scargle, Thomas Steiman-Cameron, Karl Young, David L. Donoho, James P. Crutchfield, & James Imamura.* 411, L91, 142-E13 (1993)

Successive X-Ray Bursts from Accreting Neutron Stars. *Ronald E. Taam, S. E. Woosley, T. A. Weaver, & D. Q. Lamb.* 413, 324, 160-C8 (1993)

ROSAT Observations of Pulsed Soft X-Ray Emission from PSR 1055−52. *Hakkı Ögelman & John P. Finley.* 413, L31, 162-E5 (1993)
Hidden Slow Pulsars in Binaries. *Marco Tavani & Leigh Brookshaw.* 413, L39, 162-F3 (1993)
Effect of Radiation Forces on Disk Accretion by Weakly Magnetic Neutron Stars. *M. Coleman Miller & Frederick K. Lamb.* 413, L43, 162-F9 (1993)
Thermal Evolution of Neutron Stars with Internal Heating in the Superfluid Core. *Armen D. Sedrakian & David M. Sedrakian.* 413, 658, 164-F1 (1993)
Interaction of a Jet with a Radiation Pressure–dominated Atmosphere: The Case of SS 433. *Nahum Arav & Mitchell C. Begelman.* 413, 700, 165-B8 (1993)
Postglitch Relaxation following the Ninth Glitch of the Vela Pulsar. *H. F. Chau, P. M. McCulloch, R. Nandkumar, & D. Pines.* 413, L113, 169-A6 (1993)
Detection of an Ultraviolet and Visible Counterpart of the NGC 6624 X-Ray Burster. *I. R. King, S. A. Stanford, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, M. J. Disney, J. M. Deharveng, P. Jakobsen, T. M. Kamperman, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, W. B. Sparks, & C. Sosin.* 413, L117, 169-A12 (1993)
A Reprocessing Model for the Ultraviolet and Optical Light from 4U 1820−30. *Jonathan Arons & Ivan R. King.* 413, L121, 169-B4 (1993)
Normal Modes of Relativistic Stars in Slow Rotation Limit. *Yasufumi Kojima.* 414, 247, 173-B3 (1993)
The Luminosity Dependence of the X-Ray Spectrum of the Transient 42 Second Pulsar EXO 2030+375. *A. P. Reynolds, A. N. Parmar, & N. E. White.* 414, 302, 173-F9 (1993)
The QCD Phase Transition and Supernova Core Collapse. *N. A. Gentile, M. B. Aufderheide, G. J. Mathews, F. D. Swesty, & G. M. Fuller.* 414, 701, 180-A3 (1993)
A Hydrodynamical Model for the Explosion of a Neutron Star Just below the Minimum Mass. *Monica Colpi, Stuart L. Shapiro, & Saul A. Teukolsky.* 414, 717, 180-B10 (1993)
ROSAT High Resolution Imager Observations of PSR 0656+14. *S. B. Anderson, F. A. Córdova, G. G. Pavlov, C. R. Robinson, & R. J. Thompson, Jr.* 414, 867, 182-A12 (1993)
Vortex Pinning by Quenched Randomness in Neutron Stars. *Eric Chevalier.* 414, L113, 186-A13 (1993)
Soft X-Ray Properties of the Geminga Pulsar. *J. P. Halpern & M. Ruderman.* 415, 286, 188-E8 (1993)
Neutrino Emission from the Bubble Phase of Stellar Nuclear Matter. *L. B. Leinson.* 415, 759, 197-C8 (1993)
High-Density Matter in the Chiral Sigma Model. *Pradip K. Sahu, Rahul Basu, & Bhaskar Datta.* 416, 267, 204-D6 (1993)
Thomas-Fermi Calculations of Atoms and Matter in Magnetic Neutron Stars: Effects of Higher Landau Bands. *Ö. E. Rögnvaldsson, I. Fushiki, E. H. Gudmundsson, C. J. Pethick, & J. Yngvason.* 416, 276, 204-E3 (1993)
Gravitational Radiation from Nonaxisymmetric Collisions of Neutron Stars. *Joan M. Centrella & Stephen L. W. McMillan.* 416, 719, 212-C10 (1993)
Finite-Velocity Effects on Atoms in Strong Magnetic Fields and Implications for Neutron Star Atmospheres. *G. G. Pavlov & P. Mészáros.* 416, 752, 212-F8 (1993)
Density Discontinuities and the g-Mode Oscillation Spectra of Neutron Stars. *T. E. Strohmayer.* 417, 273, 220-G9 (1993)
Gravitational Waves and γ-Ray Bursts. *Christopher S. Kochanek & Tsvi Piran.* 417, L17, 222-G11 (1993)
Baryon Purity in Cosmological Gamma-Ray Bursts as a Manifestation of Event Horizons. *Amir Levinson & David Eichler.* 418, 386, 235-G1 (1993)
Electrical and Thermal Conductivities of Dense Matter in the Crystalline Lattice Phase. III. Inclusion of Lower Densities. *Naoki Itoh, Hiroshi Hayashi, & Yasuharu Kohyama.* 418, 405, 236-A13 (1993)
Rings of Fire: Nuclear Burning as the Origin of Sub-Hertz Noise and Weak X-Ray Bursts in Accreting Neutron Stars. *Lars Bildsten.* 418, L21, 238-C8 (1993)
Nonthermal Cyclotron Emission from Low-Luminosity Accretion onto Magnetic Neutron Stars. *Robert W. Nelson, E. E. Salpeter, & Ira Wasserman.* 418, 874, 243-D12 (1993)
Dynamically Comptonized Spectra from Near-critical Accretion onto Neutron Stars. *Luca Zampieri, Roberto Turolla, & Aldo Treves.* 419, 311, 250-B1 (1993)
Maximum Quark Core in a Neutron Star for Realistic Equations of State. *Marek Kutschera & Andrzej Kotlorz.* 419, 752, 257-A9 (1993)
On the Observability of Microsecond Temporal Structure in the Emission from X-Ray Binary Pulsars. *Mauro Orlandini & Elihu Boldt.* 419, 776, 257-C9 (1993)
Hydrodynamic Instability and Coalescence of Binary Neutron Stars. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 420, 811, 13-A10 (1994)
On the Energetics and Number of Gamma-Ray Pulsars. *Charles D. Dermer & Steven J. Sturner.* 420, L75, 15-D11 (1994)
On the Spectra and Pulse Profiles of Gamma-Ray Pulsars. *Steven J. Sturner & Charles D. Dermer.* 420, L79, 15-E3 (1994)
A Search for Circumstellar Material around Pulsars. *J. A. Phillips & C. J. Chandler.* 420, L83, 15-E9 (1994)
Revised Proper-Motion Results for the Soft X-Ray–emitting Radio Pulsar PSR 0656+14. *R. J. Thompson, Jr., & F. A. Córdova.* 421, L13, 21-D11 (1994)
The Vertical Structure and Stability of Accretion Disks Surrounding Black Holes and Neutron Stars. *J. A. Milsom, Xingming Chen, & Ronald E. Taam.* 421, 668, 26-E6 (1994)
Radiating, Slowly Rotating Bodies in General Relativity. *L. Herrera, A. Melfo, L. A. Núñez, & A. Patiño.* 421, 677, 26-F3 (1994)
The Oscillations of Superfluid Neutron Stars. *Lee Lindblom & Gregory Mendell.* 421, 689, 26-G3 (1994)
Neutron Tori around Kerr Black Holes. *H. J. Witt, M. Jaroszyński, P. Haensel, B. Paczyński, & J. Wambsganss.* 422, 219, 32-G5 (1994)
Rapidly Rotating Polytropes in General Relativity. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 422, 227, 33-A1 (1994)
Two Populations and Models of Gamma-Ray Bursts. *J. I. Katz.* 422, 248, 33-B12 (1994)
Relativistic Equation of State of Nuclear Matter for the Supernova Explosion and the Birth of Neutron Stars. *K. Sumiyoshi & H. Toki.* 422, 700, 40-E7 (1994)
Electrodynamics of Disk-accreting Magnetic Neutron Stars. *M. Coleman Miller, Frederick K. Lamb, & Russell J. Hamilton.* 90, 833, 14-B4 (1994)
Disk-Accreting Magnetic Neutron Stars as High-Energy Particle Accelerators. *Russell J. Hamilton, Frederick K. Lamb, & M. Coleman Miller.* 90, 837, 14-B9 (1994)
Do Gamma-Ray Bursts Originate from an Extended Galactic Halo of High-Velocity Neutron Stars? *Dieter H. Hartmann, Lawrence E. Brown, Lih-Sin The, Eric V. Linder, Vahe Petrosian, George R. Blumenthal, & Kevin C. Hurley.* 90, 893, 14-G10 (1994)
Polarized One-Quantum Annihilation in Strong Magnetic Fields as a Process for Particle Deceleration in Neutron Star Atmospheres. *D. Berg, M. Mentzel, & G. Wunner.* 90, 905, 15-A10 (1994)
A New Way to Make Thorne-Żytkow Objects. *Peter J. T. Leonard, Jack G. Hills, & Rachel J. Dewey.* 423, L19, 53-C13 (1994)
Constraints on Accreting, Isolated Neutron Stars from the *ROSAT* and *EUVE* Surveys. *Piero Madau & Omer Blaes.* 423, 748, 57-G10 (1994)
Recycling Pulsars to Millisecond Periods in General Relativity. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 423, L117, 60-G3 (1994)
Rapidly Rotating Neutron Stars in General Relativity: Realistic Equations of State. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 424, 823, 75-A11 (1994)
Neutron Star Moments of Inertia. *D. G. Ravenhall & C. J. Pethick.* 424, 846, 75-C8 (1994)
The Role of the Equation of State in the "Prompt" Phase of Type II Supernovae. *F. Douglas Swesty, James M. Lattimer, & Eric S. Myra.* 425, 195, 82-F3 (1994)
A Tool for Probing the Structure of Neutron Stars: Transient X-Ray Emission. *N. Chong & K. S. Cheng.* 425, 210, 82-G8 (1994)
General Relativistic Corrections in the Gamma-Ray Emission from Pulsars. *P. L. Gonthier & A. K. Harding.* 425, 767, 91-C10 (1994)
Rapid Cooling and the Structure of Neutron Stars. *James M. Lattimer, Kenneth A. Van Riper, Madappa Prakash, & Manju Prakash.* 425, 802, 91-F12 (1994)
Spherical Accretion onto Neutron Stars Revisited: Are Hot Solutions Possible? *R. Turolla, L. Zampieri, M. Colpi, & A. Treves.* 426, L35, 103-E1 (1994)
Excitation of Neutron Star Normal Modes during Binary Inspiral. *Andreas Reisenegger & Peter Goldreich.* 426, 688, 107-A6 (1994)
Are Gamma-Ray Bursters in Our Galaxy? *David Eichler.* 426, L73, 109-C13 (1994)
Radiation from Vela-like Pulsars near the Death Line. *V. V. Usov.* 427, 394, 114-F11 (1994)

Evidence of Circumstellar Matter Surrounding the Hercules X-1 System. *C. S. Choi, T. Dotani, F. Nagase, F. Makino, J. E. Deeter, & K. W. Min.* 427, 400, 114-G5 (1994)

A New Transient Pulsar in the Small Magellanic Cloud with an Unusual X-Ray Spectrum. *John P. Hughes.* 427, L25, 117-D8 (1994)

Postglitch Relaxation of the Crab Pulsar: Evidence for Crust Cracking. *M. A. Alpar, H. F. Chau, K. S. Cheng, & D. Pines.* 427, L29, 117-E1 (1994)

Neutrino Bursts from Gamma-Ray Bursts. *Bohdan Paczyński & Guohong Xu.* 427, 708, 121-E3 (1994)

Geminga: A Cooling Superfluid Neutron Star. *Dany Page.* 428, 250, 131-C6 (1994)

Hard X-Ray Emission from Weakly Magnetized Neutron Stars. *Didier Barret & Gilbert Vedrenne.* 92, 505, 38-E7 (1994)

Similarities in Neutron Star and Black Hole Accretion. *M. van der Klis.* 92, 511, 38-F1 (1994)

Multiwavelength Observations of Isolated Neutron Stars. *S. Mereghetti, P. A. Caraveo, & G. F. Bignami.* 92, 521, 38-F12 (1994)

The Gamma-Ray Signature of the Disruption of a Neutron Star by a Black Hole. *M. Hernanz, J. Isern, X. Martin, & R. Mochkovitch.* 92, 627, 40-C1 (1994)

On the Spectra of X-Ray Bursters: Expansion and Contraction Stages. *Lev Titarchuk.* 429, 340, 148-C6 (1994)

ROSAT/Optical Observations of 2S 0114+65: A Study of the 2.8 Hour Periodic Outbursts. *John P. Finley, MaryJane Taylor, & Tomaso Belloni.* 429, 356, 148-D13 (1994)

The Detection of Pulsed X-Ray Emission from a Nearby Radio Pulsar. *S. Yancopoulos, T. T. Hamilton, & D. J. Helfand.* 429, 832, 156-A9 (1994)

Oscillations of Red Dwarfs in Evolved Low-Mass Binaries with Neutron Stars. *Marek J. Sarna, Umin Lee, & Alexander G. Muslimov.* 431, 302, 179-G8 (1994)

Neutron Star Cooling and Pion Condensation. *Hideyuki Umeda, Ken'ichi Nomoto, Sachiko Tsuruta, Takumi Muto, & Toshitaka Tatsumi.* 431, 309, 180-A3 (1994)

Network Synthesis Localization of Two Soft Gamma Repeaters. *Kevin Hurley, M. Sommer, C. Kouveliotou, G. Fishman, C. Meegan, T. Cline, M. Boer, & M. Niel.* 431, L31, 182-F5 (1994)

High Time Resolution Infrared Observations of the Crab Nebula Pulsar. *S. M. Ransom, G. G. Fazio, S. S. Eikenberry, J. Middleditch, J. Kristian, K. Hays, & C. R. Pennypacker.* 431, L43, 182-G11 (1994)

Low-Frequency Quasi-periodic Oscillations in Low-Mass X-Ray Binaries and Galactic Black Hole Candidates. *Xingming Chen & Ronald E. Taam.* 431, 732, 187-F3 (1994)

Merging Neutron Stars. I. Initial Results for Coalescence of Noncorotating Systems. *M. B. Davies, W. Benz, T. Piran, & F. K. Thielemann.* 431, 742, 187-G1 (1994)

On the Nature of Photospheric Oscillations in Strong X-Ray Bursts. *Iosif Lapidus, Luciano Nobili, & Roberto Turolla.* 431, L103, 191-F13 (1994)

Hydrodynamics of Binary Coalescence. I. Polytropes with Stiff Equations of State. *Frederic A. Rasio & Stuart L. Shapiro.* 432, 242, 196-C2 (1994)

Multipole Moments of Stellar Oscillation Modes. *Andreas Reisenegger.* 432, 296, 196-G6 (1994)

Delayed Hard Photons from Gamma-Ray Bursts. *J. I. Katz.* 432, L27, 199-D11 (1994)

Axisymmetric Neutrino Radiation and the Mechanism of Supernova Explosions. *Tetsuya Shimizu, Shoichi Yamada, & Katsuhiko Sato.* 432, L119, 207-B1 (1994)

Maximum Entropy Distribution and Closure for Bose-Einstein and Fermi-Dirac Radiation Transport. *J. Cernohorsky & S. A. Bludman.* 433, 250, 211-D6 (1994)

Nonstandard Thermal Evolution of Neutron Stars. *Hideyuki Umeda, Sachiko Tsuruta, & Ken'ichi Nomoto.* 433, 256, 211-E1 (1994)

Soft X-Ray Spectral Fits of Geminga with Model Neutron Star Atmospheres. *R. D. Meyer, G. G. Pavlov, & P. Mészáros.* 433, 265, 211-E12 (1994)

Winds from Neutron Stars and Strong Type I X-Ray Bursts. *Luciano Nobili, Roberto Turolla, & Iosif Lapidus.* 433, 276, 211-F11 (1994)

Accretion Rates in X-Ray Bursting Sources. *Iosif Lapidus, Luciano Nobili, & Roberto Turolla.* 433, 287, 211-G11 (1994)

The Discovery of 8.7 Second Pulsations from the Ultrasoft X-Ray Source 4U 0142+61. *G. L. Israel, S. Mereghetti, & L. Stella.* 433, L25, 214-G5 (1994)

Prompt Convection in Core Collapse Supernovae. *Stephen W. Bruenn & Anthony Mezzacappa.* 433, L45, 215-C1 (1994)

Baryonic Dark Clusters in Galactic Halos and Their Observable Consequences. *Ira Wasserman & Edwin E. Salpeter.* 433, 670, 219-D5 (1994)

Long-Term Evolution of Crustal Neutron Star Magnetic Fields. *V. A. Urpin, G. Chanmugam, & Yeming Sang.* 433, 780, 220-G5 (1994)

The PSR 1800−21/G8.7−0.1 Association: A View from *ROSAT*. *John P. Finley & Hakki Ögelman.* 434, L25, 232-D11 (1994)

Galactic Dual Population Models of Gamma-Ray Bursts. *J. C. Higdon & R. E. Lingenfelter.* 434, 552, 235-D8 (1994)

Supplementary Parameters in the Parameterized Post-Keplerian Formalism. *S. M. Kopeikin.* 434, L67, 241-F9 (1994)

Inside the Supernova: A Powerful Convective Engine. *Marc Herant, Willy Benz, W. Raphael Hix, Chris L. Fryer, & Stirling A. Colgate.* 435, 339, 248-B3 (1994)

Searches for Millisecond Pulsations in Low-Mass X-Ray Binaries. II. *B. A. Vaughan, M. van der Klis, K. S. Wood, J. P. Norris, P. Hertz, P. F. Michelson, J. van Paradijs, W. H. G. Lewin, K. Mitsuda, & W. Penninx.* 435, 362, 248-D1 (1994)

Li Abundances in Late-Type Companions to Neutron Stars and Black Hole Candidates. *Eduardo L. Martín, Rafael Rebolo, Jorge Casares, & Philip A. Charles.* 435, 791, 257-A4 (1994)

Upper Limit of the Angular Velocity of Neutron Stars. *Masa-aki Hashimoto, Kazuhiro Oyamatsu, & Yoshiharu Eriguchi.* 436, 257, 264-G1 (1994)

Line-dominated Eclipse Spectrum of Vela X-1. *Fumiaki Nagase, Gregory Zylstra, Takashi Sonobe, Taro Kotani, Hajime Inoue, & Jonathan Woo.* 436, L1, 268-C1 (1994)

Is the Changing Orbital Period of EXO 0748−676 Evidence for a Triple System? *R. H. D. Corbet, K. Asai, T. Dotani, & F. Nagase.* 436, L15, 268-D13 (1994)

Characteristics of the Persistent Emission of SGR 1806−20. *T. Sonobe, T. Murakami, S. R. Kulkarni, T. Aoki, & A. Yoshida.* 436, L23, 268-F1 (1994)

Accretion onto and Radiation from the Compact Object Formed in SN 1987A. *G. E. Brown & J. C. Weingartner.* 436, 843, 277-C9 (1994)

Yet Another Model of Soft Gamma Repeaters. *J. I. Katz, H. A. Toole, & S. H. Unruh.* 437, 727, 295-F6 (1994)

Super-Eddington Radiation Transfer in Soft Gamma Repeaters. *Andrew Ulmer.* 437, L111, 299-C1 (1994)

Critical Angular Velocities of Rotating Neutron Stars. *Lee Lindblom.* 438, 265, 5-B4 (1995)

Frictional Instabilities in Neutron Star Interiors. *Noriaki Shibazaki & Yuko Mochizuki.* 438, 288, 5-D7 (1995)

The Soft Gamma-Ray Spectrum of A0535+26: Detection of an Absorption Feature at 110 keV by OSSE. *J. E. Grove, M. S. Strickman, W. N. Johnson, J. D. Kurfess, R. L. Kinzer, C. H. Starr, G. V. Jung, E. Kendziorra, P. Kretschmar, M. Maisack, & R. Staubert.* 438, L25, 10-A9 (1995)

Gravitational Radiation–driven Secular Instability of Rotating Polytropes. *Shin'ichirou Yoshida & Yoshiharu Eriguchi.* 438, 830, 15-F1 (1995)

Propagation of Nuclear Burning Fronts on Accreting Neutron Stars: X-Ray Bursts and Sub-Hertz Noise. *Lars Bildsten.* 438, 852, 16-A2 (1995)

Physics of Magnetospheric Emission in Soft Gamma-Ray Repeaters. *Fulvio Melia & Marco Fatuzzo.* 438, 904, 16-E7 (1995)

A Potential Cyclotron Line Signature in Low-Luminosity X-Ray Sources. *Robert W. Nelson, John C. L. Wang, E. E. Salpeter, & Ira Wasserman.* 438, L99, 20-B1 (1995)

Critical Radiation Fluxes and Luminosities of Black Holes and Relativistic Stars. *Frederick K. Lamb & M. Coleman Miller.* 439, 828, 36-A11 (1995)

Simple Analysis of Slowly Rotating Semidegenerate Spheroids of Fermions. *M. A. Sabadell, J. Sañudo, & A. F. Pacheco.* 439, 846, 36-C5 (1995)

X-Ray Spectra from Neutron Stars Accreting at Low Rates. *Luca Zampieri, Roberto Turolla, Silvia Zane, & Aldo Treves.* 439, 849, 36-C12 (1995)

The Orbital Light Curve of PSR 1957+20. *Paul J. Callanan, Jan van Paradijs, & Roeland Rengelink.* 439, 928, 37-D4 (1995)

Self-trapping of Superfluid Vortices and the Origin of Pulsar Glitches. *Yuko Mochizuki & Takeo Izuyama.* 440, 263, 44-G2 (1995)

Neutron Star Accretion and Binary Pulsar Formation. *G. E. Brown.* 440, 270, 44-G12 (1995)

High-Mass X-Ray Binary Populations. I. Galactic Modeling. *William W. Dalton & Craig L. Sarazin.* 440, 280, 45-A11 (1995)

Oscillatory Modes in Near-critical Accretion Flows. *Guy S. Miller & Myeong-Gu Park.* 440, 771, 53-F11 (1995)

The Conversion of Two-Flavor to Three-Flavor Quark Matter in a Supernova Core. *Zigao Dai, Qiuhe Peng, & Tan Lu.* 440, 815, 54-C9 (1995)

Optical and Infrared Observations of SGR 1806−20. *S. R. Kulkarni, K. Matthews, G. Neugebauer, I. N. Reid, M. H. van Kerkwijk, & G. Vasisht.* 440, L61, 57-E12 (1995)

Radio Monitoring and High-Resolution Imaging of the Soft Gamma-Ray Repeater 1806−20. *G. Vasisht, D. A. Frail, & S. R. Kulkarni.* 440, L65, 57-F6 (1995)

Photon-Splitting Limits to the Hardness of Emission in Strongly Magnetized Soft Gamma Repeaters. *Matthew G. Baring.* 440, L69, 57-G1 (1995)

Delayed Switch-on of Pulsars. *Alexander Muslimov & Dany Page.* 440, L77, 58-A3 (1995)

Phase Lags in Cygnus X-1. *M. Coleman Miller.* 441, 770, 72-E6 (1995)

Gravitational Radiation from Rapidly Rotating Nascent Neutron Stars. *Dong Lai & Stuart L. Shapiro.* 442, 259, 80-F11 (1995)

Surface Temperature of a Magnetized Neutron Star and Interpretation of the *ROSAT* Data. I. Dipolar Fields. *Dany Page.* 442, 273, 81-A1 (1995)

The Very Low Mass X-Ray Binary Pulsars: A New Class of Sources? *S. Mereghetti & L. Stella.* 442, L17, 84-F9 (1995)

Close Galactic Origin of Gamma-Ray Bursts. *G. S. Bisnovatyi-Kogan.* 97, 185, 13-D1 (1995)

Deviations from Chemical Equilibrium Due to Spin-down as an Internal Heat Source in Neutron Stars. *Andreas Reisenegger.* 442, 749, 90-E3 (1995)

Postaccretion Magnetic Field Evolution of Neutron Stars. *E. J. Young & G. Chanmugam.* 442, L53, 94-D3 (1995)

Hydrodynamics of Coalescing Binary Neutron Stars: Ellipsoidal Treatment. *Dong Lai & Stuart L. Shapiro.* 443, 705, 107-E12 (1995)

Computing Supernova Collapse to Neutron Stars and Black Holes. *Thomas W. Baumgarte, Stuart L. Shapiro, & Saul A. Teukolsky.* 443, 717, 107-F13 (1995)

The Spectrum and Pulses of 1E 2259+586 from *ASCA* and BBXRT Observations. *R. H. D. Corbet, A. P. Smale, M. Ozaki, K. Koyama, & K. Iwasawa.* 443, 786, 108-F3 (1995)

Comparing Models of Rapidly Rotating Relativistic Stars Constructed by Two Numerical Methods. *Nikolaos Stergioulas & John L. Friedman.* 444, 306, 117-F1 (1995)

Geometry and Pulse Profiles of X-Ray Pulsars: Asymmetric Relativistic Fits to 4U 1538−52 and Vela X-1. *T. Bulik, H. Riffert, P. Mészáros, K. Makishima, T. Mihara, & B. Thomas.* 444, 405, 119-B3 (1995)

A Luminous Companion to SGR 1806−20. *M. H. van Kerkwijk, S. R. Kulkarni, K. Matthews, & G. Neugebauer.* 444, L33, 121-F1 (1995)

Tests and Consequences of Disk Plus Halo Models of Gamma-Ray Burst Sources. *I. A. Smith.* 444, 686, 125-G1 (1995)

Does Gravitational Radiation Limit the Angular Velocities of Superfluid Neutron Stars? *Lee Lindblom & Gregory Mendell.* 444, 804, 127-E6 (1995)

The First Search for a Gamma-Ray Burst Quiescent Counterpart in the Extreme Ultraviolet with *EUVE*. *K. Hurley, P. Li, J. Laros, G. Fishman, C. Kouveliotou, & C. Meegan.* 445, 348, 137-C9 (1995)

Double Core Evolution. VII. The Infall of a Neutron Star through the Envelope of Its Massive Star Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 445, 367, 137-E9 (1995)

Thermal Cyclotron Absorption Coefficients. II. Opacities in the Stokes Formalism. *H. M. Väth & G. Chanmugam.* 98, 295, 26-A9 (1995)

Magnetic Compton-induced Pair Cascade Model for Gamma-Ray Pulsars. *Steven J. Sturner, Charles D. Dermer, & F. Curtis Michel.* 445, 736, 145-D1 (1995)

Observational Constraints on the Maximum Neutron Star Mass. *H. A. Bethe & G. E. Brown.* 445, L129, 151-E1 (1995)

Superfluid Core Rotation in Pulsars. I. Vortex Cluster Dynamics. *Armen D. Sedrakian & David M. Sedrakian.* 447, 305, 176-F1 (1995)

Superfluid Core Rotation in Pulsars. II. Postjump Relaxations. *A. D. Sedrakian, D. M. Sedrakian, J. M. Cordes, & Yervant Terzian.* 447, 324, 176-G10 (1995)

The Galactic Distribution of Low-Mass X-Ray Binaries. *J. van Paradijs & N. White.* 447, L33, 181-A3 (1995)

Gamma-Ray Bursts from Minijets. *Nir J. Shaviv & Arnon Dar.* 447, 863, 187-G1 (1995)

The Synchrotron Self-Compton Model for X-Ray and γ-Ray Emission from Pulsars. *K. S. Cheng & D. M. Wei.* 448, 281, 196-B1 (1995)

Discrete Mass Loss in a Low-Mass Binary with a Rapidly Spinning Neutron Star. *Alexander Muslimov & Marek J. Sarna.* 448, 289, 196-B12 (1995)

Frictional Heating and Neutron Star Thermal Evolution. *Kenneth A. Van Riper, Bennett Link, & Richard I. Epstein.* 448, 294, 196-C6 (1995)

Constraints on Hydrostatic Models of Soft Gamma-Ray Repeaters. *M. Coleman Miller.* 448, L29, 199-F5 (1995)

Prompt Subsidence of a Proto–Neutron Star into a Black Hole. *N. K. Glendenning.* 448, 797, 205-G9 (1995)

Nonradial Oscillations in Neutron Star Oceans: A Source of Quasi-periodic X-Ray Oscillations? *Lars Bildsten & Curt Cutler.* 449, 800, 223-F12 (1995)

Dynamics and Interactions of Binaries and Neutron Stars in Globular Clusters. *Steinn Sigurdsson & E. S. Phinney.* 99, 609, 43-D7 (1995)

From Strange Stars to Strange Dwarfs. *N. K. Glendenning, Ch. Kettner, & F. Weber.* 450, 253, 231-E1 (1995)

Millisecond Pulsars: Detectable Sources of Continuous Gravitational Waves? *Kimberly C. B. New, G. Chanmugam, Warren W. Johnson, & Joel E. Tohline.* 450, 757, 241-B9 (1995)

Bound-Bound Transitions in Strongly Magnetized Hydrogen Plasma. *George G. Pavlov & Alexander Y. Potekhin.* 450, 883, 243-B6 (1995)

Geminga's Soft X-Ray Emission and the Structure of Its Surface. *Dany Page, Yu. A. Shibanov, & V. E. Zavlin.* 451, L21, 252-D4 (1995)

A Model of the Galactic X-Ray Binary Population. II. Low-Mass X-Ray Binaries in the Galactic Disk. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 100, 233, 49-C5 (1995)

Parity Nonconservation and Neutrino Transport in Magnetic Fields. *Alexander Vilenkin.* 451, 700, 256-G4 (1995)

Old Isolated Accreting Neutron Stars: Contribution to the Soft X-Ray Background in the 0.5–2 keV Band. *Silvia Zane, Roberto Turolla, Luca Zampieri, Monica Colpi, & Aldo Treves.* 451, 739, 257-D2 (1995)

Synchrotron Self-Absorption Model of the Soft Gamma-Ray Repeater 1806−20. *Edison P. Liang & Edward Fenimore.* 451, L57, 260-D13 (1995)

Nucleation of a Dense Plasma and Crystallization of Neutron Star Crusts. *F. V. De Blasio.* 452, 359, 267-A13 (1995)

Advection-dominated Accretion: Underfed Black Holes and Neutron Stars. *Ramesh Narayan & Insu Yi.* 452, 710, 274-D13 (1995)

Spin-Orbit Interactions in Neutron Star/Main-Sequence Binaries and Implications for Pulsar Timing. *Dong Lai, Lars Bildsten, & Victoria M. Kaspi.* 452, 819, 276-A1 (1995)

Spin-down of Neutron Stars in Massive Radio Pulsar Binaries: The Periastron Passage of PSR B1259−63. *Pranab Ghosh.* 453, 411, 286-F13 (1995)

X-Ray Detection of PSR B1259−63 at Periastron. *V. M. Kaspi, M. Tavani, F. Nagase, M. Hirayama, M. Hoshino, T. Aoki, N. Kawai, & J. Arons.* 453, 424, 287-A1 (1995)

Ohmic Decay of Magnetic Fields Generated by Currents in the Crusts of Neutron Stars. *C. J. Pethick & M. Sahrling.* 453, L29, 289-F2 (1995)

Accreting, Isolated Neutron Stars. III. Preheating of Infalling Gas and Cometary H II Regions. *Omer Blaes, Orlando Warren, & Piero Madau.* 454, 370, 304-D3 (1995)

Evolution of the Double Neutron Star Merging Rate and the Cosmological Origin of Gamma-Ray Burst Sources. *V. M. Lipunov, K. A. Postnov, M. E. Prokhorov, I. E. Panchenko, & H. E. Jørgensen.* 454, 593, 309-F3 (1995)

X-Ray Spectra of Z Sources. *Dimitrios Psaltis, Frederick K. Lamb, & Guy S. Miller.* 454, L137, 316-D9 (1995)

Spectroscopy of the White Dwarf Companions of PSR 0655+64 and PSR 0820+02. *M. H. van Kerkwijk & S. R. Kulkarni.* 454, L141, 316-E3 (1995)

Photon Splitting in Strongly Magnetized Cosmic Objects—Revisited. *Günter Wunner, Robert Sang, & Dagmar Berg.* 455, L51, 325-B8 (1995)

Spectral Properties of Accretion Disks around Galactic and Extragalactic Black Holes. *Sandip Chakrabarti & Lev G. Titarchuk.* 455, 623, 330-E1 (1995)

Discovery of a Candidate Isolated Neutron Star in a New Supernova Remnant near CTB 1. *Charles J. Hailey & William W. Craig.* 455, L151, 334-B12 (1995)

STARS: NOVAE

PW Vulpeculae: A Nova with Nearly Solar Abundances. *Pedro Saizar, Sumner Starrfield, Gary J. Ferland, R. Mark Wagner, James W. Truran, Scott J. Kenyon, Warren M. Sparks, Robert E. Williams, & L. L. Stryker.* 367, 310, 15-G11 (1991)

Nitrogen Recombination Lines and Abundance in Nova Shells. *Vladimir Escalante & Alexander Dalgarno.* 369, 213, 38-E7 (1991)

On the Expected Orbital Period Change in the Next Outburst of the Recurrent Nova T Pyxidis. *Mario Livio.* 369, L5, 40-A13 (1991)

The Formation of ^{26}Al Nova Explosions. *Irit Nofar, Giora Shaviv, & Sumner Starrfield.* 369, 440, 43-B11 (1991)

Theoretical Light Curve for the Recurrent Nova RS Ophiuchi—Determination of the White Dwarf Mass, Composition, and Distance. *Mariko Kato.* 369, 471, 43-E6 (1991)

Faint Object Camera Observations of a Globular Cluster Nova Field. *Bruce Margon, Scott F. Anderson, Ronald A. Downes, Ralph C. Bohlin, & Peter Jakobsen.* 369, L71, 46-C1 (1991)

Multiwavelength Observations of Nova LMC 1990 Number 2: The First Extragalactic Recurrent Nova. *Steven N. Shore, George Sonneborn, Sumner G. Starrfield, M. Hamuy, R. E. Williams, A. Cassatella, & H. Drechsel.* 370, 193, 49-E8 (1991)

A Search for Periodicities in the X-Ray Emission from Cataclysmic Variables. *Michael Eracleous, Joseph Patterson, & Jules Halpern.* 370, 330, 51-D1 (1991)

Helium Star Cataclysmics. *Icko Iben, Jr., & Alexander V. Tutukov.* 370, 615, 56-B5 (1991)

Synchronization of the Magnetic Nova V1500 Cygni. *Gary D. Schmidt & H. S. Stockman.* 371, 749, 70-G7 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

Is Drag Luminosity Effective in Recurrent Novae? *Mariko Kato & Izumi Hachisu.* 373, 620, 95-F1 (1991)

Thermal X-Ray Emission from Classical Novae in Optical Decline. *James MacDonald & Stéphane Vennes.* 373, L51, 97-C4 (1991)

High-Speed Photometry of V404 Cygni in Outburst. *Eric Gotthelf, Joseph Patterson, & Richard J. Stover.* 374, 340, 102-C11 (1991)

The Common Envelope Phase in Classical Novae: One-dimensional Models. *Anurag Shankar, Mario Livio, & James W. Truran.* 374, 623, 106-G6 (1991)

V1500 Cygni: A Prediction. *J. I. Katz.* 374, L59, 110-D11 (1991)

A Search for the 478 keV Line from the Decay of Nucleosynthetic ^{7}Be. *Michael J. Harris, Mark D. Leising, & Gerald H. Share.* 375, 216, 113-F5 (1991)

Diffusion and Mixing in Classical Nova Precursors. *Icko Iben, Jr., Masayuki Y. Fujimoto, & Jim MacDonald.* 375, L27, 117-D1 (1991)

Are Hypernovae Detectable? *Seok Jae Park & Ethan T. Vishniac.* 375, 565, 119-F9 (1991)

The White Dwarf Mass Distribution in Classical Nova Systems. *Hans Ritter, Michael Politano, Mario Livio, & Ronald F. Webbink.* 376, 177, 127-B10 (1991)

The Evolution and Classification of Postoutburst Novae Spectra. *R. E. Williams, M. Hamuy, M. M. Phillips, S. R. Heathcote, Lisa Wells, & M. Navarrete.* 376, 721, 135-C7 (1991)

Optical Identification of the X-Ray Source GS 2023+338 as V404 Cygni. *R. Mark Wagner, Sumner G. Starrfield, Steve B. Howell, Tobias J. Kreidl, S. J. Bus, A. Cassatella, R. Bertram, & R. Fried.* 378, 293, 154-E10 (1991)

Effects of Drag Luminosity in the Common Envelope Phase of Slow Novae. *Mariko Kato & Izumi Hachisu.* 383, 761, 223-F3 (1991)

Hopkins Ultraviolet Telescope Observations of Nova Circini 1995 and Nova Aquilae 1995. *Bradford W. Greeley, William P. Blair, & Knox S. Long.* 454, L43, 308-B1 (1995)

STARS: NOVAE, CATACLYSMIC VARIABLES

The Formation of Coronal Regions in Accretion Disks. *Stephen D. Murray & Douglas N. C. Lin.* 384, 177, 3-B9 (1992)

On the Certification of AM Canum Venaticorum as a Cataclysmic Variable. *Joseph Patterson, Emily Sterner, Jules P. Halpern, & John C. Raymond.* 384, 234, 3-G6 (1992)

Disk Instability and Outburst Properties of the Intermediate Polar GK Persei. *Soon-Wook Kim, J. Craig Wheeler, & Shin Mineshige.* 384, 269, 4-C7 (1992)

On Mass-Transfer Rates in Classical Nova Precursors. *Icko Iben, Jr., Masayuki Y. Fujimoto, & Jim MacDonald.* 384, 580, 9-D1 (1992)

The Peculiar, Fast Nova Herculis 1991. *Charles E. Woodward, R. D. Gehrz, Terry J. Jones, & G. F. Lawrence.* 384, L41, 11-C1 (1992)

Eclipse Studies of the Dwarf Nova HT Cassiopeiae. II. White Dwarf and Accretion Disk. *Janet H. Wood, Keith Horne, & Stephane Vennes.* 385, 294, 15-E6 (1992)

Classical Nova Models with Accretion Heating at Accretion Rates of 10^{-9} and 10^{-10} $M\odot$ per Year. *Dina Prialnik & Attay Kovetz.* 385, 665, 21-D1 (1992)

The Presence of an Accretion Disk in the Eclipsing Binary System Nova Herculis 1991 Three Weeks after Outburst. *Elia M. Leibowitz, Haim Mendelson, Ezra Mashal, Dina Prialnik, & Waltraut C. Seitter.* 385, L49, 23-D1 (1992)

Spectroscopic Confirmation of High Galactic Latitude Cataclysmic Variables. *Paula Szkody & Steve B. Howell.* 78, 537, 10-C3 (1992)

TT Crateris: A Long-Period, Double-lined Dwarf Nova. *Paula Szkody, Robert E. Williams, Bruce Margon, Steve B. Howell, & Mario Mateo.* 387, 357, 41-D4 (1992)

Diffusion and Mixing in Accreting White Dwarfs. *Icko Iben, Jr., Masayuki Y. Fujimoto, & Jim MacDonald.* 388, 521, 56-F11 (1992)

Spectroscopic Observations of the Cataclysmic Variable PG 0917+342: An Ultra–Short-Period Nova-like System. *Danuta Dobrzycka & Steve B. Howell.* 388, 614, 57-G6 (1992)

Rare Thermonuclear Explosions in Short-Period Cataclysmic Variables, with Possible Application to the Nova-like Red Variable in the Galaxy M31. *Icko Iben, Jr., & Alexander V. Tutukov.* 389, 369, 64-E1 (1992)

Fe II Fluorescence and Anomalous C IV Doublet Intensities in Symbiotic Novae. *A. G. Michalitsianos, M. Kafatos, & S. R. Meier.* 389, 649, 69-D12 (1992)

Type I Supernovae and Accretion-induced Collapses from Cataclysmic Variables? *Mario Livio & James W. Truran.* 389, 695, 70-A10 (1992)

Spectral Evolution of Accretion Disks of Dwarf Novae. III. Outburst Cycle of SS Cygni. *F. H. Cheng & D. N. C. Lin.* 389, 714, 70-C5 (1992)

Possible Observational Consequences of Primordial Binaries in Globular Clusters. *Ronald E. Taam & D. N. C. Lin.* 390, 440, 80-G6 (1992)

Periodic Variability in the Optical Counterpart of X-Ray Nova Muscae 1991. *Charles D. Bailyn.* 391, 298, 89-F1 (1992)

Disk Instability and the Time-dependent X-Ray Emission from the Intermediate Polar GK Persei. *Insu Yi, Soon-Wook Kim, Ethan T. Vishniac, & J. Craig Wheeler.* 391, L25, 92-B6 (1992)

X-Ray to Infrared Observations of the Cataclysmic Variable KO Velorum (E1013−477). *R. M. Sambruna, L. Chiappetti, A. Treves, J. M. Bonnet-Bidaud, P. Bouchet, L. Maraschi, C. Motch, M. Mouchet, & S. Van Amerongen.* 391, 750, 97-C9 (1992)

A Prediction of the γ-Ray Flux from Nova Herculis 1991. *Sumner Starrfield, Steven N. Shore, Warren M. Sparks, George Sonneborn, James W. Truran, & Michael Politano.* 391, L71, 99-E5 (1992)

Incorporation of Density Fluctuations into Photoionization Calculations. *Robert E. Williams.* 392, 99, 102-C1 (1992)

Rapid Oscillations in Cataclysmic Variables. VIII. YY Draconis (=3A 1148+719. *J. Patterson, D. A. Schwartz, J. P. Pye, W. P. Blair, G. A. Williams, & J.-P. Caillault.* 392, 233, 103-G3 (1992)

Superhump Timing in SU Ursae Majoris Systems: Implications of the Data for the Precessing Disk Model. *Lawrence A. Molnar & Henry A. Kobulnicky.* 392, 678, 110-F3 (1992)

Upper Limits for CO in the Old Galactic Novae NQ Vulpeculae, QU Vulpeculae, and Nova Vulpeculae 1987 from IRAM Observations. *Steven N. Shore & Jonathan Braine.* 392, L59, 113-C1 (1992)

The 0623+71 Bow Shock Nebula. *J. M. Hollis, R. J. Oliversen, R. M. Wagner, & W. A. Feibelman.* 393, 217, 116-G3 (1992)

The Nature of the Recurrent Nova T Coronae Borealis: Ultraviolet Evidence for a White Dwarf Accretor. *Pier Luigi Selvelli, Angelo Cassatella, & Roberto Gilmozzi.* 393, 289, 117-F12 (1992)

Spherically Symmetric, Expanding, Non–LTE Model Atmospheres for Novae during Their Early Stages. *P. H. Hauschildt, R. Wehrse, S. Starrfield, & G. Shaviv.* 393, 307, 118-A4 (1992)

Classical Novae and the Extragalactic Distance Scale. *Mario Livio.* 393, 516, 122-C1 (1992)

Eclipse Maps of the Accretion Disk in the Classical Nova V Persei. *Janet H. Wood, Timothy M. C. Abbott, & Allen W. Shafter.* 393, 729, 124-G10 (1992)

On the Role of Radioactive Decays in Powering Gamma Rays and X-Rays from Novae. *Mario Livio, Apostolos Mastichiadis, Hakki Ögelman, & James W. Truran.* 394, 217, 130-F5 (1992)

The Role of the Dwarf Nova Period Distribution in Understanding the Evolution of Cataclysmic Variables. *Allen W. Schafter.* 394, 268, 131-C12 (1992)

Thermonuclear Runaways in Nova Outbursts. *Anurag Shankar, David Arnett, & Bruce A. Fryxell.* 394, L13, 133-C1 (1992)

The Photometric Period of the Recurrent Nova T Pyxidis. *Bradley E. Schaefer, Arlo U. Landolt, Nikolaus Vogt, David Buckley, Brian Warner, Alistair R. Walker, & Howard E. Bond.* 81, 321, 39-C9 (1992)

Discovery and X-Ray Properties of GS 1124−683 (=Nova Muscae). *Shunji Kitamoto, Hiroshi Tsunemi, Sigenori Miyamoto, & Kiyoshi Hayashida.* 394, 609, 137-A6 (1992)

Light-Curve Analysis of Classical Novae. *Mariko Kato & Icko Iben, Jr.* 394, L47, 139-C7 (1992)

The Spectroscopic and Photometric Evolution of Novae in the Bulge of M31. *Austin B. Tomaney & Allen W. Shafter.* 81, 683, 45-C11 (1992)

Spectroscopy of the Recurrent Nova U Scorpii. *Helen M. Johnston & Shrinivas R. Kulkarni.* 396, 267, 158-D4 (1992)

The *Hubble Space Telescope* Observations of X-Ray Nova Muscae 1991 and Its Spectral Evolution. *F. H. Cheng, Keith Horne, N. Panagia, C. R. Shrader, R. Gilmozzi, F. Paresce, & N. Lund.* 397, 664, 179-C11 (1992)

Radiative Equilibrium in Rapidly Expanding Shells. *P. H. Hauschildt.* 398, 224, 184-E9 (1992)

8–13 Micron Spectroscopy of Nova Herculis 1991. *David K. Lynch, John A. Hackwell, & Ray W. Russell.* 398, 632, 192-A5 (1992)

A Multiwavelength Study of Nova QU Vulpeculae 1984. *Pedro Saizar, Sumner Starrfield, Gary J. Ferland, R. Mark Wagner, James W. Truran, Scott J. Kenyon, Warren M. Sparks, Robert E. Williams, & L. L. Stryker.* 398, 651, 192-B13 (1992)

Constraints on Element Mixing in Classical Novae. *Masayuki Y. Fujimoto & Icko Iben, Jr.* 399, 646, 206-A1 (1992)

Two Unusual Cataclysmic Variables at High Galactic Latitude: CP Eridani and AL Comae. *Timothy M. C. Abbott, Edward L. Robinson, Gary J. Hill, & Carole A. Haswell.* 399, 680, 206-D1 (1992)

Radio Observations of the 1989 Transient Event in V404 Cygni (= GS 2023+338). *Xiaohong Han & R. M. Hjellming.* 400, 304, 212-F6 (1992)

The Infrared Counterpart of the Eclipsing X-Ray Binary H0253+193. *B. Zuckerman, E. E. Becklin, I. S. McLean, & Joseph Patterson.* 400, 665, 218-F7 (1992)

The Peculiar Infrared Temporal Development of Nova Vulpeculae 1987 (QV Vulpeculae). *R. D. Gehrz, T. J. Jones, C. E. Woodward, M. A. Greenhouse, R. M. Wagner, T. E. Harrison, T. L. Hayward, & J. Benson.* 400, 671, 218-G1 (1992)

Dynamics of Eccentric Disks with Application to Superhump Binaries. *Stephen H. Lubow.* 401, 317, 225-A1 (1992)

AE Aquarii: An Emitter of Pulsed TeV Gamma Rays Resembling Optical Emission during Flares. *P. J. Meintjes, B. C. Raubenheimer, O. C. de Jager, C. Brink, H. I. Nel, A. R. North, G. van Urk, & B. Visser.* 401, 325, 225-A11 (1992)

Possible First Detection of Ultraviolet Pulses from an Intermediate Polar: V603 Aquila. *A. Schwarzenberg-Czerny, A. Udalski, & R. Monier.* 401, L19, 227-C7 (1992)

A Search for Circular Polarization in Cataclysmic Variables. *H. S. Stockman, Gary D. Schmidt, G. Berriman, James Liebert, R. L. Moore, & D. T. Wickramasinghe.* 401, 628, 230-C13 (1992)

On the Long-Term Behavior of SS Cygni. *John K. Cannizzo & Janet A. Mattei.* 401, 642, 230-E1 (1992)

Another Neon Nova: Early Infrared Photometry and Spectroscopy of Nova Cygni 1992. *T. L. Hayward, R. D. Gehrz, J. W. Miles, & J. R. Houck.* 401, L101, 233-D5 (1992)

A Spectroscopic Study of DV Ursae Majoris (US 943), AY Piscium (PG 0134+070), and V503 Cygni. *Paula Szkody & Steve B. Howell.* 403, 743, 25-A6 (1993)

Observations of the White Dwarf in the U Geminorum System with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Charles W. Bowers, Arthur F. Davidsen, Gerard A. Kriss, Edward M. Sion, & Ivan Hubeny.* 405, 327, 45-C1 (1993)

Multiple Hydrogen Flashes on Accreting Low-Mass White Dwarfs: Novae and DAO Stars. *Michael M. Shara, Dina Prialnik, & Attay Kovetz.* 406, 220, 57-G1 (1993)

Optical Spectrophotometry of Oscillations and Flickering in AE Aquarii. *William F. Welsh, Keith Horne, & J. B. Oke.* 406, 229, 57-G12 (1993)

A Model for the Dramatic Decline of FG Sagittae. *Icko Iben, Jr., & Mario Livio.* 406, L15, 60-F8 (1993)

The Spectrum and Variability of Radio Emission from AE Aquarii. *Meil Abada-Simon, Alain Lecacheux, Tim S. Bastian, Jay A. Bookbinder, & George A. Dulk.* 406, 692, 66-D12 (1993)

Nova V2214 Ophiuchi 1988: A Magnetic Nova inside the Period Gap. *R. Baptista, F. J. Jablonski, D. Cieslinski, & J. E. Steiner.* 406, L67, 68-D9 (1993)

Winds from Accretion Disks: Ultraviolet Line Formation in Cataclysmic Variables. *Isaac Shlosman & Peter Vitello.* 409, 372, 101-F1 (1993)

The 1991 V603 Aquilae Campaign: Superhumps and *P*-Dots. *Joseph Patterson, Gino Thomas, David R. Skillman, & Marcos Diaz.* 86, 235, 17-B7 (1993)

On the Mass of Nova DQ Herculis (1934). *Keith Horne, William F. Welsh, & Richard A. Wade.* 410, 357, 116-E1 (1993)

On the Location of the Oscillations in AE Aquarii. *William F. Welsh, Keith Horne, & Richard Gomer.* 410, L39, 118-D1 (1993)

Ultraviolet Line Diagnostics of Accretion Disk Winds in Cataclysmic Variables. *Peter Vitello & Isaac Shlosman.* 410, 815, 123-G11 (1993)

A Supersoft Variable Low-Luminosity X-Ray Source in the Globular Cluster M3. *P. Hertz, J. E. Grindlay, & C. D. Bailyn.* 410, L87, 126-A1 (1993)

The Optical Light Curve of Nova Herculis 1991 and of Other Classical Novae. *Elia M. Leibowitz.* 411, L29, 134-A1 (1993)

The Physical Properties of a Slow Nova in the Bulge of M31. *Austin B. Tomaney & Allen W. Shafter.* 411, 640, 137-F3 (1993)

Broad-Band X-Ray Telescope Observations of the Magnetic Cataclysmic Variable H0538+608 = BY Camelopardalis. *T. R. Kallman, E. M. Schlegel, P. J. Serlemitsos, R. Petre, F. Marshall, K. Jahoda, E. A. Boldt, S. S. Holt, R. F. Mushotzky, J. Swank, A. E. Szymkowiak, R. L. Kelley, A. Smale, K. Arnaud, K. Weaver, & F. B. Paerels.* 411, 869, 140-E12 (1993)

CP Puppis: No Ordinary Old Nova. *James C. White II, R. Kent Honeycutt, & Keith Horne.* 412, 278, 145-E6 (1993)

Mass Transfer Rate and Outburst Cycle of SS Cygni. *Alexander Hempelmann & Jürgen Kurths.* 412, L41, 148-E1 (1993)

Extreme Ultraviolet Explorer Observations of the Magnetic Cataclysmic Variable RE 1938−461. *John K. Warren, John V. Vallerga, Christopher W. Mauche, Koji Mukai, & Oswald H. W. Siegmund.* 414, L69, 185-D2 (1993)

On the Interpretation of the Ultraviolet Spectra of Symbiotic Stars and Recurrent Novae. I. *Steven N. Shore & Jason P. Aufdenberg.* 416, 355, 205-D10 (1993)

Superhumps in Cataclysmic Binaries. II. PG 0917+342. *David R. Skillman & Joseph Patterson.* 417, 298, 221-B13 (1993)

Nova Herculis 1991: Thermonuclear Runaway on a Massive ONeMg White Dwarf. *Thomas Matheson, Alexei V. Filippenko, & Luis C. Ho.* 418, L29, 238-D6 (1993)

The *EXOSAT* Medium Energy (ME) Sample of Dwarf Novae. *K. Mukai & K. Shiokawa.* 418, 863, 243-C12 (1993)

The Accretion Disk Limit Cycle Model: Toward an Understanding of the Long-Term Behavior of SS Cygni. *John K. Cannizzo.* 419, 318, 250-B10 (1993)

Quasi-periodic Oscillations in the Cataclysmic Variable KR Aurigae. *Jyoti Singh, P. Vivekananda Rao, P. C. Agrawal, K. M. V. Apparao, R. K. Manchanda, B. B. Sanwal, & M. B. K. Sarma.* 419, 337, 250-D3 (1993)

The Evolution of Accreting Stars with Turbulent Mixing. *M. Y. Fujimoto.* 419, 768, 257-B13 (1993)

The Quasi-periodic Oscillations of VV Puppis. *James N. Imamura, John Middleditch, Jeffrey D. Scargle, Thomas Y. Steiman-Cameron, Laura A. Whitlock, Michael T. Wolff, & Kent S. Wood.* 419, 793, 257-E1 (1993)

Evidence for Accretion Disk Precession in the Cataclysmic Binary AM Canum Venaticorum. *Joseph Patterson, Jules Halpern, & Anouk Shambrook.* 419, 803, 257-E13 (1993)

A Hot Neon Nova: Optical Spectrophotometry and the Physics of Nova Cygni 1992. *A. J. Barger, J. S. Gallagher, K. S. Bjorkman, K. A. Johansen, & K. H. Nordsieck.* 419, L85, 259-E12 (1993)

The Masses of V838 Herculis (Nova Herculis 1991) and QZ Aurigae. *Paula Szkody & Doug Ingram.* 420, 830, 13-C3 (1994)

The Early Bolometric Evolution of Nova Cygni 1992. *Steven N. Shore, George Sonneborn, Sumner Starrfield, Rosario Gonzalez-Riestra, & Ronald S. Polidan.* 421, 344, 20-B13 (1994)

The Tololo Nova Survey: Spectra of Recent Novae. *R. E. Williams, M. M. Phillips, & M. Hamuy.* 90, 297, 5-F1 (1994)

The Temporal Evolution of the 4–14 Micron Spectrum of V1974 Cygni (Nova Cygni 1992). *R. D. Gehrz, Charles E. Woodward, M. A. Greenhouse, S. Starrfield, D. H. Wooden, F. C. Witteborn, S. A. Sandford, L. J. Allamandola, J. D. Bregman, & M. Klapisch.* 421, 762, 27-F6 (1994)

The 1992 Outburst of the SU Ursae Majoris–Type Dwarf Nova HV Virginis. *Elia M. Leibowitz, Haim Mendelson, Albert Bruch, Hilmar W. Duerbeck, Waltraut C. Seitter, & Gerold A. Richter.* 421, 771, 27-G3 (1994)

On High Mass Accretion Rates in Magnetized Column Accretion onto White Dwarfs. *Insu Yi.* 422, 289, 33-F5 (1994)

Non–LTE Model Atmosphere Analysis of Nova Cygni 1992. *P. H. Hauschildt, S. Starrfield, S. Austin, R. M. Wagner, S. N. Shore, & G. Sonneborn.* 422, 831, 42-C1 (1994)

Predictions of a Population of Cataclysmic Variables in Globular Clusters. *R. Di Stefano & S. Rappaport.* 423, 274, 49-D13 (1994)

On the Progenitors of Type Ia Supernovae in Early-Type and Late-Type Galaxies. *Massimo Della Valle & Mario Livio.* 423, L31, 53-E3 (1994)

Accretion onto a 1.4 $M_{\odot}$ White Dwarf: Classical Nova, Recurrent Nova, or Supernova? *Attay Kovetz & Dina Prialnik.* 424, 319, 65-G1 (1994)

Optical, *IUE*, and *ROSAT* Observations of the Eclipsing Nova-like Variable V347 Puppis (LB 1800). *Christopher W. Mauche, John C. Raymond, David A. H. Buckley, Martine Mouchet, Jerry Bonnell, Denis J. Sullivan, Jean-Marc Bonnet-Bidaud, & Wolfram H. Bunk.* 424, 347, 66-B12 (1994)

Ultraviolet Photometry of Nova Cygni 1992 Obtained with the High Speed Photometer. *M. Taylor, R. C. Bless, H. Ögelman, J. L. Elliot, J. S. Gallagher, M. J. Nelson, J. W. Percival, E. L. Robinson, & G. W. van Citters.* 424, L45, 69-F6 (1994)

Cooling of the White Dwarf in U Geminorum between Outbursts. *Knox S. Long, Edward M. Sion, Min Huang, & Paula Szkody.* 424, L49, 69-F13 (1994)

Disk-Overflow Accretion in GK Persei? *Coel Hellier & Mario Livio.* 424, L57, 69-G12 (1994)

Localization and Spectrum of the X-Ray Transient Source GRS 1915+105. *A. Finoguenov, E. Churazov, M. Gilfanov, R. Sunyaev, A. Vikhlinin, A. Dyachkov, N. Khavenson, I. Tserenin, M. C. Schmitz-Fraysse, M. Denis, J. P. Roques, P. Mandrou, A. Claret, J. Ballet, B. Cordier, & A. Goldwurm.* 424, 940, 76-D10 (1994)

1H 1752+081: An Eclipsing Cataclysmic Variable with a Small Accretion Disk. *Andrew D. Silber, Ronald A. Remillard, Keith Horne, & Hale V. Bradt.* 424, 955, 76-F3 (1994)

A Broad Observational Study of the Eclipsing Magnetic Cataclysmic Variable RE 2107−05. *Jason Glenn, Steve B. Howell, Gary D. Schmidt, James Liebert, Albert D. Grauer, & R. Mark Wagner.* 424, 967, 76-G3 (1994)

The *K*-Band Surface Brightness of Late-Type Stars and the Distance to Cataclysmic Variables. *Tod F. Ramseyer.* 425, 243, 83-C5 (1994)

Spectropolarimetry of Nova Cygni 1992: Evidence for an Asymmetric Geometry. *K. S. Bjorkman, K. A. Johansen, K. H. Nordsieck, J. S. Gallagher, & A. J. Barger.* 425, 247, 83-C12 (1994)

On the Magnetic Nature of GQ Muscae. *M. P. Diaz & J. E. Steiner.* 425, 252, 83-D5 (1994)

Hot Gas and the Origin of the Nebular Continuum in Novae. *Pedro Saizar & Gary J. Ferland.* 425, 755, 91-B10 (1994)

ROSAT Observations of Cataclysmic Variables: A Search for the Boundary Layer Emission. *S. D. Vrtilek, A. Silber, J. C. Raymond, & J. Patterson.* 425, 787, 91-E8 (1994)

On the Interpretation and Implications of Nova Abundances: An Abundance of Riches or an Overabundance of Enrichments. *Mario Livio & James W. Truran.* 425, 797, 91-F6 (1994)

Concurrent X-Ray and Optical Observations of Two Dwarf Novae during Eruption. *A. Silber, S. D. Vrtilek, & J. C. Raymond.* 425, 829, 92-B1 (1994)

The High-State/Low-State Transition in V794 Aquilae. *R. Kent Honeycutt, John K. Cannizzo, & Jeff W. Robertson.* 425, 835, 92-B9 (1994)

Extinction, Ejecta Masses, and Radial Velocities of Novae. *Robert E. Williams.* 426, 279, 99-E8 (1994)

1ES 1113+432: Luminous, Soft X-Ray Outburst from a Nearby Cataclysmic Variable (AR Ursae Majoris). *R. A. Remillard, J. F. Schachter, A. D. Silber, & P. Slane.* 426, 288, 99-F5 (1994)

HST Eclipse Mapping of Dwarf Nova OY Carinae in Quiescence: An "Fe II Curtain" with Mach $\simeq$ 6 Velocity Dispersion Veils the White Dwarf. *Keith Horne, T. R. Marsh, F. H. Cheng, Ivan Hubeny, & Thierry Lanz.* 426, 294, 99-G1 (1994)

Simultaneous Soft and Hard X-Ray Spectroscopy of AM Herculis with *EXOSAT*: Discovery of Photospheric Absorption Features. *Frits Paerels, John Heise, & André van Teeseling.* 426, 313, 100-A10 (1994)

Observations of the Bright Novalike Variable IX Velorum with the Hopkins Ultraviolet Telescope. *Knox S. Long, Richard A. Wade, William P. Blair, Arthur F. Davidsen, & Ivan Hubeny.* 426, 704, 107-B13 (1994)

Three-dimensional Hydrodynamic Bondi-Hoyle Accretion. I. Code Validation and Stationary Accretors. *Maximilian Ruffert.* 427, 342, 114-B7 (1994)

Three-dimensional Hydrodynamic Bondi-Hoyle Accretion. II. Homogeneous Medium at Mach 3 with $\gamma = 5/3$. *Maximilian Ruffert & David Arnett.* 427, 351, 114-C3 (1994)

A Dwarf Nova in the Core of 47 Tucanae. *Francesco Paresce & Guido De Marchi.* 427, L33, 117-E6 (1994)

Star Spots and the Period Gap in Cataclysmic Variables. *M. Livio & J. E. Pringle.* 427, 956, 124-E2 (1994)

Magnetic Fields in Young Supernova Remnants. *Yu-Qing Lou.* 428, L21, 134-D2 (1994)

The X-Ray Selected Cataclysmic Variables H0459+246 and H0857−242. *R. A. Remillard, H. V. Bradt, R. J. V. Brissenden, D. A. H. Buckley, D. A. Schwartz, A. Silber, B. A. Stroozas, & I. R. Tuohy.* 428, 785, 140-A11 (1994)

A Wide-Field Monitor for *INTEGRAL*. *Niels Lund.* 92, 337, 36-C9 (1994)

Cataclysmic Binaries in Star Clusters. I. A Search for Erupting Dwarf Novae in the Globular Cluster M92. *Michael M. Shara, Louis E. Bergeron, & Anthony F. J. Moffat.* 429, 767, 155-C1 (1994)

ROSAT Observation of the Decline of V838 Herculis (Nova Herculis 1991). *Paula Szkody & D. W. Hoard.* 429, 857, 156-C12 (1994)

Hubble Space Telescope Goddard High-Resolution Spectrograph Observation of U Geminorum during Quiescence: Evidence for a Slowly Rotating White Dwarf. *Edward M. Sion, Knox S. Long, Paula Szkody, & Min Huang.* 430, L53, 165-G12 (1994)

Helium-accreting Degenerate Dwarfs as Presupernovae and Scenarios for the Ultrasoft X-Ray Sources. *Icko Iben, Jr., & A. V. Tutukov.* 431, 264, 179-D6 (1994)

The Photometric Period of V1974 Cygni (Nova Cygni 1992). *James A. DeYoung & Richard E. Schmidt.* 431, L47, 183-A3 (1994)

PX Andromedae and the SW Sexantis Phenomenon. *Coel Hellier & E. L. Robinson.* 431, L107, 191-G6 (1994)

An Atlas of Doppler Emission-Line Tomography of Cataclysmic Variable Stars. *Ronald H. Kaitchuck, Eric M. Schlegel, R. Kent Honeycutt, Keith Horne, T. R. Marsh, J. C. White II, & Cathy S. Mansperger.* 93, 519, 49-G3 (1994)

Reaction Rates and Reaction Sequences in the rp-Process. *L. Van Wormer, J. Görres, C. Iliadis, M. Wiescher, & F.-K. Thielemann.* 432, 326, 197-C1 (1994)

Laser Action in Far-Infrared Astrophysical Sources. *Jianfang Peng & Anil K. Pradhan.* 432, L123, 207-B7 (1994)

Thermonuclear Runaways in Nova Outbursts. II. Effect of Strong, Instantaneous, Local Fluctuations. *Anurag Shankar & David Arnett.* 433, 216, 211-A8 (1994)

The Ultraviolet Pulsations of the Cataclysmic Variable AE Aquarii as Observed with the *Hubble Space Telescope*. *Michael Eracleous, Keith Horne, Edward L. Robinson, Er-Ho Zhang, Thomas R. Marsh, & Janet H. Wood.* 433, 313, 212-C1 (1994)

Multicolor Eclipse Studies of UU Aquarii. I. Observations and System Parameters. *R. Baptista, J. E. Steiner, & D. Cieslinski.* 433, 332, 212-D8 (1994)

Simultaneous Optical and TeV Gamma-Ray Observations of the Cataclysmic Variable AE Aquarii. *P. J. Meintjes, O. C. de Jager, B. C. Raubenheimer, H. I. Nel, A. R. North, D. A. H. Buckley, & C. Koen.* 434, 292, 229-E1 (1994)

The Early Ultraviolet, Optical, and Radio Evolution of the Soft X-Ray Transient GRO J0422+32. *C. R. Shrader, R. Mark Wagner, R. M. Hjellming, X. H. Han, & S. G. Starrfield.* 434, 698, 237-D4 (1994)

On the Decay of Outbursts in Dwarf Novae and X-Ray Novae. *John K. Cannizzo.* 435, 389, 248-F11 (1994)

Dripping Handrails and the Quasi-periodic Oscillations of the AM Herculis Objects. *Thomas Y. Steiman-Cameron, Karl Young, Jeffrey D. Scargle, James P. Crutchfield, James N. Imamura, Michael T. Wolff, & Kent S. Wood.* 435, 775, 256-F10 (1994)

The Hard X-Ray Emission Spectra from Accretion Columns in Intermediate Polars. *Insu Yi & Ethan T. Vishniac.* 435, 829, 257-E1 (1994)

RJ 051542+0104.7: A New Magnetic, Eclipsing, Cataclysmic Variable. *Peter M. Garnavich, Paula Szkody, Russell M. Robb, David R. Zurek, & D. W. Hoard.* 435, L141, 260-C11 (1994)

ASCA Observations of SS Cygni during an Anomalous Outburst. *John A. Nousek, Christopher J. Baluta, Robin H. D. Corbet, Koji Makai, Julian P. Osborne, & Manabu Ishida.* 436, L19, 268-E7 (1994)

An Analytic Solution of the Radiative Transfer Equation for a Gray Scattering Atmosphere in Motion. *Shlomi Pistinner & Giora Shaviv.* 436, 837, 277-B13 (1994)

X-Ray Variability and Period Determinations in the Eclipsing Polar DP Leonis. *Craig R. Robinson & France A. Córdova.* 437, 436, 289-B4 (1994)

The Derived Population of Luminous Supersoft X-Ray Sources. *R. Di Stefano & S. Rappaport.* 437, 733, 295-G1 (1994)

The Heating of Nova Ejecta by Radioactive Decays of the β-unstable Nuclei. *Shlomi Pistinner, Giora Shaviv, & Sumner Starrfield.* 437, 794, 296-E4 (1994)

Optically Thick Winds in Nova Outbursts. *Mariko Kato & Izumi Hachisu.* 437, 802, 296-F1 (1994)

Infrared Photometry and Spectrophotometry of Nova Herculis 1991 (= V838 Herculis): Observations of the Formation of Dust in the Ejecta of a Very Fast Nova. *Thomas E. Harrison & Guy S. Stringfellow.* 437, 827, 297-A3 (1994)

The Evolutionary Thermal Response of a White Dwarf to Compressional Heating by Periodic Dwarf Nova Accretion Events. *Edward M. Sion.* 438, 876, 16-C1 (1995)

Nova Persei 1901: Detection of the Site of Its Brightest Light Echo. *R. W. Tweedy.* 438, 917, 16-F13 (1995)

The Temporal Evolution of the 1–5 Micron Spectrum of V1974 Cygni (Nova Cygni 1992). *Charles E. Woodward, Matthew A. Greenhouse, R. D. Gehrz, Y. J. Pendleton, R. R. Joyce, D. Van Buren, J. Fischer, N. J. Jennerjohn, & C. D. Kaminski.* 438, 921, 16-G7 (1995)

The Soft X-Ray Turnoff of Nova Muscae 1983. *L. Shanley, H. Ögelman, J. S. Gallagher, M. Orio, & J. Krautter.* 438, L95, 20-A8 (1995)

Gamma-Ray Emission from Cataclysmic Variables. I. The *Compton* EGRET Survey. *Eric M. Schlegel, Paul E. Barrett, O. C. De Jager, G. Chanmugam, S. Hunter, & J. Mattox.* 439, 322, 25-E10 (1995)

Consequential Angular Momentum Loss and the Period Gap of Cataclysmic Variables. *A. R. King & U. Kolb.* 439, 330, 25-F7 (1995)

Tremendous Outburst Amplitude Dwarf Novae. *Steve B. Howell, Paula Szkody, & John K. Cannizzo.* 439, 337, 25-G3 (1995)

The Neutral Oxygen Spectrum. II. Pumping by Hydrogen Lyman-β under the Optically Thin Condition: A First Application to the Classical Novae. *S. O. Kastner & A. K. Bhatia.* 439, 346, 26-A1 (1995)

Discovery of Candidate Cataclysmic Variables in the Post–Core-Collapse Globular Cluster NGC 6397. *Adrienne M. Cool, Jonathan E. Grindlay, Haldan N. Cohn, Phyllis M. Lugger, & Shawn D. Slavin.* 439, 695, 34-B10 (1995)

Hubble Space Telescope FOS Spectroscopy of the Ultrashort-Period Dwarf Nova WZ Sagittae: The Underlying Degenerate. *Edward M. Sion, F. H. Cheng, Knox S. Long, Paula Szkody, Ron L. Gilliland, Min Huang, & Ivan Hubeny.* 439, 957, 37-G3 (1995)

Asymmetric Mass Accretion in the Magnetic Cataclysmic Variable RE 1149+28. *Steve B. Howell, Martin M. Sirk, Roger F. Malina, J. P. D. Mittaz, & K. O. Mason.* 439, 991, 38-C11 (1995)

A Multicolor Eclipse Study of the Classical Nova QZ Aurigae (Nova Aurigae 1964). *R. D. Campbell & A. W. Shafter.* 440, 336, 45-G1 (1995)

The Long-Period AM Herculis–like Cataclysmic Variable RXJ 051541+0104.6. *Frederick M. Walter, Scott J. Wolk, & Nancy R. Adams.* 440, 834, 54-E10 (1995)

A Radial Velocity Study of the Dwarf Nova AR Andromedae: Comparison of the Quiescent and Outburst States. *A. W. Shafter, J. M. Veal, & E. L. Robinson.* 440, 853, 54-G10 (1995)

Detection of the Hot White Dwarf in the Magnetic Nova V1500 Cygni with the *Hubble Space Telescope*. *Gary D. Schmidt, James Liebert, & H. S. Stockman.* 441, 414, 65-A11 (1995)

BE Ursae Majoris: Precataclysmic Binary System and Planetary Nucleus. *James Liebert, R. W. Tweedy, R. Napiwotzki, & M. S. Fulbright.* 441, 424, 65-B11 (1995)

Cataclysmic and Close Binaries in Star Clusters. II. Probing the Core of NGC 6752 with *Hubble Space Telescope*. *Michael M. Shara, Laurent Drissen, Louis E. Bergeron, & Francesco Paresce.* 441, 617, 70-E10 (1995)

Hard X-Ray Variability of X-Ray Nova Persei 1992: *Granat*/SIGMA Results. *A. Vikhlinin, E. Churazov, M. Gilfanov, R. Sunyaev, A. Finoguenov, A. Dyachkov, R. Kremnev, K. Sukhanov, J. Ballet, A. Goldwurm, B. Cordier, A. Claret, M. Denis, J. F. Olive, J. P. Roques, & P. Mandrou.* 441, 779, 72-F7 (1995)

Observations of the X-Ray Nova GRO J0422+32. I. Outburst and the Decay to Quiescence. *Paul J. Callanan, Michael R. Garcia, Jeffrey E. McClintock, Ping Zhao, Ronald A. Remillard, Charles D. Bailyn, Jerome A. Orosz, B. Alan Harmon, & William S. Paciesas.* 441, 786, 72-G3 (1995)

Accretion Disk Boundary Layers in Cataclysmic Variables. I. Optically Thick Boundary Layers. *Robert Popham & Ramesh Narayan.* 442, 337, 81-F10 (1995)

Hubble Space Telescope Observations of the Dwarf Nova Z Chamaeleontis through Two Eruption Cycles. *E. L. Robinson, Janet H. Wood, R. C. Bless, J. C. Clemens, J. F. Dolan, J. L. Elliot, M. J. Nelson, J. W. Percival, M. J. Taylor, G. W. van Citters, & E. Zhang.* 443, 295, 99-C9 (1995)

An Extended Galactic Population of Low-Luminosity X-Ray Sources (CVs?) and the Diffuse X-Ray Background. *Eyal Maoz & Jonathan E. Grindlay.* 444, 183, 115-G11 (1995)

Mass Transfer Cycles in Cataclysmic Variables. *A. R. King, J. Frank, U. Kolb, & H. Ritter.* 444, L37, 121-F7 (1995)

A *Hubble Space Telescope* Study of the Underlying White Dwarf in the Dwarf Nova VW Hydri during Quiescence. *Edward M. Sion, Paula Szkody, Fu-Hua Cheng, & Min Huang.* 444, L97, 130-G8 (1995)

Optically Thick Winds: How Is the Mass Flux Determined? *S. Ami Glasner & F. X. Timmes.* 445, 411, 138-B13 (1995)

Hubble Space Telescope High-Resolution Spectroscopy of the Exposed White Dwarf in the Dwarf Nova VW Hydri in Quiescence: A Rapidly Rotating White Dwarf. *Edward M. Sion, Min Huang, Paula Szkody, & Fu-Hua Cheng.* 445, L31, 140-F3 (1995)

An Extended Grid of Multicycle Nova Evolution Models. *Dina Prialnik & Attay Kovetz.* 445, 789, 146-B3 (1995)

Extreme Ultraviolet Light Curves of UZ Fornacis: Evidence for Accretion Stream Absorption and Vertical Extent of the Accretion Spot. *John K. Warren, Martin M. Sirk, & John V. Vallerga.* 445, 909, 147-F13 (1995)

RX J0045.4+4154: A Recurrent Supersoft X-Ray Transient in M31. *N. E. White, P. Giommi, J. Heise, L. Angelini, & S. Fantasia.* 445, L125, 151-D5 (1995)

Convective Hydrogen Burning during a Nova Outburst. *S. Ami Glasner & E. Livne.* 445, L149, 151-G11 (1995)

Search for an Optical Counterpart of the Source of GRB 911001. *S. Klose.* 446, 357, 158-B6 (1995)

Periodic Outbursts in the Old Nova V446 Herculis. *R. K. Honeycutt, J. W. Robertson, & G. W. Turner.* 446, 838, 167-E13 (1995)

EUVE Observations of the Anomalous 1993 August Outburst of SS Cygni. *Christopher W. Mauche, John C. Raymond, & Janet A. Mattei.* 446, 842, 167-F7 (1995)

Stellar Variability in the Central Populations of 47 Tucanae from WF/PC Observations with the *Hubble Space Telescope*. I. Project Overview, Reduction Techniques, and First Results. *Ronald L. Gilliland, Peter D. Edmonds, Larry Petro, Abhijit Saha, & Michael M. Shara.* 447, 191, 174-G5 (1995)

An Improved Orbital Period for the Recurrent Nova U Scorpii. *Bradley E. Schaefer & F. A. Ringwald.* 447, L45, 181-C1 (1995)

A Model for the Galactic Population of Symbiotic Stars with White Dwarf Accretors. *L. Yungelson, M. Livio, A. Tutukov, & S. J. Kenyon.* 447, 656, 185-B10 (1995)

The Physics of Early Nova Spectra. *Peter H. Hauschildt, Sumner Starrfield, Steven N. Shore, France Allard, & E. Baron.* 447, 829, 187-D2 (1995)

Cataclysmic and Close Binaries in Star Clusters. III. Recovery of the Quiescent Nova 1860 A.D. (T Scorpii) in the Core of the Globular Cluster M80. *Michael M. Shara & Laurent Drissen.* 448, 203, 195-A1 (1995)

Taking the Pulse of DQ Herculis. *Phillip J. Martell, Keith Horne, Christopher M. Price, & Richard H. Gomer.* 448, 380, 197-D6 (1995)

Hubble Space Telescope and *R*-Band Eclipse Maps of the UX Ursae Majoris Accretion Disk. *R. Baptista, Keith Horne, R. W. Hilditch, K. O. Mason, & J. E. Drew.* 448, 395, 197-E13 (1995)

QU Vulpeculae: An Eclipsing Neon Nova in the Period Gap. *A. W. Shafter, K. A. Misselt, P. Szkody, & M. Politano.* 448, L33, 199-F13 (1995)

On the Origin of the Observed Knots in Novae. *Shlomi Pistinner & Giora Shaviv.* 448, L37, 199-G8 (1995)

Hydrodynamic Studies of Accretion onto Massive White Dwarfs: ONeMg-enriched Nova Outbursts. I. Dependence on White Dwarf Mass. *M. Politano, S. Starrfield, J. W. Truran, A. Weiss, & W. M. Sparks.* 448, 807, 206-A11 (1995)

Phase-resolved *IUE* and Optical Observations of the Polar BY Camelopardalis. *D. B. Zucker, J. C. Raymond, A. Silber, P. Mason, S. Curiel, S. Vrtilek, & E. Schlegel.* 449, 310, 214-D1 (1995)

The X-Ray Halo of Nova V1974 Cygni (Nova Cygni 1992) and the Nature of Interstellar Dust. *John S. Mathis, David Cohen, John P. Finley, & J. Krautter.* 449, 320, 214-E1 (1995)

A Study of the Long-Term Behavior of the SU Ursae Majoris Dwarf Novae VW Hydri and Z Chamaeleontis. *Pritiraj Mohanty & Eric M. Schlegel.* 449, 330, 214-F1 (1995)

ROSAT Observation of the Old Classical Nova CP Puppis. *Şölen Balman, Marina Orio, & Hakki Ögelman.* 449, L47, 216-F11 (1995)

High-Energy Gamma Rays from Polars. *P. Barrett, E. Schlegel, O. C. de Jager, & G. Chanmugam.* 450, 334, 232-E6 (1995)

Double Core Evolution. VIII. The Spiral-in of a Main-Sequence Star through the Envelope of an Asymptotic Giant Branch Companion. *Harold W. Yorke, Peter Bodenheimer, & Ronald E. Taam.* 451, 308, 250-B8 (1995)

Some Remarks about Nova Spectroscopy and Photometry. *Shlomi Pistinner, Giora Shaviv, Peter H. Hauschildt, & Sumner Starrfield.* 451, 724, 257-B12 (1995)

The Calibration of Novae as Distance Indicators. *Massimo Della Valle & Mario Livio.* 452, 704, 274-D4 (1995)

Properties of the Exceptionally Long-Period AM Herculis System RX J0515.41+0104.6. *J. Frank, J.-P. Lasota, & G. Chanmugam.* 453, 446, 287-C1 (1995)

Ultraviolet Observations of SW Ursae Majoris, BC Ursae Majoris, and TV Corvi (1217–18): *IUE* Spectroscopy and Outburst Light Curves. *Steve B. Howell, Paula Szkody, George Sonneborn, Robert Fried, Janet Mattei, Ronald J. Oliversen, Doug Ingram, & Guy M. Hurst.* 453, 454, 287-D1 (1995)

A New Magnetic Cataclysmic Variable: WGA J1047.1+6335. *K. P. Singh, P. Szkody, P. Barrett, N. E. White, E. Fierce, A. Silber, D. W. Hoard, P. J. Hakala, V. Piirola, & K. Sohl.* 453, L95, 298-F4 (1995)

The 71 Second Oscillation in the Light Curve of the Old Nova DQ Herculis. *E. Zhang, E. L. Robinson, R. F. Stiening, & Keith Horne.* 454, 447, 305-D12 (1995)

Hopkins Ultraviolet Telescope Observations of U Geminorum Far from Outburst. *Knox S. Long, William P. Blair, & John C. Raymond.* 454, L39, 308-A8 (1995)

Radio Monitoring of GRS 1915+105. *L. F. Rodríguez, E. Gerard, I. F. Mirabel, Y. Gómez, & A. Velázquez.* 101, 173, 55-A5 (1995)

Identification of the Soft X-Ray Source WGA J1802.1+1804 with a New Magnetic Cataclysmic Variable. *Paula Szkody, Andrew Silber, D. W. Hoard, E. Fierce, K. P. Singh, P. Barrett, E. Schlegel, & V. Piirola.* 455, L43, 325-A6 (1995)

Spectroscopic Identification of Probable Cataclysmic Variables in the Globular Cluster NGC 6397. *J. E. Grindlay, A. M. Cool, P. J. Callanan, C. D. Bailyn, H. N. Cohn, & P. M. Lugger.* 455, L47, 325-B1 (1995)

The Softest X-Ray Sources in the *ROSAT* Pointed Catalog: WGACAT. *K. P. Singh, P. Barrett, N. E. White, P. Giommi, & L. Angelini.* 455, 456, 328-C2 (1995)

The Mass of the Probable Black Hole in the X-Ray Nova GRO J0422+32. *Alexei V. Filippenko, Thomas Matheson, & Luis C. Ho.* 455, 614, 330-D1 (1995)

A Black Hole in the X-Ray Nova GS 2000+25. *Alexei V. Filippenko, Thomas Matheson, & Aaron J. Barth.* 455, L139, 334-A4 (1995)

Observations of Some Little-studied Cataclysmic Variables. *Chris Koen & Darragh O'Donoghue.* 101, 347, 58-E13 (1995)

STARS: OSCILLATIONS

On the Certification of AM Canum Venaticorum as a Cataclysmic Variable. *Joseph Patterson, Emily Sterner, Jules P. Halpern, & John C. Raymond.* 384, 234, 3-G6 (1992)

Post-Newtonian Frequencies for the Pulsations of Rapidly Rotating Neutron Stars. *Curt Cutler & Lee Lindblom.* 385, 630, 21-A1 (1992)

The Luminosity of the Double-Mode Cepheid Y Carinae. *Nancy Remage Evans.* 385, 680, 21-E6 (1992)

Toward a Resolution of the Bump and Beat Cepheid Mass Discrepancies. *Paweł Moskalik, J. Robert Buchler, & Ariel Marom.* 385, 685, 21-E13 (1992)

Excitation of Pressure Modes in Common Envelopes. *Noam Soker.* 386, 190, 26-E1 (1992)

The Baade-Wesselink Method and the Distances to RR Lyrae Stars. VII. The Field Stars SW Andromedae and DX Delphini and a Comparison of Recent Baade-Wesselink Analyses. *Rodney V. Jones, Bruce W. Carney, Jesper Storm, & David W. Latham.* 386, 646, 33-C14 (1992)

The Baade-Wesselink Method and the Distances to RR Lyrae Stars. VIII. Comparisons with Other Techniques and Implications for Globular Cluster Distances and Ages. *Bruce W. Carney, Jesper Storm, & Rodney V. Jones.* 386, 663, 33-E5 (1992)

Hard X-Ray Observation of Scorpius X-1. *P. Ubertini, A. Bazzano, M. Cocchi, C. La Padula, & R. K. Sood.* 386, 710, 34-B4 (1992)

Evolution versus Pulsation along the Horizontal Branch of M15. *Norman R. Simon.* 387, 162, 39-A3 (1992)

Light Curves of Rotating, Oscillating Neutron Stars. *T. E. Strohmayer.* 388, 138, 50-F9 (1992)

On the Pulsations of Relativistic Accretion Disks and Rotating Stars: The Cowling Approximation. *James R. Ipser & Lee Lindblom.* 389, 392, 64-G1 (1992)

New Calibrators for the Cepheid Period-Luminosity Relation. *Nancy Remage Evans.* 389, 657, 69-E8 (1992)

Determining the Coherence of Micropulses. *T. E. Strohmayer, J. M. Cordes, & H. M. Van Horn.* 389, 685, 69-G12 (1992)

The Discovery of a New DAV Star Using *IUE* Temperature Determination. *A. Kanaan, S. O. Kepler, O. Giovannini, & M. Diaz.* 390, L89, 85-B7 (1992)

Pulsational Study of BL Herculis Models. I. Radial Velocities. *J. Robert Buchler & Paweł Moskalik.* 391, 736, 97-B6 (1992)

Whole Earth Telescope Observations of V471 Tauri: The Nature of the White Dwarf Variations. *J. C. Clemens, R. E. Nather, D. E. Winget, E. L. Robinson, M. A. Wood, C. F. Claver, J. Provencal, S. J. Kleinman, P. A. Bradley, M. L. Frueh, A. D. Grauer, B. P. Hine, G. Fontaine, N. Achilleos, D. T. Wickramasinghe, T. M. K. Marar, S. Seetha, B. N. Ashoka, D. O'Donoghue, B. Warner, D. W. Kurtz, P. Martinez, G. Vauclair, M. Chevreton, M. A. Barstow, A. Kanaan, S. O. Kepler, T. Augusteijn, J. van Paradijs, & C. J. Hansen.* 391, 773, 97-E8 (1992)

Rapid Oscillations in Cataclysmic Variables. VIII. YY Draconis (=3A 1148+719. *J. Patterson, D. A. Schwartz, J. P. Pye, W. P. Blair, G. A. Williams, & J.-P. Caillault.* 392, 233, 103-G3 (1992)

Axion Cooling of White Dwarfs. *J. Isern, M. Hernanz, & E. Garcia-Berro.* 392, L23, 106-D1 (1992)

Upper Limit to the Mass of Pulsationally Stable Stars with Uniform Chemical Composition. *Richard B. Stothers.* 392, 706, 111-A7 (1992)

Adiabatic Properties of Pulsating DA White Dwarfs. III. A Finite-Element Code for Solving Nonradial Pulsation Equations. *P. Brassard, C. Pelletier, G. Fontaine, & F. Wesemael.* 80, 725, 33-D11 (1992)

An Opacity Mechanism for the Pulsations of OB Stars. *Arthur N. Cox, Siobahn M. Morgan, Forrest J. Rogers, & Carlos A. Iglesias.* 393, 272, 117-E3 (1992)

Diskoseismology: Probing Accretion Disks. II. *G*-Modes, Gravitational Radiation Reaction, and Viscosity. *Michael A. Nowak & Robert V. Wagoner.* 393, 697, 124-E1 (1992)

Evolutionary Models and the *p*-Mode Oscillation Spectrum of α Centauri A and B. *Peter Edmonds, Lawrence Cram, Pierre Demarque, D. B. Guenther, & Marc H. Pinsonneault.* 394, 313, 131-G9 (1992)

The Discovery of an Extremely Low Amplitude Cepheid? *R. Paul Butler.* 394, L25, 133-D5 (1992)

Effects of Differential Rotation on Stellar Oscillations: A Second-Order Theory. *W. A. Dziembowski & Philip R. Goode.* 394, 670, 137-G5 (1992)

A New Class of *g*-Modes in Neutron Stars. *Andreas Reisenegger & Peter Goldreich.* 395, 240, 143-B7 (1992)

Adiabatic Properties of Pulsating DA White Dwarfs. IV. An Extensive Survey of the Period Structure of Evolutionary Models. *P. Brassard, G. Fontaine, F. Wesemael, & M. Tassoul.* 81, 747, 45-D3 (1992)

On the Absolute Magnitude of RR Lyrae Stars: UU Ceti, RV Phoenicis, and W Tucanae. *C. Cacciari, G. Clementini, & J. A. Fernley.* 396, 219, 157-G5 (1992)

Properties of Quasi-periodic Oscillations in Accreting Magnetic White Dwarfs. *Kinwah Wu, G. Chanmugam, & G. Shaviv.* 397, 232, 170-G6 (1992)

Oscillations and Collapse of Compressible Homogeneous Rotating Spheroids with Electron Degeneracy. *T. T. Chia & S. Y. Pung.* 398, 574, 191-C7 (1992)

Noise-driven Radiative Shocks. II. Further Implications for the Quasi-periodic Oscillations of the AM Herculis Objects. *Kent S. Wood, James N. Imamura, & Michael T. Wolff.* 398, 593, 191-E1 (1992)

On Nonlinear Radial Oscillations in Convective RR Lyrae Stars. I. The Mathematical Description. *Michael Gehmeyr.* 399, 265, 198-E1 (1992)

On Nonlinear Radial Oscillations in Convective RR Lyrae Stars. II. Comparison of a Radiative and a Convective Model. *Michael Gehmeyr.* 399, 272, 198-E11 (1992)

The Case of G226-29: Evidence for a Pulsating DA White Dwarf with a Thick Hydrogen Layer? *G. Fontaine, P. Brassard, P. Bergeron, & F. Wesemael.* 399, L91, 201-C13 (1992)

On the Pulsational Stability of the Pre-White Dwarf Star PG 1707+427. *Albert D. Grauer, Richard F. Green, & James Liebert.* 399, 686, 206-D7 (1992)

τ Pegasi: A Fourier Representation of Line-Profile Variations. *E. J. Kennelly, G. A. H. Walker, & William J. Merryfield.* 400, L71, 220-E8 (1992)

Oxygen-rich Semiregular and Irregular Variables. *M. Jura & S. G. Kleinmann.* 83, 329, 62-D5 (1992)

Radial Pulsations in DB White Dwarfs? *Steven D. Kawaler.* 404, 294, 31-E3 (1993)

Double-Mode Pulsations in Radiative RR Lyrae Models. *Géza Kovács & J. Robert Buchler.* 404, 765, 38-D9 (1993)

Evolution and Seismology of Procyon. *D. B. Guenther & P. Demarque.* 405, 298, 44-G6 (1993)

Pulsational Study of BL Herculis Models. II. Light Curves. *Paweł Moskalik & J. Robert Buchler.* 406, 190, 57-D8 (1993)

Optical Spectrophotometry of Oscillations and Flickering in AE Aquarii. *William F. Welsh, Keith Horne, & J. B. Oke.* 406, 229, 57-G12 (1993)

The Potential for Asteroseismology of DB White Dwarf Stars. *P. A. Bradley, D. E. Winget, & M. A. Wood.* 406, 661, 66-B1 (1993)

On the Generation of Sound by Turbulent Convection. I. A Numerical Experiment. *Thomas J. Bogdan, Fausto Cattaneo, & Andrea Malagoli.* 407, 316, 73-A7 (1993)

Dynamical Instability as the Cause of the Massive Outbursts in η Carinae and Other Luminous Blue Variables. *Richard B. Stothers & Chao-wen Chin.* 408, L85, 95-C5 (1993)

On the Location of the Oscillations in AE Aquarii. *William F. Welsh, Keith Horne, & Richard Gomer.* 410, L39, 118-D1 (1993)

A Provisional RR Lyrae Distance Scale. *Norman R. Simon & Christine M. Clement.* 410, 526, 120-C1 (1993)

Theoretical Models of Cepheid Variables and Their BVI_C Colors and Magnitudes. *C. Chiosi, P. R. Wood, & N. Capitanio.* 86, 541, 21-E11 (1993)

The Distance to the Large Magellanic Cloud: Constraints from Cepheids in Large Magellanic Cloud Star Clusters. *Gianpaolo Bertelli, Alessandro Bressan, Cesare Chiosi, Mario Mateo, & Peter R. Wood.* 412, 160, 144-A13 (1993)

The RR Lyrae Variables in the Globular Cluster M68. *Christine M. Clement, Stephen Ferance, & Norman R. Simon.* 412, 183, 144-C13 (1993)

On Nonlinear Radial Oscillations in Convective RR Lyrae Stars. III. A Full-Amplitude Investigation of the Red Edge. *Michael Gehmeyr.* 412, 341, 146-D1 (1993)

Long-Period Radial Velocity Variations in Three K Giants. *Artie P. Hatzes & William D. Cochran.* 413, 339, 160-D13 (1993)

High-Speed Ultraviolet Photometry of HD 60435. *M. Taylor, M. J. Nelson, R. C. Bless, J. F. Dolan, J. L. Elliot, J. W. Percival, E. L. Robinson, & G. W. van Citters.* 413, L125, 169-B10 (1993)

Normal Modes of Relativistic Stars in Slow Rotation Limit. *Yasufumi Kojima.* 414, 247, 173-B3 (1993)

On Cepheids at Maximum and Minimum Light. *Norman R. Simon, Shashi M. Kanbur, & Dimitri Mihalas.* 414, 310, 173-G5 (1993)

Equidistribution of Energy and Other Quantities in Oscillating Systems. *Charles L. Wolff.* 414, 892, 182-D4 (1993)

Discrete High-Frequency p-Modes as Probes of Structures in the Chromosphere, Transition Region, and Lower Corona of the Sun. *Yu-Qing Lou.* 414, L141, 186-E1 (1993)

Cepheid Velocity Curves from Lines of Different Excitation and Ionization. I. Observations. *R. Paul Butler.* 415, 323, 189-A7 (1993)

Density Discontinuities and the g-Mode Oscillation Spectra of Neutron Stars. *T. E. Strohmayer.* 417, 273, 220-G9 (1993)

Time-Series Observations of O Stars. II. Optical Observations of ζ Ophiuchi. *A. H. N. Reid, C. T. Bolton, R. A. Crowe, M. S. Fieldus, A. W. Fullerton, D. R. Gies, I. D. Howarth, D. McDavid, R. K. Prinja, & K. C. Smith.* 417, 320, 221-E1 (1993)

Effects of Convection on Pressure Wave Excitation in Common Envelopes. *Noam Soker.* 417, 347, 221-G8 (1993)

Angular Momentum Transfer by Tidally Forced Oscillations in Massive Main-Sequence Stars. *Umin Lee.* 417, 697, 228-A13 (1993)

The Cepheid Period-Luminosity Relation from Independent Distances of 100 Galactic Variables. *Wolfgang P. Gieren, Thomas G. Barnes III, & Thomas J. Moffett.* 418, 135, 232-F10 (1993)

An Improved Numerical Method for Nonadiabatic Nonradial Oscillations: An Application to White Dwarf Stars. *Umin Lee & P. A. Bradley.* 418, 855, 243-C1 (1993)

Quasi-periodic Oscillations in the Cataclysmic Variable KR Aurigae. *Jyoti Singh, P. Vivekananda Rao, P. C. Agrawal, K. M. V. Apparao, R. K. Manchanda, B. B. Sanwal, & M. B. K. Sarma.* 419, 337, 250-D3 (1993)

The Quasi-periodic Oscillations of VV Puppis. *James N. Imamura, John Middleditch, Jeffrey D. Scargle, Thomas Y. Steiman-Cameron, Laura A. Whitlock, Michael T. Wolff, & Kent S. Wood.* 419, 793, 257-E1 (1993)

Comparative Pulsation Calculations with OP and Opal Opacities. *Shashi M. Kanbur & Norman R. Simon.* 420, 880, 13-G5 (1994)

Hot or Not? Theoretical Blue Edges for DA and DB White Dwarf Models. *P. A. Bradley & D. E. Winget.* 421, 236, 19-A1 (1994)

A New Method of Spectral Analysis of Unevenly Spaced Astrophysical Data. I. The Single-Period Case. *F. Barone, L. Milano, & G. Russo.* 421, 284, 19-E1 (1994)

The Oscillations of Superfluid Neutron Stars. *Lee Lindblom & Gregory Mendell.* 421, 689, 26-G3 (1994)

Short-Period Radial Velocity Variations of α Bootis: Evidence for Radial Pulsations. *Artie P. Hatzes & William D. Cochran.* 422, 366, 34-E11 (1994)

Oosterhoff Dichotomy in the Galaxy and Globular Clusters in the Large Magellanic Cloud. *Giuseppe Bono, Filippina Caputo, & Robert F. Stellingwerf.* 423, 294, 49-F8 (1994)

The He I λ10830 Line in Classical Cepheids. I. Observations. *Dimitar D. Sasselov & John B. Lester.* 423, 777, 58-C11 (1994)

Discovery of a Low-Frequency Broad Quasi-periodic Oscillation Peak in the Power Density Spectrum of Cygnus X-1 with *Granat*/SIGMA. *A. Vikhlinin, E. Churazov, M. Gilfanov, R. Sunyaev, A. Dyachkov, N. Khavenson, R. Kremnev, K. Sukhanov, J. Ballet, P. Laurent, L. Salotti, A. Claret, J. F. Olive, M. Denis, P. Mandrou, & J. P. Roques.* 424, 395, 66-F14 (1994)

Ultraviolet Photometry of Nova Cygni 1992 Obtained with the High Speed Photometer. *M. Taylor, R. C. Bless, H. Ögelman, J. L. Elliot, J. S. Gallagher, M. J. Nelson, J. W. Percival, E. L. Robinson, & G. W. van Citters.* 424, L45, 69-F6 (1994)

Luminous Blue Variables at Quiescence: The Zone of Avoidance in the Hertzsprung-Russell Diagram. *Richard B. Stothers & Chao-wen Chin.* 426, L43, 103-E13 (1994)

Excitation of Neutron Star Normal Modes during Binary Inspiral. *Andreas Reisenegger & Peter Goldreich.* 426, 688, 107-A6 (1994)

Precision Asteroseismology of Pulsating PG 1159 Stars. *Steven D. Kawaler & Paul A. Bradley.* 427, 415, 115-A11 (1994)

Star Spots and the Period Gap in Cataclysmic Variables. *M. Livio & J. E. Pringle.* 427, 956, 124-E2 (1994)

The Effectiveness of Oscillation Frequencies in Constraining Stellar Model Parameters. *Timothy M. Brown, J. Christensen-Dalsgaard, Barbara Weibel-Mihalas, & Ronald L. Gilliland.* 427, 1013, 125-C3 (1994)

On the Hydrogen Layer Thickness in Pulsating DA White Dwarfs. *G. Fontaine, P. Brassard, F. Wesemael, & M. Tassoul.* 428, L61, 142-F1 (1994)

SIGMA Observations of the Bright X-Ray Transient Nova Persei: A New Black Hole Candidate? *J. P. Roques, L. Bouchet, E. Jourdain, P. Mandrou, A. Goldwurm, J. Ballet, A. Claret, F. Lebrun, A. Finoguenov, E. Churazov, M. Gilfanov, R. Sunyaev, B. Novikov, I. Chulkov, N. Kuleshova, & I. Tserenin.* 92, 451, 37-G2 (1994)

Opacity, Metallicity, and Cepheid Period Ratios in the Galaxy and Magellanic Clouds. *Norman R. Simon & Shashi M. Kanbur.* 429, 772, 155-C8 (1994)

Pulsation and Stability of RR Lyrae Stars. I. Instability Strip. *G. Bono & R. F. Stellingwerf.* 93, 233, 45-A5 (1994)

A Pulsational Approach to the Luminosity of RR Lyrae Variables. *V. Castellani & R. De Santis.* 430, 624, 169-E11 (1994)

Whole Earth Telescope Observations of the DBV White Dwarf GD 358. *D. E. Winget, R. E. Nather, J. C. Clemens, J. L. Provencal, S. J. Kleinman, P. A. Bradley, C. F. Claver, J. S. Dixson, M. H. Montgomery, C. J. Hansen, B. P. Hine, P. Birch, M. Candy, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. M. Leibowitz, D. O'Donoghue, B. Warner, D. A. H. Buckley, P. Tripe, G. Vauclair, N. Dolez, M. Chevreton, T. Serre, R. Garrido, S. O. Kepler, A. Kanaan, T. Augusteijn, M. A. Wood, P. Bergeron, & A. D. Grauer.* 430, 839, 172-D1 (1994)

An Asteroseismological Determination of the Structure of the DBV White Dwarf GD 358. *P. A. Bradley & D. E. Winget.* 430, 850, 172-E2 (1994)

Oscillations of Red Dwarfs in Evolved Low-Mass Binaries with Neutron Stars. *Marek J. Sarna, Umin Lee, & Alexander G. Muslimov.* 431, 302, 179-G8 (1994)

Low-Frequency Quasi-periodic Oscillations in Low-Mass X-Ray Binaries and Galactic Black Hole Candidates. *Xingming Chen & Ronald E. Taam.* 431, 732, 187-F3 (1994)

A Multisite *UBV* Photometric Campaign on 53 Persei in 1991 January. *L. Huang, Z. Guo, J. Hao, J. R. Percy, M. S. Fieldus, R. Fried, K Pavlovski, H. Božić, Ž. Ružić, M. Paparó, & B. Vető.* 431, 850, 189-C5 (1994)

On the Nature of Photospheric Oscillations in Strong X-Ray Bursts. *Iosif Lapidus, Luciano Nobili, & Roberto Turolla.* 431, L103, 191-F13 (1994)

Multipole Moments of Stellar Oscillation Modes. *Andreas Reisenegger.* 432, 296, 196-G6 (1994)

On the Application of the Baade-Wesselink Method to RR Lyrae Stars. *G. Bono, F. Caputo, & R. F. Stellingwerf.* 432, L51, 199-G7 (1994)

The Radial Velocity Variability of the K Giant β Ophiuchi. I. The Detection of Low-Amplitude, Short-Period Pulsations. *Artie P. Hatzes & William D. Cochran.* 432, 763, 205-E1 (1994)

An Ultraviolet and Visible Spectroscopic Study of a Pulsational Cycle of RY Sagittarii. *Geoffrey C. Clayton, W. A. Lawson, P. L. Cottrell, Barbara A. Whitney, S. Adam Stanford, & Frank de Ruyter.* 432, 785, 205-F13 (1994)

The Ultraviolet Pulsations of the Cataclysmic Variable AE Aquarii as Observed with the *Hubble Space Telescope*. *Michael Eracleous, Keith Horne, Edward L. Robinson, Er-Ho Zhang, Thomas R. Marsh, & Janet H. Wood.* 433, 313, 212-C1 (1994)

On Nonlinear Radial Adiabatic Oscillations in Magnetic Polytropes. *M. K. Das, O. J. Mollikutty, & R. K. Tavakol.* 433, 786, 220-G13 (1994)

The Thermal Relaxation Oscillation States of Contact Binaries. *Jian-Min Wang.* 434, 277, 229-C4 (1994)

Searches for Millisecond Pulsations in Low-Mass X-Ray Binaries. II. *B. A. Vaughan, M. van der Klis, K. S. Wood, J. P. Norris, P. Hertz, P. F. Michelson, J. van Paradijs, W. H. G. Lewin, K. Mitsuda, & W. Penninx.* 435, 362, 248-D1 (1994)

Low-Frequency Modes and Nonbarotropic Effects in Pseudo-Newtonian Accretion Disks. *James R. Ipser.* 435, 767, 256-E13 (1994)

Dripping Handrails and the Quasi-periodic Oscillations of the AM Herculis Objects. *Thomas Y. Steiman-Cameron, Karl Young, Jeffrey D. Scargle, James P. Crutchfield, James N. Imamura, Michael T. Wolff, & Kent S. Wood.* 435, 775, 256-F10 (1994)

The Shape of FK Comae Berenices: Evidence for a Recently Coalesced Binary. *Alan D. Welty & Lawrence W. Ramsey.* 435, 848, 257-F13 (1994)

Classical Cepheids with Terminal Age Main-Sequence Companions: Constraints on Evolution. *Nancy Remage Evans.* 436, 273, 265-A12 (1994)

Discovery of the Quasi-periodic Oscillations from V0332+53. *Toshiaki Takeshima, Tadayasu Dotani, Kazuhisa Mitsuda, & Fumiaki Nagase.* 436, 871, 277-F7 (1994)

Observational Limits on Companions to G29-38. *S. J. Kleinman, R. E. Nather, D. E. Winget, J. C. Clemens, P. A. Bradley, A. Kanaan, J. L. Provencal, C. F. Claver, T. K. Watson, K. Yanagida, J. S. Dixson, M. A. Wood, D. J. Sullivan, E. Meištas, E. M. Leibowitz, P. Moskalik, S. Zola, G. Pajdosz, J. Krzesinski, J.-E. Solheim, A. Bruvold, D. O'Donoghue, M. Katz, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, S. O. Kepler, O. Giovannini, C. J. Hansen, & S. D. Kawaler.* 436, 875, 277-G1 (1994)

Hydrodynamics of Rotating Stars and Close Binary Interactions: Compressible Ellipsoid Models. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 437, 742, 295-G13 (1994)

The Pulsation Index, Effective Temperature, and Thickness of the Hydrogen Layer in the Pulsating DA White Dwarf G117-B15A. *E. L. Robinson, T. M. Mailloux, E. Zhang, D. Koester, R. F. Stiening, R. C. Bless, J. W. Percival, M. J. Taylor, & G. W. van Citters.* 438, 908, 16-F1 (1995)

Oscillatory Modes in Near-critical Accretion Flows. *Guy S. Miller & Myeong-Gu Park.* 440, 771, 53-F11 (1995)

The Modeling of Energy Distributions and Light Curves of ZZ Ceti Stars. I. Basic Theory and Semianalytic Expressions for the Emergent Flux. *P. Brassard, G. Fontaine, & F. Wesemael.* 96, 545, 9-C12 (1995)

The RR Lyrae Fundamental Red Edge. *G. Bono, F. Caputo, V. Castellani, M. Marconi, L. Staiano, & R. F. Stellingwerf.* 442, 159, 79-D1 (1995)

Generation of Mass Loss in K Giants: The Failure of Global Oscillation Modes and Possible Implications. *G. Sutmann & M. Cuntz.* 442, L61, 94-E7 (1995)

Nightly Variations of Nonradial Oscillations in the Delta Scuti Star v Ursae Majoris. *S. G. Korzennik, R. W. Noyes, T. Brown, P. Nisenson, & S. Horner.* 443, L25, 102-E7 (1995)

Modeling Solar-like Oscillations in η Bootis. *Jørgen Christensen-Dalsgaard, Timothy R. Bedding, & Hans Kjeldsen.* 443, L29, 102-F1 (1995)

Evolution of Hα Emission Profiles in S-Type Mira Stars. *Andrew W. Woodsworth.* 444, 396, 119-A4 (1995)

Nonperiodic Variations in Astrophysical Systems: Investigating Frequency Evolution. *Patricia T. Boyd, Patricia H. Carter, Robert Gilmore, & Joseph F. Dolan.* 445, 861, 147-A12 (1995)

The Unusual Helium Variable AM Canum Venaticorum. *J. L. Provencal, D. E. Winget, R. E. Nather, E. L. Robinson, J.-E. Solheim, J. C. Clemens, P. A. Bradley, S. J. Kleinman, A. Kanaan, C. F. Claver, C. J. Hansen, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. M. Leibowitz, E. G. Meištas, A. Bruvold, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, A. E. Sansom, R. W. Tweedy, G. Fontaine, P. Bergeron, S. O. Kepler, M. A. Wood, & A. D. Grauer.* 445, 927, 148-A11 (1995)

Transient Phenomena and Modal Stability in RR Lyrae and BL Herculis Variable Stars. *G. Bono, V. Castellani, & R. F. Stellingwerf.* 445, L145, 151-G3 (1995)

Whole Earth Telescope Observations of the DAV White Dwarf G226-29. *S. O. Kepler, O. Giovannini, M. A. Wood, R. E. Nather, D. E. Winget, A. Kanaan, S. J. Kleinman, P. A. Bradley, J. L. Provencal, J. C. Clemens, C. F. Claver, T. K. Watson, K. Yanagida, K. Krisciunas, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. Leibowitz, H. Mendelson, T. Mazeh, P. Moskalik, J. Krzesiński, G. Pajdosz, S. Zola, J.-E. Solheim, P.-I. Emanuelsen, N. Dolez, G. Vauclair, M. Chevreton, J.-R. Fremy, M. A. Barstow, A. E. Sansom, R. W. Tweedy, D. T. Wickramasinghe, L. Ferrario, D. J. Sullivan, A. J. van der Peet, D. A. H. Buckley, & A.-L. Chen.* 447, 874, 188-A1 (1995)

Synthetic Mean Colors for RR Lyrae Variables. *Giuseppe Bono, Filippina Caputo, & Robert F. Stellingwerf.* 99, 263, 37-F8 (1995)

RR Lyrae Variable Stars: Pulsational Constraints Relevant to the Oosterhoff Controversy. *Giuseppe Bono, Filippina Caputo, Vittorio Castellani, & Marcella Marconi.* 448, L115, 209-E3 (1995)

Optical and Ultraviolet Analyses of ZZ Ceti Stars and Study of the Atmospheric Convective Efficiency in DA White Dwarfs. *P. Bergeron, F. Wesemael, R. Lamontagne, G. Fontaine, R. A. Saffer, & N. F. Allard.* 449, 258, 213-F10 (1995)

Tidal Excitation of Modes in Binary Systems with Applications to Binary Pulsars. *Pawan Kumar, Chi On Ao, & Eliot J. Quataert.* 449, 294, 214-B10 (1995)

Nonradial Oscillations in Neutron Star Oceans: A Source of Quasi-periodic X-Ray Oscillations? *Lars Bildsten & Curt Cutler.* 449, 800, 223-F12 (1995)

Whole Earth Telescope Observations and Seismological Analysis of the Pre–White Dwarf PG 2131+066. *S. D. Kawaler, M. S. O'Brien, J. C. Clemens, R. E. Nather, D. E. Winget, T. K. Watson, K. Yanagida, J. S. Dixson, P. A. Bradley, M. A. Wood, D. J. Sullivan, S. J. Kleinman, E. Meištas, E. M. Leibowitz, P. Moskalik, S. Zola, G. Pajdosz, J. Krzesiński, J.-E. Solheim, A. Bruvold, D. O'Donoghue, M. Katz, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, A. Kanaan, S. O. Kepler, O. Giovannini, J. L. Provencal, & C. J. Hansen.* 450, 350, 232-G1 (1995)

Long-Period Cepheids: Models and Observations. *Norman R. Simon & Shashi M. Kanbur.* 451, 703, 256-G10 (1995)

A Period-Luminosity Relation for the Slow Variations of Luminous Blue Variables. *Richard B. Stothers & Chao-wen Chin.* 451, L61, 260-E7 (1995)

Empirical Approach to Cepheid Period-Luminosity-Color and Period-Luminosity Relations by Surface Brightness. *G. P. Di Benedetto.* 452, 195, 264-F7 (1995)

The Radial Velocity Variability of α Persei: A Low-Amplitude Cepheid outside the Instability Strip? *Artie P. Hatzes & William D. Cochran.* 452, 401, 267-E11 (1995)

Spin-Orbit Interactions in Neutron Star/Main-Sequence Binaries and Implications for Pulsar Timing. *Dong Lai, Lars Bildsten, & Victoria M. Kaspi.* 452, 819, 276-A1 (1995)

The 71 Second Oscillation in the Light Curve of the Old Nova DQ Herculis. *E. Zhang, E. L. Robinson, R. F. Stiening, & Keith Horne.* 454, 447, 305-D12 (1995)

Genetic Algorithms in Astronomy and Astrophysics. *P. Charbonneau.* 101, 309, 58-B5 (1995)

STARS: OF-TYPE

First Results from the Goddard High-Resolution Spectrograph: Spectroscopic Determination of Stellar Parameters of Melnick 42, an O3f Star in the Large Magellanic Cloud. *S. R. Heap, B. Altner, D. Ebbets, I. Hubeny, J. B. Hutchings, R. P. Kudritzki, S. A. Voels, S. Haser, A. Pauldrach, J. Puls, & K. Butler.* 377, L29, 143-D6 (1991)

Lithium in Halo Stars: Constraining the Effects of Helium Diffusion on Globular Cluster Ages and Cosmology. *Constantine P. Deliyannis & Pierre Demarque.* 379, 216, 165-F7 (1991)

Oxygen Abundances in Halo Stars. *Michael S. Bessell, Ralph S. Sutherland, & Kui Ruan.* 383, L71, 226-E6 (1991)

Evolutionary Models of Halo Stars with Rotation. II. Effects of Metallicity on Lithium Depletion, and Possible Implications for the Primordial Lithium Abundance. *M. H. Pinsonneault, Constantine P. Deliyannis, & P. Demarque.* 78, 179, 4-B3 (1992)

Discovery of a Fast Wind from a Field Population II Giant Star. *A. K. Dupree, Dimitar D. Sasselov, & John B. Lester.* 387, L85, 48-D11 (1992)

Evolution of Beryllium Abundances in the Galactic Halo. *Sean G. Ryan, John E. Norris, M. S. Bessell, & Constantine P. Deliyannis.* 388, 184, 51-C6 (1992)

Evidence for Dwarf Stars at $D \sim 100$ Kiloparsecs near the Sextans Dwarf Spheroidal Galaxy. *Andrew Gould, Puragra Guhathakurta, Douglas Richstone, & Chris Flynn.* 388, 345, 54-F1 (1992)

The Formation of Primordial Degenerate Protostars. *Paolo Lenzuni, David F. Chernoff, & Edwin E. Salpeter.* 393, 232, 117-A11 (1992)

Mass Loss and a Possible Population II Lithium Dip. *David S. P. Dearborn, David N. Schramm, & L. M. Hobbs.* 394, L61, 139-E1 (1992)

Abundances for Giant Stars in the Draco Dwarf Galaxy. *Matthew D. Lehnert, R. A. Bell, James E. Hesser, & J. B. Oke.* 395, 466, 148-C9 (1992)

Two New Lithium-deficient Population II Dwarfs. *J. A. Thorburn.* 399, L83, 201-B13 (1992)

New Lithium Observations of Two [Fe/H] $\leq$ -3.5 Dwarfs. *J. A. Thorburn & Timothy C. Beers.* 404, L13, 33-E1 (1993)

Mass Loss in Globular Cluster Red Giants: An Evolutionary Investigation. *M. Castellani & V. Castellani.* 407, 649, 78-F1 (1993)

The Abundance of Lithium in Metal-poor Subgiant Stars. *C. A. Pilachowski, C. Sneden, & J. Booth.* 407, 699, 79-C1 (1993)

The ^{6}Li/^{7}Li Ratio in the Metal-poor Halo Dwarfs HD 19445 and HD 84937. *Verne V. Smith, David L. Lambert, & Poul E. Nissen.* 408, 262, 86-D1 (1993)

The Effect of Livermore Opal Opacities on the Evolutionary Masses of RR Lyrae Stars. *Sukyoung Yi, Young-Wook Lee, & Pierre Demarque.* 411, L25, 133-G8 (1993)

High-Dispersion Spectroscopy of Giants in Metal-poor Globular Clusters. I. Iron Abundances. *Dante Minniti, Doug Geisler, Ruth C. Peterson, & Juan J. Claria.* 413, 548, 163-C8 (1993)

The Boron-to-Beryllium Ratio in Halo Stars: A Signature of Cosmic-Ray Nucleosynthesis in the Early Galaxy. *T. P. Walker, G. Steigman, D. N. Schramm, K. A. Olive, & B. Fields.* 413, 562, 163-D12 (1993)

Evidence for a Dispersion in the Lithium Abundances of Extreme Halo Stars. *Constantine P. Deliyannis, M. H. Pinsonneault, & Douglas K. Duncan.* 414, 740, 180-D10 (1993)

Abundances of Four Ultra–Metal-Deficient Stars. *John E. Norris, Ruth C. Peterson, & Timothy C. Beers.* 415, 797, 197-F13 (1993)

An Evolutionary Scenario for Primeval Stellar Populations. *Santi Cassisi & Vittorio Castellani.* 88, 509, 47-B1 (1993)

Ultraviolet Radiation from Evolved Stellar Populations. I. Models. *Ben Dorman, Robert T. Rood, & Robert W. O'Connell.* 419, 596, 255-B8 (1993)

The Stellar Population in the Core of M15. *Guido De Marchi & Francesco Paresce.* 422, 597, 39-C6 (1994)

Do Gamma-Ray Bursts Originate from an Extended Galactic Halo of High-Velocity Neutron Stars? *Dieter H. Hartmann, Lawrence E. Brown, Lih-Sin The, Eric V. Linder, Vahe Petrosian, George R. Blumenthal, & Kevin C. Hurley.* 90, 893, 14-G10 (1994)

The Production of Beryllium in the Early Galaxy. *Sofia Feltzing & Bengt Gustafsson.* 423, 68, 47-A6 (1994)

Lithium Abundances in the Most Metal-deficient Stars. *John E. Norris, Sean G. Ryan, & Guy S. Stringfellow.* 423, 386, 51-A1 (1994)

Detection of Lithium in the Cool Halo Dwarfs Groombridge 1830 and HD 134439: Implications for Internal Stellar Mixing and Cosmology. *Constantine P. Deliyannis, Sean G. Ryan, Timothy C. Beers, & Julie A. Thorburn.* 425, L21, 85-D3 (1994)

Lithium Isotope Ratios in Six Halo Stars. *L. M. Hobbs & J. A. Thorburn.* 428, L25, 134-D8 (1994)

Red Giant Stragglers and He White Dwarfs in Galactic Globulars. *V. Castellani, V. Luridiana, & M. Romaniello.* 428, 633, 138-B7 (1994)

Production of Lithium, Beryllium, and Boron from Baryon Inhomogeneous Primordial Nucleosynthesis. *David Thomas, David N. Schramm, Keith A. Olive, Grant J. Mathews, Bradley S. Meyer, & Brian D. Fields.* 430, 291, 162-F11 (1994)

CCD Photometry for Six Metal-rich Galactic Globular Clusters. *Ata Sarajedini & John E. Norris.* 93, 161, 44-A2 (1994)

Summary of ΔS Metallicity Measurements for Bright RR Lyrae Variables Observed at Lick Observatory and KPNO between 1972 and 1987. *Nicholas B. Suntzeff, Robert P. Kraft, & T. D. Kinman.* 93, 271, 45-D2 (1994)

Ultra–Metal-poor Halo Stars: The Remarkable Spectrum of CS 22892−052. *Christopher Sneden, George W. Preston, Andrew McWilliam, & Leonard Searle.* 431, L27, 182-E13 (1994)

^{7}Li Abundances in Halo Stars: Testing Stellar Evolution Models and the Primordial ^{7}Li Abundance. *Brian Chaboyer & P. Demarque.* 433, 510, 217-C11 (1994)

Stellar Oxygen Abundances. III. The Oxygen Abundance of the Very Metal Poor Halo Star BD −13°3442. *Jeremy R. King.* 436, 331, 265-G6 (1994)

Lithium in Halo Dwarfs: The Undoing of Diffusion by Mass Loss. *Fritz J. Swenson.* 438, L87, 19-G8 (1995)

Kinematics of Metal-poor Stars in the Galaxy. *Timothy C. Beers & Jesper Sommer-Larsen.* 96, 175, 3-G8 (1995)

Implications of a High Population II B/Be Ratio. *Brian D. Fields, Keith A. Olive, & David N. Schramm.* 439, 854, 36-D7 (1995)

Evidence of Heavy Element Nucleosynthesis Early in the History of the Galaxy: The Ultra–metal-poor Star CS 22892−052. *John J. Cowan, Debra L. Burris, Christopher Sneden, Andrew McWilliam, & George W. Preston.* 439, L51, 40-E3 (1995)

The Sodium/Aluminum–Oxygen Anticorrelation in ω Centauri and Other Clusters. *John E. Norris & G. S. Da Costa.* 441, L81, 76-B11 (1995)

The Hot End of Evolutionary Horizontal Branches. *V. Castellani, S. Degl'Innocenti, & L. Pulone.* 446, 228, 156-C8 (1995)

The Giant Branch of ω Centauri. IV. Abundance Patterns Based on Echelle Spectra of 40 Red Giants. *John E. Norris & G. S. Da Costa.* 447, 680, 185-D9 (1995)

The Primordial Lithium Abundance. *Robert L. Kurucz.* 452, 102, 263-E2 (1995)

Evidence of Higher Primordial Lithium from Keck Observations of M92. *Constantine P. Deliyannis, Ann Merchant Boesgaard, & Jeremy R. King.* 452, L13, 269-D10 (1995)

STARS: POST–ASYMPTOTIC GIANT BRANCH

The Multiple Molecular Winds of CRL 2688. *K. Young, G. Serabyn, T. G. Phillips, G. R. Knapp, R. Güsten, & A. Schulz.* 385, 265, 15-B13 (1992)

The Evolution of High-Metallicity Horizontal-Branch Stars and the Origin of the Ultraviolet Light in Elliptical Galaxies. *E. Horch, P. Demarque, & M. Pinsonneault.* 388, L53, 59-B7 (1992)

Models of Planetary Nebula Spectral Evolution. *Kevin Volk.* 80, 347, 27-B11 (1992)

Discovery of Hot Ammonia in the Proto–Planetary Nebulae CRL 618 and CRL 2688. *Jesús Martín-Pintado & Rafael Bachiller.* 391, L93, 99-G12 (1992)

Hot Post–Asymptotic Giant Branch Stars at High Galactic Latitudes. *R. J. H. McCausland, E. S. Conlon, P. L. Dufton, & F. P. Keenan.* 394, 298, 131-F5 (1992)

An Ultraviolet Imaging Telescope Study of the Globular Cluster M79 (NGC 1904). *Robert S. Hill, Jesse K. Hill, Wayne B. Landsman, Ralph C. Bohlin, K.-P. Cheng, Paul M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L17, 144-F1 (1992)

The Ultraviolet-bright Stars of Omega Centauri, M3, and M13. *Wayne B. Landsman, Robert W. O'Connell, Jonathan H. Whitney, Ralph C. Bohlin, Robert S. Hill, Stephen P. Maran, Ronald A. Parise, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L21, 144-F9 (1992)

Nonequilibrium Iron Oxide Formation in Some Low-Mass Post–Asymptotic Giant Branch Stars. *Frans J. M. Rietmeijer.* 400, L39, 214-E6 (1992)

STARS: PRE–MAIN-SEQUENCE

A Spectroscopic Study of the DR 21 Outflow Source. II. The Vibrational H_2 Line Emission. *R. P. Garden, T. R. Geballe, I. Gatley, & D. Nadeau.* 366, 474, 8-G1 (1991)

Infrared Spectroscopy of T Tauri Stars. *C. Giovanardi, S. Gennari, A. Natta, & R. Stanga.* 367, 173, 14-B11 (1991)

Young Stellar Objects Detected by *IRAS*. *Frank O. Clark.* 75, 611, 9-B5 (1991)

A Search for Embedded Young Stellar Objects in and near the IC 1396 Complex. *Richard D. Schwartz, Armen L. Gyulbudaghian, & Bruce A. Wilking.* 370, 263, 50-D9 (1991)

The High State of the FU Orionis Variable Z Canis Majoris. *F. V. Hessman, J. Eislöffel, R. Mundt, L. W. Hartmann, W. Herbst, & J. Krautter.* 370, 384, 52-A10 (1991)

Star Formation and the Nature of Bipolar Outflows. *Frank H. Shu, Steven P. Ruden, Charles J. Lada, & Susana Lizano.* 370, L31, 53-E1 (1991)

The Effect of an External Disk on the Orbital Elements of a Central Binary. *P. Artymowicz, C. J. Clarke, S. H. Lubow, & J. E. Pringle.* 370, L35, 53-E7 (1991)

Disk Accretion onto Magnetic T Tauri Stars. *Arieh Königl.* 370, L39, 53-E13 (1991)

The Spectral Signatures of Collapse and Outflow around Young Stars. *E. R. Keto.* 371, 163, 62-B3 (1991)

Near-Infrared Emission-Line Images of Three Herbig-Haro Objects. *Karl R. Stapelfeldt, Charles A. Beichman, J. Jeff Hester, Nicholas Z. Scoville, & Thomas N. Gautier III.* 371, 226, 63-A1 (1991)

HH 5, HH 6, and Their Exciting Stars. *Martin Cohen, Burton F. Jones, & Mark Hereld.* 371, 237, 63-B1 (1991)

The Ultraviolet Continuum and the Fluorescent H_2 Lines in Low-Excitation Herbig-Haro Objects. *K.-H. Böhm, D. M. Scott, & J. Solf.* 371, 248, 63-C1 (1991)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. I. The Issues, Formulation of the Problem, and Method of Solution. *Telemachos Ch. Mouschovias & Scott A. Morton.* 371, 296, 63-G1 (1991)

Episodic Outflows from High-Mass Protostars. *G. F. Mitchell, J.-P. Maillard, & T. I. Hasegawa.* 371, 342, 64-D1 (1991)

An Extremely High Velocity CO Outflow from NGC 7538 IRS 9. *George F. Mitchell & Tatsuhiko I. Hasegawa.* 371, L33, 66-E1 (1991)

Multifrequency VLA Observations of Radio Continuum from IRAS 16293−2422. *R. Estalella, G. Anglada, L. F. Rodríguez, & G. Garay.* 371, 626, 69-C12 (1991)

Nonlinear Evolution of Accretion Disks Induced by Radiative Feedback Processes. *K. R. Bell, D. N. C. Lin, & Steven P. Ruden.* 372, 633, 83-E7 (1991)

Mixing Layers in Stellar Outflows. *J. Cantó & A. C. Raga.* 372, 646, 83-F7 (1991)

The Lithium Abundance of the T Tauri Star BP Tauri. *Douglas K. Duncan.* 373, 250, 89-B1 (1991)

The Formation of Molecules in Protostellar Winds. *A. E. Glassgold, G. A. Mamon, & P. J. Huggins.* 373, 254, 89-B7 (1991)

The Evolution of Intermediate-Mass Protostars. I. Basic Results. *Francesco Palla & Steven W. Stahler.* 375, 288, 114-E1 (1991)

Spectroscopic Study of Direct and Dust-scattered Line Emission in the HH 1–HH 2 System. *J. Solf & K.-H. Böhm.* 375, 618, 120-D3 (1991)

NGC 1333 IRAS 4: A Very Young, Low-Luminosity Binary System. *Göran Sandell, Colin Aspin, William D. Duncan, Adrian P. G. Russell, & E. Ian Robson.* 376, L17, 130-C1 (1991)

Observations and Chemistry of Interstellar Refractory Elements. *B. E. Turner.* 376, 573, 133-E1 (1991)

A Double Radio Source at the Center of the Outflow in L723. *Guillem Anglada, Robert Estalella, Luis F. Rodríguez, José M. Torrelles, Rosario López, & Jorge Cantó.* 376, 615, 134-A7 (1991)

Molecular Outflows Associated with Young Stellar Objects in the L1641 Region of Orion. *James A. Morgan, F. Peter Schloerb, Ronald L. Snell, & John Bally.* 376, 618, 134-A12 (1991)

Direct VLBI Detection of the Magnetosphere Surrounding the Young Star S1 in ρ Ophiuchi. *Philippe André, Robert B. Phillips, Jean-François Lestrade, & Karl-Ludwig Klein.* 376, 630, 134-B12 (1991)

The LkHα 101 Infrared Cluster. *M. Barsony, J. M. Schombert, & K. Kis-Halas.* 379, 221, 165-G1 (1991)

Models for Light Scattering by Dust around Herbig-Haro Objects. *Alberto Noriega-Crespo, Nuria Calvet, & Karl-Heinz Böhm.* 379, 676, 173-B1 (1991)

A Rich Cluster of Radio Stars in the ρ Ophiuchi Cloud Cores. *James A. Leous, Eric D. Feigelson, Philippe André, & Thierry Montmerle.* 379, 683, 173-B10 (1991)

Magnetically Driven Jets and Winds. *R. V. E. Lovelace, H. L. Berk, & J. Contopoulos.* 379, 696, 173-D1 (1991)

Irradiation of Accretion Disks around Young Objects. I. Near-Infrared CO Bands. *Nuria Calvet, Alberto Patiño, Gladis Magris C., & Paola D'Alessio.* 380, 617, 185-G8 (1991)

Interstellar Solid CO: Polar and Nonpolar Interstellar Ices. *A. G. G. M. Tielens, A. T. Tokunaga, T. R. Geballe, & F. Baas.* 381, 181, 191-C5 (1991)

Particle Emissivity in Circumstellar Disks. *Steven V. W. Beckwith & Anneila I. Sargent.* 381, 250, 192-B1 (1991)

Milliarcsecond Radio Structure of Weak-lined T Tauri Stars. *R. B. Phillips, C. J. Lonsdale, & E. D. Feigelson.* 382, 261, 203-D9 (1991)

Are FU Orionis Stars Younger than T Tauri Stars? Submillimeter Constraints on Circumstellar Disks. *David A. Weintraub, Göran Sandell, & William D. Duncan.* 382, 270, 203-E8 (1991)

The Molecular Structure around HL Tauri. *A. I. Sargent & S. V. W. Beckwith.* 382, L31, 205-D6 (1991)

10 Micron Spectra of Protostars and the Solid Methanol Abundance. *W. A. Schutte, A. G. G. M. Tielens, & S. A. Sandford.* 382, 523, 208-A11 (1991)

Asymptotic Theory for the Spatial Distribution of Protostellar Emission. *Fred C. Adams.* 382, 544, 208-C8 (1991)

Far-Infrared and Submillimeter Wavelength Observations of Star-forming Dense Cores. II. Images. *E. F. Ladd, Fred C. Adams, S. Casey, J. A. Davidson, G. A. Fuller, D. A. Harper, P. C. Myers, & R. Padman.* 382, 555, 208-D7 (1991)

Optical Excess Emission in T Tauri Stars. *Patrick Hartigan, Scott J. Kenyon, Lee Hartmann, Stephen E. Strom, Suzan Edwards, Alan D. Welty, & John Stauffer.* 382, 617, 209-C1 (1991)

A Nearly Unipolar CO Outflow from the HH 46–47 System. *Lawrence M. Chernin & Colin R. Masson.* 382, L93, 211-E3 (1991)

Molecular Line Emission Models of Herbig-Haro Objects. I. H_2 Emission. *Mark G. Wolfire & Arieh Königl.* 383, 205, 214-E9 (1991)

Time-dependent Radio Sources in the Star-forming Region Cepheus A (East). *V. A. Hughes.* 383, 280, 215-F1 (1991)

Infrared Recombination Lines of Hydrogen from Young Objects in the Southern Galactic Plane. *Sara C. Beck, Jacqueline Fischer, & Howard A. Smith.* 383, 336, 216-D1 (1991)

The 1.0–1.3 Micron Spectrum of LkHα 101. *Richard J. Rudy, Peter Erwin, George S. Rossano, & R. C. Puetter.* 383, 344, 216-D7 (1991)

An Optical/Infrared Outburst in the Exciting Source of HH 7–11. *Jochen Eislöffel, Eike Günther, Frederic V. Hessman, Reinhard Mundt, Ralf Poetzel, John S. Carr, Steven Beckwith, & Tom P. Ray.* 383, L19, 219-C7 (1991)

The Dusty Envelopes of FU Orionis Variables. *Scott J. Kenyon & Lee W. Hartmann.* 383, 664, 222-E1 (1991)

Two New Molecular Outflows in L1551? *Marc W. Pound & John Bally.* 383, 705, 223-A7 (1991)

The Vertical Structure of T Tauri Accretion Disks. I. Heating by the Central Star. *Fabien Malbet & Claude Bertout.* 383, 814, 224-D1 (1991)

Multiplicity among the Young Stars in Taurus. *M. Simon, W. P. Chen, R. R. Howell, J. A. Benson, & D. Slowik.* 384, 212, 3-E8 (1992)

The Molecular Core in the AFGL 5157 Region. *José M. Torrelles, Carlos Eiroa, Rainer Mauersberger, Robert Estalella, Luis F. Miranda, & Guillem Anglada.* 384, 528, 8-F7 (1992)

On the Origin of Submillimeter Emission from Young Stars in Taurus-Auriga. *Mary Barsony & Scott J. Kenyon.* 384, L53, 11-D1 (1992)

The Triple Radio Continuum Source in Serpens: Its Interaction with the Ambient Molecular Gas. *J. M. Torrelles, J. F. Gómez, S. Curiel, C. Eiroa, L. F. Rodríguez, & P. T. P. Ho.* 384, L59, 11-D7 (1992)

A Study of the Stellar Population in the Chamaeleon Dark Clouds. *Lisa S. Gauvin & Karen M. Strom.* 385, 217, 14-F1 (1992)

The Inverse Planckian Transform and Temperature Spectra. *Luis Salas.* 385, 288, 15-D12 (1992)

IRAS 16293−2422: A Very Young Binary System? *Lee G. Mundy, Alwyn Wootten, Bruce A. Wilking, Geoffrey A. Blake, & Anneila I. Sargent.* 385, 306, 15-F5 (1992)

Discovery of Outflows from Young Stellar Objects in Bok Globules. *João Lin Yun & Dan P. Clemens.* 385, L21, 17-C6 (1992)

A Catalog of Co-added *IRAS* Fluxes of Orion Population Stars. *Wm. Bruce Weaver & Gordon Jones.* 78, 239, 4-G7 (1992)

Knots in Stellar Jets from Time-dependent Sources. *A. C. Raga & Lev Kofman.* 386, 222, 27-A1 (1992)

Winds from T Tauri Stars. II. Balmer Line Profiles for Inner Disk Winds. *Nuria Calvet, Lee Hartmann, & Robert Hewett.* 386, 229, 27-A9 (1992)

Balmer Line Profiles for Infalling T Tauri Envelopes. *Nuria Calvet & Lee Hartmann.* 386, 239, 27-B8 (1992)

Star Formation in Taurus. I. The *IRAS* Faint Source Survey. *C. A. Beichman, F. Boulanger, & M. Moshir.* 386, 248, 27-C5 (1992)

10 AU Scale Halo Structure around DG Tauri. *Wen Ping Chen, R. R. Howell, M. Simon, & J. A. Benson.* 387, L43, 43-E8 (1992)

Properties of Swept-up Molecular Outflows. *Colin R. Masson & Lawrence M. Chernin.* 387, L47, 43-F1 (1992)

The Magnetic Collimation of Bipolar Outflows. I. Adiabatic Simulations. *James M. Stone & Michael L. Norman.* 389, 297, 63-F1 (1992)

Rotating Stars: The Angular Momentum Constraints. *Fernando de Felice & Leonardo Di G. Sigalotti.* 389, 386, 64-F7 (1992)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. II. Results and a Length Scale for Protostellar Cores. *Telemachos Ch. Mouschovias & Scott A. Morton.* 390, 144, 75-G1 (1992)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. III. A Further Parameter Study and Magnetically Controlled Accretion Rate. *Telemachos Ch. Mouschovias & Scott A. Morton.* 390, 166, 76-A11 (1992)

Limits on the Magnetic Flux of Pre–Main-Sequence Stars. *Gibor Basri, Geoffrey W. Marcy, & Jeff A. Valenti.* 390, 622, 83-A9 (1992)

Near-Infrared Polarized Images of a Nebula around T Tauri. *David A. Weintraub, Joel H. Kastner, B. Zuckerman, & Ian Gatley.* 391, 784, 97-F7 (1992)

Infrared Studies of Pre–Main-Sequence Intermediate-Mass Stars: LkHα 198. *Antonella Natta, Francesco Palla, Harold M. Butner, Neal J. Evans II, & Paul M. Harvey.* 391, 805, 98-A1 (1992)

Chemistry in Circumstellar Disks: CS toward HL Tauri. *Geoffrey A. Blake, Ewine F. van Dishoeck, & Anneila I. Sargent.* 391, L99, 100-A5 (1992)

Structure and Kinematics of the HH 111 Jet. *Bo Reipurth, A. C. Raga, & Steve Heathcote.* 392, 145, 102-F10 (1992)

Lithium Abundances in Classical and Weak T Tauri Stars. *Antonio Magazzù, Rafael Rebolo, & Yakov V. Pavlenko.* 392, 159, 103-A1 (1992)

The Evolution of Intermediate-Mass Protostars. II. Influence of the Accretion Flow. *Francesco Palla & Steven W. Stahler.* 392, 667, 110-E5 (1992)

Interpreting Infrared Color-Color Diagrams: Circumstellar Disks around Low- and Intermediate-Mass Young Stellar Objects. *Charles J. Lada & Fred C. Adams.* 393, 278, 117-E12 (1992)

VLA Imaging of a Possible Circumstellar Disk around HL Tauri. *L. F. Rodríguez, J. Cantó, J. M. Torrelles, J. F. Gómez, & P. T. P. Ho.* 393, L29, 120-E1 (1992)

Measurement of CO Overtone Line Profiles in SVS 13. *John S. Carr & Alan T. Tokunaga.* 393, L67, 127-D7 (1992)

Hydromagnetic Disk Winds in Young Stellar Objects and Active Galactic Nuclei. *Guy Pelletier & Ralph E. Pudritz.* 394, 117, 129-D13 (1992)

Emission-Line Studies of Young Stars. III. Correlations with the Infrared Excess. *Fred Hamann & S. E. Persson.* 394, 628, 137-C5 (1992)

Possible Detection of a High-Velocity Neutral Wind in T Tauri. *Abraham Ruiz, José L. Alonso, & I. F. Mirabel.* 394, L57, 139-D7 (1992)

Evidence for a Wind-swept Cavity in HH 34? *Alexander Rudolph & William J. Welch.* 395, 488, 148-F3 (1992)

Radio Continuum from the Powering Sources of the RNO 43, Haro 4-255 FIR, B335, and PV Cephei Outflows and from the Herbig-Haro Object 32A. *G. Anglada, L. F. Rodríguez, J. Cantó, R. Estalella, & J. M. Torrelles.* 395, 494, 148-G1 (1992)

Global Aspects of Dynamics and Star Formation in Taurus. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 395, 501, 148-G13 (1992)

Near-Infrared Observations of Young Stellar Objects in the ρ Ophiuchi Dark Cloud. *Thomas P. Greene & Erick T. Young.* 395, 516, 149-B5 (1992)

Model Scattering Envelopes of Young Stellar Objects. I. Method and Application to Circumstellar Disks. *Barbara A. Whitney & Lee Hartmann.* 395, 529, 149-D1 (1992)

The 8–13 Micron Spectrum of the Young Stellar Object WL 16. *M. S. Hanner, A. T. Tokunaga, & T. R. Geballe.* 395, L111, 154-C12 (1992)

Evidence for Unseen Companions around T Tauri Stars. *Kenneth A. Marsh & Michael J. Mahoney.* 395, L115, 154-D1 (1992)

Extremely High Velocity CO Emission from NGC 2071. *Lawrence M. Chernin & Colin R. Masson.* 396, L35, 160-F8 (1992)

On the Detectability of the Gas of Other Solar Nebulae. *Toshihiro Omodaka, Yoshimi Kitamura, & Eiko Kawazoe.* 396, L87, 167-C7 (1992)

On the Nature of the Excitation of Herbig-Haro Object 2. *José M. Torrelles, Luis F. Rodríguez, Jorge Cantó, Guillem Anglada, José F. Gómez, Salvador Curiel, & Paul T. P. Ho.* 396, L95, 167-D7 (1992)

Neutral Winds from Protostars. *Carlo Giovanardi, Susana Lizano, Antonella Natta, Neal J. Evans II, & Carl Heiles.* 397, 214, 170-E13 (1992)

Dusty Disks in the Multiple Systems UZ Tauri and GG Tauri. *M. Simon & S. Guilloteau.* 397, L47, 173-F9 (1992)

Emission-Line Studies of Young Stars. I. The T Tauri Stars. *Fred Hamann & S. E. Persson.* 82, 247, 52-F9 (1992)

Emission-Line Studies of Young Stars. II. The Herbig Ae/Be Stars. *Fred Hamann & S. E. Persson.* 82, 285, 53-C11 (1992)

IRAS Observations of Young Stellar Objects in the Corona Australis Dark Cloud. *Bruce A. Wilking, Thomas P. Greene, Charles J. Lada, Michael R. Meyer, & Erick T. Young.* 397, 520, 177-C9 (1992)

Herbig Ae/Be Stars: Intermediate-Mass Stars Surrounded by Massive Circumstellar Accretion Disks. *Lynne A. Hillenbrand, Stephen E. Strom, Frederick J. Vrba, & Jocelyn Keene.* 397, 613, 178-F1 (1992)

Resolving the Forbidden-Line Emission Regions of Young Stellar Objects: DD Tauri. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 397, L107, 181-D7 (1992)

Infrared Emission from Dust Structures Surrounding Herbig Ae/Be Stars. *F. Berrilli, G. Corciulo, G. Ingrosso, D. Lorenzetti, B. Nisini, & F. Strafella.* 398, 254, 185-A1 (1992)

Near-Infrared Spectrophotometry of FU Orionis Variables. *S. Sato, K. Okita, T. Yamashita, K. Mizutani, H. Shiba, Y. Kobayashi, & H. Takami.* 398, 273, 185-B7 (1992)

Rotation Periods of T Tauri Stars in the Orion Nebula Cluster: A Bimodal Frequency Distribution. *Joanne M. Attridge & William Herbst.* 398, L61, 188-B1 (1992)

The Bow Shock and Mach Disk of HH 34. *Jon A. Morse, Patrick Hartigan, Gerald Cecil, John C. Raymond, & Steve Heathcote.* 399, 231, 198-B3 (1992)

Cool Mass-losing Boundary Layers of T Tauri Accretion Disks. *Claude Bertout & Oded Regev.* 399, L163, 208-E1 (1992)

Spectacular Herbig-Haro Objects in the Carina Region. *K. Ogura & J. R. Walsh.* 400, 248, 212-A7 (1992)

Circumprotostellar Environments. I. Molecular Outflows from Protostar Candidates in Taurus. *G. H. Moriarty-Schieven, P. G. Wannier, M. Tamura, & Jocelyn Keene.* 400, 260, 212-B10 (1992)

The FU Orionis–Type Spectrum and Bipolar Outflow of Parsamyan 21. *H. J. Staude & Th. Neckel.* 400, 556, 217-C6 (1992)

A Binary Origin for FU Orionis Stars. *Ian Bonnell & Pierre Bastien.* 401, L31, 227-E1 (1992)

VLBI Survey of ρ Ophiuchi: A Population of Magnetized, Diskless Young Stellar Objects. *Philippe André, Bryan D. Deeney, Robert B. Phillips, & Jean-François Lestrade.* 401, 667, 230-G1 (1992)

Molecular Line Emission from Circumstellar Disks. *Steven V. W. Beckwith & Anneila I. Sargent.* 402, 280, 4-E9 (1993)

Model Scattering Envelopes of Young Stellar Objects. II. Infalling Envelopes. *Barbara A. Whitney & Lee Hartmann.* 402, 605, 10-B5 (1993)

Mass Loss from Pre–Main-Sequence Accretion Disks. I. The Accelerating Wind of FU Orionis. *Nuria Calvet, Lee Hartmann, & Scott J. Kenyon.* 402, 623, 10-D1 (1993)

The IRAS 16293−2422 Cloud Core: A Study of a Young Binary System. *Christopher K. Walker, John E. Carlstrom, & John H. Bieging.* 402, 655, 10-F11 (1993)

Theory of Jets from Young Stars. *R. V. E. Lovelace, M. M. Romanova, & J. Contopoulos.* 403, 158, 16-A1 (1993)

Wiggled Structure of Herbig-Haro Objects: Helical Kink Instability of Jets from Young Stellar Objects. *Yasushi Todo, Yutaka Uchida, Tetsuya Sato, & Robert Rosner.* 403, 164, 16-A9 (1993)

Observations of SO and SiO in the Outflow from NGC 2071. *Lawrence Chernin & Colin Masson.* 403, L21, 20-C6 (1993)

Magnetic Nonthermal Activity in the T Tauri System. *Robert B. Phillips, Colin J. Lonsdale, & Eric D. Feigelson.* 403, L43, 20-E5 (1993)

Formation of Double-peaked Lines in Stochastic Winds of T Tauri Stars. *A. S. Mitskevich, A. Natta, & V. P. Grinin.* 404, 751, 38-C7 (1993)

Discovery of a Rotating Protoplanetary Gas Disk around the Young Star GG Tauri. *R. Kawabe, M. Ishiguro, T. Omodaka, Y. Kitamura, & S. M. Miyama.* 404, L63, 40-E1 (1993)

Hard X-Rays from the Orion Nebula Region. *Shigeo Yamauchi & Katsuji Koyama.* 405, 268, 44-D8 (1993)

Magnetic Confinement of the Optical Jets in Young Stellar Objects. *S.-U. Choe & T. W. Jones.* 405, 698, 51-F11 (1993)

An *IRAS* Survey of Star-forming Regions toward Cygnus. *Sten F. Odenwald & Phil R. Schwartz.* 405, 706, 51-G7 (1993)

Do the Spectral Energy Distributions of GK Tauri and HK Tauri Indicate the Presence of Planetary Companions? *Kenneth A. Marsh & Michael J. Mahoney.* 405, L71, 54-D10 (1993)

Submillimeter Continuum Observations of ρ Ophiuchi A: The Candidate Protostar VLA 1623 and Prestellar Clumps. *Philippe André, Derek Ward-Thompson, & Mary Barsony.* 406, 122, 56-F3 (1993)

Rotation of Young Solar-Type Stars in the Orion Nebula Region. *Douglas K. Duncan.* 406, 172, 57-C1 (1993)

The H_2 Velocity Field in Herbig-Haro 7-11. *John S. Carr.* 406, 553, 64-F6 (1993)

Fragmentation of Elongated Cylindrical Clouds. VI. Comparison with Observations. *Ian Bonnell & Pierre Bastien.* 406, 614, 65-E1 (1993)

Infrared Studies of Circumstellar Matter around Herbig Ae/Be and Related Stars. *Antonella Natta, Francesco Palla, Harold M. Butner, Neal J. Evans II, & Paul M. Harvey.* 406, 674, 66-C4 (1993)

The Circumstellar Density Distribution of L1551NE. *M. Barsony & C. J. Chandler.* 406, L71, 68-E1 (1993)

The Excess Infrared Emission of Herbig Ae/Be Stars: Disks or Envelopes? *Lee Hartmann, Scott J. Kenyon, & Nuria Calvet.* 407, 219, 71-F11 (1993)

X-Rays from Emission-Line Stars in the Herbig-Haro 1 Region. *Steven H. Pravdo & Lorella Angelini.* 407, 232, 72-A1 (1993)

Near-Infrared Observations of the HH 111 Region. *Roland Gredel & Bo Reipurth.* 407, L29, 75-D1 (1993)

Infrared and Optical Imaging of *IRAS* Sources with CO Outflow: A Snapshot of Early Star Formation. *H. Chen, A. T. Tokunaga, K. M. Strom, & K.-W. Hodapp.* 407, 639, 78-E4 (1993)

Embedded Star Clusters Associated with Luminous *IRAS* Point Sources. *John M. Carpenter, Ronald L. Snell, F. Peter Schloerb, & M. F. Skrutskie.* 407, 657, 78-F11 (1993)

Centrifugally Driven Winds from Protostellar Disks. I. Wind Model and Thermal Structure. *Pedro N. Safier.* 408, 115, 84-E6 (1993)

Centrifugally Driven Winds from Protostellar Disks. II. Forbidden-Line Emission in T Tauri Stars. *Pedro N. Safier.* 408, 148, 85-A1 (1993)

Circumstellar Molecular Gas of the HH 34 and HH 111 Exciting Stars. *Karl R. Stapelfeldt & Nicholas Z. Scoville.* 408, 239, 86-B1 (1993)

Multiplicity and the Ages of the Stars in the Taurus Star-forming Region. *M. Simon, A. M. Ghez, & Ch. Leinert.* 408, L33, 89-B1 (1993)

A New Herbig-Haro Flow in the HH 1–2 Complex. *Bo Reipurth, Steve Heathcote, M. Roth, A. Noriega-Crespo, & A. C. Raga.* 408, L49, 89-D1 (1993)

Chemical Differentiation between Star-forming Regions: The Orion Hot Core and Compact Ridge. *P. Caselli, T. I. Hasegawa, & Eric Herbst.* 408, 548, 92-A11 (1993)

Circularly Polarized Radio Emission from the T Tauri Star Hubble 4. *Stephen L. Skinner.* 408, 660, 93-D6 (1993)

Near-Infrared Discovery of the L810 Nebula Illuminator. *João Lin Yun, Dan P. Clemens, Mark J. McCaughrean, & Marcia Rieke.* 408, L101, 95-E9 (1993)

Ice Grains in the Corona Australis Molecular Cloud. *W. P. Chen & J. A. Graham.* 409, 319, 101-A11 (1993)

Detection of Circumstellar Gas Associated with GG Tauri. *M. F. Skrutskie, R. L. Snell, K. M. Strom, S. E. Strom, S. Edwards, Y. Fukui, A. Mizuno, M. Hayashi, & N. Ohashi.* 409, 422, 102-C1 (1993)

The Formation and Evolution of Shocks in Stellar Jets from a Variable Wind. *Patrick Hartigan & John Raymond.* 409, 705, 107-G5 (1993)

The Origin of Forbidden Line Emission from Young Stellar Objects. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 409, 748, 108-D3 (1993)

An Infrared Survey for Embedded Young Stars in the Perseus Molecular Cloud Complex. *E. F. Ladd, E. A. Lada, & P. C. Myers.* 410, 168, 114-C1 (1993)

High-Resolution Long-Slit Spectral Imaging of the Mass Outflows in the Immediate Vicinity of DG Tauri. *J. Solf & K. H. Böhm.* 410, L31, 118-F13 (1993)

Three-dimensional Simulations of Protostellar Jets. *Elisabete M. de Gouveia Dal Pino & Willy Benz.* 410, 686, 122-B13 (1993)

The Bow Shock and Mach Disk of HH 111V. *Jon A. Morse, Steve Heathcote, Gerald Cecil, Patrick Hartigan, & John C. Raymond.* 410, 764, 123-C5 (1993)

A Search for Herbig-Haro Objects near Herbig Ae/Be Stars. *Robert W. Goodrich.* 86, 499, 21-A5 (1993)

The Inner-Disk and Stellar Properties of the Young Stellar Object WL 16. *John S. Carr, Alan T. Tokunaga, Joan Najita, Frank H. Shu, & Alfred E. Glassgold.* 411, L37, 134-A13 (1993)

The Exciting Young Stellar Object for the Molecular Outflow at the Core of L1287. *David A. Weintraub & Joel Kastner.* 411, 767, 139-C9 (1993)

An Alternative to Unseen Companions to T Tauri Stars. *Alan P. Boss & Harold W. Yorke.* 411, L99, 142-F11 (1993)

Infrared Luminosity Functions for the Young Stellar Population Associated with the L1641 Molecular Cloud. *Karen M. Strom, Stephen E. Strom, & K. M. Merrill.* 412, 233, 145-A8 (1993)

The Atmospheres of T Tauri Stars. II. Chromospheric Line Fluxes and Veiling. *C. C. Batalha & Gibor Basri.* 412, 363, 146-E13 (1993)

Subarcsecond Images of CW Tauri: Constraints on Disk Size and Jet Formation. *Ana I. Gómez de Castro.* 412, L43, 148-E5 (1993)

A High-Sensitivity Survey of Radio Continuum Emission from Herbig Ae/Be Stars. *Stephen L. Skinner, Alexander Brown, & Ron T. Stewart.* 87, 217, 29-G13 (1993)

The Temperature Profile of T Tauri Disks. *Antonella Natta.* 412, 761, 153-C6 (1993)

The Discovery of Two FU Orionis Objects in L1641. *Karen M. Strom & Stephen E. Strom.* 412, L63, 155-D1 (1993)

Submillimeter CO Observations of Warm Gas around T Tauri Stars. *K. F. Schuster, A. I. Harris, Nels Anderson, & A. P. G. Russell.* 412, L67, 155-D7 (1993)

Infrared CO Emission from Young Stars: High-Resolution Spectroscopy. *C. J. Chandler, J. E. Carlstrom, N. Z. Scoville, W. R. F. Dent, & T. R. Geballe.* 412, L71, 155-D13 (1993)

Numerical Simulations of Protostellar Jets with Nonequilibrium Cooling. I. Method and Two-dimensional Results. *James M. Stone & Michael L. Norman.* 413, 198, 158-E6 (1993)

Properties of Jet-driven Molecular Outflows. *Colin R. Masson & Lawrence M. Chernin.* 414, 230, 172-G10 (1993)

Upper Limits to the Detection of Ammonia from Protoplanetary Disks around HL Tauri and L1551-IRS 5. *José F. Gómez, José M. Torrelles, Paul T. P. Ho, Luis F. Rodríguez, & Jorge Cantó.* 414, 333, 174-B6 (1993)

The Embedded Young Stars in the Taurus-Auriga Molecular Cloud. I. Models for Spectral Energy Distributions. *Scott J. Kenyon, Nuria Calvet, & Lee Hartmann.* 414, 676, 179-F1 (1993)

The Contribution of Disks and Envelopes to the Millimeter Continuum Emission from Very Young Low-Mass Stars. *S. Terebey, C. J. Chandler, & P. André.* 414, 759, 180-F6 (1993)

The Embedded Young Stars in the Taurus-Auriga Molecular Cloud. II. Models for Scattered Light Images. *Scott J. Kenyon, Barbara A. Whitney, Mercedes Gomez, & Lee Hartmann.* 414, 773, 180-G9 (1993)

Disks around Pre–Main-Sequence Binary Systems: The Case of Haro 6-10. *François Ménard, Jean-Louis Monin, Françoise Angelucci, & Daniel Rouan.* 414, L117, 186-B5 (1993)

Observations of Entrainment and Time Variability in the HH 47 Jet. *Patrick Hartigan, Jon A. Morse, Steve Heathcote, & Gerald Cecil.* 414, L121, 186-B11 (1993)

The Triple Radio Continuum Source in Serpens: The Birth of a Herbig-Haro System? *S. Curiel, L. F. Rodríguez, J. M. Moran, & J. Cantó.* 415, 191, 187-D5 (1993)

Molecular Line Emission Models of Herbig-Haro Objects. II. HCO^+ Emission. *Mark G. Wolfire & Arieh Königl.* 415, 204, 187-E6 (1993)

Detection of Accreting Gas toward HD 45677: A Newly Recognized, Herbig Be Proto–Planetary System. *C. A. Grady, K. S. Bjorkman, D. Shepherd, R. E. Schulte-Ladbeck, M. R. Pérez, D. de Winter, & P. S. Thé.* 415, L39, 192-B6 (1993)

Hubble Space Telescope Images of the Subarcsecond Jet in DG Tauri. *J. Kepner, P. Hartigan, C. Yang, & S. Strom.* 415, L119, 200-C8 (1993)

Boundary Layers in Pre–Main-Sequence Accretion Disks. *Robert Popham, Ramesh Narayan, Lee Hartmann, & Scott Kenyon.* 415, L127, 200-D9 (1993)

HH 80–81: A Highly Collimated Herbig-Haro Complex Powered by a Massive Young Star. *J. Martí, L. F. Rodríguez, & B. Reipurth.* 416, 208, 203-F1 (1993)

Gravitational Collapse of an Isothermal Sphere. *Prudence N. Foster & Roger A. Chevalier.* 416, 303, 204-G8 (1993)

ROSAT X-Ray Study of the Chamaeleon I Dark Cloud. I. The Stellar Population. *Eric D. Feigelson, Sophie Casanova, Thierry Montmerle, & Jean Guibert.* 416, 623, 211-B8 (1993)

Ultraviolet Spectroscopy of Herbig-Haro Objects: Spatial Structure, Spectroscopic Diagnostics, and Variability. *K.-H. Böhm, A. Noriega-Crespo, & J. Solf.* 416, 647, 211-D11 (1993)

Ammonia Emission Downstream of the Herbig-Haro Object 1. *J. M. Torrelles, J. F. Gómez, P. T. P. Ho, G. Anglada, L. F. Rodríguez, & J. Cantó.* 417, 655, 227-D13 (1993)

Spectrum of the "Invisible" Companion of Z Canis Majoris Revealed in Polarized Light. *Barbara A. Whitney, Geoffrey C. Clayton, Regina E. Schulte-Ladbeck, Nuria Calvet, Lee Hartmann, & Scott J. Kenyon.* 417, 687, 228-A1 (1993)

The Pre–Main-Sequence Evolution of Intermediate-Mass Stars. *Francesco Palla & Steven W. Stahler.* 418, 414, 236-B10 (1993)

A Dynamically Accreting Gas Disk around HL Tauri. *Masahiko Hayashi, Nagayoshi Ohashi, & Shoken M. Miyama.* 418, L71, 245-C13 (1993)

Molecular Hydrogen in the IRAS 03282+3035 Stellar Jet. *John Bally, David Devine, Mark Hereld, & Bernard J. Rauscher.* 418, L75, 245-D7 (1993)

Forbidden Line Formation in Hydromagnetic Disk Winds. I. Oblique Shocks. *Rachid Ouyed & Ralph E. Pudritz.* 419, 255, 249-C13 (1993)

A Well-shaped Bipolar Outflow Shell in Monoceros R2. *Taoling Xie, Paul F. Goldsmith, & Nimesh Patel.* 419, L33, 252-E7 (1993)

Molecular Cloud Core and CS Outflow Associated with Haro 4-255 FIR. *Ken'ichi Tatematsu, Tomofumi Umemoto, Yasuhiro Murata, Hua Chen, Naomi Hirano, & Hiroshi Takaba.* 419, 746, 257-A1 (1993)

Detection of Water Vapor in T Tauri Stars. *H. Shiba, S. Sato, T. Yamashita, Y. Kobayashi, & H. Takami.* 89, 299, 53-F1 (1993)

A Synoptic Study of Hα Line Profile Variability in the T Tauri Star SU Aurigae. *Mark S. Giampapa, Gibor S. Basri, Christopher M. Johns, & Catherine L. Imhoff.* 89, 321, 54-A8 (1993)

Numerical Simulations of Protostellar Jets with Nonequilibrium Cooling. III. Three-dimensional Results. *James M. Stone & Michael L. Norman.* 420, 237, 3-G4 (1994)

"Spherical" Disks: Moving toward a Unified Source Model for L1551. *Harold M. Butner, Antonella Natta, & Neal J. Evans II.* 420, 326, 5-A1 (1994)

From T Tauri Stars to Protostars: Circumstellar Material and Young Stellar Objects in the ρ Ophiuchi Cloud. *Philippe André & Thierry Montmerle.* 420, 837, 13-C12 (1994)

Discovery of a Deeply Embedded Companion to LkHα 234. *David A. Weintraub, Joel H. Kastner, & Ashwin Mahesh.* 420, L87, 15-F1 (1994)

A Radio Candidate for the Exciting Source of the L1287 Bipolar Outflow. *Guillem Anglada, Luis F. Rodríguez, José M. Girart, Robert Estalella, & José M. Torrelles.* 420, L91, 15-F7 (1994)

Stellar Density Enhancements Associated with *IRAS* Sources in L1641. *Hua Chen & Alan T. Tokunaga.* 90, 149, 2-G12 (1994)

New Pre–Main-Sequence Tracks for $M \leq 2.5 M\odot$ as Tests of Opacities and Convection Model. *Francesca D'Antona & Italo Mazzitelli.* 90, 467, 8-D14 (1994)

Slender Elliptical Jets. *Michael D. Smith.* 421, 400, 23-B11 (1994)

HST Photometry of the Trapezium Cluster. *Charles F. Prosser, John R. Stauffer, Lee Hartmann, David R. Soderblom, Burton F. Jones, Michael W. Werner, & Mark J. McCaughrean.* 421, 517, 24-E9 (1994)

Dynamics of Binary-Disk Interaction. I. Resonances and Disk Gap Sizes. *Paweł Artymowicz & Stephen H. Lubow.* 421, 651, 26-D1 (1994)

Imaging Polarimetry of HL Tauri and GG Tauri: A Geometrically Thin Disk around GG Tauri. *Takuya Yamashita, Klaus-W. Hodapp, & Toby J. T. Moore.* 422, L21, 36-D7 (1994)

Radio Evidence for Nonthermal Particle Acceleration on Stars of Late Spectral Type. *Kenneth R. Lang.* 90, 753, 13-B5 (1994)

Effect of Advected Fields on Accretion Disk Dynamos. *Arun V. Mangalam & K. Subramanian.* 90, 963, 15-G3 (1994)

A Molecular Jet from LkHα 234. *George F. Mitchell & Henry E. Matthews.* 423, L55, 53-G8 (1994)

Infrared Spectroscopy and Imaging Polarimetry of the Disk around the T Tauri Star RNO 91. *David A. Weintraub, Stephen C. Tegler, Joel H. Kastner, & Terrence Rettig.* 423, 674, 57-A3 (1994)

Velocity, Obscuration, and Age of Ionized Winds: Can They Be Correlated? *S. C. Beck.* 423, 733, 57-F5 (1994)

Forbidden-Line Formation in Hydromagnetic Disk Winds. II. Line Profiles. *Rachid Ouyed & Ralph E. Pudritz.* 423, 753, 58-A3 (1994)

Circumstellar Gas around the Exciting Source of the HH 83 Jet. *Makoto Nakano, Koji Sugitani, Fumio Sato, & Katsuo Ogura.* 423, L147, 61-D5 (1994)

A Multiwavelength Study of Star Formation in the L1495E Cloud in Taurus. *Karen M. Strom & Stephen E. Strom.* 424, 237, 64-G4 (1994)

Capture and Induced Disk Accretion in Young Star Encounters. *Eve C. Ostriker.* 424, 292, 65-D14 (1994)

Near-Infrared Spectroscopy of Young Stellar Objects. *D. M. Kelly, G. H. Rieke, & B. Campbell.* 425, 231, 83-B5 (1994)

Optical Variability in the Unusual K5 V Infrared-Excess Star HD 98800. *Gregory W. Henry & Douglas S. Hall.* 425, L25, 85-D9 (1994)

Evidence for HCO^+ Infall toward T Tauri? *Huib Jan van Langevelde, Ewine F. van Dishoeck, & Geoffrey A. Blake.* 425, L45, 85-F11 (1994)

Fabry-Perot Observations and New Models of the HH 47A and HH 47D Bow Shocks. *Jon A. Morse, Patrick Hartigan, Steve Heathcote, John C. Raymond, & Gerald Cecil.* 425, 738, 91-A1 (1994)

Successive Ejection Events in the L1551 Molecular Outflow. *R. Bachiller, M. Tafalla, & J. Cernicharo.* 425, L93, 94-F1 (1994)

Momentum Transfer by Astrophysical Jets. *Lawrence Chernin, Colin Masson, Elisabete M. de Gouveia Dal Pino, & Willy Benz.* 426, 204, 98-F2 (1994)

A $C^{18}O$ (J = 1–0) Survey of Protostellar Candidates Embedded in the Taurus Molecular Cloud. *Masahiko Hayashi, Tetsuo Hasegawa, Nagayoshi Ohashi, & Kazuyoshi Sunada.* 426, 234, 99-A8 (1994)

Magnetospheric Accretion Models for T Tauri Stars. I. Balmer Line Profiles without Rotation. *Lee Hartmann, Robert Hewett, & Nuria Calvet.* 426, 669, 106-F13 (1994)

Molecular Lines in Bok Globules and around Herbig Ae/Be Stars. *F. Scappini, G. G. C. Palumbo, G. Bruni, & P. Bergman.* 427, 259, 113-B12 (1994)

Polarization Profiles of Scattered Emission Lines. II. Upstream Dust Scattering in the HH 1 Jet. *W. J. Henney, A. C. Raga, & D. J. Axon.* 427, 305, 113-F6 (1994)

Outflows from Young Stellar Objects in Bok Globules: Maps. *João Lin Yun & Dan P. Clemens.* 92, 145, 33-C5 (1994)

Are Wide Pre–Main-Sequence Binaries Coeval? *Patrick Hartigan, Karen M. Strom, & Stephen E. Strom.* 427, 961, 124-E10 (1994)

Using FU Orionis Outbursts to Constrain Self-regulated Protostellar Disk Models. *K. R. Bell & D. N. C. Lin.* 427, 987, 125-A1 (1994)

Asymmetries in Bipolar Jets from Young Stars. *Gerhard A. Hirth, Reinhard Mundt, Josef Solf, & Thomas P. Ray.* 427, L99, 127-B11 (1994)

Subarcsecond VLA Maps of the Disk and the Jet in HL Tauri. *L. F. Rodríguez, J. Cantó, J. M. Torrelles, J. F. Gómez, G. Anglada, & P. T. P. Ho.* 427, L103, 127-C3 (1994)

Dense Molecular Shocks and Accretion onto Protostellar Disks. *David A. Neufeld & David J. Hollenbach.* 428, 170, 130-C11 (1994)

Magnetic Braking in Spin Evolution of Magnetized T Tauri Stars. *Insu Yi.* 428, 760, 139-F6 (1994)

A Parsec-Scale "Superjet" and Quasi-periodic Structure in the HH 34 Outflow? *John Bally & David Devine.* 428, L65, 142-F8 (1994)

A Connection between Submillimeter Continuum Flux and Separation in Young Binaries. *Eric L. N. Jensen, Robert D. Mathieu, & Gary A. Fuller.* 429, L29, 150-D9 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. I. A Generalized Model. *Frank Shu, Joan Najita, Eve Ostriker, Frank Wilkin, Steven Ruden, & Susana Lizano.* 429, 781, 155-D5 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. II. Formulation of the Dynamical Problem. *Frank H. Shu, Joan Najita, Steven P. Ruden, & Susana Lizano.* 429, 797, 155-E9 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. III. Numerical Solution of the Sub-Alfvénic Region. *Joan R. Najita & Frank H. Shu.* 429, 808, 155-F9 (1994)

A Sub-Arcsecond–Scale Spectroscopic Study of the Complex Mass Outflows in the Vicinity of T Tauri. *K.-H. Böhm & J. Solf.* 430, 277, 162-E6 (1994)

Protostellar Collapse in a Self-gravitating Sheet. *Lee Hartmann, Alan Boss, Nuria Calvet, & Barbara Whitney.* 430, L49, 165-G5 (1994)

Cepheus A HW2: A Powerful Thermal Radio Jet. *Luis F. Rodríguez, Guido Garay, Salvador Curiel, Solange Ramírez, José M. Torrelles, Yolanda Gómez, & Arturo Velázquez.* 430, L65, 166-B2 (1994)

The Nature of CO and H_2O Ices in the Corona Australis Molecular Cloud. *Masuo Tanaka, Tetsuya Nagata, Shuji Sato, & Tetsuo Yamamoto.* 430, 779, 171-E8 (1994)

Spectroscopic Signatures of Infall in Young Protostellar Systems. *Christopher K. Walker, Gopal Narayanan, & Alan P. Boss.* 431, 767, 188-B5 (1994)

Water Masers Associated with Low-Mass Stars: A 13 Month Monitoring Survey. *Bruce A. Wilking, Mark J. Claussen, Priscilla J. Benson, Philip C. Myers, Susan Terebey, & Alwyn Wootten.* 431, L119, 192-B1 (1994)

Emission-Line Studies of Young Stars. IV. The Optical Forbidden Lines. *Fred Hamann.* 93, 485, 49-D4 (1994)

Multiwavelength Study of the Magnetically Active T Tauri Star HD 283447. *Eric D. Feigelson, Alan D. Welty, Catherine L. Imhoff, Jeffrey C. Hall, Paul B. Etzel, Robert B. Phillips, & Colin J. Lonsdale.* 432, 373, 197-G1 (1994)

Constraining Circumstellar Environments: Far-Infrared Observations of Herbig Ae/Be Stars. *James Di Francesco, Neal J. Evans II, Paul M. Harvey, Lee G. Mundy, & Harold M. Butner.* 432, 710, 204-G8 (1994)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. I. Axisymmetric Solutions. *Shantanu Basu & Telemachos Ch. Mouschovias.* 432, 720, 205-A6 (1994)

Variable Extinction in HD 45677 and the Evolution of Dust Grains in Pre–Main-Sequence Disks. *Michael L. Sitko, Elaine M. Halbedel, Geoffrey F. Lawrence, J. Allyn Smith, & Ken Yanow.* 432, 753, 205-D3 (1994)

The 3.2–3.6 Micron Spectra of Monoceros R2/IRS-3 and Elias 16. *K. Sellgren, R. G. Smith, & T. Y. Brooke.* 433, 179, 210-E5 (1994)

Near-Infrared (J, H, K') Imaging of Herbig Ae/Be Stars. *Wenbin Li, Neal J. Evans II, Paul M. Harvey, & Cecilia Colomé.* 433, 199, 210-G3 (1994)

Silicates and Aromatic Hydrocarbons in the 10 Micron Spectrum of the Taurus Dark Cloud Source Elias 1. *Martha S. Hanner, Timothy Y. Brooke, & Alan T. Tokunaga.* 433, L97, 224-C7 (1994)

A Numerical Simulation of a Variable Velocity Jet. *S. Biro & A. C. Raga.* 434, 221, 228-D11 (1994)

Flat Spectrum T Tauri Stars: The Case for Infall. *Nuria Calvet, Lee Hartmann, Scott J. Kenyon, & Barbara A. Whitney.* 434, 330, 230-A6 (1994)

Further Mid-Infrared Study of the ρ Ophiuchi Cloud Young Stellar Population: Luminosities and Masses of Pre–Main-Sequence Stars. *Thomas P. Greene, Bruce A. Wilking, Philippe André, Erick T. Young, & Charles J. Lada.* 434, 614, 236-C6 (1994)

10 Micron Imaging of UZ Tauri: Evidence for Circumstellar Disk Clearing due to a Close Companion Star. *A. M. Ghez, J. P. Emerson, J. R. Graham, M. Meixner, & C. J. Skinner.* 434, 707, 237-E3 (1994)

Protostellar Accretion Disks Resolved with the JCMT-CSO Interferometer. *O. P. Lay, J. E. Carlstrom, R. E. Hills, & T. G. Phillips.* 434, L75, 241-G9 (1994)

Multiple Outflow Episodes from Protostars: Three-dimensional Models of Intermittent Jets. *Elisabete M. de Gouveia Dal Pino & Willy Benz.* 435, 261, 246-G11 (1994)

The Puzzling Distribution of the High-Density Molecular Gas in HH 1–2: A Contracting Interstellar Toroid? *José M. Torrelles, José F. Gómez, Paul T. P. Ho, Luis F. Rodríguez, Guillem Anglada, & Jorge Cantó.* 435, 290, 247-D2 (1994)

The Luminosity Functions of Embedded Stellar Clusters. I. Method of Solution and Analytic Results. *André B. Fletcher & Steven W. Stahler.* 435, 313, 247-F11 (1994)

The Luminosity Functions of Embedded Stellar Clusters. II. Numerical Results. *André B. Fletcher & Steven W. Stahler.* 435, 329, 248-A3 (1994)

WFPC2 Observations of the Double Cluster NGC 1850 in the Large Magellanic Cloud. *R. Gilmozzi, E. K. Kinney, S. P. Ewald, N. Panagia, & M. Romaniello.* 435, L43, 252-B7 (1994)

Mass-Loss Rates, Ionization Fractions, Shock Velocities, and Magnetic Fields of Stellar Jets. *Patrick Hartigan, Jon A. Morse, & John Raymond.* 436, 125, 263-A6 (1994)

Postrefurbishment Mission *Hubble Space Telescope* Images of the Core of the Orion Nebula: Proplyds, Herbig-Haro Objects, and Measurements of a Circumstellar Disk. *C. R. O'Dell & Zheng Wen.* 436, 194, 263-G8 (1994)

[Fe II] 1.53 and 1.64 Micron Emission from Pre–Main-Sequence Stars. *Fred Hamann, Michal Simon, John S. Carr, & Lisa Prato.* 436, 292, 265-C10 (1994)

High-Velocity Sulfur Monoxide Emission from Protostellar Outflows. *Lawrence M. Chernin, Colin R. Masson, & Gary A. Fuller.* 436, 741, 275-F3 (1994)

The Molecular Core and the Powering Source of the Bipolar Molecular Outflow in NGC 2264G. *José F. Gómez, Salvador Curiel, José M. Torrelles, Luis F. Rodríguez, Guillem Anglada, & José M. Girart.* 436, 749, 275-G1 (1994)

Circumprotostellar Environments. II. Envelopes, Activity, and Evolution. *G. H. Moriarty-Schieven, P. G. Wannier, Jocelyn Keene, & M. Tamura.* 436, 800, 276-F1 (1994)

Einstein X-Ray Observations of Herbig Ae/Be Stars. *F. Damiani, G. Micela, S. Sciortino, & F. R. Harnden, Jr.* 436, 807, 276-F12 (1994)

A Molecular Outflow Driven by an Optical Jet. *George F. Mitchell, Tatsuhiko I. Hasegawa, William R. F. Dent, & Henry E. Matthews.* 436, L177, 282-A11 (1994)

Shocked Molecular Gas around the Extremely Young Source IRAS 03282+3035. *R. Bachiller, S. Terebey, T. Jarrett, J. Martín-Pintado, C. A. Beichman, & D. Van Buren.* 437, 296, 287-C2 (1994)

The Circumstellar Environment of IRAS 05338−0624. *Joseph P. McMullin, Lee G. Mundy, & Geoff A. Blake.* 437, 305, 287-D6 (1994)

The Complete *Einstein Observatory* X-Ray Survey of the Orion Nebula Region. *Marc Gagné & Jean-Pierre Caillault.* 437, 361, 288-B10 (1994)

Solar Neutrinos: Sensitivity to Pre–Main-Sequence Evolution and to the Depth of the Convective Zone. *John N. Bahcall & Ami Glasner.* 437, 485, 289-F13 (1994)

Vibrationally Excited CS: A New Probe of Conditions in Young Protostellar Systems. *Christopher K. Walker, Philip R. Maloney, & E. Serabyn.* 437, L127, 299-E3 (1994)

Formation and Evolution of Massive Stars. *Martin Beech & R. Mitalas.* 95, 517, 71-D9 (1994)

10 Micron Spectroscopy of Young Stars in the ρ Ophiuchi Cloud. *M. S. Hanner, T. Y. Brooke, & A. T. Tokunaga.* 438, 250, 4-G9 (1995)

Photoevaporating Stellar Envelopes Observed with Rayleigh Beacon Adaptive Optics. *P. R. McCullough, R. Q. Fugate, J. C. Christou, B. L. Ellerbroek, C. H. Higgins, J. M. Spinhirne, R. A. Cleis, & J. F. Moroney.* 438, 394, 6-G11 (1995)

A Multitransition CO Study of GL 490. *George F. Mitchell, Siow Wang Lee, Jean-Pierre Maillard, Henry Matthews, Tatsuhiko I. Hasegawa, & Andrew I. Harris.* 438, 794, 15-B12 (1995)

The Evolutionary Status of the Stellar Population in the ρ Ophiuchi Cloud Core. *Karen M. Strom, Jeremy Kepner, & Stephen E. Strom.* 438, 813, 15-D7 (1995)

Multiple Star Formation in Bok Globule CB 34. *João F. Alves & João L. Yun.* 438, L107, 20-C1 (1995)

Evidence for Chemical Processing of Precometary Icy Grains in Circumstellar Environments of Pre–Main-Sequence Stars. *Stephen C. Tegler, David A. Weintraub, Terrence W. Rettig, Yvonne J. Pendleton, Douglas C. B. Whittet, & Craig A. Kulesa.* 439, 279, 25-A9 (1995)

Millimeter-Wave Continuum Measurements of Young Stars. *M. Osterloh & V. W. Beckwith.* 439, 288, 25-B8 (1995)

A Search for T Tauri Stars in High-Latitude Molecular Clouds. II. The *IRAS* Faint Source Survey Catalog. *Loris Magnani, Jean-Pierre Caillault, Ari Buchalter, & C. A. Beichman.* 96, 159, 3-F3 (1995)

ROSAT X-Ray Sources Embedded in the ρ Ophiuchi Cloud Core. *Sophie Casanova, Thierry Montmerle, Eric D. Feigelson, & Philippe André.* 439, 752, 35-A7 (1995)

Spatially Resolved Submillimeter Continuum Emission toward L1551 IRS 5. *E. F. Ladd, G. A. Fuller, R. Padman, P. C. Myers, & Fred C. Adams.* 439, 771, 35-C2 (1995)

Spectral Energy of First Protostellar Cores: Detecting "Class −I" Protostars with *ISO* and *SIRTF*. *Alan P. Boss & Harold W. Yorke.* 439, L55, 40-E11 (1995)

Hot Spots in the NGC 2071 Molecular Outflow. *Lawrence M. Chernin & W. J. Welch.* 440, L21, 48-D8 (1995)

Composite Spectra in Young Stars: Accretion or Close Companions? *Chris D. Koresko.* 440, 764, 53-F1 (1995)

Evidence for Dust around Post T Tauri Stars. *Thomas P. Ray, Anneila I. Sargent, Steve V. W. Beckwith, Chris Koresko, & Patrick Kelly.* 440, L89, 58-B9 (1995)

Water Masers in the L1448C Outflow. *Lawrence M. Chernin.* 440, L97, 58-C9 (1995)

A Search for Pre–Main-Sequence Stars in High-Latitude Molecular Clouds. III. A Survey of the *Einstein* Database. *Jean-Pierre Caillault, Loris Magnani, & Chris Fryer.* 441, 261, 62-G12 (1995)

H I, CO, and *IRAS* Observations of NGC 7023. *C. Rogers, Mark H. Heyer, & P. E. Dewdney.* 442, 694, 89-F10 (1995)

Magnetized Accretion and Spin Evolution in Classical T Tauri Stars. *Insu Yi.* 442, 768, 90-G2 (1995)

Powerful Jets and Weak Outflows: HH 1–2 and HH 34. *Lawrence M. Chernin & Colin R. Masson.* 443, 181, 97-E11 (1995)

A Lunar Occultation and Direct Imaging Survey of Multiplicity in the Ophiuchus and Taurus Star-forming Regions. *M. Simon, A. M. Ghez, Ch. Leinert, L. Cassar, W. P. Chen, R. R. Howell, R. F. Jameson, K. Matthews, G. Neugebauer, & A. Richichi.* 443, 625, 106-E1 (1995)

The Molecular Environment of the HH 34 System. *G. Anglada, R. Estalella, R. Mauersberger, J. M. Torrelles, L. F. Rodríguez, J. Cantó, P. T. P. Ho, & P. D'Alessio.* 443, 682, 107-C9 (1995)

The FU Orionis Outburst as a Thermal Accretion Event: Observational Constraints for Protostellar Disk Models. *K. R. Bell, D. N. C. Lin, L. W. Hartmann, & S. J. Kenyon.* 444, 376, 118-F8 (1995)

Socket Stars: *UBVRIJK* Radial Profiles. *Bradley E. Schaefer.* 444, 739, 126-D13 (1995)

Another Look at the *UBV* Variability of T Tauri Stars. *Pedro N. Safier.* 444, 818, 127-F12 (1995)

Detection of Shocked Molecular Hydrogen in Infrared Companions to T Tauri Stars: Evidence for Ongoing Accretion. *T. M. Herbst, C. D. Koresko, & Christoph Leinert.* 444, L93, 130-F13 (1995)

Deep *ROSAT* HRI Observations of the Orion Nebula Region. *Marc Gagné, Jean-Pierre Caillault, & John R. Stauffer.* 445, 280, 136-D2 (1995)

Growth of Protoplanetary Disks around Young Stellar Objects. *Taishi Nakamoto & Yoshitsugu Nakagawa.* 445, 330, 137-A12 (1995)

Bolometric Temperature and Young Stars in the Taurus and Ophiuchus Complexes. *H. Chen, P. C. Myers, E. F. Ladd, & D. O. S. Wood.* 445, 377, 137-F9 (1995)

Infrared Spectroscopy of Herbig-Haro Objects. *Richard D. Schwartz, A. S. B. Schultz, Martin Cohen, & Peredur M. Williams.* 446, 318, 157-E8 (1995)

Einstein Observations of T Tauri Stars in Taurus-Auriga. I. Properties of X-Ray Emission. *F. Damiani, G. Micela, S. Sciortino, & F. R. Harnden, Jr.* 446, 331, 157-F10 (1995)

Einstein Observations of T Tauri Stars in Taurus-Auriga. II. Relationships between X-Ray Emission and Pre–Main-Sequence Activity. *F. Damiani & G. Micela.* 446, 341, 157-G11 (1995)

Infrared CO Emission from Young Stars: Accretion Disks and Neutral Winds. *C. J. Chandler, J. E. Carlstrom, & N. Z. Scoville.* 446, 793, 167-A7 (1995)

Emission-Line Pre–Main-Sequence Stars and X-Ray Sources in Orion. *Steven H. Pravdo & Lorella Angelini.* 447, 342, 177-B3 (1995)

The Subarcsecond 10 Micron Size of LkHα 101: Constraints on Circumstellar Dust. *R. M. Danen, C. R. Gwinn, & E. E. Bloemhof.* 447, 391, 177-F13 (1995)

HST/GHRS Observations of the β Pictoris System: Basic Parameters of the Age of the System. *Thierry Lanz, Sara R. Heap, & Ivan Hubeny.* 447, L41, 181-B5 (1995)

Thermal Structure of Mixing Layers in Bipolar Outflows. *Susana Lizano & Carlo Giovanardi.* 447, 742, 186-C1 (1995)

Molecular Abundances and Low-Mass Star Formation. II. Organic and Deuterated Species toward IRAS 16293−2422. *Ewine F. van Dishoeck, Geoffrey A. Blake, David J. Jansen, & T. D. Groesbeck.* 447, 760, 186-D12 (1995)

Magnetocentrifugally Driven Flows from Young Stars and Disks. IV. The Accretion Funnel and Dead Zone. *Eve C. Ostriker & Frank H. Shu.* 447, 813, 187-B11 (1995)

The Rotational Rates of Blue Stragglers Produced by Physical Stellar Collisions. *Peter J. T. Leonard & Mario Livio.* 447, L121, 191-B11 (1995)

1 Millimeter Polarimetry of Young Stellar Objects: Low-Mass Protostars and T Tauri Stars. *Motohide Tamura, J. H. Hough, & Saeko S. Hayashi.* 448, 346, 197-A2 (1995)

IRAS 08159−3543: Optical Detection of the Dusty, Neutral Bipolar Wind of a Luminous Young Stellar Object. *Th. Neckel & H. J. Staude.* 448, 832, 206-D1 (1995)

Large Proper Motions and Ejection of New Condensations in the HH 80–81 Thermal Radio Jet. *J. Martí, L. F. Rodríguez, & Bo Reipurth.* 449, 184, 212-F6 (1995)

The Line Profile Variability of SU Aurigae. *Christopher M. Johns & Gibor Basri.* 449, 341, 214-G3 (1995)

Vertical Disk Structure in HL Tauri. *Steven V. W. Beckwith & Christoph C. Birk.* 449, L59, 217-A4 (1995)

A New 3.25 Micron Absorption Feature Toward Monoceros R2/IRS 3. *K. Sellgren, T. Y. Brooke, R. G. Smith, & T. R. Geballe.* 449, L69, 217-B8 (1995)

Further Mapping of the Radio Emission from Massive Young Stellar Objects. *Melvin G. Hoare & Simon T. Garrington.* 449, 874, 224-F11 (1995)

WFPC2 Imaging of the Circumstellar Nebulosity of HL Tauri. *Karl R. Stapelfeldt, Christopher J. Burrows, John E. Krist, John T. Trauger, J. Jeff Hester, Jon A. Holtzman, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, John S. Gallagher III, Richard E. Griffiths, John G. Hoessel, Jeremy R. Mould, Paul A. Scowen, Alan M. Watson, & James A. Westphal.* 449, 888, 225-A4 (1995)

Detection of a Circumstellar Gas around DM Tauri: A Protoplanetary Disk around a Single Star? *Toshihiro Handa, Shoken M. Miyama, Takuya Yamashita, Toshihiro Omodaka, Yoshimi Kitamura, Masahiko Hayashi, Toshikazu Onishi, Ronald L. Snell, Stephen E. Strom, Karen M. Strom, Michael F. Skrutskie, Suzan Edwards, Nagayoshi Ohashi, Kazuyoshi Sunada, Masao Saito, Yasuo Fukui, Akira Mizuno, Jun-ichi Watanabe, & Hirokazu Kataza.* 449, 894, 225-B1 (1995)

Spectroscopic *EUVE* Observations of the Active Star AB Doradus. *Slavek M. Rucinski, Rolf Mewe, Jelle S. Kaastra, Osmi Vilhu, & Stephen M. White.* 449, 900, 225-B11 (1995)

An Infrared Spectroscopic Survey of the ρ Ophiuchi Young Stellar Cluster: Masses and Ages from the H-R Diagram. *Thomas P. Greene & Michael R. Meyer.* 450, 233, 231-C3 (1995)

The Structure and Evolution of an Accretion Flow Interacting with the Central Star. *Masayuki Y. Fujimoto.* 450, 262, 231-E13 (1995)

Giant Bow Shock Pairs Associated with Herbig-Haro Jets. *Katsuo Ogura.* 450, L23, 235-F6 (1995)

Disk Dissipation in Single and Binary Young Star Systems in Taurus. *M. Simon & L. Prato.* 450, 824, 242-A12 (1995)

Vortices in Circumstellar Disks. *Fred C. Adams & Richard Watkins.* 451, 314, 250-C3 (1995)

Spatially Resolved Mid-Infrared Observations of Circumstellar Dust around AB Aurigae. *Kenneth A. Marsh, Jeffrey E. Van Cleve, M. J. Mahoney, T. L. Hayward, & J. R. Houck.* 451, 777, 257-G10 (1995)

Doppler Imaging of the Cool Spot Distribution on the Weak T Tauri Star V410 Tauri. *Artie P. Hatzes.* 451, 784, 258-A6 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. II. A Parameter Study. *Shantanu Basu & Telemachos Ch. Mouschovias.* 452, 386, 267-D7 (1995)

NGC 1333 IRAS 4: Further Multiplicity Revealed with the CSO-JCMT Interferometer. *O. P. Lay, J. E. Carlstrom, & R. E. Hills.* 452, L73, 270-F7 (1995)

Disk Accretion and Mass Loss from Young Stars. *Patrick Hartigan, Suzan Edwards, & Louma Ghandour.* 452, 736, 274-G4 (1995)

Constraints on Circumstellar Disk Masses in the Trapezium Cluster. *Lee G. Mundy, Leslie W. Looney, & Elizabeth A. Lada.* 452, L137, 280-D12 (1995)

In Search of HL Tauri. *David A. Weintraub, Joel H. Kastner, & Barbara A. Whitney.* 452, L141, 280-E6 (1995)

Thermal Jets and H_2O Masers: The Case of HH 80–81. *Y. Gómez, L. F. Rodríguez, & J. Martí.* 453, 268, 284-G3 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. III. Effect of the Initial Mass-to-Flux Ratio. *Shantanu Basu & Telemachos Ch. Mouschovias.* 453, 271, 284-G9 (1995)

Molecular H_2 Emission in HH 47A: *Hubble Space Telescope* GHRS and FOC Observations. *Salvador Curiel, John C. Raymond, Mark Wolfire, Patrick Hartigan, Jon Morse, Richard D. Schwartz, & Peter Nisenson.* 453, 322, 285-E10 (1995)

Aperture Synthesis ^{12}CO and ^{13}CO Observations of DM Tauri: 350 AU Radius Circumstellar Gas Disk. *M. Saito, R. Kawabe, M. Ishiguro, S. M. Miyama, M. Hayashi, T. Handa, Y. Kitamura, & T. Omodaka.* 453, 384, 286-D6 (1995)

Bipolar Jets from Extremely Young Stars Observed in Molecular Hydrogen Emission. *Klaus-Werner Hodapp & E. F. Ladd.* 453, 715, 293-E13 (1995)

Twin Herbig-Haro Jets and Molecular Outflows in L1228. *John Bally, David Devine, Robert A. Fesen, & Adair P. Lane.* 454, 345, 304-A9 (1995)

Disk Winds from T Tauri Stars. *John Kwan & Eugene Tademaru.* 454, 382, 304-E5 (1995)

Pre–Main-Sequence Evolution in the Taurus-Auriga Molecular Cloud. *Scott J. Kenyon & Lee Hartmann.* 101, 117, 54-D3 (1995)

Discovery of Herbig-Haro Objects and Molecular Hydrogen Jets near Bok Globule CB 34. *Miguel C. Moreira & João L. Yun.* 454, 850, 313-E1 (1995)

The Circumstellar Molecular Core around L1551 IRS 5. *G. A. Fuller, E. F. Ladd, R. Padman, P. C. Myers, & Fred C. Adams.* 454, 862, 313-F7 (1995)

Radio Continuum Detection of the Exciting Sources of the DG Tauri B and L1551NE Outflows. *Luis F. Rodríguez, Guillem Anglada, & Alejandro Raga.* 454, L149, 316-F5 (1995)

Interferometric Observations of the Circumstellar Molecular Structure around the Young Stellar Object in L1287. *Ji Yang, Nagayoshi Ohashi, & Yasuo Fukui.* 455, 175, 320-E7 (1995)

Momentum Distribution in Molecular Outflows. *Lawrence M. Chernin & Colin R. Masson.* 455, 182, 320-F3 (1995)

Circum-Protostellar Environments. III. Gas Densities and Kinetic Temperatures. *G. H. Moriarty-Schieven, P. G. Wannier, J. G. Mangum, M. Tamura, & V. K. Olmsted.* 455, 190, 320-F14 (1995)

Young Star Clusters in Bright-rimmed Clouds: Small-Scale Sequential Star Formation? *Koji Sugitani, Motohide Tamura, & Katsuo Ogura.* 455, L39, 324-G9 (1995)

STARS: PROPER-MOTION

The Proper Motion of the Soft X-Ray–emitting Radio Pulsar PSR 0656+14. *R. J. Thompson, Jr., F. A. Córdova, R. M. Hjellming, & E. B. Fomalont.* 366, L83, 11-E1 (1991)

ESO 207-61: A Brown Dwarf Candidate in the Hyades Moving Group. *María Teresa Ruiz, Marianne Y. Takamiya, & Miguel Roth.* 367, L59, 22-C7 (1991)

The Radio "Lobes" of Scorpius X-1 Are Unrelated Background Sources. *E. B. Fomalont & B. J. Geldzahler.* 383, 289, 215-G1 (1991)

STARS: PULSARS: GENERAL

Is There a Recycled Old Pulsar in Cygnus X-3? *Abhas Mitra.* 384, 255, 4-B3 (1992)

Precision Measurements of Pulsar Dispersion. *J. A. Phillips & A. Wolszczan.* 385, 273, 15-C8 (1992)

Radio Emission Altitudes in the Pulsar Magnetosphere. *J. A. Phillips.* 385, 282, 15-D5 (1992)

The Dynamical Evolution of Tidal Capture Binaries. *Christopher S. Kochanek.* 385, 604, 20-E13 (1992)

Low-Mass X-Ray Binary Evolution and the Origin of Millisecond Pulsars. *Juhan Frank, Andrew R. King, & Jean-Pierre Lasota.* 385, L45, 23-C8 (1992)

Vortex Drag and the Spin-up Time Scale for Pulsar Glitches. *Richard I. Epstein & Gordon Baym.* 387, 276, 40-D1 (1992)

Gamma-Ray Bursts and Radio Pulsar Glitches. *D. Hartmann, K. Hurley, & M. Niel.* 387, 622, 46-D1 (1992)

Rocks around the Clock: Limits on Pulsar Planetary Systems. *S. E. Thorsett & J. A. Phillips.* 387, L69, 48-C6 (1992)

Photodissociation in Strong Magnetic Fields and Application to Pulsars. *V. B. Bhatia, Namrata Chopra, & N. Panchapakesan.* 388, 131, 50-F1 (1992)

Light Curves of Rotating, Oscillating Neutron Stars. *T. E. Strohmayer.* 388, 138, 50-F9 (1992)

Determining the Coherence of Micropulses. *T. E. Strohmayer, J. M. Cordes, & H. M. Van Horn.* 389, 685, 69-G12 (1992)

Relativistic Magnetosonic Shock Waves in Synchrotron Sources: Shock Structure and Nonthermal Acceleration of Positrons. *Masahiro Hoshino, Jonathan Arons, Yves A. Gallant, & A. Bruce Langdon.* 390, 454, 81-A9 (1992)

Steady, Periodic Gamma-Ray Emission from Accreting X-Ray Pulsars. *K. S. Cheng, M. M. Lau, T. Cheung, P. P. Leung, & K. Y. Ding.* 390, 480, 81-C8 (1992)

Remarks on Triaxiality, Spin-up, and Magnetic Field Obliquity of Some Millisecond Pulsars. *W. Y. Chau, K. S. Cheng, & J. L. Zhang.* 390, 486, 81-D1 (1992)

Adiabatic Properties of Pulsating DA White Dwarfs. II. Mode Trapping in Compositionally Stratified Models. *P. Brassard, G. Fontaine, F. Wesemael, & C. J. Hansen.* 80, 369, 27-E3 (1992)

Galactic Gamma-Ray Emission from Radio Pulsars. *M. Bailes & D. A. Kniffen.* 391, 659, 96-C1 (1992)

Formation of Very Strongly Magnetized Neutron Stars: Implications for Gamma-Ray Bursts. *Robert C. Duncan & Christopher Thompson.* 392, L9, 106-B7 (1992)

Long-Term Pulsar Flux Monitoring and Refractive Interstellar Scintillation. *Victoria M. Kaspi & Daniel R. Stinebring.* 392, 530, 108-G8 (1992)

The Nonexponential Evolution of Pulsar Magnetic Fields. *Shigeto Wakatsuki, Atsushi Hikita, Naohiro Sato, & Naoki Itoh.* 392, 628, 110-A10 (1992)

Electromagnetically Driven Relativistic Jets: A Class of Self-similar Solutions. *Zhi-Yun Li, Tzihong Chiueh, & Mitchell C. Begelman.* 394, 459, 135-B1 (1992)

An Analysis of Radio Pulsar Nulling Statistics. *James D. Biggs.* 394, 574, 136-D13 (1992)

Pulsar Nebulae in Supernovae. *Roger A. Chevalier & Claes Fransson.* 395, 540, 149-E3 (1992)

Magnetized Stimulated Scattering in Pulsar Winds. *Mark W. Sincell & Julian H. Krolik.* 395, 553, 149-F7 (1992)

High-Resolution Optical Imaging of the Large Magellanic Cloud Plerion 0540−69. *P. A. Caraveo, G. F. Bignami, S. Mereghetti, & M. Mombelli.* 395, L103, 154-B11 (1992)

Effects of Evolving Rotating Equilibrium Configurations on the Cooling and Spin-down of Pulsars. *K. S. Cheng, W. Y. Chau, J. L. Zhang, & H. F. Chau.* 396, 135, 156-G3 (1992)

Production of Recycled Pulsars in Globular Clusters via Two-Body Tidal Capture. *R. Di Stefano & S. Rappaport.* 396, 587, 164-F9 (1992)

The Perihelion Problem in Kaluza-Klein Gravity. *Paul H. Lim & Paul S. Wesson.* 397, L91, 181-B8 (1992)

Spin-up of a Rapidly Rotating Star by Angular Momentum Loss: Effects of General Relativity. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 398, 203, 184-D1 (1992)

Very High Energy Gamma Rays from Isolated Radio Pulsars: A Survey. *H. I. Nel, B. C. Raubenheimer, O. C. de Jager, C. Brink, P. J. Meintjes, A. R. North, & G. Van Urk.* 398, 602, 191-E11 (1992)

Gamma-Ray Bursts from Extragalactic Radio Pulsars. *Fulvio Melia & Marco Fatuzzo.* 398, L85, 194-B10 (1992)

Planets in Globular Clusters? *Steinn Sigurdsson.* 399, L95, 201-D5 (1992)

Gamma Radiation from Pulsar Magnetospheric Gaps. *James Chiang & Roger W. Romani.* 400, 629, 218-C1 (1992)

Radiation from a Relativistic Magnetized Star. *V. Belinsky & R. Ruffini.* 401, L27, 227-D7 (1992)

A Novel Mechanism for Creating Double Pulsars. *Steinn Sigurdsson & Lars Hernquist.* 401, L93, 233-C7 (1992)

Pulsar Death Lines and Death Valley. *Kaiyou Chen & Malvin Ruderman.* 402, 264, 4-D1 (1993)

Refractive Interstellar Scintillation of Pulsar Intensities at 74 MHz. *Y. Gupta, B. J. Rickett, & W. A. Coles.* 403, 183, 16-C3 (1993)

An X-Ray Excited Wind in Centaurus X-3. *C. S. R. Day & Ian R. Stevens.* 403, 322, 17-G9 (1993)

Temporal Variations of Pulsar Dispersion Measures. *D. C. Backer, S. Hama, S. Van Hook, & R. S. Foster.* 404, 636, 36-G10 (1993)

Toward an Empirical Theory of Pulsar Emission. VI. The Geometry of the Conal Emission Region. *Joanna M. Rankin.* 405, 285, 44-F5 (1993)

The Masses of Two Binary Neutron Star Systems. *S. E. Thorsett, Z. Arzoumanian, M. M. McKinnon, & J. H. Taylor.* 405, L29, 47-E8 (1993)

Fitting Pulse Profiles of X-Ray Pulsars: The Effects of Relativistic Light Deflection. *H. Riffert, H.-P. Nollert, U. Kraus, & H. Ruder.* 406, 185, 57-D1 (1993)

Toward an Empirical Theory of Pulsar Emission. VI. The Geometry of the Conal Emission Region: Appendix and Tables. *Joanna M. Rankin.* 85, 145, 8-B9 (1993)

Nonlinear Plasma Mechanisms of Pulsar Eclipse in Binary Systems. *M. Gedalin & D. Eichler.* 406, 629, 65-F4 (1993)

Gamma Rays from Globular Clusters. *Marco Tavani.* 407, 135, 70-F11 (1993)

Magnetic Field Topology in Pulsars. *Jonathan Arons.* 408, 160, 85-B1 (1993)

Magnetic Field Decay from the Core of Neutron Stars: Effects of Interpinning of $^3P_2$ Neutron Superfluid and $^1S_0$ Proton Superconducting Fluid. *K. Y. Ding, K. S. Cheng, & H. F. Chau.* 408, 167, 85-B11 (1993)

Origin and Radio Pulse Properties of Millisecond Pulsars. *Kaiyou Chen & Malvin Ruderman.* 408, 179, 85-C12 (1993)

Thermal Evolution of Neutron Stars with Internal Frictional Heating. *Hideyuki Umeda, Noriaki Shibazaki, Ken'ichi Nomoto, & Sachiko Tsuruta.* 408, 186, 85-D7 (1993)

Neutron Star Dynamos and the Origins of Pulsar Magnetism. *Christopher Thompson & Robert C. Duncan.* 408, 194, 85-E4 (1993)

Diffuse Gamma-Ray Emission from Pulsars in the Large Magellanic Cloud. *Dieter H. Hartmann, Lawrence E. Brown, & Neil Schnepf.* 408, L13, 88-F8 (1993)

Low-Mass X-Ray Binaries and Millisecond Pulsars in Globular Clusters. *Kaiyou Chen, John Middleditch, & Malvin Ruderman.* 408, L17, 88-G1 (1993)

TeV Gamma Rays from Millisecond Pulsars and the Detectability of Globular Clusters. *I. A. Smith.* 408, 468, 91-A7 (1993)

Deep VLA Imaging of Pulsar-powered Nebulae and the Beaming Fraction of Young Pulsars. *Dale A. Frail & David A. Moffett.* 408, 637, 93-B5 (1993)

A Model of Nonthermal Radiation from Accreting X-Ray Pulsars. *P. P. Leung, K. S. Cheng, & P. C. W. Fung.* 410, 309, 115-G12 (1993)

Angular Broadening of Pulsars and the Distribution of Interstellar Plasma Fluctuations. *C. R. Gwinn, N. Bartel, & J. M. Cordes.* 410, 673, 122-A13 (1993)

Reliability of Magnetic Inclination Angle Determinations for Pulsars. *M. Coleman Miller & Russell J. Hamilton.* 411, 298, 131-A1 (1993)

Pulsar Distances and the Galactic Distribution of Free Electrons. *J. H. Taylor & J. M. Cordes.* 411, 674, 138-B3 (1993)

Strong-Field Cyclotron Scattering. I. Scattering Amplitudes and Natural Line Width. *Carlo Graziani.* 412, 351, 146-D13 (1993)

The Evolution of a Pulsar's Polar Cap Geometry. *M. M. McKinnon.* 413, 317, 160-B12 (1993)

Hidden Slow Pulsars in Binaries. *Marco Tavani & Leigh Brookshaw.* 413, L39, 162-F3 (1993)

Focusing of Alfvénic Wave Power in the Context of Gamma-Ray Burst Emissivity. *Marco Fatuzzo & Fulvio Melia.* 414, L89, 185-F7 (1993)

Polarization Changes of Radiation through Stimulated Raman Scattering. *R. T. Gangadhara & V. Krishan.* 415, 505, 194-B6 (1993)

Formation of Planets around Pulsars. *M. Banit, M. A. Ruderman, J. Shaham, & J. H. Applegate.* 415, 779, 197-E6 (1993)

Associating Young Pulsars and Supernova Remnants: PSR 1610−50 and the Case for High-Velocity Pulsars. *Patrizia A. Caraveo.* 415, L111, 200-B6 (1993)

Finite-Velocity Effects on Atoms in Strong Magnetic Fields and Implications for Neutron Star Atmospheres. *G. G. Pavlov & P. Mészáros.* 416, 752, 212-F8 (1993)

Catalog of 558 Pulsars. *J. H. Taylor, R. N. Manchester, & A. G. Lyne.* 88, 529, 47-C9 (1993)

Cooling and Spin-down of Pulsars with Evolving Rotating Equilibrium Configuration. II. Effects of Equations of State. *N. Chong & K. S. Cheng.* 417, 279, 221-A3 (1993)

Reconciliation of the Disparate Gamma-Ray Burst Catalogs in the Context of a Cosmological Source Distribution. *Peter Tamblyn & Fulvio Melia.* 417, L21, 223-A3 (1993)

Unpulsed Emission from Pulsars. *T. H. Hankins, D. A. Moffett, A. Novikov, & M. Popov.* 417, 735, 228-E3 (1993)

TeV Gamma-Ray Observations of *Compton Gamma-Ray Observatory* Pulsars: Evidence against Inverse-Compton Controlled Outer Gaps. *H. I. Nel, O. C. de Jager, B. C. Raubenheimer, C. Brink, P. J. Meintjes, & A. R. North.* 418, 836, 243-A3 (1993)

On the Observability of Microsecond Temporal Structure in the Emission from X-Ray Binary Pulsars. *Mauro Orlandini & Elihu Boldt.* 419, 776, 257-C9 (1993)

Limits on Planets Orbiting Massive Stars from Radio Pulsar Timing. *S. E. Thorsett & R. J. Dewey.* 419, L65, 259-D1 (1993)

On the Energetics and Number of Gamma-Ray Pulsars. *Charles D. Dermer & Steven J. Sturner.* 420, L75, 15-D11 (1994)

On the Spectra and Pulse Profiles of Gamma-Ray Pulsars. *Steven J. Sturner & Charles D. Dermer.* 420, L79, 15-E3 (1994)

A Search for Circumstellar Material around Pulsars. *J. A. Phillips & C. J. Chandler.* 420, L83, 15-E9 (1994)

The Time-Delay Spectrum of GX 5−1 in Its Horizontal Branch. *B. Vaughan, M. van der Klis, W. H. G. Lewin, R. A. M. J. Wijers, J. van Paradijs, T. Dotani, & K. Mitsuda.* 421, 738, 27-D6 (1994)

Physical Processes in Eclipsing Pulsars: Eclipse Mechanisms and Diagnostics. *C. Thompson, R. D. Blandford, Charles R. Evans, & E. S. Phinney.* 422, 304, 33-G10 (1994)

Secular Variations of the Integrated Pulse Profile of, and Torque on, PSR 2217+47: Precession of the Neutron Star? *Svetlana A. Suleymanova & Yurii P. Shitov.* 422, L17, 36-D1 (1994)

Timing Behavior of 96 Radio Pulsars. *Z. Arzoumanian, D. J. Nice, J. H. Taylor, & S. E. Thorsett.* 422, 671, 40-B13 (1994)

A Candidate Identification for PSR 0656+14 and the Optical Emission from Isolated Neutron Stars. *Patrizia A. Caraveo, Giovanni F. Bignami, & Sandro Mereghetti.* 422, L87, 45-C1 (1994)

Gamma-Ray Observations of Pulsars. *M. P. Ulmer.* 90, 789, 13-E6 (1994)

Pulsar Studies with COMPTEL. *K. Bennett, M. Busetta, A. Carramiñana, R. Diehl, G. Lichti, V. Schönfelder, A. Strong, W. Hermsen, L. Kuiper, A. Connors, J. Ryan, & R. Buccheri.* 90, 823, 14-A5 (1994)

Do Quiescent Soft X-Ray Transients Contain Millisecond Radio Pulsars? *L. Stella, S. Campana, M. Colpi, S. Mereghetti, & M. Tavani.* 423, L47, 53-F11 (1994)

Recycling Pulsars to Millisecond Periods in General Relativity. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 423, L117, 60-G3 (1994)

Binary Radiopulsars with Black Holes. *V. M. Lipunov, K. A. Postnov, M. E. Prokhorov, & E. Yu. Osminkin.* 423, L121, 60-G9 (1994)

An Optical Counterpart for PSR 1509−58. *P. A. Caraveo, S. Mereghetti, & G. F. Bignami.* 423, L125, 61-A7 (1994)

Rapidly Rotating Neutron Stars in General Relativity: Realistic Equations of State. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 424, 823, 75-A11 (1994)

General Relativistic Corrections in the Gamma-Ray Emission from Pulsars. *P. L. Gonthier & A. K. Harding.* 425, 767, 91-C10 (1994)

Radiation from Vela-like Pulsars near the Death Line. *V. V. Usov.* 427, 394, 114-F11 (1994)

The Post-Keplerian Orbital Representations of the Relativistic Two-Body Problem. *S. A. Klioner & S. M. Kopeikin.* 427, 951, 124-D10 (1994)

Is There a Planet in the PSR 1620−26 Triple System? *Frederic A. Rasio.* 427, L107, 127-C11 (1994)

Geminga: A Cooling Superfluid Neutron Star. *Dany Page.* 428, 250, 131-C6 (1994)

Streaming Instability in Relativistically Hot Pulsar Magnetospheres. *James C. Weatherall.* 428, 261, 131-D5 (1994)

Multiwavelength Observations of Isolated Neutron Stars. *S. Mereghetti, P. A. Caraveo, & G. F. Bignami.* 92, 521, 38-F12 (1994)

Gamma-Ray Pulsar Studies with COMPTEL. *W. Hermsen, L. Kuiper, R. Diehl, G. Lichti, V. Schönfelder, A. W. Strong, A. Connors, J. Ryan, K. Bennett, M. Busetta, A. Carramiñana, R. Buccheri, & I. A. Grenier.* 92, 559, 39-C7 (1994)

Polar Cap Models of Gamma-Ray Pulsars: Emission from Single Poles of Nearly Aligned Rotators. *Joseph K. Daugherty & Alice K. Harding.* 429, 325, 148-B1 (1994)

Magnetic Structure of Pulsar Winds. *F. Curtis Michel.* 431, 397, 181-A6 (1994)

The Relativistic Rotation Transformation and Pulsar Electrodynamics. *S. Kichenassamy & R. A. Krikorian.* 431, 715, 187-D8 (1994)

Stable Space Charge Configurations near the Force-free Surface of Rotating Magnets. *K. O. Thielheim & H. Wolfsteller.* 431, 718, 187-D13 (1994)

Pulsed Gamma-Ray Emission from Short-Period Pulsars. *K. S. Cheng & Winnis K. Y. Ding.* 431, 724, 187-E7 (1994)

Long-Term Evolution of Crustal Neutron Star Magnetic Fields. *V. A. Urpin, G. Chanmugam, & Yeming Sang.* 433, 780, 220-G5 (1994)

EGRET Upper Limits to the High-Energy Gamma-Ray Emission from the Millisecond Pulsars in Nearby Globular Clusters. *P. F. Michelson, D. L. Bertsch, K. Brazier, J. Chiang, B. L. Dingus, C. E. Fichtel, J. Fierro, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, C. von Montigny, P. L. Nolan, E. Schneid, P. Sreekumar, & D. J. Thompson.* 435, 218, 246-C12 (1994)

Structure of Relativistic Shocks in Pulsar Winds: A Model of the Wisps in the Crab Nebula. *Yves A. Gallant & Jonathan Arons.* 435, 230, 246-E4 (1994)

The Nonexponential Evolution of Pulsar Magnetic Fields. II. Velocity–Magnetic Field Correlation. *Naoki Itoh & Kentaro Hiraki.* 435, 784, 256-G8 (1994)

Probing the Interstellar Medium with Pulsars on AU Scales. *Dale A. Frail, Joel M. Weisberg, James M. Cordes, & Corey Mathers.* 436, 144, 263-C1 (1994)

EGRET High-Energy Gamma-Ray Pulsar Studies. I. Young Spin-powered Pulsars. *D. J. Thompson, Z. Arzoumanian, D. L. Bertsch, K. T. S. Brazier, J. Chiang, N. D'Amico, B. L. Dingus, J. A. Esposito, J. M. Fierro, C. E. Fichtel, R. C. Hartman, S. D. Hunter, S. Johnston, G. Kanbach, V. M. Kaspi, D. A. Kniffen, Y. C. Lin, A. G. Lyne, R. N. Manchester, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, H. I. Nel, D. J. Nice, P. L. Nolan, P. V. Ramanamurthy, S. L. Shemar, E. J. Schneid, P. Sreekumar, & J. H. Taylor.* 436, 229, 264-D1 (1994)

On Periodicity Tests and Flux Limit Calculations for Gamma-Ray Pulsars. *O. C. de Jager.* 436, 239, 264-E1 (1994)

An Outer Gap Model of High-Energy Emission from Rotation-powered Pulsars. *James Chiang & Roger W. Romani.* 436, 754, 275-G9 (1994)

ROSAT Observations of Six Millisecond Pulsars. *R. Danner, S. R. Kulkarni, & S. E. Thorsett.* 436, L153, 281-E7 (1994)

The Radio Lifetime of Supernova Remnants and the Distribution of Pulsar Velocities at Birth. *D. A. Frail, W. M. Goss, & J. B. Z. Whiteoak.* 437, 781, 296-D2 (1994)

Frictional Instabilities in Neutron Star Interiors. *Noriaki Shibazaki & Yuko Mochizuki.* 438, 288, 5-D7 (1995)

Gamma-Ray Pulsars: Emission Zones and Viewing Geometries. *Roger W. Romani & I.-A. Yadigaroglu.* 438, 314, 5-G3 (1995)

Physics of Magnetospheric Emission in Soft Gamma-Ray Repeaters. *Fulvio Melia & Marco Fatuzzo.* 438, 904, 16-E7 (1995)

Relativistic, Hot Stellar Winds with Anisotropic Pressure. *Elgouja G. Tsikarishvili, Andria D. Rogava, & David G. Tsiklauri.* 439, 822, 36-A1 (1995)

Rapid Polarization Variability in Intense Sources. *R. T. Gangadhara & V. Krishan.* 440, 116, 42-G1 (1995)

Self-trapping of Superfluid Vortices and the Origin of Pulsar Glitches. *Yuko Mochizuki & Takeo Izuyama.* 440, 263, 44-G2 (1995)

Neutron Star Accretion and Binary Pulsar Formation. *G. E. Brown.* 440, 270, 44-G12 (1995)

Test of When Free Precession of a Pulsar Cannot Mimic an Orbiting Planet. *Norman K. Glendenning.* 440, 881, 55-C6 (1995)

H I Line Measurements of Eight Southern Pulsars. *Bärbel Koribalski, Simon Johnston, J. M. Weisberg, & W. Wilson.* 441, 756, 72-C13 (1995)

On the Nature of the Unidentified EGRET Sources: Are They Geminga-like Pulsars? *R. Mukherjee, D. L. Bertsch, B. L. Dingus, G. Kanbach, D. A. Kniffen, P. Sreekumar, & D. J. Thompson.* 441, L61, 75-F13 (1995)

Surface Temperature of a Magnetized Neutron Star and Interpretation of the *ROSAT* Data. I. Dipolar Fields. *Dany Page.* 442, 273, 81-A1 (1995)

The Very Low Mass X-Ray Binary Pulsars: A New Class of Sources? *S. Mereghetti & L. Stella.* 442, L17, 84-F9 (1995)

Deviations from Chemical Equilibrium Due to Spin-down as an Internal Heat Source in Neutron Stars. *Andreas Reisenegger.* 442, 749, 90-E3 (1995)

Postaccretion Magnetic Field Evolution of Neutron Stars. *E. J. Young & G. Chanmugam.* 442, L53, 94-D3 (1995)

Electron Density Power Spectrum in the Local Interstellar Medium. *J. W. Armstrong, B. J. Rickett, & S. R. Spangler.* 443, 209, 98-A6 (1995)

Temporal Variation of Pulsar Dispersion Measure. *Xinji Wu & Abraham C.-L. Chian.* 443, 261, 98-G1 (1995)

Much Ado about Nothing: Several Large-Area Surveys for Radio Pulsars from Arecibo. *Paul S. Ray, W. T. S. Deich, S. R. Kulkarni, Thomas A. Prince, S. E. Thorsett, Gautam Vasisht, A. Wolszczan, Donald C. Backer, John H. Holliman II, & John Middleditch.* 443, 265, 98-G8 (1995)

Long-Term Stability of Pulsed X-Ray Emission from the Crab Pulsar. *Y. Sekimoto, M. Hirayama, T. Kamae, & N. Kawai.* 443, 271, 99-A3 (1995)

A Unified Picture for High-Energy Emission in Spin-powered Pulsars. *T. Kamae & Y. Sekimoto.* 443, 780, 108-E7 (1995)

Search for TeV γ-Ray Emission from Binary Radio Pulsars. *B. C. Raubenheimer, C. Brink, O. C. De Jager, & H. I. Nel.* 444, 419, 119-C12 (1995)

A Search for Fast Gamma-Ray Pulsars with OSSE. *P. Hertz, J. E. Grove, D. A. Grabelsky, & S. M. Matz.* 445, 351, 137-D1 (1995)

Magnetic Compton-induced Pair Cascade Model for Gamma-Ray Pulsars. *Steven J. Sturner, Charles D. Dermer, & F. Curtis Michel.* 445, 736, 145-D1 (1995)

Timing Parameters of 29 Pulsars. *F. Camilo & D. J. Nice.* 445, 756, 145-E11 (1995)

Equilibrium in the Oblique Rotating Outer Pulsar Magnetosphere. *Geoffrey Endean.* 445, 762, 145-F7 (1995)

The Orbital Eccentricities of Binary Millisecond Pulsars in Globular Clusters. *Frederic A. Rasio & Douglas C. Heggie.* 445, L133, 151-E9 (1995)

Electron Energy Losses near Pulsar Polar Caps. *Steven J. Sturner.* 446, 292, 157-C4 (1995)

Self-lensing by Binaries. *Andrew Gould.* 446, 541, 163-E6 (1995)

Neutral Hydrogen Absorption Measurements of Four Distant Pulsars and the Electron Density in the Inner Galaxy. *J. M. Weisberg, M. H. Siegel, D. A. Frail, & S. Johnston.* 447, 204, 175-A10 (1995)

Superfluid Core Rotation in Pulsars. I. Vortex Cluster Dynamics. *Armen D. Sedrakian & David M. Sedrakian.* 447, 305, 176-F1 (1995)

Superfluid Core Rotation in Pulsars. II. Postjump Relaxations. *A. D. Sedrakian, D. M. Sedrakian, J. M. Cordes, & Yervant Terzian.* 447, 324, 176-G10 (1995)

Were There Significant Starburst Episodes near the Galactic Center? *Dieter H. Hartmann.* 447, 646, 185-A11 (1995)

EGRET High-Energy γ-Ray Pulsar Studies. II. Individual Millisecond Pulsars. *J. M. Fierro, Z. Arzoumanian, M. Bailes, J. F. Bell, D. L. Bertsch, K. T. S. Brazier, J. Chiang, N. D'Amico, B. L. Dingus, J. A. Esposito, C. E. Fichtel, R. C. Hartman, S. D. Hunter, S. Johnston, G. Kanbach, V. M. Kaspi, D. A. Kniffen, Y. C. Lin, A. G. Lyne, R. N. Manchester, J. R Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, H. I. Nel, D. Nice, P. L. Nolan, E. J. Schneid, S. K. Shriver, P. Sreekumar, J. H. Taylor, D. J. Thompson, & T. D. Willis.* 447, 807, 187-B2 (1995)

Variation of Gravitational Delay in Pulsar Timing Observations due to Proper Motion of Foreground Stars and Measurement of Stellar Mass. *Kouji Ohnishi, Mizuhiko Hosokawa, Toshio Fukushima, & Mine Takeuti.* 448, 271, 196-A1 (1995)

The Synchrotron Self-Compton Model for X-Ray and γ-Ray Emission from Pulsars. *K. S. Cheng & D. M. Wei.* 448, 281, 196-B1 (1995)

Discrete Mass Loss in a Low-Mass Binary with a Rapidly Spinning Neutron Star. *Alexander Muslimov & Marek J. Sarna.* 448, 289, 196-B12 (1995)

A Search for Fast Pulsars along the Galactic Plane. *D. J. Nice, A. S. Fruchter, & J. H. Taylor.* 449, 156, 212-C11 (1995)

Gamma-Ray Pulsars: Beaming Evolution, Statistics, and Unidentified EGRET Sources. *I.-A. Yadigaroglu & Roger W. Romani.* 449, 211, 213-B1 (1995)

General Relativistic Effects on the Induced Electric Field Exterior to Pulsars. *S. Sengupta.* 449, 224, 213-C6 (1995)

Tidal Excitation of Modes in Binary Systems with Applications to Binary Pulsars. *Pawan Kumar, Chi On Ao, & Eliot J. Quataert.* 449, 294, 214-B10 (1995)

Dynamics and Interactions of Binaries and Neutron Stars in Globular Clusters. *Steinn Sigurdsson & E. S. Phinney.* 99, 609, 43-D7 (1995)

Millisecond Pulsars: Detectable Sources of Continuous Gravitational Waves? *Kimberly C. B. New, G. Chanmugam, Warren W. Johnson, & Joel E. Tohline.* 450, 757, 241-B9 (1995)

Analyzing X-Ray Pulsar Profiles: Asymmetry as a Key to Geometry and Beam Pattern. *U. Kraus, H.-P. Nollert, H. Ruder, & H. Riffert.* 450, 763, 241-C4 (1995)

OSSE Upper Limits to Pulsar Gamma-Ray Emission. *P. C. Schroeder, M. P. Ulmer, S. M. Matz, D. A. Grabelsky, W. R. Purcell, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, & G. V. Jung.* 450, 784, 241-E1 (1995)

Geminga's Soft X-Ray Emission and the Structure of Its Surface. *Dany Page, Yu. A. Shibanov, & V. E. Zavlin.* 451, L21, 252-D4 (1995)

On the Correlation between Proper Motion Velocities and Scintillation Velocities of Radio Pulsars. *Yashwant Gupta.* 451, 717, 257-B2 (1995)

Pulsar Eclipses due to Induced Scattering in Magnetized Plasmas. *Qinghuan Luo & D. B. Melrose.* 452, 346, 266-G11 (1995)

On the Approach to Stability of Pulsar Average Profiles. *N. Rathnasree & Joanna M. Rankin.* 452, 814, 275-G4 (1995)

Soft X-Ray Emission from Selected Isolated Pulsars. *Patrick Slane & Nicole Lloyd.* 452, L115, 280-A12 (1995)

Spin-down of Neutron Stars in Massive Radio Pulsar Binaries: The Periastron Passage of PSR B1259−63. *Pranab Ghosh.* 453, 411, 286-F13 (1995)

The X-Ray Emission of 3C 58 Revisited. *David J. Helfand, Robert H. Becker, & Richard L. White.* 453, 741, 294-A12 (1995)

A High Galactic Latitude Pulsar Survey of the Arecibo Sky. *R. S. Foster, B. J. Cadwell, A. Wolszczan, & S. B. Anderson.* 454, 826, 313-B12 (1995)

The Nonexponential Evolution of Pulsar Magnetic Fields. III. Comparison with the New Velocity Measurement. *Naoki Itoh, Takemi Kotouda, & Kentaro Hiraki.* 455, 244, 321-D13 (1995)

Discovery of a Candidate Isolated Neutron Star in a New Supernova Remnant near CTB 1. *Charles J. Hailey & William W. Craig.* 455, L151, 334-B12 (1995)

STARS: PULSARS: INDIVIDUAL

Name: Centaurus X-3

Ginga Observations of Centaurus X-3. *F. Nagase, R. H. D. Corbet, C. S. R. Day, H. Inoue, T. Takeshima, K. Yoshida, & T. Mihara.* 396, 147, 157-A3 (1992)

The Discovery of Pulsed Iron Line Emission from Centaurus X-3. *C. S. R. Day, F. Nagase, K. Asai, & T. Takeshima.* 408, 656, 93-D1 (1993)

ASCA Measurements of the Grain-scattered X-Ray Halos of Eclipsing Massive X-Ray Binaries: Vela X-1 and Centaurus X-3. *Jonathan W. Woo, George W. Clark, Charles S. R. Day, Fumiaki Nagase, & Toshiaki Takeshima.* 436, L5, 268-C9 (1994)

Name: Crab Nebula

Postglitch Behavior of the Crab Pulsar: Evidence for External Torque Variations. *Bennett Link, Richard I. Epstein, & Gordon Baym.* 390, L21, 78-D5 (1992)

On the 440 keV Line in the Crab Nebula Pulsar. *W. Bednarek, O. Cremonesi, & A. Treves.* 390, 489, 81-D5 (1992)

The Expected High-Energy to Ultra–High-Energy Gamma-Ray Spectrum of the Crab Nebula. *O. C. de Jager & A. K. Harding.* 396, 161, 157-B6 (1992)

An Axisymmetric Magnetohydrodynamic Model for the Crab Pulsar Wind Bubble. *Mitchell C. Begelman & Zhi-yun Li.* 397, 187, 170-C11 (1992)

Formation of the Dark Bays in the Crab Optical Synchrotron Nebula: Is the Crab Pulsar Wind Bubble Interacting with Its Progenitor's Wind? *Zhi-Yun Li & Mitchell C. Begelman.* 400, 186, 211-C1 (1992)

Observations of the Crab Pulsar and Nebula by the EGRET Telescope on the *Compton Gamma-Ray Observatory*. *P. L. Nolan, Z. Arzoumanian, D. L. Bertsch, J. Chiang, C. E. Fichtel, J. M. Fierro, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, P. W. Kwok, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, H. I. Nel, D. Nice, K. Pinkau, H. Rothermel, E. Schneid, M. Sommer, P. Sreekumar, J. H. Taylor, & D. J. Thompson.* 409, 697, 107-F8 (1993)

A Model of Unpulsed Gamma Rays from the Crab Pulsar. *W. M. Cheung & K. S. Cheng.* 413, 694, 165-B1 (1993)

The Status of Ultra–High-Energy Gamma-Ray Observations. *R. J. Protheroe.* 90, 883, 14-F10 (1994)

Observation of 7 TeV Gamma Rays from the Crab Using the Large Zenith Angle Air Čerenkov Imaging Technique. *T. Tanimori, T. Tsukagoshi, T. Kifune, P. G. Edwards, M. Fujimoto, T. Hara, N. Hayashida, Y. Matsubara, Y. Mizumoto, Y. Muraki, S. Ogio, J. R. Patterson, M. D. Roberts, G. Rowell, T. Suda, T. Tamura, M. Teshima, G. J. Thornton, T. Watase, & T. Yoshikoshi.* 429, L61, 158-A5 (1994)

Name: Crab Pulsar

The Crab Pulsar in the Visible and Ultraviolet with 10 Microsecond Time Resolution. *J. W. Percival, J. D. Biggs, J. F. Dolan, E. L. Robinson, M. J. Taylor, R. C. Bless, J. L. Elliot, M. J. Nelson, T. F. Ramseyer, G. W. van Citters, & E. Zhang.* 407, 276, 72-E1 (1993)

Hard X-Ray Timing Observation of the Crab Pulsar and Cygnus X-1. *P. Ubertini, A. Bazzano, M. Cocchi, C. La Padula, V. F. Polcaro, R. Staubert, & E. Kendziorra.* 421, 269, 19-C11 (1994)

Unpulsed High-Energy Radiation from the Crab Pulsar and Nebula. *W. M. Cheung & K. S. Cheng.* 90, 827, 14-A11 (1994)

Postglitch Relaxation of the Crab Pulsar: Evidence for Crust Cracking. *M. A. Alpar, H. F. Chau, K. S. Cheng, & D. Pines.* 427, L29, 117-E1 (1994)

Observation of 7 TeV Gamma Rays from the Crab Using the Large Zenith Angle Air Čerenkov Imaging Technique. *T. Tanimori, T. Tsukagoshi, T. Kifune, P. G. Edwards, M. Fujimoto, T. Hara, N. Hayashida, Y. Matsubara, Y. Mizumoto, Y. Muraki, S. Ogio, J. R. Patterson, M. D. Roberts, G. Rowell, T. Suda. T. Tamura, M. Teshima, G. J. Thornton, T. Watase, & T. Yoshikoshi.* 429, L61, 158-A5 (1994)

OSSE Observations of the Crab Pulsar. *M. P. Ulmer, S. Lomatch, S. M. Matz, D. A. Grabelsky, W. R. Purcell, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, R. A. Cameron, & G. V. Jung.* 432, 228, 196-A12 (1994)

Long-Term Stability of Pulsed X-Ray Emission from the Crab Pulsar. *Y. Sekimoto, M. Hirayama, T. Kamae, & N. Kawai.* 443, 271, 99-A3 (1995)

Compton Gamma-Ray Observatory Observations of the Crab Pulsar. *M. P. Ulmer, S. M. Matz, D. A. Grabelsky, J. E. Grove, M. S. Strickman, R. Much, M. C. Busetta, A. Strong, L. Kuiper, D. J. Thompson, D. Bertsch, J. M. Fierro, & P. L. Nolan.* 448, 356, 197-B1 (1995)

A Long-Term Study of High-Energy Gamma-Ray Emission from the Vela, Geminga, and Crab Pulsars. *P. V. Ramanamurthy, D. L. Bertsch, C. E. Fichtel, G. Kanbach, D. A. Kniffen, H. A. Mayer-Hasselwander, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 450, 791, 241-E11 (1995)

Giant Pulses from the Crab Pulsar: A Joint Radio and Gamma-Ray Study. *S. C. Lundgren, J. M. Cordes, M. Ulmer, S. M. Matz, S. Lomatch, R. S. Foster, & T. Hankins.* 453, 433, 287-A13 (1995)

Name: Geminga

SAS 2 Observation of Pulsed High-Energy Gamma Radiation from Geminga. *J. R. Mattox, D. L. Bertsch, C. E. Fichtel, R. C. Hartman, D. A. Kniffen, & D. J. Thompson.* 401, L23, 227-D1 (1992)

Soft X-Ray Properties of the Geminga Pulsar. *J. P. Halpern & M. Ruderman.* 415, 286, 188-E8 (1993)

High-Energy Gamma Radiation from Geminga Observed by EGRET. *H. A. Mayer-Hasselwander, D. L. Bertsch, K. T. S. Brazier, J. Chiang, C. E. Fichtel, J. M. Fierro, R. C. Hartman, S. D. Hunter, G. Kanbach, P. W. Kwok, D. A. Kniffen, Y. C. Lin, J. R. Mattox, P. F. Michelson, P. L. Nolan, K. Pinkau, H. Rothermel, E. J. Schneid, M. Sommer, P. Sreekumar, D. J. Thompson, & C. von Montigny.* 421, 276, 19-D6 (1994)

Gamma Rays from the Geminga Pulsar: Variations with Time and Phase. *I. A. Grenier, K. Bennett, R. Buccheri, M. Gros, R. N. Henriksen, W. Hermsen, G. Kanbach, & B. Sacco.* 90, 813, 13-G6 (1994)

Soft X-Ray Spectral Fits of Geminga with Model Neutron Star Atmospheres. *R. D. Meyer, G. G. Pavlov, & P. Mészáros.* 433, 265, 211-E12 (1994)

On the Nature of the Unidentified EGRET Sources: Are They Geminga-like Pulsars? *R. Mukherjee, D. L. Bertsch, B. L. Dingus, G. Kanbach, D. A. Kniffen, P. Sreekumar, & D. J. Thompson.* 441, L61, 75-F13 (1995)

A Long-Term Study of High-Energy Gamma-Ray Emission from the Vela, Geminga, and Crab Pulsars. *P. V. Ramanamurthy, D. L. Bertsch, C. E. Fichtel, G. Kanbach, D. A. Kniffen, H. A. Mayer-Hasselwander, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 450, 791, 241-E11 (1995)

Geminga's Soft X-Ray Emission and the Structure of Its Surface. *Dany Page, Yu. A. Shibanov, & V. E. Zavlin.* 451, L21, 252-D4 (1995)

Name: Hercules X-1

Multiwavelength Observations of Hercules X-1/HZ Herculis. *S. D. Vrtilek, T. Mihara, F. A. Primini, P. Kahabka, H. Marshall, F. Agerer, P. A. Charles, F. H. Cheng, K. Dennerl, C. la Dous, E. M. Hu, R. Rutten, P. Serlemitsos, Y. Soong, J. Stull, J. Trümper, W. Voges, R. M. Wagner, & R. Wilson.* 436, L9, 268-D3 (1994)

Iron Line Intensity Variations of Hercules X-1 over the Pulse Phase and the 35 Day Cycle. *C. S. Choi, F. Nagase, F. Makino, T. Dotani, S. Kitamoto, & S. Takahama.* 437, 449, 289-C6 (1994)

An Archival Study of *Hubble Space Telescope* Observations of Hercules X-1/HZ Herculis. *F. H. Cheng, S. D. Vrtilek, & John C. Raymond.* 452, 825, 276-A10 (1995)

Name: Vela Pulsar

A Speckle Hologram of the Interstellar Plasma. *K. M. Desai, C. R. Gwinn, J. Reynolds, E. A. King, D. Jauncey, C. Flanagan, G. Nicolson, R. A. Preston, & D. L. Jones.* 393, L75, 127-E7 (1992)

Postglitch Relaxation of the Vela Pulsar after Its First Eight Large Glitches: A Reevaluation with the Vortex Creep Model. *M. Ali Alpar, H. F. Chau, K. S. Cheng, & David Pines.* 409, 345, 101-D1 (1993)

Postglitch Relaxation following the Ninth Glitch of the Vela Pulsar. *H. F. Chau, P. M. McCulloch, R. Nandkumar, & D. Pines.* 413, L113, 169-A6 (1993)

Gamma Rays from the Geminga Pulsar: Variations with Time and Phase. *I. A. Grenier, K. Bennett, R. Buccheri, M. Gros, R. N. Henriksen, W. Hermsen, G. Kanbach, & B. Sacco.* 90, 813, 13-G6 (1994)

Superfluid Core Rotation in Pulsars. II. Postjump Relaxations. *A. D. Sedrakian, D. M. Sedrakian, J. M. Cordes, & Yervant Terzian.* 447, 324, 176-G10 (1995)

A Long-Term Study of High-Energy Gamma-Ray Emission from the Vela, Geminga, and Crab Pulsars. *P. V. Ramanamurthy, D. L. Bertsch, C. E. Fichtel, G. Kanbach, D. A. Kniffen, H. A. Mayer-Hasselwander, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 450, 791, 241-E11 (1995)

Name: Vela X-1

Line-dominated Eclipse Spectrum of Vela X-1. *Fumiaki Nagase, Gregory Zylstra, Takashi Sonobe, Taro Kotani, Hajime Inoue, & Jonathan Woo.* 436, L1, 268-C1 (1994)

ASCA Measurements of the Grain-scattered X-Ray Halos of Eclipsing Massive X-Ray Binaries: Vela X-1 and Centaurus X-3. *Jonathan W. Woo, George W. Clark, Charles S. R. Day, Fumiaki Nagase, & Toshiaki Takeshima.* 436, L5, 268-C9 (1994)

Geometry and Pulse Profiles of X-Ray Pulsars: Asymmetric Relativistic Fits to 4U 1538−52 and Vela X-1. *T. Bulik, H. Riffert, P. Mészáros, K. Makishima, T. Mihara, & B. Thomas.* 444, 405, 119-B3 (1995)

Alphanumeric: 1620−26

Genesis of a Planet in Messier 4. *Steinn Sigurdsson.* 415, L43, 192-B13 (1993)

Alphanumeric: 1E 1048.1−5937

A Spin-down Variation in the 6 Second X-Ray Pulsar 1E 1048.1−5937. *Sandro Mereghetti.* 455, 598, 330-B6 (1995)

Alphanumeric: 1E 2259+586

High-Frequency Emission of X-Ray Pulsar 1E 2259+586. *V. V. Usov.* 410, 761, 123-C1 (1993)

Glitches in the X-Ray Pulsar 1E 2259+586. *V. V. Usov.* 427, 984, 124-G10 (1994)

Alphanumeric: B0540−69

High-Speed Photometer Observations of the LMC Pulsar B0540−69. *P. T. Boyd, G. W. van Citters, J. F. Dolan, K. G. Wolinski, J. W. Percival, R. C. Bless, J. L. Elliot, M. J. Nelson, & M. J. Taylor.* 448, 365, 197-B13 (1995)

Alphanumeric: EXO 2030+375

The Luminosity Dependence of the X-Ray Spectrum of the Transient 42 Second Pulsar EXO 2030+375. *A. P. Reynolds, A. N. Parmar, & N. E. White.* 414, 302, 173-F9 (1993)

Alphanumeric: GRO J1008−57

An *EXOSAT* Detection of the Transient X-Ray Pulsar GRO J1008−57. *D. J. Macomb, C. R. Shrader, & A. B. Schultz.* 437, 845, 297-C1 (1994)

Alphanumeric: GRO J1948+32

Discovery of the 18.7 Second Accreting X-Ray Pulsar GRO J1948+32. *Deepto Chakrabarty, Towsian Koh, Lars Bildsten, Thomas A. Prince, Mark H. Finger, Robert B. Wilson, Geoffrey N. Pendleton, & Bradley C. Rubin.* 446, 826, 167-D8 (1995)

Alphanumeric: GRO J2014+34

Discovery of the 18.7 Second Accreting X-Ray Pulsar GRO J1948+32. *Deepto Chakrabarty, Towsian Koh, Lars Bildsten, Thomas A. Prince, Mark H. Finger, Robert B. Wilson, Geoffrey N. Pendleton, & Bradley C. Rubin.* 446, 826, 167-D8 (1995)

Alphanumeric: GX 301−2

On the Power Spectra of the Wind-fed X-Ray Binary Pulsar GX 301−2. *Mauro Orlandini & G. E. Morfill.* 386, 703, 34-A9 (1992)

ASCA and *GRO* Observations of GX 301−2. *Steven H. Pravdo, Charles S. R. Day, Lorella Angelini, B. Alan Harmon, A. Yoshida, & P. Saraswat.* 454, 872, 313-G6 (1995)

Alphanumeric: OAO 1657−415

Discovery of the Orbit of the X-Ray Pulsar OAO 1657−415. *Deepto Chakrabarty, John M. Grunsfeld, Thomas A. Prince, Lars Bildsten, Mark H. Finger, Robert B. Wilson, Gerald J. Fishman, Charles A. Meegan, & William S. Paciesas.* 403, L33, 20-D6 (1993)

Alphanumeric: PSR 0355+54

X-Ray Emission from PSR 0355+54. *Patrick Slane.* 437, 458, 289-D4 (1994)

Alphanumeric: PSR 0531+21

High Time Resolution Infrared Observations of the Crab Nebula Pulsar. *S. M. Ransom, G. G. Fazio, S. S. Eikenberry, J. Middleditch, J. Kristian, K. Hays, & C. R. Pennypacker.* 431, L43, 182-G11 (1994)

Extraordinary Line-emitting Knots in the Crab Nebula. *Gordon M. MacAlpine, Stephen S. Lawrence, Beth A. Brown, Alan Uomoto, Bruce E. Woodgate, Larry W. Brown, Ronald J. Oliversen, James D. Lowenthal, & Charles Liu.* 432, L131, 207-C5 (1994)

Alphanumeric: PSR 0540−69

Rotational Parameters of PSR 0540−69 as Measured at Optical Wavelengths. *Christian Gouiffes, John P. Finley, & Hakki Ögelman.* 394, 581, 136-E8 (1992)

High-Resolution Optical Imaging of the Large Magellanic Cloud Plerion 0540−69. *P. A. Caraveo, G. F. Bignami, S. Mereghetti, & M. Mombelli.* 395, L103, 154-B11 (1992)

ROSAT Observations of the Large Magellanic Cloud Pulsar PSR 0540−69. *John P. Finley, Hakki Ögelman, Günther Hasinger, & Joachim Trümper.* 410, 323, 116-B1 (1993)

The Position of PSR 0540−69. *A. Shearer, M. Redfern, H. Pedersen, T. Rowold, P. O'Kane, R. Butler, C. O'Byrne, & M. Cullum.* 423, L51, 53-G3 (1994)

Alphanumeric: PSR 0655+64

PSR 0655+64: An Astrophysical Laboratory for Testing Relativistic Gravity Theories. *Itzhak Goldman.* 390, 494, 81-D11 (1992)

Alphanumeric: PSR 0656+14

ROSAT Observations of PSR 0656+14: A Pulsating and Cooling Neutron Star. *John P. Finley, Hakki Ögelman, & Ümit Kiziloğlu.* 394, L21, 133-C13 (1992)

ROSAT High Resolution Imager Observations of PSR 0656+14. *S. B. Anderson, F. A. Córdova, G. G. Pavlov, C. R. Robinson, & R. J. Thompson, Jr.* 414, 867, 182-A12 (1993)

Revised Proper-Motion Results for the Soft X-Ray–emitting Radio Pulsar PSR 0656+14. *R. J. Thompson, Jr., & F. A. Córdova.* 421, L13, 21-D11 (1994)

A Candidate Identification for PSR 0656+14 and the Optical Emission from Isolated Neutron Stars. *Patrizia A. Caraveo, Giovanni F. Bignami, & Sandro Mereghetti.* 422, L87, 45-C1 (1994)

Alphanumeric: PSR 0820+02

The White Dwarf Companion to PSR 0820+02. *D. Koester, G. Chanmugam, & D. Reimers.* 395, L107, 154-C7 (1992)

Alphanumeric: PSR 0823+26

Discontinuities in the Dynamic Spectrum of the Pulsar 0823+26. *Andrew W. Clegg, Ralph L. Fiedler, & James M. Cordes.* 409, 691, 107-E13 (1993)

Alphanumeric: PSR 0950+08

A Search for Circumstellar Material around Pulsars. *J. A. Phillips & C. J. Chandler.* 420, L83, 15-E9 (1994)

Alphanumeric: PSR 1055−52

Pulsed High-Energy Gamma Rays from PSR 1055−52. *J. M. Fierro, D. L. Bertsch, K. T. S. Brazier, J. Chiang, N. D'Amico, C. E. Fichtel, R. C. Hartman, S. D. Hunter, S. Johnston, G. Kanbach, V. M. Kaspi, D. A. Kniffen, Y. C. Lin, A. G. Lyne, R. N. Manchester, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, E. Schneid, & D. J. Thompson.* 413, L27, 162-D13 (1993)

ROSAT Observations of Pulsed Soft X-Ray Emission from PSR 1055−52. *Hakkı Ögelman & John P. Finley.* 413, L31, 162-E5 (1993)

Alphanumeric: PSR 1133+16

A Search for Circumstellar Material around Pulsars. *J. A. Phillips & C. J. Chandler.* 420, L83, 15-E9 (1994)

Alphanumeric: PSR 1257+12

Three-Body Effects in the PSR 1257+12 Planetary System. *Renu Malhotra.* 407, 266, 72-D3 (1993)

A Search for Circumstellar Material around Pulsars. *J. A. Phillips & C. J. Chandler.* 420, L83, 15-E9 (1994)

Alphanumeric: PSR 1259−63

PSR 1259−63: A Binary Radio Pulsar with a Be Star Companion. *Simon Johnston, R. N. Manchester, A. G. Lyne, M. Bailes, V. M. Kaspi, Qiao Guojun, & N. D'Amico.* 387, L37, 43-E1 (1992)

The Evolutionary Status of the Pulsar–Be Star Binary PSR 1259−63. *A. R. King.* 405, 727, 52-B5 (1993)

Some Implications of PSR 1259−63. *Christopher S. Kochanek.* 406, 638, 65-G1 (1993)

Detection of X-Ray Emission from the PSR 1259−63/SS 2883 Binary System. *Lynn Cominsky, Mallory Roberts, & Simon Johnston.* 427, 978, 124-G2 (1994)

X-Ray Emission of the Pulsar–Be Star Binary PSR 1259−63. *Andrew King & Lynn Cominsky.* 435, 411, 249-B3 (1994)

X-Ray Emission from the PSR B1259−63 System near Apastron. *J. Greiner, M. Tavani, & T. Belloni.* 441, L43, 67-B9 (1995)

Alphanumeric: PSR 1509−58

An Optical Counterpart for PSR 1509−58. *P. A. Caraveo, S. Mereghetti, & G. F. Bignami.* 423, L125, 61-A7 (1994)

Observation of Pulsed Hard X-Rays/γ-Rays from PSR 1509−58. *S. Gunji, M. Hirayama, T. Kamae, S. Miyazaki, Y. Sekimoto, T. Takahashi, T. Tamura, M. Tanaka, N. Yamasaki, T. Yamagami, M. Nomachi, H. Murakami, J. Braga, & J. A. Neri.* 428, 284, 131-F7 (1994)

PSR 1509−58 and Its Plerionic Environment. *C. Greiveldinger, S. Caucino, S. Massaglia, H. Ögelman, & E. Trussoni.* 454, 855, 313-E11 (1995)

Alphanumeric: PSR 1534+12

A Search for Circumstellar Material around Pulsars. *J. A. Phillips & C. J. Chandler.* 420, L83, 15-E9 (1994)

Alphanumeric: PSR 1610−50

Associating Young Pulsars and Supernova Remnants: PSR 1610−50 and the Case for High-Velocity Pulsars. *Patrizia A. Caraveo.* 415, L111, 200-B6 (1993)

Alphanumeric: PSR 1620−26

The Unusual Ω of the Millisecond Pulsar 1620−26: The Consequence of a Giant Glitch? *K. S. Cheng, N. Chong, & T. M. Lee.* 434, 733, 237-G10 (1994)

Frictional Instabilities in Neutron Star Interiors. *Noriaki Shibazaki & Yuko Mochizuki.* 438, 288, 5-D7 (1995)

Alphanumeric: PSR 1706−44

Very High Energy Gamma Rays from PSR 1706−44. *T. Kifune, T. Tanimori, S. Ogio, T. Tamura, H. Fujii, M. Fujimoto, T. Hara, N. Hayashida, S. Kabe, F. Kakimoto, Y. Matsubara, Y. Mizumoto, Y. Muraki, T. Suda, M. Teshima, T. Tsukagoshi, Y. Watase, T. Yoshikoshi, P. G. Edwards, J. R. Patterson, M. D. Roberts, G. P. Rowell, & G. J. Thornton.* 438, L91, 20-A1 (1995)

Alphanumeric: PSR 1718−19

Hidden Slow Pulsars in Binaries. *Marco Tavani & Leigh Brookshaw.* 413, L39, 162-F3 (1993)

The Mass of the Companion of PSR 1718−19. *L. Burderi & A. R. King.* 430, L57, 166-A4 (1994)

Alphanumeric: PSR 1744−24A

Pulsar PSR 1744−24A: Timing, Eclipses, and the Evolution of Neutron Star Binaries. *D. J. Nice & S. E. Thorsett.* 397, 249, 171-A12 (1992)

Alphanumeric: PSR 1800−21

The PSR 1800−21/G8.7−0.1 Association: A View from *ROSAT*. *John P. Finley & Hakki Ögelman.* 434, L25, 232-D11 (1994)

Alphanumeric: PSR 1821−24

ROSAT Observations of Six Millisecond Pulsars. *R. Danner, S. R. Kulkarni, & S. E. Thorsett.* 436, L153, 281-E7 (1994)

Alphanumeric: PSR 1829−10

Rocks around the Clock: Limits on Pulsar Planetary Systems. *S. E. Thorsett & J. A. Phillips.* 387, L69, 48-C6 (1992)

Alphanumeric: PSR 1908+00

The Binary Pulsar PSR 1908+00 in NGC 6760. *W. T. S. Deich, J. Middleditch, S. B. Anderson, S. R. Kulkarni, T. A. Prince, & A. Wolszczan.* 410, L95, 126-A13 (1993)

Alphanumeric: PSR 1913+16

Is Momentum Conserved? A Test in the Binary System PSR 1913+16. *Clifford M. Will.* 393, L59, 127-C7 (1992)

Supplementary Parameters in the Parameterized Post-Keplerian Formalism. *S. M. Kopeikin.* 434, L67, 241-F9 (1994)

Alphanumeric: PSR 1919+21

Interstellar Matter near the Pleiades. IV. The Wake of the Pleiades through the Interstellar Medium in Taurus. *Richard E. White & John Bally.* 409, 234, 99-G13 (1993)

Alphanumeric: PSR 1929+10

The Detection of Pulsed X-Ray Emission from a Nearby Radio Pulsar. *S. Yancopoulos, T. T. Hamilton, & D. J. Helfand.* 429, 832, 156-A9 (1994)

Alphanumeric: PSR 1937+21

A Search for Circumstellar Material around Pulsars. *J. A. Phillips & C. J. Chandler.* 420, L83, 15-E9 (1994)

Alphanumeric: PSR 1951+32

ROSAT Observations of the Unusual Supernova Remnant CTB 80 Containing the Pulsar PSR 1951+32. *Samar Safi-Harb, Hakki Ögelman, & John P. Finley.* 439, 722, 34-E10 (1995)

Alphanumeric: PSR 1957+20

The Continuum Eclipse of PSR 1957+20. *A. S. Fruchter & W. M. Goss.* 384, L47, 11-C9 (1992)

Orbital Angular Momentum Loss in PSR 1957+20. *Menashe Banit & Jacob Shaham.* 388, L19, 52-B11 (1992)

Spectroscopy of the Companion and Bow-Shock Nebula of PSR 1957+20. *Thomas L. Aldcroft, Roger W. Romani, & James M. Cordes.* 400, 638, 218-C13 (1992)

High-Energy Emission from the Eclipsing Millisecond Pulsar PSR 1957+20. *Jonathan Arons & Marco Tavani.* 403, 249, 17-A8 (1993)

SIGMA Upper Limits to the Hard X-Ray/Soft Gamma-Ray Emission from the Millisecond Pulsars of the Nearby Globular Cluster 47 Tucanae. *D. Barret, P. Mandrou, M. Denis, J. F. Olive, P. Laurent, A. Claret, F. Lebrun, J. Paul, R. Sunyaev, E. Churazov, M. Gilfanov, A. Dyachkov, N. Khavenson, B. Novikov, R. Kremnev, & A. Sukhanov.* 405, L59, 54-C7 (1993)

The Orbital Light Curve of PSR 1957+20. *Paul J. Callanan, Jan van Paradijs, & Roeland Rengelink.* 439, 928, 37-D4 (1995)

Alphanumeric: PSR 2127+11C

The Role of Chaos in the Circularization of Tidal Capture Binaries. II. Long-Time Evolution. *Rosemary A. Mardling.* 450, 732, 240-G6 (1995)

Alphanumeric: PSR 2217+47

Secular Variations of the Integrated Pulse Profile of, and Torque on, PSR 2217+47: Precession of the Neutron Star? *Svetlana A. Suleymanova & Yurii P. Shitov.* 422, L17, 36-D1 (1994)

Alphanumeric: PSR B0042−73

On the Nature of the Binary Radio Pulsar PSR B0042−73 in the Small Magellanic Cloud. *V. M. Lipunov, K. A. Postnov, & M. E. Prokhorov.* 441, 776, 72-F1 (1995)

Alphanumeric: PSR B0329+54

Evidence for a Planet around the Pulsar PSR B0329+54. *Tatiana V. Shabanova.* 453, 779, 294-F2 (1995)

Alphanumeric: PSR B0540−69

The Radio Structure of Supernova Remnant 0540−693. *R. N. Manchester, L. Staveley-Smith, & M. J. Kesteven.* 411, 756, 139-B8 (1993)

Alphanumeric: PSR B1257+12

The Magnetic Fields, Ages, and Original Spin Periods of Millisecond Pulsars. *F. Camilo, S. E. Thorsett, & S. R. Kulkarni.* 421, L15, 21-E1 (1994)

Alphanumeric: PSR B1259−63

Regimes of High-Energy Shock Emission from the Be Star/Pulsar System PSR 1259−63. *Marco Tavani, Jonathan Arons, & Victoria M. Kaspi.* 433, L37, 215-B1 (1994)

On Possible Implications of Orbital Parallaxes of Wide Orbit Binary Pulsars and Their Measurability. *S. M. Kopeikin.* 439, L5, 29-E11 (1995)

Polarization Properties of Two Pulsars. *R. N. Manchester & Simon Johnston.* 441, L65, 75-G6 (1995)

Period Evolution of PSR B1259−63: Evidence for Propeller-Torque Spin-down. *R. N. Manchester, S. Johnston, A. G. Lyne, N. D'Amico, M. Bailes, & L. Nicastro.* 445, L137, 151-F1 (1995)

Evidence for Shock Acceleration in the Binary Pulsar System PSR B1259−63. *J. E. Grove, M. Tavani, W. R. Purcell, W. N. Johnson, J. D. Kurfess, M. S. Strickman, & J. Arons.* 447, L113, 191-B1 (1995)

Spin-Orbit Interactions in Neutron Star/Main-Sequence Binaries and Implications for Pulsar Timing. *Dong Lai, Lars Bildsten, & Victoria M. Kaspi.* 452, 819, 276-A1 (1995)

Spin-down of Neutron Stars in Massive Radio Pulsar Binaries: The Periastron Passage of PSR B1259−63. *Pranab Ghosh.* 453, 411, 286-F13 (1995)

X-Ray Detection of PSR B1259−63 at Periastron. *V. M. Kaspi, M. Tavani, F. Nagase, M. Hirayama, M. Hoshino, T. Aoki, N. Kawai, & J. Arons.* 453, 424, 287-A1 (1995)

Alphanumeric: PSR B1509−58

Gamma-Ray and Radio Observations of PSR B1509−58. *M. P. Ulmer, S. M. Matz, R. B. Wilson, M. J. Finger, K. S. Hagedon, D. A. Grabelsky, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, W. R. Purcell, M. S. Strickman, V. M. Kaspi, S. Johnston, R. N. Manchester, A. G. Lyne, & N. D'Amico.* 417, 738, 228-E8 (1993)

On the Spin-down of PSR B1509−58. *V. M. Kaspi, R. N. Manchester, B. Siegman, S. Johnston, & A. G. Lyne.* 422, L83, 45-B11 (1994)

The Pulsed Hard X-Ray Spectrum of PSR B1509−58. *S. M. Matz, M. P. Ulmer, D. A. Grabelsky, W. R. Purcell, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, & G. V. Jung.* 434, 288, 229-D7 (1994)

The Nonthermal Radio, X-Ray, and TeV Gamma-Ray Spectra of MSH 15−52. *I. du Plessis, O. C. de Jager, S. Buchner, H. I. Nel, A. R. North, B. C. Raubenheimer, & D. J. van der Walt.* 453, 746, 294-B6 (1995)

Alphanumeric: PSR B1620−26

PSR B1620−26: A Binary Radio Pulsar with a Planetary Companion? *S. E. Thorsett, Z. Arzoumanian, & J. H. Taylor.* 412, L33, 148-D6 (1993)

Is There a Planet in the PSR 1620−26 Triple System? *Frederic A. Rasio.* 427, L107, 127-C11 (1994)

Orbital Elements of PSR B1620−26. *F. Curtis Michel.* 432, 239, 196-B11 (1994)

A Possible Optical Counterpart for the Triple Pulsar System PSR B1620−26. *Charles D. Bailyn, Eric P. Rubenstein, Terrence M. Girard, Dana I. Dinescu, Frederic A. Rasio, & Brian Yanny.* 433, L89, 224-B3 (1994)

Binary-Binary Interactions and the Formation of the PSR B1620−26 Triple System in M4. *Frederic A. Rasio, Steve McMillan, & Piet Hut.* 438, L33, 10-B11 (1995)

Assessing the Environmental Impact on PSR B1620−26 in M4. *Steinn Sigurdsson.* 452, 323, 266-E8 (1995)

Alphanumeric: PSR B1718−19

On the Origin of the Eclipsing Pulsar PSR B1718−19 and Its Wind. *R. A. M. J. Wijers & B. Paczyński.* 415, L115, 200-C1 (1993)

Alphanumeric: PSR B1855+09

High-Precision Timing of Millisecond Pulsars. III. Long-Term Monitoring of PSRs B1855+09 and B1937+21. *V. M. Kaspi, J. H. Taylor, & M. F. Ryba.* 428, 713, 139-B9 (1994)

Search for TeV γ-Ray Emission from Binary Radio Pulsars. *B. C. Raubenheimer, C. Brink, O. C. De Jager, & H. I. Nel.* 444, 419, 119-C12 (1995)

Alphanumeric: PSR B1937+21

High-Precision Timing of Millisecond Pulsars. III. Long-Term Monitoring of PSRs B1855+09 and B1937+21. *V. M. Kaspi, J. H. Taylor, & M. F. Ryba.* 428, 713, 139-B9 (1994)

Alphanumeric: PSR B1951+32

EGRET Detection of Pulsed Gamma Radiation from PSR B1951+32. *P. V. Ramanamurthy, D. L. Bertsch, B. L. Dingus, J. A. Esposito, J. M. Fierro, C. E. Fichtel, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, A. G. Lyne, J. R. Mattox, H. A. Mayer-Hasselwander, M. Merck, P. F. Michelson, C. von Montigny, R. Mukherjee, P. L. Nolan, & D. J. Thompson.* 447, L109, 191-A8 (1995)

Alphanumeric: PSR B1957+20

Orbital Variability in the Eclipsing Pulsar Binary PSR B1957+20. *Z. Arzoumanian, A. S. Fruchter, & J. H. Taylor.* 426, L85, 109-E6 (1994)

Orbital Period Variability in the Eclipsing Pulsar Binary PSR B1957+20: Evidence for a Tidally Powered Star. *James H. Applegate & Jacob Shaham.* 436, 312, 265-E8 (1994)

HST Images of the Eclipsing Pulsar B1957+20. *Andrew S. Fruchter, Jay Bookbinder, & Charles D. Bailyn.* 443, L21, 102-D13 (1995)

Alphanumeric: PSR J0034−0534

Discovery of Three Binary Millisecond Pulsars. *M. Bailes, P. A. Harrison, D. R. Lorimer, S. Johnston, A. G. Lyne, R. N. Manchester, N. D'Amico, L. Nicastro, T. M. Tauris, & C. Robinson.* 425, L41, 85-F5 (1994)

Optical Observations of the Binary Millisecond Pulsars J2145−0750 and J0034−0534. *J. F. Bell, S. R. Kulkarni, M. Bailes, E. M. Leitch, & A. G. Lyne.* 452, L121, 280-B7 (1995)

Alphanumeric: PSR J0045−7319

A Massive Radio Pulsar Binary in the Small Magellanic Cloud. *V. M. Kaspi, S. Johnston, J. F. Bell, R. N. Manchester, M. Bailes, M. Bessell, A. G. Lyne, & N. D'Amico.* 423, L43, 53-F7 (1994)

PSR J0045−7319: A Dual-Line Binary Radio Pulsar. *J. F. Bell, M. S. Bessell, B. W. Stappers, M. Bailes, & V. M. Kaspi.* 447, L117, 191-B6 (1995)

Tidal Excitation of Modes in Binary Systems with Applications to Binary Pulsars. *Pawan Kumar, Chi On Ao, & Eliot J. Quataert.* 449, 294, 214-B10 (1995)

The Role of Chaos in the Circularization of Tidal Capture Binaries. I. The Chaos Boundary. *Rosemary A. Mardling.* 450, 722, 240-F7 (1995)

Spin-Orbit Interactions in Neutron Star/Main-Sequence Binaries and Implications for Pulsar Timing. *Dong Lai, Lars Bildsten, & Victoria M. Kaspi.* 452, 819, 276-A1 (1995)

Alphanumeric: PSR J0108−1431

Discovery of PSR J0108−1431: The Closest Known Neutron Star? *T. M. Tauris, L. Nicastro, S. Johnston, R. N. Manchester, M. Bailes, A. G. Lyne, J. Glowacki, D. R. Lorimer, & N. D'Amico.* 428, L53, 142-E1 (1994)

Alphanumeric: PSR J0218+4232

A Very Luminous Binary Millisecond Pulsar. *José Navarro, A. G. de Bruyn, D. A. Frail, S. R. Kulkarni, & A. G. Lyne.* 455, L55, 325-C1 (1995)

Alphanumeric: PSR J0437−4715

The Optical Counterpart of the Bright Nearby Millisecond Pulsar PSR J0437−4715. *Charles D. Bailyn.* 411, L83, 142-E1 (1993)

The Magnetic Fields, Ages, and Original Spin Periods of Millisecond Pulsars. *F. Camilo, S. E. Thorsett, & S. R. Kulkarni.* 421, L15, 21-E1 (1994)

The Proper Motion and Wind Nebula of the Nearby Millisecond Pulsar J0437−4715. *J. F. Bell, M. Bailes, R. N. Manchester, J. M. Weisberg, & A. G. Lyne.* 440, L81, 58-A10 (1995)

Polarization Properties of Two Pulsars. *R. N. Manchester & Simon Johnston.* 441, L65, 75-G6 (1995)

Extreme Ultraviolet Emission from the Millisecond Pulsar J0437−4715. *J. Edelstein, R. S. Foster, & S. Bowyer.* 454, 442, 305-D4 (1995)

Alphanumeric: PSR J0613−0200

Four New Millisecond Pulsars in the Galactic Disk. *D. R. Lorimer, L. Nicastro, A. G. Lyne, M. Bailes, R. N. Manchester, S. Johnston, J. F. Bell, N. D'Amico, & P. A. Harrison.* 439, 933, 37-D13 (1995)

Alphanumeric: PSR J0751+1807

A Millisecond Pulsar in a 6 Hour Orbit: PSR J0751+1807. *S. C. Lundgren, A. F. Zepka, & J. M. Cordes.* 453, 419, 286-G10 (1995)

Alphanumeric: PSR J0943+22

A Search for Pulsars at High Galactic Latitudes. *S. E Thorsett, W. T. S. Deich, S. R. Kulkarni, J. Navarro, & G. Vasisht.* 416, 182, 203-C10 (1993)

Alphanumeric: PSR J1045−4509

Discovery of Three Binary Millisecond Pulsars. *M. Bailes, P. A. Harrison, D. R. Lorimer, S. Johnston, A. G. Lyne, R. N. Manchester, N. D'Amico, L. Nicastro, T. M. Tauris, & C. Robinson.* 425, L41, 85-F5 (1994)

Alphanumeric: PSR J1246+22

A Search for Pulsars at High Galactic Latitudes. *S. E Thorsett, W. T. S. Deich, S. R. Kulkarni, J. Navarro, & G. Vasisht.* 416, 182, 203-C10 (1993)

Alphanumeric: PSR J1341−6220

G308.8−0.1: An Unusual Supernova Remnant Containing a Short-Period Pulsar, PSR J1341−6220. *J. L. Caswell, M. J. Kesteven, R. T. Stewart, D. K. Milne, & R. F. Haynes.* 399, L151, 208-D1 (1992)

PSR J1341−6220: A Young Pulsar in a Supernova Remnant. *Victoria M. Kaspi, R. N. Manchester, Simon Johnston, A. G. Lyne, & N. D'Amico.* 399, L155, 208-D5 (1992)

Alphanumeric: PSR J1455−3330

Four New Millisecond Pulsars in the Galactic Disk. *D. R. Lorimer, L. Nicastro, A. G. Lyne, M. Bailes, R. N. Manchester, S. Johnston, J. F. Bell, N. D'Amico, & P. A. Harrison.* 439, 933, 37-D13 (1995)

Alphanumeric: PSR J1643−1224

Four New Millisecond Pulsars in the Galactic Disk. *D. R. Lorimer, L. Nicastro, A. G. Lyne, M. Bailes, R. N. Manchester, S. Johnston, J. F. Bell, N. D'Amico, & P. A. Harrison.* 439, 933, 37-D13 (1995)

Alphanumeric: PSR J1713+0747

A New Binary Millisecond Pulsar. *R. S. Foster, A. Wolszczan, & F. Camilo.* 410, L91, 126-A7 (1993)

High-Precision Timing of PSR J1713+0747: Shapiro Delay. *F. Camilo, R. S. Foster, & A. Wolszczan.* 437, L39, 291-F13 (1994)

On Possible Implications of Orbital Parallaxes of Wide Orbit Binary Pulsars and Their Measurability. *S. M. Kopeikin.* 439, L5, 29-E11 (1995)

Alphanumeric: PSR J1730−2304

Four New Millisecond Pulsars in the Galactic Disk. *D. R. Lorimer, L. Nicastro, A. G. Lyne, M. Bailes, R. N. Manchester, S. Johnston, J. F. Bell, N. D'Amico, & P. A. Harrison.* 439, 933, 37-D13 (1995)

Alphanumeric: PSR J2019+2425

Two Newly Discovered Millisecond Pulsars. *D. J. Nice, J. H. Taylor, & A. S. Fruchter.* 402, L49, 12-E7 (1993)

The Magnetic Fields, Ages, and Original Spin Periods of Millisecond Pulsars. *F. Camilo, S. E. Thorsett, & S. R. Kulkarni.* 421, L15, 21-E1 (1994)

On Possible Implications of Orbital Parallaxes of Wide Orbit Binary Pulsars and Their Measurability. *S. M. Kopeikin.* 439, L5, 29-E11 (1995)

PSR J2019+2425 and PSR J2322+2057 and the Proper Motions of Millisecond Pulsars. *D. J. Nice & J. H. Taylor.* 441, 429, 65-C7 (1995)

Alphanumeric: PSR J2145−0750

Discovery of Three Binary Millisecond Pulsars. *M. Bailes, P. A. Harrison, D. R. Lorimer, S. Johnston, A. G. Lyne, R. N. Manchester, N. D'Amico, L. Nicastro, T. M. Tauris, & C. Robinson.* 425, L41, 85-F5 (1994)

Optical Observations of the Binary Millisecond Pulsars J2145−0750 and J0034−0534. *J. F. Bell, S. R. Kulkarni, M. Bailes, E. M. Leitch, & A. G. Lyne.* 452, L121, 280-B7 (1995)

Alphanumeric: PSR J2235+1506

Discovery of Two Fast-rotating Pulsars. *F. Camilo, D. J. Nice, & J. H. Taylor.* 412, L37, 148-D11 (1993)

Alphanumeric: PSR J2317+1439

Discovery of Two Fast-rotating Pulsars. *F. Camilo, D. J. Nice, & J. H. Taylor.* 412, L37, 148-D11 (1993)

Alphanumeric: PSR J2322+2057

Two Newly Discovered Millisecond Pulsars. *D. J. Nice, J. H. Taylor, & A. S. Fruchter.* 402, L49, 12-E7 (1993)

The Magnetic Fields, Ages, and Original Spin Periods of Millisecond Pulsars. *F. Camilo, S. E. Thorsett, & S. R. Kulkarni.* 421, L15, 21-E1 (1994)

PSR J2019+2425 and PSR J2322+2057 and the Proper Motions of Millisecond Pulsars. *D. J. Nice & J. H. Taylor.* 441, 429, 65-C7 (1995)

Alphanumeric: RX J0002+6246

Discovery of a Candidate Isolated Neutron Star in a New Supernova Remnant near CTB 1. *Charles J. Hailey & William W. Craig.* 455, L151, 334-B12 (1995)

Alphanumeric: RX J0059.2−7138

A New Transient Pulsar in the Small Magellanic Cloud with an Unusual X-Ray Spectrum. *John P. Hughes.* 427, L25, 117-D8 (1994)

Alphanumeric: SMC X-1

Discovery of Orbital Decay in SMC X-1. *A. Levine, S. Rappaport, J. E. Deeter, P. E. Boynton, & F. Nagase.* 410, 328, 116-B8 (1993)

Alphanumeric: SN 1987A

A Search for a Pulsar in the Remnant of SN 1987A with the *Hubble Space Telescope* High-Speed Photometer. *J. W. Percival, P. T. Boyd, J. D. Biggs, J. F. Dolan, R. C. Bless, J. L. Elliot, M. J. Nelson, E. L. Robinson, M. J. Taylor, G. W. van Citters, & K. G. Wolinski.* 446, 832, 167-E4 (1995)

Alphanumeric: 4U 1538−52

The Polar Cap Structure of the X-Ray Pulsar 4U 1538−52. *T. Bulik, P. Mészáros, J. W. Woo, F. Nagase, & K. Makishima.* 395, 564, 149-G9 (1992)

EXOSAT Observations of the X-Ray Binary Pulsar 4U 1538−52. *N. R. Robba, G. Cusumano, M. Orlandini, D. Dal Fiume, & F. Frontera.* 401, 685, 231-A10 (1992)

Properties of a B0 I Stellar Wind and Interstellar Grains Derived from *Ginga* Observations of the Binary X-Ray Pulsar 4U 1538−52. *George W. Clark, Jonathan W. Woo, & Fumiaki Nagase.* 422, 336, 34-C3 (1994)

Geometry and Pulse Profiles of X-Ray Pulsars: Asymmetric Relativistic Fits to 4U 1538−52 and Vela X-1. *T. Bulik, H. Riffert, P. Mészáros, K. Makishima, T. Mihara, & B. Thomas.* 444, 405, 119-B3 (1995)

Alphanumeric: 4U 2206+54

EXOSAT Observations of the Be/X-Ray Binary 4U 2206+54. *Priyamvada Saraswat & Krishna M. V. Apparao.* 401, 678, 231-A1 (1992)

Alphanumeric: V0332+53

Discovery of the Quasi-periodic Oscillations from V0332+53. *Toshiaki Takeshima, Tadayasu Dotani, Kazuhisa Mitsuda, & Fumiaki Nagase.* 436, 871, 277-F7 (1994)

Alphanumeric: X0115+634

The X-Ray Outburst from X0115+634 in 1990 February. *Keisuke Tamura, Hiroshi Tsunemi, Shunji Kitamoto, Kiyoshi Hayashida, & Fumiaki Nagase.* 389, 676, 69-G1 (1992)

STARS: PULSATION

Classical Cepheids with RV Tauri Characteristics? *Pawel Moskalik & J. Robert Buchler.* 366, 300, 4-F12 (1991)

On the Subadiabatic Magnetohydrodynamic Overstability in Background Polytropes. *Yu-Qing Lou.* 367, 367, 16-E9 (1991)

Stellar Evolution and Period Changes in RR Lyrae Stars. *Young-Wook Lee.* 367, 524, 19-G7 (1991)

Resonant Interaction in Common Envelopes. *Noam Soker.* 367, 593, 20-F1 (1991)

Adiabatic Properties of Pulsating DA White Dwarfs. I. The Treatment of the Brunt-Väisälä Frequency and the Region of Period Formation. *P. Brassard, G. Fontaine, F. Wesemael, S. D. Kawaler, & M. Tassoul.* 367, 601, 20-F11 (1991)

Detection of Possible *p*-Mode Oscillations on Procyon. *Timothy M. Brown, Ronald L. Gilliland, Robert W. Noyes, & Lawrence W. Ramsey.* 368, 599, 32-E8 (1991)

Detection of Small-Amplitude Pulsations in HD 34656 (O7 II). *A. W. Fullerton, D. R. Gies, & C. T. Bolton.* 368, L35, 35-C1 (1991)

Asteroseismology of White Dwarf Stars. I. Adiabatic Results. *P. A. Bradley & D. E. Winget.* 75, 463, 7-A13 (1991)

Phase Coherence for TeV/PeV Binary Sources. *D. A. Lewis, R. C. Lamb, & S. D. Biller.* 369, 479, 43-F4 (1991)

The Discovery of an X-Ray Burst and a Study of Aperiodic Variability from SMC X-1. *L. Angelini, L. Stella, & N. E. White.* 371, 332, 64-C1 (1991)

Opacity Tables for Cepheid Variables. *Carlos A. Iglesias & Forrest J. Rogers.* 371, L73, 73-D1 (1991)

Two Double-Mode RR Lyrae Stars in the Field. *Christine M. Clement, T. D. Kinman, & Nicholas B. Suntzeff.* 372, 273, 77-C13 (1991)

Oscillations of Rotating Neutron Stars. *Tod E. Strohmayer.* 372, 573, 82-G5 (1991)

Classical Cepheid Luminosities from Binary Companions. *Nancy Remage Evans.* 372, 597, 83-B1 (1991)

The Oscillations of Rapidly Rotating Newtonian Stellar Models. II. Dissipative Effects. *James R. Ipser & Lee Lindblom.* 373, 213, 88-E12 (1991)

Analysis of Radiation Pressure Effects in Pulsating Stars through Perturbative Limit Cycle Solutions. *A. Costa, D. Gómez, & C. Ferro Fontán.* 373, 237, 88-G13 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

Post-Newtonian Effects on the Modes of Rotating Stars. *Curt Cutler.* 374, 248, 101-C1 (1991)

The Infrared and Optical Pulsations of G29-38. *Joseph Patterson, B. Zuckerman, E. E. Becklin, D. J. Tholen, & T. Hawarden.* 374, 330, 102-C1 (1991)

Hydrodynamic Pulsation Models of Yellow Supergiant Stars in the Post-Asymptotic Giant Branch. *Toshiki Aikawa.* 374, 700, 107-F13 (1991)

The *p*-Mode Oscillation Spectra of an Evolving 1 $M_\odot$ Sun-like Star. *D. B. Guenther.* 375, 352, 115-C8 (1991)

The Shear Modulus of the Neutron Star Crust and Nonradial Oscillations of Neutron Stars. *T. Strohmayer, S. Ogata, H. Iyetomi, S. Ichimaru, & H. M. Van Horn.* 375, 679, 121-B7 (1991)

Detection of Coherent 7.6 Hz Oscillations during a Burst from Aquila X-1. *R. J. Schoelkopf & R. L. Kelley.* 375, 696, 121-D1 (1991)

The RRd Masses Revisited. *Norman R. Simon & Arthur N. Cox.* 376, 717, 135-C1 (1991)

Asteroseismology of the DOV Star PG 1159−035 with the Whole Earth Telescope. *D. E. Winget, R. E. Nather, J. C. Clemens, J. Provencal, S. J. Kleinman, P. A. Bradley, M. A. Wood, C. F. Claver, M. L. Frueh, A. D. Grauer, B. P. Hine, C. J. Hansen, G. Fontaine, N. Achilleos, D. T. Wickramasinghe, T. M. K. Marar, S. Seetha, B. N. Ashoka, D. O'Donoghue, B. Warner, D. W. Kurtz, D. A. Buckley, J. Brickhill, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, J. E. Solheim, A. Kanaan, S. O. Kepler, G. W. Henry, & S. D. Kawaler.* 378, 326, 155-A10 (1991)

Discovery and Seismological Interpretation of Low-Amplitude Modes in the Pulsating DO White Dwarf PG 1707+427 (V817 Herculis). *G. Fontaine, P. Bergeron, G. Vauclair, P. Brassard, F. Wesemael, S. D. Kawaler, A. D. Grauer, & D. E. Winget.* 378, L49, 162-F1 (1991)

On the Adiabatic Pulsations of Accretion Disks and Rotating Stars. *James R. Ipser & Lee Lindblom.* 379, 285, 166-E7 (1991)

Periodic Stellar Pulsations: Stability Analysis and Amplitude Equations. *J. Robert Buchler, Pawel Moskalik, & Géza Kovács.* 380, 185, 178-D1 (1991)

Superfluid Hydrodynamics in Rotating Neutron Stars. I. Nondissipative Equations. *Gregory Mendell.* 380, 515, 184-F1 (1991)

Superfluid Hydrodynamics in Rotating Neutron Stars. II. Dissipative Effects. *Gregory Mendell.* 380, 530, 184-G3 (1991)

Post–Asymptotic Giant Branch Nonradial Instability Strips. *Letizia Stanghellini, Arthur N. Cox, & Sumner Starrfield.* 383, 766, 223-F10 (1991)

The Mode of Pulsation in Mira Variables Determined by the Observed Acceleration Data. *Y. Tuchman.* 383, 779, 223-G11 (1991)

STARS: RADIO RADIATION

AG Pegasi: A Multishell Radio Source. *H. T. Kenny, A. R. Taylor, & E. R. Seaquist.* 366, 549, 9-G7 (1991)

The Proper Motion of the Soft X-Ray–emitting Radio Pulsar PSR 0656+14. *R. J. Thompson, Jr., F. A. Córdova, R. M. Hjellming, & E. B. Fomalont.* 366, L83, 11-E1 (1991)

Nonthermal Radio Emission from the X-Ray–Bright K5 IV Star 1E 1751+7046. *Stephen L. Skinner.* 368, 272, 26-D11 (1991)

Solar and Stellar Radio Spikes: Limits on the Saturation of the Electron-Cyclotron Maser. *Donat G. Wentzel & Markus J. Aschwanden.* 372, 688, 84-C1 (1991)

Direct VLBI Detection of the Magnetosphere Surrounding the Young Star S1 in ρ Ophiuchi. *Philippe André, Robert B. Phillips, Jean-François Lestrade, & Karl-Ludwig Klein.* 376, 630, 134-B12 (1991)

Observations of Stellar Winds from Hot Stars at 1.3 Millimeters. *Claus Leitherer & Carmelle Robert.* 377, 629, 147-E1 (1991)

High-Resolution Radio Continuum Observations of Compact Planetary Nebulae. *O. B. Aaquist & Sun Kwok.* 378, 599, 159-G1 (1991)

An Observational Connection between Circumstellar Disk Mass and Molecular Outflows. *Sylvie Cabrit & Philippe André.* 379, L25, 169-C6 (1991)

A Rich Cluster of Radio Stars in the ρ Ophiuchi Cloud Cores. *James A. Leous, Eric D. Feigelson, Philippe André, & Thierry Montmerle.* 379, 683, 173-B10 (1991)

The 10 Year Radio Light Curves for SN 1979C. *Kurt W. Weiler, Schuyler D. Van Dyk, Nino Panagia, Richard A. Sramek, & Jennifer L. Discenna.* 380, 161, 178-B1 (1991)

Milliarcsecond Radio Structure of Weak-lined T Tauri Stars. *R. B. Phillips, C. J. Lonsdale, & E. D. Feigelson.* 382, 261, 203-D9 (1991)

Are FU Orionis Stars Younger than T Tauri Stars? Submillimeter Constraints on Circumstellar Disks. *David A. Weintraub, Göran Sandell, & William D. Duncan.* 382, 270, 203-E8 (1991)

Direct Evidence for Stellar Wind X-Ray Absorption in O Stars. *Wayne L. Waldron.* 382, 603, 209-A9 (1991)

The Radio "Lobes" of Scorpius X-1 Are Unrelated Background Sources. *E. B. Fomalont & B. J. Geldzahler.* 383, 289, 215-G1 (1991)

STARS: ROTATION

Rotation and Magnetism in White Dwarfs. *Gary D. Schmidt & Jane E. Norsworthy.* 366, 270, 4-D1 (1991)

Evolutionary Models of Halo Stars with Rotation. I. Evidence for Differential Rotation with Depth in Stars. *Marc H. Pinsonneault, Constantine P. Deliyannis, & Pierre Demarque.* 367, 239, 15-A12 (1991)

Models of White Dwarfs under Rapid Uniform or Differential Rotation: Numerical Results. II. *V. S. Geroyannis & A. A. Hadjopoulos.* 75, 499, 7-D11 (1991)

Continuum Polarization by Electron Scattering in Rotationally Distorted, Radiation-driven Stellar Winds: B[e] Supergiants. *Cameron J. Boyd & J. M. Marlborough.* 369, 191, 38-C11 (1991)

Explosion of a Rotating Neutron Star near the Minimum Mass. *Monica Colpi, Stuart L. Shapiro, & Saul A. Teukolsky.* 369, 422, 43-A5 (1991)

Does Accretion Cease When a Star Approaches Breakup? *Robert Popham & Ramesh Narayan.* 370, 604, 56-A6 (1991)

Meridional Circulation and Diffusion in A and Early F Stars. *Paul Charbonneau & Georges Michaud.* 370, 693, 57-A10 (1991)

Spectroscopic Binaries in the Orion OB1 Association. *Nidia Morrell & Hugo Levato.* 75, 965, 15-F5 (1991)

Oscillations of Rotating Neutron Stars. *Tod E. Strohmayer.* 372, 573, 82-G5 (1991)

Rotational Modulation in *IUE* Spectra of Cool Dwarf Chromospheres. I. Data Analysis and Period Search Techniques. *K. L. Hallam, B. Altner, & A. S. Endal.* 372, 610, 83-C1 (1991)

Stationary Accelerators around Keplerian Disks of Aligned Magnetized Collapsed Objects: Pair Production and Gamma-Ray Emission. *K. S. Cheng & M. Ruderman.* 373, 187, 88-C9 (1991)

The Oscillations of Rapidly Rotating Newtonian Stellar Models. II. Dissipative Effects. *James R. Ipser & Lee Lindblom.* 373, 213, 88-E12 (1991)

Structure and Stability of Rotating Relativistic Neutron Stars. *F. Weber, N. K. Glendenning, & M. K. Weigel.* 373, 579, 95-B10 (1991)

The Chromospheric Activity of Low-Mass Stars in the Hyades. *John R. Stauffer, Mark S. Giampapa, William Herbst, James M. Vincent, Lee W. Hartmann, & Robert A. Stern.* 374, 142, 99-G1 (1991)

Post-Newtonian Effects on the Modes of Rotating Stars. *Curt Cutler.* 374, 248, 101-C1 (1991)

The Collapse of Cylindrical Isothermal and Polytropic Clouds with Rotation. *Ian Bonnell & Pierre Bastien.* 374, 610, 106-F5 (1991)

Rotation and Emission Lines in Stars and Accretion Disks. *Keith Horne & Steven H. Saar.* 374, L55, 110-D6 (1991)

V1500 Cygni: A Prediction. *J. I. Katz.* 374, L59, 110-D11 (1991)

The Many Faces of F Stars: A Rotational Modulation Study of Capella, Procyon, and Caph with the *International Ultraviolet Explorer*. *Thomas R. Ayres.* 375, 704, 121-D11 (1991)

Rotational Evolution of Solar-Type Stars. I. Main-Sequence Evolution. *K. B. MacGregor & M. Brenner.* 376, 204, 127-D13 (1991)

Spin Evolution and Magnetic Fields in Cataclysmic Variables. *Andrew R. King & Jean-Pierre Lasota.* 378, 674, 160-G1 (1991)

On the Adiabatic Pulsations of Accretion Disks and Rotating Stars. *James R. Ipser & Lee Lindblom.* 379, 285, 166-E7 (1991)

Spin-up of the White Dwarf in the Intermediate Polar 3A 0729+103. *Jyoti Singh, P. C. Agrawal, K. M. V. Apparao, P. Vivekananda Rao, & M. B. K. Sarma.* 380, 208, 178-E11 (1991)

Metallic Line Profiles of the A0 V Star Vega. *Austin F. Gulliver, Saul J. Adelman, Charles R. Cowley, & J. Murray Fletcher.* 380, 223, 178-G1 (1991)

Superfluid Hydrodynamics in Rotating Neutron Stars. I. Nondissipative Equations. *Gregory Mendell.* 380, 515, 184-F1 (1991)

Superfluid Hydrodynamics in Rotating Neutron Stars. II. Dissipative Effects. *Gregory Mendell.* 380, 530, 184-G3 (1991)

A Connection between Long-Term Luminosity Variations and Orbital Period Changes in Chromospherically Active Binaries. *Douglas S. Hall.* 380, L85, 188-F1 (1991)

Two-dimensional Hydrodynamic Calculations of the Nonlinear Development of the Goldreich-Schubert-Fricke Instability in a Rotating Annulus. *D. G. Korycansky.* 381, 515, 197-B1 (1991)

Rotation Periods for Seven Stars in the Trapezium Cluster. *Gregory N. Mandel & William Herbst.* 383, L75, 226-E11 (1991)

Model Atmospheres for Rotating B Stars. *George W. Collins II, Ryland J. Truax, & Steven R. Cranmer.* 77, 541, 52-B5 (1991)

Line Shapes of Rotating Stars with Application to Alpha Lyrae. *G. H. Elste.* 384, 284, 4-D10 (1992)

Evolutionary Models of Halo Stars with Rotation. II. Effects of Metallicity on Lithium Depletion, and Possible Implications for the Primordial Lithium Abundance. *M. H. Pinsonneault, Constantine P. Deliyannis, & P. Demarque.* 78, 179, 4-B3 (1992)

Post-Newtonian Frequencies for the Pulsations of Rapidly Rotating Neutron Stars. *Curt Cutler & Lee Lindblom.* 385, 630, 21-A1 (1992)

Constraints on the Surface Magnetic Fields of Hot Stars with Winds. *Murugesapillai Maheswaran & Joseph P. Cassinelli.* 386, 695, 33-G13 (1992)

Angular Momentum Transport in Magnetized Stellar Radiative Zones. I. Numerical Solutions to the Core Spin-up Model Problem. *P. Charbonneau & K. B. MacGregor.* 387, 639, 46-E11 (1992)

Carbon, Nitrogen, and Oxygen Abundances in Early B-Type Stars. *Douglas R. Gies & David L. Lambert.* 387, 673, 47-B1 (1992)

Light Curves of Rotating, Oscillating Neutron Stars. *T. E. Strohmayer.* 388, 138, 50-F9 (1992)

Rotational Properties of Strange Stars. *M. Colpi & J. C. Miller.* 388, 513, 56-F1 (1992)

On the Interior Structure of Contact Binaries and the Light-Curve Paradox. *Jean-Louis Tassoul.* 389, 375, 64-E9 (1992)

Rotating Stars: The Angular Momentum Constraints. *Fernando de Felice & Leonardo Di G. Sigalotti.* 389, 386, 64-F7 (1992)

On the Pulsations of Relativistic Accretion Disks and Rotating Stars: The Cowling Approximation. *James R. Ipser & Lee Lindblom.* 389, 392, 64-G1 (1992)

Remarks on Triaxiality, Spin-up, and Magnetic Field Obliquity of Some Millisecond Pulsars. *W. Y. Chau, K. S. Cheng, & J. L. Zhang.* 390, 486, 81-D1 (1992)

Application of the Improved Hartle Method for the Construction of General Relativistic Rotating Neutron Star Models. *F. Weber & N. K. Glendenning.* 390, 541, 82-B1 (1992)

The Rotation of M Dwarfs. *Geoffrey W. Marcy & Grace H. Chen.* 390, 550, 82-B11 (1992)

The Ring around SN 1987A and Rotation of the Progenitor. *Y. Eriguchi, H. Yamaoka, K. Nomoto, & M. Hashimoto.* 392, 243, 104-A1 (1992)

Evidence of Differential Surface Rotation in the Solar-Type Star HD 114710. *Robert A. Donahue & Sallie L. Baliunas.* 393, L63, 127-D1 (1992)

Rotational Parameters of PSR 0540−69 as Measured at Optical Wavelengths. *Christian Gouiffes, John P. Finley, & Hakki Ögelman.* 394, 581, 136-E8 (1992)

Effects of Differential Rotation on Stellar Oscillations: A Second-Order Theory. *W. A. Dziembowski & Philip R. Goode.* 394, 670, 137-G5 (1992)

A Comparative Study of Synchronization and Circularization in Close Binaries. *Jean-Louis Tassoul & Monique Tassoul.* 395, 259, 143-D1 (1992)

On the Efficiency of Ekman Pumping for Synchronization in Close Binaries. *Monique Tassoul & Jean-Louis Tassoul.* 395, 604, 150-E5 (1992)

Field Theoretical Model for Nuclear and Neutron Matter. V. Slowly Rotating Warm Cores in Neutron Stars. *José V. Romero, J. Díaz Alonso, José M^a. Ibáñez, Juan A. Miralles, & Armando Pérez.* 395, 612, 150-F5 (1992)

Effects of Evolving Rotating Equilibrium Configurations on the Cooling and Spin-down of Pulsars. *K. S. Cheng, W. Y. Chau, J. L. Zhang, & H. F. Chau.* 396, 135, 156-G3 (1992)

γ Cephei: Rotation or Planetary Companion? *Gordon A. H. Walker, David A. Bohlender, Andrew R. Walker, Alan W. Irwin, Stephenson L. S. Yang, & Ana Larson.* 396, L91, 167-D1 (1992)

Solar Spin-down with Internal Magnetic Fields. *P. Charbonneau & K. B. MacGregor.* 397, L63, 174-A3 (1992)

Spin-up of a Rapidly Rotating Star by Angular Momentum Loss: Effects of General Relativity. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 398, 203, 184-D1 (1992)

Rotation Periods of T Tauri Stars in the Orion Nebula Cluster: A Bimodal Frequency Distribution. *Joanne M. Attridge & William Herbst.* 398, L61, 188-B1 (1992)

Oscillations and Collapse of Compressible Homogeneous Rotating Spheroids with Electron Degeneracy. *T. T. Chia & S. Y. Pung.* 398, 574, 191-C7 (1992)

Polarization Cancellation in the Two-Component Winds from Wolf-Rayet Stars. *M. Taylor & J. P. Cassinelli.* 401, 311, 224-G5 (1992)

General Relativistic Structure of Star-Toroid Systems. *Shogo Nishida, Yoshiharu Eriguchi, & Antonio Lanza.* 401, 618, 230-C1 (1992)

Rotation and Activity among Solar-Type Stars of the Ursa Major Group. *David R. Soderblom & Michel Mayor.* 402, L5, 6-B9 (1993)

Lithium and Rapid Rotation in Chromospherically Active Single Giants. *Francis C. Fekel & Suchitra Balachandran.* 403, 708, 24-E4 (1993)

Particle Transport and the λ Bootis Phenomenon. I. The Diffusion/Mass-Loss Model Revisited. *P. Charbonneau.* 405, 720, 52-A9 (1993)

Rotation of Young Solar-Type Stars in the Orion Nebula Region. *Douglas K. Duncan.* 406, 172, 57-C1 (1993)

Hydrodynamical Simulations of Rotating Stars. I. A Model for Subgrid-Scale Flow. *Maurice J. Clement.* 406, 651, 66-A3 (1993)

The Boltzmann Equation in General Relativistic Rotating Systems: Cooling of Rotating Neutron Stars. *Juan A. Miralles, Kenneth A. Van Riper, & James M. Lattimer.* 407, 687, 79-B1 (1993)

Rotation and Chromospheric Emission among F, G, and K Dwarfs of the Pleiades. *David R. Soderblom, John R. Stauffer, J. Dan Hudon, & Burton F. Jones.* 85, 315, 11-D13 (1993)

Local Hydrodynamic Instability of Rotating Stars. *Alexander Lifschitz & Norman Lebovitz.* 408, 603, 92-F9 (1993)

Equatorial Disk Formation around Rotating Stars Due to Ram Pressure Confinement by the Stellar Wind. *J. E. Bjorkman & J. P. Cassinelli.* 409, 429, 102-C10 (1993)

The Evolution of Angular Momentum among Zero-Age Main-Sequence Solar-Type Stars. *David R. Soderblom, John R. Stauffer, Keith B. MacGregor, & Burton F. Jones.* 409, 624, 106-F13 (1993)

Doppler Imaging Stars with Moderate Rotation: The Spot Distribution on σ Geminorum. *Artie P. Hatzes.* 410, 777, 123-D7 (1993)

A Study of Carina OB2 Association. I. Observational Data. *Beatriz García.* 87, 197, 29-F3 (1993)

The Effects of Zonal Atmospheric Currents on the Spectra of Rotating Early-Type Stars. *Steven R. Cranmer & George W. Collins II.* 412, 720, 152-F12 (1993)

The Effects of Zonal Atmospheric Currents on the Spectra of Rotating Early-Type Stars. *Steven R. Cranmer & George W. Collins II.* 412, 720, 152-F12 (1993)

Normal Modes of Relativistic Stars in Slow Rotation Limit. *Yasufumi Kojima.* 414, 247, 173-B3 (1993)

An Interpretation of Cycle Periods of Stellar Chromospheric Activity. *W. H. Soon, S. L. Baliunas, & Q. Zhang.* 414, L33, 175-F6 (1993)

Ellipsoidal Figures of Equilibrium: Compressible Models. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 88, 205, 43-A1 (1993)

Self-gravitating Symplectic Systems. *G. Rosensteel.* 416, 291, 204-F7 (1993)

Chromospheric Activity in Galactic Open Clusters. *A. J. Beasley & L. E. Cram.* 417, 157, 219-D1 (1993)

Cooling and Spin-down of Pulsars with Evolving Rotating Equilibrium Configuration. II. Effects of Equations of State. *N. Chong & K. S. Cheng.* 417, 279, 221-A3 (1993)

Angular Momentum Transport in Magnetized Stellar Radiative Zones. II. The Solar Spin-down. *P. Charbonneau & K. B. MacGregor.* 417, 762, 228-G13 (1993)

A Far-Ultraviolet Flare on a Pleiades G Dwarf. *T. R. Ayres, J. R. Stauffer, Theodore Simon, R. A. Stern, S. K. Antiochos, G. S. Basri, J. A. Bookbinder, A. Brown, G. A. Doschek, J. L. Linsky, L. W. Ramsey, & F. M. Walter.* 420, L33, 7-E4 (1994)

Differential Rotation and the Convective Core Mass of Upper Main-Sequence Stars. *Maurice J. Clement.* 420, 797, 12-G3 (1994)

Hydrodynamic Instability and Coalescence of Binary Neutron Stars. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 420, 811, 13-A10 (1994)

An Iterative Technique for Computing Rotating White Dwarf Models. *V. S. Geroyannis & P. J. Papasotiriou.* 90, 501, 9-A9 (1994)

Radiating, Slowly Rotating Bodies in General Relativity. *L. Herrera, A. Melfo, L. A. Núñez, & A. Patiño.* 421, 677, 26-F3 (1994)

Rotation and Magnetic Fields during the Evolution of Massive Stars through B[e] and Wolf-Rayet Phases. *Murugesapillai Maheswaran & Joseph Cassinelli.* 421, 718, 27-B9 (1994)

Rapidly Rotating Polytropes in General Relativity. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 422, 227, 33-A1 (1994)

Rapidly Rotating Neutron Stars in General Relativity: Realistic Equations of State. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 424, 823, 75-A11 (1994)

Neutron Star Moments of Inertia. *D. G. Ravenhall & C. J. Pethick.* 424, 846, 75-C8 (1994)

Detection of Lithium in the Cool Halo Dwarfs Groombridge 1830 and HD 134439: Implications for Internal Stellar Mixing and Cosmology. *Constantine P. Deliyannis, Sean G. Ryan, Timothy C. Beers, & Julie A. Thorburn.* 425, L21, 85-D3 (1994)

Optical Variability in the Unusual K5 V Infrared-Excess Star HD 98800. *Gregory W. Henry & Douglas S. Hall.* 425, L25, 85-D9 (1994)

A Spectroscopic Method to Measure MACHO Proper Motions. *Dan Maoz & Andrew Gould.* 425, L67, 94-C1 (1994)

On the Existence of a Surface Boundary Layer in a Slowly Rotating, Early-Type Star. *Monique Tassoul.* 427, 388, 114-F3 (1994)

Magnetic Braking in Spin Evolution of Magnetized T Tauri Stars. *Insu Yi.* 428, 760, 139-F6 (1994)

The Orbital Evolution of Highly Eccentric Binaries. *Itzhak Goldman & Tsevi Mazeh.* 429, 362, 148-E7 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. I. A Generalized Model. *Frank Shu, Joan Najita, Eve Ostriker, Frank Wilkin, Steven Ruden, & Susana Lizano.* 429, 781, 155-D5 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. II. Formulation of the Dynamical Problem. *Frank H. Shu, Joan Najita, Steven P. Ruden, & Susana Lizano.* 429, 797, 155-E9 (1994)

Magnetocentrifugally Driven Flows from Young Stars and Disks. III. Numerical Solution of the Sub-Alfvénic Region. *Joan R. Najita & Frank H. Shu.* 429, 808, 155-F9 (1994)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. I. Axisymmetric Solutions. *Shantanu Basu & Telemachos Ch. Mouschovias.* 432, 720, 205-A6 (1994)

Ultraviolet Spectral Classification and Stellar Winds in a Sample of Be and Standard Stars. *Arne Slettebak.* 94, 163, 54-A5 (1994)

Waves and Instabilities of a Toroidal Magnetic Flux Tube in a Rotating Star. *A. Ferriz-Mas & M. Schüssler.* 433, 852, 221-F10 (1994)

Numerical Study of Rotating Core Collapse in Supernova Explosions. *Shoichi Yamada & Katsuhiko Sato.* 434, 268, 229-B6 (1994)

Lithium in a Short-Period Tidally Locked Binary of M67: Implications for Stellar Evolution, Galactic Lithium Evolution, and Cosmology. *Constantine P. Deliyannis, Jeremy R. King, Ann M. Boesgaard, & Sean G. Ryan.* 434, L71, 241-G1 (1994)

Upper Limit of the Angular Velocity of Neutron Stars. *Masa-aki Hashimoto, Kazuhiro Oyamatsu, & Yoshiharu Eriguchi.* 436, 257, 264-G1 (1994)

Hydrodynamics of Rotating Stars and Close Binary Interactions: Compressible Ellipsoid Models. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 437, 742, 295-G13 (1994)

Critical Angular Velocities of Rotating Neutron Stars. *Lee Lindblom.* 438, 265, 5-B4 (1995)

Chromospheric Variations in Main-Sequence Stars. II. *S. L. Baliunas, R. A. Donahue, W. H. Soon, J. H. Horne, J. Frazer, L. Woodard-Eklund, M. Bradford, L. M. Rao, O. C. Wilson, Q. Zhang, W. Bennett, J. Briggs, S. M. Carroll, D. K. Duncan, D. Figueroa, H. H. Lanning, T. Misch, J. Mueller, R. W. Noyes, D. Poppe, A. C. Porter, C. R. Robinson, J. Russell, J. C. Shelton, T. Soyumer, A. H. Vaughan, & J. H. Whitney.* 438, 269, 5-B12 (1995)

RE 0044+09: A New K Dwarf Rapid Rotator with a White Dwarf Companion? *Barry J. Kellett, Gordon E. Bromage, Alexander Brown, Robin D. Jeffries, David J. James, David Kilkenny, Russell M. Robb, David Wonnacott, Christopher Lloyd, & C. Clayton.* 438, 364, 6-D13 (1995)

HD 93521, ζ Ophiuchi, and the Effects of Rapid Rotation on the Atmospheres and Winds of O9.5 V Stars. *Derck Massa.* 438, 376, 6-F1 (1995)

Gravitational Radiation–driven Secular Instability of Rotating Polytropes. *Shin'ichirou Yoshida & Yoshiharu Eriguchi.* 438, 830, 15-F1 (1995)

Stellar Evolution with Arbitrary Rotation Laws. II. Massive Star Evolution to Core Hydrogen Exhaustion. *Robert G. Deupree.* 439, 357, 26-B1 (1995)

Simple Analysis of Slowly Rotating Semidegenerate Spheroids of Fermions. *M. A. Sabadell, J. Sañudo, & A. F. Pacheco.* 439, 846, 36-C5 (1995)

Classical Rotational Broadening of Spectral Lines. *George W. Collins II & Ryland J. Truax.* 439, 860, 36-E3 (1995)

The Effect of Oblateness and Gravity Darkening on the Radiation Driving in Winds from Rapidly Rotating B Stars. *Steven R. Cranmer & Stanley P. Owocki.* 440, 308, 45-D6 (1995)

Meridional Circulation in Rotating Stars. XI. Single-Cell Pattern versus Double-Cell Pattern. *Monique Tassoul & Jean-Louis Tassoul.* 440, 789, 54-A4 (1995)

Can the Variability of Solar-like Spotted Stars be Detected Polarimetrically? *Geoffrey K. Fox.* 441, 408, 65-A1 (1995)

Detection of the Hot White Dwarf in the Magnetic Nova V1500 Cygni with the *Hubble Space Telescope*. *Gary D. Schmidt, James Liebert, & H. S. Stockman.* 441, 414, 65-A11 (1995)

Stellar Models with Microscopic Diffusion and Rotational Mixing. II. Application to Open Clusters. *Brian Chaboyer, P. Demarque, & M. H. Pinsonneault.* 441, 876, 74-A13 (1995)

The Very Low Mass X-Ray Binary Pulsars: A New Class of Sources? *S. Mereghetti & L. Stella.* 442, L17, 84-F9 (1995)

Magnetized Accretion and Spin Evolution in Classical T Tauri Stars. *Insu Yi.* 442, 768, 90-G2 (1995)

Activity Cycles in Cool Stars. I. Observation and Analysis Methods and Case Studies of Four Well-observed Examples. *Jeffrey C. Hall, G. W. Lockwood, & Erika L. Gibb.* 442, 778, 91-A1 (1995)

Magnetic Moments and Angular Momenta of Stars and Planets. *C. N. Arge, D. J. Mullan, & A. Z. Dolginov.* 443, 795, 108-G1 (1995)

Starspot Evolution, Differential Rotation, and Magnetic Cycles in the Chromospherically Active Binaries λ Andromedae, σ Geminorum, II Pegasi, and V711 Tauri. *Gregory W. Henry, Joel A. Eaton, Jamesia Hamer, & Douglas S. Hall.* 97, 513, 19-C6 (1995)

Comparing Models of Rapidly Rotating Relativistic Stars Constructed by Two Numerical Methods. *Nikolaos Stergioulas & John L. Friedman.* 444, 306, 117-F1 (1995)

On Orbital Circularization in Late-Type Close Binaries. *Jean-Louis Tassoul.* 444, 338, 118-B8 (1995)

Nonaxisymmetric Secular Instabilities Driven by Star/Disk Coupling. *James N. Imamura, Joseph Toman, Richard H. Durisen, Brian K. Pickett, & Shelby Yang.* 444, 363, 118-E4 (1995)

The Minimum Mass Ratio of W Ursae Majoris Binaries. *Frederic A. Rasio.* 444, L41, 121-G1 (1995)

Does Gravitational Radiation Limit the Angular Velocities of Superfluid Neutron Stars? *Lee Lindblom & Gregory Mendell.* 444, 804, 127-E6 (1995)

Hubble Space Telescope High-Resolution Spectroscopy of the Exposed White Dwarf in the Dwarf Nova VW Hydri in Quiescence: A Rapidly Rotating White Dwarf. *Edward M. Sion, Min Huang, Paula Szkody, & Fu-Hua Cheng.* 445, L31, 140-F3 (1995)

Equilibrium in the Oblique Rotating Outer Pulsar Magnetosphere. *Geoffrey Endean.* 445, 762, 145-F7 (1995)

Phase-Transition Theory of Instabilities. II. Fourth-Harmonic Bifurcations and λ-Transitions. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 485, 162-G3 (1995)

Whole Earth Telescope Observations of the DAV White Dwarf G226-29. *S. O. Kepler, O. Giovannini, M. A. Wood, R. E. Nather, D. E. Winget, A. Kanaan, S. J. Kleinman, P. A. Bradley, J. L. Provencal, J. C. Clemens, C. F. Claver, T. K. Watson, K. Yanagida, K. Krisciunas, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. Leibowitz, H. Mendelson, T. Mazeh, P. Moskalik, J. Krzesiński, G. Pajdosz, S. Zoła, J.-E. Solheim, P.-I. Emanuelsen, N. Dolez, G. Vauclair, M. Chevreton, J.-R. Fremy, M. A. Barstow, A. E. Sansom, R. W. Tweedy, D. T. Wickramasinghe, L. Ferrario, D. J. Sullivan, A. J. van der Peet, D. A. H. Buckley, & A.-L. Chen.* 447, 874, 188-A1 (1995)

The Rotational Rates of Blue Stragglers Produced by Physical Stellar Collisions. *Peter J. T. Leonard & Mario Livio.* 447, L121, 191-B11 (1995)

The Relation between Rotational Velocities and Spectral Peculiarities among A-Type Stars. *Helmut A. Abt & Nidia I. Morrell.* 99, 135, 36-A1 (1995)

Study of Spectroscopic Binaries with TODCOR. II. The Highly Eccentric Binary HD 2909. *Tsevi Mazeh, Shay Zucker, Dorit Goldberg, David W. Latham, Robert P. Stefanik, & Bruce W. Carney.* 449, 909, 225-C10 (1995)

On the Torque Exerted by a Magnetically Threaded Accretion Disk. *Y.-M. Wang.* 449, L153, 227-F1 (1995)

Spectral and Temporal Characteristics of X-Ray–bright Stars in the Pleiades. *Marc Gagné, Jean-Pierre Caillault, & John R. Stauffer.* 450, 217, 231-A11 (1995)

Gravitational Radiation from Rotational Collapse of a Supernova Core. *Shoichi Yamada & Katsuhiko Sato.* 450, 245, 231-D4 (1995)

The Structure and Evolution of an Accretion Flow Interacting with the Central Star. *Masayuki Y. Fujimoto.* 450, 262, 231-E13 (1995)

Evidence for Rapid Rotation of the Carbon Star V Hydrae. *Cecilia Barnbaum, Mark Morris, & Claudine Kahane.* 450, 862, 242-G7 (1995)

A 12 Year Photometric Study of Lower Main-Sequence Hyades Stars. *Richard R. Radick, G. W. Lockwood, B. A. Skiff, & D. T. Thompson.* 452, 332, 266-F6 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. II. A Parameter Study. *Shantanu Basu & Telemachos Ch. Mouschovias.* 452, 386, 267-D7 (1995)

Chemical Evolution of the Orion Association. III. The Lithium Abundance of F and G Stars. *Katia Cunha, Verne V. Smith, & David L. Lambert.* 452, 634, 273-D11 (1995)

Spin-Orbit Interactions in Neutron Star/Main-Sequence Binaries and Implications for Pulsar Timing. *Dong Lai, Lars Bildsten, & Victoria M. Kaspi.* 452, 819, 276-A1 (1995)

Rotation and Oxygen Line Strengths in Blue Horizontal-Branch Stars. *Ruth C. Peterson, Robert T. Rood, & Deborah A. Crocker.* 453, 214, 284-B1 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. III. Effect of the Initial Mass-to-Flux Ratio. *Shantanu Basu & Telemachos Ch. Mouschovias.* 453, 271, 284-G9 (1995)

Spin-down of Neutron Stars in Massive Radio Pulsar Binaries: The Periastron Passage of PSR B1259−63. *Pranab Ghosh.* 453, 411, 286-F13 (1995)

On the Interaction of Convection and Rotation in Stars. *Pawan Kumar, Ramesh Narayan, & Abraham Loeb.* 453, 480, 287-F6 (1995)

Periodic Variations in Ultraviolet Spectral Lines of the B0.5 Ib Star HD 64760: Evidence for Corotating Wind Streams Rooted in Surface Variations. *Stanley P. Owocki, Steven R. Cranmer, & Alexander W. Fullerton.* 453, L37, 289-G1 (1995)

Lithium in Short-Period Tidally Locked Binaries: A Test of Rotationally Induced Mixing. *Sean G. Ryan & Constantine P. Deliyannis.* 453, 819, 295-B12 (1995)

The 71 Second Oscillation in the Light Curve of the Old Nova DQ Herculis. *E. Zhang, E. L. Robinson, R. F. Stiening, & Keith Horne.* 454, 447, 305-D12 (1995)

Asymmetrical Mass Loss from Rotating Red Giant Variables. *S. M. Asida & Y. Tuchman.* 455, 286, 322-B2 (1995)

STARS: δ SCUTI

Lithium Abundances in δ Scuti Stars and Their Relationship with the Lithium Dip. *Stephen C. Russell.* 451, 747, 257-D13 (1995)

STARS: SEMIREGULAR VARIABLES

Abundances of Tc and Related Elements in Stars of Type M, MS, and S. *Andrew D. Vanture, George Wallerstein, Jeffery A. Brown, & Grant Bazan.* 381, 278, 192-D7 (1991)

STARS: SPECTRA

The Diffuse Interstellar Bands. VIII. New Features between 6000 and 8650 Å. *G. H. Herbig & K. D. Leka.* 382, 193, 202-E12 (1991)

STARS: SPECTRAL CLASSIFICATION

Criteria for the Spectral Classification of B Stars in the Ultraviolet. *Janet Rountree & George Sonneborn.* 369, 515, 44-B5 (1991)

Classical Cepheid Luminosities from Binary Companions. *Nancy Remage Evans.* 372, 597, 83-B1 (1991)

The Evolution and Classification of Postoutburst Novae Spectra. *R. E. Williams, M. Hamuy, M. M. Phillips, S. R. Heathcote, Lisa Wells, & M. Navarrete.* 376, 721, 135-C7 (1991)

A Standard Stellar Spectral Sequence in the Red/Near-Infrared: Classes K5 to M9. *J. Davy Kirkpatrick, Todd J. Henry, & Donald W. McCarthy, Jr.* 77, 417, 50-C5 (1991)

New Low-Resolution Spectrometer Spectra for *IRAS* Sources. *Kevin Volk, Sun Kwok, R. E. Stencel, & E. Brugel.* 77, 607, 53-A1 (1991)

STARS: STATISTICS

Local Distribution of Old Neutron Stars. *Zsolt Frei, Xiaolan Huang, & Bohdan Paczyński.* 384, 105, 2-C10 (1992)

Multiplicity among the Young Stars in Taurus. *M. Simon, W. P. Chen, R. R. Howell, J. A. Benson, & D. Slowik.* 384, 212, 3-E8 (1992)

High Rate for Type Ic Supernovae. *Richard A. Muller, Heidi Jo Marvin Newberg, Carlton R. Pennypacker, Saul Perlmutter, Timothy P. Sasseen, & Craig K. Smith.* 384, L9, 6-B7 (1992)

Fokker-Planck Models and Globular Cluster Evolution: The Problem of M71. *G. A. Drukier, G. G. Fahlman, & H. B. Richer.* 386, 106, 25-D7 (1992)

The Frequencies of Supernovae in Binaries. *Alexander V. Tutukov, Lev R. Yungelson, & Icko Iben, Jr.* 386, 197, 26-E9 (1992)

Constraints on the Age and Evolution of the Galaxy from the White Dwarf Luminosity Function. *M. A. Wood.* 386, 539, 32-B3 (1992)

The Baade-Wesselink Method and the Distances to RR Lyrae Stars. VIII. Comparisons with Other Techniques and Implications for Globular Cluster Distances and Ages. *Bruce W. Carney, Jesper Storm, & Rodney V. Jones.* 386, 663, 33-E5 (1992)

On the Galactic Disk and Halo Models of Gamma-Ray Bursts. *Shude Mao & Bohdan Paczyński.* 389, L13, 66-C1 (1992)

Type I Supernovae and Accretion-induced Collapses from Cataclysmic Variables? *Mario Livio & James W. Truran.* 389, 695, 70-A10 (1992)

Supernova Rates and the Reddening of Wolf-Rayet Stars. *Sidney van den Bergh.* 390, 133, 75-F1 (1992)

The Spatial Distribution of Gamma-Ray Bursts from *Pioneer Venus Orbiter*. *K. W. Chuang, R. S. White, R. W. Klebesadel, & J. G. Laros.* 391, 242, 89-A4 (1992)

Presupernova Evolution in Massive Interacting Binaries. *Ph. Podsiadlowski, P. C. Joss, & J. J. L. Hsu.* 391, 246, 89-A10 (1992)

The Nonexponential Evolution of Pulsar Magnetic Fields. *Shigeto Wakatsuki, Atsushi Hikita, Naohiro Sato, & Naoki Itoh.* 392, 628, 110-A10 (1992)

Multiplicity-corrected Mass Function of Main-Sequence Stars in the Solar Neighborhood. *Sarbani Basu & N. C. Rana.* 393, 373, 118-F10 (1992)

Spectroscopic Binaries in the α Persei Cluster. *Nidia Morrell & Helmut A. Abt.* 393, 666, 124-B1 (1992)

Statistics of Gamma-Ray Bursts: Homogeneous Spherical Models. *Ira Wasserman.* 394, 565, 136-D2 (1992)

Multiplicity among M Dwarfs. *Debra A. Fischer & Geoffrey W. Marcy.* 396, 178, 157-C13 (1992)

The Center of Gravity and Density Profile of 47 Tucanae. *D. Calzetti, G. De Marchi, F. Paresce, & M. Shara.* 402, L1, 6-B1 (1993)

Luminosity Functions for Very Low Mass Stars and Brown Dwarfs. *Gregory Laughlin & Peter Bodenheimer.* 403, 303, 17-E13 (1993)

Can We Observe Accreting, Isolated Neutron Stars? *Omer Blaes & Piero Madau.* 403, 690, 24-C8 (1993)

The Detectability of Brown Dwarfs: Predictions and Uncertainties. *L. Nelson, S. Rappaport, & P. C. Joss.* 404, 723, 38-A1 (1993)

Star Counts Redivivus. I. A New Look at the Galaxy at Faint Magnitudes. *Neill Reid & S. R. Majewski.* 409, 635, 106-G12 (1993)

Reddening Errors and the Post–Main-Sequence Distribution of Stars in the H-R Diagram of the Large Magellanic Cloud. *N. Rathnasree.* 410, L99, 126-B5 (1993)

Inhomogeneous Chemical Evolution of the Galactic Disk. *Guy Malinie, Dieter H. Hartmann, Donald D. Clayton, & Grant J. Mathews.* 413, 633, 164-D1 (1993)

Star Counts from the *Hubble Space Telescope* Snapshot Survey. I. Galactic Models. *A. Gould, J. N. Bahcall, & D. Maoz.* 88, 53, 40-G5 (1993)

Examining Galactic and Extragalactic Gamma-Ray Burst Models Using the Peak Flux Distribution. *Lori M. Lubin & Ralph A. M. J. Wijers.* 418, L9, 238-B6 (1993)

The Formation of Binary and Single Nuclei of Planetary Nebulae. *L. R. Yungelson, A. V. Tutukov, & M. Livio.* 418, 794, 242-D8 (1993)

Are the Observed Frequencies of Double Degenerates and SN Ia Contradictory? *L. R. Yungelson, M. Livio, A. V. Tutukov, & R. A. Saffer.* 420, 336, 5-A13 (1994)

Do Gamma-Ray Bursts Originate from an Extended Galactic Halo of High-Velocity Neutron Stars? *Dieter H. Hartmann, Lawrence E. Brown, Lih-Sin The, Eric V. Linder, Vahe Petrosian, George R. Blumenthal, & Kevin C. Hurley.* 90, 893, 14-G10 (1994)

Chemical Evolution of the Solar Neighborhood with Yields Dependent on Metallicity. *Leticia Carigi.* 424, 181, 64-B12 (1994)

A Coronagraphic Search for Brown Dwarfs around Nearby Stars. *T. Nakajima, S. T. Durrance, D. A. Golimowski, & S. R. Kulkarni.* 428, 797, 140-B11 (1994)

The Galactic Supernova Rate. *G. A. Tammann, W. Löffler, & A. Schröder.* 92, 487, 38-C12 (1994)

Cataclysmic Binaries in Star Clusters. I. A Search for Erupting Dwarf Novae in the Globular Cluster M92. *Michael M. Shara, Louis E. Bergeron, & Anthony F. J. Moffat.* 429, 767, 155-C1 (1994)

Color-Magnitude Diagram Distribution of the Bulge Red Clump Stars: Evidence for the Galactic Bar. *K. Z. Stanek, M. Mateo, A. Udalski, M. Szymański, J. Kałużny, & M. Kubiak.* 429, L73, 158-B9 (1994)

A CCD Survey for Faint High-Latitude Carbon Stars. *Paul J. Green, Bruce Margon, Scott F. Anderson, & Kem H. Cook.* 434, 319, 229-G6 (1994)

The Nonexponential Evolution of Pulsar Magnetic Fields. II. Velocity–Magnetic Field Correlation. *Naoki Itoh & Kentaro Hiraki.* 435, 784, 256-G8 (1994)

On the Massive Star–forming Capacity of Molecular Clouds. *José Franco, Steven N. Shore, & Guillermo Tenorio-Tagle.* 436, 795, 276-E6 (1994)

The Axial Ratio of the Galactic Stellar Halo. *Jeffrey A. Larsen & Roberta M. Humphreys.* 436, L149, 281-D13 (1994)

A Search for T Tauri Stars in High-Latitude Molecular Clouds. II. The *IRAS* Faint Source Survey Catalog. *Loris Magnani, Jean-Pierre Caillault, Ari Buchalter, & C. A. Beichman.* 96, 159, 3-F3 (1995)

Four New Millisecond Pulsars in the Galactic Disk. *D. R. Lorimer, L. Nicastro, A. G. Lyne, M. Bailes, R. N. Manchester, S. Johnston, J. F. Bell, N. D'Amico, & P. A. Harrison.* 439, 933, 37-D13 (1995)

High-Mass X-Ray Binary Populations. I. Galactic Modeling. *William W. Dalton & Craig L. Sarazin.* 440, 280, 45-A11 (1995)

Star Counts from the *HST* Snapshot Survey. II. Wide Binaries. *Andrew Gould, John N. Bahcall, Dan Maoz, & Brian Yanny.* 441, 200, 62-B4 (1995)

Magnitude Offset between Lensed Stars and Observed Stars: A New Probe of the Structure of the Galactic Bar. *K. Z. Stanek.* 441, L29, 66-G3 (1995)

Much Ado about Nothing: Several Large-Area Surveys for Radio Pulsars from Arecibo. *Paul S. Ray, W. T. S. Deich, S. R. Kulkarni, Thomas A. Prince, S. E. Thorsett, Gautam Vasisht, A. Wolszczan, Donald C. Backer, John H. Holliman II, & John Middleditch.* 443, 265, 98-G8 (1995)

On Population III Stars as Gravitational Microlensing Objects in the Galactic Halo. *Masayuki Y. Fujimoto, Kiyoshi Sugiyama, Icko Iben, Jr., & David Hollowell.* 444, 175, 115-F13 (1995)

The Relativistic ISM in M33: Role of the Supernova Remnants. *N. Duric, S. M. Gordon, W. M. Goss, F. Viallefond, & C. Lacey.* 445, 173, 134-G8 (1995)

The Mass Ratios of Cepheid Binaries. *Nancy Remage Evans.* 445, 393, 138-A1 (1995)

Studies of Hot B Subdwarfs. X. The Distribution and Space Density of Hot, Hydrogen-rich Subdwarfs Determined from the Palomar-Green Survey. *B. Villeneuve, F. Wesemael, G. Fontaine, C. Carignan, & R. F. Green.* 446, 646, 165-A13 (1995)

A Model for the Galactic Population of Symbiotic Stars with White Dwarf Accretors. *L. Yungelson, M. Livio, A. Tutukov, & S. J. Kenyon.* 447, 656, 185-B10 (1995)

Binary Models for the Solar Neighborhood and Magellanic Cloud W-R Populations. *William W. Dalton & Craig L. Sarazin.* 448, 369, 197-C6 (1995)

Gamma-Ray Pulsars: Beaming Evolution, Statistics, and Unidentified EGRET Sources. *I.-A. Yadigaroglu & Roger W. Romani.* 449, 211, 213-B1 (1995)

A Model for the Space Density of Dwarf Carbon Stars. *Martijn de Kool & Paul J. Green.* 449, 236, 213-D10 (1995)

Studies of Hot B Subdwarfs. XI. A Redetermination of the Density of Hot, Hydrogen-rich Subdwarfs in the Galactic Plane. *B. Villeneuve, F. Wesemael, & G. Fontaine.* 450, 851, 242-F7 (1995)

A Model of the Galactic X-Ray Binary Population. I. High-Mass X-Ray Binaries. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 100, 217, 49-B1 (1995)

A Model of the Galactic X-Ray Binary Population. II. Low-Mass X-Ray Binaries in the Galactic Disk. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 100, 233, 49-C5 (1995)

Are Galaxies Optically Thin to Their Own Lyman-Continuum Radiation? I. M33. *Kanan Patel & Christine D. Wilson.* 451, 607, 255-E11 (1995)

Are the Nearby and Photometric Stellar Luminosity Functions Different? *Pavel Kroupa.* 453, 350, 286-A2 (1995)

The Nonexponential Evolution of Pulsar Magnetic Fields. III. Comparison with the New Velocity Measurement. *Naoki Itoh, Takemi Kotouda, & Kentaro Hiraki.* 455, 244, 321-D13 (1995)

Spectroscopic Identification of Probable Cataclysmic Variables in the Globular Cluster NGC 6397. *J. E. Grindlay, A. M. Cool, P. J. Callanan, C. D. Bailyn, H. N. Cohn, & P. M. Lugger.* 455, L47, 325-B1 (1995)

STARS: STELLAR DYNAMICS

Hamiltonian Dynamics of Self-gravitating Ellipsoids. *G. Rosensteel & Huy Q. Tran.* 366, 30, 1-D9 (1991)

Multicomponent Models for the Dynamic Evolution of Globular Clusters. *Hyung Mok Lee, Gregory G. Fahlman, & Harvey B. Richer.* 366, 455, 8-E1 (1991)

On the Orbital Period Change of the Binary Pulsar PSR 1913+16. *Thibault Damour & J. H. Taylor.* 366, 501, 9-C1 (1991)

Spectroscopic Binaries in the Orion Nebula Cluster. *Helmut A. Abt, Ruyou Wang, & Octavio Cardona.* 367, 155, 14-A1 (1991)

The Galactic Disk Surface Mass Density and the Galactic Force K_z at $z = 1.1$ Kiloparsecs. *Konrad Kuijken & Gerard Gilmore.* 367, L9, 17-C1 (1991)

Zero Central Density Solutions of the Anisotropic Jeans Equation and Neutrino Dark Matter. *Jes Madsen.* 367, 507, 19-F1 (1991)

A Search for Instability in Two Families of Spherical Stellar Models. *Martin D. Weinberg.* 368, 66, 24-A1 (1991)

Extended Stellar Hydrodynamics for Galactic Disks. *Peter Amendt & Phil Cuddeford.* 368, 79, 24-B1 (1991)

The Ring Instability in Radially Cold Oblate Galaxy Models. *Tim de Zeeuw & Martin Schwarzschild.* 369, 57, 36-F7 (1991)

A Stability Criterion for Any Collisionless Stellar Equilibrium and Some Concrete Applications Thereof. *Henry E. Kandrup.* 370, 312, 51-B6 (1991)

Fokker-Planck Calculations of Star Clusters with Primordial Binaries. *Bin Gao, Jeremy Goodman, Haldan Cohn, & Brian Murphy.* 370, 567, 55-E1 (1991)

Gravity in One Dimension: A Correction for Ensemble Averaging. *Charles J. Reidl, Jr., & Bruce N. Miller.* 371, 260, 63-D1 (1991)

Angular Momentum and Stripping in Tidal Interactions. *Thomas A. McGlynn & Kirk D. Borne.* 372, 31, 74-D7 (1991)

Star Cluster Evolution with Primordial Binaries. II. Detailed Analysis. *Steve McMillan, Piet Hut, & Junichiro Makino.* 372, 111, 75-D5 (1991)

Further Limits on Disklike Dark Matter from K Dwarf Kinematics. *Konrad Kuijken.* 372, 125, 75-E7 (1991)

The Stability of Cold, Flattened, Self-gravitating Disks Obeying Other than Newtonian Force Laws. *Dimitris M. Christodoulou.* 372, 471, 81-F1 (1991)

Vertical Oscillation of the Galactic Disk. *Martin D. Weinberg.* 373, 391, 92-G7 (1991)

Orbital Decay in Aspherical Galaxies. II. Triaxial Systems. *Thomas S. Statler.* 375, 544, 119-E1 (1991)

What Damps Small Perturbations in Stellar Systems? *Eyal Maoz.* 375, 687, 121-C1 (1991)

Stability of Nonrotating Stellar Systems. II. Prolate Shell-Orbit Models. *David Merritt & Lars Hernquist.* 376, 439, 131-G13 (1991)

Modes of Oscillation of a Uniformly Rotating, Homogeneous Spheroid of Stars. *Peter O. Vandervoort.* 377, 49, 138-F1 (1991)

Collisions of Giant Stars with Compact Objects: Hydrodynamical Calculations. *Frederic A. Rasio & Stuart L. Shapiro.* 377, 559, 146-F1 (1991)

Hydrodynamics of Collisions between Binary Stars. *Jeremy Goodman & Lars Hernquist.* 378, 637, 160-C11 (1991)

Absolute Magnitudes and Kinematic Properties of Cepheids. *Teresa D. Wilson, Thomas G. Barnes III, Suzanne L. Hawley, & William H. Jefferys.* 378, 708, 161-B11 (1991)

Population Studies. X. Constraints on the Mass and Extent of the Galaxy's Dark Corona. *John E. Norris & M. R. S. Hawkins.* 380, 104, 177-C11 (1991)

The Secular Instability of Axisymmetric Collisionless Star Clusters. *Henry E. Kandrup.* 380, 511, 184-E9 (1991)

The Statistics of Slow Interstellar Accretion onto Neutron Stars. *O. Blaes & M. Rajagopal.* 381, 210, 191-E10 (1991)

Stellar Encounters Involving Red Giants in Globular Cluster Cores. *M. B. Davies, W. Benz, & J. G. Hills.* 381, 449, 196-C7 (1991)

The Ordered Nature of Elliptical Galaxies: Implications for Their Intrinsic Angular Momenta and Shapes. *Marijn Franx, Garth Illingworth, & Tim de Zeeuw.* 383, 112, 213-D7 (1991)

On Core Collapse. *Junichiro Makino & Piet Hut.* 383, 181, 214-C9 (1991)

The Formation of Primordial Binaries in Globular Clusters by Star-Disk Interactions. *Stephen D. Murray, C. J. Clarke, & J. E. Pringle.* 383, 192, 214-D7 (1991)

On the Effects of Interstellar Gas on the Oscillations and the Stability of Galaxies. *Peter O. Vandervoort.* 383, 498, 220-E1 (1991)

Two High-Velocity Stars Shot Out from the Core of the Globular Cluster 47 Tucanae. *G. Meylan, P. Dubath, & M. Mayor.* 383, 587, 221-E4 (1991)

STARS: STELLAR STATISTICS

Star Formation in Taurus-Auriga: The High-Mass Stars. *Frederick M. Walter & William T. Boyd.* 370, 318, 51-C1 (1991)

On the Explosion in a Common Envelope Scenario for Type Ia Supernovae. *James H. Applegate.* 370, 324, 51-C9 (1991)

Further Limits on Disklike Dark Matter from K Dwarf Kinematics. *Konrad Kuijken.* 372, 125, 75-E7 (1991)

The Structure and Evolution of Rich Star Clusters in the Large Magellanic Cloud. *Rebecca A. W. Elson.* 76, 185, 26-E9 (1991)

Gravitational Microlensing of High-Redshift Supernovae by Compact Objects. *Kevin P. Rauch.* 374, 83, 99-A11 (1991)

Limits on the Space Density of Double Degenerates as Type Ia Supernova Progenitors. *Diana Foss, Richard A. Wade, & Richard F. Green.* 374, 281, 101-E9 (1991)

Detection of a Galactic Color Gradient for Blue Horizontal-Branch Stars of the Halo Field and Implications for the Halo Age and Density Distributions. *George W. Preston, Stephen A. Shectman, & Timothy C. Beers.* 375, 121, 112-E1 (1991)

On the Formation of Globular Clusters. I. Dynamical Limits on Globular Cluster Metallicities. *J. H. Brown, A. Burkert, & James W. Truran.* 376, 115, 126-D1 (1991)

The White Dwarf Mass Distribution in Classical Nova Systems. *Hans Ritter, Michael Politano, Mario Livio, & Ronald F. Webbink.* 376, 177, 127-B10 (1991)

Metallicity and Velocity Distribution of Giants toward the Galactic Poles. *Kavan U. Ratnatunga & Kenneth M. Yoss.* 377, 442, 145-C3 (1991)

Cataclysmic and Close Binaries in Star Clusters. III. Recovery of the Quiescent Nova 1860 A.D. (T Scorpii) in the Core of the Globular Cluster M80. *Michael M. Shara & Laurent Drissen.* 448, 203, 195-A1 (1995)

First Results from the Goddard High-Resolution Spectrograph: Evidence for Photospheric Microturbulence in Early O Stars: Are Surface Gravities Systematically Underestimated? *I. Hubeny, S. R. Heap, & B. Altner.* 377, L33, 143-D11 (1991)

Sodium Abundance Variations in Metal-poor Dwarfs. *William J. Spiesman.* 397, L103, 181-D1 (1992)

The Primordial Lithium Abundance from Extreme Subdwarfs: New Observations. *J. A. Thorburn.* 421, 318, 19-G12 (1994)

Lithium Abundances in the Most Metal-deficient Stars. *John E. Norris, Sean G. Ryan, & Guy S. Stringfellow.* 423, 386, 51-A1 (1994)

Lithium Isotope Ratios in Six Halo Stars. *L. M. Hobbs & J. A. Thorburn.* 428, L25, 134-D8 (1994)

Atmospheric Parameters of Field Subdwarf B Stars. *Rex A. Saffer, P. Bergeron, D. Koester, & James Liebert.* 432, 351, 197-E1 (1994)

Analysis of Helium-rich Subdwarf O Stars. I. NLTE Models, Methods, and Fits for 21 Palomar Green Survey sdO's. *P. Thejll, F. Bauer, R. Saffer, J. Liebert, D. Kunze, & H. L. Shipman.* 433, 819, 221-C12 (1994)

Model Atmospheres for M (Sub)Dwarf Stars. I. The Base Model Grid. *France Allard & Peter H. Hauschildt.* 445, 433, 138-E2 (1995)

UV Spectrophotometry of the Hottest Stars from the Southern HK Survey. *John S. Drilling & Timothy C. Beers.* 446, L27, 160-E7 (1995)

Studies of Hot B Subdwarfs. X. The Distribution and Space Density of Hot, Hydrogen-rich Subdwarfs Determined from the Palomar-Green Survey. *B. Villeneuve, F. Wesemael, G. Fontaine, C. Carignan, & R. F. Green.* 446, 646, 165-A13 (1995)

Studies of Hot B Subdwarfs. XI. A Redetermination of the Density of Hot, Hydrogen-rich Subdwarfs in the Galactic Plane. *B. Villeneuve, F. Wesemael, & G. Fontaine.* 450, 851, 242-F7 (1995)

Evidence of Higher Primordial Lithium from Keck Observations of M92. *Constantine P. Deliyannis, Ann Merchant Boesgaard, & Jeremy R. King.* 452, L13, 269-D10 (1995)

STARS: SUPERGIANTS

Nonthermal X-Ray Emission from Winds of OB Supergiants. *Wan Chen & Richard L. White.* 366, 512, 9-D1 (1991)

Continuum Polarization by Electron Scattering in Rotationally Distorted, Radiation-driven Stellar Winds: B[e] Supergiants. *Cameron J. Boyd & J. M. Marlborough.* 369, 191, 38-C11 (1991)

Multicolor CCD Imaging of Supergiants in the Disk of NGC 253. *T. J. Davidge, O. Le Fèvre, & C. C. Clark.* 370, 559, 55-D7 (1991)

A Windswept Cometary Tail on the Galactic Center Supergiant IRS 7. *F. Yusef-Zadeh & Mark Morris.* 371, L59, 73-B10 (1991)

Blue Loops during Core Helium Burning as the Consequence of Moderate Convective Envelope Overshooting in Stars of Intermediate to High Mass. *Richard B. Stothers & Chao-wen Chin.* 374, 288, 101-F3 (1991)

Hydrodynamic Pulsation Models of Yellow Supergiant Stars in the Post-Asymptotic Giant Branch. *Toshiki Aikawa.* 374, 700, 107-F13 (1991)

UBV Photometry of OB$^+$ Stars in the Southern Milky Way. *J. S. Drilling.* 76, 1033, 39-C11 (1991)

A Gaseous Tail Ablated from the Supergiant IRS 7 near the Galactic Center. *E. Serabyn, J. H. Lacy, & J. M. Achtermann.* 378, 557, 159-C9 (1991)

LMC-2 as the Blowout of a Hot Superbubble. *Qingde Wang & David J. Helfand.* 379, 327, 167-B5 (1991)

On the Sodium Excess in the Atmospheres of Yellow Supergiants. *N. Prantzos, A. Coc, & J. P. Thibaud.* 379, 729, 173-G1 (1991)

High-Mass Stars with Degenerate Neutron Cores. *Garrett T. Biehle.* 380, 167, 178-B9 (1991)

Cocoon Stars in the Large Magellanic Cloud. *Neill Reid.* 382, 143, 202-A4 (1991)

First Ultraviolet Spectropolarimetry of Hot Supergiants. *M. Taylor, A. D. Code, K. H. Nordsieck, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, R. E. Schulte-Ladbeck, & B. A. Whitney.* 382, L85, 211-D5 (1991)

The Bow Shock Structure of IRS 7: Wind-Wind Collision near the Galactic Center. *Farhad Yusef-Zadeh & Fulvio Melia.* 385, L41, 23-B13 (1992)

Carbon, Nitrogen, and Oxygen Abundances in Early B-Type Stars. *Douglas R. Gies & David L. Lambert.* 387, 673, 47-B1 (1992)

The Chemical Composition of Magellanic Cloud Cepheids and Nonvariable Supergiants. *R. Earle Luck & David L. Lambert.* 79, 303, 18-E3 (1992)

Discovery of Bipolar OH Maser Emission from the High-Latitude Supergiant Star HD 101584. *P. te Lintel Hekkert, J. M. Chapman, & A. A. Zijlstra.* 390, L23, 78-D9 (1992)

An Absolute Calibration of Type Ia Supernovae and the Value of H_0. *Michael J. Pierce, Michael E. Ressler, & Mark S. Shure.* 390, L45, 84-D1 (1992)

Hα Observations of Early-Type Stars. *S. Scuderi, G. Bonanno, R. Di Benedetto, D. Spadaro, & N. Panagia.* 392, 201, 103-D7 (1992)

The Nature of Dust around the Post–Asymptotic Giant Branch Objects HD 161796 and HD 179821. *K. Justtanont, M. J. Barlow, C. J. Skinner, & A. G. G. M. Tielens.* 392, L75, 113-D8 (1992)

The Discovery of an Extremely Low Amplitude Cepheid? *R. Paul Butler.* 394, L25, 133-D5 (1992)

OH/IR Stars in the Magellanic Clouds. *P. R. Wood, J. B. Whiteoak, S. M. G. Hughes, M. S. Bessell, F. F. Gardner, & A. R. Hyland.* 397, 552, 177-G5 (1992)

Polarization and the Envelopes of B[e] Supergiants in the Magellanic Clouds. *A. M. Magalhães.* 398, 286, 185-C11 (1992)

The Young Large Magellanic Cloud Cluster NGC 2214 with a Single Supergiant Branch. *Myung Gyoon Lee.* 399, L133, 208-B1 (1992)

Absorption-Line Profiles in a Companion Spectrum of a Mass-losing Cool Supergiant. *Liliya L. Rodrigues & Erika Böhm-Vitense.* 401, 695, 231-B10 (1992)

CCD Observations of the Hα Line in Late G and K Supergiants and Their Interpretation. *Sushma V. Mallik.* 402, 303, 4-G10 (1993)

Stellar Models and the Brightening of P Cygni. *Mounib F. El Eid & Dieter H. Hartmann.* 404, 271, 31-C5 (1993)

Evidence for Processed Material in the Atmospheres of Large Magellanic Cloud B Supergiants. *Edward L. Fitzpatrick & Bruce Bohannan.* 404, 734, 38-B1 (1993)

The Asymmetric Wind of R127. *R. E. Schulte-Ladbeck, C. Leitherer, G. C. Clayton, C. Robert, M. R. Meade, L. Drissen, A. Nota, & W. Schmutz.* 407, 723, 79-E1 (1993)

A New Luminous Blue Variable: R143 in 30 Doradus. *Joel Wm. Parker, Geoffrey C. Clayton, Cláudia Winge, & Peter S. Conti.* 409, 770, 108-F3 (1993)

Reddening Errors and the Post–Main-Sequence Distribution of Stars in the H-R Diagram of the Large Magellanic Cloud. *N. Rathnasree.* 410, L99, 126-B5 (1993)

Detection of O I and Si II Far-Infrared Fine-Structure Emission from α Orionis. *Michael R. Haas & Alfred E. Glassgold.* 410, L111, 126-C9 (1993)

IRC +10420: A Cool Hypergiant near the Top of the H-R Diagram. *Terry Jay Jones, Roberta M. Humphreys, Robert D. Gehrz, Geoffrey F. Lawrence, Franz-Josef Zickgraf, Harvey Moseley, Sean Casey, William J. Glaccum, Carol J. Koch, Robert Pina, Barbara Jones, Kim Venn, Otmar Stahl, & Sumner G. Starrfield.* 411, 323, 131-C6 (1993)

He 3-519: A Peculiar Post-LBV, Pre-WN Star? *Kris Davidson, Roberta M. Humphreys, Arsen Hajian, & Yervant Terzian.* 411, 336, 131-D9 (1993)

Interacting Massive Binaries, H-R Diagram of the Large Magellanic Cloud and SN 1987A. *N. Rathnasree.* 411, 848, 140-D1 (1993)

Iron and Molecular Opacities and the Evolution of Population I Stars. *Richard B. Stothers & Chao-wen Chin.* 412, 294, 145-F13 (1993)

A $UBV\beta$ Data Base for Stephenson-Sanduleak Southern Luminous Stars. *B. Cameron Reed.* 87, 367, 31-F13 (1993)

CNO Abundances and the Evolutionary Status of Three A-Type Supergiants. *Kim A. Venn.* 414, 316, 174-A1 (1993)

A Catalog of Blue and Red Supergiants in M33. *Georgi R. Ivanov, Wendy L. Freedman, & Barry F. Madore.* 89, 85, 50-A9 (1993)

Observational Prospects for Massive Stars with Degenerate Neutron Cores. *Garrett T. Biehle.* 420, 364, 5-D6 (1994)

A New Way to Make Thorne-Żytkow Objects. *Peter J. T. Leonard, Jack G. Hills, & Rachel J. Dewey.* 423, L19, 53-C13 (1994)

Postexplosion Hydrodynamics of Supernovae in Red Supergiants. *Marc Herant & S. E. Woosley.* 425, 814, 91-G12 (1994)

Geometry and Physical Conditions in the Stellar Wind of AG Carinae. *Claus Leitherer, Richard Allen, Bruce Altner, Augusto Damineli, Laurent Drissen, Thais Idiart, Olivia Lupie, Antonella Nota, Carmelle Robert, Werner Schmutz, & Steven N. Shore.* 428, 292, 131-G4 (1994)

GHRS Observations of Cool, Low-Gravity Stars. I. The Far-Ultraviolet Spectrum of α Orionis (M2 Iab). *Kenneth G. Carpenter, Richard D. Robinson, Glenn M. Wahlgren, Jeffrey L. Linsky, & Alexander Brown.* 428, 329, 132-C6 (1994)

The Radio Source around η Carinae. *S. M. White, R. A. Duncan, J. Lim, G. J. Nelson, S. A. Drake, & M. R. Kundu.* 429, 380, 148-G1 (1994)

The Axisymmetric Stellar Wind of AG Carinae. *Regina E. Schulte-Ladbeck, Geoffrey C. Clayton, D. John Hillier, Tim J. Harries, & Ian D. Howarth.* 429, 846, 156-B13 (1994)

The Galactic Open Cluster NGC 7419 and Its Five Red Supergiants. *Alain Beauchamp, Anthony F. J. Moffat, & Laurent Drissen.* 93, 187, 44-D3 (1994)

G25.5+0.2: A Ring Nebula around a Luminous Blue Star. *E. E. Becklin, B. Zuckerman, I. S. McLean, & T. R. Geballe.* 430, 774, 171-E1 (1994)

Galactic Stars Applied to Tests of the Criterion for Convection and Semiconvection in an Inhomgeneous Star. *Richard B. Stothers & Chao-wen Chin.* 431, 797, 188-E6 (1994)

On the Formation and Evolution of Super–Asymptotic Giant Branch Stars with Cores Processed by Carbon Burning. I. Spica to Antares. *Enrique García-Berro & Icko Iben, Jr.* 434, 306, 229-F4 (1994)

Optical Spectroscopy of Carbon-rich Proto–Planetary Nebulae. *Bruce J. Hrivnak.* 438, 341, 6-B10 (1995)

Tests of Two Convection Theories for Red Giant and Red Supergiant Envelopes. *Richard B. Stothers & Chao-wen Chin.* 440, 297, 45-C3 (1995)

Intense Radio Outburst from the Supermassive Star η Carinae. *R. A. Duncan, S. M. White, J. Lim, G. J. Nelson, S. A. Drake, & M. R. Kundu.* 441, L73, 76-A6 (1995)

Mg II *h* and *k* Profiles in High-Luminosity, Late-Type Stars. *R. D. Robinson & K. G. Carpenter.* 442, 328, 81-E12 (1995)

On the Origin of "Dividing Lines" for Late-Type Giants and Supergiants. *R. Rosner, Z. E. Musielak, F. Cattaneo, R. L. Moore, & S. T. Suess.* 442, L25, 84-G11 (1995)

A Spectroscopic Database for Stephenson-Sanduleak Southern Luminous Stars. *B. Cameron Reed & Amy E. Beatty.* 97, 189, 13-D8 (1995)

The Visual and Ultraviolet Polarimetric Data of α Camelopardalis and κ Cassiopeia: Evidence of Shocked Regions. *Geoffrey K. Fox, John C. Brown, & Karen S. Bjorkman.* 447, 889, 188-B8 (1995)

A Circumstellar H_2O Maser Associated with the Circumnuclear Molecular Disk at the Galactic Center? *Deborah A. Levine, Donald F. Figer, Mark Morris, & Ian S. McLean.* 447, L101, 190-G7 (1995)

CNO Abundances and the Evolutionary Status of Galactic, A-Type Supergiants. *Kim A. Venn.* 449, 839, 224-C11 (1995)

Atmospheric Parameters and LTE Abundances for 22 Galactic, A-Type Supergiants. *Kim A. Venn.* 99, 659, 44-A6 (1995)

Discovery of an Extended Nebula around AFGL 2343 (HD 179821) at 10 Microns. *G. W. Hawkins, C. J. Skinner, M. M. Meixner, J. G. Jernigan, J. F. Arens, E. Keto, & J. R. Graham.* 452, 314, 266-D10 (1995)

The Massive Post–Red Supergiants IRC +10420 and HD 179821. *Joel H. Kastner & David A. Weintraub.* 452, 833, 276-B7 (1995)

Terminal Velocities and the Bistability of Stellar Winds. *Henny J. G. L. M. Lamers, Theodore P. Snow, & Douglas M. Lindholm.* 455, 269, 321-G7 (1995)

Stellar Abundances and Winds of A-Type Supergiant Stars in M33: First Results from the Keck HIRES Spectrograph. *James K. McCarthy, Daniel J. Lennon, Kim A. Venn, Rolf-Peter Kudritzki, Joachim Puls, & Francisco Najarro.* 455, L135, 333-G11 (1995)

STARS: SUPERNOVAE

On the [O/Fe] versus [Fe/H] Relationship and the Progenitors of Type I Supernovae. *C. Abia, R. Canal, & J. Isern.* 366, 198, 3-E1 (1991)

Using SN 1987A Light Echoes to Determine Mass Loss from the Progenitor. *Arlin P. S. Crotts & William E. Kunkel.* 366, L73, 11-D1 (1991)

Measurements of the Diameter of the Supernova SN 1987A. *M. Karovska, P. Nisenson, C. Standley, & S. R. Heathcote.* 367, L15, 17-C8 (1991)

Instabilities and Clumping in SN 1987A. I. Early Evolution in Two Dimensions. *Bruce Fryxell, Ewald Müller, & David Arnett.* 367, 619, 21-A5 (1991)

Zero Point of the Supernova Hubble Diagram. *M. Fukugita & C. J. Hogan.* 368, L11, 28-C1 (1991)

The Dynamic Instability of Adiabatic Blast Waves. *Dongsu Ryu & Ethan T. Vishniac.* 368, 411, 30-B12 (1991)

Gamma-Ray Lines from Type I Supernovae. *K. W. Chan & R. E. Lingenfelter.* 368, 515, 31-E1 (1991)

Rayleigh-Taylor Instabilities and Mixing in the Helium Star Models for Type Ib/Ic Supernovae. *Izumi Hachisu, Takuya Matsuda, Ken'ichi Nomoto, & Toshikazu Shigeyama.* 368, L27, 35-B4 (1991)

^{57}Co and ^{44}Ti Production in SN 1987A. *S. E. Woosley & Robert D. Hoffman.* 368, L31, 35-B10 (1991)

Evolution of the Interstellar Medium in Elliptical Galaxies. II. X-Ray Properties. *L. P. David, W. Forman, & C. Jones.* 369, 121, 37-D9 (1991)

First Results from the Faint Object Camera: SN 1987A. *P. Jakobsen, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, W. B. Sparks, R. P. Kirshner, & N. Panagia.* 369, L63, 46-B1 (1991)

Numerical Simulations of Off-Center Detonations in Helium Shells. *Eli Livne & Ami S. Glasner.* 370, 272, 50-E12 (1991)

On the Explosion in a Common Envelope Scenario for Type Ia Supernovae. *James H. Applegate.* 370, 324, 51-C9 (1991)

A Large Supershell H II Region Complex in the Large Magellanic Cloud and the Interstellar Environment of SN 1987A. *Frederick C. Bruhweiler, Michelle A. Fitzurka, & Theodore R. Gull.* 370, 551, 55-C9 (1991)

Helium Star Cataclysmics. *Icko Iben, Jr., & Alexander V. Tutukov.* 370, 615, 56-B5 (1991)

Shock Waves and Nucleosynthesis in Type II Supernovae. *M. B. Aufderheide, E. Baron, & F.-K. Thielemann.* 370, 630, 56-C8 (1991)

Hydrodynamical Instabilities and Mixing in SN 1987A: Two-dimensional Simulations of the First 3 Months. *Marc Herant & Willy Benz.* 370, L81, 59-D6 (1991)

He Stars and He-accreting CO White Dwarfs. *Marco Limongi & Amedeo Tornambè.* 371, 317, 64-A9 (1991)

Premaximum Observations of the Type Ia SN 1990N. *Bruno Leibundgut, Robert P. Kirshner, Alexei V. Filippenko, Joseph C. Shields, Craig B. Foltz, Mark M. Phillips, & George Sonneborn.* 371, L23, 66-D1 (1991)

The Young Supernova Remnants N132D and 1E 0102.2−7219: Limits on the Presence of Rapidly Moving Sulfur. *Barry M. Lasker & David A. Golimowski.* 371, 568, 68-E8 (1991)

The Shock Process and Light-Element Production in Supernova Envelopes. *Lawrence E. Brown, David S. Dearborn, David N. Schramm, Jon T. Larsen, & Shin Kurokawa.* 371, 648, 69-F1 (1991)

s-Process Nucleosynthesis in Massive Stars and the Weak Component. II. Carbon Burning and Galactic Enrichment. *C. M. Raiteri, M. Busso, R. Gallino, & G. Picchio.* 371, 665, 69-G6 (1991)

Aberration and Advection Effects in Expanding Spherically Symmetric Shells. *A. Peraiah.* 371, 673, 70-A1 (1991)

Nuclear Reaction Rates in Dense Carbon-Oxygen Mixtures. *Shuji Ogata, Hiroshi Iyetomi, & Setsuo Ichimaru.* 372, 259, 77-B9 (1991)

Spectra of Two Very Old Supernovae: SN 1986J and SN 1980K. *Bruno Leibundgut, Robert P. Kirshner, Philip A. Pinto, Michael P. Rupen, R. Chris Smith, James E. Gunn, & Donald P. Schneider.* 372, 531, 82-D1 (1991)

The Outcome of Explosive Ignition of ONeMg Cores: Supernovae, Neutron Stars, or "Iron" White Dwarfs? *Jordi Isern, Ramon Canal, & Javier Labay.* 372, L83, 85-D9 (1991)

A New Site for the Astrophysical Gamma-Process. *W. Michael Howard, Bradley S. Meyer, & S. E. Woosley.* 373, L5, 91-B1 (1991)

Hot Gas Metallicity and the History of Supernova Activity in Elliptical Galaxies. *Michael Loewenstein & William G. Mathews.* 373, 445, 93-D11 (1991)

Ionization by High-Energy Particles and the Electron Scattering Opacity in Supernovae. *Douglas A. Swartz.* 373, 604, 95-D11 (1991)

Gravitational Microlensing of High-Redshift Supernovae by Compact Objects. *Kevin P. Rauch.* 374, 83, 99-A11 (1991)

Model Light Curves of Linear Type II Supernovae. *Douglas A. Swartz, J. Craig Wheeler, & Robert P. Harkness.* 374, 266, 101-D7 (1991)

Limits on the Space Density of Double Degenerates as Type Ia Supernova Progenitors. *Diana Foss, Richard A. Wade, & Richard F. Green.* 374, 281, 101-E9 (1991)

Expansion of a Superbubble in a Uniform Magnetic Field. *Katia M. Ferrière, Mordecai-Mark Mac Low, & Ellen G. Zweibel.* 375, 239, 114-A4 (1991)

Analysis of SN 1987A Polarimetry. *David J. Jeffery.* 375, 264, 114-C5 (1991)

Steady Spherical Hypercritical Accretion onto Neutron Stars. *John C. Houck & Roger A. Chevalier.* 376, 234, 127-G6 (1991)

Winds, Outflows, and Inflows in X-Ray Elliptical Galaxies. I. *Luca Ciotti, Annibale D'Ercole, Silvia Pellegrini, & Alvio Renzini.* 376, 380, 131-B12 (1991)

Neutrino-Nucleus Interactions in Core-Collapse Supernovae. *Stephen W. Bruenn & W. C. Haxton.* 376, 678, 134-G1 (1991)

High-Temperature Neutrino-Nucleus Processes in Stellar Collapse. *George M. Fuller & Bradley S. Meyer.* 376, 701, 135-A12 (1991)

Continuum Opacity Produced by Spectral Lines in Supernovae and Similar Expansions. *Robert V. Wagoner, Christopher A. Perez, & Mary Vasu.* 377, 639, 147-E12 (1991)

The Near–Maximum-Light Spectrum of the Type Ic Supernova 1987M. *David J. Jeffery, David Branch, Alexei V. Filippenko, & Ken'ichi Nomoto.* 377, L 39, 150-D10 (1991)

SN 1988A in M58: Departure from ^{56}Co Decay 700 Days after Explosion. *P. Ruiz-Lapuente, M. Kidger, G. Gómez, R. Canal, & R. López.* 378, L41, 162-E1 (1991)

SN 1991T: *Gamma-Ray Observatory*'s First Supernova? *Adam Burrows, Anurag Shankar, & Kenneth A. Van Riper.* 379, L7, 169-B1 (1991)

The Late-Time Light Curve of SN 1984L. *Douglas A. Swartz & J. Craig Wheeler.* 379, L13, 169-B7 (1991)

The Circumstellar Shell of SN 1987A. *Ding Luo & Richard McCray.* 379, 659, 172-G9 (1991)

The Radio Recovery of SN 1970G in M101. *John J. Cowan, W. M. Goss, & R. A. Sramek.* 379, L49, 175-B5 (1991)

The 10 Year Radio Light Curves for SN 1979C. *Kurt W. Weiler, Schuyler D. Van Dyk, Nino Panagia, Richard A. Sramek, & Jennifer L. Discenna.* 380, 161, 178-B1 (1991)

Effects of Aberration and Advection on Line Formation. *A. Peraiah.* 380, 212, 178-F1 (1991)

Properties of the SN 1987A Circumstellar Ring and the Distance to the Large Magellanic Cloud. *N. Panagia, R. Gilmozzi, F. Macchetto, H.-M. Adorf, & R. P. Kirshner.* 380, L23, 181-D1 (1991)

Circumstellar Emission from SN 1987A. *Peter Lundqvist & Claes Fransson.* 380, 575, 185-D1 (1991)

Infrared Hot Spots in the Nucleus of NGC 253. *Duncan A. Forbes, Martin J. Ward, & D. L. DePoy.* 380, L63, 188-C6 (1991)

Diffusion Processes in the Collapse of a Radiating Spherical Body. *R. Chan, L. Herrera, J. A. F. Pacheco, & N. O. Santos.* 382, 255, 203-D1 (1991)

Catalog of SN 1987A Polarimetry Corrected for Interstellar Polarization. *David J. Jeffery.* 77, 405, 50-B5 (1991)

Rayleigh-Taylor Instability in the Asymmetric Supernova Explosion. *Shoichi Yamada & Katsuhiko Sato.* 382, 594, 208-G12 (1991)

Nonthermal Excitation of Helium in Type Ib Supernovae. *L. B. Lucy.* 383, 308, 216-A8 (1991)

The Conversion of Two-Flavor to Three-Flavor Quark Matter in a Supernova Core. *Zigao Dai, Qiuhe Peng, & Tan Lu.* 440, 815, 54-C9 (1995)

STARS: SUPERNOVAE: GENERAL

High Rate for Type Ic Supernovae. *Richard A. Muller, Heidi Jo Marvin Newberg, Carlton R. Pennypacker, Saul Perlmutter, Timothy P. Sasseen, & Craig K. Smith.* 384, L9, 6-B7 (1992)

The Energy Sources Powering the Late-Time Bolometric Evolution of SN 1987A. *Nicholas B. Suntzeff, M. M. Phillips, J. H. Elias, D. L. DePoy, & A. R. Walker.* 384, L33, 11-B6 (1992)

The Frequencies of Supernovae in Binaries. *Alexander V. Tutukov, Lev R. Yungelson, & Icko Iben, Jr.* 386, 197, 26-E9 (1992)

Postexplosion Hydrodynamics of SN 1987A. *Marc Herant & Willy Benz.* 387, 294, 40-E9 (1992)

HEAO 3 Limits on the ^{44}Ti Yield in Galactic Supernovae. *W. A. Mahoney, J. C. Ling, W. A. Wheaton, & J. C. Higdon.* 387, 314, 40-G5 (1992)

Type II-L Supernovae—Standard Bombs. *C. Martin Gaskell.* 389, L17, 66-C6 (1992)

G203.2−12.3: A New Optical Supernova Remnant in Orion. *P. Frank Winkler & Bo Reipurth.* 389, L25, 66-D1 (1992)

Can a Closure Mass Neutrino Help Solve the Supernova Shock Reheating Problem? *George M. Fuller, R. Mayle, Bradley S. Meyer, & James R. Wilson.* 389, 517, 67-G10 (1992)

Type I Supernovae and Accretion-induced Collapses from Cataclysmic Variables? *Mario Livio & James W. Truran.* 389, 695, 70-A10 (1992)

The Luminosity of Supernovae of Type Ia. I. Apparent Magnitudes at Maximum Light. *Sidney van den Bergh & John Pazder.* 390, 34, 74-D13 (1992)

Supernova Rates and the Reddening of Wolf-Rayet Stars. *Sidney van den Bergh.* 390, 133, 75-F1 (1992)

Mixing in Ejecta of Supernovae. I. General Properties of Two-dimensional Rayleigh-Taylor Instabilities and Mixing Width in Ejecta of Supernovae. *Izumi Hachisu, Takuya Matsuda, Ken'ichi Nomoto, & Toshikazu Shigeyama.* 390, 230, 76-G7 (1992)

Detection of an Unresolved Nuclear Radio Source in M31. *Patrick C. Crane, John R. Dickel, & John J. Cowan.* 390, L9, 78-B7 (1992)

Gamma-Ray Deposition and Nonthermal Excitation in Supernovae. *Cecilia Kozma & Claes Fransson.* 390, 602, 82-G1 (1992)

An Absolute Calibration of Type Ia Supernovae and the Value of H_0. *Michael J. Pierce, Michael E. Ressler, & Mark S. Shure.* 390, L45, 84-D1 (1992)

Effect of the Explosion of Supernovae and Superbubbles on the Galactic Dynamo. *Katia Ferrière.* 391, 188, 88-C13 (1992)

Presupernova Evolution in Massive Interacting Binaries. *Ph. Podsiadlowski, P. C. Joss, & J. J. L. Hsu.* 391, 246, 89-A10 (1992)

Evolution of Heavy-Element Abundances as a Constraint on Sites for Neutron-Capture Nucleosynthesis. *G. J. Mathews, G. Bazan, & J. J. Cowan.* 391, 719, 97-A1 (1992)

The Hubble Constant from Nickel Radioactivity in Type Ia Supernovae. *David Branch.* 392, 35, 101-D9 (1992)

Late Detonation Models for the Type Ia Supernovae SN 1991T and SN 1990N. *Hitoshi Yamaoka, Ken'ichi Nomoto, Toshikazu Shigeyama, & Friedrich-Karl Thielemann.* 393, L55, 127-C1 (1992)

Early Expansion and Luminosity Evolution of Supernovae. *Roger A. Chevalier.* 394, 599, 136-G5 (1992)

Interstellar SiC with Unusual Isotopic Compositions: Grains from a Supernova? *Sachiko Amari, Peter Hoppe, Ernst Zinner, & Roy S. Lewis.* 394, L43, 139-C1 (1992)

The α-Process and the *r*-Process. *S. E. Woosley & Robert D. Hoffman.* 395, 202, 142-F7 (1992)

Expanding Photospheres of Type II Supernovae and the Extragalactic Distance Scale. *Brian P. Schmidt, Robert P. Kirshner, & Ronald G. Eastman.* 395, 366, 146-G7 (1992)

Diffusive Acceleration of Electrons in SN 1987A. *Lewis Ball & J. G. Kirk.* 396, L39, 160-G1 (1992)

Are Symbiotic Stars the Precursors of Type Ia Supernovae? *Ulisse Munari & Alvio Renzini.* 397, L87, 181-B1 (1992)

Radiative Equilibrium in Rapidly Expanding Shells. *P. H. Hauschildt.* 398, 224, 184-E9 (1992)

The Quasi-static Evolution of ONeMg Cores: Explosive Ignition Densities and the Collapse/Explosion Alternative. *Ramon Canal, Jordi Isern, & Javier Labay.* 398, L49, 187-G7 (1992)

r-Process Nucleosynthesis in the High-Entropy Supernova Bubble. *B. S. Meyer, G. J. Mathews, W. M. Howard, S. E. Woosley, & R. D. Hoffman.* 399, 656, 206-B1 (1992)

Explosion of a Supernova with a Red Giant Companion. *E. Livne, Y. Tuchman, & J. C. Wheeler.* 399, 665, 206-B11 (1992)

Nebular Spectra of Type Ia Supernovae as Probes for Extragalactic Distances, Reddening, and Nucleosynthesis. *P. Ruiz-Lapuente & L. B. Lucy.* 400, 127, 210-E1 (1992)

A Distance-independent Calibration of the Luminosity of Type Ia Supernovae and the Hubble Constant. *Bruno Leibundgut & Philip A. Pinto.* 401, 49, 221-F1 (1992)

Pycnonuclear Reaction Rates for Binary Ionic Mixtures. *S. Ichimaru, S. Ogata, & H. M. Van Horn.* 401, L35, 227-E7 (1992)

Deposition of Mass, Momentum, and Energy by Massive Stars into the Interstellar Medium. *Claus Leitherer, Carmelle Robert, & Laurent Drissen.* 401, 596, 230-A6 (1992)

Strange Quark Contributions to the Nucleon and Neutrino Nucleosynthesis. *E. Kolbe, K. Langanke, S. Krewald, & F. K. Thielemann.* 401, L89, 233-C1 (1992)

The Cosmic Gamma-Ray Background from Type Ia Supernovae. *Lih-Sin The, Mark D. Leising, & Donald D. Clayton.* 403, 32, 14-D12 (1993)

Isotopic *r*-Process Abundances and Nuclear Structure Far from Stability: Implications for the *r*-Process Mechanism. *Karl-Ludwig Kratz, Jean-Philippe Bitouzet, Friedrich-Karl Thielemann, Peter Möller, & Bernd Pfeiffer.* 403, 216, 16-E13 (1993)

Decrease of Gravitational Mass Due to Neutrino Emission and Shock Revival in Supernovae. *Itzhak Goldman & Shmuel Nussinov.* 403, 706, 24-D13 (1993)

The Full Alpha-Tensor Due to Supernova Explosions and Superbubbles in the Galactic Disk. *Katia Ferrière.* 404, 162, 30-A7 (1993)

Gamma-Ray Bursts from Stellar Mass Accretion Disks around Black Holes. *S. E. Woosley.* 405, 273, 44-E1 (1993)

Type Ia Supernovae as Standard Candles. *David Branch & Douglas L. Miller.* 405, L5, 47-B8 (1993)

Positrons from Supernovae. *Kai-wing Chan & Richard E. Lingenfelter.* 405, 614, 50-G1 (1993)

Type II Supernovae and Boltzmann Neutrino Transport: The Infall Phase. *Anthony Mezzacappa & Stephen W. Bruenn.* 405, 637, 51-B1 (1993)

A Numerical Method for Solving the Neutrino Boltzmann Equation Coupled to Spherically Symmetric Stellar Core Collapse. *Anthony Mezzacappa & Stephen W. Bruenn.* 405, 669, 51-D7 (1993)

Radioactive ^{26}Al from Massive Stars: Production and Distribution in the Galaxy. *N. Prantzos.* 405, L55, 54-C1 (1993)

High-Resolution Imaging of [Fe II 1.64 Microns, Brackett-γ, and H_2 1–0 $S(1)$ Emission in the Starburst Galaxy NGC 253. *Duncan A. Forbes, Martin J. Ward, V. Rotaciuc, M. Blietz, R. Genzel, S. Drapatz, Paul P. van der Werf, & A. Krabbe.* 406, L11, 60-F1 (1993)

Numerical Simulations of the Convective Flame in White Dwarfs. *Eli Livne.* 406, L17, 60-F12 (1993)

The Dispersal of Iron through the Interstellar Medium. *Nicholas P. T. Bateman & Richard B. Larson.* 407, 634, 78-D12 (1993)

On Symbiotic Stars and Type Ia Supernovae. *Scott J. Kenyon, Mario Livio, Joanna Mikołajewska, & Christopher A. Tout.* 407, L81, 82-E9 (1993)

Magnetic Diffusion Due to Supernova Explosions and Superbubbles in the Galactic Disk. *Katia Ferrière.* 409, 248, 100-C1 (1993)

Stellar Core Collapse: A Boltzmann Treatment of Neutrino-Electron Scattering. *Anthony Mezzacappa & Stephen W. Bruenn.* 410, 740, 123-A7 (1993)

Spatial and Temporal Distributed Acceleration of Cosmic Rays by Supernova Remnants: Three-dimensional Simulations. *G. A. Medina Tanco & R. Opher.* 411, 690, 138-C8 (1993)

Convection and Neutrino Emission in the Late Stages of Massive Star Evolution. *Maurice B. Aufderheide.* 411, 813, 140-A1 (1993)

The Evolution of Massive Stars Including Mass Loss: Presupernova Models and Explosion. *S. E. Woosley, Norbert Langer, & Thomas A. Weaver.* 411, 823, 140-A14 (1993)

Does the Coalescence of White Dwarfs Produce Millisecond Pulsars in Globular Clusters? *Kaiyou Chen & Peter J. T. Leonard.* 411, L75, 142-D3 (1993)

Spectrum Formation in Supernovae: Numerical Techniques. *Ronald G. Eastman & Philip A. Pinto.* 412, 731, 152-G12 (1993)

Hot Bubbles in a Magnetic Interstellar Medium: Another Look at the Soft X-Ray Background. *Richard J. Edgar & Donald P. Cox.* 413, 190, 158-D10 (1993)

Anomalous Energy and Momentum Transfer of Intense Neutrinos in Supernova Explosions. *Tzihong Chiueh.* 413, L35, 162-E11 (1993)

The Absolute Magnitudes of Type Ia Supernovae. *M. M. Phillips.* 413, L105, 168-G7 (1993)

Spectropolarimetry of SN 1993J in NGC 3031. *Susan R. Trammell, Dean C. Hines, & J. Craig Wheeler.* 414, L21, 175-E2 (1993)

The QCD Phase Transition and Supernova Core Collapse. *N. A. Gentile, M. B. Aufderheide, G. J. Mathews, F. D. Swesty, & G. M. Fuller.* 414, 701, 180-A3 (1993)

An Analytical Model for the Plateau Stage of Type II Supernovae. *D. V. Popov.* 414, 712, 180-B3 (1993)

Type II Supernovae from 8–10 $M_{\odot}$ Asymptotic Giant Branch Stars. *Masaaki Hashimoto, Kohichi Iwamoto, & Ken'ichi Nomoto.* 414, L105, 186-A1 (1993)

The Hubble Diagram in V for Supernovae of Type Ia and the Value of H_0 Therefrom. *Allan Sandage & G. A. Tammann.* 415, 1, 185-B1 (1993)

Convection above the Neutrinosphere in Type II Supernovae. *D. S. Miller, J. R. Wilson, & R. W. Mayle.* 415, 278, 188-D12 (1993)

The "Type IIb" Supernova 1993J in M81: A Close Relative of Type Ib Supernovae. *Alexei V. Filippenko, Thomas Matheson, & Luis C. Ho.* 415, L103, 200-A8 (1993)

On the Instability of Deflagration Fronts in White Dwarfs. *Eli Livne & David Arnett.* 415, L107, 200-B1 (1993)

Radio and Near-Infrared [Fe II] Emission from Active Galaxies. *Duncan A. Forbes & Martin J. Ward.* 416, 150, 202-G12 (1993)

A Theory of Supernova Explosions. *Adam Burrows & John Goshy.* 416, L75, 216-E1 (1993)

Late Reionization by Supernova-driven Winds. *Max Tegmark, Joseph Silk, & August Evrard.* 417, 54, 217-F10 (1993)

Thermonuclear Reaction Rates for Dense Binary-Ionic Mixtures. *Shuji Ogata, Setsuo Ichimaru, & Hugh M. Van Horn.* 417, 265, 220-F12 (1993)

Gamma-Ray Escape in Type Ia Supernovae: The 847 keV–m_B Diagram. *P. Ruiz-Lapuente, G. G. Lichti, R. Lehoucq, R. Canal, & M. Cassé.* 417, 547, 226-B5 (1993)

Neutron-rich α-rich Freeze-out and the r-Process in the High-Entropy Neutrino-energized Supernova Bubble. *W. M. Howard, S. Goriely, M. Rayet, & M. Arnould.* 417, 713, 228-C5 (1993)

Pions, Supernovae, and the Supranuclear Matter Density Equation of State. *Ronald W. Mayle, Marco Tavani, & James R. Wilson.* 418, 398, 236-A4 (1993)

A Convective Trigger for Supernova Explosions. *Adam Burrows & Burce A. Fryxell.* 418, L33, 238-D11 (1993)

Production and Circulation of Iron in Elliptical Galaxies and Clusters of Galaxies. *Alvio Renzini, Luca Ciotti, Annibale D'Ercole, & Silvia Pellegrini.* 419, 52, 246-F12 (1993)

Preservation of the Supernova Shock. *Hans A. Bethe.* 419, 197, 248-E14 (1993)

Stability of Detonations in Supernovae. *A. M. Khokhlov.* 419, 200, 248-F5 (1993)

Limits on Planets Orbiting Massive Stars from Radio Pulsar Timing. *S. E. Thorsett & R. J. Dewey.* 419, L65, 259-D1 (1993)

Hydrodynamical Models for X-Ray Emissions from SN 1993J in M81. *Tomoharu Suzuki, Shiomi Kumagai, Toshikazu Shigeyama, Ken'ichi Nomoto, Hitoshi Yamaoka, & Hideyuki Saio.* 419, L73, 259-D11 (1993)

Flame Modeling in Supernovae. *A. Khokhlov.* 419, L77, 259-E1 (1993)

The Clumpy Galaxy Markarian 297 and Its Supernova Activity. *Q. F. Yin.* 420, 152, 2-G6 (1994)

Emission from Circumstellar Interaction in Normal Type II Supernovae. *Roger A. Chevalier & Claes Fransson.* 420, 268, 4-C1 (1994)

Are the Observed Frequencies of Double Degenerates and SN Ia Contradictory? *L. R. Yungelson, M. Livio, A. V. Tutukov, & R. A. Saffer.* 420, 336, 5-A13 (1994)

Theoretical Light Curves of Type IIb Supernova 1993J. *Toshikazu Shigeyama, Tomoharu Suzuki, Shiomi Kumagai, Ken'ichi Nomoto, Hideyuki Saio, & Hitoshi Yamaoka.* 420, 341, 5-B5 (1994)

The Conductive Propagation of Nuclear Flames. II. Convectively Bounded Flames in C+O and O+Ne+Mg Cores. *F. X. Timmes, S. E. Woosley, & Ronald E. Taam.* 420, 348, 5-B13 (1994)

The Distance to the Type Ia Supernova 1972E and Its Parent Galaxy NGC 5253: A Prediction. *David Branch, Adam Fisher, Tibor J. Herczeg, Douglas L. Miller, & Peter Nugent.* 421, L87, 29-F3 (1994)

Relativistic Equation of State of Nuclear Matter for the Supernova Explosion and the Birth of Neutron Stars. *K. Sumiyoshi & H. Toki.* 422, 700, 40-E7 (1994)

A New Radiation Hydrodynamics Code and Application to the Calculation of Type Ia Supernovae Light Curves and Continuum Spectra. *Xiao-he Zhang & Peter Sutherland.* 422, 719, 40-G1 (1994)

Sub–Chandrasekhar Mass Models for Type Ia Supernovae. *S. E. Woosley & Thomas A. Weaver.* 423, 371, 50-F10 (1994)

A New Way to Make Thorne-Żytkow Objects. *Peter J. T. Leonard, Jack G. Hills, & Rachel J. Dewey.* 423, L19, 53-C13 (1994)

On the Progenitors of Type Ia Supernovae in Early-Type and Late-Type Galaxies. *Massimo Della Valle & Mario Livio.* 423, L31, 53-E3 (1994)

On the Acceleration of Nuclear Flame Fronts in White Dwarfs. *F. X. Timmes.* 423, L131, 61-B5 (1994)

Gamma-Ray Limits on Galactic ^{60}Fe and ^{44}Ti Nucleosynthesis. *Mark D. Leising & Gerald H. Share.* 424, 200, 64-D7 (1994)

A New Urca Process. *Maurice B. Aufderheide, Ikko Fushiki, George M. Fuller, & Thomas A. Weaver.* 424, 257, 65-B1 (1994)

Search for Important Weak Interaction Nuclei in Presupernova Evolution. *Maurice B. Aufderheide, Ikko Fushiki, Stanford E. Woosley, & Dieter H. Hartmann.* 91, 389, 23-F3 (1994)

SN 1992bc and SN 1992bo: Evidence for Intrinsic Differences in Type Ia Supernova Luminosities. *José Maza, Mario Hamuy, M. M. Phillips, N. B. Suntzeff, & R. Avilés.* 424, L107, 79-C2 (1994)

Supernovae Deflagrations in Three Dimensions. *A. Khokhlov.* 424, L115, 79-D1 (1994)

The Role of the Equation of State in the "Prompt" Phase of Type II Supernovae. *F. Douglas Swesty, James M. Lattimer, & Eric S. Myra.* 425, 195, 82-F3 (1994)

Rediscussion of Extragalactic Supernova Rates Derived from Evans's 1980–1988 Observations. *Sidney van den Bergh & Robert D. McClure.* 425, 205, 82-G1 (1994)

Postexplosion Hydrodynamics of Supernovae in Red Supergiants. *Marc Herant & S. E. Woosley.* 425, 814, 91-G12 (1994)

Formation and Evolution of Luminous Supersoft X-Ray Sources. *S. Rappaport, R. Di Stefano, & J. D. Smith.* 426, 692, 107-A13 (1994)

Evidence for $^{56}\mathrm{Ni} \rightarrow {}^{56}\mathrm{Co} \rightarrow {}^{56}\mathrm{Fe}$ Decay in Type Ia Supernovae. *Marc J. Kuchner, Robert P. Kirshner, Philip A. Pinto, & Bruno Leibundgut.* 426, L89, 109-E13 (1994)

The Delayed-Detonation Model of Type Ia Supernovae I. The Deflagration Phase. *David Arnett & Eli Livne.* 427, 314, 113-G4 (1994)

The Delayed-Detonation Model of Type Ia Supernovae. II. The Detonation Phase. *David Arnett & Eli Livne.* 427, 330, 114-A7 (1994)

A Catalog of Recent Supernovae. *Sidney van den Bergh.* 92, 219, 34-B12 (1994)

Oxygen-burning Hydrodynamics. I. Steady Shell Burning. *David Arnett.* 427, 932, 124-C2 (1994)

Charge Transfer in Helium-rich Supernova Plasma. *Douglas A. Swartz.* 428, 267, 131-D13 (1994)

Magnetic Fields in Young Supernova Remnants. *Yu-Qing Lou.* 428, L21, 134-D2 (1994)

A Search for Astrophysical Sources of Low-Energy Neutrinos Using the IMB Detector. *R. S. Miller, R. Becker-Szendy, C. B. Bratton, J. Breault, D. Casper, S. T. Dye, W. Gajewski, M. Goldhaber, T. J. Haines, P. G. Halverson, D. Kielczewska, W. R. Kropp, J. G. Learned, J. LoSecco, S. Matsuno, J. Matthews, G. McGrath, C. McGrew, L. Price, F. Reines, J. Schultz, D. Sinclair, H. W. Sobel, J. L. Stone, L. R. Sulak, R. Svoboda, & J. C. van der Velde.* 428, 629, 138-B1 (1994)

The Galactic Supernova Rate. *G. A. Tammann, W. Löffler, & A. Schröder.* 92, 487, 38-C12 (1994)

Gamma-Ray Light Curves and Spectra of Models for Type Ia Supernovae. *P. Höflich, A. Khokhlov, & E. Müller.* 92, 501, 38-E1 (1994)

Luminosity–Line-Width Relations and the Extragalactic Distance Scale. II. A Comparison with Types Ia and II Supernovae. *Michael J. Pierce.* 430, 53, 159-F3 (1994)

Theoretical Light Curve of a Type IIp Supernova. *Ronald G. Eastman, S. E. Woosley, Thomas A. Weaver, & Philip A. Pinto.* 430, 300, 162-G8 (1994)

The True Nucleus of NGC 253 Revealed by High-Resolution Near-Infrared Imaging. *Bruce J. Sams III, R. Genzel, A. Eckart, L. Tacconi-Garman, & R. Hofmann.* 430, L33, 165-E5 (1994)

Helium-accreting Degenerate Dwarfs as Presupernovae and Scenarios for the Ultrasoft X-Ray Sources. *Icko Iben, Jr., & A. V. Tutukov.* 431, 264, 179-D6 (1994)

Energy Deposition and K-Shell Ionization of Supernovae. *Lih-Sin The, William T. Bridgman, & Donald D. Clayton.* 93, 531, 50-C3 (1994)

The Distance of Five Type II Supernovae Using the Expanding Photosphere Method and the Value of H_0. *Brian P. Schmidt, Robert P. Kirshner, Ronald G. Eastman, Mark M. Phillips, Nicholas B. Suntzeff, Mario Hamuy, José Maza, & Roberto Avilés.* 432, 42, 193-F8 (1994)

Reaction Rates and Reaction Sequences in the rp-Process. *L. Van Wormer, J. Görres, C. Iliadis, M. Wiescher, & F.-K. Thielemann.* 432, 326, 197-C1 (1994)

SN 1993J: The Early Radio Emission and Evidence for a Changing Presupernova Mass-Loss Rate. *Schuyler D. Van Dyk, Kurt W. Weiler, Richard A. Sramek, Michael P. Rupen, & Nino Panagia.* 432, L115, 207-A9 (1994)

Axisymmetric Neutrino Radiation and the Mechanism of Supernova Explosions. *Tetsuya Shimizu, Shoichi Yamada, & Katsuhiko Sato.* 432, L119, 207-B1 (1994)

A Direct Way to Measure the Distances of Galaxies. *W. B. Sparks.* 433, 19, 208-D7 (1994)

The *r*-Process and Neutrino-heated Supernova Ejecta. *S. E. Woosley, J. R. Wilson, G. J. Mathews, R. D. Hoffman, & B. S. Meyer.* 433, 229, 211-B9 (1994)

Convection, Nucleosynthesis, and Core Collapse. *Grant Bazan & David Arnett.* 433, L41, 215-B9 (1994)

Prompt Convection in Core Collapse Supernovae. *Stephen W. Bruenn & Anthony Mezzacappa.* 433, L45, 215-C1 (1994)

Grain Destruction in Shocks in the Interstellar Medium. *A. P. Jones, A. G. G. M. Tielens, D. J. Hollenbach, & C. F. McKee.* 433, 797, 221-A12 (1994)

Radio Observations of M83 and Its Supernova Remnants. *John J. Cowan, Douglas A. Roberts, & David Branch.* 434, 128, 226-G10 (1994)

Numerical Study of Rotating Core Collapse in Supernova Explosions. *Shoichi Yamada & Katsuhiko Sato.* 434, 268, 229-B6 (1994)

Beta-Decay Rates of *fp* Shell Nuclei with $A > 60$ in Massive Stars at the Presupernova Stage. *K. Kar, A. Ray, & S. Sarkar.* 434, 662, 237-A1 (1994)

Inside the Supernova: A Powerful Convective Engine. *Marc Herant, Willy Benz, W. Raphael Hix, Chris L. Fryer, & Stirling A. Colgate.* 435, 339, 248-B3 (1994)

Nonlinear Instability of Accelerating Shock Waves with Application to Supernovae. *Ding Luo & Roger A. Chevalier.* 435, 815, 257-C9 (1994)

Ensemble-averaged Thermonuclear Reaction Rates for Turbulent Convection in Stellar Interiors. *Lawrence D. Cloutman.* 437, 384, 288-D9 (1994)

Yet Another Model of Soft Gamma Repeaters. *J. I. Katz, H. A. Toole, & S. H. Unruh.* 437, 727, 295-F6 (1994)

The Derived Population of Luminous Supersoft X-Ray Sources. *R. Di Stefano & S. Rappaport.* 437, 733, 295-G1 (1994)

Pycnonuclear Reaction Rates in Stellar Interiors: Thermal Enhancement. *Hikaru Kitamura & Setsuo Ichimaru.* 438, 300, 5-E9 (1995)

Using Type Ia Supernova Light Curve Shapes to Measure the Hubble Constant. *Adam G. Riess, William H. Press, & Robert P. Kirshner.* 438, L17, 9-G8 (1995)

Gamma-Ray Lines from the Orion Complex. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 438, L21, 10-A1 (1995)

Late-Time Spectra and Type Ia Supernova Models: New Clues from the *Hubble Space Telescope*. *P. Ruiz-Lapuente, R. P. Kirshner, M. M. Phillips, P. M. Challis, B. P. Schmidt, A. V. Filippenko, & J. C. Wheeler.* 439, 60, 22-A9 (1995)

The Blue and Visual Absolute Magnitude Distributions of Type Ia Supernovae. *Thomas E. Vaughan, David Branch, Douglas L. Miller, & Saul Perlmutter.* 439, 558, 32-A11 (1995)

The Sobolev Optical Depth for Time-dependent Relativistic Systems. *David J. Jeffery.* 440, 810, 54-C1 (1995)

The Conversion of Two-Flavor to Three-Flavor Quark Matter in a Supernova Core. *Zigao Dai, Qiuhe Peng, & Tan Lu.* 440, 815, 54-C9 (1995)

A Supernova at $z = 0.458$ and Implications for Measuring the Cosmological Deceleration. *S. Perlmutter, C. R. Pennypacker, G. Goldhaber, A. Goobar, R. A. Muller, H. J. M. Newberg, J. Desai, A. G. Kim, M. Y. Kim, I. A. Small, B. J. Boyle, C. S. Crawford, R. G. McMahon, P. S. Bunclark, D. Carter, M. J. Irwin, R. J. Terlevich, R. S. Ellis, K. Glazebrook, W. J. Couch, J. R. Mould, T. A. Small, & R. G. Abraham.* 440, L41, 57-C1 (1995)

Gravitational Radiation from Rapidly Rotating Nascent Neutron Stars. *Dong Lai & Stuart L. Shapiro.* 442, 259, 80-F11 (1995)

Computing Supernova Collapse to Neutron Stars and Black Holes. *Thomas W. Baumgarte, Stuart L. Shapiro, & Saul A. Teukolsky.* 443, 717, 107-F13 (1995)

The Radio Detection of SN 1968D in NGC 6946. *Scott D. Hyman, Schuyler D. Van Dyk, Kurt W. Weiler, & Richard A. Sramek.* 443, L77, 112-A2 (1995)

Hydrodynamic Instabilities in Supernova Remnants: Early Radiative Cooling. *Roger A. Chevalier & John M. Blondin.* 444, 312, 117-F11 (1995)

Delayed Detonation Models for Normal and Subluminous Type Ia Supernovae: Absolute Brightness, Light Curves, and Molecule Formation. *P. Höflich, A. M. Khokhlov, & J. C. Wheeler.* 444, 831, 128-A1 (1995)

Implicit General Relativistic Hydrodynamic Methods for Modeling the Late-Time Explosion Mechanism in Core Collapse Supernovae. *F. Douglas Swesty.* 445, 811, 146-D4 (1995)

Semianalytic Continuum Spectra of Type II Supernovae. *Marcos J. Montes & Robert V. Wagoner.* 445, 828, 146-E11 (1995)

Determining the Motion of the Local Group Using Type Ia Supernova Light Curve Shapes. *Adam G. Riess, William H. Press, & Robert P. Kirshner.* 445, L91, 150-F3 (1995)

Gamma-Ray Transfer and Energy Deposition in Supernovae. *Douglas A. Swartz, Peter G. Sutherland, & Robert P. Harkness.* 446, 766, 166-F1 (1995)

Massive Supernovae, Orion Gamma Rays, and the Formation of the Solar System. *A. G. W. Cameron, P. Höflich, P. C. Myers, & D. D. Clayton.* 447, L53, 181-D7 (1995)

Carbon and Nitrogen Isotopes in Type II Supernova Diamonds. *Donald D. Clayton, Bradley S. Meyer, Chris I. Sanderson, Sara S. Russell, & C. T. Pillinger.* 447, 894, 188-C2 (1995)

Type Ia Supernova Scenarios and the Hubble Sequence. *P. Ruiz-Lapuente, A. Burkert, & R. Canal.* 447, L69, 190-C1 (1995)

The Minimum Ejection Velocity of Calcium in Type Ia Supernovae and the Value of the Hubble Constant. *Adam Fisher, David Branch, Peter Höflich, & Alexei Khokhlov.* 447, L73, 190-C7 (1995)

Large ^{18}O Excesses in Circumstellar Graphite Grains from the Murchison Meteorite: Indication of a Massive-Star Origin. *Sachiko Amari, Ernst Zinner, & Roy S. Lewis.* 447, L147, 191-F4 (1995)

The Presupernova Evolution and Explosion of Helium Stars That Experience Mass Loss. *S. E. Woosley, Norbert Langer, & Thomas A. Weaver.* 448, 315, 196-E7 (1995)

A Search for Ultra–High-Energy Gamma-Ray Emission from Five Supernova Remnants. *G. E. Allen, D. Berley, S. Biller, R. L. Burman, M. Cavalli-Sforza, C. Y. Chang, M. L. Chen, P. Chumney, D. Coyne, C. L. Dion, D. Dorfan, R. W. Ellsworth, J. A. Goodman, T. J. Haines, C. M. Hoffman, L. Kelley, S. Klein, D. M. Schmidt, R. Schnee, A. Shoup, C. Sinnis, M. J. Stark, D. A. Williams, J.-P. Wu, T. Yang, & G. B. Yodh.* 448, L25, 199-E10 (1995)

The First Second of a Type II Supernova: Convection, Accretion, and Shock Propagation. *H.-Thomas Janka & Ewald Müller.* 448, L109, 209-D9 (1995)

On the Origin of the Clustered Quasi-stellar Object Metal Absorption Lines. *Xiangdong Shi.* 449, 140, 212-B3 (1995)

^{26}Al and ^{60}Fe from Supernova Explosions. *F. X. Timmes, S. E. Woosley, D. H. Hartmann, R. D. Hoffman, T. A. Weaver, & F. Matteucci.* 449, 204, 213-A4 (1995)

Light Curve Studies of SN 1993J and SN 1994I. *Timothy R. Young, E. Baron, & David Branch.* 449, L51, 216-G4 (1995)

Neutrino Reactions on ^4He and the *r*-Process. *Bradley S. Meyer.* 449, L55, 216-G11 (1995)

Limits on the Hubble Constant from the *HST* Distance of M100. *Jeremy Mould, John P. Huchra, Fabio Bresolin, Laura Ferrarese, Holland C. Ford, Wendy L. Freedman, John Graham, Paul Harding, Robert Hill, John G. Hoessel, Shaun M. Hughes, Garth D. Illingworth, Daniel Kelson,*

Robert C. Kennicutt, Jr., Barry F. Madore, Randy Phelps, Peter B. Stetson, & Anne Turner. 449, 413, 218-D8 (1995)

Propagation of Turbulent Flames in Supernovae. *Alexei M. Khokhlov.* 449, 695, 222-D7 (1995)

The Supernova Shock. *Hans A. Bethe.* 449, 714, 222-F2 (1995)

Feasibility of Measuring the Cosmological Constant Λ and Mass Density Ω Using Type Ia Supernovae. *Ariel Goobar & Saul Perlmutter.* 450, 14, 228-C3 (1995)

Supernovae, Globular Clusters, and Galaxy Mergers. *Sidney van den Bergh.* 450, 27, 228-D9 (1995)

Gravitational Radiation from Rotational Collapse of a Supernova Core. *Shoichi Yamada & Katsuhiko Sato.* 450, 245, 231-D4 (1995)

The Peak Brightness of Supernovae in the *U* Band and the Hubble Constant. *Bradley E. Schaefer.* 450, L5, 235-D8 (1995)

The Type Ic Supernova 1994I in M51: Detection of Helium and Spectral Evolution. *Alexei V. Filippenko, Aaron J. Barth, Thomas Matheson, Lee Armus, Michael Brown, Brian R. Espey, Xiao-Ming Fan, Robert W. Goodrich, Luis C. Ho, Vesa T. Junkkarinen, David C. Koo, Matthew D. Lehnert, André R. Martel, Joseph M. Mazzarella, Joseph S. Miller, Graeme H. Smith, David Tytler, & Gregory D. Wirth.* 450, L11, 235-E3 (1995)

Smooth Particle Hydronamics Simulations of Deflagrations in Supernovae. *E. Bravo & D. García-Senz.* 450, L17, 234-E12 (1995)

On the Nature of Core-Collapse Supernova Explosions. *Adam Burrows, John Hayes, & Bruce A. Fryxell.* 450, 830, 242-B9 (1995)

Cooling Flow Models of the X-Ray Emission and Temperature Profiles for a Sample of Elliptical Galaxies. *G. Bertin & T. Toniazzo.* 451, 111, 247-F1 (1995)

Reaction Rates for ^{146}Sm Production in Supernovae. *Thomas Rauscher, Friedrich-Karl Thielemann, & Heinz Oberhummer.* 451, L37, 252-F4 (1995)

Radio Observations of the Type Ia SN 1986G as a Test of a Symbiotic-Star Progenitor. *Christopher R. Eck, John J. Cowan, Douglas A. Roberts, Francesca R. Boffi, & David Branch.* 451, L53, 260-D6 (1995)

The Hubble Diagram for Supernovae of Type Ia. II. The Effect on the Hubble Constant of a Correlation between Absolute Magnitude and Light Decay Rate. *G. A. Tammann & Allan Sandage.* 452, 16, 262-D6 (1995)

Explosions of Sub–Chandrasekhar Mass White Dwarfs in Two Dimensions. *Eli Livne & David Arnett.* 452, 62, 263-A6 (1995)

Turbulent Nuclear Flames in Type Ia Supernovae. *J. C. Niemeyer & W. Hillebrandt.* 452, 769, 275-B13 (1995)

Microscopic Instabilities of Nuclear Flames in Type Ia Supernovae. *J. C. Niemeyer & W. Hillebrandt.* 452, 779, 275-C12 (1995)

Silicon Nitride from Supernovae. *Larry R. Nittler, Peter Hoppe, Conel M. O'D. Alexander, Sachiko Amari, Peter Eberhardt, Xia Gao, Roy S. Lewis, Roger Strebel, Robert M. Walker, & Ernst Zinner.* 453, L25, 289-E9 (1995)

Neutrino Capture and Supernova Nucleosynthesis. *George M. Fuller & Bradley S. Meyer.* 453, 792, 294-G7 (1995)

A New Method for the Determination of the Hubble Parameter. *Sidney van den Bergh.* 453, L55, 298-A1 (1995)

The Evolution and Explosion of Massive Stars. II. Explosive Hydrodynamics and Nucleosynthesis. *S. E. Woosley & Thomas A. Weaver.* 101, 181, 55-B1 (1995)

Dwarf Galaxies and the Origin of the Intracluster Medium. *Biman B. Nath & Masashi Chiba.* 454, 604, 309-G6 (1995)

Type Ia Supernovae: The Flame Is Born. *D. Garcia-Senz & S. E. Woosley.* 454, 895, 314-B7 (1995)

Neutrino Capture on Heavy Nuclei. *Gail C. McLaughlin & George M. Fuller.* 455, 202, 321-A1 (1995)

Evidence for Thermal Absorption inside Cassiopeia A. *N. E. Kassim, R. A. Perley, K. S. Dwarakanath, & W. C. Erickson.* 455, L59, 325-C8 (1995)

Evidence for a Spectroscopic Sequence among Type Ia Supernovae. *Peter Nugent, Mark Phillips, E. Baron, David Branch, & Peter Hauschildt.* 455, L147, 334-B4 (1995)

STARS: SUPERNOVAE: INDIVIDUAL

Name: S Andromedae

The Enigmatic Supernova S Andromedae. *Sidney van den Bergh.* 424, 345, 66-B8 (1994)

Alphanumeric: SN 1572A

Was Tycho's Supernova a Subluminous Supernova of Type Ia? *Sidney van den Bergh.* 413, 67, 157-A1 (1993)

Alphanumeric: SN 1895B

The Distance to the Type Ia Supernova 1972E and Its Parent Galaxy NGC 5253: A Prediction. *David Branch, Adam Fisher, Tibor J. Herczeg, Douglas L. Miller, & Peter Nugent.* 421, L87, 29-F3 (1994)

The Cepheid Distance to NGC 5253: Calibration of M(max) for the Type I Supernovae SN 1972E and SN 1895B. *Allan Sandage, A. Saha, G. A. Tammann, Lukas Labhardt, Hans Schwengler, N. Panagia, & F. D. Macchetto.* 423, L13, 53-C5 (1994)

Discovery of Cepheids in NGC 5253: Absolute Peak Brightness of SN Ia 1895B and SN Ia 1972E and the Value of H_0. *A. Saha, Allan Sandage, Lukas Labhardt, Hans Schwengeler, G. A. Tammann, N. Panagia, & F. D. Macchetto.* 438, 8, 1-C12 (1995)

The Peak Brightness of SN 1895B in NGC 5253 and the Hubble Constant. *Bradley E. Schaefer.* 447, L13, 180-E3 (1995)

Alphanumeric: SN 1937C

An Absolute Calibration of Type Ia Supernovae and the Value of H_0. *Michael J. Pierce, Michael E. Ressler, & Mark S. Shure.* 390, L45, 84-D1 (1992)

The Cepheid Distance to IC 4182: Calibration of M_V(max) for SN Ia 1937C and the Value of H_0. *Allan Sandage, A. Saha, G. A. Tammann, Nino Panagia, & D. Macchetto.* 401, L7, 227-B1 (1992)

The Distance to the Type Ia Supernova 1972E and Its Parent Galaxy NGC 5253: A Prediction. *David Branch, Adam Fisher, Tibor J. Herczeg, Douglas L. Miller, & Peter Nugent.* 421, L87, 29-F3 (1994)

The Peak Brightness of SN 1937C in IC 4182 and the Hubble Constant. *Bradley E. Schaefer.* 426, 493, 104-E1 (1994)

Alphanumeric: SN 1957D

A Rapid Decline in the Optical Emission from SN 1957D in M83. *Knox S. Long, P. Frank Winkler, & William P. Blair.* 395, 632, 151-A5 (1992)

Radio Observations of M83 and Its Supernova Remnants. *John J. Cowan, Douglas A. Roberts, & David Branch.* 434, 128, 226-G10 (1994)

Detection of a Nuclear Radio Source in NGC 7331: A Relatively "Radio-quiet" Liner. *John J. Cowan, W. Romanishin, & David Branch.* 436, L139, 281-C9 (1994)

Alphanumeric: SN 1968D

The Radio Detection of SN 1968D in NGC 6946. *Scott D. Hyman, Schuyler D. Van Dyk, Kurt W. Weiler, & Richard A. Sramek.* 443, L77, 112-A2 (1995)

Alphanumeric: SN 1970G

The Optical Recovery of SN 1970G in M101 (NGC 5457). *Robert A. Fesen.* 413, L109, 168-G13 (1993)

Alphanumeric: SN 1972E

The Distance to the Type Ia Supernova 1972E and Its Parent Galaxy NGC 5253: A Prediction. *David Branch, Adam Fisher, Tibor J. Herczeg, Douglas L. Miller, & Peter Nugent.* 421, L87, 29-F3 (1994)

The Cepheid Distance to NGC 5253: Calibration of M(max) for the Type I Supernovae SN 1972E and SN 1895B. *Allan Sandage, A. Saha, G. A. Tammann, Lukas Labhardt, Hans Schwengler, N. Panagia, & F. D. Macchetto.* 423, L13, 53-C5 (1994)

Discovery of Cepheids in NGC 5253: Absolute Peak Brightness of SN Ia 1895B and SN Ia 1972E and the Value of H_0. *A. Saha, Allan Sandage, Lukas Labhardt, Hans Schwengeler, G. A. Tammann, N. Panagia, & F. D. Macchetto.* 438, 8, 1-C12 (1995)

Alphanumeric: SN 1973E

The Distance to the Type Ia Supernova 1972E and Its Parent Galaxy NGC 5253: A Prediction. *David Branch, Adam Fisher, Tibor J. Herczeg, Douglas L. Miller, & Peter Nugent.* 421, L87, 29-F3 (1994)

Alphanumeric: SN 1978K

SN 1978K: An Extraordinary Supernova in the Nearby Galaxy NGC 1313. *Stuart Ryder, Lister Staveley-Smith, Michael Dopita, Robert Petre, Edward Colbert, David Malin, & Eric Schlegel.* 416, 167, 203-B6 (1993)

Soft X-Ray Emission from the Spiral Galaxy NGC 1313. *Edward J. M. Colbert, Robert Petre, Eric M. Schlegel, & Stuart D. Ryder.* 446, 177, 155-F2 (1995)

Alphanumeric: SN 1979C

Evidence for Periodic Modulation of Presupernova Mass Loss from the Progenitor of SN 1979C. *Kurt W. Weiler, Schuyler D. Van Dyk, James E. Pringle, & Nino Panagia.* 399, 672, 206-C5 (1992)

The Optical Recovery of SN 1979C in NGC 4321 (M100). *Robert A. Fesen & David M. Matonick.* 407, 110, 70-D9 (1993)

Alphanumeric: SN 1980K

Full Evolution of the 6 and 20 Centimeter Radio Emission from SN 1980K. *Kurt W. Weiler, Schuyler D. Van Dyk, Nino Panagia, & Richard A. Sramek.* 398, 248, 184-G9 (1992)

The Late-Time Optical Spectrum of SN 1980K. *Robert A. Fesen & David M. Matonick.* 428, 157, 130-B7 (1994)

Alphanumeric: SN 1981B

Spectrum Synthesis of the Type Ia Supernovae SN 1992A and SN 1981B. *Peter Nugent, E. Baron, Peter H. Hauschildt, & David Branch.* 441, L33, 67-A1 (1995)

The Peak Brightness of SN 1981B in NGC 4536 and the Hubble Constant. *Bradley E. Schaefer.* 449, L9, 216-B2 (1995)

Evidence for a Spectroscopic Sequence among Type Ia Supernovae. *Peter Nugent, Mark Phillips, E. Baron, David Branch, & Peter Hauschildt.* 455, L147, 334-B4 (1995)

Alphanumeric: SN 1981K

The 20 and 6 Centimeter Radio Light Curves for SN 1981K: A Type II Radio Supernova. *Schuyler D. Van Dyk, Kurt W. Weiler, Richard A. Sramek, & Nino Panagia.* 396, 195, 157-E4 (1992)

Alphanumeric: SN 1983N

SN 1994I in M51 and the Nature of Type Ibc Supernovae. *J. C. Wheeler, R. P. Harkness, A. Clocchiatti, S. Benetti, M. S. Brotherton, D. L. DePoy, & J. Elias.* 436, L135, 281-C1 (1994)

Alphanumeric: SN 1984L

On the Stellar Progenitor of the Type Ib Supernova 1984L. *E. Baron, Timothy R. Young, & David Branch.* 409, 417, 102-B10 (1993)

SN 1994I in M51 and the Nature of Type Ibc Supernovae. *J. C. Wheeler, R. P. Harkness, A. Clocchiatti, S. Benetti, M. S. Brotherton, D. L. DePoy, & J. Elias.* 436, L135, 281-C1 (1994)

The Type Ic Supernova 1994I in M51: Detection of Helium and Spectral Evolution. *Alexei V. Filippenko, Aaron J. Barth, Thomas Matheson, Lee Armus, Michael Brown, Brian R. Espey, Xiao-Ming Fan, Robert W. Goodrich, Luis C. Ho, Vesa T. Junkkarinen, David C. Koo, Matthew D. Lehnert, André R. Martel, Joseph M. Mazzarella, Joseph S. Miller, Graeme H. Smith, David Tytler, & Gregory D. Wirth.* 450, L11, 235-E3 (1995)

Alphanumeric: SN 1985F

On the Stellar Progenitor of the Type Ib Supernova 1984L. *E. Baron, Timothy R. Young, & David Branch.* 409, 417, 102-B10 (1993)

Alphanumeric: SN 1985L

Early-Time Spectra of Type Ic Supernovae: Further Evidence for the Presence of Hydrogen. *Alexei V. Filippenko.* 384, L37, 11-B11 (1992)

Alphanumeric: SN 1986G

Nebular Spectra of Type Ia Supernovae as Probes for Extragalactic Distances, Reddening, and Nucleosynthesis. *P. Ruiz-Lapuente & L. B. Lucy.* 400, 127, 210-E1 (1992)

Gamma-Ray Escape in Type Ia Supernovae: The 847 keV–m_B Diagram. *P. Ruiz-Lapuente, G. G. Lichti, R. Lehoucq, R. Canal, & M. Cassé.* 417, 547, 226-B5 (1993)

Radio Observations of the Type Ia SN 1986G as a Test of a Symbiotic-Star Progenitor. *Christopher R. Eck, John J. Cowan, Douglas A. Roberts, Francesca R. Boffi, & David Branch.* 451, L53, 260-D6 (1995)

Evidence for a Spectroscopic Sequence among Type Ia Supernovae. *Peter Nugent, Mark Phillips, E. Baron, David Branch, & Peter Hauschildt.* 455, L147, 334-B4 (1995)

Alphanumeric: SN 1986J

X-Ray Emission from SN 1986J in NGC 891. *Joel N. Bregman & Rachel A. Pildis.* 398, L107, 194-E7 (1992)

X-Rays from SN 1986J: Emission of a Shocked Clumpy Wind. *N. N. Chugai.* 414, L101, 185-G10 (1993)

Alphanumeric: SN 1987A

Hydrogen Recombination at High Optical Depth and the Spectrum of SN 1987A. *Yueming Xu, Richard McCray, Ernesto Oliva, & Sofia Randich.* 386, 181, 26-D3 (1992)

Compton Telescope Observations of Gamma Rays from SN 1987A. *Farid Ait-Ouamer, Alan D. Kerrick, Terrence J. O'Neill, O. Tumay Tumer, Allen D. Zych, & R. Stephen White.* 386, 715, 34-B11 (1992)

The [O I] λλ6300,6364 Doublet of SN 1987A. *Hongwei Li & Richard McCray.* 387, 309, 40-F12 (1992)

Line Fluorescence from the Ring around SN 1987A. *Eli Dwek & James E. Felten.* 387, 551, 45-E1 (1992)

Dust and Gas Contributions to the Energy Output of SN 1987A on Day 1153. *E. Dwek, S. H. Moseley, W. Glaccum, J. R. Graham, R. F. Loewenstein, R. F. Silverberg, & R. K. Smith.* 389, L21, 66-C11 (1992)

Mixing in Ejecta of Supernovae. I. General Properties of Two-dimensional Rayleigh-Taylor Instabilities and Mixing Width in Ejecta of Supernovae. *Izumi Hachisu, Takuya Matsuda, Ken'ichi Nomoto, & Toshikazu Shigeyama.* 390, 230, 76-G7 (1992)

Presupernova Evolution in Massive Interacting Binaries. *Ph. Podsiadlowski, P. C. Joss, & J. J. L. Hsu.* 391, 246, 89-A10 (1992)

The Ring around SN 1987A and Rotation of the Progenitor. *Y. Eriguchi, H. Yamaoka, K. Nomoto, & M. Hashimoto.* 392, 243, 104-A1 (1992)

Shock Breakout in SN 1987A. *Lisa Ensman & Adam Burrows.* 393, 742, 125-A10 (1992)

Early Expansion and Luminosity Evolution of Supernovae. *Roger A. Chevalier.* 394, 599, 136-G5 (1992)

Observations of the Light Echoes from SN 1987A Using the *Astro-1* Ultraviolet Imaging Telescope. *Arlin P. S. Crotts, Wayne B. Landsman, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L25, 144-G7 (1992)

SN 1987A: The Impact of Greater than MeV Gamma-Ray Luminosity Limits on Theories of Particle Acceleration. *R. K. Sood, L. Waldron, G. K. Rochester, T. J. Sumner, G. Frye, T. Jenkins, R. Staubert, E. Kendziorra, P. Ubertini, & A. Bazzano.* 395, 637, 151-B3 (1992)

Postcollapse Hydrodynamics of SN 1987A: Two-dimensional Simulations of the Early Evolution. *Marc Herant, Willy Benz, & Stirling Colgate.* 395, 642, 151-B13 (1992)

Diffusive Acceleration of Electrons in SN 1987A. *Lewis Ball & J. G. Kirk.* 396, L39, 160-G1 (1992)

Carbon Monoxide in SN 1987A. *Weihong Liu, A. Dalgarno, & S. Lepp.* 396, 679, 165-G1 (1992)

A Limit on the ^{57}Co Gamma-Ray Flux from SN 1987A. *S. Gunji, T. Kamae, S. Miyazaki, Y. Sekimoto, T. Takahashi, T. Tamura, M. Tanaka, N. Yamaoka, T. Yamagami, M. Nomachi, H. Murakami, J. Braga, & J. A. Neri.* 397, L83, 181-A8 (1992)

Oriented Scintillation Spectrometer Experiment Observations of ^{57}Co in SN 1987A. *J. D. Kurfess, W. N. Johnson, R. L. Kinzer, R. A. Kroeger, M. S. Strickman, J. E. Grove, M. D. Leising, D. D. Clayton, D. A. Grabelsky, W. R. Purcell, M. P. Ulmer, R. A. Cameron, & G. V. Jung.* 399, L137, 208-B7 (1992)

The ^{57} Co Abundance in SN 1987A. *Donald D. Clayton, Mark D. Leising, Lih-Sin The, W. N. Johnson, & J. D. Kurfess.* 399, L141, 208-C1 (1992)

Observations of SN 1987A with the Gamma-Ray Spectrometer HEXAGONE. *C. G. L. Chapuis, P. Wallyn, Ph. Durouchoux, J. Matteson, M. Pelling, B. Bowman, M. Briggs, D. Gruber, L. Peterson, R. Lingenfelter, C. Cork, D. Landis, P. Luke, N. Madden, D. Malone, R. Pehl, M. Pollard, R. Lin, D. Smith, P. Feffer, K. Hurley, G. Vedrenne, M. Niel, & P. von Ballmoos.* 403, 332, 18-A7 (1993)

Faint Object Camera Observations of the Shape and Expansion of SN 1987A. *P. Jakobsen, F. Macchetto, & N. Panagia.* 403, 736, 24-G10 (1993)

Formation of the Circumstellar Shell around SN 1987A. *John M. Blondin & Peter Lundqvist.* 405, 337, 45-C13 (1993)

The Ca II Emission Lines of SN 1987A. *Hongwei Li & Richard McCray.* 405, 730, 52-B9 (1993)

High-Resolution Mid-Infrared Spectra of Co II, Ni I, and Fe II in SN 1987A. *D. E. Jennings, R. J. Boyle, G. R. Wiedemann, & S. H. Moseley.* 408, 277, 86-E5 (1993)

The Freeze-out Phase of SN 1987A: Implications for the Light Curve. *Claes Fransson & Cecilia Kozma.* 408, L25, 89-A1 (1993)

SN 1987A: An Empirical and Analytic Approach. *Hans A. Bethe.* 412, 192, 144-D11 (1993)

Gamma-Ray Continuum and Line Observations of SN 1987A. *D. M. Palmer, S. M. Schindler, W. R. Cook, J. M. Grunsfeld, W. A. Heindl, T. A. Prince, & E. C. Stone.* 412, 203, 144-E11 (1993)

The Radiative Association of He^+ and He and H^+ and H. *P. C. Stancil, J. F. Babb, & A. Dalgarno.* 414, 672, 179-E8 (1993)

Airborne Spectrophotometry of SN 1987A from 1.7 to 12.6 Microns: Time History of the Dust Continuum and Line Emission. *Diane H. Wooden, David M. Rank, Jesse D. Bregman, Fred C. Witteborn, A. G. G. M. Tielens, Martin Cohen, Philip A. Pinto, & Timothy S. Axelrod.* 88, 477, 46-F9 (1993)

The Distance to the Large Magellanic Cloud from SN 1987A. *Marshall L. McCall.* 417, L75, 230-D1 (1993)

Iron, Cobalt, and Nickel in SN 1987A. *Hongwei Li, Richard McCray, & Rashid A. Sunyaev.* 419, 824, 257-G10 (1993)

Detection of X-Rays from SN 1987A with *ROSAT*. *Paul Gorenstein, John P. Hughes, & Wallace H. Tucker.* 420, L25, 7-D8 (1994)

Analysis of the Early Spectra and Light Curve of SN 1987A. *Peter H. Hauschildt & Lisa M. Ensman.* 424, 905, 76-A10 (1994)

The Ring around Supernova 1987A Revisited. I. Ellipticity of the Ring. *Andrew Gould.* 425, 51, 80-G2 (1994)

Day 640 Infrared Line and Continuum Measurements: Dust Formation in SN 1987A. *Sean W. J. Colgan, Michael R. Haas, Edwin F. Erickson, Steven D. Lord, & David J. Hollenbach.* 427, 874, 123-E3 (1994)

The Oxygen Mass in SN 1987A: Making Use of Fluctuations in the [O I] λλ6300, 6364 Profile. *Nikolai N. Chugai.* 428, L17, 143-C11 (1994)

Silicon Monoxide in SN 1987A. *Weihong Liu & A. Dalgarno.* 428, 769, 139-G5 (1994)

A Review of Recent Results in Gamma-Ray Astronomy Obtained from High-Altitude Balloons. *B. J. Teegarden.* 92, 363, 36-F3 (1994)

Gamma-Ray Constraints on Supernova Nucleosynthesis. *Mark D. Leising.* 92, 495, 38-D7 (1994)

The Impact of SN 1987A with Its Circumstellar Ring. *Ding Luo, Richard McCray, & Jonathan Slavin.* 430, 264, 162-D3 (1994)

Axisymmetric Neutrino Radiation and the Mechanism of Supernova Explosions. *Tetsuya Shimizu, Shoichi Yamada, & Katsuhiko Sato.* 432, L119, 207-B1 (1994)

Observations of SN 1987A with the COSTAR-corrected Faint Object Camera. *P. Jakobsen, R. Jedrzejewski, F. Macchetto, & N. Panagia.* 435, L47, 252-C2 (1994)

Accretion onto and Radiation from the Compact Object Formed in SN 1987A. *G. E. Brown & J. C. Weingartner.* 436, 843, 277-C9 (1994)

The Circumstellar Envelope of SN 1987A. I. The Shape of the Double-lobed Nebula and Its Rings and the Distance to the Large Magellanic Cloud. *Arlin P. S. Crotts, William E. Kunkel, & Stephen R. Heathcote.* 438, 724, 14-B11 (1995)

HST Observations of the Ring around SN 1987A. *Philip C. Plait, Peter Lundqvist, Roger A. Chevalier, & Robert P. Kirshner.* 439, 730, 34-F8 (1995)

Balloon-borne Measurements of the SN 1987A Hard X-Ray Continuum. *Geoffrey N. Pendleton, William S. Paciesas, Gerald J. Fishman, Charles A. Meegan, & Robert B. Wilson.* 439, 963, 37-G13 (1995)

The He I Emission Lines of SN 1987A. *Hongwei Li & Richard McCray.* 441, 821, 73-C6 (1995)

A Model for the Radio Emission from SNR 1987A. *P. Duffy, Lewis Ball, & J. G. Kirk.* 447, 364, 177-D7 (1995)

The Origin of the Rings around SN 1987A: An Evaluation of the Interacting-Winds Model. *Crystal L. Martin & David Arnett.* 447, 378, 177-E11 (1995)

The Supernova Shock. *Hans A. Bethe.* 449, 714, 222-F2 (1995)

A Three-dimensional Study Using Light Echoes of the Structure of the Interstellar Medium in Front of SN 1987A. *Jun Xu, Arlin P. S. Crotts, & William E. Kunkel.* 451, 806, 258-C6 (1995)

The Supernova Ring Revisited. II. Distance to the Large Magellanic Cloud. *Andrew Gould.* 452, 189, 264-E12 (1995)

The Presupernova H II Region around SN 1987A. *Roger A. Chevalier & Vikram V. Dwarkadas.* 452, L45, 270-B8 (1995)

Hubble Space Telescope Observations of the SN 1987A Triple Ring Nebula. *Christopher J. Burrows, John Krist, J. Jeff Hester, Raghvendra Sahai, John T. Trauger, Karl R. Stapelfeldt, John S. Gallagher III, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, Richard E. Griffiths, John G. Hoessel, Jon A. Holtzman, Jeremy R. Mould, Paul A. Scowen, Alan M. Watson, & James A. Westphal.* 452, 680, 274-A11 (1995)

Radio Observations of SN 1987A at 843 MHz. *Lewis Ball, D. Campbell-Wilson, D. F. Crawford, & A. J. Turtle.* 453, 864, 295-G8 (1995)

The Oxygen Temperature of SN 1987A. *Weihong Liu & A. Dalgarno.* 454, 472, 305-G1 (1995)

A Gamma-Ray Monte Carlo Study of the Clumpy Debris of SN 1987A. *Adam Burrows & Kenneth A. Van Riper.* 455, 215, 321-B3 (1995)

Hydrogen Molecules in SN 1987A. *Michael Culhane & Richard McCray.* 455, 335, 322-F7 (1995)

Alphanumeric: SN 1987M

Early-Time Spectra of Type Ic Supernovae: Further Evidence for the Presence of Hydrogen. *Alexei V. Filippenko.* 384, L37, 11-B11 (1992)

Spectra of Low-Mass Helium Star Models and the Type Ic Supernova SN 1987M. *Douglas A. Swartz, Alexei V. Filippenko, Ken'ichi Nomoto, & J. Craig Wheeler.* 411, 313, 131-B8 (1993)

SN 1994I in M51 and the Nature of Type Ibc Supernovae. *J. C. Wheeler, R. P. Harkness, A. Clocchiatti, S. Benetti, M. S. Brotherton, D. L. DePoy, & J. Elias.* 436, L135, 281-C1 (1994)

The Type Ic Supernova 1994I in M51: Detection of Helium and Spectral Evolution. *Alexei V. Filippenko, Aaron J. Barth, Thomas Matheson, Lee Armus, Michael Brown, Brian R. Espey, Xiao-Ming Fan, Robert W. Goodrich, Luis C. Ho, Vesa T. Junkkarinen, David C. Koo, Matthew D. Lehnert, André R. Martel, Joseph M. Mazzarella, Joseph S. Miller, Graeme H. Smith, David Tytler, & Gregory D. Wirth.* 450, L11, 235-E3 (1995)

Alphanumeric: SN 1988Z

SN 1988Z: The Most Distant Radio Supernova. *Schuyler D. Van Dyk, Kurt W. Weiler, Richard A. Sramek, & Nino Panagia.* 419, L69, 259-D6 (1993)

Alphanumeric: SN 1989B

Evidence for a Spectroscopic Sequence among Type Ia Supernovae. *Peter Nugent, Mark Phillips, E. Baron, David Branch, & Peter Hauschildt.* 455, L147, 334-B4 (1995)

Alphanumeric: SN 1990B

The Radio Emission from the Type Ic Supernova SN 1990B. *Schuyler D. Van Dyk, Richard A. Sramek, Kurt W. Weiler, & Nino Panagia.* 409, 162, 99-A3 (1993)

Alphanumeric: SN 1990N

Possible Models for the Type Ia Supernova 1990N. *Toshikazu Shigeyama, Ken'ichi Nomoto, Hitoshi Yamaoka, & Friedrich-Karl Thielemann.* 386, L13, 29-C1 (1992)

Late Detonation Models for the Type Ia Supernovae SN 1991T and SN 1990N. *Hitoshi Yamaoka, Ken'ichi Nomoto, Toshikazu Shigeyama, & Friedrich-Karl Thielemann.* 393, L55, 127-C1 (1992)

Analysis of the Photospheric Epoch Spectra of Type Ia Supernovae SN 1990N and SN 1991T. *David J. Jeffery, Bruno Leibundgut, Robert P. Kirshner, Stefano Benetti, David Branch, & George Sonneborn.* 397, 304, 171-F4 (1992)

Evidence for a Spectroscopic Sequence among Type Ia Supernovae. *Peter Nugent, Mark Phillips, E. Baron, David Branch, & Peter Hauschildt.* 455, L147, 334-B4 (1995)

Alphanumeric: SN 1990W

SN 1994I in M51 and the Nature of Type Ibc Supernovae. *J. C. Wheeler, R. P. Harkness, A. Clocchiatti, S. Benetti, M. S. Brotherton, D. L. DePoy, & J. Elias.* 436, L135, 281-C1 (1994)

Alphanumeric: SN 1991T

The Peculiar Type Ia SN 1991T: Detonation of a White Dwarf? *Alexei V. Filippenko, Michael W. Richmond, Thomas Matheson, Joseph C. Shields, E. Margaret Burbidge, Ross D. Cohen, Mark Dickinson, Matthew A. Malkan, Brant Nelson, Jochen Pietz, David Schlegel, Patrick Schmeer, Hyron Spinrad, Charles C. Steidel, Hien D. Tran, & William Wren.* 384, L15, 6-C1 (1992)

Modeling the Iron-dominated Spectra of the Type Ia Supernova SN 1991T at Premaximum. *P. Ruiz-Lapuente, E. Cappellaro, M. Turatto, C. Gouiffes, I. J. Danziger, M. Della Valle, & L. B. Lucy.* 387, L33, 43-D8 (1992)

Late Detonation Models for the Type Ia Supernovae SN 1991T and SN 1990N. *Hitoshi Yamaoka, Ken'ichi Nomoto, Toshikazu Shigeyama, & Friedrich-Karl Thielemann.* 393, L55, 127-C1 (1992)

Analysis of the Photospheric Epoch Spectra of Type Ia Supernovae SN 1990N and SN 1991T. *David J. Jeffery, Bruno Leibundgut, Robert P. Kirshner, Stefano Benetti, David Branch, & George Sonneborn.* 397, 304, 171-F4 (1992)

Gamma-Ray Escape in Type Ia Supernovae: The 847 keV–m_B Diagram. *P. Ruiz-Lapuente, G. G. Lichti, R. Lehoucq, R. Canal, & M. Cassé.* 417, 547, 226-B5 (1993)

Gamma-Ray Constraints on Supernova Nucleosynthesis. *Mark D. Leising.* 92, 495, 38-D7 (1994)

Gamma-Ray Light Curves and Spectra of Models for Type Ia Supernovae. *P. Höflich, A. Khokhlov, & E. Müller.* 92, 501, 38-E1 (1994)

SN 1991T: Reflections of Past Glory. *Brian P. Schmidt, Robert P. Kirshner, Bruno Leibundgut, Lisa A. Wells, Alain C. Porter, Pilar Ruiz-Lapuente, Peter Challis, & Alexei V. Filippenko.* 434, L19, 232-D2 (1994)

Compton Gamma Ray Observatory OSSE Observations of SN 1991T. *M. D. Leising, W. N. Johnson, J. D. Kurfess, D. D. Clayton, D. A. Grabelsky, G. V. Jung, R. L. Kinzer, W. R. Purcell, M. S. Strickman, L.-S. The, & M. P. Ulmer.* 450, 805, 241-G1 (1995)

Evidence for a Spectroscopic Sequence among Type Ia Supernovae. *Peter Nugent, Mark Phillips, E. Baron, David Branch, & Peter Hauschildt.* 455, L147, 334-B4 (1995)

Evidence for a Spectroscopic Sequence among Type Ia Supernovae. *Peter Nugent, Mark Phillips, E. Baron, David Branch, & Peter Hauschildt.* 455, L147, 334-B4 (1995)

Alphanumeric: SN 1992A

A *ROSAT* Upper Limit on X-Ray Emission from SN 1992A. *Eric M. Schlegel & Robert Petre.* 412, L29, 148-D1 (1993)

SN 1992A: Ultraviolet and Optical Studies Based on *HST*, *IUE*, and CTIO Observations. *Robert P. Kirshner, David J. Jeffery, Bruno Leibundgut, Peter M. Challis, George Sonneborn, M. M. Phillips, N. B. Suntzeff, R. Chris Smith, P. Frank Winkler, Cláudia Winge, Mario Hamuy, Deidre A. Hunter, Katherine C. Roth, J. C. Blades, David Branch, Roger A. Chevalier, Claes Fransson, Nino Panagia, Robert V. Wagoner, J. Craig Wheeler, & Robert P. Harkness.* 415, 589, 195-B10 (1993)

Spectrum Synthesis of the Type Ia Supernovae SN 1992A and SN 1981B. *Peter Nugent, E. Baron, Peter H. Hauschildt, & David Branch.* 441, L33, 67-A1 (1995)

Evidence for a Spectroscopic Sequence among Type Ia Supernovae. *Peter Nugent, Mark Phillips, E. Baron, David Branch, & Peter Hauschildt.* 455, L147, 334-B4 (1995)

Alphanumeric: SN 1992bc

SN 1992bc and SN 1992bo: Evidence for Intrinsic Differences in Type Ia Supernova Luminosities. *José Maza, Mario Hamuy, M. M. Phillips, N. B. Suntzeff, & R. Avilés.* 424, L107, 79-C2 (1994)

Alphanumeric: SN 1992bo

SN 1992bc and SN 1992bo: Evidence for Intrinsic Differences in Type Ia Supernova Luminosities. *José Maza, Mario Hamuy, M. M. Phillips, N. B. Suntzeff, & R. Avilés.* 424, L107, 79-C2 (1994)

Alphanumeric: SN 1992bi

A Supernova at $z = 0.458$ and Implications for Measuring the Cosmological Deceleration. *S. Perlmutter, C. R. Pennypacker, G. Goldhaber, A. Goobar, R. A. Muller, H. J. M. Newberg, J. Desai, A. G. Kim, M. Y. Kim, I. A. Small, B. J. Boyle, C. S. Crawford, R. G. McMahon, P. S. Bunclark, D. Carter, M. J. Irwin, R. J. Terlevich, R. S. Ellis, K. Glazebrook, W. J. Couch, J. R. Mould, T. A. Small, & R. G. Abraham.* 440, L41, 57-C1 (1995)

Alphanumeric: SN 1993J

Spectropolarimetry of SN 1993J in NGC 3031. *Susan R. Trammell, Dean C. Hines, & J. Craig Wheeler.* 414, L21, 175-E2 (1993)

Type II Supernovae from 8–10 $M_\odot$ Asymptotic Giant Branch Stars. *Masaaki Hashimoto, Kohichi Iwamoto, & Ken'ichi Nomoto.* 414, L105, 186-A1 (1993)

The "Type IIb" Supernova 1993J in M81: A Close Relative of Type Ib Supernovae. *Alexei V. Filippenko, Thomas Matheson, & Luis C. Ho.* 415, L103, 200-A8 (1993)

Interpretation of the Early Spectra of SN 1993J in M81. *E. Baron, P. H. Hauschildt, D. Branch, R. M. Wagner, S. J. Austin, A. V. Filippenko, & T. Matheson.* 416, L21, 207-D2 (1993)

Early Observations of SN 1993J in M81 at McDonald Observatory. *J. C. Wheeler, E. Barker, R. Benjamin, J. Boisseau, A. Clocchiatti, G. de Vaucouleurs, N. Gaffney, R. P. Harkness, A. M. Khokhlov, D. F. Lester, B. J. Smith, V. V. Smith, & J. Tomkin.* 417, L71, 230-C9 (1993)

Hydrodynamical Models for X-Ray Emissions from SN 1993J in M81. *Tomoharu Suzuki, Shiomi Kumagai, Toshikazu Shigeyama, Ken'ichi Nomoto, Hitoshi Yamaoka, & Hideyuki Saio.* 419, L73, 259-D11 (1993)

Theoretical Light Curves of Type IIb Supernova 1993J. *Toshikazu Shigeyama, Tomoharu Suzuki, Shiomi Kumagai, Ken'ichi Nomoto, Hideyuki Saio, & Hitoshi Yamaoka.* 420, 341, 5-B5 (1994)

A *Hubble Space Telescope* Ultraviolet Spectrum of SN 1993J. *David J. Jeffery, Robert P. Kirshner, Peter M. Challis, Chun S. J. Pun, Alexei V. Filippenko, Thomas Matheson, David Branch, Roger A. Chevalier, Claes Fransson, Nino Panagia, Robert V. Wagoner, J. Craig Wheeler, & Alejandro Clocchiatti.* 421, L27, 21-F9 (1994)

Radio-Size Estimates of SN 1993J. *J. M. Marcaide, A. Alberdi, P. Elósegui, J. C. Guirado, F. Mantovani, E. Pérez, M. I. Ratner, A. Rius, A. E. E. Rogers, B. P. Schmidt, I. I. Shapiro, & A. R. Whitney.* 424, L25, 69-D6 (1994)

Modeling and Interpretation of the Optical and *HST* UV Spectrum of SN 1993J. *E. Baron, P. H. Hauschildt, & D. Branch.* 426, 334, 100-C11 (1994)

SN 1993J: A Type IIb Supernova. *S. E. Woosley, Ronald G. Eastman, Thomas A. Weaver, & Philip A. Pinto.* 429, 300, 147-F13 (1994)

Hard X-Rays from SN 1993J. *M. D. Leising, J. D. Kurfess, D. D. Clayton, D. A. Grabelsky, J. E. Grove, W. N. Johnson, G. V. Jung, R. L. Kinzer, R. A. Kroeger, W. R. Purcell, M. S. Strickman, L.-S. The, & M. P. Ulmer.* 431, L95, 191-F1 (1994)

SN 1993J: The Early Radio Emission and Evidence for a Changing Presupernova Mass-Loss Rate. *Schuyler D. Van Dyk, Kurt W. Weiler, Richard A. Sramek, Michael P. Rupen, & Nino Panagia.* 432, L115, 207-A9 (1994)

SN 1994I in M51 and the Nature of Type Ibc Supernovae. *J. C. Wheeler, R. P. Harkness, A. Clocchiatti, S. Benetti, M. S. Brotherton, D. L. DePoy, & J. Elias.* 436, L135, 281-C1 (1994)

Remarks on the Polarization Observed in SN 1993J. *Peter Höflich.* 440, 821, 54-D4 (1995)

Non-LTE Spectral Analysis and Model Constraints on SN 1993J. *E. Baron, P. H. Hauschildt, D. Branch, S. Austin, P. Garnavich, Hong Bae Ann, R. M. Wagner, A. V. Filippenko, T. Matheson, & James Liebert.* 441, 170, 61-F8 (1995)

Spectrophotometric Study of SN 1993J at First Maximum Light. *A. Clocchiatti, J. C. Wheeler, E. S. Barker, A. V. Filippenko, T. Matheson, & J. W. Liebert.* 446, 167, 155-E3 (1995)

Light Curve Studies of SN 1993J and SN 1994I. *Timothy R. Young, E. Baron, & David Branch.* 449, L51, 216-G4 (1995)

X-Rays from SN 1993J and Structures of Ejecta and Circumstellar Medium. *Tomoharu Suzuki & Ken'ichi Nomoto.* 455, 658, 331-A8 (1995)

Alphanumeric: SN 1994D

Analysis of the Type Ia Supernova SN 1994D. *P. Höflich.* 443, 89, 96-D9 (1995)

Probing the Interstellar Medium along the Lines of Sight to SN 1994D and SN 1994I. *Luis C. Ho & Alexei V. Filippenko.* 444, 165, 115-E13 (1995)

Evidence for a Spectroscopic Sequence among Type Ia Supernovae. *Peter Nugent, Mark Phillips, E. Baron, David Branch, & Peter Hauschildt.* 455, L147, 334-B4 (1995)

Alphanumeric: SN 1994I

SN 1994I in M51 and the Nature of Type Ibc Supernovae. *J. C. Wheeler, R. P. Harkness, A. Clocchiatti, S. Benetti, M. S. Brotherton, D. L. DePoy, & J. Elias.* 436, L135, 281-C1 (1994)

Theoretical Light Curves for the Type Ic Supernova SN 1994I. *Kohichi Iwamoto, Ken'ichi Nomoto, Peter Höflich, Hitoshi Yamaoka, Shiomi Kumagai, & Toshikazu Shigeyama.* 437, L115, 299-C8 (1994)

Probing the Interstellar Medium along the Lines of Sight to SN 1994D and SN 1994I. *Luis C. Ho & Alexei V. Filippenko.* 444, 165, 115-E13 (1995)

Light Curve Studies of SN 1993J and SN 1994I. *Timothy R. Young, E. Baron, & David Branch.* 449, L51, 216-G4 (1995)

The Type Ic Supernova 1994I in M51: Detection of Helium and Spectral Evolution. *Alexei V. Filippenko, Aaron J. Barth, Thomas Matheson, Lee Armus, Michael Brown, Brian R. Espey, Xiao-Ming Fan, Robert W. Goodrich, Luis C. Ho, Vesa T. Junkkarinen, David C. Koo, Matthew D. Lehnert, André R. Martel, Joseph M. Mazzarella, Joseph S. Miller, Graeme H. Smith, David Tytler, & Gregory D. Wirth.* 450, L11, 235-E3 (1995)

STARS: SYMBIOTIC

AG Pegasi: A Multishell Radio Source. *H. T. Kenny, A. R. Taylor, & E. R. Seaquist.* 366, 549, 9-G7 (1991)

Energy Distributions of Symbiotic Novae. *Greg L. Bryan & Sun Kwok.* 368, 252, 26-C1 (1991)

First Results from the Faint Object Camera: Imaging the Core of R Aquarii. *F. Paresce, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 369, L67, 46-B7 (1991)

Narrow-Band Imaging of the Inner R Aquarii Nebula: Further Evidence for Shock Excitation. *Denis Burgarella & Francesco Paresce.* 370, 590, 55-G1 (1991)

Observations of the Peculiar Object MWC 560 in Outburst. *A. G. Michalitsianos, S. P. Maran, R. J. Oliversen, B. Bopp, E. Kontizas, A. Dapergolas, & M. Kontizas.* 371, 761, 71-A7 (1991)

The Ultraviolet Spectrum of KX Trianguli Australis. *Walter A. Feibelman.* 375, 335, 115-A12 (1991)

STARS: RV TAURI

Classical Cepheids with RV Tauri Characteristics? *Pawel Moskalik & J. Robert Buchler.* 366, 300, 4-F12 (1991)

Period Changes and Evolution in RV Tauri Stars. *John R. Percy, Dimitar D. Sasselov, Amy Alfred, & Greg Scott.* 375, 691, 121-C7 (1991)

STARS: W URSAE MAJORIS

Analysis and Solution of the Light and Radial Velocity Curves of the Contact Binary TY Bootis. *E. F. Milone, G. Groisman, D. J. I. Fry, & D. H. Bradstreet.* 370, 677, 56-G5 (1991)

The Ultraviolet Light Curves of W Ursae Majoris. *Albert P. Linnell.* 379, 338, 167-C3 (1991)

STARS: VARIABLES

A Search for Periodicities in the X-Ray Emission from Cataclysmic Variables. *Michael Eracleous, Joseph Patterson, & Jules Halpern.* 370, 330, 51-D1 (1991)

Gravitational Microlensing of the Galactic Bulge Stars. *B. Paczyński.* 371, L63, 73-C4 (1991)

Nonlinear Evolution of Accretion Disks Induced by Radiative Feedback Processes. *K. R. Bell, D. N. C. Lin, & Steven P. Ruden.* 372, 633, 83-E7 (1991)

The Extraordinary 1989 December 14/15 Optical Flare Events on V711 Tauri. *Gregory W. Henry & Douglas S. Hall.* 373, L9, 91-B7 (1991)

Gravitational Microlensing by Double Stars and Planetary Systems. *Shude Mao & Bohdan Paczyński.* 374, L37, 110-B11 (1991)

Shot Model Parameters for Cygnus X-1 through Phase Portrait Fitting. *James C. Lochner, J. H. Swank, & A. E. Szymkowiak.* 376, 295, 128-E9 (1991)

A Detection of the Evolutionary Time Scale of the DA White Dwarf G117-B15A with the Whole Earth Telescope. *S. O. Kepler, D. E. Winget, R. E. Nather, P. A. Bradley, A. D. Grauer, G. Fontaine, P. Bergeron, G. Vauclair, C. F. Claver, T. M. K. Marar, S. Seetha, B. N. Ashoka, T. Mazeh, E. Leibowitz, N. Dolez, M. Chevreton, M. A. Barstow, J. C. Clemens, S. J. Kleinman, A. E. Sansom, R. W. Tweedy, A. Kanaan, B. P. Hine, J. L. Provencal, F. Wesemael, M. A. Wood, P. Brassard, J.-E. Solheim, & P.-I. Emanuelsen.* 378, L45, 162-E7 (1991)

Excitation of the Hydroxyl Maser in OH/IR Stars. *Dale F. Dickinson.* 379, L29, 169-C11 (1991)

A Connection between Long-Term Luminosity Variations and Orbital Period Changes in Chromospherically Active Binaries. *Douglas S. Hall.* 380, L85, 188-F1 (1991)

Masses of RR*d* Variables Using Livermore OPAL Opacities. *Arthur N. Cox.* 381, L71, 199-F1 (1991)

High-Speed Multicolor Photometry of V834 Centaurus. *John Middleditch, James N. Imamura, Michael T. Wolff, & Thomas Y. Steiman-Cameron.* 382, 315, 204-B1 (1991)

STARS: VARIABLES: CEPHEIDS

A Magnitude-limited Survey of Cepheid Companions in the Ultraviolet. *Nancy Remage Evans.* 384, 220, 3-F4 (1992)

On the Mass Discrepancy of the Cepheid Stars. *C. Chiosi, P. R. Wood, G. Bertelli, A. Bressan, & M. Mateo.* 385, 205, 14-E1 (1992)

The Luminosity of the Double-Mode Cepheid Y Carinae. *Nancy Remage Evans.* 385, 680, 21-E6 (1992)

Toward a Resolution of the Bump and Beat Cepheid Mass Discrepancies. *Paweł Moskalik, J. Robert Buchler, & Ariel Marom.* 385, 685, 21-E13 (1992)

Luminosity–Line Width Relations and the Extragalactic Distance Scale. I. Absolute Calibration. *Michael J. Pierce & R. Brent Tully.* 387, 47, 37-E8 (1992)

On the Instability Strip of the Cepheid Stars. *C. Chiosi, P. Wood, G. Bertelli, & A. Bressan.* 387, 320, 41-A1 (1992)

New Calibrators for the Cepheid Period-Luminosity Relation. *Nancy Remage Evans.* 389, 657, 69-E8 (1992)

The Chemical Composition of Magellanic Cloud Cepheids and Nonvariable Supergiants. *R. Earle Luck & David L. Lambert.* 79, 303, 18-E3 (1992)

Pulsational Study of BL Herculis Models. I. Radial Velocities. *J. Robert Buchler & Paweł Moskalik.* 391, 736, 97-B6 (1992)

An Opacity Mechanism for the Pulsations of OB Stars. *Arthur N. Cox, Siobahn M. Morgan, Forrest J. Rogers, & Carlos A. Iglesias.* 393, 272, 117-E3 (1992)

The Discovery of an Extremely Low Amplitude Cepheid? *R. Paul Butler.* 394, L25, 133-D5 (1992)

New Cepheid Distances to Nearby Galaxies Based on *BVRI* CCD Photometry. III. NGC 300. *Wendy L. Freedman, Barry F. Madore, S. L. Hawley, Irwin K. Horowitz, Jeremy Mould, Mauricio Navarrete, & Shauna Sallmen.* 396, 80, 156-A13 (1992)

The Cepheid Distance to IC 4182: Calibration of M_V(max) for SN Ia 1937C and the Value of H_0. *Allan Sandage, A. Saha, G. A. Tammann, Nino Panagia, & D. Macchetto.* 401, L7, 227-B1 (1992)

Absorption-Line Profiles in a Companion Spectrum of a Mass-losing Cool Supergiant. *Liliya L. Rodrigues & Erika Böhm-Vitense.* 401, 695, 231-B10 (1992)

A Distance to the Cepheid HV 829 in the Small Magellanic Cloud. *Thomas G. Barnes III, Thomas J. Moffett, & Wolfgang P. Gieren.* 405, L51, 54-B11 (1993)

Pulsational Study of BL Herculis Models. II. Light Curves. *Paweł Moskalik & J. Robert Buchler.* 406, 190, 57-D8 (1993)

A Search for OB Associations near Southern Long-Period Cepheids. IV. XY Carinae, GT Carinae, WZ Sagittarii, and SW Velorum. *David G. Turner, Sidney van den Bergh, P. Frank Younger, T. A. Danks, & Douglas Forbes.* 85, 119, 7-E5 (1993)

Theoretical Models of Cepheid Variables and Their BVI_C Colors and Magnitudes. *C. Chiosi, P. R. Wood, & N. Capitanio.* 86, 541, 21-E11 (1993)

The Distance to the Large Magellanic Cloud: Constraints from Cepheids in Large Magellanic Cloud Star Clusters. *Gianpaolo Bertelli, Alessandro Bressan, Cesare Chiosi, Mario Mateo, & Peter R. Wood.* 412, 160, 144-A13 (1993)

On Cepheids at Maximum and Minimum Light. *Norman R. Simon, Shashi M. Kanbur, & Dimitri Mihalas.* 414, 310, 173-G5 (1993)

Cepheid Velocity Curves from Lines of Different Excitation and Ionization. I. Observations. *R. Paul Butler.* 415, 323, 189-A7 (1993)

Goodbye to Polaris the Cepheid. *J. D. Fernie, Karl W. Kamper, & S. Seager.* 416, 820, 213-F1 (1993)

The Tip of the Red Giant Branch as a Distance Indicator for Resolved Galaxies. *Myung Gyoon Lee, Wendy L. Freedman, & Barry F. Madore.* 417, 553, 226-B13 (1993)

The Cepheid Period-Luminosity Relation from Independent Distances of 100 Galactic Variables. *Wolfgang P. Gieren, Thomas G. Barnes III, & Thomas J. Moffett.* 418, 135, 232-F10 (1993)

Are the Cepheids in IC 4182 Different from Population I Cepheids in the Galaxy? *Norman R. Simon & Christine M. Clement.* 419, L21, 252-D3 (1993)

Emission Lines in the Long-Period Cepheid *l* Carinae. *Erika Böhm-Vitense & Stanley G. Love.* 420, 401, 5-G5 (1994)

Comparative Pulsation Calculations with OP and Opal Opacities. *Shashi M. Kanbur & Norman R. Simon.* 420, 880, 13-G5 (1994)

A New Method of Spectral Analysis of Unevenly Spaced Astrophysical Data. I. The Single-Period Case. *F. Barone, L. Milano, & G. Russo.* 421, 284, 19-E1 (1994)

The Cepheid Distance to NGC 5253: Calibration of M(max) for the Type I Supernovae SN 1972E and SN 1895B. *Allan Sandage, A. Saha, G. A. Tammann, Lukas Labhardt, Hans Schwengler, N. Panagia, & F. D. Macchetto.* 423, L13, 53-C5 (1994)

The He I λ10830 Line in Classical Cepheids. I. Observations. *Dimitar D. Sasselov & John B. Lester.* 423, 777, 58-C11 (1994)

The He I λ10830 Line in Classical Cepheids. II. Mechanism of Formation. *Dimitar D. Sasselov & John B. Lester.* 423, 785, 58-D7 (1994)

The Chromospheric Structure of Classical Cepheids: Constraints from the He I λ10830 Line. *Dimitar D. Sasselov & John B. Lester.* 423, 795, 58-E6 (1994)

Analysis of *Voyager* Spectra of the β Cephei Star ν Eridani. *A. Porri, R. Stalio, B. Ali, R. S. Polidan, & C. Morossi.* 424, 401, 66-G7 (1994)

Discovery of Cepheids in IC 4182: Absolute Peak Brightness of SN Ia 1937C and the Value of H_0. *A. Saha, Lukas Labhardt, Hans Schwengeler, F. D. Macchetto, N. Panagia, Allan Sandage, & G. A. Tammann.* 425, 14, 80-C6 (1994)

The Metallicity Dependence of Inferred Cepheid Distances. *Andrew Gould.* 426, 542, 105-B7 (1994)

The *Hubble Space Telescope* Extragalactic Distance Scale Key Project. I. The Discovery of Cepheids and a New Distance to M81. *Wendy L. Freedman, Shaun M. Hughes, Barry F. Madore, Jeremy R. Mould, Myung Gyoon Lee, Peter Stetson, Robert C. Kennicutt, Anne Turner, Laura Ferrarese, Holland Ford, John A. Graham, Robert Hill, John G. Hoessel, John Huchra, & Garth D. Illingworth.* 427, 628, 120-E4 (1994)

The *Hubble Space Telescope* Extragalactic Distance Scale Key Project. II. Photometry of WFC Images of M81. *Shaun M. G. Hughes, Peter B. Stetson, Anne Turner, Robert C. Kennicutt, Jr., Robert Hill, Myung Gyoon Lee, Wendy L. Freedman, Jeremy R. Mould, Barry F. Madore, Laura Ferrarese, Holland C. Ford, John A. Graham, John G. Hoessel, & Garth D. Illingworth.* 428, 143, 130-A5 (1994)

Opacity, Metallicity, and Cepheid Period Ratios in the Galaxy and Magellanic Clouds. *Norman R. Simon & Shashi M. Kanbur.* 429, 772, 155-C8 (1994)

Color Excesses for Classical Cepheids from *BV* Photometry. *J. D. Fernie.* 429, 844, 156-B9 (1994)

On Cepheid Diameter and Distance Measurement. *Dimitar D. Sasselov & Margarita Karovska.* 432, 367, 197-F6 (1994)

The Distance to the Large Magellanic Cloud Cluster NGC 1866 from Its Cepheid Members. *Wolfgang P. Gieren, Tom Richtler, & Michael Hilker.* 433, L73, 223-F13 (1994)

First *Hubble Space Telescope* Observations of the Brightest Stars in the Virgo Galaxy M100 = NGC 4321. *Wendy L. Freedman, Barry F. Madore, Peter B. Stetson, Shaun M. G. Hughes, Jon A. Holtzman, Jeremy R. Mould, John T. Trauger, John S. Gallagher III, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Laura Ferrarese, Holland Ford, J. A. Graham, Richard E. Griffiths, J. Jeff Hester, Robert Hill, John G. Hoessel, John Huchra, Robert C. Kennicutt, Paul A. Scowen, Bill Sparks, Karl R. Stapelfeldt, Alan M. Watson, & Jim Westphal.* 435, L31, 251-G9 (1994)

Classical Cepheids with Terminal Age Main-Sequence Companions: Constraints on Evolution. *Nancy Remage Evans.* 436, 273, 265-A12 (1994)

The Distance to the Pegasus Dwarf Irregular Galaxy: An Open Question. *A. Aparicio.* 437, L27, 291-E6 (1994)

Discovery of Cepheids in NGC 5253: Absolute Peak Brightness of SN Ia 1895B and SN Ia 1972E and the Value of H_0. *A. Saha, Allan Sandage, Lukas Labhardt, Hans Schwengeler, G. A. Tammann, N. Panagia, & F. D. Macchetto.* 438, 8, 1-C12 (1995)

The Mass Ratios of Cepheid Binaries. *Nancy Remage Evans.* 445, 393, 138-A1 (1995)

On the Discrepancy between the Cepheid and RR Lyrae Distance Scales. *Sidney van den Bergh.* 446, 39, 153-F3 (1995)

On Spectral Line Formation and Measurement in Cepheids: Implications to Distance Determination. *C. N. Sabbey, D. D. Sasselov, M. S. Fieldus, J. B. Lester, K. A. Venn, & R. P. Butler.* 446, 250, 156-F2 (1995)

The Location of Stellar Clusters in the Big Dent: An Age Gradient along the Z-Axis. *Jesús Cabrera-Caño, Edmundo Moreno, José Franco, & Emilio J. Alfaro.* 448, 149, 194-B11 (1995)

Long-Period Cepheids: Models and Observations. *Norman R. Simon & Shashi M. Kanbur.* 451, 703, 256-G10 (1995)

Empirical Approach to Cepheid Period-Luminosity-Color and Period-Luminosity Relations by Surface Brightness. *G. P. Di Benedetto.* 452, 195, 264-F7 (1995)

STARS: VARIABLES: OTHER

Maximum Rates of Period Change for DA White Dwarf Models with Carbon and Oxygen Cores. *P. A. Bradley, D. E. Winget, & M. A. Wood.* 391, L33, 92-C1 (1992)

Pulsational Study of BL Herculis Models. I. Radial Velocities. *J. Robert Buchler & Pawel Moskalik.* 391, 736, 97-B6 (1992)

Constraints on the Galactic Bulge Using *IRAS* Variable Point Sources. *Martin D. Weinberg.* 392, L67, 113-C10 (1992)

The Structure of Horizontal-Branch Models. I. The Zero-Age Horizontal Branch. *Ben Dorman.* 80, 701, 33-B5 (1992)

Long-Term Variability in Low-Mass X-Ray Binaries: A Study Using Data from *Vela 5B*. *Alan P. Smale & James C. Lochner.* 395, 582, 150-B13 (1992)

Discovering Planetary Systems through Gravitational Microlenses. *Andrew Gould & Abraham Loeb.* 396, 104, 156-D6 (1992)

X-Ray Variability of Scorpius X-1 during a Multiwavelength Campaign. *P. Hertz, B. Vaughan, K. S. Wood, J. P. Norris, K. Mitsuda, P. F. Michelson, & T. Dotani.* 396, 201, 157-E12 (1992)

S-154 in the Large Magellanic Cloud: Spectral Evolution from a Luminous Fe II Variable to a Symbiotic-like Star. *R. A. Remillard, E. Rosenthal, I. R. Tuohy, D. A. Schwartz, D. A. H. Buckley, & R. J. V. Brissenden.* 396, 668, 165-F1 (1992)

γ Cephei: Rotation or Planetary Companion? *Gordon A. H. Walker, David A. Bohlender, Andrew R. Walker, Alan W. Irwin, Stephenson L. S. Yang, & Ana Larson.* 396, L91, 167-D1 (1992)

Variation in the Near-Infrared Surface Brightness Distribution of the Bipolar Nebula OH 231.8+4.2. *Joel H. Kastner, David A. Weintraub, B. Zuckerman, E. E. Becklin, I. McLean, & I. Gatley.* 398, 552, 191-A8 (1992)

M31: A Unique Laboratory for Gravitational Microlensing. *Arlin P. S. Crotts.* 399, L43, 200-D11 (1992)

Periodic Photometric Variability of the Black Hole Binary V404 Cygni. *R. Mark Wagner, T. J. Kreidl, S. B. Howell, & S. G. Starrfield.* 401, L97, 233-C13 (1992)

Oxygen-rich Semiregular and Irregular Variables. *M. Jura & S. G. Kleinmann.* 83, 329, 62-D5 (1992)

A Model for the Dramatic Decline of FG Sagittae. *Icko Iben, Jr., & Mario Livio.* 406, L15, 60-F8 (1993)

Dynamical Instability as the Cause of the Massive Outbursts in η Carinae and Other Luminous Blue Variables. *Richard B. Stothers & Chao-wen Chin.* 408, L85, 95-C5 (1993)

IRAS Variables as Galactic Structure Tracers: Classification of the Bright Variables. *L. E. Allen, S. G. Kleinmann, & M. D. Weinberg.* 411, 188, 129-D11 (1993)

Pumping of Main Line OH Masers in the Circumstellar Envelopes of Type I Mira Variables. *Alan J. Collison & Gerald E. Nedoluha.* 413, 735, 165-E10 (1993)

Detection, Identification, and Observed Properties of Large Magellanic Cloud Supersoft X-Ray Sources. *A. P. Cowley, P. C. Schmidtke, J. B. Hutchings, D. Crampton, & T. K. McGrath.* 418, L63, 245-B13 (1993)

Modeling Light Curves of Spotted Stars. *Zeki Eker.* 420, 373, 5-E1 (1994)

Luminous Blue Variables at Quiescence: The Zone of Avoidance in the Hertzsprung-Russell Diagram. *Richard B. Stothers & Chao-wen Chin.* 426, L43, 103-E13 (1994)

An Optical Transient Camera for the *INTEGRAL* Mission. *A. Smith, R. A. Gowen, R. Long, B. McBreen, J. M. Mas-Hesse, & C. Miravet.* 92, 333, 36-C3 (1994)

Another Look at the *UBV* Variability of T Tauri Stars. *Pedro N. Safier.* 444, 818, 127-F12 (1995)

Search for an Optical Counterpart of the Source of GRB 911001. *S. Klose.* 446, 357, 158-B6 (1995)

RR Lyrae Variable Stars: Pulsational Constraints Relevant to the Oosterhoff Controversy. *Giuseppe Bono, Filippina Caputo, Vittorio Castellani, & Marcella Marconi.* 448, L115, 209-E3 (1995)

Astronomical Time Series Analysis. I. A Search for Periodicity Using Information Entropy. *Pablo M. Cincotta, Mariano Méndez, & Josué A. Núñez.* 449, 231, 213-D2 (1995)

Gravitational Microlensing by Random Motion of Stars: Analysis of Light Curves. *Joachim Wambsganss & Tomislav Kundić.* 450, 19, 228-C11 (1995)

Discovery of Strong Vibrationally Excited Water Masers at 658 GHz toward Evolved Stars. *Karl M. Menten & Ken Young.* 450, L67, 244-G8 (1995)

A Period-Luminosity Relation for the Slow Variations of Luminous Blue Variables. *Richard B. Stothers & Chao-wen Chin.* 451, L61, 260-E7 (1995)

Are the Luminosities of RR Lyrae Stars Affected by Second Parameter Effects? *Sidney van den Bergh.* 451, L65, 260-F1 (1995)

A New Magnetic Cataclysmic Variable: WGA J1047.1+6335. *K. P. Singh, P. Szkody, P. Barrett, N. E. White, E. Fierce, A. Silber, D. W. Hoard, P. J. Hakala, V. Piirola, & K. Sohl.* 453, L95, 298-F4 (1995)

HD 98800

Optical Variability in the Unusual K5 V Infrared-Excess Star HD 98800. *Gregory W. Henry & Douglas S. Hall.* 425, L25, 85-D9 (1994)

R Coronae Borealis

Observations of R Coronae Borealis Stars in Decline: Empirical Arguments for Dust Formation near the Stellar Surface. *Geoffrey C. Clayton, Barbara A. Whitney, S. Adam Stanford, & John S. Drilling.* 397, 652, 179-B10 (1992)

An Ultraviolet and Visible Spectroscopic Study of a Pulsational Cycle of RY Sagittarii. *Geoffrey C. Clayton, W. A. Lawson, P. L. Cottrell,*

Barbara A. Whitney, S. Adam Stanford, & Frank de Ruyter. 432, 785, 205-F13 (1994)

AM Herculis

RJ 051542+0104.7: A New Magnetic, Eclipsing, Cataclysmic Variable. *Peter M. Garnavich, Paula Szkody, Russell M. Robb, David R. Zurek, & D. W. Hoard.* 435, L141, 260-C11 (1994)

RX J0515.6+0105: An Unusual, Eclipsing, Magnetic Cataclysmic Variable. *A. W. Shafter, K. Reinsch, K. Beuermann, K. A. Misselt, D. A. H. Buckley, V. Burwitz, & A. D. Schwope.* 443, 319, 99-E8 (1995)

BL Herculis

Pulsational Study of BL Herculis Models. II. Light Curves. *Paweł Moskalik & J. Robert Buchler.* 406, 190, 57-D8 (1993)

FU Orionis

Molecular Outflows from FU Orionis Stars. *Neal J. Evans II, Stephen Balkum, Russell M. Levreault, Lee Hartmann, & Scott Kenyon.* 424, 793, 74-F2 (1994)

Using FU Orionis Outbursts to Constrain Self-regulated Protostellar Disk Models. *K. R. Bell & D. N. C. Lin.* 427, 987, 125-A1 (1994)

The FU Orionis Outburst as a Thermal Accretion Event: Observational Constraints for Protostellar Disk Models. *K. R. Bell, D. N. C. Lin, L. W. Hartmann, & S. J. Kenyon.* 444, 376, 118-F8 (1995)

Long-Period Variables

Short- and Intermediate-Period Oxygen-rich Miras. *M. Jura & S. G. Kleinmann.* 79, 105, 14-D3 (1992)

Long-Period Oxygen-rich Optical Miras in the Solar Neighborhood. *M. Jura, A. Yamamoto, & S. G. Kleinmann.* 413, 298, 160-A2 (1993)

The Origin and Evolution of Short-Period Miras in the Solar Neighborhood: Constraints on the Life Cycle of Old Stars. *M. Jura.* 422, 102, 31-C12 (1994)

VLA Positions and Distributions of H_2O Masers Associated with 15 Mira and Semiregular Variables. *P. F. Bowers & K. J. Johnston.* 92, 189, 33-G8 (1994)

Evolution of Hα Emission Profiles in S-Type Mira Stars. *Andrew W. Woodsworth.* 444, 396, 119-A4 (1995)

A CO(3–2) Survey of Nearby Mira Variables. *K. Young.* 445, 872, 147-C1 (1995)

Detection of Ammonia Emission toward Oxygen-rich Evolved Stars. *Karl M. Menten & Javier Alcolea.* 448, 416, 197-G10 (1995)

Luminous Blue Variables

A New Luminous Blue Variable: R143 in 30 Doradus. *Joel Wm. Parker, Geoffrey C. Clayton, Cláudia Winge, & Peter S. Conti.* 409, 770, 108-F3 (1993)

Sudden Luminous Blue Variable–Like Behavior of the Wolf-Rayet Binary System HD 5980 in the Small Magellanic Cloud. *Rodolfo H. Barbá, Virpi S. Niemela, Gustavo Baume, & R. A. Vazquez.* 446, L23, 160-D13 (1995)

Nebulae around Luminous Blue Variables: A Unified Picture. *Antonella Nota, Mario Livio, Mark Clampin, & Regina Schulte-Ladbeck.* 448, 788, 205-E11 (1995)

Ultraviolet Observations of the Eruption in the Small Magellanic Cloud Wolf-Rayet System HD 5980. *Gloria Koenigsberger, Ed Guinan, Lawrence Auer, & Leonid Georgiev.* 452, L107, 279-G11 (1995)

RR Lyrae

A VLA 3.6 Centimeter Survey of N-Type Carbon Stars. *Donald G. Luttermoser & Alexander Brown.* 384, 634, 10-A7 (1992)

The Continuum Eclipse of PSR 1957+20. *A. S. Fruchter & W. M. Goss.* 384, L47, 11-C9 (1992)

Radial Velocities of Carbon Stars: CO versus Optical Measurements. *Cecilia Barnbaum.* 385, 694, 21-F10 (1992)

The Baade-Wesselink Method and the Distances to RR Lyrae Stars. VII. The Field Stars SW Andromedae and DX Delphini and a Comparison of Recent Baade-Wesselink Analyses. *Rodney V. Jones, Bruce W. Carney, Jesper Storm, & David W. Latham.* 386, 646, 33-C14 (1992)

The Baade-Wesselink Method and the Distances to RR Lyrae Stars. VIII. Comparisons with Other Techniques and Implications for Globular Cluster Distances and Ages. *Bruce W. Carney, Jesper Storm, & Rodney V. Jones.* 386, 663, 33-E5 (1992)

Evolution versus Pulsation along the Horizontal Branch of M15. *Norman R. Simon.* 387, 162, 39-A3 (1992)

Hard X-Ray Imaging of the Galactic Black Hole Candidate GX 339−4. *C. E. Covault, J. E. Grindlay, & R. P. Manandhar.* 388, L65, 59-C12 (1992)

1612 MHz OH Maser Emission from Axisymmetric Circumstellar Envelopes: Miras. *Alan J. Collison & John D. Fix.* 390, 191, 76-C13 (1992)

Location of the Dust Formation Region for Mira Variables. *P. F. Bowers.* 390, L27, 78-E1 (1992)

The Absolute Magnitudes of LMC RR Lyrae Variables and the Ages of Galactic Globular Clusters. *Alistair R. Walker.* 390, L81, 85-A7 (1992)

The Discovery of a New DAV Star Using *IUE* Temperature Determination. *A. Kanaan, S. O. Kepler, O. Giovannini, & M. Diaz.* 390, L89, 85-B7 (1992)

Ages of Globular Clusters and Helium Diffusion. *Brian Chaboyer, Ata Sarajedini, & Pierre Demarque.* 394, 515, 135-F12 (1992)

An RR Lyrae Period Shift in Terms of the Fourier Parameter ϕ_{31}. *Christine M. Clement, Michael Jankulak, & Norman R. Simon.* 395, 192, 142-E9 (1992)

On the Absolute Magnitude of RR Lyrae Stars: UU Ceti, RV Phoenicis, and W Tucanae. *C. Cacciari, G. Clementini, & J. A. Fernley.* 396, 219, 157-G5 (1992)

Intensive High-Precision Photometric Monitoring of the Variable WN6 Wolf-Rayet Star HD 191765. *I. I. Antokhin, T. R. Irsmambetova, A. F. J. Moffat, A. M. Cherepashchuk, & S. V. Marchenko.* 82, 395, 54-G9 (1992)

On Nonlinear Radial Oscillations in Convective RR Lyrae Stars. I. The Mathematical Description. *Michael Gehmeyr.* 399, 265, 198-E1 (1992)

On Nonlinear Radial Oscillations in Convective RR Lyrae Stars. II. Comparison of a Radiative and a Convective Model. *Michael Gehmeyr.* 399, 272, 198-E11 (1992)

The Baade-Wesselink Method Applied to RR Lyrae Variables in the Globular Clusters M5 and M92. *J. G. Cohen.* 400, 528, 216-G11 (1992)

The Galactic Globular Cluster System: Empirical Relationship between Light-to-Mass Ratio and Metallicity. *Filippina Caputo & Renato De Santis.* 401, 260, 224-C1 (1992)

Stellar Evolution as a Probe of Neutrino Properties. *V. Castellani & S. Degl'Innocenti.* 402, 574, 9-F7 (1993)

Double-Mode Pulsations in Radiative RR Lyrae Models. *Géza Kovács & J. Robert Buchler.* 404, 765, 38-D9 (1993)

A Provisional RR Lyrae Distance Scale. *Norman R. Simon & Christine M. Clement.* 410, 526, 120-C1 (1993)

The Effect of Livermore Opal Opacities on the Evolutionary Masses of RR Lyrae Stars. *Sukyoung Yi, Young-Wook Lee, & Pierre Demarque.* 411, L25, 133-G8 (1993)

The RR Lyrae Variables in the Globular Cluster M68. *Christine M. Clement, Stephen Ferance, & Norman R. Simon.* 412, 183, 144-C13 (1993)

On Nonlinear Radial Oscillations in Convective RR Lyrae Stars. III. A Full-Amplitude Investigation of the Red Edge. *Michael Gehmeyr.* 412, 341, 146-D1 (1993)

Comparative Pulsation Calculations with OP and Opal Opacities. *Shashi M. Kanbur & Norman R. Simon.* 420, 880, 13-G5 (1994)

Oosterhoff Dichotomy in the Galaxy and Globular Clusters in the Large Magellanic Cloud. *Giuseppe Bono, Filippina Caputo, & Robert F. Stellingwerf.* 423, 294, 49-F8 (1994)

Mass Loss during the RR Lyrae Phase of the Horizontal Branch: Mass Dispersion on the Horizontal Branch and RR Lyrae Period Changes. *Rebecca A. Koopmann, Young-Wook Lee, Pierre Demarque, & Jamie M. Howard.* 423, 380, 50-G7 (1994)

Pulsation and Stability of RR Lyrae Stars. I. Instability Strip. *G. Bono & R. F. Stellingwerf.* 93, 233, 45-A5 (1994)

Summary of ΔS Metallicity Measurements for Bright RR Lyrae Variables Observed at Lick Observatory and KPNO between 1972 and 1987. *Nicholas B. Suntzeff, Robert P. Kraft, & T. D. Kinman.* 93, 271, 45-D2 (1994)

A Pulsational Approach to the Luminosity of RR Lyrae Variables. *V. Castellani & R. De Santis.* 430, 624, 169-E11 (1994)

On the Application of the Baade-Wesselink Method to RR Lyrae Stars. *G. Bono, F. Caputo, & R. F. Stellingwerf.* 432, L51, 199-G7 (1994)

The RR Lyrae Fundamental Red Edge. *G. Bono, F. Caputo, V. Castellani, M. Marconi, L. Staiano, & R. F. Stellingwerf.* 442, 159, 79-D1 (1995)

Transient Phenomena and Modal Stability in RR Lyrae and BL Herculis Variable Stars. *G. Bono, V. Castellani, & R. F. Stellingwerf.* 445, L145, 151-G3 (1995)

Synthetic Mean Colors for RR Lyrae Variables. *Giuseppe Bono, Filippina Caputo, & Robert F. Stellingwerf.* 99, 263, 37-F8 (1995)

RV Tauri

The Chemical Composition of the RV Tauri Variable IW Carinae. *Sunetra Giridhar, N. Kameswara Rao, & David L. Lambert.* 437, 476, 289-F1 (1994)

Semiregular

VLA Positions and Distributions of H_2O Masers Associated with 15 Mira and Semiregular Variables. *P. F. Bowers & K. J. Johnston.* 92, 189, 33-G8 (1994)

STARS: VARIABLES: δ SCUTI

An Opacity Mechanism for the Pulsations of OB Stars. *Arthur N. Cox, Siobahn M. Morgan, Forrest J. Rogers, & Carlos A. Iglesias.* 393, 272, 117-E3 (1992)

τ Pegasi: A Fourier Representation of Line-Profile Variations. *E. J. Kennelly, G. A. H. Walker, & William J. Merryfield.* 400, L71, 220-E8 (1992)

Nightly Variations of Nonradial Oscillations in the Delta Scuti Star v Ursae Majoris. *S. G. Korzennik, R. W. Noyes, T. Brown, P. Nisenson, & S. Horner.* 443, L25, 102-E7 (1995)

Stellar Variability in the Central Populations of 47 Tucanae from WF/PC Observations with the *Hubble Space Telescope*. I. Project Overview, Reduction Techniques, and First Results. *Ronald L. Gilliland, Peter D. Edmonds, Larry Petro, Abhijit Saha, & Michael M. Shara.* 447, 191, 174-G5 (1995)

STARS: VISUAL MULTIPLES

Classical Cepheid Luminosities from Binary Companions. *Nancy Remage Evans.* 372, 597, 83-B1 (1991)

Gravitational Redshift Determinations for White Dwarfs in Common Proper-Motion Binaries. *Gary Wegner & I. Neill Reid.* 375, 674, 121-B1 (1991)

The Chromospheric Emission–Age Relation for Stars of the Lower Main Sequence and Its Implications for the Star Formation Rate. *David R. Soderblom, Douglas K. Duncan, & Dean R. H. Johnson.* 375, 722, 121-F5 (1991)

STARS: WEAK-LINE

Lithium in the Most Extreme Halo Stars; Trends with Metallicity. *Constantine P. Deliyannis & Pierre Demarque.* 370, L89, 59-E5 (1991)

Detection of a Galactic Color Gradient for Blue Horizontal-Branch Stars of the Halo Field and Implications for the Halo Age and Density Distributions. *George W. Preston, Stephen A. Shectman, & Timothy C. Beers.* 375, 121, 112-E1 (1991)

Photoelectric *UBV* Photometry of Stars Selected in the HK Objective-Prism Survey. *George W. Preston, Stephen A. Shectman, & Timothy C. Beers.* 76, 1001, 38-G5 (1991)

First Detection of Beryllium in a Very Metal Poor Star: A Test of the Standard Big Bang Model. *Gerard Gilmore, Bengt Edvardsson, & P. E. Nissen.* 378, 17, 151-C1 (1991)

STARS: WHITE DWARFS

Rotation and Magnetism in White Dwarfs. *Gary D. Schmidt & Jane E. Norsworthy.* 366, 270, 4-D1 (1991)

A Study of the Ultraviolet Evolution of U Geminorum between Outbursts. *Alan L. Kiplinger, Edward M. Sion, & Paula Szkody.* 366, 569, 10-B1 (1991)

Optical and Radio Observations of the Binary Pulsar 1855+09: Evolution of Pulsar Magnetic Fields and Low-Mass White Dwarf Cooling. *S. R. Kulkarni, S. Djorgovski, & A. R. Klemola.* 367, 221, 14-G4 (1991)

Synthetic Spectra and Atmospheric Properties of Cool DA White Dwarfs. *P. Bergeron, F. Wesemael, & G. Fontaine.* 367, 253, 15-C1 (1991)

Ginga Observation of an AM Herculis Type Source H0538+608. *M. Ishida, A. Silber, H. V. Bradt, R. A. Remillard, K. Makishima, & T. Ohashi.* 367, 270, 15-D6 (1991)

Conditions for Accretion-induced Collapse of White Dwarfs. *Ken'ichi Nomoto & Yoji Kondo.* 367, L19, 17-D1 (1991)

Adiabatic Properties of Pulsating DA White Dwarfs. I. The Treatment of the Brunt-Väisälä Frequency and the Region of Period Formation. *P. Brassard, G. Fontaine, F. Wesemael, S. D. Kawaler, & M. Tassoul.* 367, 601, 20-F11 (1991)

Formulae for the Cyclotron Luminosity of Magnetized Plasma Slabs. *G. Chanmugam & Steven H. Langer.* 368, 580, 32-C11 (1991)

Asteroseismology of White Dwarf Stars. I. Adiabatic Results. *P. A. Bradley & D. E. Winget.* 75, 463, 7-A13 (1991)

Models of White Dwarfs under Rapid Uniform or Differential Rotation: Numerical Results. II. *V. S. Geroyannis & A. A. Hadjopoulos.* 75, 499, 7-D11 (1991)

A Spectrophotometric Atlas of White Dwarfs Compiled from the *IUE* Archives. *Gary Wegner & Steven R. Swanson.* 75, 507, 7-E13 (1991)

Thomson Scattering in a Magnetic Field. II. Arbitrary Field Orientation. *Barbara A. Whitney.* 369, 451, 43-C10 (1991)

Theoretical Light Curve for the Recurrent Nova RS Ophiuchi—Determination of the White Dwarf Mass, Composition, and Distance. *Mariko Kato.* 369, 471, 43-E6 (1991)

A Critical Analysis of the Ultraviolet Temperature Scale of the Helium-dominated DB and DBV White Dwarfs. *Peter Thejll, Stéphane Vennes, & Harry L. Shipman.* 370, 355, 51-F5 (1991)

Does Accretion Cease When a Star Approaches Breakup? *Robert Popham & Ramesh Narayan.* 370, 604, 56-A6 (1991)

Helium Star Cataclysmics. *Icko Iben, Jr., & Alexander V. Tutukov.* 370, 615, 56-B5 (1991)

He Stars and He-accreting CO White Dwarfs. *Marco Limongi & Amedeo Tornambè.* 371, 317, 64-A9 (1991)

How Much Hydrogen Is There in a White Dwarf? *James MacDonald & Stéphane Vennes.* 371, 719, 70-E1 (1991)

Thomson Scattering in a Magnetic Field. I. Field along z. *Barbara A. Whitney.* 75, 1293, 22-F1 (1991)

White Dwarf and Neutron Star Interior Solutions in the Nonsymmetric Gravitational Theory. *L. M. Campbell, J. W. Moffat, & P. Savaria.* 372, 241, 77-A1 (1991)

Nuclear Reaction Rates in Dense Carbon-Oxygen Mixtures. *Shuji Ogata, Hiroshi Iyetomi, & Setsuo Ichimaru.* 372, 259, 77-B9 (1991)

The Isolated Massive DA White Dwarf GD 50. *P. Bergeron, K. M. Kidder, J. B. Holberg, James Liebert, F. Wesemael, & Rex A. Saffer.* 372, 267, 77-C5 (1991)

The Binary Feige 24: The Mass, Radius, and Gravitational Redshift of the DA White Dwarf. *Stéphane Vennes, John R. Thorstensen, Peter Thejll, & Harry L. Shipman.* 372, L37, 79-E5 (1991)

Type Ia Supernovae: Constraints on Baryonic Dark Matter. *Tammy A. Smecker & Rosemary F. G. Wyse.* 372, 448, 81-D1 (1991)

The Outcome of Explosive Ignition of ONeMg Cores: Supernovae, Neutron Stars, or "Iron" White Dwarfs? *Jordi Isern, Ramon Canal, & Javier Labay.* 372, L83, 85-D9 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

Accurate Collision Integrals for the Attractive Static Screened Coulomb Potential with Application to Electrical Conductivity. *James MacDonald.* 76, 369, 29-F3 (1991)

Thermal X-Ray Emission from Classical Novae in Optical Decline. *James MacDonald & Stéphane Vennes.* 373, L51, 97-C4 (1991)

Limits on the Space Density of Double Degenerates as Type Ia Supernova Progenitors. *Diana Foss, Richard A. Wade, & Richard F. Green.* 374, 281, 101-E9 (1991)

The Pulse-timing and Emission-Line Orbits of the White Dwarf in the Cataclysmic Variable AE Aquarii. *Edward L. Robinson, Allen W. Shafter, & S. Balachandran.* 374, 298, 101-G1 (1991)

The Infrared and Optical Pulsations of G29-38. *Joseph Patterson, B. Zuckerman, E. E. Becklin, D. J. Tholen, & T. Hawarden.* 374, 330, 102-C1 (1991)

The Common Envelope Phase in Classical Novae: One-dimensional Models. *Anurag Shankar, Mario Livio, & James W. Truran.* 374, 623, 106-G6 (1991)

Thermonuclear Reactions in Dense Stellar Matter: Electron Screening Revisited. *Setsuo Ichimaru & Shuji Ogata.* 374, 647, 107-B5 (1991)

Inefficient Accretion by the DA2 White Dwarf in V471 Tauri. *D. J. Mullan, H. L. Shipman, E. M. Sion, & J. MacDonald.* 374, 707, 107-G8 (1991)

V1500 Cygni: A Prediction. *J. I. Katz.* 374, L59, 110-D11 (1991)

Diffusion and Mixing in Classical Nova Precursors. *Icko Iben, Jr., Masayuki Y. Fujimoto, & Jim MacDonald.* 375, L27, 117-D1 (1991)

Noise-driven Radiative Shocks: A New Model for the Optical Quasi-periodic Oscillations of the AM Herculis Objects. *Michael T. Wolff, Kent S. Wood, & James N. Imamura.* 375, L31, 117-D6 (1991)

The Formation and Detection of Strongly Magnetic White Dwarf Binaries in Globular Clusters. *G. Chanmugam, A. Ray, & K. P. Singh.* 375, 600, 120-B9 (1991)

Gravitational Redshift Determinations for White Dwarfs in Common Proper-Motion Binaries. *Gary Wegner & I. Neill Reid.* 375, 674, 121-B1 (1991)

The White Dwarf Mass Distribution in Classical Nova Systems. *Hans Ritter, Michael Politano, Mario Livio, & Ronald F. Webbink.* 376, 177, 127-B10 (1991)

Gravitational Redshift for the Pleiad White Dwarf LB 1497. *Gary Wegner, I. Neill Reid, & Robert K. McMahan, Jr.* 376, 186, 127-C6 (1991)

Equation of State in Metals and Cold Stars: Evaluation of Statistical Models. *Dong Lai, Andrew M. Abrahams, & Stuart L. Shapiro.* 377, 612, 147-C10 (1991)

Asteroseismology of the DOV Star PG 1159−035 with the Whole Earth Telescope. *D. E. Winget, R. E. Nather, J. C. Clemens, J. Provencal, S. J. Kleinman, P. A. Bradley, M. A. Wood, C. F. Claver, M. L. Frueh, A. D. Grauer, B. P. Hine, C. J. Hansen, G. Fontaine, N. Achilleos, D. T. Wickramasinghe, T. M. K. Marar, S. Seetha, B. N. Ashoka, D. O'Donoghue, B. Warner, D. W. Kurtz, D. A. Buckley, J. Brickhill, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, J. E. Solheim, A. Kanaan, S. O. Kepler, G. W. Henry, & S. D. Kawaler.* 378, 326, 155-A10 (1991)

The Optical Emission from Oscillating White Dwarf Radiative Shock Waves. *James N. Imamura, Hussain Rashed, & Michael T. Wolff.* 378, 665, 160-F5 (1991)

Spin Evolution and Magnetic Fields in Cataclysmic Variables. *Andrew R. King & Jean-Pierre Lasota.* 378, 674, 160-G1 (1991)

A Detection of the Evolutionary Time Scale of the DA White Dwarf G117-B15A with the Whole Earth Telescope. *S. O. Kepler, D. E. Winget, R. E. Nather, P. A. Bradley, A. D. Grauer, G. Fontaine, P. Bergeron, G. Vauclair, C. F. Claver, T. M. K. Marar, S. Seetha, B. N. Ashoka, T. Mazeh, E. Leibowitz, N. Dolez, M. Chevreton, M. A. Barstow, J. C. Clemens, S. J. Kleinman, A. E. Sansom, R. W. Tweedy, A. Kanaan, B. P. Hine, J. L. Provencal, F. Wesemael, M. A. Wood, P. Brassard, J.-E. Solheim, & P.-I. Emanuelsen.* 378, L45, 162-E7 (1991)

Discovery and Seismological Interpretation of Low-Amplitude Modes in the Pulsating DO White Dwarf PG 1707+427 (V817 Herculis). *G. Fontaine, P. Bergeron, G. Vauclair, P. Brassard, F. Wesemael, S. D. Kawaler, A. D. Grauer, & D. E. Winget.* 378, L49, 162-F1 (1991)

Spin-up of the White Dwarf in the Intermediate Polar 3A 0729+103. *Jyoti Singh, P. C. Agrawal, K. M. V. Apparao, P. Vivekananda Rao, & M. B. K. Sarma.* 380, 208, 178-E11 (1991)

IUE Spectra of the Eclipsing Binary NN Serpentis. *Janet H. Wood & Thomas R. Marsh.* 381, 551, 197-E1 (1991)

Existence of Scattering Atmospheres near Luminous, Magnetized Compact Objects. *Charles D. Dermer & Steven J. Sturner.* 382, L23, 205-C11 (1991)

Effects of Drag Luminosity in the Common Envelope Phase of Slow Novae. *Mariko Kato & Izumi Hachisu.* 383, 761, 223-F3 (1991)

Post–Asymptotic Giant Branch Nonradial Instability Strips. *Letizia Stanghellini, Arthur N. Cox, & Sumner Starrfield.* 383, 766, 223-F10 (1991)

On the Certification of AM Canum Venaticorum as a Cataclysmic Variable. *Joseph Patterson, Emily Sterner, Jules P. Halpern, & John C. Raymond.* 384, 234, 3-G6 (1992)

The Peculiar Type Ia SN 1991T: Detonation of a White Dwarf? *Alexei V. Filippenko, Michael W. Richmond, Thomas Matheson, Joseph C. Shields, E. Margaret Burbidge, Ross D. Cohen, Mark Dickinson, Matthew A. Malkan, Brant Nelson, Jochen Pietz, David Schlegel, Patrick Schmeer, Hyron Spinrad, Charles C. Steidel, Hien D. Tran, & William Wren.* 384, L15, 6-C1 (1992)

Early-Time Spectra of Type Ic Supernovae: Further Evidence for the Presence of Hydrogen. *Alexei V. Filippenko.* 384, L37, 11-B11 (1992)

Companions to White Dwarfs: Very Low Mass Stars and the Brown Dwarf Candidate GD 165B. *B. Zuckerman & E. E. Becklin.* 386, 260, 27-D7 (1992)

Possible Models for the Type Ia Supernova 1990N. *Toshikazu Shigeyama, Ken'ichi Nomoto, Hitoshi Yamaoka, & Friedrich-Karl Thielemann.* 386, L13, 29-C1 (1992)

Constraints on the Age and Evolution of the Galaxy from the White Dwarf Luminosity Function. *M. A. Wood.* 386, 539, 32-B3 (1992)

Spectroscopy and Spectral Types for 387 Stellar Objects from the Large, Bright QSO Survey. *Christopher Berg, Gary Wegner, Craig B. Foltz, Frederic H. Chaffee, Jr., & Paul C. Hewett.* 78, 409, 8-B7 (1992)

On the Influence of the Convective Efficiency on the Determination of the Atmospheric Parameters of DA White Dwarfs. *P. Bergeron, F. Wesemael, & G. Fontaine.* 387, 288, 40-E1 (1992)

Modeling the Iron-dominated Spectra of the Type Ia Supernova SN 1991T at Premaximum. *P. Ruiz-Lapuente, E. Cappellaro, M. Turatto, C. Gouiffes, I. J. Danziger, M. Della Valle, & L. B. Lucy.* 387, L33, 43-D8 (1992)

Effects of Fe/C Phase Separation on the Ages of White Dwarfs. *Z. W. Xu & H. M. Van Horn.* 387, 662, 47-A1 (1992)

Diffusion and Mixing in Accreting White Dwarfs. *Icko Iben, Jr., Masayuki Y. Fujimoto, & Jim MacDonald.* 388, 521, 56-F11 (1992)

Type I Supernovae and Accretion-induced Collapses from Cataclysmic Variables? *Mario Livio & James W. Truran.* 389, 695, 70-A10 (1992)

H0538+608 (= BY Camelopardalis): An Asynchronously Rotating AM Herculis Binary? *A. Silber, H. V. Bradt, M. Ishida, T. Ohashi, & R. A. Remillard.* 389, 704, 70-B7 (1992)

The Constitution of the Atmospheric Layers and the Extreme Ultraviolet Spectrum of Hot Hydrogen-rich White Dwarfs. *Stéphane Vennes.* 390, 590, 82-F1 (1992)

The Discovery of a New DAV Star Using *IUE* Temperature Determination. *A. Kanaan, S. O. Kepler, O. Giovannini, & M. Diaz.* 390, L89, 85-B7 (1992)

On the Thermal Conductivity due to Collisions between Relativistic Degenerate Electrons. *F. X. Timmes.* 390, L107, 85-D9 (1992)

The Collapse of White Dwarfs to Neutron Stars. *S. E. Woosley & E. Baron.* 391, 228, 88-G1 (1992)

The Identification of Highly Ionized Metal Species in the Hot DA1 White Dwarf G191-B2B with the *Hubble Space Telescope* Faint Object Spectrograph. *Edward M. Sion, Ralph C. Bohlin, Richard W. Tweedy, & Gerard P. Vauclair.* 391, L29, 92-B11 (1992)

Maximum Rates of Period Change for DA White Dwarf Models with Carbon and Oxygen Cores. *P. A. Bradley, D. E. Winget, & M. A. Wood.* 391, L33, 92-C1 (1992)

Adiabatic Properties of Pulsating DA White Dwarfs. II. Mode Trapping in Compositionally Stratified Models. *P. Brassard, G. Fontaine, F. Wesemael, & C. J. Hansen.* 80, 369, 27-E3 (1992)

Whole Earth Telescope Observations of V471 Tauri: The Nature of the White Dwarf Variations. *J. C. Clemens, R. E. Nather, D. E. Winget, E. L. Robinson, M. A. Wood, C. F. Claver, J. Provencal, S. J. Kleinman, P. A. Bradley, M. L. Frueh, A. D. Grauer, B. P. Hine, G. Fontaine, N. Achilleos, D. T. Wickramasinghe, T. M. K. Marar, S. Seetha, B. N. Ashoka, D. O'Donoghue, B. Warner, D. W. Kurtz, P. Martinez, G. Vauclair, M. Chevreton, M. A. Barstow, A. Kanaan, S. O. Kepler, T. Augusteijn, J. van Paradijs, & C. J. Hansen.* 391, 773, 97-E8 (1992)

The Hubble Constant from Nickel Radioactivity in Type Ia Supernovae. *David Branch.* 392, 35, 101-D9 (1992)

Rapid Oscillations in Cataclysmic Variables. VIII. YY Draconis (=3A 1148+719. *J. Patterson, D. A. Schwartz, J. P. Pye, W. P. Blair, G. A. Williams, & J.-P. Caillault.* 392, 233, 103-G3 (1992)

The Hopkins Ultraviolet Telescope: Performance and Calibration during the Astro-1 Mission. *Arthur F. Davidsen, Knox S. Long, Samuel T. Durrance, William P. Blair, Charles W. Bowers, Steven J. Conard, Paul D. Feldman, Henry C. Ferguson, Glen H. Fountain, Randy A. Kimble, Gerard A. Kriss, H. Warren Moos, & Kenneth A. Potocki.* 392, 264, 104-C1 (1992)

Axion Cooling of White Dwarfs. *J. Isern, M. Hernanz, & E. Garcia-Berro.* 392, L23, 106-D1 (1992)

Iron Abundance in the Hot DA White Dwarfs Feige 24 and G191 B2B. *Stéphane Vennes, Pierre Chayer, John R. Thorstensen, Stuart Bowyer, & Harry L. Shipman.* 392, L27, 106-D5 (1992)

Adiabatic Properties of Pulsating DA White Dwarfs. III. A Finite-Element Code for Solving Nonradial Pulsation Equations. *P. Brassard, C. Pelletier, G. Fontaine, & F. Wesemael.* 80, 725, 33-D11 (1992)

The Nature of the Recurrent Nova T Coronae Borealis: Ultraviolet Evidence for a White Dwarf Accretor. *Pier Luigi Selvelli, Angelo Cassatella, & Roberto Gilmozzi.* 393, 289, 117-F12 (1992)

Late Detonation Models for the Type Ia Supernovae SN 1991T and SN 1990N. *Hitoshi Yamaoka, Ken'ichi Nomoto, Toshikazu Shigeyama, & Friedrich-Karl Thielemann.* 393, L55, 127-C1 (1992)

A Spectroscopic Determination of the Mass Distribution of DA White Dwarfs. *P. Bergeron, Rex A. Saffer, & James Liebert.* 394, 228, 130-G5 (1992)

The Coolest DA White Dwarfs Detected at Soft X-Ray Wavelengths. *K. M. Kidder, J. B. Holberg, M. A. Barstow, R. W. Tweedy, & F. Wesemael.* 394, 288, 131-E7 (1992)

Models of White Dwarfs Distorted by Differential Rotation and Magnetic Fields. *V. S. Geroyannis & A. A. Hadjopoulos.* 81, 377, 40-B13 (1992)

Two Ultramassive White Dwarfs Found among Candidates for Magnetic Fields. *Gary D. Schmidt, P. Bergeron, James Liebert, & Rex A. Saffer.* 394, 603, 136-G11 (1992)

Prevention of Accretion onto White Dwarfs by Stellar Winds. *James MacDonald.* 394, 619, 137-B8 (1992)

The Binary System L151−81A/B: A Potential Test of Accretion Theory. *M. A. Wood & T. D. Oswalt.* 394, L53, 139-D1 (1992)

The White Dwarf Companion to PSR 0820+02. *D. Koester, G. Chanmugam, & D. Reimers.* 395, L107, 154-C7 (1992)

Adiabatic Properties of Pulsating DA White Dwarfs. IV. An Extensive Survey of the Period Structure of Evolutionary Models. *P. Brassard, G. Fontaine, F. Wesemael, & M. Tassoul.* 81, 747, 45-D3 (1992)

Spectroscopy of the Recurrent Nova U Scorpii. *Helen M. Johnston & Shrinivas R. Kulkarni.* 396, 267, 158-D4 (1992)

Exploring the Peculiar Magnetic Field of Feige 7. *N. Achilleos, D. T. Wickramasinghe, James Liebert, Rex A. Saffer, & A. D. Grauer.* 396, 273, 158-D13 (1992)

The Radial Velocity of the White Dwarf Giclas 29-38. *C. Barnbaum & B. Zuckerman.* 396, L31, 160-F1 (1992)

The Conductive Propagation of Nuclear Flames. I. Degenerate C + O and O + Ne + Mg White Dwarfs. *F. X. Timmes & S. E. Woosley.* 396, 649, 165-D9 (1992)

Hubble Space Telescope FOS Observations of KPD 0005+5106: A Subluminous WN-WC Descendant with Ongoing Mass Outflow? *Edward M. Sion & Ronald A. Downes.* 396, L79, 167-B7 (1992)

Properties of Quasi-periodic Oscillations in Accreting Magnetic White Dwarfs. *Kinwah Wu, G. Chanmugam, & G. Shaviv.* 397, 232, 170-G6 (1992)

Extreme Ultraviolet Spectroscopy of G191-B2B: Direct Observation of Ionization Edges. *Erik Wilkinson, James C. Green, & Webster Cash.* 397, L51, 173-F13 (1992)

The Quasi-static Evolution of ONeMg Cores: Explosive Ignition Densities and the Collapse/Explosion Alternative. *Ramon Canal, Jordi Isern, & Javier Labay.* 398, L49, 187-G7 (1992)

Discovery of a Sub-Megagauss Magnetic White Dwarf through Spectropolarimetry. *Gary D. Schmidt, H. S. Stockman, & Paul S. Smith.* 398, L57, 188-A7 (1992)

Oscillations and Collapse of Compressible Homogeneous Rotating Spheroids with Electron Degeneracy. *T. T. Chia & S. Y. Pung.* 398, 574, 191-C7 (1992)

Noise-driven Radiative Shocks. II. Further Implications for the Quasi-periodic Oscillations of the AM Herculis Objects. *Kent S. Wood, James N. Imamura, & Michael T. Wolff.* 398, 593, 191-E1 (1992)

A Study of Metal Abundance Patterns in Cool White Dwarfs. I. Time-dependent Calculations of Gravitational Settling. *J. Dupuis, G. Fontaine, C. Pelletier, & F. Wesemael.* 82, 505, 56-A7 (1992)

The Case of G226-29: Evidence for a Pulsating DA White Dwarf with a Thick Hydrogen Layer? *G. Fontaine, P. Brassard, P. Bergeron, & F. Wesemael.* 399, L91, 201-C13 (1992)

Two Unusual Cataclysmic Variables at High Galactic Latitude: CP Eridani and AL Comae. *Timothy M. C. Abbott, Edward L. Robinson, Gary J. Hill, & Carole A. Haswell.* 399, 680, 206-D1 (1992)

On the Pulsational Stability of the Pre–White Dwarf Star PG 1707+427. *Albert D. Grauer, Richard F. Green, & James Liebert.* 399, 686, 206-D7 (1992)

Discovery of Two Cool Magnetic White Dwarfs. *P. Bergeron, María-Teresa Ruiz, & S. K. Leggett.* 400, 315, 212-G5 (1992)

An Interpretation of the Spectral Properties of Hot Hydrogen-rich White Dwarfs with Stratified H/He Model Atmospheres. *Stéphane Vennes & Gilles Fontaine.* 401, 288, 224-E7 (1992)

Pycnonuclear Reaction Rates for Binary Ionic Mixtures. *S. Ichimaru, S. Ogata, & H. M. Van Horn.* 401, L35, 227-E7 (1992)

A Study of Metal Abundance Patterns in Cool White Dwarfs. II. Simulations of Accretion Episodes. *J. Dupuis, G. Fontaine, C. Pelletier, & F. Wesemael.* 84, 73, 2-B5 (1993)

Radial Pulsations in DB White Dwarfs? *Steven D. Kawaler.* 404, 294, 31-E3 (1993)

Observations of the White Dwarf in the U Geminorum System with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Charles W. Bowers, Arthur F. Davidsen, Gerard A. Kriss, Edward M. Sion, & Ivan Hubeny.* 405, 327, 45-C1 (1993)

The Strong Magnetic Field in G227-35. *Marshall H. Cohen, Angela Putney, & Robert W. Goodrich.* 405, L67, 54-D5 (1993)

Multiple Hydrogen Flashes on Accreting Low-Mass White Dwarfs: Novae and DAO Stars. *Michael M. Shara, Dina Prialnik, & Attay Kovetz.* 406, 220, 57-G1 (1993)

Spectroscopic Observations of the Detached Binary PG 1413+015. *Michael S. Fulbright, James Liebert, P. Bergeron, & Richard Green.* 406, 240, 58-A11 (1993)

A Model for the Dramatic Decline of FG Sagittae. *Icko Iben, Jr., & Mario Livio.* 406, L15, 60-F8 (1993)

Numerical Simulations of the Convective Flame in White Dwarfs. *Eli Livne.* 406, L17, 60-F12 (1993)

The Potential for Asteroseismology of DB White Dwarf Stars. *P. A. Bradley, D. E. Winget, & M. A. Wood.* 406, 661, 66-B1 (1993)

G62-46: An Unresolved Double Degenerate Binary Containing a Magnetic DA Component. *P. Bergeron, María-Teresa Ruiz, & S. K. Leggett.* 407, 733, 79-E13 (1993)

Metal-Line Blanketing and the Peculiar Hβ Line Profile in the DAO Star Feige 55. *P. Bergeron, F. Wesemael, R. Lamontagne, & P. Chayer.* 407, L85, 82-F1 (1993)

Extreme Ultraviolet Observations of HZ 43 and the Local H/He Ratio with the Hopkins Ultraviolet Telescope. *Randy A. Kimble, Arthur F. Davidsen, Knox S. Long, & Paul D. Feldman.* 408, L41, 89-C1 (1993)

Unstable Degenerates Revisited. *John Faulkner.* 408, 600, 92-F5 (1993)

JHK Photometry of WD 0950+139. *Michael S. Fulbright & James Liebert.* 410, 275, 115-E1 (1993)

High-Frequency Emission of X-Ray Pulsar 1E 2259+586. *V. V. Usov.* 410, 761, 123-C1 (1993)

The Discovery of Variable Polarization over the 13.9 Minute Spin Period of the Intermediate Polar RE 0751+14. *V. Piirola, P. Hakala, & G. V. Coyne, S.J.* 410, L107, 126-C3 (1993)

The First Detection of Ionized Helium in the Local ISM: *EUVE* and *IUE* Spectroscopy of the Hot DA Dwarf GD 246. *Stéphane Vennes, Jean Dupois, Todd Rumph, Jeremy Drake, Stuart Bowyer, Pierre Chayer, & Gilles Fontaine.* 410, L119, 126-D7 (1993)

Does the Coalescence of White Dwarfs Produce Millisecond Pulsars in Globular Clusters? *Kaiyou Chen & Peter J. T. Leonard.* 411, L75, 142-D3 (1993)

The Optical Counterpart of the Bright Nearby Millisecond Pulsar PSR J0437−4715. *Charles D. Bailyn.* 411, L83, 142-E1 (1993)

A Study of Metal Abundance Patterns in Cool White Dwarfs. III. Comparison of the Predictions of the Two-Phase Accretion Model with the Observations. *J. Dupuis, G. Fontaine, & F. Wesemael.* 87, 345, 31-E3 (1993)

Quantum Effects in Dense Coulombic Matter: Application to the Cooling of White Dwarfs. *Gilles Chabrier.* 414, 695, 179-G9 (1993)

On the Instability of Deflagration Fronts in White Dwarfs. *Eli Livne & David Arnett.* 415, L107, 200-B1 (1993)

Two New Extremely Iron-rich Hot DA White Dwarfs and the Nature of the EUV Opacity. *J. B. Holberg, M. A. Barstow, D. A. H. Buckley, A. Chen, S. Dreizler, M. C. Marsh, D. O'Donoghue, E. M. Sion, R. W. Tweedy, G. Vauclair, & K. Werner.* 416, 806, 213-D13 (1993)

Detection of the First Coronal X-Ray Source about a White Dwarf. *Thomas A. Fleming, Klaus Werner, & Martin A. Barstow.* 416, L79, 216-E6 (1993)

Initial White Dwarf Results from the *Extreme Ultraviolet Explorer*. *David S. Finley, Patrick Jelinsky, Jean Dupuis, & Detlev Koester.* 417, 259, 220-F3 (1993)

Thermonuclear Reaction Rates for Dense Binary-Ionic Mixtures. *Shuji Ogata, Setsuo Ichimaru, & Hugh M. Van Horn.* 417, 265, 220-F12 (1993)

Electrical and Thermal Conductivities of Dense Matter in the Crystalline Lattice Phase. III. Inclusion of Lower Densities. *Naoki Itoh, Hiroshi Hayashi, & Yasuharu Kohyama.* 418, 405, 236-A13 (1993)

Discovery of a Magnetic/Nonmagnetic Double-degenerate Binary System. *James Liebert, P. Bergeron, Gary D. Schmidt, & Rex A. Saffer.* 418, 426, 236-C10 (1993)

Nova Herculis 1991: Thermonuclear Runaway on a Massive ONeMg White Dwarf. *Thomas Matheson, Alexei V. Filippenko, & Luis C. Ho.* 418, L29, 238-D6 (1993)

An Improved Numerical Method for Nonadiabatic Nonradial Oscillations: An Application to White Dwarf Stars. *Umin Lee & P. A. Bradley.* 418, 855, 243-C1 (1993)

On the Formation of O-Ne White Dwarfs in Metal-rich Close Binary Systems. *Inma Dominguez, Amedeo Tornambè, & Jordi Isern.* 419, 268, 249-E1 (1993)

The Quasi-periodic Oscillations of VV Puppis. *James N. Imamura, John Middleditch, Jeffrey D. Scargle, Thomas Y. Steiman-Cameron, Laura A. Whitlock, Michael T. Wolff, & Kent S. Wood.* 419, 793, 257-E1 (1993)

Evidence for Accretion Disk Precession in the Cataclysmic Binary AM Canum Venaticorum. *Joseph Patterson, Jules Halpern, & Anouk Shambrook.* 419, 803, 257-E13 (1993)

Far-Ultraviolet Stellar Photometry: A Field in Orion. *Edward G. Schmidt & George R. Carruthers.* 89, 259, 53-B2 (1993)

Are the Observed Frequencies of Double Degenerates and SN Ia Contradictory? *L. R. Yungelson, M. Livio, A. V. Tutukov, & R. A. Saffer.* 420, 336, 5-A13 (1994)

The Conductive Propagation of Nuclear Flames. II. Convectively Bounded Flames in C+O and O+Ne+Mg Cores. *F. X. Timmes, S. E. Woosley, & Ronald E. Taam.* 420, 348, 5-B13 (1994)

The Masses of V838 Herculis (Nova Herculis 1991) and QZ Aurigae. *Paula Szkody & Doug Ingram.* 420, 830, 13-C3 (1994)

Hot or Not? Theoretical Blue Edges for DA and DB White Dwarf Models. *P. A. Bradley & D. E. Winget.* 421, 236, 19-A1 (1994)

Evolutionary Sequences of Very Hot, Low-Mass, Accreting White Dwarfs with Application to Symbiotic Variables and Ultrasoft/Supersoft Low-Luminosity X-Ray Sources. *Edward M. Sion & Sumner G. Starrfield.* 421, 261, 19-C1 (1994)

Low Density of Neutral Hydrogen and Helium in the Local Interstellar Medium: *Extreme Ultraviolet Explorer* Photometry of the Lyman Continuum of the Hot White Dwarfs MCT 0501−2858, MCT 0455−2812, HZ 43, and GD 153. *Stéphane Vennes, Jean Dupuis, Stuart Bowyer, Gilles Fontaine, Alexandria Wiercigroch, Patrick Jelinsky, François Wesemael, & Roger Malina.* 421, L35, 21-G12 (1994)

An Iterative Technique for Computing Rotating White Dwarf Models. *V. S. Geroyannis & P. J. Papasotiriou.* 90, 501, 9-A9 (1994)

Discovery of a Dwarf Carbon Star with a White Dwarf Companion and of a Highly Magnetic Degenerate Star. *James Liebert, Gary D. Schmidt, M. Lesser, J. A. Stepanian, V. A. Lipovetsky, Frederic H. Chaffee, Craig B. Foltz, & P. Bergeron.* 421, 733, 27-C12 (1994)

Double-Core Evolution. V. Three-dimensional Effects in the Merger of a Red Giant with a Dwarf Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 422, 729, 40-G13 (1994)

GD 323: New Observations and Analysis of the Prototype DAB White Dwarf. *D. Koester, James Liebert, & Rex A. Saffer.* 422, 783, 41-E10 (1994)

Evidence for Particle Acceleration in a Magnetized White Dwarf from Radio and Gamma-Ray Observations. *O. C. De Jager.* 90, 775, 13-D3 (1994)

Radiation-driven Acceleration in Photospheres of Nonaccreting Magnetic White Dwarfs. *Vladimir V. Zheleznyakov & A. V. Serber.* 90, 783, 13-D13 (1994)

Cooling White Dwarfs in Galactic Globulars. *V. Castellani, S. Degl'Innocenti, & M. Romaniello.* 423, 266, 49-D1 (1994)

The Peculiar Cool White Dwarf LHS 1126 Revisited. *P. Bergeron, María-Teresa Ruiz, S. K. Leggett, D. Saumon, & F. Wesemael.* 423, 456, 51-G5 (1994)

The Incidence of Magnetism among White Dwarfs: The First Stars below 100 Kilogauss. *Gary D. Schmidt & Paul S. Smith.* 423, L63, 54-B3 (1994)

On the Acceleration of Nuclear Flame Fronts in White Dwarfs. *F. X. Timmes.* 423, L131, 61-B5 (1994)

Accretion onto a 1.4 $M_{\odot}$ White Dwarf: Classical Nova, Recurrent Nova, or Supernova? *Attay Kovetz & Dina Prialnik.* 424, 319, 65-G1 (1994)

Cooling of the White Dwarf in U Geminorum between Outbursts. *Knox S. Long, Edward M. Sion, Min Huang, & Paula Szkody.* 424, L49, 69-F13 (1994)

A Very Hot, Hydrogen-rich, White Dwarf Planetary Nucleus. *James Liebert, P. Bergeron, & R. W. Tweedy.* 424, 817, 75-A3 (1994)

On the Interpretation and Implications of Nova Abundances: An Abundance of Riches or an Overabundance of Enrichments. *Mario Livio & James W. Truran.* 425, 797, 91-F6 (1994)

The Discovery of Ni v in the Photospheres of the Hot DA White Dwarfs RE 2214−492 and G191-B2B. *J. B. Holberg, I. Hubeny, M. A. Barstow, T. Lanz, E. M. Sion, & R. W. Tweedy.* 425, L105, 94-G5 (1994)

HST Eclipse Mapping of Dwarf Nova OY Carinae in Quiescence: An "Fe II Curtain" with Mach $\simeq$ 6 Velocity Dispersion Veils the White Dwarf. *Keith Horne, T. R. Marsh, F. H. Cheng, Ivan Hubeny, & Thierry Lanz.* 426, 294, 99-G1 (1994)

Precision Asteroseismology of Pulsating PG 1159 Stars. *Steven D. Kawaler & Paul A. Bradley.* 427, 415, 115-A11 (1994)

Glitches in the X-Ray Pulsar 1E 2259+586. *V. V. Usov.* 427, 984, 124-G10 (1994)

Magnetic Fields in Young Supernova Remnants. *Yu-Qing Lou.* 428, L21, 134-D2 (1994)

Red Giant Stragglers and He White Dwarfs in Galactic Globulars. *V. Castellani, V. Luridiana, & M. Romaniello.* 428, 633, 138-B7 (1994)

On the Hydrogen Layer Thickness in Pulsating DA White Dwarfs. *G. Fontaine, P. Brassard, F. Wesemael, & M. Tassoul.* 428, L61, 142-F1 (1994)

The Gamma-Ray Signature of the Disruption of a Neutron Star by a Black Hole. *M. Hernanz, J. Isern, X. Martin, & R. Mochkovitch.* 92, 627, 40-C1 (1994)

Hot Degenerates in the Montreal-Cambridge-Tololo Survey. II. Two New Hybrid White Dwarfs, MCT 0128−3846 and MCT 0453−2933, and the Nature of the DAB Stars. *F. Wesemael, P. Bergeron, R. Lamontagne, G. Fontaine, A. Beauchamp, S. Demers, M. J. Irwin, J. B. Holberg, S. O. Kepler, & S. Vennes.* 429, 369, 148-F2 (1994)

Eclipse Mapping of the Accreting Magnetic White Dwarf in DP Leonis with *HST*. *H. S. Stockman, Gary D. Schmidt, James Liebert, & J. B. Holberg.* 430, 323, 163-B11 (1994)

Continuous Absorption by He_2^+ and H_2^+ in Cool White Dwarfs. *P. C. Stancil.* 430, 360, 163-F3 (1994)

Hubble Space Telescope Goddard High-Resolution Spectrograph Observation of U Geminorum during Quiescence: Evidence for a Slowly Rotating White Dwarf. *Edward M. Sion, Knox S. Long, Paula Szkody, & Min Huang.* 430, L53, 165-G12 (1994)

Dynamo Generation of a Magnetic Field in the White Dwarf GD 358. *J. Andrew Markiel, John H. Thomas, & H. M. Van Horn.* 430, 834, 172-C7 (1994)

Whole Earth Telescope Observations of the DBV White Dwarf GD 358. *D. E. Winget, R. E. Nather, J. C. Clemens, J. L. Provencal, S. J. Kleinman, P. A. Bradley, C. F. Claver, J. S. Dixson, M. H. Montgomery, C. J. Hansen, B. P. Hine, P. Birch, M. Candy, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. M. Leibowitz, D. O'Donoghue, B. Warner, D. A. H. Buckley, P. Tripe, G. Vauclair, N. Dolez, M. Chevreton, T. Serre, R. Garrido, S. O. Kepler, A. Kanaan, T. Augusteijn, M. A. Wood, P. Bergeron, & A. D. Grauer.* 430, 839, 172-D1 (1994)

An Asteroseismological Determination of the Structure of the DBV White Dwarf GD 358. *P. A. Bradley & D. E. Winget.* 430, 850, 172-E2 (1994)

Ionization Nebulae Surrounding Supersoft X-Ray Sources. *S. Rappaport, E. Chiang, T. Kallman, & R. Malina.* 431, 237, 179-B1 (1994)

A Spectroscopic Analysis of DAO and Hot DA White Dwarfs: The Implications of the Presence of Helium and the Nature of DAO Stars. *P. Bergeron, F. Wesemael, A. Beauchamp, M. A. Wood, R. Lamontagne, G. Fontaine, & James Liebert.* 432, 305, 197-A6 (1994)

Relativistic Tidal Interaction of a White Dwarf with a Massive Black Hole. *V. P. Frolov, A. M. Khokhlov, I. D. Novikov, & C. J. Pethick.* 432, 680, 204-D13 (1994)

The Ultraviolet Pulsations of the Cataclysmic Variable AE Aquarii as Observed with the *Hubble Space Telescope*. *Michael Eracleous, Keith Horne, Edward L. Robinson, Er-Ho Zhang, Thomas R. Marsh, & Janet H. Wood.* 433, 313, 212-C1 (1994)

Discovery of a New White Dwarf in a Binary System (EUVE 0720−317) in the *Extreme Ultraviolet Explorer* Survey and Implications for the Late Stages of Stellar Evolution. *Stéphane Vennes & John R. Thorstensen.* 433, L29, 214-G13 (1994)

Two Planetary Nebula Candidates around Hot DA White Dwarfs. *Richard W. Tweedy & Karen B. Kwitter.* 433, L93, 224-B11 (1994)

Cooling Theory of Crystallized White Dwarfs. *L. Segretain, G. Chabrier, M. Hernanz, E. García-Berro, J. Isern, & R. Mochkovitch.* 434, 641, 236-F2 (1994)

The Influence of Crystallization on the Luminosity Function of White Dwarfs. *M. Hernanz, E. García-Berro, J. Isern, R. Mochkovitch, L. Segretain, & G. Chabrier.* 434, 652, 236-G2 (1994)

Observational Limits on Companions to G29-38. *S. J. Kleinman, R. E. Nather, D. E. Winget, J. C. Clemens, P. A. Bradley, A. Kanaan, J. L. Provencal, C. F. Claver, T. K. Watson, K. Yanagida, J. S. Dixson, M. A. Wood, D. J. Sullivan, E. Meištas, E. M. Leibowitz, P. Moskalik, S. Zola, G. Pajdosz, J. Krzesinski, J.-E. Solheim, A. Bruvold, D. O'Donoghue, M. Katz, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, S. O. Kepler, O. Giovannini, C. J. Hansen, & S. D. Kawaler.* 436, 875, 277-G1 (1994)

On the Predicted Abundances of Iron and Nickel Supported by Radiative Levitation in the Atomospheres of Hot DA White Dwarfs. *P. Chayer,*

F. LeBlanc, G. Fontaine, F. Wesemael, G. Michaud, & S. Vennes. 436, L161, 281-F7 (1994)

The Derived Population of Luminous Supersoft X-Ray Sources. *R. Di Stefano & S. Rappaport.* 437, 733, 295-G1 (1994)

The Heating of Nova Ejecta by Radioactive Decays of the β-unstable Nuclei. *Shlomi Pistinner, Giora Shaviv, & Sumner Starrfield.* 437, 794, 296-E4 (1994)

Pycnonuclear Reaction Rates in Stellar Interiors: Thermal Enhancement. *Hikaru Kitamura & Setsuo Ichimaru.* 438, 300, 5-E9 (1995)

RE 0044+09: A New K Dwarf Rapid Rotator with a White Dwarf Companion? *Barry J. Kellett, Gordon E. Bromage, Alexander Brown, Robin D. Jeffries, David J. James, David Kilkenny, Russell M. Robb, David Wonnacott, Christopher Lloyd, & C. Clayton.* 438, 364, 6-D13 (1995)

The Evolutionary Thermal Response of a White Dwarf to Compressional Heating by Periodic Dwarf Nova Accretion Events. *Edward M. Sion.* 438, 876, 16-C1 (1995)

Hydrodynamics of Binary Coalescence. II. Polytropes with $\Gamma = 5/3$. *Frederic A. Rasio & Stuart L. Shapiro.* 438, 887, 16-D1 (1995)

The Pulsation Index, Effective Temperature, and Thickness of the Hydrogen Layer in the Pulsating DA White Dwarf G117-B15A. *E. L. Robinson, T. M. Mailloux, E. Zhang, D. Koester, R. F. Stiening, R. C. Bless, J. W. Percival, M. J. Taylor, & G. W. van Citters.* 438, 908, 16-F1 (1995)

Simple Analysis of Slowly Rotating Semidegenerate Spheroids of Fermions. *M. A. Sabadell, J. Sañudo, & A. F. Pacheco.* 439, 846, 36-C5 (1995)

Non-LTE Line-blanketed Model Atmospheres of Hot Stars. II. Hot, Metal-rich White Dwarfs. *T. Lanz & I. Hubeny.* 439, 905, 37-B1 (1995)

Hubble Space Telescope FOS Spectroscopy of the Ultrashort-Period Dwarf Nova WZ Sagittae: The Underlying Degenerate. *Edward M. Sion, F. H. Cheng, Knox S. Long, Paula Szkody, Ron L. Gilliland, Min Huang, & Ivan Hubeny.* 439, 957, 37-G3 (1995)

Very Low Mass Stars and White Dwarfs in NGC 6397. *Francesco Paresce, Guido De Marchi, & Martino Romaniello.* 440, 216, 44-B13 (1995)

ORFEUS Observations of AM Herculis. *John C. Raymond, Christopher W. Mauche, Stuart Bowyer, & Mark Hurwitz.* 440, 331, 45-F7 (1995)

The Modeling of Energy Distributions and Light Curves of ZZ Ceti Stars. I. Basic Theory and Semianalytic Expressions for the Emergent Flux. *P. Brassard, G. Fontaine, & F. Wesemael.* 96, 545, 9-C12 (1995)

BE Ursae Majoris: Precataclysmic Binary System and Planetary Nucleus. *James Liebert, R. W. Tweedy, R. Napiwotzki, & M. S. Fulbright.* 441, 424, 65-B11 (1995)

A Volume-limited Survey of High Galactic Latitude Planetary Nebulae with the *Extreme Ultraviolet Explorer*. *Antonella Fruscione, Jeremy J. Drake, Kelley McDonald, & Roger F. Malina.* 441, 726, 72-A1 (1995)

Spectroscopic Studies of DB White Dwarfs: Confirmation and Modeling of New Forbidden Components of He I. *A. Beauchamp, F. Wesemael, P. Bergeron, & James Liebert.* 441, L85, 76-C4 (1995)

Accretion Disk Boundary Layers in Cataclysmic Variables. I. Optically Thick Boundary Layers. *Robert Popham & Ramesh Narayan.* 442, 337, 81-F10 (1995)

Magnetic Field Evolution in White Dwarfs: The Hall Effect and Complexity of the Field. *A. G. Muslimov, H. M. Van Horn, & M. A. Wood.* 442, 758, 90-F2 (1995)

On the Nature of the Spectral Features in Peculiar "DQ" White Dwarfs. *Gary D. Schmidt, P. Bergeron, & Bruce Fegley, Jr.* 443, 274, 99-A10 (1995)

Temperatures, Gravities, and Masses for a Sample of Bright DA White Dwarfs and the Initial-to-Final Mass Relation. *Angela Bragaglia, Alvio Renzini, & P. Bergeron.* 443, 735, 108-A7 (1995)

The Circumstellar Nature of the Metallic Features in a Hot DA White Dwarf. *J. B. Holberg, F. C. Bruhweiler, & J. Andersen.* 443, 753, 108-C1 (1995)

New Model Atmospheres for Very Cool White Dwarfs with Mixed H/He and Pure He Compositions. *P. Bergeron, D. Saumon, & F. Wesemael.* 443, 764, 108-D1 (1995)

Masses of DA White Dwarfs with Gravitational Redshift Determinations. *P. Bergeron, James Liebert, & M. S. Fulbright.* 444, 810, 127-F1 (1995)

A *Hubble Space Telescope* Study of the Underlying White Dwarf in the Dwarf Nova VW Hydri during Quiescence. *Edward M. Sion, Paula Szkody, Fu-Hua Cheng, & Min Huang.* 444, L97, 130-G8 (1995)

Signatures of White Dwarf Galaxy Halos. *Stéphane Charlot & Joseph Silk.* 445, 124, 134-A12 (1995)

Hubble Space Telescope High-Resolution Spectroscopy of the Exposed White Dwarf in the Dwarf Nova VW Hydri in Quiescence: A Rapidly Rotating White Dwarf. *Edward M. Sion, Min Huang, Paula Szkody, & Fu-Hua Cheng.* 445, L31, 140-F3 (1995)

Thermal Cyclotron Absorption Coefficients. II. Opacities in the Stokes Formalism. *H. M. Väth & G. Chanmugam.* 98, 295, 26-A9 (1995)

An Extended Grid of Multicycle Nova Evolution Models. *Dina Prialnik & Attay Kovetz.* 445, 789, 146-B3 (1995)

Extreme Ultraviolet Spectroscopy and Photometry of VV Puppis during a High Accretion State. *Stéphane Vennes, Paula Szkody, Edward M. Sion, & Knox S. Long.* 445, 921, 148-A1 (1995)

The Unusual Helium Variable AM Canum Venaticorum. *J. L. Provencal, D. E. Winget, R. E. Nather, E. L. Robinson, J.-E. Solheim, J. C. Clemens, P. A. Bradley, S. J. Kleinman, A. Kanaan, C. F. Claver, C. J. Hansen, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. M. Leibowitz, E. G. Meištas, A. Bruvold, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, A. E. Sansom, R. W. Tweedy, G. Fontaine, P. Bergeron, S. O. Kepler, M. A. Wood, & A. D. Grauer.* 445, 927, 148-A11 (1995)

Thick to Thin: The Evolutionary Connection between PG 1159 Stars and the Thin Helium–enveloped Pulsating White Dwarf GD 358. *Benjamin T. Dehner & Steven D. Kawaler.* 445, L141, 151-F9 (1995)

ORFEUS Observations of G191-B2B: Neutral and Ionized Gas in the Local Interstellar Medium. *M. Hurwitz & S. Bowyer.* 446, 812, 167-C4 (1995)

A Model for the Galactic Population of Symbiotic Stars with White Dwarf Accretors. *L. Yungelson, M. Livio, A. Tutukov, & S. J. Kenyon.* 447, 656, 185-B10 (1995)

The Dynamics of Two-dimensional Local and Finite Perturbations in Envelopes of Rotating White Dwarfs. I. *Patrick Godon & Giora Shaviv.* 447, 797, 187-A3 (1995)

Whole Earth Telescope Observations of the DAV White Dwarf G226-29. *S. O. Kepler, O. Giovannini, M. A. Wood, R. E. Nather, D. E. Winget, A. Kanaan, S. J. Kleinman, P. A. Bradley, J. L. Provencal, J. C. Clemens, C. F. Claver, T. K. Watson, K. Yanagida, K. Krisciunas, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. Leibowitz, H. Mendelson, T. Mazeh, P. Moskalik, J. Krzesiński, G. Pajdosz, S. Zoła, J.-E. Solheim, P.-I. Emanuelsen, N. Dolez, G. Vauclair, M. Chevreton, J.-R. Fremy, M. A. Barstow, A. E. Sansom, R. W. Tweedy, D. T. Wickramasinghe, L. Ferrario, D. J. Sullivan, A. J. van der Peet, D. A. H. Buckley, & A.-L. Chen.* 447, 874, 188-A1 (1995)

Type Ia Supernova Scenarios and the Hubble Sequence. *P. Ruiz-Lapuente, A. Burkert, & R. Canal.* 447, L69, 190-C1 (1995)

A Search for Magnetic Fields among DA White Dwarfs. *Gary D. Schmidt & Paul S. Smith.* 448, 305, 196-D7 (1995)

Radiative Levitation in Hot White Dwarfs: Equilibrium Theory. *P. Chayer, G. Fontaine, & F. Wesemael.* 99, 189, 36-G5 (1995)

Hydrodynamic Studies of Accretion onto Massive White Dwarfs: ONeMg-enriched Nova Outbursts. I. Dependence on White Dwarf Mass. *M. Politano, S. Starrfield, J. W. Truran, A. Weiss, & W. M. Sparks.* 448, 807, 206-A11 (1995)

Optical and Ultraviolet Analyses of ZZ Ceti Stars and Study of the Atmospheric Convective Efficiency in DA White Dwarfs. *P. Bergeron, F. Wesemael, R. Lamontagne, G. Fontaine, R. A. Saffer, & N. F. Allard.* 449, 258, 213-F10 (1995)

Off-centered Dipole Models for Three Isolated Magnetic White Dwarfs. *Angela Putney & Stefan Jordan.* 449, 863, 224-E10 (1995)

From Strange Stars to Strange Dwarfs. *N. K. Glendenning, Ch. Kettner, & F. Weber.* 450, 253, 231-E1 (1995)

The Structure and Evolution of an Accretion Flow Interacting with the Central Star. *Masayuki Y. Fujimoto.* 450, 262, 231-E13 (1995)

Whole Earth Telescope Observations and Seismological Analysis of the Pre–White Dwarf PG 2131+066. *S. D. Kawaler, M. S. O'Brien, J. C. Clemens, R. E. Nather, D. E. Winget, T. K. Watson, K. Yanagida, J. S. Dixson, P. A. Bradley, M. A. Wood, D. J. Sullivan, S. J. Kleinman, E. Meištas, E. M. Leibowitz, P. Moskalik, S. Zoła, G. Pajdosz, J. Krzesiński, J.-E. Solheim, A. Bruvold, D. O'Donoghue, M. Katz, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, A. Kanaan, S. O. Kepler, O. Giovannini, J. L. Provencal, & C. J. Hansen.* 450, 350, 232-G1 (1995)

Smooth Particle Hydronamics Simulations of Deflagrations in Supernovae. *E. Bravo & D. García-Senz.* 450, L17, 234-E12 (1995)

Satellites on Lyman Alpha Due to H-H and H-H^+ Collisions. *John F. Kielkopf & Nicole F. Allard.* 450, L75, 245-A8 (1995)

Discovery of Diffuse X-Ray Emission in 47 Tucanae. *Martin Krockenberger & Jonathan E. Grindlay.* 451, 200, 248-F11 (1995)

Hubble Space Telescope Observations of White Dwarfs in the Globular Cluster M4. *Harvey B. Richer, Gregory G. Fahlman, Rodrigo A. Ibata, Peter B. Stetson, Roger A. Bell, Michael Bolte, Howard E. Bond, William E. Harris, James E. Hesser, Georgi Mandushev, Carlton Pryor, & Don A. VandenBerg.* 451, L17, 252-C11 (1995)

Thermal Instability and Pulsations of the Flame Front in White Dwarfs. *Vitaliy V. Bychkov & Michael A. Liberman.* 451, 711, 257-A7 (1995)

Three New Magnetic White Dwarf Stars. *Angela Putney.* 451, L67, 260-F7 (1995)

Explosions of Sub–Chandrasekhar Mass White Dwarfs in Two Dimensions. *Eli Livne & David Arnett.* 452, 62, 263-A6 (1995)

Optical Observations of the Binary Millisecond Pulsars J2145−0750 and J0034−0534. *J. F. Bell, S. R. Kulkarni, M. Bailes, E. M. Leitch, & A. G. Lyne.* 452, L121, 280-B7 (1995)

The Binary Double-degenerate Nature of the Bright DAO White Dwarf Feige 55. *J. B. Holberg, Rex A. Saffer, R. W. Tweedy, & M. A. Barstow.* 452, L133, 280-D4 (1995)

C IV and O VI Transitions in the Region λλ1100–2000 and Examples Found in *IUE* Spectra of Hot Stars. *Walter A. Feibelman & Sveneric Johansson.* 100, 405, 51-F3 (1995)

The *EUVE* and *IUE* Spectra of the Hot DA White Dwarf GD 659. *J. B. Holberg, M. A. Barstow, F. C. Bruhweiler, & E. M. Sion.* 453, 313, 285-D12 (1995)

Dynamo Generation of Magnetic Fields in White Dwarfs. *John H. Thomas, J. Andrew Markiel, & H. M. Van Horn.* 453, 403, 286-F3 (1995)

A Millisecond Pulsar in a 6 Hour Orbit: PSR J0751+1807. *S. C. Lundgren, A. F. Zepka, & J. M. Cordes.* 453, 419, 286-G10 (1995)

ROSAT Pointed Observations of Cool Magnetic White Dwarfs. *Z. E. Musielak, J. G. Porter, & J. M. Davis.* 453, L33, 289-F8 (1995)

Radiative $He^+(1s) + He(1s^2)$ Processes as the Source of the DB White Dwarf Atmosphere Electromagnetic Continuous Spectra. *A. A. Mihajlov, M. S. Dimitrijević, Lj. M Ignjatović, & Z. Djurić.* 454, 420, 305-B3 (1995)

Improved Calculations of the Equilibrium Abundances of Heavy Elements Supported by Radiative Levitation in the Atmospheres of Hot DA White Dwarfs. *P. Chayer, S. Vennes, A. K. Pradhan, P. Thejll, A. Beauchamp, G. Fontaine, & F. Wesemael.* 454, 429, 305-D4 (1995)

The 71 Second Oscillation in the Light Curve of the Old Nova DQ Herculis. *E. Zhang, E. L. Robinson, R. F. Stiening, & Keith Horne.* 454, 447, 305-D12 (1995)

Spectroscopy of the White Dwarf Companions of PSR 0655+64 and PSR 0820+02. *M. H. van Kerkwijk & S. R. Kulkarni.* 454, L141, 316-E3 (1995)

X-Ray Emission from Magnetic Cataclysmic Variables and White Dwarf Mass Estimates. *Kinwah Wu, G. Chanmugam, & G. Shaviv.* 455, 260, 321-F8 (1995)

Spectroscopic Identification of Probable Cataclysmic Variables in the Globular Cluster NGC 6397. *J. E. Grindlay, A. M. Cool, P. J. Callanan, C. D. Bailyn, H. N. Cohn, & P. M. Lugger.* 455, L47, 325-B1 (1995)

The Softest X-Ray Sources in the *ROSAT* Pointed Catalog: WGACAT. *K. P. Singh, P. Barrett, N. E. White, P. Giommi, & L. Angelini.* 455, 456, 328-C2 (1995)

Hot White Dwarfs in the Local Interstellar Medium: Hydrogen and Helium Interstellar Column Densities and Stellar Effective Temperatures from *Extreme-Ultraviolet Explorer* Spectroscopy. *Jean Dupuis, Stéphane Vennes, Stuart Bowyer, Anil K. Pradhan, & Peter Thejll.* 455, 574, 329-G3 (1995)

The Extremely Low Luminosity White Dwarf ESO 439−26. *María Teresa Ruiz, P. Bergeron, S. K. Leggett, & Claudio Anguita.* 455, L159, 334-C13 (1995)

STARS: WINDS

Nonthermal X-Ray Emission from Winds of OB Supergiants. *Wan Chen & Richard L. White.* 366, 512, 9-D1 (1991)

Infrared Spectroscopy of T Tauri Stars. *C. Giovanardi, S. Gennari, A. Natta, & R. Stanga.* 367, 173, 14-B11 (1991)

NGC 6302: Ionized by a Very Hot Star or by a Wind? *N. J. Lame & G. J. Ferland.* 367, 208, 14-F1 (1991)

On Winds and X-Rays of O-Type Stars. *Tomasz Chlebowski & Catharine D. Garmany.* 368, 241, 26-B1 (1991)

Instabilities in Line-driven Stellar Winds. V. Effect of an Optically Thick Continuum. *S. P. Owocki & G. B. Rybicki.* 368, 261, 26-C11 (1991)

Observation of a Pulsar Wind: CCD Polarimetry of the Crab Nebula. *F. C. Michel, P. A. Scowen, R. J. Dufour, & J. J. Hester.* 368, 463, 30-G1 (1991)

The Effect of Viscosity on Steady Transonic Flow with a Nodal Solution Topology. *S. P. Owocki & G. P. Zank.* 368, 491, 31-C1 (1991)

The Appearance of Highly Relativistic, Spherically Symmetric Stellar Winds. *Marek A. Abramowicz, Igor D. Novikov, & Bohdan Paczyński.* 369, 175, 38-B5 (1991)

Continuum Polarization by Electron Scattering in Rotationally Distorted, Radiation-driven Stellar Winds: B[e] Supergiants. *Cameron J. Boyd & J. M. Marlborough.* 369, 191, 38-C11 (1991)

Bow Shock Models of Ultracompact H II Regions. *Mordecai-Mark Mac Low, Dave Van Buren, Douglas O. S. Wood, & Ed Churchwell.* 369, 395, 42-F1 (1991)

Evolution of the Chromospheres and Winds of Low- and Intermediate-Mass Giant Stars. *P. G. Judge & R. E. Stencel.* 371, 357, 64-E3 (1991)

Enhanced Winds and Tidal Streams in Massive X-Ray Binaries. *John M. Blondin, Ian R. Stevens, & Timothy R. Kallman.* 371, 684, 70-B1 (1991)

Accretion in Wind-driven X-Ray Sources. *Ronald E. Taam, Albert Fu, & B. A. Fryxell.* 371, 696, 70-C1 (1991)

Observations of the Peculiar Object MWC 560 in Outburst. *A. G. Michalitsianos, S. P. Maran, R. J. Oliversen, B. Bopp, E. Kontizas, A. Dapergolas, & M. Kontizas.* 371, 761, 71-A7 (1991)

A Windswept Cometary Tail on the Galactic Center Supergiant IRS 7. *F. Yusef-Zadeh & Mark Morris.* 371, L59, 73-B10 (1991)

Non–LTE Analysis of the Ofpe/WN9 Star HDE 269227 (R84). *Werner Schmutz, Claus Leitherer, Ivan Hubeny, Manfred Vogel, Wolf-Rainer Hamann, & Ulf Wessolowski.* 372, 664, 84-A1 (1991)

Magnetic Confinement, Alfvén Wave Reflection, and the Origins of X-Ray and Mass-Loss "Dividing Lines" for Late-Type Giants and Supergiants. *R. Rosner, C.-H. An, Z. E. Musielak, R. L. Moore, & S. T. Suess.* 372, L91, 85-E5 (1991)

The Formation of Molecules in Protostellar Winds. *A. E. Glassgold, G. A. Mamon, & P. J. Huggins.* 373, 254, 89-B7 (1991)

V1500 Cygni: A Prediction. *J. I. Katz.* 374, L59, 110-D11 (1991)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. I. AO Cassiopeiae. *Douglas R. Gies & Michael S. Wiggs.* 375, 321, 114-G10 (1991)

From Wind to Superwind: The Evolution of Mass-Loss Rates for Mira Models. *G. H. Bowen & L. A. Willson.* 375, L53, 124-C1 (1991)

On Turbulent Diffusion of Magnetic Fields and the Loss of Magnetic Flux from Stars. *Samuel I. Vainshtein & Robert Rosner.* 376, 199, 127-D7 (1991)

Rotational Evolution of Solar-Type Stars. I. Main-Sequence Evolution. *K. B. MacGregor & M. Brenner.* 376, 204, 127-D13 (1991)

First Results from the Goddard High-Resolution Spectrograph: Spectroscopic Determination of Stellar Parameters of Melnick 42, an O3f Star in the Large Magellanic Cloud. *S. R. Heap, B. Altner, D. Ebbets, I. Hubeny, J. B. Hutchings, R. P. Kudritzki, S. A. Voels, S. Haser, A. Pauldrach, J. Puls, & K. Butler.* 377, L29, 143-D6 (1991)

First Results from the Goddard High-Resolution Spectrograph: Evidence for Photospheric Microturbulence in Early O Stars: Are Surface Gravities Systematically Underestimated? *I. Hubeny, S. R. Heap, & B. Altner.* 377, L33, 143-D11 (1991)

Asymptotic Structure of Hydromagnetically Driven Relativistic Winds. *Tzihong Chiueh, Zhi-yun Li, & Mitchell C. Begelman.* 377, 462, 145-D11 (1991)

Observations of Stellar Winds from Hot Stars at 1.3 Millimeters. *Claus Leitherer & Carmelle Robert.* 377, 629, 147-E1 (1991)

Neutrino-heated Stars and Broad-Line Emission from Active Galactic Nuclei. *James MacDonald, Todor Stanev, & Peter L. Biermann.* 378, 30, 151-D4 (1991)

X-Ray–illuminated Stellar Winds: Optically Thick Wind Models for Massive X-Ray Binaries. *Ian R. Stevens.* 379, 310, 167-A1 (1991)

The Collimation of a Time-dependent Stellar Wind. *S.-H. Kim & A. C. Raga.* 379, 689, 173-C4 (1991)

Magnetically Driven Jets and Winds. *R. V. E. Lovelace, H. L. Berk, & J. Contopoulos.* 379, 696, 173-D1 (1991)

Wind Collision Effects in the Early-Type Close Binaries HD 47129 and AO Cassiopeiae. *Jorge Sahade & Estela Brandi.* 379, 706, 173-E1 (1991)

The Onset of Chromospheric Activity among the A and F Stars. *Theodore Simon & Wayne Landsman.* 380, 200, 178-E3 (1991)

Predicted Extreme-Ultraviolet Line Emission for Nearby Main-Sequence B Stars. *J. J. MacFarlane, J. P. Cassinelli, B. Y. Welsh, P. W. Vedder, J. V. Vallerga, & W. L. Waldron.* 380, 564, 185-C1 (1991)

Inverse-Compton Gamma-Ray Emission from Chaotic, Early-Type Stellar Winds and Its Detectability by *Gamma Ray Observatory*. *Wan Chen & Richard L. White.* 381, L63, 199-E1 (1991)

On the Wind Geometry of the Wolf-Rayet Star EZ Canis Majoris. *R. E. Schulte-Ladbeck, K. H. Nordsieck, M. Taylor, M. A. Nook, K. S. Bjorkman, A. M. Magalhães, & C. M. Anderson.* 382, 301, 204-A1 (1991)

Direct Evidence for Stellar Wind X-Ray Absorption in O Stars. *Wayne L. Waldron.* 382, 603, 209-A9 (1991)

Time-dependent Radio Sources in the Star-forming Region Cepheus A (East). *V. A. Hughes.* 383, 280, 215-F1 (1991)

Infrared Recombination Lines of Hydrogen from Young Objects in the Southern Galactic Plane. *Sara C. Beck, Jacqueline Fischer, & Howard A. Smith.* 383, 336, 216-D1 (1991)

Two New Molecular Outflows in L1551? *Marc W. Pound & John Bally.* 383, 705, 223-A7 (1991)

STARS: WOLF-RAYET

Far-Infrared Observations and the Structure of Wolf-Rayet Ring Nebulae. *A. P. Marston.* 366, 181, 3-C9 (1991)

Instabilities in Line-driven Stellar Winds. V. Effect of an Optically Thick Continuum. *S. P. Owocki & G. B. Rybicki.* 368, 261, 26-C11 (1991)

Wolf-Rayet Stars as Starting Points or as Endpoints of the Evolution of Massive Stars? *H. J. G. L. M. Lamers, A. Maeder, W. Schmutz, & J. P. Cassinelli.* 368, 538, 31-F12 (1991)

HD 50896: Blobs in a Wind with a Collapsed Companion or Rotating Disk with Central Filaments? *Anne B. Underhill & Stephenson Yang.* 368, 588, 32-D9 (1991)

Non–LTE Analysis of the Ofpe/WN9 Star HDE 269227 (R84). *Werner Schmutz, Claus Leitherer, Ivan Hubeny, Manfred Vogel, Wolf-Rainer Hamann, & Ulf Wessolowski.* 372, 664, 84-A1 (1991)

Ultraviolet Variability of the Massive W-R Binary System HDE 311884 = WR 47. *Gloria Koenigsberger, Anthony F. J. Moffat, & Lawrence H. Auer.* 376, 272, 128-C9 (1991)

Wolf-Rayet Galaxies: An Introduction and a Catalog. *Peter S. Conti.* 377, 115, 139-D7 (1991)

IRAS 17380−3031: A New Dusty Late WC-Type Wolf-Rayet Star. *Martin Cohen, K. A. van der Hucht, P. M. Williams, & P. S. Thé.* 378, 302, 154-F7 (1991)

On the Wind Geometry of the Wolf-Rayet Star EZ Canis Majoris. *R. E. Schulte-Ladbeck, K. H. Nordsieck, M. Taylor, M. A. Nook, K. S. Bjorkman, A. M. Magalhães, & C. M. Anderson.* 382, 301, 204-A1 (1991)

About the Stage of Evolution of Wolf-Rayet Stars. *Anne B. Underhill.* 383, 729, 223-C6 (1991)

An Infrared Study of Three Wolf-Rayet Ring Nebulae. *J. S. Mathis, J. P. Cassinelli, K. A. van der Hucht, T. Prusti, P. R. Wesselius, & P. M. Williams.* 384, 197, 3-D5 (1992)

Colliding Winds from Early-Type Stars in Binary Systems. *Ian R. Stevens, John M. Blondin, & A. M. T. Pollock.* 386, 265, 27-E1 (1992)

Polarization Variability among Wolf-Rayet Stars. VII. The Single Stars WR 14, WR 25, and WR 69. *Laurent Drissen, Carmelle Robert, & Anthony F. J. Moffat.* 386, 288, 27-F11 (1992)

Constraints on the Surface Magnetic Fields of Hot Stars with Winds. *Murugesapillai Maheswaran & Joseph P. Cassinelli.* 386, 695, 33-G13 (1992)

Influence of the Large-Scale Star Formation Pattern on the Galactic Distribution of Wolf-Rayet Stars. *Emilio J. Alfaro, Antonio J. Delgado, & Jesús Cabrera-Caño.* 386, L47, 36-C5 (1992)

The Wind Geometry of the Wolf-Rayet Star HD 191765. *R. E. Schulte-Ladbeck, K. H. Nordsieck, M. Taylor, K. S. Bjorkman, A. M. Magalhães, & M. J. Wolff.* 387, 347, 41-C6 (1992)

An Accreting Black Hole Model for Sagittarius A*. *Fulvio Melia.* 387, L25, 43-C10 (1992)

Supernova Rates and the Reddening of Wolf-Rayet Stars. *Sidney van den Bergh.* 390, 133, 75-F1 (1992)

On the Chemodynamics of Wolf-Rayet Ring Nebulae: NGC 6888. *César Esteban & José M. Vílchez.* 390, 536, 82-A7 (1992)

The First Linear Polarization Spectra of Wolf-Rayet Stars in the Ultraviolet: EZ Canis Majoris and θ Muscae. *R. E. Schulte-Ladbeck, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, D. Shepherd, M. Taylor, & B. A. Whitney.* 391, L37, 92-C6 (1992)

Upper Limit to the Mass of Pulsationally Stable Stars with Uniform Chemical Composition. *Richard B. Stothers.* 392, 706, 111-A7 (1992)

The Wolf-Rayet System WR 147: A Binary Radio Source with Thermal and Nonthermal Components. *E. Churchwell, J. H. Bieging, K. A. van der Hucht, P. M. Williams, T. A. Th. Spoelstra, & D. C. Abbott.* 393, 329, 118-C1 (1992)

Ultraviolet and Optical Spectral Morphology of Melnick 42 and Radcliffe 136a in 30 Doradus. *Nolan R. Walborn, Dennis C. Ebbets, Joel Wm. Parker, Joy Nichols-Bohlin, & Richard L. White.* 393, L13, 120-C1 (1992)

Self-consistent Models of Wolf-Rayet Stars as Helium Stars with Optically Thick Winds. *Mariko Kato & Icko Iben, Jr.* 394, 305, 131-F13 (1992)

Detection of WC9 Stars in NCG 1365. *Andrew C. Phillips & Peter S. Conti.* 395, L91, 154-A6 (1992)

Photometry, Polarimetry, Spectroscopy, and Spectropolarimetry of the Enigmatic Wolf-Rayet Star EZ Canis Majoris. *Carmelle Robert, Anthony F. J. Moffat, Laurent Drissen, Robert Lamontagne, Wilhelm Seggewiss, Virpi S. Niemela, Miguel A. Cerruti, Paul Barrett, Jeremy Bailey, Jorge Garcia, & Santiago Tapia.* 397, 277, 171-D1 (1992)

Intensive High-Precision Photometric Monitoring of the Variable WN6 Wolf-Rayet Star HD 191765. *I. I. Antokhin, T. R. Irsmambetova, A. F. J. Moffat, A. M. Cherepashchuk, & S. V. Marchenko.* 82, 395, 54-G9 (1992)

The Spectrum of the Peculiar WC7+OB Star HD 192641. *Anne B. Underhill.* 398, 636, 192-A10 (1992)

Polarization Cancellation in the Two-Component Winds from Wolf-Rayet Stars. *M. Taylor & J. P. Cassinelli.* 401, 311, 224-G5 (1992)

Optical Spectrophotometry of Wolf-Rayet Galaxies. *William D. Vacca & Peter S. Conti.* 401, 543, 229-D1 (1992)

Particle Acceleration and Nonthermal Radio Emission in Binaries of Early-Type Stars. *D. Eichler & V. Usov.* 402, 271, 4-D11 (1993)

Colliding Wind Binary Systems: Monte Carlo Simulations of Line-Profile Variability. *Ian R. Stevens.* 404, 281, 31-D3 (1993)

A Spectroscopic Study of the Short-Period Eclipsing Wolf-Rayet Binary CX Cephei (WN5+O5 V). *David Lewis, Anthony F. J. Moffat, Jaymie M. Matthews, Carmelle Robert, & Sergey V. Marchenko.* 405, 312, 45-A11 (1993)

Multiline Transfer and the Dynamics of Wolf-Rayet Winds. *L. B. Lucy & D. C. Abbott.* 405, 738, 52-C5 (1993)

A New Survey of Nebulae around Galactic Wolf-Rayet Stars in the Northern Sky. *Grant J. Miller & You-Hua Chu.* 85, 137, 7-G9 (1993)

C III Spectra in WC Wolf-Rayet Stars: Does Collisional Excitation Dominate? *S. O. Kastner & A. K. Bhatia.* 406, 708, 66-F6 (1993)

The Optically Thin C III Spectrum: Line and Multiplet Intensities. *A. K. Bhatia & S. O. Kastner.* 408, 744, 94-D7 (1993)

Polarization Eclipse Model of the Wolf-Rayet Binary V444 Cygni with Constraints on the Stellar Radii and an Estimate of the Wolf-Rayet Mass-Loss Rate. *N. St-Louis, A. F. J. Moffat, L. Lapointe, Yu. S. Efimov, N. M. Shakhovskoy, G. K. Fox, & V. Piirola.* 410, 342, 116-C10 (1993)

Mass Loss from Wolf-Rayet Stars Due to Radiation Pressure and Alfvén Waves. *L. C. dos Santos, V. Jatenco-Pereira, & R. Opher.* 410, 732, 122-G11 (1993)

Hubble Space Telescope Spectra of the Phase-modulated Wind in the SMC O+WR Binary R31. *J. B. Hutchings, L. Bianchi, & S. C. Morris.* 410, 803, 123-F10 (1993)

The Evolution of Massive Stars Including Mass Loss: Presupernova Models and Explosion. *S. E. Woosley, Norbert Langer, & Thomas A. Weaver.* 411, 823, 140-A14 (1993)

Spectrophotometry of Wolf-Rayet Stars. I. Continuum Energy Distributions. *Patrick W. Morris, Kenneth R. Brownsberger, Peter S. Conti, Philip Massey, & William D. Vacca.* 412, 324, 146-B10 (1993)

Polarization Variability among Wolf-Rayet Stars. VIII. Emission Lines versus Continuum in WR+O Binaries. *Anthony F. J. Moffat & Vilppu Piirola.* 413, 724, 165-D8 (1993)

The "Baldwin Effect" in Wolf-Rayet Stars. *Patrick Morris, Peter S. Conti, Henny J. G. L. M. Lamers, & Gloria Koenigsberger.* 414, L25, 175-E7 (1993)

The Spectrum of EZ Canis Majoris (HD 50896) to the Lyman Limit with the Hopkins Ultraviolet Telescope. *Stephan R. McCandliss, Richard H. Buss, Jr., William P. Blair, Charles W. Bowers, Arthur F. Davidsen, Paul D. Feldman, & Jeffrey W. Kruk.* 416, 372, 205-F3 (1993)

Clumping and Mass Loss in Hot Star Winds. *Anthony F. J. Moffat & Carmelle Robert.* 421, 310, 19-G1 (1994)

Rotation and Magnetic Fields during the Evolution of Massive Stars through B[e] and Wolf-Rayet Phases. *Murugesapillai Maheswaran & Joseph Cassinelli.* 421, 718, 27-B9 (1994)

The Wolf-Rayet Binary V444 Cygni under the Spectroscopic Microscope. I. Improved Characteristics of the Components and Their Interaction Seen in He I. *Sergey V. Marchenko, Anthony F. J. Moffat, & Gloria Koenigsberger.* 422, 810, 42-A5 (1994)

Cygnus X-3 as a Benchmark for Fundamental Properties of Wolf-Rayet Stars. *Anatol M. Cherepashchuk & Anthony F. J. Moffat.* 424, L53, 69-G6 (1994)

On the Nature of the X-Ray Emission from 1E 1024.0−5732/Wack 2134: The First X-Ray–selected Wolf-Rayet Star. *Sandro Mereghetti, Tomaso Belloni, Michael Shara, & Laurent Drissen.* 424, 943, 76-E1 (1994)

Hubble Space Telescope Fine Guidance Sensor Interferometric Observations of the Core of 30 Doradus. *M. G. Lattanzi, J. L. Hershey, R. Burg, L. G. Taff, S. T. Holfeltz, B. Bucciarelli, I. N. Evans, R. Gilmozzi, J. Pringle, & N. R. Walborn.* 427, L21, 117-D1 (1994)

A Thermal Pulse in Progress in the Nucleus of the Large Magellanic Cloud Planetary Nebula N66. *M. Peña, S. Torres-Peimbert, M. Peimbert, M. T. Ruiz, & J. Maza.* 428, L9, 134-B13 (1994)

Ionization Structure of Cygnus X-3: A Massive Iron-depleted Companion? *Nobuo Terasawa & Hiroshi Nakamura.* 92, 477, 38-B13 (1994)

A Survey of Nebulae around Galactic Wolf-Rayet Stars in the Southern Sky. I. *A. P. Marston, Y.-H. Chu, & G. Garcia-Segura.* 93, 229, 44-G7 (1994)

An Atlas of the Interstellar Environment of Wolf-Rayet Stars in the Magellanic Clouds. *M. A. Dopita, J. F. Bell, Y.-H. Chu, & T. A. Lozinskaya.* 93, 455, 48-G7 (1994)

A Study of the Moderately Wide Wolf-Rayet Spectroscopic Binary HD 190918. *Anne B. Underhill & Grant M. Hill.* 432, 770, 205-E10 (1994)

NGC 3603 and Its Wolf-Rayet Stars: Galactic Clone of R136 at the Core of 30 Doradus, but without the Massive Surrounding Cluster Halo. *Anthony F. J. Moffat, Laurent Drissen, & Michael M. Shara.* 436, 183, 263-F7 (1994)

Remarkable Long-Term Changes in the Small Magellanic Cloud Wolf-Rayet System HD 5980. *G. Koenigsberger, A. F. J. Moffat, N. St-Louis, L. H. Auer, L. Drissen, & W. Seggewiss.* 436, 301, 265-D8 (1994)

A Survey of Nebulae around Galactic Wolf-Rayet Stars in the Southern Sky. II. *A. P. Marston, D. R. Yocum, G. Garcia-Segura, & Y.-H. Chu.* 95, 151, 66-A11 (1994)

An Analytic Solution of the Radiative Transfer Equation for a Gray Scattering Atmosphere in Motion. *Shlomi Pistinner & Giora Shaviv.* 436, 837, 277-B13 (1994)

Line Profile Variations from Atmospheric Eclipses: Constraints on the Wind Structure in Wolf-Rayet Stars. *L. H. Auer & G. Koenigsberger.* 436, 859, 277-E5 (1994)

Violent Star Formation in NGC 2363. *Rosa M. González-Delgado, Enrique Pérez, Guillermo Tenorio-Tagle, José M. Vílchez, Elena Terlevich, Roberto Terlevich, Eduardo Telles, José M. Rodríguez-Espinosa, Miguel Mas-Hesse, María Luisa García-Vargas, Ángeles I. Díaz, Jordi Cepa, & Hector Castañeda.* 437, 239, 286-D10 (1994)

Gamma-Ray Lines from the Orion Complex. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 438, L21, 10-A1 (1995)

On the Wind-powered Nebula NGC 2359 and the WN Star HD 56925. *Yang Chen, Zhen-ru Wang, & Qin-yue Qu.* 438, 950, 17-C1 (1995)

Near-Infrared Spectra of Compact Stellar Wind Sources at the Galactic Center. *S. Libonate, J. L. Pipher, W. J. Forrest, & M. L. N. Ashby.* 439, 202, 24-A10 (1995)

Radio and *IRAS* Observations of Two Nebulae around WO Stars: G2.4+1.4 in the Galaxy and Sandage H II Region 3 in IC 1613. *W. M. Goss & Tatiana A. Lozinskaya.* 439, 637, 33-B8 (1995)

Discovery of a Possible Wolf-Rayet Star at the Galactic Center. *R. D. Blum, K. Sellgren, & D. L. DePoy.* 440, L17, 48-D1 (1995)

Time-dependent Behavior and Physical Conditions of the LMC Planetary Nebula N66. *M. Peña, M. Peimbert, S. Torres-Peimbert, M. T. Ruiz, & J. Maza.* 441, 343, 64-B1 (1995)

Momentum Deposition in Wolf-Rayet Winds: Nonisotropic Diffusion with Effectively Gray Opacity. *Kenneth G. Gayley, Stanley P. Owocki, & Steven R. Cranmer.* 442, 296, 81-C2 (1995)

Of-Type Stars HD 16691 and HD 190429 Show WN-like Spectra in Infrared *K* Band. *Peter S. Conti, Margaret Murray Hanson, Patrick W. Morris, Allan J. Willis, & Stephen J. Fossey.* 445, L35, 140-F11 (1995)

Sudden Luminous Blue Variable–Like Behavior of the Wolf-Rayet Binary System HD 5980 in the Small Magellanic Cloud. *Rodolfo H. Barbá, Virpi S. Niemela, Gustavo Baume, & R. A. Vazquez.* 446, L23, 160-D13 (1995)

Line-driven Instability Growth Rates in Wolf-Rayet Winds. *Kenneth G. Gayley & Stanely P. Owocki.* 446, 801, 167-B4 (1995)

Two New Wolf-Rayet Stars and a Luminous Blue Variable Star in the Quintuplet (AFGL 2004) near the Galactic Center. *Donald F. Figer, Ian S. McLean, & Mark Morris.* 447, L29, 180-G9 (1995)

The Nuclear Cluster of the Milky Way: Star Formation and Velocity Dispersion in the Central 0.5 Parsec. *A. Krabbe, R. Genzel, A. Eckart, F. Najarro, D. Lutz, M. Cameron, H. Kroker, L. E. Tacconi-Garman, N. Thatte, L. Weitzel, S. Drapatz, T. Geballe, A. Sternberg, & R. Kudritzki.* 447, L95, 190-F7 (1995)

Large ^{18}O Excesses in Circumstellar Graphite Grains from the Murchison Meteorite: Indication of a Massive-Star Origin. *Sachiko Amari, Ernst Zinner, & Roy S. Lewis.* 447, L147, 191-F4 (1995)

Binary Models for the Solar Neighborhood and Magellanic Cloud W-R Populations. *William W. Dalton & Craig L. Sarazin.* 448, 369, 197-C6 (1995)

Atlas of Synthetic Ultraviolet Spectra of Massive Star Populations. *Claus Leitherer, Carmelle Robert, & Timothy M. Heckman.* 99, 173, 36-F1 (1995)

Identification of Emission-Line Stars in 30 Doradus Using *HST* Observations. *Joel Wm. Parker, Sara R. Heap, & Eliot M. Malumuth.* 448, 705, 204-D11 (1995)

A Theory of Winds from Wolf-Rayet Stars. *D. Eichler, A. Bar Shalom, & J. Oreg.* 448, 858, 206-F6 (1995)

Radio Continuum Measurements of Southern Early-Type Stars. *Claus Leitherer, Jessica M. Chapman, & Bärbel Koribalski.* 450, 289, 232-A7 (1995)

Wind-Wind Interaction in the Close Wolf-Rayet Binary CQ Cephei (WN6+O9 II–Ib). *S. V. Marchenko, A. F. J. Moffat, P. R. J. Eenens, G. M. Hill, & A. Grandchamps.* 450, 811, 241-G10 (1995)

An Eight-Year Study of the Radio Emission from the Wolf-Rayet Binary HD 193793 = WR 140. *Richard L. White & Robert H. Becker.* 451, 352, 250-F8 (1995)

Ultraviolet Observations of the Eruption in the Small Magellanic Cloud Wolf-Rayet System HD 5980. *Gloria Koenigsberger, Ed Guinan, Lawrence Auer, & Leonid Georgiev.* 452, L107, 279-G11 (1995)

An *IRAS*-based Search for New Dusty Late-Type WC Wolf-Rayet Stars. *Martin Cohen.* 100, 413, 51-G1 (1995)

Two X-Ray Sources in 30 Doradus: Wolf-Rayet + Black Hole Binaries? *Q. Daniel Wang.* 453, 783, 294-F9 (1995)

The Initial Mass Function and Massive Star Evolution in the OB Associations of the Northern Milky Way. *Philip Massey, Kelsey E. Johnson, & Kathleen DeGioia-Eastwood.* 454, 151, 301-C12 (1995)

Are Wolf-Rayet Stellar Winds Driven by Radiation Forces? *Shlomi Pistinner & David Eichler.* 454, 404, 304-F8 (1995)

An Improved Line-Strength Parameterization in Hot-Star Winds. *Kenneth G. Gayley.* 454, 410, 305-A4 (1995)

The Hopkins Ultraviolet Telescope Far-Ultraviolet Spectral Atlas of Wolf-Rayet Stars. *Regina E. Schulte-Ladbeck, D. John Hillier, & James E. Herald.* 454, L51, 308-C3 (1995)

The Structure of Wolf-Rayet Winds. I. Observation of Ionization Stratification in WR 6 and WR 111. *Regina E. Schulte-Ladbeck, Philippe R. J. Eenens, & Kevin Davis.* 454, 917, 314-D11 (1995)

The Importance of Radiative Braking for the Wind Interaction in the Close WR+O Binary V444 Cygni. *S. P. Owocki & K. G. Gayley.* 454, ! 145, 316-E11 (1995)

Wolf-Rayet Bubbles. I. Analytic Solutions. *Guillermo García-Segura & Mordecai-Mark Mac Low.* 455, 145, 320-B13 (1995)

Wolf-Rayet Bubbles. II. Gasdynamical Situations. *Guillermo García-Segura & Mordecai-Mark Mac Low.* 455, 160, 320-D3 (1995)

STARS: X-RAYS

Nonthermal X-Ray Emission from Winds of OB Supergiants. *Wan Chen & Richard L. White.* 366, 512, 9-D1 (1991)

On Winds and X-Rays of O-Type Stars. *Tomasz Chlebowski & Catharine D. Garmany.* 368, 241, 26-B1 (1991)

Nonthermal Radio Emission from the X-Ray–Bright K5 IV Star 1E 1751+7046. *Stephen L. Skinner.* 368, 272, 26-D11 (1991)

Neutron Star Thermal Evolution. *Kenneth A. Van Riper.* 75, 449, 6-G7 (1991)

Steady State Energy Sources in Neutron Stars. *Kenneth A. Van Riper.* 372, 251, 77-A13 (1991)

On the X-Ray–emitting Boundary Layer of the Dwarf Nova VW Hydri. *Christopher W. Mauche, Richard A. Wade, Ronald S. Polidan, Hans van der Woerd, & Frits B. S. Paerels.* 372, 659, 83-G7 (1991)

Magnetic Confinement, Alfvén Wave Reflection, and the Origins of X-Ray and Mass-Loss "Dividing Lines" for Late-Type Giants and Supergiants. *R. Rosner, C.-H. An, Z. E. Musielak, R. L. Moore, & S. T. Suess.* 372, L91, 85-E5 (1991)

X-Ray Emission from Hybrid-Chromosphere Stars. *Alexander Brown, Stephen A. Drake, Michael E. Van Steenberg, & Jeffrey L. Linsky.* 373, 614, 95-E9 (1991)

Thermal X-Ray Emission from Classical Novae in Optical Decline. *James MacDonald & Stéphane Vennes.* 373, L51, 97-C4 (1991)

The *Einstein Observatory* Extended Medium-Sensitivity Survey. II. The Optical Identifications. *John T. Stocke, Simon L. Morris, I. M. Gioia, T. Maccacaro, R. Schild, A. Wolter, Thomas A. Fleming, & J. Patrick Henry.* 76, 813, 36-B1 (1991)

Digging in the Coronal Graveyard: A *ROSAT* Observation of the Red Giant Arcturus. *Thomas R. Ayres, Thomas A. Fleming, & Juergen H. M. M. Schmitt.* 376, L45, 137-C7 (1991)

The *EXOSAT* High Galactic Latitude Survey. *P. Giommi, G. Tagliaferri, K. Beuermann, G. Branduardi-Raymont, R. Brissenden, U. Graser, K. O. Mason, J. D. P. Mittaz, P. Murdin, G. Pooley, H.-C. Thomas, & I. Tuohy.* 378, 77, 152-A5 (1991)

The Unusual X-Ray Pulse Timing of AE Aquarii. *O. C. de Jager.* 378, 286, 154-E1 (1991)

Very High Energy Gamma-Ray Emission from Accreting X-Ray Pulsars. *K. S. Cheng, K. N. Yu, T. Cheung, & M. M. Lau.* 379, 290, 166-F1 (1991)

Discovery of Periodic Eclipses in the X-Ray Pulsar 1H 0253+193. *Yuichi Kamata, Yuzuru Tawara, & Katsuji Koyama.* 379, L65, 175-C13 (1991)

Numerical Simulations of Flares on M Dwarf Stars. I. Hydrodynamics and Coronal X-Ray Emission. *Chung-Chieh Cheng & Roberto Pallavicini.* 381, 234, 191-G12 (1991)

Soft X-Ray Pulses from Neutron Star Glitches. *Kenneth A. Van Riper, Richard I. Epstein, & Guy S. Miller.* 381, L47, 199-C1 (1991)

X-Ray Spectra of Cataclysmic Variables from the *Einstein Observatory*. *Michael Eracleous, Jules Halpern, & Joseph Patterson.* 382, 290, 203-G1 (1991)

Direct Evidence for Stellar Wind X-Ray Absorption in O Stars. *Wayne L. Waldron.* 382, 603, 209-A9 (1991)

The Coronal Dividing Line in the *ROSAT* X-Ray All-Sky Survey. *Bernhard Haisch, J. H. M. M. Schmitt, & C. Rosso.* 383, L15, 219-C1 (1991)

Surface Temperature of a Magnetized Neutron Star and Interpretation of the *ROSAT* Data. I. Dipolar Fields. *Dany Page.* 442, 273, 81-A1 (1995)

Frictional Heating and Neutron Star Thermal Evolution. *Kenneth A. Van Riper, Bennett Link, & Richard I. Epstein.* 448, 294, 196-C6 (1995)

SUN: ABUNDANCES

The Response of the Adiabatic Exponent Γ_1 to Modifications of Solar Models. *J. Christensen-Dalsgaard & M. J. Thompson.* 367, 666, 21-E4 (1991)

High Sensitivity of *p*-Modes near the Acoustic Cutoff Frequency to Solar Model Parameters. *D. B. Guenther.* 369, 247, 39-A5 (1991)

Solar Abundances from Gamma-Ray Spectroscopy: Comparisons with Energetic Particle, Photospheric, and Coronal Abundances. *R. J. Murphy, R. Ramaty, B. Kozlovsky, & D. V. Reames.* 371, 793, 71-D6 (1991)

The Effects of Mass Flow on the Temperature and Abundance Structure of the Solar Transition Region. *D. Tod Woods & Thomas E. Holzer.* 375, 800, 122-E7 (1991)

Accurate Oscillator Strengths of Astrophysical Interest for Neutral Oxygen. *E. Biémont, A. Hibbert, M. Godefroid, N. Vaeck, & B. C. Fawcett.* 375, 818, 122-G1 (1991)

Our Sun. II. Early Mass Loss of 0.1 $M_\odot$ and the Case of the Missing Lithium. *Arnold I. Boothroyd, I.-Juliana Sackmann, & William A. Fowler.* 377, 318, 141-G11 (1991)

The Depth of the Solar Convection Zone. *J. Christensen-Dalsgaard, D. O. Gough, & M. J. Thompson.* 378, 413, 156-B4 (1991)

The Iron-to-Calcium Abundance Ratio in the 20×10^6 K Plasma of Medium and Large Solar Flares. *K. J. H. Phillips & U. Feldman.* 379, 401, 168-A5 (1991)

Gravitational Settling in Solar Models. *Charles R. Proffitt & Georges Michaud.* 380, 238, 179-A5 (1991)

Relative Abundances in the Lower Solar Transition Region. *G. A. Doschek, K. P. Dere, & P. A. Lund.* 381, 583, 198-A1 (1991)

On the Differences in Element Abundances of Energetic Ions from Corotating Events and from Large Solar Events. *D. V. Reames, I. G. Richardson, & L. M. Barbier.* 382, L43, 205-E7 (1991)

On the Sensitivity of High-Degree *p*-Mode Frequencies to the Solar Convection Zone Helium Abundance. *Joyce A. Guzik & Arthur N. Cox.* 386, 729, 34-D1 (1992)

Variations in the Relative Elemental Abundances of Oxygen, Neon, Magnesium, and Iron in High-Temperature Solar Active-Region and Flare Plasmas. *D. L. McKenzie & U. Feldman.* 389, 764, 70-G7 (1992)

Measurement of the ^{76}Se(n, γ) Capture Cross Section and Phenomenological *s*-Process Studies: The Weak Component. *Hermann Beer, G. Walter, & F. Käppeler.* 389, 784, 71-B1 (1992)

Variable Carbon and Oxygen Abundances in the Solar Wind as Observed in Earth's Magnetosheath by *AMPTE/CCE*. *R. von Steiger, S. P. Christon, G. Gloeckler, & F. M. Ipavich.* 389, 791, 71-B10 (1992)

Composition and Azimuthal Spread of Solar Energetic Particles from Impulsive and Gradual Flares. *M.-B. Kallenrode, E. W. Cliver, & G. Wibberenz.* 391, 370, 90-D12 (1992)

The Fate of ^{7}Be in the Sun. *C. W. Johnson, E. Kolbe, S. E. Koonin, & K. Langanke.* 392, 320, 105-A1 (1992)

Element Abundances and Plasma Properties in a Coronal Polar Plume. *K. G. Widing & U. Feldman.* 392, 715, 111-B5 (1992)

Helium Diffusion in the Sun. *J. N. Bahcall & M. H. Pinsonneault.* 395, L119, 154-D7 (1992)

The He II 1640 Å Multiplet Observed from Solar Prominences. *J. M. Laming & U. Feldman.* 403, 434, 19-B11 (1993)

On the Absolute Abundance of Calcium in Solar Flares. *Alphonse C. Sterling, George A. Doschek, & Uri Feldman.* 404, 394, 32-F7 (1993)

The Abundances of Hydrogen, Helium, Oxygen, and Iron Accelerated in Large Solar Particle Events. *J. E. Mazur, G. M. Mason, B. Klecker, & R. E. McGuire.* 404, 810, 39-A8 (1993)

A Critical List of Voigt-fitted Equivalent Width Measurements Based on the Solar Flux Spectrum. *Thomas Meylan, Ingemar Furenlid, Michael S. Wiggs, & R. L. Kurucz.* 85, 163, 8-D1 (1993)

Elemental Abundances of Flaring Solar Plasma: Enhanced Neon and Sulfur. *J. T. Schmelz.* 408, 373, 87-G5 (1993)

Using Solar *p*-Modes to Determine the Convection Zone Depth and Constrain Diffusion-produced Composition Gradients. *Joyce A. Guzik & Arthur N. Cox.* 411, 394, 132-C4 (1993)

Ion Acceleration and Abundance Enhancements by Electron Beam Instabilities in Impulsive Solar Flares. *James A. Miller & Adolfo F. Viñas.* 412, 386, 146-G12 (1993)

New *f*-Values in C I and the CNO Abundances in the Sun. *E. Biémont, A. Hibbert, M. Godefroid, & N. Vaeck.* 412, 431, 147-D12 (1993)

The Significance of the Interstellar ^{7}Li/^{6}Li Ratio. *Gary Steigman.* 413, L73, 168-C12 (1993)

Elemental Abundances in the Upper Solar Atmosphere of Quiet and Coronal Hole Regions ($T_e \approx 4.3 \times 10^5$ K). *U. Feldman & K. G. Widing.* 414, 381, 174-F9 (1993)

Nonphotospheric Abundances in a Solar Active Region. *K. G. Widing & U. Feldman.* 416, 392, 206-A1 (1993)

Coronal Abundances of Neon and Magnesium Isotopes from Solar Energetic Particles. *R. S. Selesnick, A. C. Cummings, J. R. Cummings, R. A. Leske, R. A. Mewaldt, E. C. Stone, & T. T. von Rosenvinge.* 418, L45, 238-F1 (1993)

Helium-like Argon Line Emission in Solar Flares. *K. J. H. Phillips, L. K. Harra, F. P. Keenan, D. M. Zarro, & M. Wilson.* 419, 426, 251-E3 (1993)

Solar Coronal Abundances of Elements with Low First Ionization Potential: Chromium, Calcium, and Aluminum. *D. L. McKenzie & U. Feldman.* 420, 892, 14-A7 (1994)

On the Derivation of Empirical Limits on the Helium Abundance in Coronal Holes below 1.5 $R_\odot$. *Shadia Rifai Habbal & Ruth Esser.* 421, L59, 22-C5 (1994)

Energetic-Particle Abundances in Impulsive Solar Flare Events. *D. V. Reames, J. P. Meyer, & T. T. von Rosenvinge.* 90, 649, 11-G7 (1994)

Separation of Low First Ionization Potential Ions from High First Ionization Potential Neutrals in the Low Chromosphere. *R. Grant Athay.* 423, 516, 52-E5 (1994)

The Hyades Lithium Problem Revisited. *Fritz J. Swenson, John Faulkner, Forrest J. Rogers, & Carlos A. Iglesias.* 425, 286, 83-G3 (1994)

Heavy-Ion Isotopic Anomalies in ^{3}He-rich Solar Particle Events. *G. M. Mason, J. E. Mazur, & D. C. Hamilton.* 425, 843, 92-C5 (1994)

Effects of Heavy-Element Settling on Solar Neutrino Fluxes and Interior Structures. *Charles R. Proffitt.* 425, 849, 92-C13 (1994)

The Solar Abundance of Helium Determined from a Redshifted Plasma Flow over a Sunspot. *J. M. Laming & U. Feldman.* 426, 414, 101-D3 (1994)

Measuring the Helium Abundance in the Solar Envelope: The Role of the Equation of State. *H. M. Antia & Sarbani Basu.* 426, 801, 108-D9 (1994)

Coupling of the Coronal Helium Abundance to the Solar Wind. *Viggo H. Hansteen, Egil Leer, & Thomas E. Holzer.* 428, 843, 140-G1 (1994)

The Composition of a Coronal Active Region. *K. Waljeski, D. Moses, K. P. Dere, J. L. R. Saba, K. T. Strong, D. F. Webb, & D. M. Zarro.* 429, 909, 157-A5 (1994)

The Possibility of Forming an Inhomogeneous Sun and the Solar Neutrino Deficit. *E. H. Levy & T. V. Ruzmaikina.* 431, 881, 189-F1 (1994)

Iron Kβ Line Emission in Solar Flares Observed by *Yohkoh* and the Solar Abundance of Iron. *K. J. H. Phillips, C. D. Pike, J. Lang, T. Watanabe, & M. Takahashi.* 435, 888, 258-D3 (1994)

The Carbon Isotope Abundance Ratio in Comet Halley. *Marvin Kleine, Susan Wyckoff, Peter A. Wehinger, & Bruce A. Peterson.* 439, 1021, 38-F13 (1995)

A Volcanic Origin for High-FIP Material in the Solar Atmosphere. *N. R. Sheeley, Jr.* 440, 884, 55-C12 (1995)

Stellar Models with Microscopic Diffusion and Rotational Mixing. I. Application to the Sun. *Brian Chaboyer, P. Demarque, & M. H. Pinsonneault.* 441, 865, 73-G13 (1995)

Abundance Ratios of Oxygen, Neon, and Magnesium in Solar Active Regions and Flares: The FIP Effect. *K. G. Widing & U. Feldman.* 442, 446, 83-B3 (1995)

The ^{3}He/^{4}He Ratios for Solar Energetic Particle Events during the *Combined Release and Radiation Effects Satellite* Mission. *Jiasheng Chen, T. Gregory Guzik, & John P. Wefel.* 442, 875, 92-C1 (1995)

Absolute Abundances of Flaring Coronal Plasma Derived from *SMM* Spectral Observations. *A. Fludra & J. T. Schmelz.* 447, 936, 188-G1 (1995)

Early Solar Mass Loss, Element Diffusion, and Solar Oscillation Frequencies. *Joyce A. Guzik & Arthur N. Cox.* 448, 905, 207-D7 (1995)

Solar ^{3}He-rich Events and Ion Acceleration in Two Stages. *T. X. Zhang.* 449, 916, 225-D6 (1995)

Differential Emission Measure and Iron-to-Calcium Abundance in Solar Flare Plasmas. *Ester Antonucci & Renato Martin.* 451, 402, 251-D6 (1995)

Charge State Measurements of Solar Energetic Particles Observed with *SAMPEX*. *G. M. Mason, J. E. Mazur, M. D. Looper, & R. A. Mewaldt.* 452, 901, 277-B7 (1995)

Gamma-Ray Measurements of Flare-to-Flare Variations in Ambient Solar Abundances. *Gerald H. Share & Ronald J. Murphy.* 452, 933, 277-E4 (1995)

New and Alternative Line Identifications in Solar Chromospheric and Photospheric Spectra. *S. O. Kastner.* 100, 473, 52-D13 (1995)

Fractionation of Xe, Kr, and Ar in the Solar Corpuscular Radiation Deduced by Closed System Etching of Lunar Soils. *Rainer Wieler & Heinrich Baur.* 453, 987, 297-E7 (1995)

Solar Atmopheric Abundances and Energy Content in Flare Accelerated Ions from Gamma-Ray Spectroscopy. *Reuven Ramaty, Natalie Mandzhavidze, Benzion Kozlovsky, & Ronald J. Murphy.* 455, L193, 335-A4 (1995)

SUN: ACTIVITY

Solar Cycle Variation of the Interplanetary Magnetic Field Spiral. *Charles W. Smith & John W. Bieber.* 370, 435, 52-F4 (1991)

A Search for the 154 Day Periodicity in the Occurrence Rate of Solar Flares Using Ottawa 2.8 GHz Burst Data, 1955–1990. *J. N. Kile & E. W. Cliver.* 370, 442, 52-F13 (1991)

Solar Radio Microbursts at 1.4 GHz. *T. S. Bastian.* 370, L49, 53-F11 (1991)

Solar-Cycle Modulation of Event Rates in the Chlorine Solar Neutrino Experiment. *John N. Bahcall & William H. Press.* 370, 730, 57-E1 (1991)

The Magnetic Network Location of Explosive Events Observed in the Solar Transition Region. *J. G. Porter & K. P. Dere.* 370, 775, 58-A11 (1991)

Dynamic Magnetic Reconnection at an X-Type Neutral Point. *I. J. D. Craig & A. N. McClymont.* 371, L41, 66-F1 (1991)

Evidence for a 250 Second Brightness Oscillation at 1600 Å in the Solar Temperature Minimum Region. *J. W. Cook & J. A. Ewing.* 371, 804, 71-E5 (1991)

Cosmic-Ray Diurnal Anisotropy, 1936–1988: Implications for Drift and Modulation Theories. *John W. Bieber & Jiasheng Chen.* 372, 301, 77-F4 (1991)

Line-blanketing Variations in the Irradiance Spectrum of the Sun from Maximum to Minimum of the Solar Cycle. *W. E. Mitchell, Jr., & W. C. Livingston.* 372, 336, 78-B6 (1991)

Solar Modulation of Cosmic Electrons: Evidence for Dynamic Regulation. *Evelyn Tuska, Paul Evenson, & Peter Meyer.* 373, L27, 91-D1 (1991)

Short-Term Changes in Solar Oscillation Frequencies and Solar Activity. *M. F. Woodard, J. R. Kuhn, N. Murray, & K. G. Libbrecht.* 373, L81, 97-F12 (1991)

Polar Faculae: 1906–1990. *N. R. Sheeley, Jr.* 374, 386, 102-G11 (1991)

The Stretching of Magnetic Flux Tubes in the Convective Overshoot Region. *George H. Fisher, Alexander N. McClymont, & Dean-Yi Chou.* 374, 766, 108-E10 (1991)

Is There an Acoustic Resonance in the Solar Chromosphere? *M. F. Woodard & K. G. Libbrecht.* 374, L61, 110-E1 (1991)

Magnetic Flux Transport and the Sun's Dipole Moment: New Twists to the Babcock-Leighton Model. *Y.-M. Wang & N. R. Sheeley, Jr.* 375, 761, 122-B5 (1991)

Avalanches and the Distribution of Solar Flares. *Edward T. Lu & Russell J. Hamilton.* 380, L89, 188-F5 (1991)

Nonfacular Solar Luminosity Variations. *J. R. Kuhn & K. G. Libbrecht.* 381, L35, 194-E1 (1991)

Signatures of Cosmic-Ray Interactions on the Solar Surface. *D. Seckel, Todor Stanev, & T. K. Gaisser.* 382, 652, 209-F8 (1991)

A New Solar Cycle Model Including Meridional Circulation. *Y.-M. Wang, N. R. Sheeley, Jr., & A. G. Nash.* 383, 431, 217-F1 (1991)

New Information on Solar Activity, 1779–1818, from Sir William Herschel's Unpublished Notebooks. *Douglas V. Hoyt & Kenneth H. Schatten.* 384, 361, 5-D9 (1992)

Sir William Herschel's Notebooks: Abstracts of Solar Observations. *Douglas V. Hoyt & Kenneth H. Schatten.* 78, 301, 5-G9 (1992)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. I. General Effects of the Changing Neutral Sheet over the Period 1985–1990. *M. S. Potgieter & J. A. Le Roux.* 386, 336, 28-D4 (1992)

Superevents: Their Origin and Propagation through the Heliosphere from 0.3 to 35 AU. *Wolfgang Dröge, Reinhold Müller-Mellin, & Edward W. Cliver.* 387, L97, 48-E10 (1992)

The 77 Day Periodicity in the Flare Rate of Cycle 22. *T. Bai.* 388, L69, 59-D3 (1992)

Large-Scale Flows and Solar Luminosity Variations. *S. Arendt.* 389, 421, 65-B6 (1992)

Solar Active Regions as a Percolation Phenomenon. *Donat G. Wentzel & Philip E. Seiden.* 390, 280, 77-D10 (1992)

Spatially Extended Measurements of Magnetic Field Strength in Solar Plages. *Douglas Rabin.* 391, 832, 98-C6 (1992)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. III. General Energy Dependence. *M. S. Potgieter & J. A. Le Roux.* 392, 300, 104-F5 (1992)

On the Differences between Plage and Quiet Sun in the Solar Photosphere. *Alan M. Title, Kenneth P. Topka, Theodore D. Tarbell, Wolfgang Schmidt, Christiaan Balke, & Göran Scharmer.* 393, 782, 125-E1 (1992)

Predicting Wolf's Sunspot Numbers with and without the Assumption of Periodicity. *Patricia B. Cerrito.* 393, 795, 125-G1 (1992)

The *Galileo* and *Pioneer Venus* Ultraviolet Spectrometer Experiments: Solar Lyman-α Latitude Variation at Solar Maximum from Interplanetary Lyman-α Observations. *W. R. Pryor, J. M. Ajello, C. A. Barth, C. W. Hord, A. I. F. Stewart, K. E. Simmons, W. E. McClintock, B. R. Sandel, & D. E. Shemansky.* 394, 363, 132-D11 (1992)

Multiple Periodicities in the Solar Magnetic Field: Possible Origin in a Multiple-Mode Solar Dynamo. *D. W. Boyer & E. H. Levy.* 396, 340, 159-C6 (1992)

Search for Evidence of a Clock Related to the Solar 154 Day Complex of Periodicities. *P. A. Sturrock & T. Bai.* 397, 337, 172-A13 (1992)

Methods of Periodicity Analysis: Relationship between the Rayleigh Analysis and a Maximum Likelihood Method. *T. Bai.* 397, 584, 178-C6 (1992)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. IV. The Role of Heliospheric Neutral Sheet Deformation. *J. A. Le Roux & M. S. Potgieter.* 397, 686, 179-E11 (1992)

Pervasive Variability in the Quiet Solar Transition Region. *Douglas Rabin & James F. Dowdy, Jr.* 398, 665, 192-D1 (1992)

Three-dimensional Structures of Magnetostatic Atmospheres. IV. Magnetic Structures over a Solar Active Region. *B. C. Low.* 399, 300, 199-A6 (1992)

Solar Activity and Oscillation Frequency Splittings. *M. F. Woodard & K. G. Libbrecht.* 402, L77, 13-B1 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. I. Stellar Evolution, Lithium Abundance, and Photospheric Structure. *D. Dravins, L. Lindegren, Å. Nordlund, & D. A. VandenBerg.* 403, 385, 18-E10 (1993)

The Role of Merged Interaction Regions and Drifts in the Heliospheric Modulation of Cosmic Rays beyond 20 AU: A Computer Simulation. *M. S. Potgieter, J. A. Le Roux, L. F. Burlaga, & F. B. McDonald.* 403, 760, 25-C1 (1993)

On the North-South Asymmetry of Solar Activity Cycles. *V. K. Verma.* 403, 797, 25-G1 (1993)

Variability of the Occurrence Frequency of Solar Flares as a Function of Peak Hard X-Ray Rate. *T. Bai.* 404, 805, 39-A1 (1993)

Cosmic-Ray Anisotropies and Gradients in Three Dimensions. *Jiasheng Chen & John W. Bieber.* 405, 375, 45-G3 (1993)

The Origin of Morphological Asymmetries in Bipolar Active Regions. *Y. Fan, G. H. Fisher, & E. E. DeLuca.* 405, 390, 46-A7 (1993)

Normal Incidence X-Ray Telescope Power Spectra of X-Ray Emission from Solar Active Regions. I. Observations. *Daniel O. Gómez, Petrus C. H. Martens, & Leon Golub.* 405, 767, 52-E9 (1993)

Normal Incidence X-Ray Telescope Power Spectra of X-Ray Emission from Solar Active Regions. II. Theory. *Daniel O. Gómez, Petrus C. H. Martens, & Leon Golub.* 405, 773, 52-F3 (1993)

The Morphology of Flare Phenomena, Magnetic Fields, and Electric Currents in Active Regions. I. Introduction and Methods. *Richard C. Canfield, J.-F. de La Beaujardière, Yuhong Fan, K. D. Leka, A. N. McClymont, Thomas R. Metcalf, Donald L. Mickey, Jean-Pierre Wülser, & Bruce W. Lites.* 411, 362, 131-G1 (1993)

The Morphology of Flare Phenomena, Magnetic Fields, and Electric Currents in Active Regions. II. NOAA Active Region 5747 (1989 October). *K. D. Leka, Richard C. Canfield, A. N. McClymont, J.-F. de La Beaujardière, Yuhong Fan, & F. Tang.* 411, 370, 131-G12 (1993)

The Morphology of Flare Phenomena, Magnetic Fields, and Electric Currents in Active Regions. III. NOAA Active Region 6233 (1990 August). *J.-F. de La Beaujardière, Richard C. Canfield, & K. D. Leka.* 411, 378, 132-A10 (1993)

p-Mode Frequency Variation in Relation to Global Solar Activity. *Kurt T. Bachmann & Timothy M. Brown.* 411, L45, 134-C1 (1993)

Do *p*-Mode Frequency Shifts Suggest a Hotter Chromosphere at Solar Maximum? *Rekha Jain & B. Roberts.* 414, 898, 182-D12 (1993)

Understanding the Rotation of Coronal Holes. *Y.-M. Wang & N. R. Sheeley, Jr.* 414, 916, 182-F7 (1993)

The Center-to-Limb Brightness Variation of the Sun at $\lambda = 850$ Microns. *T. S. Bastian, M. W. Ewell, Jr., & H. Zirin.* 415, 364, 189-D13 (1993)

Nonphotospheric Abundances in a Solar Active Region. *K. G. Widing & U. Feldman.* 416, 392, 206-A1 (1993)

Magnetospheres of Solar Active Regions Inferred from Spectral-Polarization Observations with High Spatial Resolution. *K. R. Lang, R. F. Willson, J. N. Kile, J. Lemen, K. T. Strong, V. L. Bogod, G. B. Gelfreikh, B. I. Ryabov, S. R. Hafizov, V. E. Abramov, & S. V. Svetkov.* 419, 398, 251-B7 (1993)

Coronal Temperature, Density, and Magnetic Field Maps of a Solar Active Region Using the Owens Valley Solar Array. *Dale E. Gary & G. J. Hurford.* 420, 903, 14-B6 (1994)

The Correlation of Solar Flare Hard X-Ray Bursts with Doppler Blueshifted Soft X-Ray Flare Emission. *R. D. Bentley, G. A. Doschek, G. M. Simnett, M. L. Rilee, J. T. Mariska, J. L. Culhane, T. Kosugi, & T. Watanabe.* 421, L55, 22-B13 (1994)

Interactions between Nested Sunspots. I. The Formation and Breakup of a Delta-Type Sunspot. *V. Gaizauskas, K. L. Harvey, & M. Proulx.* 422, 883, 42-G6 (1994)

Morphology of Active Region Transient Brightenings with the *Yohkoh* Soft X-Ray Telescope. *Toshifumi Shimizu, Saku Tsuneta, Loren W. Acton, James R. Lemen, Yoshiaki Ogawara, & Yutaka Uchida.* 422, 906, 43-B13 (1994)

Separation of Low First Ionization Potential Ions from High First Ionization Potential Neutrals in the Low Chromosphere. *R. Grant Athay.* 423, 516, 52-E5 (1994)

The Long-Term Heliospheric Modulation of Galactic Cosmic Rays according to a Time-dependent Drift Model with Merged Interaction Regions. *M. S. Potgieter & J. A. Le Roux.* 423, 817, 58-G6 (1994)

Extreme Ultraviolet Spectrum of a Solar Active Region from SERTS. *Roger J. Thomas & Werner M. Neupert.* 91, 461, 24-G4 (1994)

The Inclination of Network Magnetic Fields. *J. Sánchez Almeida & V. Martínez Pillet.* 424, 1014, 77-D7 (1994)

Nonthermal Radio Emission Associated with a Coronal Disconnection Event. *N. Gopalswamy, M. R. Kundu, & O. C. St. Cyr.* 424, L135, 79-F3 (1994)

Comparison between Cool and Hot Plasma Behaviors of Surges. *B. Schmieder, L. Golub, & S. K. Antiochos.* 425, 326, 84-C6 (1994)

VLA Stereoscopy of Solar Active Regions. I. Method and Tests. *Markus J. Aschwanden & T. S. Bastian.* 426, 425, 101-E2 (1994)

VLA Stereoscopy of Solar Active Regions. II. Altitude, Relative Motion, and Center-to-Limb Darkening of 20 Centimeter Emission. *Markus J. Aschwanden & T. S. Bastian.* 426, 434, 101-E13 (1994)

Nonthermal Processes in Flaring X-Ray–bright Points. *M. R. Kundu, K. T. Strong, M. Pick, S. M. White, H. S. Hudson, K. L. Harvey, & S. R. Kane.* 427, L59, 118-A1 (1994)

A Method of Determining Possible Brightness Variations of the Sun in Past Centuries from Observations of Solar-Type Stars. *Q. Zhang, W. H. Soon, S. L. Baliunas, G. W. Lockwood, B. A. Skiff, & R. R. Radick.* 427, L111, 127-D3 (1994)

Electric Currents and Coronal Heating in NOAA Active Region 6952. *T. R. Metcalf, R. C. Canfield, H. S. Hudson, D. L. Mickey, J.-P. Wülser, P. C. H. Martens, & S. Tsuneta.* 428, 860, 141-A10 (1994)

The Composition of a Coronal Active Region. *K. Waljeski, D. Moses, K. P. Dere, J. L. R. Saba, K. T. Strong, D. F. Webb, & D. M. Zarro.* 429, 909, 157-A5 (1994)

The Determination of Electron Densities in the Solar Atmosphere from the 1718.56 Å/1486.51 Å Emission-Line Ratio in N IV. *F. P. Keenan, L. K. Harra, G. A. Doschek, & J. W. Cook.* 432, 806, 206-A10 (1994)

Variation of the Frequencies of Very Low l p-Modes. *C. Régulo, A. Jiménez, P. L. Pallé, F. Pérez Hernández, & T. Roca Cortés.* 434, 384, 230-G4 (1994)

Solar p-Mode Frequencies and Their Dependence on Solar Activity: Recent Results from the BISON Network. *Y. Elsworth, R. Howe, G. R. Isaak, C. P. McLeod, B. A. Miller, R. New, C. C. Speake, & S. J. Wheeler.* 434, 801, 239-A1 (1994)

The Rotation of the Solar Core. *Antonio Jiménez, Fernando Pérez Hernández, Antonio Claret, Pere LLuis Pallé, Clara Régulo, & Teodoro Roca Cortés.* 435, 874, 258-B10 (1994)

Dynamics of Emerging Active Region Flux Loops. *Y. Fan, G. H. Fisher, & A. N. McClymont.* 436, 907, 278-B13 (1994)

Transient Microwave Brightenings in Solar Active Regions: Comparison between VLA and *Yohkoh* Observations. *N. Gopalswamy, T. E. W. Payne, E. J. Schmahl, M. R. Kundu, J. R. Lemen, K. T. Strong, R. C. Canfield, & J. de La Beaujardiere.* 437, 522, 290-C3 (1994)

On the Correlation of Solar Surface Magnetic Flux with Solar Neutrino Capture Rate. *David S. Oakley, Herschel B. Snodgrass, Roger K. Ulrich, & Toni L. VanDeKop.* 437, L63, 292-C7 (1994)

The Role of Photospheric Magnetic Fields in the Variation of Solar Oscillation Eigenfrequencies. *C. S. Rosenthal.* 438, 434, 7-D13 (1995)

Comparisons between Theory and Observation of Active Region Tilts. *G. H. Fisher, Y. Fan, & R. F. Howard.* 438, 463, 8-A1 (1995)

Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. II. The Origin of Enhanced Solar Irradiance. *E. N. Parker.* 440, 415, 47-A1 (1995)

A Volcanic Origin for High-FIP Material in the Solar Atmosphere. *N. R. Sheeley, Jr.* 440, 884, 55-C12 (1995)

A Measurement of the Background Solar Velocity Spectrum. *P. L. Pallé, A. Jiménez, F. Pérez Hernández, C. Régulo, T. Roca Cortés, & L. Sánchez.* 441, 952, 75-A9 (1995)

Abundance Ratios of Oxygen, Neon, and Magnesium in Solar Active Regions and Flares: The FIP Effect. *K. G. Widing & U. Feldman.* 442, 446, 83-B3 (1995)

The Simulation of Complete 11 and 22 Year Modulation Cycles for Cosmic Rays in the Heliosphere Using a Drift Model with Global Merged Interaction Regions. *J. A. le Roux & M. S. Potgieter.* 442, 847, 91-G3 (1995)

An Estimate of the Location of the Modulation Boundary for $E > 70$ MeV Galactic Cosmic Rays Using *Voyager* and *Pioneer* Spacecraft Data. *J. A. Lockwood & W. R. Webber.* 442, 852, 91-G12 (1995)

Uncertainties for Two-dimensional Models of Solar Rotation from Helioseismic Eigenfrequency Splitting. *Christopher R. Genovese, Philip B. Stark, & Michael J. Thompson.* 443, 843, 109-D13 (1995)

Ultraviolet Observations of the Structure and Dynamics of an Active Region at the Limb. *C. M. Korendyke, K. P. Dere, D. G. Socker, G. E. Brueckner, & B. Schmieder.* 443, 869, 109-G10 (1995)

Neural Network Prediction of Solar Activity. *R. A. Calvo, H. A. Ceccatto, & R. D. Piacentini.* 444, 916, 129-A8 (1995)

Optical Diagnostics of Coronal Loop Interactions. *Vladimir S. Airapetian & Raymond N. Smartt.* 445, 489, 139-C6 (1995)

Reduction, Analysis, and Properties of Electric Current Systems in Solar Active Regions. *G. Allen Gary & Pascal Démoulin.* 445, 982, 148-G12 (1995)

The Statistical Physics of Solar Active Regions and the Fundamental Nature of Solar Flares. *Edward T. Lu.* 446, L109, 171-E3 (1995)

Detection of Nonthermal Radio Emission from Coronal X-Ray Jets. *M. R. Kundu, J. P. Raulin, N. Nitta, H. S. Hudson, M. Shimojo, K. Shibata, & A. Raoult.* 447, L135, 191-D7 (1995)

The Radio Properties of Solar Active Region Soft X-Ray Transient Brightenings. *S. M. White, M. R. Kundu, T. Shimizu, K. Shibasaki, & S. Enome.* 450, 435, 234-A5 (1995)

Are Variations in the Length of the Activity Cycle Related to Changes in Brightness in Solar-Type Stars? *Sallie Baliunas & Willie Soon.* 450, 896, 243-C8 (1995)

Coronal Plumes and Their Relationship to Network Activity. *Y.-M. Wang & N. R. Sheeley, Jr.* 452, 457, 268-D1 (1995)

Observed Redshifts in the Solar Transition Region above Active and Quiet Regions. *H. Achour, P. Brekke, O. Kjeldseth-Moe, & P. Maltby.* 453, 945, 297-A9 (1995)

Soft X-Ray Loops and Coronal Heating. *Lisa J. Porter & James A. Klimchuk.* 454, 499, 306-B10 (1995)

Solar Rotation Stereoscopy in Microwaves. *Markus J. Aschwanden, Jeremy Lim, Dale E. Gary, & James A. Klimchuk.* 454, 512, 306-C12 (1995)

New Observations of Subarcsecond Photospheric Bright Points. *T. E. Berger, C. J. Schrijver, R. A. Shine, T. D. Tarbell, A. M. Title, & G. Scharmer.* 454, 531, 306-E11 (1995)

Turbulent and Chaotic Dynamics Underlying Solar Magnetic Variability. *J. K. Lawrence, A. C. Cadavid, & A. A. Ruzmaikin.* 455, 366, 323-B9 (1995)

SUN: ATMOSPHERE

Magnetoatmospheric Oscillations in Sunspot Umbrae. *S. S. Hasan.* 366, 328, 5-B7 (1991)

High Sensitivity of *p*-Modes near the Acoustic Cutoff Frequency to Solar Model Parameters. *D. B. Guenther.* 369, 247, 39-A5 (1991)

Non-Maxwellian Electron Distributions in Models of the Solar Atmosphere. *P. MacNeice, J. Fontenla, & N. N. Ljepojevic.* 369, 544, 44-E1 (1991)

Wavelength Variation of *p*-Mode Intensity Fluctuations. *R. S. Ronan, J. W. Harvey, & T. L. Duvall, Jr.* 369, 549, 44-E9 (1991)

On the Thermal Stability of Slabs, Cylinders, and Spheres. *Miguel H. Ibáñez S., & Florencio P. Plachco M.* 370, 743, 57-F1 (1991)

High-Resolution Studies of the Structure of the Solar Atmosphere Using a New Imaging Algorithm. *Margarita Karovska & Shadia Rifai Habbal.* 371, 402, 65-B1 (1991)

Line-blanketing Variations in the Irradiance Spectrum of the Sun from Maximum to Minimum of the Solar Cycle. *W. E. Mitchell, Jr., & W. C. Livingston.* 372, 336, 78-B6 (1991)

Temperature-dependent Saturation of Hydrogen Lines in Solar Flares. *K. G. Gayley.* 374, 773, 108-F5 (1991)

Energy Balance in the Solar Transition Region. II. Effects of Pressure and Energy Input on Hydrostatic Models. *J. M. Fontenla, E. H. Avrett, & R. Loeser.* 377, 712, 148-E1 (1991)

Multicolor Continuum Analysis of the Solar Granulation in Quiet and Active Regions. *C. U. Keller & S. Koutchmy.* 379, 751, 174-B1 (1991)

Formation of the Infrared Emission Lines of Mg I in the Solar Atmosphere. *E. S. Chang, E. H. Avrett, P. J. Mauas, R. W. Noyes, & R. Loeser.* 379, L79, 175-E1 (1991)

Propagation of Magnetoacoustic Waves in the Solar Atmosphere with Random Inhomogeneities of Density and Magnetic Fields. *M. Ryutova, M. Kaisig, & T. Tajima.* 380, 268, 179-D1 (1991)

Localized Excitation of Solar Oscillations. *Philip R. Goode, Douglas Gough, & Alexander Kosovichev.* 387, 707, 47-E1 (1992)

Alfvén Wave Transmission through the Solar Atmosphere. *Philippe L. Similon & Shahrokh Zargham.* 388, 644, 58-C1 (1992)

On the Differences between Plage and Quiet Sun in the Solar Photosphere. *Alan M. Title, Kenneth P. Topka, Theodore D. Tarbell, Wolfgang Schmidt, Christiaan Balke, & Göran Scharmer.* 393, 782, 125-E1 (1992)

Limb Observations of the 12.32 Micron Solar Emission Line during the 1991 July Total Eclipse. *Drake Deming, Donald E. Jennings, George McCabe, Robert Noyes, Gunter Wiedemann, & Fred Espenak.* 396, L53, 161-A6 (1992)

The Role of Chromospheric Condensations in the Continuum Emission of White-Light Flares. *W. Q. Gan, E. Rieger, H. Q. Zhang, & C. Fang.* 397, 694, 179-F8 (1992)

Siphon Flows in Isolated Magnetic Flux Tubes. V. Radiative Flows with Variable Ionization. *Benjamin Montesinos & John H. Thomas.* 402, 314, 5-A13 (1993)

The Kelvin-Helmholtz Instability in Photospheric Flows: Effects on Coronal Heating and Structure. *Judith T. Karpen, Spiro K. Antiochos, Russell B. Dahlburg, & Daniel S. Spicer.* 403, 769, 25-C13 (1993)

A Numerical Simulation of Two-dimensional Radiative Equilibrium in Magnetostatic Flux Tubes. I. The Model. *V. J. Pizzo, K. B. MacGregor, & P. B. Kunasz.* 404, 788, 38-F10 (1993)

Measurement of *p*-Mode Energy Propagation in the Quiet Solar Photosphere. *J. M. Fontenla, D. Rabin, D. H. Hathaway, & R. L. Moore.* 405, 787, 52-G8 (1993)

A Critical List of Voigt-fitted Equivalent Width Measurements Based on the Solar Flux Spectrum. *Thomas Meylan, Ingemar Furenlid, Michael S. Wiggs, & R. L. Kurucz.* 85, 163, 8-D1 (1993)

Ionization Effects in Three-dimensional Solar Granulation Simulations. *Mark P. Rast, Åke Nordlund, Robert F. Stein, & Juri Toomre.* 408, L53, 89-D11 (1993)

Observation of Impulsive Acoustic Events and the Excitation of Solar Oscillations. *Sergio R. Restaino, Robin T. Stebbins, & Philip R. Goode.* 408, L57, 89-E9 (1993)

Three-dimensional Structures of Magnetostatic Atmospheres. V. Coupled Electric Current Systems. *B. C. Low.* 408, 689, 93-G1 (1993)

Three-dimensional Structures of Magnetostatic Atmospheres. VI. Examples of Coupled Electric Current Systems. *B. C. Low.* 408, 693, 93-G7 (1993)

Is It Justified to Assume that "Everywhere in the Sun's Photosphere-Corona Domain the Electric Conductivity Is High"?; or, What Drives the Solar Upper Atmosphere? *Uri Feldman.* 411, 896, 141-A5 (1993)

The Sunspot Transition Region: Where Are the Bright Plumes and the Downflows? *Joseph B. Gurman.* 412, 865, 154-E13 (1993)

A Numerical Simulation of Two-dimensional Radiative Equilibrium in Magnetostatic Flux Tubes. II. Computational Results. *V. J. Pizzo, K. B. MacGregor, & P. B. Kunasz.* 413, 764, 166-A1 (1993)

Three-dimensional Magnetohydrodynamics of the Emerging Magnetic Flux in the Solar Atmosphere. *R. Matsumoto, T. Tajima, K. Shibata, & M. Kaisig.* 414, 357, 174-D8 (1993)

The White-Light Flare of 1982 June 15: A Midchromospheric Kernel. *Pablo J. D. Mauas.* 414, 928, 182-G10 (1993)

The Source of 5 Minute Period Photospheric Umbral Oscillations. *M. J. Penn & B. J. LaBonte.* 415, 383, 189-F7 (1993)

Limits on Coronal Reflection Using High-Frequency Solar Oscillations. *P. Kumar, M. A. Fardal, S. M. Jefferies, T. L. Duvall, Jr., J. W. Harvey, & M. A. Pomerantz.* 422, L29, 36-E5 (1994)

On Sound Generation by Turbulent Convection: A New Look at Old Results. *Z. E. Musielak, R. Rosner, R. F. Stein, & P. Ulmschneider.* 423, 474, 52-A13 (1994)

The Solar *f*-Mode as an Interfacial Mode at the Chromosphere-Corona Transition. *C. S. Rosenthal & D. O. Gough.* 423, 488, 52-C1 (1994)

Solar Flare Model Atmospheres. *Suzanne L. Hawley & George H. Fisher.* 426, 387, 101-A9 (1994)

Properties of Acoustic Sources in the Sun. *Pawan Kumar.* 428, 827, 140-E7 (1994)

Optical Spectra and Semi-Empirical Model of a White-Light Flare. *M. D. Ding, C. Fang, W. Q. Gan, & T. Okamoto.* 429, 890, 156-F9 (1994)

Atmospheric Heating in Solar Flares by Chromospheric Condensation. *W. Q. Gan & P. J. D. Mauas.* 430, 891, 173-A11 (1994)

New Radiometric Values of the Solar Ultraviolet Continuum Radiation from 1500 to 1700 Å. *P. Brekke & O. Kjeldseth-Moe.* 431, L55, 183-B1 (1994)

Imaging Spectroscopy of the Solar CO Lines at 4.67 Microns. *Han Uitenbroek, R. W. Noyes, & Douglas Rabin.* 432, L67, 200-B5 (1994)

The Determination of Electron Densities in the Solar Atmosphere from the 1718.56 Å/1486.51 Å Emission-Line Ratio in N IV. *F. P. Keenan, L. K. Harra, G. A. Doschek, & J. W. Cook.* 432, 806, 206-A10 (1994)

The Formation of the Solar He II 1640.4 Å Emission Line. *Cathrine Wahlstrøm & Mats Carlsson.* 433, 417, 213-E1 (1994)

Equilibrium Structure of Solar Magnetic Flux Tubes: Energy Transport with Multistream Radiative Transfer. *S. S. Hasan & W. Kalkofen.* 436, 355, 266-B7 (1994)

Near-Infrared Emission-Line and Continuum Observations from the 1991 Eclipse. *M. J. Penn, J. Arnaud, D. L. Mickey, & B. J. LaBonte.* 436, 368, 266-C9 (1994)

On the Temperature and Velocity through the Photosphere of a Sunspot Penumbra. *J. C. del Toro Iniesta, T. D. Tarbell, & B. Ruiz Cobo.* 436, 400, 266-G8 (1994)

A Measurement of the Background Solar Velocity Spectrum. *P. L. Pallé, A. Jiménez, F. Pérez Hernández, C. Régulo, T. Roca Cortés, & L. Sánchez.* 441, 952, 75-A9 (1995)

Modeling of Shallow and Inefficient Convection in the Outer Layers of the Sun Using Realistic Physics. *Yong-Cheol Kim, Peter A. Fox, Sabatino Sofia, & Pierre Demarque.* 442, 422, 82-G1 (1995)

Acoustic Wave Propagation in the Solar Atmosphere. I. Rediscussion of the Linearized Theory Including Nonstationary Solutions. *Zhengzhi Wang, Roger K. Ulrich, & Ferdinand V. Coroniti.* 444, 879, 128-E10 (1995)

Sun Center Observations of the Evershed Effect. *Thomas R. Rimmele.* 445, 511, 139-E11 (1995)

The Possible Ascent of a Closed Magnetic System through the Photosphere. *B. W. Lites, B. C. Low, V. Martínez Pillet, P. Seagraves, A. Skumanich, Z. A. Frank, R. A. Shine, & S. Tsuneta.* 446, 877, 168-B13 (1995)

Vorticity and Divergence in the Solar Photosphere. *Yi Wang, Robert W. Noyes, Theodore D. Tarbell, & Alan M. Title.* 447, 419, 178-C1 (1995)

The Effects on Mass Flows on the Dissipation of Alfvén Waves in the Upper Layers of the Solar Atmosphere. *Margarita P. Ryutova & Shadia R. Habbal.* 451, 381, 251-B7 (1995)

The Influence of a Vertical Magnetic Field on Oscillations in an Isothermal Stratified Atmosphere. II. *Dipankar Banerjee, S. S. Hasan, & J. Christensen-Dalsgaard.* 451, 825, 258-E11 (1995)

New and Alternative Line Identifications in Solar Chromospheric and Photospheric Spectra. *S. O. Kastner.* 100, 473, 52-D13 (1995)

SUN: ATMOSPHERIC MOTIONS

The Magnetic Network Location of Explosive Events Observed in the Solar Transition Region. *J. G. Porter & K. P. Dere.* 370, 775, 58-A11 (1991)

The Source of Solar High-Frequency Acoustic Modes: Theoretical Expectations. *Timothy M. Brown.* 371, 396, 65-A5 (1991)

An Ultraviolet Spectral Atlas of a Sunspot and an Active Region 1190–1730 Å. *P. Brekke, O. Kjeldseth-Moe, J.-D. F. Bartoe, & G. E. Brueckner.* 75, 1337, 23-C1 (1991)

Power Spectra of Solar Convection. *D.-Y. Chou, B. J. LaBonte, D. C. Braun, & T. L. Duvall, Jr.* 372, 314, 77-G5 (1991)

Systematic Radial Flows in the Chromosphere, Transition Region, and Corona of the Quiet Sun. *Donald M. Hassler, Gary J. Rottman, & Frank Q. Orrall.* 372, 710, 84-E1 (1991)

Siphon Flows in Isolated Magnetic Flux Tubes. IV. Critical Flows with Standing Tube Shocks. *John H. Thomas & Benjamin Montesinos.* 375, 404, 115-G11 (1991)

Modeling Mesogranules and Exploders on the Solar Surface. *G. W. Simon, A. M. Title, & N. O. Weiss.* 375, 775, 122-C7 (1991)

The Effects of Mass Flow on the Temperature and Abundance Structure of the Solar Transition Region. *D. Tod Woods & Thomas E. Holzer.* 375, 800, 122-E7 (1991)

Motions, Fields, and Flares in the 1989 March Active Region. *Haimin Wang, Frances Tang, Harold Zirin, & Guoxiang Ai.* 380, 282, 179-E1 (1991)

Velocity Gradients in the Chromosphere-Corona Transition Region. *R. Grant Athay & K. P. Dere.* 381, 323, 193-A6 (1991)

SUN: CHROMOSPHERE

A Study of Solar Flare Energy Transport Based on Coordinated Hα and X-Ray Observations. *Richard C. Canfield, Dominic M. Zarro, Jean-Pierre Wülser, & Brian R. Dennis.* 367, 671, 21-E11 (1991)

Analysis of the Solar O II/O III Multiplets at 834 Å: Implications for the Emission Measure Distribution in the Vicinity of 40,000 K. *R. R. Meier, K. G. Widing, & U. Feldman.* 369, 570, 44-G7 (1991)

The Microwave Brightness Temperature Spectrum of the Quiet Sun. *H. Zirin, B. M. Baumert, & G. J. Hurford.* 370, 779, 58-B12 (1991)

The Sensitivity of Chromospherically Induced *p*- and *f*-Mode Frequency Shifts to the Height of the Magnetic Canopy. *David J. Evans & B. Roberts.* 371, 387, 64-G9 (1991)

Systematic Radial Flows in the Chromosphere, Transition Region, and Corona of the Quiet Sun. *Donald M. Hassler, Gary J. Rottman, & Frank Q. Orrall.* 372, 710, 84-E1 (1991)

Is There an Acoustic Resonance in the Solar Chromosphere? *M. F. Woodard & K. G. Libbrecht.* 374, L61, 110-E1 (1991)

Chromospheric and Transition Region Diagnostics Using Emission-Line Intensities. *R. Grant Athay & K. P. Dere.* 379, 776, 174-D1 (1991)

Inferring Chromospheric Flare Heating from Hydrogen-Line Wings. *K. G. Gayley & R. C. Canfield.* 380, 660, 186-D1 (1991)

Submillimeter Solar Limb Profiles Determined from Observations of the Total Solar Eclipse of 1988 March 18. *T. L. Roellig, E. E. Becklin, J. T. Jefferies, G. A. Kopp, C. A. Lindsey, F. Q. Orrall, & M. W. Werner.* 381, 288, 192-E5 (1991)

Magnetoacoustic Heating of the Solar Chromosphere. *Joseph M. Davila & S. M. Chitre.* 381, L31, 194-D12 (1991)

The Solar Chromospheric Supergranular Network in 850 Micron Radiation. *Charles A. Lindsey & John T. Jefferies.* 383, 443, 217-G1 (1991)

Energetics and Dynamics in a Large Solar Flare of 1989 March. *Jean-Pierre Wülser, Dominic M. Zarro, & Richard C. Canfield.* 384, 341, 5-B13 (1992)

A Burst Model for Line Emission in the Solar Atmosphere. I. XUV Lines of He I and He II in Impulsive Flares. *J. M. Laming & U. Feldman.* 386, 364, 28-F8 (1992)

Chromospheric Dynamics Based on Infrared Solar Brightness Variations. *G. Kopp, C. Lindsey, T. L. Roellig, M. W. Werner, E. E. Becklin, F. Q. Orrall, & J. T. Jefferies.* 388, 203, 51-E1 (1992)

Alfvénically Driven Slow Shocks in the Solar Chromosphere and Corona. *Joseph V. Hollweg.* 389, 731, 70-D10 (1992)

Maximum Principal Quantum Numbers of the Atomic Hydrogen in the Solar Chromosphere and Photosphere. *J. A. Kunc & W. H. Soon.* 396, 364, 159-E11 (1992)

Non-LTE Radiating Acoustic Shocks and Ca II K2V Bright Points. *Mats Carlsson & Robert F. Stein.* 397, L59, 173-G11 (1992)

The Role of Chromospheric Condensations in the Continuum Emission of White-Light Flares. *W. Q. Gan, E. Rieger, H. Q. Zhang, & C. Fang.* 397, 694, 179-F8 (1992)

Kinetic Description of Electron Beams in the Solar Chromosphere. *Daniel O. Gómez & Pablo J. D. Mauas.* 398, 682, 192-E6 (1992)

Coordinated Spectral and Temporal Hα Observations of a Solar Flare. *J.-F. de La Beaujardière, Alan L. Kiplinger, & Richard C. Canfield.* 401, 761, 232-A5 (1992)

O I Lines in the Sun and Stars. I. Understanding the Resonance Lines. *M. Carlsson & P. G. Judge.* 402, 344, 5-D9 (1993)

Submillimeter Observations of the 1991 July 11 Total Solar Eclipse. *M. W. Ewell, Jr., H. Zirin, J. B. Jensen, & T. S. Bastian.* 403, 426, 19-B1 (1993)

Solar Chromospheric and Transition Region Response to Energy Deposition in the Middle and Upper Chromosphere. *Alphonse C. Sterling, Kazunari Shibata, & John T. Mariska.* 407, 778, 80-B9 (1993)

Formation, Levitation, and Stability of Prominences in the Magnetized Solar Atmosphere. *J. F. Drake, Y. Mok, & G. Van Hoven.* 413, 416, 161-D9 (1993)

Chromospheric Heating by Acoustic Shock Waves. *Stuart D. Jordan.* 414, 337, 174-B12 (1993)

Dynamics of the Solar Chromosphere. I. Long-Period Network Oscillations. *B. W. Lites, R. J. Rutten, & W. Kalkofen.* 414, 345, 174-C8 (1993)

Do *p*-Mode Frequency Shifts Suggest a Hotter Chromosphere at Solar Maximum? *Rekha Jain & B. Roberts.* 414, 898, 182-D12 (1993)

The White-Light Flare of 1982 June 15: A Midchromospheric Kernel. *Pablo J. D. Mauas.* 414, 928, 182-G10 (1993)

Discrete High-Frequency *p*-Modes as Probes of Structures in the Chromosphere, Transition Region, and Lower Corona of the Sun. *Yu-Qing Lou.* 414, L141, 186-E1 (1993)

The Center-to-Limb Brightness Variation of the Sun at $\lambda = 850$ Microns. *T. S. Bastian, M. W. Ewell, Jr., & H. Zirin.* 415, 364, 189-D13 (1993)

Semiempirical Flare Models with Chromospheric Condensation. *W. Q. Gan, E. Rieger, & C. Fang.* 416, 886, 214-D10 (1993)

A Study of Solar Prominences near $\lambda = 1$ Millimeter. *T. S. Bastian, M. W. Ewell, Jr., & H. Zirin.* 418, 510, 237-C13 (1993)

Loop Models of Low Coronal Structures Observed by the Normal Incidence X-Ray Telescope (NIXT). *G. Peres, F. Reale, & L. Golub.* 422, 412, 35-B11 (1994)

Impulsive Behavior in Solar Soft X-Radiation. *H. S. Hudson, K. T. Strong, B. R. Dennis, D. Zarro, M. Inda, T. Kosugi, & T. Sakao.* 422, L25, 36-D13 (1994)

Separation of Low First Ionization Potential Ions from High First Ionization Potential Neutrals in the Low Chromosphere. *R. Grant Athay.* 423, 516, 52-E5 (1994)

Dynamical Properties of the Chromosphere In and Out of the Solar Magnetic Network. *Karine Bocchialini, Jean-Claude Vial, & Serge Koutchmy.* 423, L67, 54-B8 (1994)

Multispectral Observations of Chromospheric Evaporation in the 1991 November 15 X-Class Solar Flare. *Jean-Pierre Wülser, Richard C. Canfield, Loren W. Acton, J. Leonard Culhane, Andrew Phillips, Andrzej Fludra, Taro Sakao, Satoshi Masuda, Takeo Kosugi, & Saku Tsuneta.* 424, 459, 67-E4 (1994)

Time Evolution of a Miniflare as Seen in Hα, UV Lines, and X-Rays. *J. Fontenla, B. Schmieder, G. M. Simnett, & E. Tandberg-Hanssen.* 424, 1022, 77-E3 (1994)

Comparison between Cool and Hot Plasma Behaviors of Surges. *B. Schmieder, L. Golub, & S. K. Antiochos.* 425, 326, 84-C6 (1994)

Solar Flare Model Atmospheres. *Suzanne L. Hawley & George H. Fisher.* 426, 387, 101-A9 (1994)

Optical Spectra and Semi-Empirical Model of a White-Light Flare. *M. D. Ding, C. Fang, W. Q. Gan, & T. Okamoto.* 429, 890, 156-F9 (1994)

Atmospheric Heating in Solar Flares by Chromospheric Condensation. *W. Q. Gan & P. J. D. Mauas.* 430, 891, 173-A11 (1994)

The Formation of the Solar He II 1640.4 Å Emission Line. *Cathrine Wahlstrøm & Mats Carlsson.* 433, 417, 213-E1 (1994)

On the Absence of a Relationship between the Properties of the $T_e \geq 10^6$ K and the Properties of the $T_e \leq 7 \times 10^5$ K Solar Plasmas. *U. Feldman & J. M. Laming.* 434, 370, 230-E13 (1994)

The Effects of a Hot Outer Atmosphere on Acoustic-Gravity Waves. *Bradley W. Hindman & Ellen G. Zweibel.* 436, 929, 278-D11 (1994)

Excitation of O I Lines in the Solar Chromosphere. *R. Grant Athay & Philip G. Judge.* 438, 491, 8-D4 (1995)

Chromospheric Evaporation and Decimetric Radio Emission in Solar Flares. *Markus J. Aschwanden & Arnold O. Benz.* 438, 997, 17-G7 (1995)

Is the Solar Chromospheric Magnetic Field Force-free? *Thomas R. Metcalf, Litao Jiao, Alexander N. McClymont, Richard C. Canfield, & Han Uitenbroek.* 439, 474, 27-E11 (1995)

Does a Nonmagnetic Solar Chromosphere Exist? *Mats Carlsson & Robert F. Stein.* 440, L29, 48-E8 (1995)

The Solar Lyα Line Profile. *Thomas N. Woods, Gary J. Rottman, O. R. White, Juan Fontenla, & E. H. Avrett.* 442, 898, 92-E4 (1995)

Heating of the Solar Middle Chromosphere by Large-Scale Electric Currents. *Michael L. Goodman.* 443, 450, 101-C7 (1995)

Ultraviolet Observations of the Structure and Dynamics of an Active Region at the Limb. *C. M. Korendyke, K. P. Dere, D. G. Socker, G. E. Brueckner, & B. Schmieder.* 443, 869, 109-G10 (1995)

Acoustic Wave Propagation in the Solar Atmosphere. I. Rediscussion of the Linearized Theory Including Nonstationary Solutions. *Zhengzhi Wang, Roger K. Ulrich, & Ferdinand V. Coroniti.* 444, 879, 128-E10 (1995)

Reduction, Analysis, and Properties of Electric Current Systems in Solar Active Regions. *G. Allen Gary & Pascal Démoulin.* 445, 982, 148-G12 (1995)

The Neupert Effect and the Chromospheric Evaporation Model for Solar Flares. *Theodore T. Lee, Vahé Petrosian, & James M. McTiernan.* 448, 915, 207-E7 (1995)

High-Resolution Observation of Disk Spicules. I. Evolution and Kinematics of Spicules in the Enhanced Network. *Yoshinori Suematsu, Haimin Wang, & Harold Zirin.* 450, 411, 233-E12 (1995)

The Role of Magnetic Reconnection in Chromospheric Eruptions. *Judith T. Karpen, Spiro K. Antiochos, & C. Richard DeVore.* 450, 422, 233-G3 (1995)

On Thermal Hydrodynamical Models of Solar Flares with a High Initial Coronal Density. *W. Q. Gan, C. C. Cheng, & C. Fang.* 452, 445, 268-B11 (1995)

Observations and Interpretation of Soft X-Ray Limb Absorption Seen by the Normal Incidence X-Ray Telescope. *A. Daw, E. E. DeLuca, & L. Golub.* 453, 929, 296-G1 (1995)

Partial Redistribution in Multilevel Atoms. I. Method and Application to the Solar Hydrogen Line Formation. *I. Hubeny & B. W. Lites.* 455, 376, 323-C8 (1995)

SUN: CORONA

Coronal Loop Heating by Wave-Particle Interactions. *Altair S. de Assis & King H. Tsui.* 366, 324, 5-B1 (1991)

Strong Magnetic Fields and Inhomogeneity in the Solar Corona. *S. M. White, M. R. Kundu, & N. Gopalswamy.* 366, L43, 6-E7 (1991)

Three-dimensional Kinematic Reconnection of Plasmoids. *Yun-Tung Lau & John M. Finn.* 366, 577, 10-B11 (1991)

Rotation of the Sun's Outer White-Light Corona Determined from Solwind Data. *Ana G. Nash.* 366, 592, 10-D1 (1991)

A Study of Solar Flare Energy Transport Based on Coordinated Hα and X-Ray Observations. *Richard C. Canfield, Dominic M. Zarro, Jean-Pierre Wülser, & Brian R. Dennis.* 367, 671, 21-E11 (1991)

On the Transport and Acceleration of Solar Flare Particles in a Coronal Loop. *James M. Ryan & Martin A. Lee.* 368, 316, 26-A7 (1991)

First Interferometric Observations of Solar Microwave Millisecond Spike Bursts. *Dale E. Gary, G. J. Hurford, & D. J. Flees.* 369, 255, 39-B1 (1991)

Non-Maxwellian Electron Distributions in Models of the Solar Atmosphere. *P. MacNeice, J. Fontenla, & N. N. Ljepojevic.* 369, 544, 44-E1 (1991)

Opacity Effects on the Radiative Losses of Coronal Loops. *N. P. M. Kuin & A. I. Poland.* 370, 763, 57-G11 (1991)

The Microwave Brightness Temperature Spectrum of the Quiet Sun. *H. Zirin, B. M. Baumert, & G. J. Hurford.* 370, 779, 58-B12 (1991)

Dynamic Magnetic Reconnection at an X-Type Neutral Point. *I. J. D. Craig & A. N. McClymont.* 371, L41, 66-F1 (1991)

Current Sheet Formation and Rapid Reconnection in the Solar Corona. *A. Bhattacharjee & Xiogang Wang.* 372, 321, 78-A1 (1991)

Stability, Structure, and Evolution of Cool Loops. *P. S. Cally & T. D. Robb.* 372, 329, 78-A11 (1991)

Why Fast Solar Wind Originates from Slowly Expanding Coronal Flux Tubes. *Y.-M. Wang & N. R. Sheeley, Jr.* 372, L45, 79-F1 (1991)

Systematic Radial Flows in the Chromosphere, Transition Region, and Corona of the Quiet Sun. *Donald M. Hassler, Gary J. Rottman, & Frank Q. Orrall.* 372, 710, 84-E1 (1991)

Heating Solar Coronal Holes. *E. N. Parker.* 372, 719, 84-E11 (1991)

Coronal Proton Transport in the Presence of Alfvén Waves and Implications for Gamma-Ray Burst Models. *D. F. Smith & S. H. Brecht.* 373, 289, 89-E9 (1991)

A Catastrophe Mechanism for Coronal Mass Ejections. *T. G. Forbes & P. A. Isenberg.* 373, 294, 89-F1 (1991)

Coronal Magnetic Structures Observing Campaign. I. Simultaneous Microwave and Soft X-Ray Observations of Active Regions at the Solar Limb. *N. Nitta, S. M. White, M. R. Kundu, N. Gopalswamy, G. D. Holman, J. W. Brosius, J. T. Schmelz, J. L. R. Saba, & K. T. Strong.* 374, 374, 102-F11 (1991)

Coronal Dynamics of a Quiescent Active Region. *Julia L. R. Saba & Keith T. Strong.* 375, 789, 122-D9 (1991)

Radio Range Measurements of Coronal Electron Densities at 13 and 3.6 Centimeter Wavelengths during the 1988 Solar Conjunction of *Voyager* 2. *T. P. Krisher, J. D. Anderson, D. D. Morabito, S. W. Asmar, S. E. Borutzki, M. L. Delitsky, A. C. Densmore, P. M. Eshe, G. D. Lewis, M. J. Maurer, D. C. Roth, Y. H. Son, T. R. Spilker, D. N. Sweetnam, A. H. Taylor, G. L. Tyler, D. L. Gresh, & P. A. Rosen.* 375, L57, 124-C6 (1991)

The Phase Mixing of Alfvén Waves, Coordinated Modes, and Coronal Heating. *E. N. Parker.* 376, 355, 129-C11 (1991)

First Observations of Macrospicules at 4.8 GHz at the Solar Limb in Polar Coronal Holes. *Shadia Rifai Habbal & Raymond D. Gonzalez.* 376, L25, 130-D1 (1991)

Numerical Study of Compressible Solar Magnetoconvection with an Open Transitional Boundary. *H. Hanami & T. Tajima.* 377, 694, 148-C6 (1991)

Alfvén Wave Trapping, Network Microflaring, and Heating in Solar Coronal Holes. *R. L. Moore, Z. E. Musielak, S. T. Suess, & C.-H. An.* 378, 347, 155-C5 (1991)

Multi–Wave Band *SMM*–VLA Observations of an M2 Flare and an Associated Coronal Mass Ejection. *Robert F. Willson, Joan T. Schmelz, Raymond D. Gonzalez, Kenneth R. Lang, & Kermit L. Smith.* 378, 360, 155-D6 (1991)

Coronal Mass Ejections and Streamers Associated with the New Cycle Active Regions at Solar Minimum. *S. Kahler.* 378, 398, 155-G9 (1991)

Can Neutron Stars Ablate Their Companions? *Amir Levinson & David Eichler.* 379, 359, 167-E1 (1991)

Large-Scale Features of the Sun at 20 Centimeter Wavelength. *N. Gopalswamy, S. M. White, & M. R. Kundu.* 379, 366, 167-E9 (1991)

The $3s^23p\ ^2P$–$3s3p^2\ ^4P$ Intercombination Lines of Fe XIV in the Sun. *F. P. Keenan, P. L. Dufton, E. S. Conlon, M. B. Boylan, A. E. Kingston, & K. G. Widing.* 379, 406, 168-A11 (1991)

On Solar Emission Lines. *G. P. Malik, L. K. Pande, & Vijaya S. Varma.* 379, 788, 174-E1 (1991)

Three-dimensional Compressible Hydrodynamic Convection in the Sun and Stars. *Murshed Hossain & D. J. Mullan.* 380, 631, 186-A10 (1991)

Avalanches and the Distribution of Solar Flares. *Edward T. Lu & Russell J. Hamilton.* 380, L89, 188-F5 (1991)

On the Spontaneous Formation of Electric Current Sheets above a Flexible Solar Photosphere. *B. C. Low.* 381, 295, 192-F1 (1991)

Neutralized and Unneutralized Current Patterns in the Solar Corona. *D. B. Melrose.* 381, 306, 192-F13 (1991)

Numerical Simulations of Microflare Evolution in the Solar Transition Region and Corona. *Alphonse C. Sterling, John T. Mariska, Kazunari Shibata, & Yoshinori Suematsu.* 381, 313, 192-G8 (1991)

Coronal Current-Sheet Formation: The Effect of Asymmetric and Symmetric Shears. *Judith T. Karpen, Spiro K. Antiochos, & C. Richard DeVore.* 382, 327, 204-C4 (1991)

Nonequilibrium Ionization Effects in Asymmetrically Heated Loops. *D. Spadaro, S. K. Antiochos, & J. T. Mariska.* 382, 338, 204-D1 (1991)

On the Differences in Element Abundances of Energetic Ions from Corotating Events and from Large Solar Events. *D. V. Reames, I. G. Richardson, & L. M. Barbier.* 382, L43, 205-E7 (1991)

The Connection between Coronal Bright Points and the Variability of the Quiet-Sun Extreme-Ultraviolet Emission. *Shadia Rifai Habbal & Edmund Grace.* 382, 667, 209-G11 (1991)

Coronal Evolution Due to Shear Motion. *R. S. Steinolfson.* 382, 677, 210-A13 (1991)

Energy Balance in Coronal Funnels. *Douglas Rabin.* 383, 407, 217-D1 (1991)

Dynamics of Solar Coronal Magnetic Fields. *R. B. Dahlburg, S. K. Antiochos, & T. A. Zang.* 383, 420, 217-E1 (1991)

Quasi-static Evolution of Coronal Magnetic Fields. *D. W. Longcope & R. N. Sudan.* 384, 305, 4-F12 (1992)

The Theory of Magnetohydrodynamic Wave Generation by Localized Sources. III. Efficiency of Plasma Heating by Dissipation of Far-Field Waves. *William Collins.* 384, 319, 5-A1 (1992)

Magnetohydrodynamic Equilibria and Cusp Formation at an X-Type Neutral Line by Footpoint Shearing. *G. E. Vekstein & E. R. Priest.* 384, 333, 5-B3 (1992)

Energetics and Dynamics in a Large Solar Flare of 1989 March. *Jean-Pierre Wülser, Dominic M. Zarro, & Richard C. Canfield.* 384, 341, 5-B13 (1992)

Three-dimensional Force-free Magnetic Fields and Flare Energy Buildup. *J. A. Klimchuk & P. A. Sturrock.* 385, 344, 16-B6 (1992)

Fe XVIII Emission-Line Intensities in the Sun. *D. L. McKenzie, F. P. Keenan, S. M. McCann, K. A. Berrington, A. Hibbert, & M. Mohan.* 385, 378, 16-E5 (1992)

Cylindrically Symmetric Force-free Magnetic Fields. *Lisa J. Porter, James A. Klimchuk, & Peter A. Sturrock.* 385, 738, 22-C6 (1992)

Coronal Magnetic Structures Observing Campaign. IV. Multiwaveband Observations of Sunspot and Plage-associated Coronal Emission. *Jeffrey W. Brosius, Robert F. Willson, Gordon D. Holman, & Joan T. Schmelz.* 386, 347, 28-E1 (1992)

Coronal Density and Temperature Structure from Coordinated Observations Associated with the Total Solar Eclipse of 1988 March 18. *M. Guhathakurta, G. J. Rottman, R. R. Fisher, F. Q. Orrall, & R. C. Altrock.* 388, 633, 58-B1 (1992)

Magnetohydrodynamic Waves in Sharply and Smoothly Bounded Cylinders. *Bonnie Jean Shulman & Ellen G. Zweibel.* 389, 428, 65-C1 (1992)

Alfvénically Driven Slow Shocks in the Solar Chromosphere and Corona. *Joseph V. Hollweg.* 389, 731, 70-D10 (1992)

Variations in the Relative Elemental Abundances of Oxygen, Neon, Magnesium, and Iron in High-Temperature Solar Active-Region and Flare Plasmas. *D. L. McKenzie & U. Feldman.* 389, 764, 70-G7 (1992)

Steady Siphon Flows in Closed Coronal Structures: Comparison with Extreme-Ultraviolet Observations. *G. Peres, D. Spadaro, & G. Noci.* 389, 777, 71-A8 (1992)

A Self-consistent Turbulent Model for Solar Coronal Heating. *J. Heyvaerts & E. R. Priest.* 390, 297, 77-F3 (1992)

Estimation of the Mass of a Coronal Mass Ejection from Radio Observations. *N. Gopalswamy & M. R. Kundu.* 390, L37, 78-F1 (1992)

Stereoscopic Observations of a Solar Flare Hard X-Ray Source in the High Corona. *S. R. Kane, J. McTiernan, J. Loran, E. E. Fenimore, R. W. Klebesadel, & J. G. Laros.* 390, 687, 83-G7 (1992)

Decimetric Solar Type U Bursts: VLA and PHOENIX Observations. *Markus J. Aschwanden, T. S. Bastian, A. O. Benz, & J. W. Brosius.* 391, 380, 90-E13 (1992)

The Production of ^{3}He and Heavy Ion Enrichments in ^{3}He-rich Flares by Electromagnetic Hydrogen Cyclotron Waves. *M. Temerin & I. Roth.* 391, L105, 100-B1 (1992)

On Potential Field Models of the Solar Corona. *Y.-M. Wang & N. R. Sheeley, Jr.* 392, 310, 104-G1 (1992)

On Neutralized Currents in the Solar Corona. *Ladye Kathryn Wilkinson, A. Gordon Emslie, & G. Allen Gary.* 392, L39, 106-E7 (1992)

Self-similar Evolution of Magnetized Plasmas. I. Quasi-static Solution. *Wei-Hong Yang.* 392, 465, 108-B1 (1992)

Element Abundances and Plasma Properties in a Coronal Polar Plume. *K. G. Widing & U. Feldman.* 392, 715, 111-B5 (1992)

A Regularization Method for Extrapolation of Solar Potential Magnetic Fields. *G. Allen Gary & Z. E. Musielak.* 392, 722, 111-C1 (1992)

Evidence for Mass Outflow in the Low Solar Corona over a Large Sunspot. *Werner M. Neupert, Jeffrey W. Brosius, Roger J. Thomas, & William T. Thompson.* 392, L95, 113-F6 (1992)

Coronal Loops: Current-based Heating Processes. *P. Beaufumé, B. Coppi, & L. Golub.* 393, 396, 119-A11 (1992)

Fast Plasmoid Formation in Double Arcades. *J. M. Finn, P. N. Guzdar, & J. Chen.* 393, 800, 125-G7 (1992)

Dissipation of Magnetic Energy in the Solar Corona. *Allen H. Boozer.* 394, 357, 132-D4 (1992)

Development of Magnetohydrodynamic Turbulence in Coronal Loops. *Daniel O. Gómez & Constantino Ferro Fontán.* 394, 662, 137-F8 (1992)

On the Process of Resistive Heating Instability and the Formation of Coronal Loop Structures. *Yu-Qing Lou.* 395, 682, 151-F13 (1992)

Enhanced Damping of Alfvén Waves in the Solar Corona by a Turbulent Wave Spectrum. *Robert G. Kleva & J. F. Drake.* 395, 697, 152-A5 (1992)

Incompressible Disturbances in Nonuniform Media: Formation of Small Scales. *Francesco Malara, Pierluigi Veltri, Claudio Chiuderi, & Giorgio Einaudi.* 396, 297, 158-F13 (1992)

Steady and Nonsteady Siphon Flow in Hot Coronal Loops. *T. D. Robb & P. S. Cally.* 397, 329, 172-A1 (1992)

A New Way to Convert Alfvén Waves into Heat in Solar Coronal Holes: Intermittent Magnetic Levitation. *R. L. Moore, R. Hammer, Z. E. Musielak, S. T. Suess, & C.-H. An.* 397, L55, 173-G5 (1992)

Dielectronic Recombination as a Function of Electric Field Strength. *Daniel B. Reisenfeld.* 398, 386, 186-E9 (1992)

A Burst Model for Line Emission in the Solar Atmosphere. II. Coronal Extreme Ultraviolet Lines. *U. Feldman, J. M. Laming, P. Mandelbaum, W.H. Goldstein, & A. Osterheld.* 398, 692, 192-F3 (1992)

Resonance Scattering of Fe XVII: A Density Diagnostic. *J. T. Schmelz, J. L. R. Saba, & K. T. Strong.* 398, L115, 194-F6 (1992)

Diagnostics of Electron-heated Solar Flare Models. III. Effects of Tapered Loop Geometry and Preheating. *A. Gordon Emslie, Peng Li, & John T. Mariska.* 399, 714, 206-G7 (1992)

Nonlinear Dissipation of Surface Alfvén Waves in the Solar Corona. *M. S. Ruderman.* 399, 724, 207-A5 (1992)

Coronal Magnetic Structures Observing Campaign. II. Magnetic and Plasma Properties of a Solar Active Region. *J. T. Schmelz, G. D. Holman, J. W. Brosius, & R. D. Gonzalez.* 399, 733, 207-B1 (1992)

Forced Reconnection, Current Sheets, and Coronal Heating. *Xiaogang Wang & A. Bhattacharjee.* 401, 371, 225-F1 (1992)

Plasma Emission from Isotropic Langmuir Turbulence: Are Radio Microbursts Structureless? *N. Gopalswamy.* 402, 326, 5-B13 (1993)

Diffusion Effects on the Helium Abundance of the Solar Transition Region and Corona. *Viggo H. Hansteen, Thomas E. Holzer, & Egil Leer.* 402, 334, 5-C10 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. III. Transition Region, Corona, and Stellar Wind. *D. Dravins, P. Linde, T. R. Ayres, J. L. Linsky, B. Monsignori-Fossi, T. Simon, & F. Wallinder.* 403, 412, 18-G13 (1993)

The Kelvin-Helmholtz Instability in Photospheric Flows: Effects on Coronal Heating and Structure. *Judith T. Karpen, Spiro K. Antiochos, Russell B. Dahlburg, & Daniel S. Spicer.* 403, 769, 25-C13 (1993)

A Three-dimensional Magnetohydrodynamic Formalism for Coronal Helmet Streamers. *S. Cuperman, C. Bruma, T. Detman, & M. Dryer.* 404, 356, 32-C7 (1993)

A New Class of Exact, Nonlinear Solutions to the Grad-Shafranov Equation. *George Roumeliotis.* 404, 781, 38-F1 (1993)

Coronal Proton Acceleration by Magnetohydrodynamic Waves and Related Proton Transport. *D. F. Smith & S. H. Brecht.* 406, 298, 58-F10 (1993)

Solar Coronal Observations and Formation of the He II 304 Å Line. *S. D. Jordan, W. T. Thompson, R. J. Thomas, & W. M. Neupert.* 406, 346, 59-C8 (1993)

Solar Coronal Structure near the Time of the 1991 July 11 Total Solar Eclipse. *D. G. Sime & J. Streete.* 408, 368, 87-F6 (1993)

On the Thermal Stability of a Radiating Plasma Subject to Nonlocal Thermal Conduction. I. Linear Analysis. *E. Chun & R. Rosner.* 408, 678, 93-F1 (1993)

Observed Redshifts in O V and Downflows in the Solar Transition Region. *P. Brekke.* 408, 735, 94-C11 (1993)

Force-free Magnetic Fields with Singular Current-Density Surfaces. *B. C. Low.* 409, 798, 109-A12 (1993)

Oscillations of a Quiescent Solar Prominence Embedded in a Hot Corona. *R. Oliver, J. L. Ballester, A. W. Hood, & E. R. Priest.* 409, 809, 109-B12 (1993)

The Free Energies of Partially Open Coronal Magnetic Fields. *B. C. Low & D. F. Smith.* 410, 412, 117-B10 (1993)

Flux-Tube Divergence, Coronal Heating, and the Solar Wind. *Y.-M. Wang.* 410, L123, 126-D13 (1993)

Simultaneous Observations of Solar Plage with the Solar Extreme Ultraviolet Rocket Telescope and Spectrograph (SERTS), the VLA, and the Kitt Peak Magnetograph. *Jeffrey W. Brosius, Joseph M. Davila, William T. Thompson, Roger J. Thomas, Gordon D. Holman, N. Gopalswamy, Stephen M. White, Mukul R. Kundu, & Harrison P. Jones.* 411, 410, 132-E4 (1993)

Is It Justified to Assume that "Everywhere in the Sun's Photosphere-Corona Domain the Electric Conductivity Is High"?; or, What Drives the Solar Upper Atmosphere? *Uri Feldman.* 411, 896, 141-A5 (1993)

On the Structure of Solar and Stellar Coronae: Loops and Loop Heat Transport. *Christof Litwin & Robert Rosner.* 412, 375, 146-F13 (1993)

Ion Acceleration and Abundance Enhancements by Electron Beam Instabilities in Impulsive Solar Flares. *James A. Miller & Adolfo F. Viñas.* 412, 386, 146-G12 (1993)

The Distribution of Flare Parameters and Implications for Coronal Heating. *Theodore T. Lee, Vahé Petrosian, & James M. McTiernan.* 412, 401, 147-B1 (1993)

A Doppler Dimming Determination of Coronal Outflow Velocity. *Leonard Strachan, John L. Kohl, Heinz Weiser, George L. Withbroe, & Richard H. Munro.* 412, 410, 147-B13 (1993)

The Magnetic Field in the Corona above Sunspots at the Eclipse of 1991 July 11. *D. E. Gary, Y. Leblanc, G. A. Dulk, & L. Golub.* 412, 421, 147-C13 (1993)

A Model of Solar Coronal Heating by Classical Inverse Bremsstrahlung and Generation of the Solar Wind. *A. H. Øien & G. Alendal.* 412, 827, 154-B6 (1993)

Multiple Wavelength Observations of an Off-Limb Eruptive Solar Flare. *T. A. Kucera, G. A. Dulk, A. L. Kiplinger, R. M. Winglee, T. S. Bastian, & M. Graeter.* 412, 853, 154-D10 (1993)

How Reliable are Coronal Hole Temperatures Deduced from Observations? *S. R. Habbal, R. Esser, & M. B. Arndt.* 413, 435, 161-F6 (1993)

Simulations of the Ca XIX Spectral Emission from a Flaring Solar Coronal Loop. II. Impulsive Heating by Accelerated Electrons. *E. Antonucci, M. A. Dodero, R. Martin, G. Peres, F. Reale, & S. Serio.* 413, 786, 166-B11 (1993)

VLA-BATSE Observations of an Intense Solar Decimetric and Hard X-Ray Burst. *Robert F. Willson.* 413, 798, 166-C11 (1993)

Energy Transport to the Solar Corona by Magnetic Kink Waves. *Arnab Rai Choudhuri, Mausumi Dikpati, & Dipankar Banerjee.* 413, 811, 166-E1 (1993)

Elemental Abundances in the Upper Solar Atmosphere of Quiet and Coronal Hole Regions ($T_e \approx 4.3 \times 10^5$ K). *U. Feldman & K. G. Widing.* 414, 381, 174-F9 (1993)

Long-Term Containment of Energetic Particles in Coronal Loops. *Yun-Tung Lau, Theodore G. Northrop, & John M. Finn.* 414, 908, 182-E10 (1993)

Understanding the Rotation of Coronal Holes. *Y.-M. Wang & N. R. Sheeley, Jr.* 414, 916, 182-F7 (1993)

Discrete High-Frequency *p*-Modes as Probes of Structures in the Chromosphere, Transition Region, and Lower Corona of the Sun. *Yu-Qing Lou.* 414, L141, 186-E1 (1993)

Large-Scale Coronal Temperature and Density Distributions, 1984–1992. *M. Guhathakurta, R. R. Fisher, & R. C. Altrock.* 414, L145, 186-E7 (1993)

Coronal Heating by the Resonant Absorption of Alfvén Waves: Importance of the Global Mode and Scaling Laws. *Richard S. Steinolfson & Joseph M. Davila.* 415, 354, 189-D1 (1993)

A Class of Three-dimensional Isothermal Laminated Equilibria and Their Stability. *Y. P. Chou, B. C. Low, & A. Bhattacharjee.* 416, 379, 205-F12 (1993)

A Linear Solution for Magnetic Reconnection Driven by Converging or Diverging Footpoint Motions. *George Roumeliotis & Ronald L. Moore.* 416, 386, 205-G7 (1993)

Quasi-periodic Particle Injection into Coronal Loops. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Victor Gaizauskas.* 416, 857, 214-B5 (1993)

Catastrophic Evolution of a Force-free Flux Rope: A Model for Eruptive Flares. *P. A. Isenberg, T. G. Forbes, & P. Démoulin.* 417, 368, 222-B7 (1993)

On the Problem of Magnetic Coronal Heating by Turbulent Relaxation. *G. E. Vekstein, E. R. Priest, & C. D. C. Steele.* 417, 781, 229-B6 (1993)

The Timing of Electron Beam Signatures in Hard X-Ray and Radio: Solar Flare Observations by BATSE/*Compton Gamma-Ray Observatory* and PHOENIX. *Markus J. Aschwanden, Arnold O. Benz, & Richard A. Schwartz.* 417, 790, 229-C3 (1993)

The Coronal Structure above Sunspots and Pores. *R. Harmon, R. Rosner, H. Zirin, E. Spiller, & L. Golub.* 417, L83, 230-E1 (1993)

Coronal Heating by Nanoflares: Individual Events and Global Energetics. *R. A. Kopp & G. Poletto.* 418, 496, 237-B10 (1993)

Coronal Abundances of Neon and Magnesium Isotopes from Solar Energetic Particles. *R. S. Selesnick, A. C. Cummings, J. R. Cummings, R. A. Leske, R. A. Mewaldt, E. C. Stone, & T. T. von Rosenvinge.* 418, L45, 238-F1 (1993)

Equilibrium Morphology of Slender Untwisted Flux Loops. *David Garren, James Chen, & Peter Cargill.* 418, 919, 244-A12 (1993)

Energy Requirements for Opening the Solar Corona. *Richard Wolfson.* 419, 382, 251-A1 (1993)

Magnetospheres of Solar Active Regions Inferred from Spectral-Polarization Observations with High Spatial Resolution. *K. R. Lang, R. F. Willson, J. N. Kile, J. Lemen, K. T. Strong, V. L. Bogod, G. B. Gelfreikh, B. I. Ryabov, S. R. Hafizov, V. E. Abramov, & S. V. Svetkov.* 419, 398, 251-B7 (1993)

Current Sheets and Reconnection Driven by Footpoint Motion in Two-dimensional Coronal Loops with *X*-Type Neutral Lines. *Xiaogang Wang & A. Bhattacharjee.* 420, 415, 6-A9 (1994)

A Flare Caused by Interacting Coronal Loops. *Yoichiro Hanaoka.* 420, L37, 7-E9 (1994)

The Magnetic Field of Solar Prominences. *S. K. Antiochos, R. B. Dahlburg, & J. A. Klimchuk.* 420, L41, 7-F1 (1994)

Solar Coronal Abundances of Elements with Low First Ionization Potential: Chromium, Calcium, and Aluminum. *D. L. McKenzie & U. Feldman.* 420, 892, 14-A7 (1994)

Coronal Temperature, Density, and Magnetic Field Maps of a Solar Active Region Using the Owens Valley Solar Array. *Dale E. Gary & G. J. Hurford.* 420, 903, 14-B6 (1994)

Neutral Hydrogen in the Solar Wind Acceleration Region. *Espen Lyngdal Olsen, Egil Leer, & Thomas E. Holzer.* 420, 913, 14-C4 (1994)

Coronal Heating by the Resonant Absorption of Alfvén Waves: The Effect of Viscous Stress Tensor. *L. Ofman, J. M. Davila, & R. S. Steinolfson.* 421, 360, 20-D8 (1994)

The Effects of Kelvin-Helmholtz Instability on Resonance Absorption Layers in Coronal Loops. *Judith T. Karpen, Russell B. Dahlburg, & Joseph M. Davila.* 421, 372, 20-E10 (1994)

On the Derivation of Empirical Limits on the Helium Abundance in Coronal Holes below 1.5 $R_\odot$. *Shadia Rifai Habbal & Ruth Esser.* 421, L59, 22-C5 (1994)

Some Implications of the Nanoflare Concept. *Peter J. Cargill.* 422, 381, 34-G2 (1994)

A Comparison of Nonrelativistic Electron Escape Efficiencies for Solar Flares with and without Coronal Mass Ejections. *S. W. Kahler, E. I. Daibog, V. G. Kurt, & V. G. Stolpovskii.* 422, 394, 35-A1 (1994)

Loop Models of Low Coronal Structures Observed by the Normal Incidence X-Ray Telescope (NIXT). *G. Peres, F. Reale, & L. Golub.* 422, 412, 35-B11 (1994)

Thickness Variations along Coronal Loops Inferred from Vector Magnetograph Data. *A. N. McClymont & Z. Mikić.* 422, 899, 43-B3 (1994)

Morphology of Active Region Transient Brightenings with the *Yohkoh* Soft X-Ray Telescope. *Toshifumi Shimizu, Saku Tsuneta, Loren W. Acton, James R. Lemen, Yoshiaki Ogawara, & Yutaka Uchida.* 422, 906, 43-B13 (1994)

Electron Acceleration at Quasi-parallel Shocks in the Solar Corona and Its Signature in Solar Type II Radio Bursts. *G. Mann & H. Lühr.* 90, 577, 11-A1 (1994)

Pulsed Acceleration in Solar Flares. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Mukul R. Kundu.* 90, 631, 11-E11 (1994)

The Flare of 1989 September 9 09:09 UT: Does Coronal Loop Collision Initiate Efficient Gamma-Ray Emission? *H. Aurass, A. Hofmann, & E. Rieger.* 90, 707, 12-E6 (1994)

Particle Orbits, Trapping, and Acceleration in a Filamentary Current Sheet Model. *Bernhard Kliem.* 90, 719, 12-F6 (1994)

Acceleration and Heating of Two-Fluid Solar Wind by Alfvén Waves. *Ørnulf Sandbæk & Egil Leer.* 423, 500, 52-D1 (1994)

Dynamical Properties of the Chromosphere In and Out of the Solar Magnetic Network. *Karine Bocchialini, Jean-Claude Vial, & Serge Koutchmy.* 423, L67, 54-B8 (1994)

A Numerical Study of the Sudden Eruption of Sheared Magnetic Fields. *George Roumeliotis, Peter A. Sturrock, & Spiro K. Antiochos.* 423, 847, 59-D1 (1994)

Oscillations and Evolution of Curved Current-carrying Loops in the Solar Corona. *Peter J. Cargill, James Chen, & David A. Garren.* 423, 854, 59-D10 (1994)

Solar Tomography. *Joseph M. Davila.* 423, 871, 59-F1 (1994)

Reflection of Alfvén Waves in Stellar Atmospheres: The Case of Open Magnetic Fields. *Yu-Qing Lou & Robert Rosner.* 424, 429, 67-B11 (1994)

Multispectral Observations of Chromospheric Evaporation in the 1991 November 15 X-Class Solar Flare. *Jean-Pierre Wülser, Richard C. Canfield, Loren W. Acton, J. Leonard Culhane, Andrew Phillips, Andrzej Fludra, Taro Sakao, Satoshi Masuda, Takeo Kosugi, & Saku Tsuneta.* 424, 459, 67-E4 (1994)

Nonthermal Radio Emission Associated with a Coronal Disconnection Event. *N. Gopalswamy, M. R. Kundu, & O. C. St. Cyr.* 424, L135, 79-F3 (1994)

Comparison between Cool and Hot Plasma Behaviors of Surges. *B. Schmieder, L. Golub, & S. K. Antiochos.* 425, 326, 84-C6 (1994)

Solar Coronal Temperature Diagnostics Using Emission Lines from Multiple Stages of Ionization of Iron. *Jeffrey W. Brosius, Joseph M. Davila, Roger J. Thomas, & William T. Thompson.* 425, 343, 84-E7 (1994)

Heavy-Ion Isotopic Anomalies in ^{3}He-rich Solar Particle Events. *G. M. Mason, J. E. Mazur, & D. C. Hamilton.* 425, 843, 92-C5 (1994)

The Coronal Electron Density Distribution Determined from Dual-Frequency Ranging Measurements during the 1991 Solar Conjunction of the *Ulysses* Spacecraft. *M. K. Bird, H. Volland, M. Pätzold, P. Edenhofer, S. W. Asmar, & J. P. Brenkle.* 426, 373, 100-G5 (1994)

Solar Flare Model Atmospheres. *Suzanne L. Hawley & George H. Fisher.* 426, 387, 101-A9 (1994)

Angular Scattering of Solar Radio Emission by Coronal Turbulence. *T. S. Bastian.* 426, 774, 108-B3 (1994)

Density Structure inside a Polar Coronal Hole. *M. Guhathakurta & T. E. Holzer.* 426, 782, 108-B13 (1994)

Ion and Electron Suprathermal Tail Strengths in the Transition Region: Support for the Velocity Filtration Model of the Corona. *Jack D. Scudder.* 427, 446, 115-D6 (1994)

Observational Tests for Nonequilibrium Ionization in the Solar Corona. *D. Spadaro, P. Leto, & S. K. Antiochos.* 427, 453, 115-E1 (1994)

A Converging Flux Model of an X-Ray Bright Point and an Associated Canceling Magnetic Feature. *E. R. Priest, C. E. Parnell, & S. F. Martin.* 427, 459, 115-E9 (1994)

Three-dimensional Force-free Looplike Magnetohydrodynamic Equilibria. *John M. Finn, Parvez N. Guzdar, & Daniel Usikov.* 427, 475, 115-G1 (1994)

The Fe XIV Spectrum: Predicted Line Intensities and Solar Identifications. *A. K. Bhatia, S. O. Kastner, F. P. Keenan, E. S. Conlon, & K. G. Widing.* 427, 497, 116-B8 (1994)

Nonlinear Evolution of the Coronal Magnetic Field under Reconnective Relaxation. *R. Wolfson, G. E. Vekstein, & E. R. Priest.* 428, 345, 132-D11 (1994)

Particle Acceleration in an Evolving Active Region by an Ensemble of Shock Waves. *Anastasios Anastasiadis & Loukas Vlahos.* 428, 819, 140-D11 (1994)

Injection Profiles of Solar Energetic Particles as Functions of Coronal Mass Ejection Heights. *S. Kahler.* 428, 837, 140-F5 (1994)

Coupling of the Coronal Helium Abundance to the Solar Wind. *Viggo H. Hansteen, Egil Leer, & Thomas E. Holzer.* 428, 843, 140-G1 (1994)

Exploring the Fine Structure at the Limb in Coronal Holes. *Margarita Karovska, Solon F. Blundell, & Shadia Rifai Habbal.* 428, 854, 141-A1 (1994)

Electric Currents and Coronal Heating in NOAA Active Region 6952. *T. R. Metcalf, R. C. Canfield, H. S. Hudson, D. L. Mickey, J.-P. Wülser, P. C. H. Martens, & S. Tsuneta.* 428, 860, 141-A10 (1994)

Detection of Linear Polarization in the Microwave Emission of Solar Active Regions. *C. E. Alissandrakis & F. Chiuderi-Drago.* 428, L73, 142-G8 (1994)

Generation of Radiation in Solar Corona and Interplanetary Space by Energetic Electrons. *C. S. Wu, Peter H. Yoon, & G. C. Zhou.* 429, 406, 149-B8 (1994)

Magnetostatic Structures of the Solar Corona. I. A Model Based on the Cauchy Boundary Value Problem. *J. R. Hundhausen & B. C. Low.* 429, 876, 156-E7 (1994)

Coronal Electron Density Diagnostic from Fe XII. *J. W. Cook, F. P. Keenan, L. K. Harra, & S. S. Tayal.* 429, 924, 157-B9 (1994)

Stellar Winds with Non-WKB Alfvén Waves. I. Wind Models for Solar Coronal Conditions. *K. B. MacGregor & P. Charbonneau.* 430, 387, 164-A9 (1994)

Imaging Spectroscopy of Solar Microwave Radiation. I. Flaring Emission. *Jeremy Lim, Dale E. Gary, Gordon J. Hurford, & James R. Lemen.* 430, 425, 164-E13 (1994)

Disruption of Coronal Magnetic Field Arcades. *Zoran Mikić & Jon A. Linker.* 430, 898, 173-B6 (1994)

Solar Fine-Scale Structures in the Corona, Transition Region, and Lower Atmosphere. *Dan Moses, J. W. Cook, J.-D. F. Bartoe, G. E. Brueckner, K. P. Dere, D. F. Webb, J. M. Davis, J. W. Harvey, F. Recely, S. F. Martin, & H. Zirin.* 430, 913, 173-C9 (1994)

A Gigantic Coronal Jet Ejected from a Compact Active Region in a Coronal Hole. *K. Shibata, N. Nitta, K. T. Strong, R. Matsumoto, T. Yokoyama, T. Hirayama, H. Hudson, & Y. Ogawara.* 431, L51, 183-A9 (1994)

Dynamical Structure of Extreme Ultraviolet Macrospicules. *Margarita Karovska & Shadia Rifai Habbal.* 431, L59, 183-B7 (1994)

Force-free Fields in Thin Coronal Loops. *A. Gordon Emslie & L. K. Wilkinson.* 431, 873, 189-E5 (1994)

Detection of 17 GHz Radio Emission from X-Ray–bright Points. *M. R. Kundu, K. Shibasaki, S. Enome, & N. Nitta.* 431, L155, 192-E13 (1994)

The Power Density Spectrum Break in an Alfvén Wave–driven Solar Wind. *V. Jatenco-Pereira, R. Opher, & L. C. Yamamoto.* 432, 409, 198-C3 (1994)

The Determination of Electron Densities in the Solar Atmosphere from the 1718.56 Å/1486.51 Å Emission-Line Ratio in N IV. *F. P. Keenan, L. K. Harra, G. A. Doschek, & J. W. Cook.* 432, 806, 206-A10 (1994)

Three-dimensional Simulation Study of the Magnetohydrodynamic Relaxation Process in the Solar Corona. I. Spontaneous Generation of the Taylor-Heyvaerts-Priest State. *K. Kusano, Y. Suzuki, H. Kubo, T. Miyoshi, & K. Nishikawa.* 433, 361, 212-G3 (1994)

A Multisource Limb Flare Observed at Multiple Radio Wavelengths. *T. A. Kucera, G. A. Dulk, D. E. Gary, & T. S. Bastian.* 433, 875, 222-A11 (1994)

Coalescence of Two Current Loops with a Kink Instability Simulated by a Three-dimensional Electromagnetic Particle Code. *Ken-Ichi Nishikawa, Jun-ichi Sakai, Jie Zhao, Torsten Neubert, & Oscar Buneman.* 434, 363, 230-D7 (1994)

On the Absence of a Relationship between the Properties of the $T_e \geq 10^6$ K and the Properties of the $T_e \leq 7 \times 10^5$ K Solar Plasmas. *U. Feldman & J. M. Laming.* 434, 370, 230-E13 (1994)

The Study of Coronal Plasma Structures and Fluctuations with Faraday Rotation Measurements. *Takayuki Sakurai & Steven R. Spangler.* 434, 773, 238-E6 (1994)

Coronal Magnetic Structures Observing Campaign. III. Coronal Plasma and Magnetic Field Diagnostics Derived from Multiwaveband Active Region

Observations. *J. T. Schmelz, G. D. Holman, J. W. Brosius, & R. F. Willson.* 434, 786, 238-F8 (1994)

Ground-based Detection of an Infrared [Si X] Coronal Emission Line and Improved Wavelengths for the Infrared [Fe XIII] Emission Lines. *M. J. Penn & J. R. Kuhn.* 434, 807, 239-A10 (1994)

The Possible Role of MHD Waves in Heating the Solar Corona. *Lisa J. Porter, James A. Klimchuk, & Peter A. Sturrock.* 435, 482, 250-B1 (1994)

The Possible Role of High-Frequency Waves in Heating Solar Coronal Loops. *Lisa J. Porter, James A. Klimchuk, & Peter A. Sturrock.* 435, 502, 250-C10 (1994)

Polar Plumes and the Solar Wind. *Y.-M. Wang.* 435, L153, 260-E4 (1994)

Near-Infrared Emission-Line and Continuum Observations from the 1991 Eclipse. *M. J. Penn, J. Arnaud, D. L. Mickey, & B. J. LaBonte.* 436, 368, 266-C9 (1994)

On the Relation between Coronal Heating, Flux Tube Divergence, and the Solar Wind Proton Flux and Flow Speed. *Ørnulf Sandbæk, Egil Leer, & Viggo H. Hansteen.* 436, 390, 266-F9 (1994)

The Effects of a Hot Outer Atmosphere on Acoustic-Gravity Waves. *Bradley W. Hindman & Ellen G. Zweibel.* 436, 929, 278-D11 (1994)

Evolution and Statistics of Current Sheets in Coronal Magnetic Loops. *D. W. Longcope & R. N. Sudan.* 437, 491, 289-G8 (1994)

Two Types of Slow Solar Wind. *Y.-M. Wang.* 437, L67, 292-D1 (1994)

The Form of Ideal Current Layers in Line-tied Magnetic Fields. *D. W. Longcope & H. R. Strauss.* 437, 851, 297-C10 (1994)

Coulomb Collisions and Coronal Heating by Velocity Filtration. *Stephen W. Anderson.* 437, 860, 297-D8 (1994)

The Solar Corona as a Quadric Surface in Three-dimensional Space. *R. A. Gulyaev.* 437, 867, 297-E4 (1994)

Temperature Dependence of Nonthermal Motions in Solar Flare Plasmas Observed with the Flat Crystal Spectrometer on *SMM*. *Ester Antonucci & Maria Adele Dodero.* 438, 480, 8-C3 (1995)

Disruption of a Helmet Streamer by Photospheric Shear. *Jon A. Linker & Zoran Mikić.* 438, L45, 10-D7 (1995)

Angular Scattering of Radio Waves: Implications for Mode Coupling in the Solar Corona. *T. S. Bastian.* 439, 494, 27-G9 (1995)

Cooling of Solar Flare Plasmas. I. Theoretical Considerations. *Peter J. Cargill, John T. Mariska, & Spiro K. Antiochos.* 439, 1034, 39-A3 (1995)

Nonequilibrium in Sheared Axisymmetric Force-free Magnetic Fields. *J. J. Aly.* 439, L63, 40-F13 (1995)

Solar Coronal Dust Scattering in the Infrared. *R. M. MacQueen & Bradford W. Greeley.* 440, 361, 46-B8 (1995)

Coronal Loop Formation Resulting from Photospheric Convection. *G. Van Hoven, Y. Mok, & Z. Mikić.* 440, L105, 58-D8 (1995)

Gravity Waves in the Lower Solar Corona. *Yu-Qing Lou.* 442, 401, 82-E1 (1995)

Stellar Coronal Abundances. III. The Solar First Ionization Potential Effect Determined from Full-Disk Observation. *J. Martin Laming, Jeremy J. Drake, & Kenneth G. Widing.* 443, 416, 100-G2 (1995)

Shear-induced Opening of the Coronal Magnetic Field. *Richard Wolfson.* 443, 810, 109-A11 (1995)

Magnetostatic Structures of the Solar Corona. II. The Magnetic Topology of Quiescent Prominences. *B. C. Low & J. R. Hundhausen.* 443, 818, 109-B9 (1995)

Ultraviolet Observations of the Structure and Dynamics of an Active Region at the Limb. *C. M. Korendyke, K. P. Dere, D. G. Socker, G. E. Brueckner, & B. Schmieder.* 443, 869, 109-G10 (1995)

New Model of Iron Spectra in the Extreme Ultraviolet and Application to SERTS and *EUVE* Observations: A Solar Active Region and Capella. *N. S. Brickhouse, J. C. Raymond, & B. W. Smith.* 97, 551, 19-F4 (1995)

Coronal Heating by the Resonant Absorption of Alfvén Waves: Wavenumber Scaling Laws. *L. Ofman, J. M. Davila, & R. S. Steinolfson.* 444, 471, 120-B1 (1995)

Metric Type III Bursts from a Flaring X-Ray Bright Point near an Active Region. *M. R. Kundu, J. P. Raulin, M. Pick, & K. T. Strong.* 444, 922, 129-B3 (1995)

Optical Diagnostics of Coronal Loop Interactions. *Vladimir S. Airapetian & Raymond N. Smartt.* 445, 489, 139-C6 (1995)

Coordinated Observation of the Solar Corona Using the Norikura Coronagraph and the *Yohkoh* Soft X-Ray Telescope. *K. Ichimoto, H. Hara, A. Takeda, K. Kumagai, T. Sakurai, T. Shimizu, & H. S. Hudson.* 445, 978, 148-F8 (1995)

Reduction, Analysis, and Properties of Electric Current Systems in Solar Active Regions. *G. Allen Gary & Pascal Démoulin.* 445, 982, 148-G12 (1995)

Radio Interferometer Observations of Solar Wind Turbulence from the Orbit of *Helios* to the Solar Corona. *Steven R. Spangler & Takayuki Sakurai.* 445, 999, 149-B10 (1995)

Photospheric Magnetic Field Evolution and Eruptive Flares. *T. G. Forbes & E. R. Priest.* 446, 377, 158-D10 (1995)

Alfvén Turbulence Dissipation in Proton Injection and Acceleration in Solar Flares. *Dean F. Smith & James A. Miller.* 446, 390, 158-E12 (1995)

The Inclination of the Heliomagnetic Equator and the Presence of an Inclined Relic Field in the Sun. *S. Bravo & G. Stewart.* 446, 431, 159-B9 (1995)

Identification of Low-Latitude Coronal Plumes in Extreme-Ultraviolet Spectroheliograms. *Y.-M. Wang & N. R. Sheeley, Jr.* 446, L51, 161-A8 (1995)

The Possible Ascent of a Closed Magnetic System through the Photosphere. *B. W. Lites, B. C. Low, V. Martínez Pillet, P. Seagraves, A. Skumanich, Z. A. Frank, R. A. Shine, & S. Tsuneta.* 446, 877, 168-B13 (1995)

Constraints on Energy Storage and Release Models for Astrophysical Transients and Solar Flares. *Edward T. Lu.* 447, 416, 178-B8 (1995)

On Solar Emission Lines: Calculation of Relative Line Intensities Based on the Finite-Temperature Schrödinger Equation. *G. P. Malik, Usha Malik, L. K. Pande, & V. S. Varma.* 447, 443, 178-E8 (1995)

The Velocity Differential Emission Measure: Diagnostic of Bulk Plasma Motion in Solar Flares. *E. K. Newton, A. G. Emslie, & J. T. Mariska.* 447, 915, 188-E1 (1995)

Electron Time-of-Flight Differences in Solar Flares. *Markus J. Aschwanden, Richard A. Schwartz, & Daniel M. Alt.* 447, 923, 188-E12 (1995)

Absolute Abundances of Flaring Coronal Plasma Derived from *SMM* Spectral Observations. *A. Fludra & J. T. Schmelz.* 447, 936, 188-G1 (1995)

Detection of Nonthermal Radio Emission from Coronal X-Ray Jets. *M. R. Kundu, J. P. Raulin, N. Nitta, H. S. Hudson, M. Shimojo, K. Shibata, & A. Raoult.* 447, L135, 191-D7 (1995)

Physical Properties of Polar Coronal Rays and Holes as Observed with the SPARTAN 201-01 Coronagraph. *Richard Fisher & Madhulika Guhathakurta.* 447, L139, 191-E1 (1995)

Solar Implications of *Ulysses* Interplanetary Field Measurements. *Y.-M. Wang & N. R. Sheeley, Jr.* 447, L143, 191-E9 (1995)

Magnetohydrodynamic Waves in a Bounded Inhomogeneous Medium with Prominence-Corona Properties. *R. Oliver & J. L. Ballester.* 448, 444, 198-C8 (1995)

The Neupert Effect and the Chromospheric Evaporation Model for Solar Flares. *Theodore T. Lee, Vahé Petrosian, & James M. McTiernan.* 448, 915, 207-E7 (1995)

A Comparison of Active Region Temperatures and Emission Measures Observed in Soft X-Rays and Microwaves and Implications for Coronal Heating. *J. A. Klimchuk & D. E. Gary.* 448, 925, 207-F6 (1995)

Nonlinear Energy Transfer in Solar Magnetic Loops. *Daniel O. Gómez, Edward E. DeLuca, & Alexander N. McClymont.* 448, 954, 208-B8 (1995)

Fine-Scale Filamentary Structure in Coronal Streamers. *Richard Woo, John W. Armstrong, Michael K. Bird, & Martin Pätzold.* 449, L91, 217-E1 (1995)

Empirical Relationship between the Magnetic Field and the Mass and Energy Flux in the Source Regions of the Solar Wind. *Y.-M. Wang.* 449, L157, 227-F8 (1995)

The Radio Properties of Solar Active Region Soft X-Ray Transient Brightenings. *S. M. White, M. R. Kundu, T. Shimizu, K. Shibasaki, & S. Enome.* 450, 435, 234-A5 (1995)

Relationship between Cold and Hot Post–Solar Flare Loops and the Impact on the Reconnection Flare Model. *U. Feldman & J. F. Seely.* 450, 902, 243-D3 (1995)

Current Paths in the Corona and Energy Release in Solar Flares. *D. B. Melrose.* 451, 391, 251-C6 (1995)

Triggered Magnetic Energy Release in Solar Flares. *Y. Q. Hu, X. Li, & G. X. Ai.* 451, 843, 258-G4 (1995)

Klein-Gordon Equation and the Local Critical Frequency for Alfvén Waves Propagating in an Isothermal Atmosphere. *Z. E. Musielak & R. L. Moore.* 452, 434, 268-A11 (1995)

On Thermal Hydrodynamical Models of Solar Flares with a High Initial Coronal Density. *W. Q. Gan, C. C. Cheng, & C. Fang.* 452, 445, 268-B11 (1995)

Coronal Plumes and Their Relationship to Network Activity. *Y.-M. Wang & N. R. Sheeley, Jr.* 452, 457, 268-D1 (1995)

Stochastic Proton Acceleration by Cascading Alfvén Waves in Impulsive Solar Flares. *James A. Miller & D. Aaron Roberts.* 452, 912, 277-C7 (1995)

A Novel Maximum-Likelihood Method for Image Reconstruction with Increased Sampling. *George Roumeliotis.* 452, 944, 277-F5 (1995)

Measurements of the Ionic Charge States of Solar Energetic Particles Using the Geomagnetic Field. *R. A. Leske, J. R. Cummings, R. A. Mewaldt, E. C. Stone, & T. T. von Rosenvinge.* 452, L149, 280-F6 (1995)

Yohkho Soft X-Ray Spectroscopic Observations of the Bright Loop-Top Kernels of Solar Flares. *Josef I. Khan, Louise K. Harra-Murnion, Hugh S. Hudson, James R. Lemen, & Alphonse C. Sterling.* 452, L153, 280-F13 (1995)

Coronal Loop Oscillations Driven by Footpoint Motions: Analytical Results for a Model Problem. *David Berghmans & Peter De Bruyne.* 453, 495, 287-G10 (1995)

Quadrupolar Force-free Magnetic Fields with Singular Current Density Surfaces. *Y. Q. Hu.* 454, 480, 305-G12 (1995)

Coronal Heating and Solar Wind Energy Balance. *Ørnulf Sandbæk & Egil Leer.* 454, 486, 306-A7 (1995)

Soft X-Ray Loops and Coronal Heating. *Lisa J. Porter & James A. Klimchuk.* 454, 499, 306-B10 (1995)

Solar Rotation Stereoscopy in Microwaves. *Markus J. Aschwanden, Jeremy Lim, Dale E. Gary, & James A. Klimchuk.* 454, 512, 306-C12 (1995)

Scaling Law of Solar Coronal Loops Obtained with *Yohkoh*. *Ryouhei Kano & Saku Tsuneta.* 454, 934, 314-F7 (1995)

Quiet-Sun Connection between Intensity, Doppler Shift, and Line Broadening in Solar Ultraviolet Emission Lines. *N. Brynildsen, O. Kjeldseth-Moe, & P. Maltby.* 455, L81, 325-G8 (1995)

The Damping of Compressional Alfvén Waves near Magnetic Cusp Configurations. *R. A. Scheper & A. B. Hassam.* 455, 693, 331-D11 (1995)

Accuracy, Uncertainties, and Delay Distribution of Electron Time-of-Flight Measurements in Solar Flares. *Markus J. Aschwanden & Richard A. Schwartz.* 455, 699, 331-E6 (1995)

SUN: ECLIPSES

Formation of the Infrared Emission Lines of Mg I in the Solar Atmosphere. *E. S. Chang, E. H. Avrett, P. J. Mauas, R. W. Noyes, & R. Loeser.* 379, L79, 175-E1 (1991)

Submillimeter Solar Limb Profiles Determined from Observations of the Total Solar Eclipse of 1988 March 18. *T. L. Roellig, E. E. Becklin, J. T. Jefferies, G. A. Kopp, C. A. Lindsey, F. Q. Orrall, & M. W. Werner.* 381, 288, 192-E5 (1991)

SUN: EVOLUTION

X-Ray Emission from the Sun in Its Youth and Old Age. *J. D. Dorren, M. Güdel, & E. F. Guinan.* 448, 431, 198-B3 (1995)

Early Solar Mass Loss, Element Diffusion, and Solar Oscillation Frequencies. *Joyce A. Guzik & Arthur N. Cox.* 448, 905, 207-D7 (1995)

SUN: FACULAE

On the Contrast of Facular Hillocks in the Infrared. *Kenneth H. Schatten & Hans G. Mayr.* 372, 728, 84-F7 (1991)

Polar Faculae: 1906–1990. *N. R. Sheeley, Jr.* 374, 386, 102-G11 (1991)

Weak Magnetic Fields and Solar Irradiance Variations. *J. K. Lawrence, G. A. Chapman, & S. R. Walton.* 375, 771, 122-C1 (1991)

Multicolor Continuum Analysis of the Solar Granulation in Quiet and Active Regions. *C. U. Keller & S. Koutchmy.* 379, 751, 174-B1 (1991)

Nonfacular Solar Luminosity Variations. *J. R. Kuhn & K. G. Libbrecht.* 381, L35, 194-E1 (1991)

SUN: FACULAE, FLOCCULI

Coronal Magnetic Structures Observing Campaign. IV. Multiwaveband Observations of Sunspot and Plage-associated Coronal Emission. *Jeffrey W. Brosius, Robert F. Willson, Gordon D. Holman, & Joan T. Schmelz.* 386, 347, 28-E1 (1992)

A True-Field Magnetogram in a Solar Plage Region. *Douglas Rabin.* 390, L103, 85-D1 (1992)

Properties of the Smallest Solar Magnetic Elements. I. Facular Contrast near Sun Center. *K. P. Topka, T. D. Tarbell, & A. M. Title.* 396, 351, 159-D6 (1992)

SUN: FACULAE, PLAGES

Simultaneous Observations of Solar Plage with the Solar Extreme Ultraviolet Rocket Telescope and Spectrograph (SERTS), the VLA, and the Kitt Peak Magnetograph. *Jeffrey W. Brosius, Joseph M. Davila, William T. Thompson, Roger J. Thomas, Gordon D. Holman, N. Gopalswamy, Stephen M. White, Mukul R. Kundu, & Harrison P. Jones.* 411, 410, 132-E4 (1993)

The Center-to-Limb Brightness Variation of the Sun at $\lambda = 850$ Microns. *T. S. Bastian, M. W. Ewell, Jr., & H. Zirin.* 415, 364, 189-D13 (1993)

Effects of Weak-to-Moderate Vertical Magnetic Fields on Solar *f*- and *p*-Modes. *P. S. Cally.* 451, 372, 251-A8 (1995)

New Observations of Subarcsecond Photospheric Bright Points. *T. E. Berger, C. J. Schrijver, R. A. Shine, T. D. Tarbell, A. M. Title, & G. Scharmer.* 454, 531, 306-E11 (1995)

SUN: FLARES

High Coronal Flares and Impulsive Acceleration of Solar Energetic Particles. *E. Cliver & S. Kahler.* 366, L91, 11-E11 (1991)

A Study of Solar Flare Energy Transport Based on Coordinated Hα and X-Ray Observations. *Richard C. Canfield, Dominic M. Zarro, Jean-Pierre Wülser, & Brian R. Dennis.* 367, 671, 21-E11 (1991)

On the Transport and Acceleration of Solar Flare Particles in a Coronal Loop. *James M. Ryan & Martin A. Lee.* 368, 316, 26-A7 (1991)

First Interferometric Observations of Solar Microwave Millisecond Spike Bursts. *Dale E. Gary, G. J. Hurford, & D. J. Flees.* 369, 255, 39-B1 (1991)

Fe XII Line Ratios in Solar Flares. *S. S. Tayal, Ronald J. W. Henry, F. P. Keenan, S. M. McCann, & K. G. Widing.* 369, 567, 44-G1 (1991)

Solar Radio Microbursts at 1.4 GHz. *T. S. Bastian.* 370, L49, 53-F11 (1991)

Opacity Effects on the Radiative Losses of Coronal Loops. *N. P. M. Kuin & A. I. Poland.* 370, 763, 57-G11 (1991)

The Magnetic Network Location of Explosive Events Observed in the Solar Transition Region. *J. G. Porter & K. P. Dere.* 370, 775, 58-A11 (1991)

Dynamic Magnetic Reconnection at an X-Type Neutral Point. *I. J. D. Craig & A. N. McClymont.* 371, L41, 66-F1 (1991)

Solar Abundances from Gamma-Ray Spectroscopy: Comparisons with Energetic Particle, Photospheric, and Coronal Abundances. *R. J. Murphy, R. Ramaty, B. Kozlovsky, & D. V. Reames.* 371, 793, 71-D6 (1991)

Direct Radiation from a Strong DC Electric Field. *Donat G. Wentzel.* 373, 285, 89-E3 (1991)

A Slingshot Model for Solar Flares. *Gregory Benford.* 373, 671, 96-C9 (1991)

Fe XIV Line Ratios in the Sun. *F. P. Keenan, P. L. Dufton, M. B. Boylan, A. E. Kingston, & K. G. Widing.* 373, 695, 96-E13 (1991)

Consequences of Strong Pitch-Angle Diffusion of Particles in Solar Flares. *P. A. Bespalov, V. V. Zaitsev, & A. V. Stepanov.* 374, 369, 102-F5 (1991)

Temperature-dependent Saturation of Hydrogen Lines in Solar Flares. *K. G. Gayley.* 374, 773, 108-F5 (1991)

Interrelation of Soft and Hard X-Ray Emissions during Solar Flares. I. Observations. *R. M. Winglee, A. L. Kiplinger, D. M. Zarro, G. A. Dulk, & J. R. Lemen.* 375, 366, 115-D13 (1991)

Interrelation of Soft and Hard X-Ray Emissions during Solar Flares. II. Simulation Model. *R. M. Winglee, G. A. Dulk, P. L. Bornmann, & J. C. Brown.* 375, 382, 115-F1 (1991)

How Much Energy Can Be Stored in a Three-dimensional Force-free Magnetic Field? *J. J. Aly.* 375, L61, 124-C11 (1991)

Magnetohydrodynamic Turbulence Dissipation and Stochastic Proton Acceleration in Solar Flares. *James A. Miller.* 376, 342, 129-B11 (1991)

The Interaction of Collisionless Shocks in Astrophysical Plasmas. *P. J. Cargill.* 376, 771, 136-A1 (1991)

Particle Injection following Solar Flares on 1980 May 28 and June 8: Evidence for Different Injection Time Histories in Impulsive and Gradual Events? *M.-B. Kallenrode & G. Wibberenz.* 376, 787, 136-B8 (1991)

Flares Observed by the Normal Incidence X-Ray Telescope on 1989 September 11. *M. Herant, F. Pardo, E. Spiller, & L. Golub.* 376, 797, 136-C6 (1991)

Magnetohydrodynamics of an Impulsively Heated, Hard X-Ray Emitting Filament. *George Roumeliotis & A. Gordon Emslie.* 377, 685, 148-B9 (1991)

Alfvén Wave Trapping, Network Microflaring, and Heating in Solar Coronal Holes. *R. L. Moore, Z. E. Musielak, S. T. Suess, & C.-H. An.* 378, 347, 155-C5 (1991)

Multi–Wave Band *SMM*–VLA Observations of an M2 Flare and an Associated Coronal Mass Ejection. *Robert F. Willson, Joan T. Schmelz, Raymond D. Gonzalez, Kenneth R. Lang, & Kermit L. Smith.* 378, 360, 155-D6 (1991)

Center-to-Limb Variations of Characteristics of Solar Flare Hard X-Ray and Gamma-Ray Emission. *James M. McTiernan & Vahé Petrosian.* 379, 381, 167-F11 (1991)

The Iron-to-Calcium Abundance Ratio in the 20 × 10^6 K Plasma of Medium and Large Solar Flares. *K. J. H. Phillips & U. Feldman.* 379, 401, 168-A5 (1991)

The $3s^23p\ ^2P$–$3s3p^2\ ^4P$ Intercombination Lines of Fe XIV in the Sun. *F. P. Keenan, P. L. Dufton, E. S. Conlon, M. B. Boylan, A. E. Kingston, & K. G. Widing.* 379, 406, 168-A11 (1991)

Solar Gamma-Ray-Line Flares, Type II Radio Bursts, and Coronal Mass Ejections. *E. W. Cliver, H. V. Cane, D. J. Forrest, M. J. Koomen, R. A. Howard, & C. S. Wright.* 379, 741, 174-A2 (1991)

Motions, Fields, and Flares in the 1989 March Active Region. *Haimin Wang, Frances Tang, Harold Zirin, & Guoxiang Ai.* 380, 282, 179-E1 (1991)

Multispacecraft Observations of Solar ^{3}He-rich Events. *D. V. Reames, M.-B. Kallenrode, & R. G. Stone.* 380, 287, 179-G1 (1991)

Magnetic Field–aligned Electric Potentials in Nonideal Plasma Flows. *K. Schindler, M. Hesse, & J. Birn.* 380, 293, 179-G9 (1991)

Avalanches and the Distribution of Solar Flares. *Edward T. Lu & Russell J. Hamilton.* 380, L89, 188-F5 (1991)

Neutralized and Unneutralized Current Patterns in the Solar Corona. *D. B. Melrose.* 381, 306, 192-F13 (1991)

Numerical Simulations of Microflare Evolution in the Solar Transition Region and Corona. *Alphonse C. Sterling, John T. Mariska, Kazunari Shibata, & Yoshinori Suematsu.* 381, 313, 192-G8 (1991)

Soft X-Ray Emission from Electron-Beam–heated Solar Flares. *John T. Mariska & Dominic M. Zarro.* 381, 572, 197-F10 (1991)

Subthreshold Stochastic Diffusion with Application to Selective Acceleration of ^{3}He in Solar Flares. *Spilios Riyopoulos.* 381, 578, 197-G5 (1991)

Large Solar Flares: Analysis of the Events Recorded by the Mont Blanc Neutrino Detector. *M. Aglietta, G. Badino, G. Bologna, C. Castagnoli, A. Castellina, V. L. Dadykin, W. Fulgione, P. Galeotti, F. F. Kalchukov, I. V. Korolkova, P. V. Kortchaguin, V. A. Kudryavtsev, A. S. Malguin, L. Periale, V. G. Ryassny, O. G. Ryazhskaya, O. Saavedra, G. Trinchero, S. Vernetto, V. F. Yakushev, & G. T. Zatsepin.* 382, 344, 204-D9 (1991)

Improved Line Ratio Calculations Involving $\Delta n = 1$ (2–3) Transitions in O V and a Reanalysis of *Skylab* Observations of Solar Flares. *F. P. Keenan, P. L. Dufton, L. K. Harra, E. S. Conlon, K. A. Berrington, A. E. Kingston, & K. G. Widing.* 382, 349, 204-E1 (1991)

Interplanetary Transport of Decay Protons from Solar Flare Neutrons. *D. Ruffolo.* 382, 688, 210-B12 (1991)

Energetics and Dynamics in a Large Solar Flare of 1989 March. *Jean-Pierre Wülser, Dominic M. Zarro, & Richard C. Canfield.* 384, 341, 5-B13 (1992)

Multifrequency Observations of a Remarkable Solar Radio Burst. *S. M. White, M. R. Kundu, T. S. Bastian, D. E. Gary, G. J. Hurford, T. Kucera, & J. H. Bieging.* 384, 656, 10-C5 (1992)

The Practical Application of the Magnetic Virial Theorem. *J. A. Klimchuk, R. C. Canfield, & J. E. Rhoads.* 385, 327, 16-A1 (1992)

Three-dimensional Force-free Magnetic Fields and Flare Energy Buildup. *J. A. Klimchuk & P. A. Sturrock.* 385, 344, 16-B6 (1992)

Fluid Flow in a Jet and the Ca XIX Line Profiles Observed during Solar Flares. *P. L. Bornmann & J. R. Lemen.* 385, 363, 16-D1 (1992)

C IV Line Ratios in the Sun. *F. P. Keenan, E. S. Conlon, L. K. Harra, V. M. Burke, & K. G. Widing.* 385, 381, 16-E9 (1992)

The Origin of the Far-Ultraviolet Continuum in Solar and Stellar Flares. *K. J. H. Phillips, G. E. Bromage, & J. G. Doyle.* 385, 731, 22-B11 (1992)

Cylindrically Symmetric Force-free Magnetic Fields. *Lisa J. Porter, James A. Klimchuk, & Peter A. Sturrock.* 385, 738, 22-C6 (1992)

Transitions from Metastable Levels Emitted during Short-Duration Bursts: How Valid Are Their Calculated Intensities? *Uri Feldman.* 385, 758, 22-E1 (1992)

A Burst Model for Line Emission in the Solar Atmosphere. I. XUV Lines of He I and He II in Impulsive Flares. *J. M. Laming & U. Feldman.* 386, 364, 28-F8 (1992)

Mg IX Line Ratios in the Sun. *F. P. Keenan, E. S. Conlon, L. K. Harra, & K. G. Widing.* 386, 371, 28-G1 (1992)

X-Ray–heated Models of Stellar Flare Atmospheres: Theory and Comparison with Observations. *Suzanne L. Hawley & George H. Fisher.* 78, 565, 10-F1 (1992)

Energy Propagation into a Flare Kernel during a Solar Flare. *D. B. Melrose.* 387, 403, 42-A1 (1992)

The Solar Flare Event on 1990 May 24: Evidence for Two Separate Particle Accelerations. *H. Debrunner, J. A. Lockwood, & J. M. Ryan.* 387, L51, 43-F7 (1992)

Energy Spectra of Ions from Impulsive Solar Flares. *D. V. Reames, I. G. Richardson, & K.-P. Wenzel.* 387, 715, 47-E11 (1992)

The 77 Day Periodicity in the Flare Rate of Cycle 22. *T. Bai.* 388, L69, 59-D3 (1992)

Taylor Relaxation of a Gold-Hoyle Flux Tube. *G. J. Rickard.* 389, 413, 65-A10 (1992)

Ne V Line Ratios in the EUV Spectra of Solar Flares. *F. P. Keenan, E. S. Conlon, L. K. Harra, K. M. Aggarwal, & K. G. Widing.* 389, 440, 65-D1 (1992)

What Caused an Unusually Broad He I 10830 Å Emission Line in a Solar Limb Flare? *J. Q. You & G. K. Oertel.* 389, L33, 66-E1 (1992)

High-Energy Gamma-Ray Emission from Pion Decay in a Solar Flare Magnetic Loop. *Natalie Mandzhavidze & Reuven Ramaty.* 389, 739, 70-E6 (1992)

Characteristics of Hard X-Ray Spectra of Impulsive Solar Flares. *G. A. Dulk, A. L. Kiplinger, & R. M. Winglee.* 389, 756, 70-F11 (1992)

Variations in the Relative Elemental Abundances of Oxygen, Neon, Magnesium, and Iron in High-Temperature Solar Active-Region and Flare Plasmas. *D. L. McKenzie & U. Feldman.* 389, 764, 70-G7 (1992)

Magnetic Reconnection in Incompressible Fluids. *Edward E. DeLuca & Ian J. D. Craig.* 390, 679, 83-F7 (1992)

Stereoscopic Observations of a Solar Flare Hard X-Ray Source in the High Corona. *S. R. Kane, J. McTiernan, J. Loran, E. E. Fenimore, R. W. Klebesadel, & J. G. Laros.* 390, 687, 83-G7 (1992)

Composition and Azimuthal Spread of Solar Energetic Particles from Impulsive and Gradual Flares. *M.-B. Kallenrode, E. W. Cliver, & G. Wibberenz.* 391, 370, 90-D12 (1992)

The Sun as a Star: High Spectral Resolution Solar Data Degraded to Low-Dispersion *IUE* Resolution. *J. G. Doyle & J. W. Cook.* 391, 393, 90-G1 (1992)

A Thermal/Nonthermal Model for Solar Microwave Bursts. *Stephen G. Benka & Gordon D. Holman.* 391, 854, 98-E7 (1992)

Impulsive Phase Fe Kα Emission in a Flare of 1989 March. *D. M. Zarro, B. R. Dennis, & G. L. Slater.* 391, 865, 98-F6 (1992)

The Production of ^{3}He and Heavy Ion Enrichments in ^{3}He-rich Flares by Electromagnetic Hydrogen Cyclotron Waves. *M. Temerin & I. Roth.* 391, L105, 100-B1 (1992)

Stochastic Gyroresonant Electron Acceleration in a Low-Beta Plasma. I. Interaction with Parallel Transverse Cold Plasma Waves. *Jürgen Steinacker & James A. Miller.* 393, 764, 125-C10 (1992)

X-Ray Emission-Line Ratios in Mg XI as Electron Temperature Diagnostics for Solar Flares and Active Regions. *F. P. Keenan, K. J. H. Phillips, L. K. Harra, E. S. Conlon, & A. E. Kingston.* 393, 815, 126-A9 (1992)

Propagation Conditions of Relativistic Electrons in the Inner Heliosphere. *M.-B. Kallenrode, G. Wibberenz, & S. Hucke.* 394, 351, 132-C11 (1992)

Microwave Transition Radiation in Solar Flares and in Astrophysics. *G. D. Fleishman & S. W. Kahler.* 394, 688, 138-A11 (1992)

Observation of Upflows during Soft X-Ray Solar Flares. *J. F. Seely & Uri Feldman.* 394, 697, 138-B9 (1992)

The Thermal and Plasma-physical Evolution of Laminar Current Sheets Formed in the Solar Atmosphere by Emerging Flux. *T. N. LaRosa.* 396, 289, 158-F3 (1992)

Gamma Rays from Pion Decay: Evidence for Long-Term Trappings of Particles in Solar Flares. *Natalie Mandzhavidze & Reuven Ramaty.* 396, L111, 167-F7 (1992)

The Role of Chromospheric Condensations in the Continuum Emission of White-Light Flares. *W. Q. Gan, E. Rieger, H. Q. Zhang, & C. Fang.* 397, 694, 179-F8 (1992)

Stochastic Acceleration of Electrons. I. Effects of Collisions in Solar Flares. *Russell J. Hamilton & Vahé Petrosian.* 398, 350, 186-B5 (1992)

Stochastic Gyroresonant Electron Acceleration in a Low-Beta Plasma. II. Implications of Thermal Effects in a Solar Flare Plasma. *James A. Miller & Jürgen Steinacker.* 399, 284, 198-F12 (1992)

Diagnostics of Electron-heated Solar Flare Models. III. Effects of Tapered Loop Geometry and Preheating. *A. Gordon Emslie, Peng Li, & John T. Mariska.* 399, 714, 206-G7 (1992)

Band Splitting in Solar Type II Radio Bursts. *R. A. Treumann & J. LaBelle.* 399, L167, 208-E7 (1992)

Observation of Solar Neutrons Associated with the Large Flare on 1991 June 4. *Y. Muraki, K. Murakami, M. Miyazaki, K. Mitsui, S. Shibata, S. Sakakibara, T. Sakai, T. Takahashi, T. Yamada, & K. Yamaguchi.* 400, L75, 220-F1 (1992)

A Hybrid Thermal/Nonthermal Model for the Energetic Emissions from Solar Flares. *Gordon D. Holman & Stephen G. Benka.* 400, L79, 220-F8 (1992)

The Energy Spectra of Solar Flare Hydrogen, Helium, Oxygen, and Iron: Evidence for Stochastic Acceleration. *J. E. Mazur, G. M. Mason, B. Klecker, & R. E. McGuire.* 401, 398, 226-A5 (1992)

Extreme Ultraviolet Line Ratios for Ca XV Applicable to Solar Flare Spectra. *F. P. Keenan, E. S. Conlon, V. J. Foster, K. M. Aggarwal, & K. G. Widing.* 401, 411, 226-B5 (1992)

The Coevolution of Decimetric Millisecond Spikes and Hard X-Ray Emission during Solar Flares. *Markus J. Aschwanden & Manuel Güdel.* 401, 736, 231-F1 (1992)

Coordinated Spectral and Temporal Hα Observations of a Solar Flare. *J.-F. de La Beaujardière, Alan L. Kiplinger, & Richard C. Canfield.* 401, 761, 232-A5 (1992)

On the Absolute Abundance of Calcium in Solar Flares. *Alphonse C. Sterling, George A. Doschek, & Uri Feldman.* 404, 394, 32-F7 (1993)

A Burst Model for Line Emission in the Solar Atmosphere. III. A Reassessment of the Assumptions of Constant Pressure and Steady State Coronal Equilibrium in the Solar Transition Region. *U. Feldman & J. M. Laming.* 404, 799, 38-G9 (1993)

Variability of the Occurrence Frequency of Solar Flares as a Function of Peak Hard X-Ray Rate. *T. Bai.* 404, 805, 39-A1 (1993)

The Abundances of Hydrogen, Helium, Oxygen, and Iron Accelerated in Large Solar Particle Events. *J. E. Mazur, G. M. Mason, B. Klecker, & R. E. McGuire.* 404, 810, 39-A8 (1993)

Identification of the Fe XV $3s3p\ ^1P–3p^2\ ^1S$ Line in Solar Flare Spectra and Its Use as an Electron Density Diagnostic. *F. P. Keenan, P. L. Dufton, E. S. Conlon, V. J. Foster, A. E. Kingston, & K. G. Widing.* 405, 798, 53-A7 (1993)

Coronal Proton Acceleration by Magnetohydrodynamic Waves and Related Proton Transport. *D. F. Smith & S. H. Brecht.* 406, 298, 58-F10 (1993)

The Solar White-Light Flare of 1989 March 7: Simultaneous Multiwavelength Observations at High Time Resolution. *Donald F. Neidig, Alan L. Kiplinger, Howard S. Cohl, & Philip H. Wiborg.* 406, 306, 58-G6 (1993)

Theoretical Emission-Line Strengths for Fe XXIII and a Comparison with Solar Observational Data. *F. P. Keenan, E. S. Conlon, G. A. Warren, A. W. Boone, & P. H. Norrington.* 406, 350, 59-D1 (1993)

Flux Emergence and Umbra Formation after the X-9 Flare of 1991 March 22. *Haimin Wang & Frances Tang.* 407, L89, 82-F6 (1993)

Elemental Abundances of Flaring Solar Plasma: Enhanced Neon and Sulfur. *J. T. Schmelz.* 408, 373, 87-G5 (1993)

Lower Hybrid Resonance Acceleration of Electrons and Ions in Solar Flares and the Associated Microwave Emission. *K. G. McClements, R. Bingham, J. J. Su, J. M. Dawson, & D. S. Spicer.* 409, 465, 102-F9 (1993)

Evidence for a Fundamental Period of the Sun and Its Relation to the 154 Day Complex of Periodicities. *T. Bai & P. A. Sturrock.* 409, 476, 102-G8 (1993)

Magnetic Field Power Density Spectra during "Scatter-free" Solar Particle Events. *L. C. Tan & G. M. Mason.* 409, L29, 104-E1 (1993)

Solar Neutron and Proton Production during the 1990 May 24 Cosmic-Ray Flare Increases. *H. Debrunner, J. A. Lockwood, & J. M. Ryan.* 409, 822, 109-D1 (1993)

Evidence for a Spatially Extended Component of Gamma Rays from Solar Flares. *W. Thomas Vestrand & David J. Forrest.* 409, L69, 111-F8 (1993)

The Morphology of Flare Phenomena, Magnetic Fields, and Electric Currents in Active Regions. I. Introduction and Methods. *Richard C. Canfield, J.-F. de La Beaujardière, Yuhong Fan, K. D. Leka, A. N. McClymont, Thomas R. Metcalf, Donald L. Mickey, Jean-Pierre Wülser, & Bruce W. Lites.* 411, 362, 131-G1 (1993)

The Morphology of Flare Phenomena, Magnetic Fields, and Electric Currents in Active Regions. II. NOAA Active Region 5747 (1989 October). *K. D. Leka, Richard C. Canfield, A. N. McClymont, J.-F. de La Beaujardière, Yuhong Fan, & F. Tang.* 411, 370, 131-G12 (1993)

The Morphology of Flare Phenomena, Magnetic Fields, and Electric Currents in Active Regions. III. NOAA Active Region 6233 (1990 August). *J.-F. de La Beaujardière, Richard C. Canfield, & K. D. Leka.* 411, 378, 132-A10 (1993)

Ion Acceleration and Abundance Enhancements by Electron Beam Instabilities in Impulsive Solar Flares. *James A. Miller & Adolfo F. Viñas.* 412, 386, 146-G12 (1993)

The Distribution of Flare Parameters and Implications for Coronal Heating. *Theodore T. Lee, Vahé Petrosian, & James M. McTiernan.* 412, 401, 147-B1 (1993)

Solar Flares and Avalanches in Driven Dissipative Systems. *Edward T. Lu, Russell J. Hamilton, J. M. McTiernan, & Kenneth R. Bromund.* 412, 841, 154-C9 (1993)

Multiple Wavelength Observations of an Off-Limb Eruptive Solar Flare. *T. A. Kucera, G. A. Dulk, A. L. Kiplinger, R. M. Winglee, T. S. Bastian, & M. Graeter.* 412, 853, 154-D10 (1993)

Simulations of the Ca XIX Spectral Emission from a Flaring Solar Coronal Loop. II. Impulsive Heating by Accelerated Electrons. *E. Antonucci, M. A. Dodero, R. Martin, G. Peres, F. Reale, & S. Serio.* 413, 786, 166-B11 (1993)

VLA-BATSE Observations of an Intense Solar Decimetric and Hard X-Ray Burst. *Robert F. Willson.* 413, 798, 166-C11 (1993)

S XI Line Ratios in the Sun. *F. P. Keenan, V. J. Foster, E. S. Conlon, K. M. Aggarwal, & K. G. Widing.* 413, 826, 166-F3 (1993)

Anomalous Resistivity and the Evolution of Magnetic Field Topology. *E. N. Parker.* 414, 389, 174-G5 (1993)

Long-Term Containment of Energetic Particles in Coronal Loops. *Yun-Tung Lau, Theodore G. Northrop, & John M. Finn.* 414, 908, 182-E10 (1993)

The White-Light Flare of 1982 June 15: A Midchromospheric Kernel. *Pablo J. D. Mauas.* 414, 928, 182-G10 (1993)

Ion Acceleration in Impulsive Solar Flares. *Jürgen Steinacker, Uwe Jaekel, & Reinhard Schlickeiser.* 415, 342, 189-C1 (1993)

A Linear Solution for Magnetic Reconnection Driven by Converging or Diverging Footpoint Motions. *George Roumeliotis & Ronald L. Moore.* 416, 386, 205-G7 (1993)

The 1992 January 5 Flare at 13.3 UT: Observations from *Yohkoh*. *G. A. Doschek, K. T. Strong, R. D. Bentley, C. M. Brown, J. L. Culhane, A. Fludra, E. Hiei, J. Lang, J. T. Mariska, K. J. H. Phillips, C. D. Pike, A. C. Sterling, T. Watanabe, L. W. Acton, M. E. Bruner, T. Hirayama, S. Tsuneta, E. Rolli, T. Kosugi, M. Yoshimori, H. S. Hudson, T. R. Metcalf, J.-P. Wuelser, Y. Uchida, & Y. Ogawara.* 416, 845, 214-A1 (1993)

Quasi-periodic Particle Injection into Coronal Loops. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Victor Gaizauskas.* 416, 857, 214-B5 (1993)

Semiempirical Flare Models with Chromospheric Condensation. *W. Q. Gan, E. Rieger, & C. Fang.* 416, 886, 214-D10 (1993)

Temperature and Density Structure of the 1991 November 2 Flare Observed by the *YOHKOH* Soft X-Ray Telescope and Hard X-Ray Telescope. *James M. McTiernan, Sharad R. Kane, Jon M. Loran, James R. Lemen, Loren W. Acton, Hirohisa Hara, Saku Tsuneta, & Takeo Kosugi.* 416, L91, 216-F6 (1993)

Implications of the Soft X-Ray versus Hard X-Ray Temporal Relationship in Solar Flares. *Peng Li, A. Gordon Emslie, & John T. Mariska.* 417, 313, 221-D6 (1993)

Catastrophic Evolution of a Force-free Flux Rope: A Model for Eruptive Flares. *P. A. Isenberg, T. G. Forbes, & P. Démoulin.* 417, 368, 222-B7 (1993)

Two Accelerated Electron Populations in the 1980 June 27 Solar Flare. *R. P. Lin & Christopher M. Johns.* 417, L53, 223-E1 (1993)

The Timing of Electron Beam Signatures in Hard X-Ray and Radio: Solar Flare Observations by BATSE/*Compton Gamma-Ray Observatory* and PHOENIX. *Markus J. Aschwanden, Arnold O. Benz, & Richard A. Schwartz.* 417, 790, 229-C3 (1993)

Particle Acceleration and Flare Triggering in Large-Scale Magnetic Loops Joining Widely Spaced Active Regions. *Robert F. Willson, Kenneth R. Lang, & Dale E. Gary.* 418, 490, 237-B1 (1993)

Coronal Heating by Nanoflares: Individual Events and Global Energetics. *R. A. Kopp & G. Poletto.* 418, 496, 237-B10 (1993)

Coronal Abundances of Neon and Magnesium Isotopes from Solar Energetic Particles. *R. S. Selesnick, A. C. Cummings, J. R. Cummings, R. A. Leske, R. A. Mewaldt, E. C. Stone, & T. T. von Rosenvinge.* 418, L45, 238-F1 (1993)

A Mechanism for Bulk Energization in the Impulsive Phase of Solar Flares: MHD Turbulent Cascade. *T. N. LaRosa & R. L. Moore.* 418, 912, 244-A2 (1993)

Flare Plasma Dynamics Observed with the *Yohkoh* Bragg Crystal Spectrometer. I. Properties of the Ca XIX Resonance Line. *John T. Mariska, G. A. Doschek, & R. D. Bentley.* 419, 418, 251-D7 (1993)

Helium-like Argon Line Emission in Solar Flares. *K. J. H. Phillips, L. K. Harra, F. P. Keenan, D. M. Zarro, & M. Wilson.* 419, 426, 251-E3 (1993)

Temperature and Hard X-Ray Signatures for Energetic Proton Events. *Howard A. Garcia.* 420, 422, 6-B3 (1994)

A Flare Caused by Interacting Coronal Loops. *Yoichiro Hanaoka.* 420, L37, 7-E9 (1994)

Searching for Hard X-Ray Directivity during the Rise, Peak, and Decay Phases of Solar Flares. *Peng Li.* 421, 381, 20-F7 (1994)

The Correlation of Solar Flare Hard X-Ray Bursts with Doppler Blueshifted Soft X-Ray Flare Emission. *R. D. Bentley, G. A. Doschek, G. M. Simnett, M. L. Rilee, J. T. Mariska, J. L. Culhane, T. Kosugi, & T. Watanabe.* 421, L55, 22-B13 (1994)

Very Impulsive Solar Flares Observed with the *Yohkoh* Spacecraft. *U. Feldman, E. Hiei, K. J. H. Phillips, C. M. Brown, & J. Lang.* 421, 843, 28-F7 (1994)

Ne VI Line Ratios in the Sun. *F. P. Keenan, E. S. Conlon, G. A. Warren, A. K. Pradhan, H. L. Zhang, D. H. Sampson, & K. G. Widing.* 421, 851, 28-G8 (1994)

Some Implications of the Nanoflare Concept. *Peter J. Cargill.* 422, 381, 34-G2 (1994)

A Comparison of Nonrelativistic Electron Escape Efficiencies for Solar Flares with and without Coronal Mass Ejections. *S. W. Kahler, E. I. Daibog, V. G. Kurt, & V. G. Stolpovskii.* 422, 394, 35-A1 (1994)

Impulsive Behavior in Solar Soft X-Radiation. *H. S. Hudson, K. T. Strong, B. R. Dennis, D. Zarro, M. Inda, T. Kosugi, & T. Sakao.* 422, L25, 36-D13 (1994)

Morphology of Active Region Transient Brightenings with the *Yohkoh* Soft X-Ray Telescope. *Toshifumi Shimizu, Saku Tsuneta, Loren W. Acton, James R. Lemen, Yoshiaki Ogawara, & Yutaka Uchida.* 422, 906, 43-B13 (1994)

Strong Double Layers, Existence Criteria, and Annihilation: An Application to Solar Flares. *Martin Volwerk & Jan Kuijpers.* 90, 589, 11-B2 (1994)

Millimeter, Microwave, Hard X-Ray, and Soft X-Ray Observations of Energetic Electron Populations in Solar Flares. *M. R. Kundu, S. M. White, N. Gopalswamy, & J. Lim.* 90, 599, 11-C1 (1994)

Solar Hard X-Ray and Gamma-Ray Observations from *Granat. N. Vilmer.* 90, 611, 11-D1 (1994)

Turbulent Acceleration in Solar Flares. *D. B. Melrose.* 90, 623, 11-E1 (1994)

Pulsed Acceleration in Solar Flares. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Mukul R. Kundu.* 90, 631, 11-E11 (1994)

Gamma-Ray Spectral Observations with *Yohkoh. M. Yoshimori, K. Suga, K. Morimoto, T. Hiraoka, J. Sato, K. Kawabata, & K. Ohki.* 90, 639, 11-F7 (1994)

Gamma-Ray Precursors of Solar Flares. *E. Rieger.* 90, 645, 11-G1 (1994)

Energetic-Particle Abundances in Impulsive Solar Flare Events. *D. V. Reames, J. P. Meyer, & T. T. von Rosenvinge.* 90, 649, 11-G7 (1994)

Microwave Burst Timescales and Solar Flare Acceleration Processes. *A. Krüger, B. Kliem, J. Hildebrandt, & V. V. Zaitsev.* 90, 683, 12-C3 (1994)

Positron Annihilation Radiation from the 1991 November 15 Flare. *K. Kawabata, M. Yoshimori, K. Suga, K. Morimoto, T. Hiraoka, J. Sato, & K. Ohki.* 90, 701, 12-D13 (1994)

The Flare of 1989 September 9 09:09 UT: Does Coronal Loop Collision Initiate Efficient Gamma-Ray Emission? *H. Aurass, A. Hofmann, & E. Rieger.* 90, 707, 12-E6 (1994)

Efficiency for Electron Acceleration in Solar Energy Release Region as Estimated in the Context of Plasma Mechanism of Radio Emission. *B. N. Levin, V. M. Fridman, & O. A. Sheiner.* 90, 713, 12-E13 (1994)

Particle Orbits, Trapping, and Acceleration in a Filamentary Current Sheet Model. *Bernhard Kliem.* 90, 719, 12-F6 (1994)

Electron-Beam Evolution in Partially Ionized Hydrogenic Plasma with Return Currents. *D. V. Syniavskii & V. V. Zharkova.* 90, 729, 12-G4 (1994)

A Necessary Condition for the Stability of a Class of Three-dimensional Laminated Equilibria. *A. W. Longbottom, J. P. Melville, & A. W. Hood.* 423, 496, 52-C11 (1994)

Evolution of Vector Magnetic Field and White-Light Flares in a Solar Active Region (NOAA 6659) in 1991 June. *Hongqi Zhang, Guoxiang Ai, Xu Yan, Wei Li, & Yang Liu.* 423, 828, 59-A5 (1994)

A Numerical Study of the Sudden Eruption of Sheared Magnetic Fields. *George Roumeliotis, Peter A. Sturrock, & Spiro K. Antiochos.* 423, 847, 59-D1 (1994)

Vector Magnetic Field Changes Associated with X-Class Flares. *Haimin Wang, M. W. Ewell, Jr., H. Zirin, & Guoxiang Ai.* 424, 436, 67-C6 (1994)

The Morphology of the 10^7 K Plasma in Solar Flares. I. Nonimpulsive Flares. *U. Feldman, J. F. Seely, G. A. Doschek, K. T. Strong, L. W. Acton, Y. Uchida, & S. Tsuneta.* 424, 444, 67-D1 (1994)

Multispectral Observations of Chromospheric Evaporation in the 1991 November 15 X-Class Solar Flare. *Jean-Pierre Wülser, Richard C. Canfield, Loren W. Acton, J. Leonard Culhane, Andrew Phillips, Andrzej Fludra, Taro Sakao, Satoshi Masuda, Takeo Kosugi, & Saku Tsuneta.* 424, 459, 67-E4 (1994)

Time Evolution of a Miniflare as Seen in Hα, UV Lines, and X-Rays. *J. Fontenla, B. Schmieder, G. M. Simnett, & E. Tandberg-Hanssen.* 424, 1022, 77-E3 (1994)

Focused Interplanetary Transport of ∼ 1MeV Solar Energetic Protons through Self-generated Alfvén Waves. *C. K. Ng & D. V. Reames.* 424, 1032, 77-F7 (1994)

Nonthermal Radio Emission Associated with a Coronal Disconnection Event. *N. Gopalswamy, M. R. Kundu, & O. C. St. Cyr.* 424, L135, 79-F3 (1994)

A New Path for the Electron Bulk Energization in Solar Flares: Fermi Acceleration by Magnetohydrodynamic Turbulence in Reconnection Outflows. *T. N. LaRosa, R. L. Moore, & S. N. Shore.* 425, 856, 92-D8 (1994)

The Allowed Lines of O IV near 1340 Å in High Electron Density Solar Flares. *J. W. Cook, F. P. Keenan, & A. K. Bhatia.* 425, 861, 92-E1 (1994)

Evidence for Intense Coronal Prompt Gamma-Ray Line Emission from a Solar Flare. *C. Barat, G. Trottet, N. Vilmer, J.-P. Dezalay, R. Talon, R. Sunyaev, O. Terekhov, & A. Kuznetsov.* 425, L109, 94-G10 (1994)

Solar Flare Model Atmospheres. *Suzanne L. Hawley & George H. Fisher.* 426, 387, 101-A9 (1994)

Electron Collisional Excitation Strengths for Fe XVI. *S. S. Tayal.* 426, 449, 101-G3 (1994)

Si XIII Emission Lines in Solar Flare X-Ray Spectra Obtained with the *P78-1* Satellite. *F. P. Keenan, D. L. McKenzie, K. J. H. Phillips, & E. S. Conlon.* 426, 454, 101-G10 (1994)

Directivity of 100–500 keV Solar Flare Hard X-Ray Emission. *P. Li, K. Hurley, C. Barat, M. Niel, R. Talon, & V. Kurt.* 426, 758, 107-G10 (1994)

Are Solar Gamma-Ray–Line Flares Different from Other Large Flares? *E. W. Cliver, N. B. Crosby, & B. R. Dennis.* 426, 767, 108-A8 (1994)

Particle Acceleration in an Evolving Active Region by an Ensemble of Shock Waves. *Anastasios Anastasiadis & Loukas Vlahos.* 428, 819, 140-D11 (1994)

Evidence of Additional Production of High-Energy Neutrons during the Solar Flare on 1991 June 4. *A. Struminsky, M. Matsuoka, & K. Takahashi.* 429, 400, 149-A13 (1994)

Optical Spectra and Semi-Empirical Model of a White-Light Flare. *M. D. Ding, C. Fang, W. Q. Gan, & T. Okamoto.* 429, 890, 156-F9 (1994)

Coronal Electron Density Diagnostic from Fe XII. *J. W. Cook, F. P. Keenan, L. K. Harra, & S. S. Tayal.* 429, 924, 157-B9 (1994)

Imaging Spectroscopy of Solar Microwave Radiation. I. Flaring Emission. *Jeremy Lim, Dale E. Gary, Gordon J. Hurford, & James R. Lemen.* 430, 425, 164-E13 (1994)

Atmospheric Heating in Solar Flares by Chromospheric Condensation. *W. Q. Gan & P. J. D. Mauas.* 430, 891, 173-A11 (1994)

Disruption of Coronal Magnetic Field Arcades. *Zoran Mikić & Jon A. Linker.* 430, 898, 173-B6 (1994)

Coherent-Phase or Random-Phase Acceleration of Electron Beams in Solar Flares. *Markus J. Aschwanden, Arnold O. Benz, & Maria L. Montello.* 431, 432, 181-D7 (1994)

A Gigantic Coronal Jet Ejected from a Compact Active Region in a Coronal Hole. *K. Shibata, N. Nitta, K. T. Strong, R. Matsumoto, T. Yokoyama, T. Hirayama, H. Hudson, & Y. Ogawara.* 431, L51, 183-A9 (1994)

The 1991 November 9 Flare at 03.2 UT: Observations from *Yohkoh. G. A. Doschek, J. T. Mariska, K. T. Strong, R. D. Bentley, C. M. Brown, J. L. Culhane, J. Lang, A. C. Sterling, & T. Watanabe.* 431, 888, 189-F10 (1994)

Fe XVI Line Ratios in the Sun. *F. P. Keenan, E. S. Conlon, V. J. Foster, S. S. Tayal, & K. G. Widing.* 432, 809, 206-B1 (1994)

Three-dimensional Simulation Study of the Magnetohydrodynamic Relaxation Process in the Solar Corona. I. Spontaneous Generation of the Taylor-Heyvaerts-Priest State. *K. Kusano, Y. Suzuki, H. Kubo, T. Miyoshi, & K. Nishikawa.* 433, 361, 212-G3 (1994)

Microwave Spectral Imaging, Hα, and Hard X-Ray Observations of a Solar Limb Flare. *H. Wang, D. E. Gary, J. Lim, & R. A. Schwartz.* 433, 379, 213-A9 (1994)

A Multisource Limb Flare Observed at Multiple Radio Wavelengths. *T. A. Kucera, G. A. Dulk, D. E. Gary, & T. S. Bastian.* 433, 875, 222-A11 (1994)

Gamma-Ray Emission and Electron Accleration in Solar Flares. *Vahé Petrosian, James M. McTiernan, & Holger Marschhäuser.* 434, 747, 238-B2 (1994)

Flare Plasma Dynamics Observed with the *Yohkoh* Bragg Crystal Spectrometer. II. Properties of the Fe XXV, Ca XIX, and S XV Resonance Lines. *John T. Mariska.* 434, 756, 238-C1 (1994)

A Thermal/Nonthermal Model for Solar Hard X-Ray Bursts. *Stephen G. Benka & Gordon D. Holman.* 435, 469, 249-G11 (1994)

Iron Kβ Line Emission in Solar Flares Observed by *Yohkoh* and the Solar Abundance of Iron. *K. J. H. Phillips, C. D. Pike, J. Lang, T. Watanabe, & M. Takahashi.* 435, 888, 258-D3 (1994)

Fe XXV Temperatures in Flares from the *Yohkoh* Bragg Crystal Spectrometer. *Alphonse C. Sterling, George A. Doschek, & C. David Pike.* 435, 898, 258-E3 (1994)

Gamma-Ray and Millimeter-Wave Emissions from the 1991 June X-Class Solar Flares. *Reuven Ramaty, Richard A. Schwartz, Shinzo Enome, & Hiroshi Nakajima.* 436, 941, 278-E13 (1994)

What is the Condition for Fast Magnetic Reconnection? *T. Yokoyama & K. Shibata.* 436, L197, 282-E7 (1994)

Simultaneous Ultraviolet and X-Ray Observations of Solar Microflares. *J. G. Porter, J. M. Fontenla, & G. M. Simnett.* 438, 472, 8-B1 (1995)

Temperature Dependence of Nonthermal Motions in Solar Flare Plasmas Observed with the Flat Crystal Spectrometer on *SMM*. *Ester Antonucci & Maria Adele Dodero.* 438, 480, 8-C3 (1995)

The Wall of Reconnection-driven Magnetohydrodynamic Turbulence in a Large Solar Flare. *R. L. Moore, T. N. LaRosa, & L. E. Orwig.* 438, 985, 17-F6 (1995)

Chromospheric Evaporation and Decimetric Radio Emission in Solar Flares. *Markus J. Aschwanden & Arnold O. Benz.* 438, 997, 17-G7 (1995)

Cooling of Solar Flare Plasmas. I. Theoretical Considerations. *Peter J. Cargill, John T. Mariska, & Spiro K. Antiochos.* 439, 1034, 39-A3 (1995)

Nonequilibrium in Sheared Axisymmetric Force-free Magnetic Fields. *J. J. Aly.* 439, L63, 40-F13 (1995)

The Bright Knots at the Tops of Soft X-Ray Loops: Quantitative Results from *Yohkoh*. *G. A. Doschek, K. T. Strong, & S. Tsuneta.* 440, 370, 46-C7 (1995)

The 1991 October 24 Flare: A Challenge for Standard Models. *J.-F. de La Beaujardière, R. C. Canfield, H. S. Hudson, J.-P. Wülser, L. Acton, T. Kosugi, & S. Masuda.* 440, 386, 46-E3 (1995)

Sequences of Correlated Hard X-Ray and Type III Bursts during Solar Flares. *Markus J. Aschwanden, Maria L. Montello, Brian R. Dennis, & Arnold O. Benz.* 440, 394, 46-E14 (1995)

Testing the DC-Electric Field Model in a Solar Flare Observed by *Yohkoh* and the *Compton Gamma-Ray Observatory*. *D. M. Zarro, J. T. Mariska, & B. R. Dennis.* 440, 888, 55-D8 (1995)

The Magnetic Evolution of AR 6555 Which Led to Two Impulsive, Relatively Compact, X-Type Flares. *J. M. Fontenla, A. Ambastha, B. Kalman, & Gy. Csepura.* 440, 894, 55-E4 (1995)

Imaging Spectropolarimetry of the He I 1083 Nanometer Line in a Flaring Solar Active Region. *M. J. Penn & J. R. Kuhn.* 441, L51, 67-D1 (1995)

A Solar Flare Triggering Mechanism Based on the Woltjer-Taylor Minimum Energy Principle. *K. Kusano, Y. Suzuki, & K. Nishikawa.* 441, 942, 74-G9 (1995)

Abundance Ratios of Oxygen, Neon, and Magnesium in Solar Active Regions and Flares: The FIP Effect. *K. G. Widing & U. Feldman.* 442, 446, 83-B3 (1995)

The ^{3}He/^{4}He Ratios for Solar Energetic Particle Events during the *Combined Release and Radiation Effects Satellite* Mission. *Jiasheng Chen, T. Gregory Guzik, & John P. Wefel.* 442, 875, 92-C1 (1995)

Directivity and Its Energy Dependence in Solar Flare Energetic Emission. *Peng Li.* 443, 855, 109-F1 (1995)

Flare Plasma Dynamics Observed with the *Yohkoh* Bragg Crystal Spectrometer. III. Spectral Signatures of Electron-Beam–heated Atmospheres. *John T. Mariska.* 444, 478, 120-B12 (1995)

Metric Type III Bursts from a Flaring X-Ray Bright Point near an Active Region. *M. R. Kundu, J. P. Raulin, M. Pick, & K. T. Strong.* 444, 922, 129-B3 (1995)

PHOBOS-GOES Soft X-Ray Observations of the Sun. *F. Farnik & H. Garcia.* 444, 929, 129-B13 (1995)

The Mean Ionic Charge State of Solar Energetic Fe Ions above 200 MeV per Nucleon. *A. J. Tylka, P. R. Boberg, J. H. Adams, Jr., L. P. Beahm, W. F. Dietrich, & T. Kleis.* 444, L109, 131-B1 (1995)

The Microwave and Hα Sources of the 1992 January 13 Flare. *H. Wang, D. E. Gary, H. Zirin, T. Kosugi, R. A. Schwartz, & G. Linford.* 444, L115, 131-B9 (1995)

The Electrical Current Structure Associated with Solar Flare Electrons Accelerated by Large-Scale Electric Fields. *A. Gordon Emslie & Jean-Claude Hénoux.* 446, 371, 158-D1 (1995)

Photospheric Magnetic Field Evolution and Eruptive Flares. *T. G. Forbes & E. R. Priest.* 446, 377, 158-D10 (1995)

Alfvén Turbulence Dissipation in Proton Injection and Acceleration in Solar Flares. *Dean F. Smith & James A. Miller.* 446, 390, 158-E12 (1995)

Energy Release and Dissipation during Giant Solar Flares. *S. R. Kane, K. Hurley, J. M. McTiernan, M. Sommer, M. Boer, & M. Niel.* 446, L47, 161-A1 (1995)

Morphology and Physical Parameters for Two Long-Duration Solar Flares: Observations from *Yohkoh*. *U. Feldman, J. F. Seely, G. A. Doschek, C. M. Brown, K. J. H. Phillips, & J. Lang.* 446, 860, 168-A4 (1995)

The Statistical Physics of Solar Active Regions and the Fundamental Nature of Solar Flares. *Edward T. Lu.* 446, L109, 171-E3 (1995)

Constraints on Energy Storage and Release Models for Astrophysical Transients and Solar Flares. *Edward T. Lu.* 447, 416, 178-B8 (1995)

The Velocity Differential Emission Measure: Diagnostic of Bulk Plasma Motion in Solar Flares. *E. K. Newton, A. G. Emslie, & J. T. Mariska.* 447, 915, 188-E1 (1995)

Electron Time-of-Flight Differences in Solar Flares. *Markus J. Aschwanden, Richard A. Schwartz, & Daniel M. Alt.* 447, 923, 188-E12 (1995)

Absolute Abundances of Flaring Coronal Plasma Derived from *SMM* Spectral Observations. *A. Fludra & J. T. Schmelz.* 447, 936, 188-G1 (1995)

Detection of Nonthermal Radio Emission from Coronal X-Ray Jets. *M. R. Kundu, J. P. Raulin, N. Nitta, H. S. Hudson, M. Shimojo, K. Shibata, & A. Raoult.* 447, L135, 191-D7 (1995)

Heavy Ion Acceleration beyond 10 MeV per Nucleon in Impulsive Solar Flares. *J. E. Mazur, G. M. Mason, & B. Klecker.* 448, L53, 200-B11 (1995)

The Neupert Effect and the Chromospheric Evaporation Model for Solar Flares. *Theodore T. Lee, Vahé Petrosian, & James M. McTiernan.* 448, 915, 207-E7 (1995)

A Reconciliation of the Discrepancy on the Cosmic-Ray Interplanetary Diffusion Mean Free Path. *L. Dennis Zhang.* 449, 386, 215-D6 (1995)

Solar ^{3}He-rich Events and Ion Acceleration in Two Stages. *T. X. Zhang.* 449, 916, 225-D6 (1995)

Particle Simulation of a Collision between a Plasma Cloud and a Current Loop. *Jie Zhao, Jun-Ichi Sakai, & Ken-Ichi Nishikawa.* 449, L161, 227-G1 (1995)

Relationships between Temperature and Emission Measure in Solar Flares Determined from Highly Ionized Iron Spectra and from Broadband X-Ray Detectors. *U. Feldman, G. A. Doschek, J. T. Mariska, & C. M. Brown.* 450, 441, 234-B1 (1995)

Relationship between Cold and Hot Post–Solar Flare Loops and the Impact on the Reconnection Flare Model. *U. Feldman & J. F. Seely.* 450, 902, 243-D3 (1995)

Current Paths in the Corona and Energy Release in Solar Flares. *D. B. Melrose.* 451, 391, 251-C6 (1995)

Differential Emission Measure and Iron-to-Calcium Abundance in Solar Flare Plasmas. *Ester Antonucci & Renato Martin.* 451, 402, 251-D6 (1995)

Triggered Magnetic Energy Release in Solar Flares. *Y. Q. Hu, X. Li, & G. X. Ai.* 451, 843, 258-G4 (1995)

Hot-Plasma Ejections Associated with Compact-Loop Solar Flares. *K. Shibata, S. Masuda, M. Shimojo, H. Hara, T. Yokoyama, S. Tsuneta, T. Kosugi, & Y. Ogawara.* 451, L83, 261-B2 (1995)

Interpretation of ^{26}Al in Meteoritic Inclusions. *Donald D. Clayton & Liping Jin.* 451, L87, 261-B12 (1995)

On Thermal Hydrodynamical Models of Solar Flares with a High Initial Coronal Density. *W. Q. Gan, C. C. Cheng, & C. Fang.* 452, 445, 268-B11 (1995)

DC Electric Field Acceleration of Ions in Solar Flares. *Gordon D. Holman.* 452, 451, 268-C6 (1995)

Charge State Measurements of Solar Energetic Particles Observed with *SAMPEX*. *G. M. Mason, J. E. Mazur, M. D. Looper, & R. A. Mewaldt.* 452, 901, 277-B7 (1995)

Stochastic Proton Acceleration by Cascading Alfvén Waves in Impulsive Solar Flares. *James A. Miller & D. Aaron Roberts.* 452, 912, 277-C7 (1995)

Gamma-Ray Measurements of Flare-to-Flare Variations in Ambient Solar Abundances. *Gerald H. Share & Ronald J. Murphy.* 452, 933, 277-E4 (1995)

A Novel Maximum-Likelihood Method for Image Reconstruction with Increased Sampling. *George Roumeliotis.* 452, 944, 277-F5 (1995)

Measurements of the Ionic Charge States of Solar Energetic Particles Using the Geomagnetic Field. *R. A. Leske, J. R. Cummings, R. A. Mewaldt, E. C. Stone, & T. T. von Rosenvinge.* 452, L149, 280-F6 (1995)

Yohkho Soft X-Ray Spectroscopic Observations of the Bright Loop-Top Kernels of Solar Flares. *Josef I. Khan, Louise K. Harra-Murnion, Hugh S. Hudson, James R. Lemen, & Alphonse C. Sterling.* 452, L153, 280-F13 (1995)

Coordinated OVRO, BATSE, *Yohkoh*, and BBSO Observations of the 1992 June 25 M1.4 Flare. *H. Wang, D. E. Gary, H. Zirin, R. A. Schwartz, T. Sakao, T. Kosugi, & K. Shibata.* 453, 505, 288-A9 (1995)

Extreme Ultraviolet Emission Lines of Fe XIII in Solar and Stellar Spectra. *F. P. Keenan, V. J. Foster, J. J. Drake, S. S. Tayal, & K. G. Widing.* 453, 906, 296-D9 (1995)

Comparative Studies of Hard X-Ray Spectral Evolution in Solar Flares with High-Energy Proton Events Observed at Earth. *Alan L. Kiplinger.* 453, 973, 297-D4 (1995)

Quadrupolar Force-free Magnetic Fields with Singular Current Density Surfaces. *Y. Q. Hu.* 454, 480, 305-G12 (1995)

Microwave and Hard X-Ray Observations of Footpoint Emission from Solar Flares. *M. R. Kundu, N. Nitta, S. M. White, K. Shibasaki, S. Enome, T. Sakao, T. Kosugi, & T. Sakurai.* 454, 522, 306-D11 (1995)

Solar Electron Beams Detected in Hard X-Rays and Radio Waves. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Richard A. Schwartz.* 455, 347, 322-G12 (1995)

Accuracy, Uncertainties, and Delay Distribution of Electron Time-of-Flight Measurements in Solar Flares. *Markus J. Aschwanden & Richard A. Schwartz.* 455, 699, 331-E6 (1995)

VLA and *Yohkoh* Observations of an M1.5 Flare. *N. Gopalswamy, J.-P. Raulin, M. R. Kundu, N. Nitta, J. R. Lemen, R. Herrmann, D. Zarro, & T. Kosugi.* 455, 715, 331-G1 (1995)

Statistical Studies of *ISEE 3/ICE* Observations of Impulsive Hard X-Ray Solar Flares. *Kenneth R. Bromund, James M. McTiernan, & Sharad R. Kane.* 455, 733, 332-A8 (1995)

Solar Atmopheric Abundances and Energy Content in Flare Accelerated Ions from Gamma-Ray Spectroscopy. *Reuven Ramaty, Natalie Mandzhavidze, Benzion Kozlovsky, & Ronald J. Murphy.* 455, L193, 335-A4 (1995)

SUN: FUNDAMENTAL PARAMETERS

Time Correlation between Solar Structural Parameters: *p*-Mode Frequencies, Radius, and Neutrino Flux. *Ph. Delache, V. Gavryusev, E. Gavryuseva, F. Laclare, C. Régulo, & T. Roca Cortés.* 407, 801, 80-D8 (1993)

Evidence for a Fundamental Period of the Sun and Its Relation to the 154 Day Complex of Periodicities. *T. Bai & P. A. Sturrock.* 409, 476, 102-G8 (1993)

Accurate Measurement of the Geometry for a Full-Disk Solar Image and Estimation of the Observational Point Spread Function. *C. G. Toner & S. M. Jefferies.* 415, 852, 198-E11 (1993)

The Effect of Diffusion on Solar Evolution. *Attay Kovetz & Giora Shaviv.* 426, 787, 108-C7 (1994)

The Solar Diameter and Oblateness Measured by the Solar Disk Sextant on the 1992 September 30 Balloon Flight. *S. Sofia, W. Heaps, & L. W. Twigg.* 427, 1048, 125-F2 (1994)

Observations of Changes in the Bolometric Contrast of Sunspots. *G. A. Chapman, A. M. Cookson, & J. J. Dobias.* 432, 403, 198-B9 (1994)

Fe XXV Temperatures in Flares from the *Yohkoh* Bragg Crystal Spectrometer. *Alphonse C. Sterling, George A. Doschek, & C. David Pike.* 435, 898, 258-E3 (1994)

The Solar Corona as a Quadric Surface in Three-dimensional Space. *R. A. Gulyaev.* 437, 867, 297-E4 (1994)

The Sun as a Probe of Varying *G*. *P. Demarque, Lawrence M. Krauss, D. B Guenther, & Davíd Nydam.* 437, 870, 297-E10 (1994)

SUN: GENERAL

Nonfacular Solar Luminosity Variations. *J. R. Kuhn & K. G. Libbrecht.* 381, L35, 194-E1 (1991)

Do Changes in the Photospheric Magnetic Network Cause the 11 Year Variation of Total Solar Irradiance? *P. Foukal, K. Harvey, & F. Hill.* 383, L89, 226-G1 (1991)

Interior Opacities and the Standard Solar Model. *John Faulkner & Fritz J. Swenson.* 386, L55, 36-D1 (1992)

Large-Scale Flows and Solar Luminosity Variations. *S. Arendt.* 389, 421, 65-B6 (1992)

Preliminary Results of a Balloon Flight of the Solar Disk Sextant. *E. Maier, L. Twigg, & S. Sofia.* 389, 447, 65-D11 (1992)

A New Solar Irradiance Calibration from 3295 Å to 8500 Å Derived from Absolute Spectrophotometry of Vega. *G. W. Lockwood, H. Tüg, & N. M. White.* 390, 668, 83-E9 (1992)

Limb Observations of the 12.32 Micron Solar Emission Line during the 1991 July Total Eclipse. *Drake Deming, Donald E. Jennings, George McCabe, Robert Noyes, Gunter Wiedemann, & Fred Espenak.* 396, L53, 161-A6 (1992)

Radial Velocity Observations of the Sun at Night. *R. S. McMillan, T. L. Moore, M. L. Perry, & P. H. Smith.* 403, 801, 25-G8 (1993)

g-Modes and the Solar Neutrino Problem. *John N. Bahcall & Pawan Kumar.* 409, L73, 111-G1 (1993)

Our Sun. III. Present and Future. *I.-Juliana Sackmann, Arnold I. Boothroyd, & Kathleen E. Kraemer.* 418, 457, 236-F6 (1993)

The Rate of the Proton-Proton Reaction. *Marc Kamionkowski & John N. Bahcall.* 420, 884, 13-G11 (1994)

On the Apparent Velocity of Integrated Sunlight. II. 1983–1992 and Comparisons with Magnetograms. *Drake Deming & Claude Plymate.* 426, 382, 101-A2 (1994)

The Fe XIV Spectrum: Predicted Line Intensities and Solar Identifications. *A. K. Bhatia, S. O. Kastner, F. P. Keenan, E. S. Conlon, & K. G. Widing.* 427, 497, 116-B8 (1994)

The Displacement of the Sun from the Galactic Plane Using *IRAS* and FAUST Source Counts. *Martin Cohen.* 444, 874, 128-E2 (1995)

SUN: GRANULATION

Power Spectra of Solar Convection. *D.-Y. Chou, B. J. LaBonte, D. C. Braun, & T. L. Duvall, Jr.* 372, 314, 77-G5 (1991)

Modeling Mesogranules and Exploders on the Solar Surface. *G. W. Simon, A. M. Title, & N. O. Weiss.* 375, 775, 122-C7 (1991)

Multicolor Continuum Analysis of the Solar Granulation in Quiet and Active Regions. *C. U. Keller & S. Koutchmy.* 379, 751, 174-B1 (1991)

Dynamical Buoyancy of Hydrodynamic Eddies. *E. N. Parker.* 380, 251, 179-B5 (1991)

Compressible Magnetic Convection: Formulation and Two-dimensional Models. *Peter A. Fox, Michael L. Theobald, & Sabatino Sofia.* 383, 860, 225-A1 (1991)

On the Evidence for Mesogranules in Solar Power Spectra. *Gregory P. Ginet & George W. Simon.* 386, 359, 28-F1 (1992)

On the Differences between Plage and Quiet Sun in the Solar Photosphere. *Alan M. Title, Kenneth P. Topka, Theodore D. Tarbell, Wolfgang Schmidt, Christiaan Balke, & Göran Scharmer.* 393, 782, 125-E1 (1992)

Power Spectra of Median- and Small-Scale Solar Convection. *D.-Y. Chou, C.-S. Chen, K.-T. Ou, & C.-C. Wang.* 396, 333, 159-B11 (1992)

Evidence for Transonic Flows in the Solar Granulation. *A. Nesis, T. J. Bogdan, F. Cattaneo, A. Hanslmeier, M. Knölker, & A. Malagoli.* 399, L99, 201-D10 (1992)

Vortex Rings and the Solar Granulation. *Steve Arendt.* 422, 862, 42-E9 (1994)

A High-Resolution Study of the Structure of Sunspot Light Bridges and Abnormal Granulation. *Michal Sobotka, José A. Bonet, & Manuel Vázquez.* 426, 404, 101-C1 (1994)

Downflow Plumes and Entropy Balance in Deep Convection Zones. *Gregory P. Ginet.* 429, 899, 156-G7 (1994)

A Measurement of the Background Solar Velocity Spectrum. *P. L. Pallé, A. Jiménez, F. Pérez Hernández, C. Régulo, T. Roca Cortés, & L. Sánchez.* 441, 952, 75-A9 (1995)

Kinematic Models of Supergranular Diffusion on the Sun. *G. W. Simon, A. M. Title, & N. O. Weiss.* 442, 886, 92-D2 (1995)

Oscillation-Convection Coupling: Cause of Supergranulation? *Charles L. Wolff.* 443, 423, 100-G12 (1995)

On the Nature of "Exploding" Granules and Granule Fragmentation. *Mark Peter Rast.* 443, 863, 109-F12 (1995)

Dark Lanes in Granulation and the Excitation of Solar Oscillations. *Thomas R. Rimmele, Philip R. Goode, Elliotte Harold, & Robin T. Stebbins.* 444, L119, 131-C4 (1995)

Vorticity and Divergence in the Solar Photosphere. *Yi Wang, Robert W. Noyes, Theodore D. Tarbell, & Alan M. Title.* 447, 419, 178-C1 (1995)

High-Resolution Observation of Disk Spicules. I. Evolution and Kinematics of Spicules in the Enhanced Network. *Yoshinori Suematsu, Haimin Wang, & Harold Zirin.* 450, 411, 233-E12 (1995)

Seismology of the Solar *f*-Mode. I. Basic Signatures of Shearing Velocity Fields. *Pranab Ghosh, H. M. Antia, & S. M. Chitre.* 451, 851, 259-A1 (1995)

SUN: INFRARED

On the Apparent Velocity of Integrated Sunlight. II. 1983–1992 and Comparisons with Magnetograms. *Drake Deming & Claude Plymate.* 426, 382, 101-A2 (1994)

Analysis of the $3d^6 4s(^6D)4f$–$5g$ Supermultiplet of Fe I in Laboratory and Solar Infrared Spectra. *S. Johansson, G. Nave, M. Geller, A. J. Sauval, N. Grevesse, W. G. Schoenfeld, E. S. Chang, & C. B. Farmer.* 429, 419, 149-C11 (1994)

Ground-based Detection of an Infrared [Si X] Coronal Emission Line and Improved Wavelengths for the Infrared [Fe XIII] Emission Lines. *M. J. Penn & J. R. Kuhn.* 434, 807, 239-A10 (1994)

Imaging Spectropolarimetry of the He I 1083 Nanometer Line in a Flaring Solar Active Region. *M. J. Penn & J. R. Kuhn.* 441, L51, 67-D1 (1995)

On the Distribution of the Solar Magnetic Fields. *Haosheng Lin.* 446, 421, 159-A7 (1995)

The Sun in Submillimeter and Near-Millimeter Radiation. *C. Lindsey, G. Kopp, T. A. Clark, & G. Watt.* 453, 511, 288-B7 (1995)

SUN: INTERIOR

Nonlinear Behavior of Solar Gravity Modes Driven by ^{3}He in the Core. II. Numerical Simulations. *William J. Merryfield, Juri Toomre, & Douglas Gough.* 367, 658, 21-D8 (1991)

The Response of the Adiabatic Exponent Γ_1 to Modifications of Solar Models. *J. Christensen-Dalsgaard & M. J. Thompson.* 367, 666, 21-E4 (1991)

Window for the Dark Matter Solution to the Solar Neutrino Problem. *David Dearborn, Kim Griest, & Georg Raffelt.* 368, 626, 33-A1 (1991)

Opacities for the Solar Radiative Interior. *C. A. Iglesias & F. J. Rogers.* 371, 408, 65-C1 (1991)

The Stretching of Magnetic Flux Tubes in the Convective Overshoot Region. *George H. Fisher, Alexander N. McClymont, & Dean-Yi Chou.* 374, 766, 108-E10 (1991)

The *p*-Mode Oscillation Spectra of an Evolving 1 $M\odot$ Sun-like Star. *D. B. Guenther.* 375, 352, 115-C8 (1991)

Seismology for the Fine Structure in the Sun's Oscillations Varying with Its Activity Cycle. *W. A. Dziembowski & Philip R. Goode.* 376, 782, 136-B1 (1991)

Our Sun. II. Early Mass Loss of 0.1 $M_\odot$ and the Case of the Missing Lithium. *Arnold I. Boothroyd, I.-Juliana Sackmann, & William A. Fowler.* 377, 318, 141-G11 (1991)

Does the Solar Interior Rotate Rigidly? *Andrew Gould.* 377, 707, 148-D7 (1991)

Neutrino Oscillations and Solar Models. *C.-X. Chen & M. L. Cherry.* 377, L105, 150-F5 (1991)

A Critical Look at Cosmions. *Jean Kaplan, François Martin de Volnay, Charling Tao, & Sylvaine Turck-Chièze.* 378, 315, 154-G11 (1991)

Observational Constraints on Theories of the Solar Differential Rotation. *Bernard R. Durney.* 378, 378, 155-F1 (1991)

The Effect of the Mihalas, Hummer, and Däppen Equation of State and the Molecular Opacity on the Standard Solar Model. *Y.-C. Kim, P. Demarque, & D. B. Guenther.* 378, 407, 156-A10 (1991)

The Depth of the Solar Convection Zone. *J. Christensen-Dalsgaard, D. O. Gough, & M. J. Thompson.* 378, 413, 156-B4 (1991)

Application of the Continuous Orthonormalization and Adjoint Methods to the Computation of Solar Eigenfrequencies and Eigenfrequency Sensitivities. *R. D. Rosenwald & G. F. Rabaey.* 77, 97, 44-G1 (1991)

Gravitational Settling in Solar Models. *Charles R. Proffitt & Georges Michaud.* 380, 238, 179-A5 (1991)

Effects of Opacity and Equation of State on Solar Structure and Oscillations. *Joyce A. Guzik & Arthur N. Cox.* 381, 333, 193-B5 (1991)

Testing Einstein's Theory of Gravity by Analyzing Lunar Laser Ranging Data. *J. Müller, M. Schneider, M. Soffel, & H. Ruder.* 382, L101, 211-E12 (1991)

A New Solar Cycle Model Including Meridional Circulation. *Y.-M. Wang, N. R. Sheeley, Jr., & A. G. Nash.* 383, 431, 217-F1 (1991)

Compressible Magnetic Convection: Formulation and Two-dimensional Models. *Peter A. Fox, Michael L. Theobald, & Sabatino Sofia.* 383, 860, 225-A1 (1991)

Solar Models with Enhanced Energy Transport in the Core. *J. Christensen-Dalsgaard.* 385, 354, 16-C3 (1992)

Tests of the Detection and Mode Classifications of Low-Degree Solar Gravity Modes with 1978 Solar Diameter Observations. *Henry A. Hill.* 78, 283, 5-F1 (1992)

Equilibrium of a Magnetic Flux Tube in a Compressible Flow. *Richard Kerswell & Stephen Childress.* 385, 746, 22-D1 (1992)

The Resolving Power of Current Helioseismic Inversions for the Sun's Internal Rotation. *J. Schou, J. Christensen-Dalsgaard, & M. J. Thompson.* 385, L59, 23-E1 (1992)

On the Sensitivity of High-Degree *p*-Mode Frequencies to the Solar Convection Zone Helium Abundance. *Joyce A. Guzik & Arthur N. Cox.* 386, 729, 34-D1 (1992)

Interior Opacities and the Standard Solar Model. *John Faulkner & Fritz J. Swenson.* 386, L55, 36-D1 (1992)

Standard Solar Model. *D. B. Guenther, P. Demarque, Y.-C. Kim, & M. H. Pinsonneault.* 387, 372, 41-E9 (1992)

Localized Excitation of Solar Oscillations. *Philip R. Goode, Douglas Gough, & Alexander Kosovichev.* 387, 707, 47-E1 (1992)

Cosmological Density of WIMPs from Solar and Terrestrial Annihilations. *Andrew Gould.* 388, 338, 54-E5 (1992)

Large-Scale Flows and Solar Luminosity Variations. *S. Arendt.* 389, 421, 65-B6 (1992)

Further Improvements of a New Model for Turbulent Convection in Stars. *V. M. Canuto & I. Mazzitelli.* 389, 724, 70-D1 (1992)

Standard Solar Model. II. *g*-Modes. *D. B. Guenther, P. Demarque, M. H. Pinsonneault, & Y.-C. Kim.* 392, 328, 105-A10 (1992)

Local Acoustic Diagnostics of the Solar Interior. *D. C. Braun, C. A. Lindsey, Y. Fan, & S. M. Jefferies.* 392, 739, 111-D7 (1992)

Solar Opacities Based on the Ion-Sphere and Ion-Correlation Models. *Balazs F. Rozsnyai.* 393, 409, 119-C1 (1992)

The Effect of an Inclined Magnetic Field on Solar Oscillation Frequencies. *Philip R. Goode & Michael J. Thompson.* 395, 307, 144-A1 (1992)

Helium Diffusion in the Sun. *J. N. Bahcall & M. H. Pinsonneault.* 395, L119, 154-D7 (1992)

Multiple Periodicities in the Solar Magnetic Field: Possible Origin in a Multiple-Mode Solar Dynamo. *D. W. Boyer & E. H. Levy.* 396, 340, 159-C6 (1992)

An Examination of the $m = 1$ Instability in a Low-Mass Protoplanetary Disk. *Hyerim Noh, Ethan T. Vishniac, & William D. Cochran.* 397, 347, 172-B11 (1992)

A Formulation of Convection for Stellar Structure and Evolution Calculations without the Mixing-Length Theory Approximations. I. Application to the Sun. *Thomas Joseph Lydon, Peter A. Fox, & Sabatino Sofia.* 397, 701, 179-G3 (1992)

Helioseismology Data and the Solar Dynamo. *P. R. Wilson.* 399, 294, 198-G11 (1992)

On the Photon Diffusion Time Scale for the Sun. *R. Mitalas & K. R. Sills.* 401, 759, 232-A1 (1992)

Helioseismological Test of a New Model for Stellar Convection. *L. Paternò, R. Ventura, V. M. Canuto, & I. Mazzitelli.* 402, 733, 11-F3 (1993)

Effects of Diffusion on Solar Models and Their Oscillation Frequencies. *J. Christensen-Dalsgaard, C. R. Proffitt, & M. J. Thompson.* 403, L75, 27-E1 (1993)

Improved Solar Models Constructed with a Formulation of Convection for Stellar Structure and Evolution Calculations without the Mixing-Length Theory Approximations. *Thomas Joseph Lydon, Peter A. Fox, & Sabatino Sofia.* 403, L79, 27-E8 (1993)

The Origin of Morphological Asymmetries in Bipolar Active Regions. *Y. Fan, G. H. Fisher, & E. E. DeLuca.* 405, 390, 46-A7 (1993)

On the Solar Differential Rotation: Meridional Motions Associated with a Slowly Varying Angular Velocity. *Bernard R. Durney.* 407, 367, 73-E11 (1993)

Toward a Unified Classical Model of the Sun: On the Sensitivity of Neutrinos and Helioseismology to the Microscopic Physics. *Sylvaine Turck-Chièze & Ilidio Lopes.* 408, 347, 87-D10 (1993)

A Solar Dynamo Surface Wave at the Interface between Convection and Nonuniform Rotation. *E. N. Parker.* 408, 707, 94-A9 (1993)

Evidence for a Fundamental Period of the Sun and Its Relation to the 154 Day Complex of Periodicities. *T. Bai & P. A. Sturrock.* 409, 476, 102-G8 (1993)

g-Modes and the Solar Neutrino Problem. *John N. Bahcall & Pawan Kumar.* 409, L73, 111-G1 (1993)

Using Solar *p*-Modes to Determine the Convection Zone Depth and Constrain Diffusion-produced Composition Gradients. *Joyce A. Guzik & Arthur N. Cox.* 411, 394, 132-C4 (1993)
Nonlinear Inversion for Solar Oscillation Frequencies. *Yeming Gu.* 413, 422, 161-E4 (1993)
Penetration at the Base of Solar Convection Zone. *H. M. Antia & S. M. Chitre.* 413, 778, 166-B1 (1993)
Are the 1986–1988 Changes in Solar Free-Oscillation Frequency Splitting Significant? *Douglas Gough & Philip B. Stark.* 415, 376, 189-E13 (1993)
Angular Momentum Transport in Magnetized Stellar Radiative Zones. II. The Solar Spin-down. *P. Charbonneau & K. B. MacGregor.* 417, 762, 228-G13 (1993)
Our Sun. III. Present and Future. *I.-Juliana Sackmann, Arnold I. Boothroyd, & Kathleen E. Kraemer.* 418, 457, 236-F6 (1993)
The Effects of Helium Diffusion on Solar *p*-Mode Frequencies. *D. B. Guenther, M. H. Pinsonneault, & J. N. Bahcall.* 418, 469, 236-G7 (1993)
The Rate of the Proton-Proton Reaction. *Marc Kamionkowski & John N. Bahcall.* 420, 884, 13-G11 (1994)
Element Diffusion in the Solar Interior. *Anne A. Thoul, John N. Bahcall, & Abraham Loeb.* 421, 828, 28-E3 (1994)
Nonadiabatic Nonradial *p*-Mode Frequencies of the Standard Solar Model, with and without Helium Diffusion. *D. B. Guenther.* 422, 400, 35-A10 (1994)
Excitation of Solar *p*-Modes. *Peter Goldreich, Norman Murray, & Pawan Kumar.* 424, 466, 67-E12 (1994)
The Effects of Scattering on Solar Oscillations. *Peter Goldreich & Norman Murray.* 424, 480, 67-F14 (1994)
Differential Rotation and Turbulent Convection: A New Reynolds Stress Model and Comparison with Solar Data. *V. M. Canuto, F. O. Minotti, & O. Schilling.* 425, 303, 84-A9 (1994)
Effects of Heavy-Element Settling on Solar Neutrino Fluxes and Interior Structures. *Charles R. Proffitt.* 425, 849, 92-C13 (1994)
The Effect of Diffusion on Solar Evolution. *Attay Kovetz & Giora Shaviv.* 426, 787, 108-C7 (1994)
Measuring the Helium Abundance in the Solar Envelope: The Role of the Equation of State. *H. M. Antia & Sarbani Basu.* 426, 801, 108-D9 (1994)
Downflow Plumes and Entropy Balance in Deep Convection Zones. *Gregory P. Ginet.* 429, 899, 156-G7 (1994)
The Possibility of Forming an Inhomogeneous Sun and the Solar Neutrino Deficit. *E. H. Levy & T. V. Ruzmaikina.* 431, 881, 189-F1 (1994)
A Seismic Model of the Sun's Interior. *W. A. Dziembowski, Philip R. Goode, A. A. Pamyatnykh, & R. Sienkiewicz.* 432, 417, 198-C13 (1994)
On Comparing Helioseismic Two-dimensional Inversion Methods. *J. Schou, J. Christensen-Dalsgaard, & M. J. Thompson.* 433, 389, 213-B13 (1994)
Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. I. Emerging Bipolar Magnetic Regions. *E. N. Parker.* 433, 867, 222-A1 (1994)
Variation of the Frequencies of Very Low *l* *p*-Modes. *C. Régulo, A. Jiménez, P. L. Pallé, F. Pérez Hernández, & T. Roca Cortés.* 434, 384, 230-G4 (1994)
Use of Acoustic Wave Travel-Time Measurements to Probe the Near-Surface Layers of the Sun. *S. M. Jefferies, Y. Osaki, H. Shibahashi, T. L. Duvall, Jr., J. W. Harvey, & M. A. Pomerantz.* 434, 795, 238-G6 (1994)
The Rotation of the Solar Core. *Antonio Jiménez, Fernando Pérez Hernández, Antonio Claret, Pere LLuis Pallé, Clara Régulo, & Teodoro Roca Cortés.* 435, 874, 258-B10 (1994)
Solar Neutrinos: Sensitivity to Pre–Main-Sequence Evolution and to the Depth of the Convective Zone. *John N. Bahcall & Ami Glasner.* 437, 485, 289-F13 (1994)
The Sun as a Probe of Varying *G*. *P. Demarque, Lawrence M. Krauss, D. B. Guenther, & David Nydam.* 437, 870, 297-E10 (1994)
Magnetic Merging in Colliding Flux Tubes. *Ellen G. Zweibel & James E. Rhoads.* 440, 407, 46-G3 (1995)
Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. II. The Origin of Enhanced Solar Irradiance. *E. N. Parker.* 440, 415, 47-A1 (1995)
Stellar Models with Microscopic Diffusion and Rotational Mixing. I. Application to the Sun. *Brian Chaboyer, P. Demarque, & M. H. Pinsonneault.* 441, 865, 73-G13 (1995)
Magnetoconvection Dynamics in a Stratified Layer. I. Two-dimensional Simulations and Visualization. *Steven R. Lantz & R. N. Sudan.* 441, 903, 74-D4 (1995)
Magnetoconvection Dynamics in a Stratified Layer. II. A Low-Order Model of the Tilting Instability. *Steven R. Lantz.* 441, 925, 74-F2 (1995)
Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. III. Extended Updrafts. *E. N. Parker.* 442, 405, 82-E8 (1995)
Modeling of Shallow and Inefficient Convection in the Outer Layers of the Sun Using Realistic Physics. *Yong-Cheol Kim, Peter A. Fox, Sabatino Sofia, & Pierre Demarque.* 442, 422, 82-G1 (1995)
Helioseismic Bounds on the Central Temperature of the Sun. *H. M. Antia & S. M. Chitre.* 442, 434, 83-A2 (1995)
Oscillation-Convection Coupling: Cause of Supergranulation? *Charles L. Wolff.* 443, 423, 100-G12 (1995)
Discrepancies between OPAL and OP Opacities at High Densities and Temperatures. *Carlos A. Iglesias & Forrest J. Rogers.* 443, 460, 101-D6 (1995)
Updated Seismic Solar Model. *W. A. Dziembowski, Philip R. Goode, A. A. Pamyatnykh, & R. Sienkiewicz.* 445, 509, 139-E6 (1995)
Rotation, Diffusion, and Overshoot in the Sun: Effects on the Oscillation Frequencies and the Neutrino Flux. *Brian Chaboyer, P. Demarque, D. B. Guenther, & M. H. Pinsonneault.* 446, 435, 159-C3 (1995)
The Screened Nuclear Reaction Rates and the Solar Neutrino Puzzle. *H. Dzitko, S. Turck-Chièze, P. Delbourgo-Salvador, & C. Lagrange.* 447, 428, 178-D2 (1995)
Measurement of the Rotation Rate in the Deep Solar Interior. *S. Tomczyk, J. Schou, & M. J. Thompson.* 448, L57, 200-C5 (1995)
Early Solar Mass Loss, Element Diffusion, and Solar Oscillation Frequencies. *Joyce A. Guzik & Arthur N. Cox.* 448, 905, 207-D7 (1995)
Theoretical Properties of the Ω-Loops in the Convection Zone of the Sun. IV. Stability of Updrafts. *E. N. Parker.* 448, 942, 208-A7 (1995)
"Explosion" and Intensification of Magnetic Flux Tubes. *F. Moreno-Insertis, P. Caligari, & M. Schüssler.* 452, 894, 277-A11 (1995)
On the Interaction of Convection and Rotation in Stars. *Pawan Kumar, Ramesh Narayan, & Abraham Loeb.* 453, 480, 287-F6 (1995)
Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. V. Coriolis Force and the Centrifugal Potential Barrier. *E. N. Parker.* 454, 927, 314-E10 (1995)
Velocity Fields within the Solar Convection Zone: Evidence from Oscillation Ring Diagram Analysis of Mount Wilson Dopplergrams. *J. Patrón, F. Hill, E. J. Rhodes, Jr., S. G. Korzennik, & A. Cacciani.* 455, 746, 332-B10 (1995)
A Method for Incorporating the Effects of Large-Scale Magnetic Fields in the Study of Stellar Structure and Variability. *Thomas Joseph Lydon & Sabatino Sofia.* 101, 357, 58-F11 (1995)

SUN: LIMB DARKENING

Telescope Beam-Profile Diagnostics and the Solar Limb. *Charles A. Lindsey & Thomas L. Roellig.* 375, 414, 116-A9 (1991)
Submillimeter Solar Limb Profiles Determined from Observations of the Total Solar Eclipse of 1988 March 18. *T. L. Roellig, E. E. Becklin, J. T. Jefferies, G. A. Kopp, C. A. Lindsey, F. Q. Orrall, & M. W. Werner.* 381, 288, 192-E5 (1991)

SUN: MAGNETIC FIELDS

Magnetoatmospheric Oscillations in Sunspot Umbrae. *S. S. Hasan.* 366, 328, 5-B7 (1991)
Strong Magnetic Fields and Inhomogeneity in the Solar Corona. *S. M. White, M. R. Kundu, & N. Gopalswamy.* 366, L43, 6-E7 (1991)
Rotation of the Sun's Outer White-Light Corona Determined from Solwind Data. *Ana G. Nash.* 366, 592, 10-D1 (1991)
Scattering of Acoustic Waves from a Magnetic Flux Tube Embedded in a Radiating Fluid. *T. J. Bogdan & M. Knölker.* 369, 219, 38-F1 (1991)
Three-dimensional Structures of Magnetostatic Atmospheres. III. A General Formulation. *B. C. Low.* 370, 427, 52-E8 (1991)
The Magnetic Network Location of Explosive Events Observed in the Solar Transition Region. *J. G. Porter & K. P. Dere.* 370, 775, 58-A11 (1991)
The Sensitivity of Chromospherically Induced *p*- and *f*-Mode Frequency Shifts to the Height of the Magnetic Canopy. *David J. Evans & B. Roberts.* 371, 387, 64-G9 (1991)
The Resonant Absorption of *p*-Modes by Sunspots with Twisted Magnetic Fields. *S. M. Chitre & Joseph M. Davila.* 371, 785, 71-C10 (1991)
Why Fast Solar Wind Originates from Slowly Expanding Coronal Flux Tubes. *Y.-M. Wang & N. R. Sheeley, Jr.* 372, L45, 79-F1 (1991)
On the Inference of Magnetic Field Vectors from Stokes Profiles. *John T. Jefferies & Donald L. Mickey.* 372, 694, 84-C9 (1991)

Latitudinal Dynamics of Steady Solar Wind Flows. *W.-H. Yang & R. W. Schunk.* 372, 703, 84-D5 (1991)

Solar Modulation of Cosmic Electrons: Evidence for Dynamic Regulation. *Evelyn Tuska, Paul Evenson, & Peter Meyer.* 373, L27, 91-D1 (1991)

High-Resolution Spectra of Solar Magnetic Features. II. Magnetic Fields of Umbral Brightenings. *Bruce W. Lites, Thomas A. Bida, A. Johannesson, & G. B. Scharmer.* 373, 683, 96-D11 (1991)

Coronal Magnetic Structures Observing Campaign. I. Simultaneous Microwave and Soft X-Ray Observations of Active Regions at the Solar Limb. *N. Nitta, S. M. White, M. R. Kundu, N. Gopalswamy, G. D. Holman, J. W. Brosius, J. T. Schmelz, J. L. R. Saba, & K. T. Strong.* 374, 374, 102-F11 (1991)

Siphon Flows in Isolated Magnetic Flux Tubes. IV. Critical Flows with Standing Tube Shocks. *John H. Thomas & Benjamin Montesinos.* 375, 404, 115-G11 (1991)

Magnetic Flux Transport and the Sun's Dipole Moment: New Twists to the Babcock-Leighton Model. *Y.-M. Wang & N. R. Sheeley, Jr.* 375, 761, 122-B5 (1991)

Weak Magnetic Fields and Solar Irradiance Variations. *J. K. Lawrence, G. A. Chapman, & S. R. Walton.* 375, 771, 122-C1 (1991)

Modeling Mesogranules and Exploders on the Solar Surface. *G. W. Simon, A. M. Title, & N. O. Weiss.* 375, 775, 122-C7 (1991)

How Much Energy Can Be Stored in a Three-dimensional Force-free Magnetic Field? *J. J. Aly.* 375, L61, 124-C11 (1991)

Seismology for the Fine Structure in the Sun's Oscillations Varying with Its Activity Cycle. *W. A. Dziembowski & Philip R. Goode.* 376, 782, 136-B1 (1991)

Magnetohydrodynamics of an Impulsively Heated, Hard X-Ray Emitting Filament. *George Roumeliotis & A. Gordon Emslie.* 377, 685, 148-B9 (1991)

Large-Scale Features of the Sun at 20 Centimeter Wavelength. *N. Gopalswamy, S. M. White, & M. R. Kundu.* 379, 366, 167-E9 (1991)

Multicolor Continuum Analysis of the Solar Granulation in Quiet and Active Regions. *C. U. Keller & S. Koutchmy.* 379, 751, 174-B1 (1991)

Multiple Scattering of Acoustic Waves by a Pair of Uniformly Magnetized Flux Tubes. *Thomas J. Bogdan & David C. Fox.* 379, 758, 174-B10 (1991)

Chromospheric and Transition Region Diagnostics Using Emission-Line Intensities. *R. Grant Athay & K. P. Dere.* 379, 776, 174-D1 (1991)

Formation of the Infrared Emission Lines of Mg I in the Solar Atmosphere. *E. S. Chang, E. H. Avrett, P. J. Mauas, R. W. Noyes, & R. Loeser.* 379, L79, 175-E1 (1991)

Propagation of Magnetoacoustic Waves in the Solar Atmosphere with Random Inhomogeneities of Density and Magnetic Fields. *M. Ryutova, M. Kaisig, & T. Tajima.* 380, 268, 179-D1 (1991)

Motions, Fields, and Flares in the 1989 March Active Region. *Haimin Wang, Frances Tang, Harold Zirin, & Guoxiang Ai.* 380, 282, 179-E1 (1991)

Maximum Energy of Semi-infinite Magnetic Field Configurations. *P. A. Sturrock.* 380, 655, 186-C8 (1991)

Avalanches and the Distribution of Solar Flares. *Edward T. Lu & Russell J. Hamilton.* 380, L89, 188-F5 (1991)

On the Spontaneous Formation of Electric Current Sheets above a Flexible Solar Photosphere. *B. C. Low.* 381, 295, 192-F1 (1991)

Magnetoacoustic Heating of the Solar Chromosphere. *Joseph M. Davila & S. M. Chitre.* 381, L31, 194-D12 (1991)

Vector Magnetic Fields in Sunspots. I. Stokes Profile Analysis Using the Marshall Space Flight Center Magnetograph. *K. S. Balasubramaniam & E. A. West.* 382, 699, 210-C11 (1991)

Energy Balance in Coronal Funnels. *Douglas Rabin.* 383, 407, 217-D1 (1991)

Dynamics of Solar Coronal Magnetic Fields. *R. B. Dahlburg, S. K. Antiochos, & T. A. Zang.* 383, 420, 217-E1 (1991)

A New Solar Cycle Model Including Meridional Circulation. *Y.-M. Wang, N. R. Sheeley, Jr., & A. G. Nash.* 383, 431, 217-F1 (1991)

Electric Field Strengths from the Solar 12 Micron Lines. *Edward S. Chang & William G. Schoenfeld.* 383, 450, 217-G9 (1991)

Do Changes in the Photospheric Magnetic Network Cause the 11 Year Variation of Total Solar Irradiance? *P. Foukal, K. Harvey, & F. Hill.* 383, L89, 226-G1 (1991)

Quasi-static Evolution of Coronal Magnetic Fields. *D. W. Longcope & R. N. Sudan.* 384, 305, 4-F12 (1992)

The Practical Application of the Magnetic Virial Theorem. *J. A. Klimchuk, R. C. Canfield, & J. E. Rhoads.* 385, 327, 16-A1 (1992)

Three-dimensional Force-free Magnetic Fields and Flare Energy Buildup. *J. A. Klimchuk & P. A. Sturrock.* 385, 344, 16-B6 (1992)

Detection of "Invisible Sunspots." *Harold Zirin & Haimin Wang.* 385, L27, 17-C12 (1992)

Emergence of Magnetic Flux from the Convection Zone into the Solar Atmosphere. I. Linear and Nonlinear Adiabatic Evolution of the Convective-Parker Instability. *S. Nozawa, K. Shibata, R. Matsumoto, A. C. Sterling, T. Tajima, Y. Uchida, A. Ferrari, & R. Rosner.* 78, 267, 5-D5 (1992)

Prominence Sheets Supported by Constant-Current Force-free Fields. II. Imposition of Normal Photospheric Field Component and Prominence Surface Current. *C. Ridgway, T. Amari, & E. R. Priest.* 385, 718, 22-A10 (1992)

Cylindrically Symmetric Force-free Magnetic Fields. *Lisa J. Porter, James A. Klimchuk, & Peter A. Sturrock.* 385, 738, 22-C6 (1992)

Equilibrium of a Magnetic Flux Tube in a Compressible Flow. *Richard Kerswell & Stephen Childress.* 385, 746, 22-D1 (1992)

Structure of Sunspot Penumbrae: Fallen Magnetic Flux Tubes. *Donat G. Wentzel.* 388, 211, 51-E11 (1992)

Taylor Relaxation of a Gold-Hoyle Flux Tube. *G. J. Rickard.* 389, 413, 65-A10 (1992)

On the Density and Field Sensitivities of Dielectronic Recombination. *Daniel B. Reisenfeld, John C. Raymond, Albert R. Young, & John L. Kohl.* 389, L37, 66-E5 (1992)

Solar Active Regions as a Percolation Phenomenon. *Donat G. Wentzel & Philip E. Seiden.* 390, 280, 77-D10 (1992)

Vortex Attraction and the Formation of Sunspots. *E. N. Parker.* 390, 290, 77-E8 (1992)

Self-similar Magnetohydrodynamics. V. Gravitating Spheres and Spheroids. *B. C. Low.* 390, 567, 82-D1 (1992)

Magnetic Reconnection in Incompressible Fluids. *Edward E. DeLuca & Ian J. D. Craig.* 390, 679, 83-F7 (1992)

A True-Field Magnetogram in a Solar Plage Region. *Douglas Rabin.* 390, L103, 85-D1 (1992)

Energy Buildup in Sheared Force-free Magnetic Fields. *Richard Wolfson & Boon Chye Low.* 391, 353, 90-C6 (1992)

Decimetric Solar Type U Bursts: VLA and PHOENIX Observations. *Markus J. Aschwanden, T. S. Bastian, A. O. Benz, & J. W. Brosius.* 391, 380, 90-E13 (1992)

Spatially Extended Measurements of Magnetic Field Strength in Solar Plages. *Douglas Rabin.* 391, 832, 98-C6 (1992)

The Production of ^{3}He and Heavy Ion Enrichments in ^{3}He-rich Flares by Electromagnetic Hydrogen Cyclotron Waves. *M. Temerin & I. Roth.* 391, L105, 100-B1 (1992)

The Conversion of *p*-Modes to Slow Modes and the Absorption of Acoustic Waves by Sunspots. *H. C. Spruit & T. J. Bogdan.* 391, L109, 100-B7 (1992)

On Potential Field Models of the Solar Corona. *Y.-M. Wang & N. R. Sheeley, Jr.* 392, 310, 104-G1 (1992)

On Neutralized Currents in the Solar Corona. *Ladye Kathryn Wilkinson, A. Gordon Emslie, & G. Allen Gary.* 392, L39, 106-E7 (1992)

A Regularization Method for Extrapolation of Solar Potential Magnetic Fields. *G. Allen Gary & Z. E. Musielak.* 392, 722, 111-C1 (1992)

Local Acoustic Diagnostics of the Solar Interior. *D. C. Braun, C. A. Lindsey, Y. Fan, & S. M. Jefferies.* 392, 739, 111-D7 (1992)

Coronal Loops: Current-based Heating Processes. *P. Beaufumé, B. Coppi, & L. Golub.* 393, 396, 119-A11 (1992)

On the Differences between Plage and Quiet Sun in the Solar Photosphere. *Alan M. Title, Kenneth P. Topka, Theodore D. Tarbell, Wolfgang Schmidt, Christiaan Balke, & Göran Scharmer.* 393, 782, 125-E1 (1992)

Localized Sources of Propagating Acoustic Waves in the Solar Photosphere. *Timothy M. Brown, Thomas J. Bogdan, Bruce W. Lites, & John H. Thomas.* 394, L65, 139-E7 (1992)

The Effect of an Inclined Magnetic Field on Solar Oscillation Frequencies. *Philip R. Goode & Michael J. Thompson.* 395, 307, 144-A1 (1992)

The Thermal and Plasma-physical Evolution of Laminar Current Sheets Formed in the Solar Atmosphere by Emerging Flux. *T. N. LaRosa.* 396, 289, 158-F3 (1992)

Multiple Periodicities in the Solar Magnetic Field: Possible Origin in a Multiple-Mode Solar Dynamo. *D. W. Boyer & E. H. Levy.* 396, 340, 159-C6 (1992)

Properties of the Smallest Solar Magnetic Elements. I. Facular Contrast near Sun Center. *K. P. Topka, T. D. Tarbell, & A. M. Title.* 396, 351, 159-D6 (1992)

Inversion of Stokes Profiles. *B. Ruiz Cobo & J. C. del Toro Iniesta.* 398, 375, 186-D11 (1992)

Dielectronic Recombination as a Function of Electric Field Strength. *Daniel B. Reisenfeld.* 398, 386, 186-E9 (1992)

X-Ray Observations of Sunspot Penumbral Structure. *B. J. Sams III, L. Golub, & N. O. Weiss.* 399, 313, 199-B8 (1992)

Nonlinear Dissipation of Surface Alfvén Waves in the Solar Corona. *M. S. Ruderman.* 399, 724, 207-A5 (1992)

Coronal Magnetic Structures Observing Campaign. II. Magnetic and Plasma Properties of a Solar Active Region. *J. T. Schmelz, G. D. Holman, J. W. Brosius, & R. D. Gonzalez.* 399, 733, 207-B1 (1992)

Forced Reconnection, Current Sheets, and Coronal Heating. *Xiaogang Wang & A. Bhattacharjee.* 401, 371, 225-F1 (1992)

A New Determination of the Solar Rotation Rate. *N. R. Sheeley, Jr., Y.-M. Wang, & A. G. Nash.* 401, 378, 225-F9 (1992)

On the Inclination of Photospheric Solar Magnetic Fields. *Norman Murray.* 401, 386, 225-G5 (1992)

Siphon Flows in Isolated Magnetic Flux Tubes. V. Radiative Flows with Variable Ionization. *Benjamin Montesinos & John H. Thomas.* 402, 314, 5-A13 (1993)

Solar p-Modes in a Vertical Magnetic Field: Trapped and Damped π-Modes. *P. S. Cally & T. J. Bogdan.* 402, 721, 11-E3 (1993)

On the Magnetic and Velocity Field Geometry of Simple Sunspots. *Alan M. Title, Zoe A. Frank, Richard A. Shine, Theodore D. Tarbell, Kenneth P. Topka, Göran Scharmer, & Wolfgang Schmidt.* 403, 780, 25-D13 (1993)

The Magnetohydrodynamics of Umbral Flux Tubes. I. Theoretical Model. *Detlev Degenhardt & Bruce W. Lites.* 404, 383, 32-E9 (1993)

A New Class of Exact, Nonlinear Solutions to the Grad-Shafranov Equation. *George Roumeliotis.* 404, 781, 38-F1 (1993)

Cosmic-Ray Anisotropies and Gradients in Three Dimensions. *Jiasheng Chen & John W. Bieber.* 405, 375, 45-G3 (1993)

The Origin of Morphological Asymmetries in Bipolar Active Regions. *Y. Fan, G. H. Fisher, & E. E. DeLuca.* 405, 390, 46-A7 (1993)

A Model of the "Steady" and "Fluctuating" Parts of the Sun's Internal Magnetic Field. *M. H. Gokhale & K. M. Hiremath.* 407, 359, 73-E1 (1993)

Can Equipartition Fields Produce the Tilts of Bipolar Magnetic Regions? *Sydney D'Silva.* 407, 385, 73-G3 (1993)

Flux Emergence and Umbra Formation after the X-9 Flare of 1991 March 22. *Haimin Wang & Frances Tang.* 407, L89, 82-F6 (1993)

Three-dimensional Structures of Magnetostatic Atmospheres. V. Coupled Electric Current Systems. *B. C. Low.* 408, 689, 93-G1 (1993)

Three-dimensional Structures of Magnetostatic Atmospheres. VI. Examples of Coupled Electric Current Systems. *B. C. Low.* 408, 693, 93-G7 (1993)

Solar Magnetic Field Studies Using the 12 Micron Emission Lines. II. Stokes Profiles and Vector Field Samples in Sunspots. *Tilak Hewagama, Drake Deming, Donald E. Jennings, Vladimir Osherovich, Gunter Wiedemann, David Zipoy, Donald L. Mickey, & Howard Garcia.* 86, 313, 18-B7 (1993)

The Free Energies of Partially Open Coronal Magnetic Fields. *B. C. Low & D. F. Smith.* 410, 412, 117-B10 (1993)

Flux-Tube Divergence, Coronal Heating, and the Solar Wind. *Y.-M. Wang.* 410, L123, 126-D13 (1993)

The Dynamics of Magnetic Flux Rings. *E. E. DeLuca, G. H. Fisher, & B. M. Patten.* 411, 383, 132-B4 (1993)

Anomalous Diffusion of Magnetic Elements across the Solar Surface. *J. K. Lawrence & C. J. Schrijver.* 411, 402, 132-D1 (1993)

Observational Evidence for Hotter Transition Region Loops within the Supergranular Network. *James F. Dowdy, Jr.* 411, 406, 132-D8 (1993)

Simultaneous Observations of Solar Plage with the Solar Extreme Ultraviolet Rocket Telescope and Spectrograph (SERTS), the VLA, and the Kitt Peak Magnetograph. *Jeffrey W. Brosius, Joseph M. Davila, William T. Thompson, Roger J. Thomas, Gordon D. Holman, N. Gopalswamy, Stephen M. White, Mukul R. Kundu, & Harrison P. Jones.* 411, 410, 132-E4 (1993)

A Spectroscopic Method for the Solution of the 180° Azimuth Ambiguity in Magnetograms. *Egidio Landi Degl'Innocenti & Véronique Bommier.* 411, L49, 134-C8 (1993)

The Magnetic Field in the Corona above Sunspots at the Eclipse of 1991 July 11. *D. E. Gary, Y. Leblanc, G. A. Dulk, & L. Golub.* 412, 421, 147-C13 (1993)

Solar Flares and Avalanches in Driven Dissipative Systems. *Edward T. Lu, Russell J. Hamilton, J. M. McTiernan, & Kenneth R. Bromund.* 412, 841, 154-C9 (1993)

Formation, Levitation, and Stability of Prominences in the Magnetized Solar Atmosphere. *J. F. Drake, Y. Mok, & G. Van Hoven.* 413, 416, 161-D9 (1993)

Three-dimensional Magnetohydrodynamics of the Emerging Magnetic Flux in the Solar Atmosphere. *R. Matsumoto, T. Tajima, K. Shibata, & M. Kaisig.* 414, 357, 174-D8 (1993)

Understanding the Rotation of Coronal Holes. *Y.-M. Wang & N. R. Sheeley, Jr.* 414, 916, 182-F7 (1993)

Direct Evidence of the Interplanetary Magnetic Field Effect on the Cosmic-Ray Shadow by the Sun. *M. Amenomori, Z. Cao, L. K. Ding, Z. Y. Feng, K. Hibino, N. Hotta, Q. Huang, A. X. Huo, H. G. Jia, G. Z. Jiang, S. Q. Jiao, F. Kajino, K. Kasahara, Labaciren, D. M. Mei, L. Meng, X. R. Meng, Mimaciren, K. Mizutani, J. Mu, H. Nanjo, M. Nishizawa, Nusang, A. Oguro, M. Ohnishi, I. Ohta, T. Ouchi, J. R. Ren, T. Saito, M. Sakata, Z. Z. Shi, M. Shibata, T. Shirai, H. Sugimoto, X. X. Sun, K. Taira, Y. H. Tan, N. Tateyama, S. Torii, H. Wang, C. Z. Wen, Y. Yamamoto, X. Y. Yao, G. C. Yu, P. Yuan, T. Yuda, J. G. Zeng, C. S. Zhang, H. M. Zhang, L. Zhang, Zhasang, Zhaxiciren, & W. D. Zhou (The Tibet ASγ Collaboration).* 415, L147, 200-G1 (1993)

A Linear Solution for Magnetic Reconnection Driven by Converging or Diverging Footpoint Motions. *George Roumeliotis & Ronald L. Moore.* 416, 386, 205-G7 (1993)

The 1992 January 5 Flare at 13.3 UT: Observations from *Yohkoh*. *G. A. Doschek, K. T. Strong, R. D. Bentley, C. M. Brown, J. L. Culhane, A. Fludra, E. Hiei, J. Lang, J. T. Mariska, K. J. H. Phillips, C. D. Pike, A. C. Sterling, T. Watanabe, L. W. Acton, M. E. Bruner, T. Hirayama, S. Tsuneta, E. Rolli, T. Kosugi, M. Yoshimori, H. S. Hudson, T. R. Metcalf, J.-P. Wuelser, Y. Uchida, & Y. Ogawara.* 416, 845, 214-A1 (1993)

Multifractal Measure of the Solar Magnetic Field. *J. K. Lawrence, A. A. Ruzmaikin, & A. C. Cadavid.* 417, 805, 229-D6 (1993)

The Coronal Structure above Sunspots and Pores. *R. Harmon, R. Rosner, H. Zirin, E. Spiller, & L. Golub.* 417, L83, 230-E1 (1993)

Stokes Profile Analysis and Vector Magnetic Fields. VI. Fine Scale Structure of a Sunspot. *B. W. Lites, D. F. Elmore, P. Seagraves, & A. P. Skumanich.* 418, 928, 244-B10 (1993)

The Propagation of Sound Waves in a Randomly Magnetized Medium. I. General Considerations. *M. P. Ryutova & E. R. Priest.* 419, 349, 250-E6 (1993)

The Propagation of Sound Waves in a Randomly Magnetized Medium. II. The Interaction of an Unsteady Wave Packet with an Ensemble of Magnetic Flux Tubes. *M. P. Ryutova & E. R. Priest.* 419, 371, 250-G2 (1993)

Magnetospheres of Solar Active Regions Inferred from Spectral-Polarization Observations with High Spatial Resolution. *K. R. Lang, R. F. Willson, J. N. Kile, J. Lemen, K. T. Strong, V. L. Bogod, G. B. Gelfreikh, B. I. Ryabov, S. R. Hafizov, V. E. Abramov, & S. V. Svetkov.* 419, 398, 251-B7 (1993)

Generation of Electric Currents in Two-dimensional Magnetic Nulls. *Juan M. Fontenla.* 419, 837, 258-A11 (1993)

Current Sheets and Reconnection Driven by Footpoint Motion in Two-dimensional Coronal Loops with X-Type Neutral Lines. *Xiaogang Wang & A. Bhattacharjee.* 420, 415, 6-A9 (1994)

A Flare Caused by Interacting Coronal Loops. *Yoichiro Hanaoka.* 420, L37, 7-E9 (1994)

Coronal Temperature, Density, and Magnetic Field Maps of a Solar Active Region Using the Owens Valley Solar Array. *Dale E. Gary & G. J. Hurford.* 420, 903, 14-B6 (1994)

Interactions between Nested Sunspots. I. The Formation and Breakup of a Delta-Type Sunspot. *V. Gaizauskas, K. L. Harvey, & M. Proulx.* 422, 883, 42-G6 (1994)

Thickness Variations along Coronal Loops Inferred from Vector Magnetograph Data. *A. N. McClymont & Z. Mikić.* 422, 899, 43-B3 (1994)

Evolution of Vector Magnetic Field and White-Light Flares in a Solar Active Region (NOAA 6659) in 1991 June. *Hongqi Zhang, Guoxiang Ai, Xu Yan, Wei Li, & Yang Liu.* 423, 828, 59-A5 (1994)

A Numerical Study of the Sudden Eruption of Sheared Magnetic Fields. *George Roumeliotis, Peter A. Sturrock, & Spiro K. Antiochos.* 423, 847, 59-D1 (1994)

Vector Magnetic Field Changes Associated with X-Class Flares. *Haimin Wang, M. W. Ewell, Jr., H. Zirin, & Guoxiang Ai.* 424, 436, 67-C6 (1994)
The Inclination of Network Magnetic Fields. *J. Sánchez Almeida & V. Martínez Pillet.* 424, 1014, 77-D7 (1994)
Comparison between Cool and Hot Plasma Behaviors of Surges. *B. Schmieder, L. Golub, & S. K. Antiochos.* 425, 326, 84-C6 (1994)
Patterns of Helicity in Solar Active Regions. *Alexei A. Pevtsov, Richard C. Canfield, & Thomas R. Metcalf.* 425, L117, 95-A7 (1994)
Spontaneous Reconnection of Line-tied Flux Tubes. *D. W. Longcope & H. R. Strauss.* 426, 742, 107-F5 (1994)
A Converging Flux Model of an X-Ray Bright Point and an Associated Canceling Magnetic Feature. *E. R. Priest, C. E. Parnell, & S. F. Martin.* 427, 459, 115-E9 (1994)
Three-dimensional Force-free Looplike Magnetohydrodynamic Equilibria. *John M. Finn, Parvez N. Guzdar, & Daniel Usikov.* 427, 475, 115-G1 (1994)
Nonlinear Evolution of the Coronal Magnetic Field under Reconnective Relaxation. *R. Wolfson, G. E. Vekstein, & E. R. Priest.* 428, 345, 132-D11 (1994)
Particle Acceleration in an Evolving Active Region by an Ensemble of Shock Waves. *Anastasios Anastasiadis & Loukas Vlahos.* 428, 819, 140-D11 (1994)
Multifractal Models of Small-Scale Solar Magnetic Fields. *A. C. Cadavid, J. K. Lawrence, A. A. Ruzmaikin, & A. Kayleng-Knight.* 429, 391, 149-A2 (1994)
Magnetostatic Structures of the Solar Corona. I. A Model Based on the Cauchy Boundary Value Problem. *J. R. Hundhausen & B. C. Low.* 429, 876, 156-E7 (1994)
The Rotation of Photospheric Magnetic Fields: A Random Walk Transport Model. *Y.-M. Wang & N. R. Sheeley, Jr.* 430, 399, 164-B9 (1994)
High-Resolution Observations of the Evershed Effect in Sunspots. *R. A. Shine, A. M. Title, T. D. Tarbell, K. Smith, Z. A. Frank, & Göran Scharmer.* 430, 413, 164-C11 (1994)
Disruption of Coronal Magnetic Field Arcades. *Zoran Mikić & Jon A. Linker.* 430, 898, 173-B6 (1994)
Solar Fine-Scale Structures in the Corona, Transition Region, and Lower Atmosphere. *Dan Moses, J. W. Cook, J.-D. F. Bartoe, G. E. Brueckner, K. P. Dere, D. F. Webb, J. M. Davis, J. W. Harvey, F. Recely, S. F. Martin, & H. Zirin.* 430, 913, 173-C9 (1994)
Force-free Fields in Thin Coronal Loops. *A. Gordon Emslie & L. K. Wilkinson.* 431, 873, 189-E5 (1994)
Three-dimensional Simulation Study of the Magnetohydrodynamic Relaxation Process in the Solar Corona. I. Spontaneous Generation of the Taylor-Heyvaerts-Priest State. *K. Kusano, Y. Suzuki, H. Kubo, T. Miyoshi, & K. Nishikawa.* 433, 361, 212-G3 (1994)
Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. I. Emerging Bipolar Magnetic Regions. *E. N. Parker.* 433, 867, 222-A1 (1994)
The Study of Coronal Plasma Structures and Fluctuations with Faraday Rotation Measurements. *Takayuki Sakurai & Steven R. Spangler.* 434, 773, 238-E6 (1994)
Coronal Magnetic Structures Observing Campaign. III. Coronal Plasma and Magnetic Field Diagnostics Derived from Multiwaveband Active Region Observations. *J. T. Schmelz, G. D. Holman, J. W. Brosius, & R. F. Willson.* 434, 786, 238-F8 (1994)
Polar Plumes and the Solar Wind. *Y.-M. Wang.* 435, L153, 260-E4 (1994)
Equilibrium Structure of Solar Magnetic Flux Tubes: Energy Transport with Multistream Radiative Transfer. *S. S. Hasan & W. Kalkofen.* 436, 355, 266-B7 (1994)
Dynamics of Emerging Active Region Flux Loops. *Y. Fan, G. H. Fisher, & A. N. McClymont.* 436, 907, 278-B13 (1994)
Umbral Oscillations in Sunspots: Absorption of *p*-Modes and Active Region Heating by Mode Conversion. *P. S. Cally, T. J. Bogdan, & E. G. Zweibel.* 437, 505, 290-A11 (1994)
Transient Microwave Brightenings in Solar Active Regions: Comparison between VLA and *Yohkoh* Observations. *N. Gopalswamy, T. E. W. Payne, E. J. Schmahl, M. R. Kundu, J. R. Lemen, K. T. Strong, R. C. Canfield, & J. de La Beaujardiere.* 437, 522, 290-C3 (1994)
Two Types of Slow Solar Wind. *Y.-M. Wang.* 437, L67, 292-D1 (1994)
The Form of Ideal Current Layers in Line-tied Magnetic Fields. *D. W. Longcope & H. R. Strauss.* 437, 851, 297-C10 (1994)
The Role of Photospheric Magnetic Fields in the Variation of Solar Oscillation Eigenfrequencies. *C. S. Rosenthal.* 438, 434, 7-D13 (1995)
Disruption of a Helmet Streamer by Photospheric Shear. *Jon A. Linker & Zoran Mikić.* 438, L45, 10-D7 (1995)
Is the Solar Chromospheric Magnetic Field Force-free? *Thomas R. Metcalf, Litao Jiao, Alexander N. McClymont, Richard C. Canfield, & Han Uitenbroek.* 439, 474, 27-E11 (1995)
The Propagation of Solar Energetic Protons: Comparative Studies in Two Cases with Markedly Different Scattering Conditions. *J. F. Valdés-Galicia, W. Wanner, M.-B. Kallenrode, & G. Wibberenz.* 439, 482, 27-F8 (1995)
Nonequilibrium in Sheared Axisymmetric Force-free Magnetic Fields. *J. J. Aly.* 439, L63, 40-F13 (1995)
The Bright Knots at the Tops of Soft X-Ray Loops: Quantitative Results from *Yohkoh*. *G. A. Doschek, K. T. Strong, & S. Tsuneta.* 440, 370, 46-C7 (1995)
Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. II. The Origin of Enhanced Solar Irradiance. *E. N. Parker.* 440, 415, 47-A1 (1995)
A Volcanic Origin for High-FIP Material in the Solar Atmosphere. *N. R. Sheeley, Jr.* 440, 884, 55-C12 (1995)
The Magnetic Evolution of AR 6555 Which Led to Two Impulsive, Relatively Compact, X-Type Flares. *J. M. Fontenla, A. Ambastha, B. Kalman, & Gy. Csepura.* 440, 894, 55-E4 (1995)
Coronal Loop Formation Resulting from Photospheric Convection. *G. Van Hoven, Y. Mok, & Z. Mikić.* 440, L105, 58-D8 (1995)
Latitudinal Variation of Helicity of Photospheric Magnetic Fields. *Alexei A. Pevtsov, Richard C. Canfield, & Thomas R. Metcalf.* 440, L109, 58-E1 (1995)
Imaging Spectropolarimetry of the He I 1083 Nanometer Line in a Flaring Solar Active Region. *M. J. Penn & J. R. Kuhn.* 441, L51, 67-D1 (1995)
Emerging Flux Tubes in the Solar Convection Zone. I. Asymmetry, Tilt, and Emergence Latitude. *P. Caligari, F. Moreno-Insertis, & M. Schüssler.* 441, 886, 74-B12 (1995)
Magnetoconvection Dynamics in a Stratified Layer. I. Two-dimensional Simulations and Visualization. *Steven R. Lantz & R. N. Sudan.* 441, 903, 74-D4 (1995)
Magnetoconvection Dynamics in a Stratified Layer. II. A Low-Order Model of the Tilting Instability. *Steven R. Lantz.* 441, 925, 74-F2 (1995)
A Solar Flare Triggering Mechanism Based on the Woltjer-Taylor Minimum Energy Principle. *K. Kusano, Y. Suzuki, & K. Nishikawa.* 441, 942, 74-G9 (1995)
On the Spatial Distribution of Magnetic Fields on the Solar Surface. *L. Tao, Y. Du, R. Rosner, & F. Cattaneo.* 443, 434, 101-A12 (1995)
Brunt-Väisälä Growth Rate and the Radial Emergence of Equipartition Fields. *Sydney D'Silva.* 443, 444, 101-B11 (1995)
Asymptotic Analysis of Force-free Magnetic Fields of Cylindrical Symmetry. *P. A. Sturrock, S. K. Antiochos, & G. Roumeliotis.* 443, 804, 109-A1 (1995)
Shear-induced Opening of the Coronal Magnetic Field. *Richard Wolfson.* 443, 810, 109-A11 (1995)
Coronal Heating by the Resonant Absorption of Alfvén Waves: Wavenumber Scaling Laws. *L. Ofman, J. M. Davila, & R. S. Steinolfson.* 444, 471, 120-B1 (1995)
Reduction, Analysis, and Properties of Electric Current Systems in Solar Active Regions. *G. Allen Gary & Pascal Démoulin.* 445, 982, 148-G12 (1995)
The Electrical Current Structure Associated with Solar Flare Electrons Accelerated by Large-Scale Electric Fields. *A. Gordon Emslie & Jean-Claude Hénoux.* 446, 371, 158-D1 (1995)
Photospheric Magnetic Field Evolution and Eruptive Flares. *T. G. Forbes & E. R. Priest.* 446, 377, 158-D10 (1995)
On the Distribution of the Solar Magnetic Fields. *Haosheng Lin.* 446, 421, 159-A7 (1995)
The Inclination of the Heliomagnetic Equator and the Presence of an Inclined Relic Field in the Sun. *S. Bravo & G. Stewart.* 446, 431, 159-B9 (1995)
Identification of Low-Latitude Coronal Plumes in Extreme-Ultraviolet Spectroheliograms. *Y.-M. Wang & N. R. Sheeley, Jr.* 446, L51, 161-A8 (1995)
The Possible Ascent of a Closed Magnetic System through the Photosphere. *B. W. Lites, B. C. Low, V. Martínez Pillet, P. Seagraves, A. Skumanich, Z. A. Frank, R. A. Shine, & S. Tsuneta.* 446, 877, 168-B13 (1995)
The Statistical Physics of Solar Active Regions and the Fundamental Nature of Solar Flares. *Edward T. Lu.* 446, L109, 171-E3 (1995)

Solar Implications of *Ulysses* Interplanetary Field Measurements. *Y.-M. Wang & N. R. Sheeley, Jr.* 447, L143, 191-E9 (1995)

"Steady" and "Fluctuating" Parts of the Sun's Internal Magnetic Field: Improved Model. *K. M. Hiremath & M. H. Gokhale.* 448, 437, 198-B12 (1995)

Magnetohydrodynamic Waves in a Bounded Inhomogeneous Medium with Prominence-Corona Properties. *R. Oliver & J. L. Ballester.* 448, 444, 198-C8 (1995)

Flux Retraction and Recycling: Negative Buoyancy–induced Oscillations as an Alternative to Parker's Thermal Relaxation Oscillations. *Sydney D'Silva.* 448, 459, 198-D12 (1995)

Magnetic Buoyancy, Vorticity, and Three-dimensional Flux-Tube Formation. *P. C. Matthews, D. W. Hughes, & M. R. E. Proctor.* 448, 938, 207-G11 (1995)

Nonlinear Energy Transfer in Solar Magnetic Loops. *Daniel O. Gómez, Edward E. DeLuca, & Alexander N. McClymont.* 448, 954, 208-B8 (1995)

Empirical Relationship between the Magnetic Field and the Mass and Energy Flux in the Source Regions of the Solar Wind. *Y.-M. Wang.* 449, L157, 227-F8 (1995)

Particle Simulation of a Collision between a Plasma Cloud and a Current Loop. *Jie Zhao, Jun-Ichi Sakai, & Ken-Ichi Nishikawa.* 449, L161, 227-G1 (1995)

The Role of Magnetic Reconnection in Chromospheric Eruptions. *Judith T. Karpen, Spiro K. Antiochos, & C. Richard DeVore.* 450, 422, 233-G3 (1995)

Effects of Weak-to-Moderate Vertical Magnetic Fields on Solar *f*- and *p*-Modes. *P. S. Cally.* 451, 372, 251-A8 (1995)

Current Paths in the Corona and Energy Release in Solar Flares. *D. B. Melrose.* 451, 391, 251-C6 (1995)

The Dynamics of Flux Tubes in a High-β Plasma. II. Buoyancy in Stars and Accretion Disks. *Ethan T. Vishniac.* 451, 816, 258-D12 (1995)

The Influence of a Vertical Magnetic Field on Oscillations in an Isothermal Stratified Atmosphere. II. *Dipankar Banerjee, S. S. Hasan, & J. Christensen-Dalsgaard.* 451, 825, 258-E11 (1995)

Triggered Magnetic Energy Release in Solar Flares. *Y. Q. Hu, X. Li, & G. X. Ai.* 451, 843, 258-G4 (1995)

Seismology of the Solar *f*-Mode. I. Basic Signatures of Shearing Velocity Fields. *Pranab Ghosh, H. M. Antia, & S. M. Chitre.* 451, 851, 259-A1 (1995)

Coronal Plumes and Their Relationship to Network Activity. *Y.-M. Wang & N. R. Sheeley, Jr.* 452, 457, 268-D1 (1995)

"Explosion" and Intensification of Magnetic Flux Tubes. *F. Moreno-Insertis, P. Caligari, & M. Schüssler.* 452, 894, 277-A11 (1995)

Coordinated OVRO, BATSE, *Yohkoh*, and BBSO Observations of the 1992 June 25 M1.4 Flare. *H. Wang, D. E. Gary, H. Zirin, R. A. Schwartz, T. Sakao, T. Kosugi, & K. Shibata.* 453, 505, 288-A9 (1995)

The Escape of Magnetic Flux from the Sun. *J. W. Bieber & D. M. Rust.* 453, 911, 296-E3 (1995)

Jacket Modes: Solar Acoustic Oscillations Confined to Regions Surrounding Sunspots and Plage. *T. J. Bogdan & P. S. Cally.* 453, 919, 296-F1 (1995)

Quadrupolar Force-free Magnetic Fields with Singular Current Density Surfaces. *Y. Q. Hu.* 454, 480, 305-G12 (1995)

New Observations of Subarcsecond Photospheric Bright Points. *T. E. Berger, C. J. Schrijver, R. A. Shine, T. D. Tarbell, A. M. Title, & G. Scharmer.* 454, 531, 306-E11 (1995)

Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. V. Coriolis Force and the Centrifugal Potential Barrier. *E. N. Parker.* 454, 927, 314-E10 (1995)

Turbulent and Chaotic Dynamics Underlying Solar Magnetic Variability. *J. K. Lawrence, A. C. Cadavid, & A. A. Ruzmaikin.* 455, 366, 323-B9 (1995)

VLA and *Yohkoh* Observations of an M1.5 Flare. *N. Gopalswamy, J.-P. Raulin, M. R. Kundu, N. Nitta, J. R. Lemen, R. Herrmann, D. Zarro, & T. Kosugi.* 455, 715, 331-G1 (1995)

A Method for Incorporating the Effects of Large-Scale Magnetic Fields in the Study of Stellar Structure and Variability. *Thomas Joseph Lydon & Sabatino Sofia.* 101, 357, 58-F11 (1995)

SUN: OSCILLATIONS

Magnetoatmospheric Oscillations in Sunspot Umbrae. *S. S. Hasan.* 366, 328, 5-B7 (1991)

On the Subadiabatic Magnetohydrodynamic Overstability in Background Polytropes. *Yu-Qing Lou.* 367, 367, 16-E9 (1991)

What We Know about the Sun's Internal Rotation from Solar Oscillations. *Philip R. Goode, W. A. Dziembowski, S. G. Korzennik, & E. J. Rhodes, Jr.* 367, 649, 21-C11 (1991)

Nonlinear Behavior of Solar Gravity Modes Driven by ^{3}He in the Core. II. Numerical Simulations. *William J. Merryfield, Juri Toomre, & Douglas Gough.* 367, 658, 21-D8 (1991)

Scattering of Acoustic Waves from a Magnetic Flux Tube Embedded in a Radiating Fluid. *T. J. Bogdan & M. Knölker.* 369, 219, 38-F1 (1991)

Simulation of Effects of Atmospheric Seeing on the Observation of High-Degree Solar Oscillations. *Frank Hill, Douglas Gough, William J. Merryfield, & Juri Toomre.* 369, 237, 38-G7 (1991)

High Sensitivity of *p*-Modes near the Acoustic Cutoff Frequency to Solar Model Parameters. *D. B. Guenther.* 369, 247, 39-A5 (1991)

Wavelength Variation of *p*-Mode Intensity Fluctuations. *R. S. Ronan, J. W. Harvey, & T. L. Duvall, Jr.* 369, 549, 44-E9 (1991)

A Unified Approach to the Helioseismic Forward and Inverse Problems of Differential Rotation. *Michael H. Ritzwoller & Eugene M. Lavely.* 369, 557, 44-F5 (1991)

Implications of Solar *p*-Mode Frequency Shifts. *Peter Goldreich, Norman Murray, Gregory Willette, & Pawan Kumar.* 370, 752, 57-F12 (1991)

The Sensitivity of Chromospherically Induced *p*- and *f*-Mode Frequency Shifts to the Height of the Magnetic Canopy. *David J. Evans & B. Roberts.* 371, 387, 64-G9 (1991)

The Source of Solar High-Frequency Acoustic Modes: Theoretical Expectations. *Timothy M. Brown.* 371, 396, 65-A5 (1991)

The Resonant Absorption of *p*-Modes by Sunspots with Twisted Magnetic Fields. *S. M. Chitre & Joseph M. Davila.* 371, 785, 71-C10 (1991)

Evidence for a 250 Second Brightness Oscillation at 1600 Å in the Solar Temperature Minimum Region. *J. W. Cook & J. A. Ewing.* 371, 804, 71-E5 (1991)

Measurements of High-Frequency Solar Oscillation Modes. *T. L. Duvall, Jr., J. W. Harvey, S. M. Jefferies, & M. A. Pomerantz.* 373, 308, 89-G1 (1991)

Short-Term Changes in Solar Oscillation Frequencies and Solar Activity. *M. F. Woodard, J. R. Kuhn, N. Murray, & K. G. Libbrecht.* 373, L81, 97-F12 (1991)

Thermal and Mechanical Damping of Solar *p*-Modes. *Peter Goldreich & Pawan Kumar.* 374, 366, 102-F1 (1991)

Is There an Acoustic Resonance in the Solar Chromosphere? *M. F. Woodard & K. G. Libbrecht.* 374, L61, 110-E1 (1991)

The *p*-Mode Oscillation Spectra of an Evolving 1 $M\odot$ Sun-like Star. *D. B. Guenther.* 375, 352, 115-C8 (1991)

The Location of the Source of High-Frequency Solar Acoustic Oscillations. *Pawan Kumar & Edward Lu.* 375, L35, 117-D12 (1991)

Seismology for the Fine Structure in the Sun's Oscillations Varying with Its Activity Cycle. *W. A. Dziembowski & Philip R. Goode.* 376, 782, 136-B1 (1991)

Characteristics of Intermediate-Degree Solar *p*-Mode Line Widths. *S. M. Jefferies, T. L. Duvall, Jr., J. W. Harvey, Y. Osaki, & M. A. Pomerantz.* 377, 330, 142-A11 (1991)

Does the Solar Interior Rotate Rigidly? *Andrew Gould.* 377, 707, 148-D7 (1991)

The Effect of the Mihalas, Hummer, and Däppen Equation of State and the Molecular Opacity on the Standard Solar Model. *Y.-C. Kim, P. Demarque, & D. B. Guenther.* 378, 407, 156-A10 (1991)

The Depth of the Solar Convection Zone. *J. Christensen-Dalsgaard, D. O. Gough, & M. J. Thompson.* 378, 413, 156-B4 (1991)

Application of the Continuous Orthonormalization and Adjoint Methods to the Computation of Solar Eigenfrequencies and Eigenfrequency Sensitivities. *R. D. Rosenwald & G. F. Rabaey.* 77, 97, 44-G1 (1991)

Multiple Scattering of Acoustic Waves by a Pair of Uniformly Magnetized Flux Tubes. *Thomas J. Bogdan & David C. Fox.* 379, 758, 174-B10 (1991)

Effects of Opacity and Equation of State on Solar Structure and Oscillations. *Joyce A. Guzik & Arthur N. Cox.* 381, 333, 193-B5 (1991)

Linear Resistive Magnetohydrodynamic Computations of Resonant Absorption of Acoustic Oscillations in Sunspots. *Marcel Goossens & Stefaan Poedts.* 384, 348, 5-C8 (1992)

Solar Models with Enhanced Energy Transport in the Core. *J. Christensen-Dalsgaard.* 385, 354, 16-C3 (1992)

Tests of the Detection and Mode Classifications of Low-Degree Solar Gravity Modes with 1978 Solar Diameter Observations. *Henry A. Hill.* 78, 283, 5-F1 (1992)

The Resolving Power of Current Helioseismic Inversions for the Sun's Internal Rotation. *J. Schou, J. Christensen-Dalsgaard, & M. J. Thompson.* 385, L59, 23-E1 (1992)

On the Sensitivity of High-Degree p-Mode Frequencies to the Solar Convection Zone Helium Abundance. *Joyce A. Guzik & Arthur N. Cox.* 386, 729, 34-D1 (1992)

Interior Opacities and the Standard Solar Model. *John Faulkner & Fritz J. Swenson.* 386, L55, 36-D1 (1992)

Standard Solar Model. *D. B. Guenther, P. Demarque, Y.-C. Kim, & M. H. Pinsonneault.* 387, 372, 41-E9 (1992)

Localized Excitation of Solar Oscillations. *Philip R. Goode, Douglas Gough, & Alexander Kosovichev.* 387, 707, 47-E1 (1992)

On the Ultimate Accuracy of Solar Oscillation Frequency Measurements. *K. G. Libbrecht.* 387, 712, 47-E7 (1992)

Chromospheric Dynamics Based on Infrared Solar Brightness Variations. *G. Kopp, C. Lindsey, T. L. Roellig, M. W. Werner, E. E. Becklin, F. Q. Orrall, & J. T. Jefferies.* 388, 203, 51-E1 (1992)

Application of the Phase-Integral Method to the Trapping of Acoustic Waves in a Gravitating Fluid. I. Planar Polytrope and Turning-Point Behavior. *Gary H. Price.* 391, 845, 98-D10 (1992)

The Conversion of p-Modes to Slow Modes and the Absorption of Acoustic Waves by Sunspots. *H. C. Spruit & T. J. Bogdan.* 391, L109, 100-B7 (1992)

Scattering of p-Modes by a Sunspot. *D. C. Braun, T. L. Duvall, Jr., B. J. LaBonte, S. M. Jefferies, J. W. Harvey, & M. A. Pomerantz.* 391, L113, 100-C1 (1992)

Standard Solar Model. II. g-Modes. *D. B. Guenther, P. Demarque, M. H. Pinsonneault, & Y.-C. Kim.* 392, 328, 105-A10 (1992)

Observations of High-Frequency and High-Wavenumber Solar Oscillations. *D. N. Fernandes, P. H. Scherrer, T. D. Tarbell, & A. M. Title.* 392, 736, 111-D1 (1992)

Local Acoustic Diagnostics of the Solar Interior. *D. C. Braun, C. A. Lindsey, Y. Fan, & S. M. Jefferies.* 392, 739, 111-D7 (1992)

Effects of Differential Rotation on Stellar Oscillations: A Second-Order Theory. *W. A. Dziembowski & Philip R. Goode.* 394, 670, 137-G5 (1992)

Localized Sources of Propagating Acoustic Waves in the Solar Photosphere. *Timothy M. Brown, Thomas J. Bogdan, Bruce W. Lites, & John H. Thomas.* 394, L65, 139-E7 (1992)

The Effect of an Inclined Magnetic Field on Solar Oscillation Frequencies. *Philip R. Goode & Michael J. Thompson.* 395, 307, 144-A1 (1992)

The Influence of a Vertical Magnetic Field on Oscillations in an Isothermal Stratified Atmosphere. *S. S. Hasan & J. Christensen-Dalsgaard.* 396, 311, 159-A1 (1992)

Power Spectra of Median- and Small-Scale Solar Convection. *D.-Y. Chou, C.-S. Chen, K.-T. Ou, & C.-C. Wang.* 396, 333, 159-B11 (1992)

Helioseismology Data and the Solar Dynamo. *P. R. Wilson.* 399, 294, 198-G11 (1992)

New Observations of 5 Minute Oscillations in the Opposite Flanks of Solar Fraunhofer Lines. I. The Effect of Varying the Spectral and Temporal Resolution. *L. Bertello, B. Caccin, P. Francia, & E. Pietropaolo.* 401, 768, 232-B1 (1992)

Solar p-Modes in a Vertical Magnetic Field: Trapped and Damped π-Modes. *P. S. Cally & T. J. Bogdan.* 402, 721, 11-E3 (1993)

Helioseismological Test of a New Model for Stellar Convection. *L. Paternò, R. Ventura, V. M. Canuto, & I. Mazzitelli.* 402, 733, 11-F3 (1993)

Solar Activity and Oscillation Frequency Splittings. *M. F. Woodard & K. G. Libbrecht.* 402, L77, 13-B1 (1993)

Average Effects of Large-Scale Convection on Helioseismic Line Widths and Frequencies. *Eugene M. Lavely & Michael H. Ritzwoller.* 403, 810, 26-A6 (1993)

Effects of Diffusion on Solar Models and Their Oscillation Frequencies. *J. Christensen-Dalsgaard, C. R. Proffitt, & M. J. Thompson.* 403, L75, 27-E1 (1993)

Measurement of p-Mode Energy Propagation in the Quiet Solar Photosphere. *J. M. Fontenla, D. Rabin, D. H. Hathaway, & R. L. Moore.* 405, 787, 52-G8 (1993)

Confirmation of Solar Cycle–dependent Intermediate-Degree p-Mode Frequency Shifts. *Edward J. Rhodes, Jr., Alessandro Cacciani, Sylvain G. Korzennik, & Roger K. Ulrich.* 406, 714, 66-G1 (1993)

The Absorption of p-Modes by Sunspots: Variations with Degree and Order. *Thomas J. Bogdan, Timothy M. Brown, Bruce W. Lites, & John H. Thomas.* 406, 723, 66-G13 (1993)

Time Correlation between Solar Structural Parameters: p-Mode Frequencies, Radius, and Neutrino Flux. *Ph. Delache, V. Gavryusev, E. Gavryuseva, F. Laclare, C. Régulo, & T. Roca Cortés.* 407, 801, 80-D8 (1993)

Observation of Impulsive Acoustic Events and the Excitation of Solar Oscillations. *Sergio R. Restaino, Robin T. Stebbins, & Philip R. Goode.* 408, L57, 89-E9 (1993)

The Cutoff Frequency for Fast-Mode Magnetohydrodynamic Waves in an Isothermal Atmosphere with a Uniform Horizontal Magnetic Field. *B. A. Stark & Z. E. Musielak.* 409, 450, 102-E5 (1993)

Asymptotic Theory of Intermediate- and High-Degree Solar Acoustic Oscillations. *M. Brodsky & S. V. Vorontsov.* 409, 455, 102-E11 (1993)

Oscillations of a Quiescent Solar Prominence Embedded in a Hot Corona. *R. Oliver, J. L. Ballester, A. W. Hood, & E. R. Priest.* 409, 809, 109-B12 (1993)

g-Modes and the Solar Neutrino Problem. *John N. Bahcall & Pawan Kumar.* 409, L73, 111-G1 (1993)

Asymmetries of Solar Oscillation Line Profiles. *T. L. Duvall, Jr., S. M. Jefferies, J. W. Harvey, Y. Osaki, & M. A. Pomerantz.* 410, 829, 124-A13 (1993)

Using Solar p-Modes to Determine the Convection Zone Depth and Constrain Diffusion-produced Composition Gradients. *Joyce A. Guzik & Arthur N. Cox.* 411, 394, 132-C4 (1993)

p-Mode Frequency Variation in Relation to Global Solar Activity. *Kurt T. Bachmann & Timothy M. Brown.* 411, L45, 134-C1 (1993)

Observations of Intermediate Degree Solar Oscillations: 1989 April–June. *Kurt T. Bachmann, Jesper Schou, & Timothy M. Brown.* 412, 870, 154-F8 (1993)

Nonlinear Inversion for Solar Oscillation Frequencies. *Yeming Gu.* 413, 422, 161-E4 (1993)

Dynamics of the Solar Chromosphere. I. Long-Period Network Oscillations. *B. W. Lites, R. J. Rutten, & W. Kalkofen.* 414, 345, 174-C8 (1993)

Equidistribution of Energy and Other Quantities in Oscillating Systems. *Charles L. Wolff.* 414, 892, 182-D4 (1993)

Do p-Mode Frequency Shifts Suggest a Hotter Chromosphere at Solar Maximum? *Rekha Jain & B. Roberts.* 414, 898, 182-D12 (1993)

Discrete High-Frequency p-Modes as Probes of Structures in the Chromosphere, Transition Region, and Lower Corona of the Sun. *Yu-Qing Lou.* 414, L141, 186-E1 (1993)

Are the 1986–1988 Changes in Solar Free-Oscillation Frequency Splitting Significant? *Douglas Gough & Philip B. Stark.* 415, 376, 189-E13 (1993)

The Source of 5 Minute Period Photospheric Umbral Oscillations. *M. J. Penn & B. J. LaBonte.* 415, 383, 189-F7 (1993)

Direct Mapping of Solar Acoustic Power. *C. G. Toner & B. J. LaBonte.* 415, 847, 198-D6 (1993)

Accurate Measurement of the Geometry for a Full-Disk Solar Image and Estimation of the Observational Point Spread Function. *C. G. Toner & S. M. Jefferies.* 415, 852, 198-E11 (1993)

The Effects of Helium Diffusion on Solar p-Mode Frequencies. *D. B. Guenther, M. H. Pinsonneault, & J. N. Bahcall.* 418, 469, 236-G7 (1993)

Helioseismic Line Shape Estimation Given Stochastic Excitation. *John F. Kelly & Michael H. Ritzwoller.* 418, 476, 237-A1 (1993)

A Possible Mechanism for Enhanced Absorption of p-Modes in Sunspot and Plage Regions. *Barry J. LaBonte & Margarita Ryutova.* 419, 388, 251-A9 (1993)

Nonadiabatic Nonradial p-Mode Frequencies of the Standard Solar Model, with and without Helium Diffusion. *D. B. Guenther.* 422, 400, 35-A10 (1994)

Limits on Coronal Reflection Using High-Frequency Solar Oscillations. *P. Kumar, M. A. Fardal, S. M. Jefferies, T. L. Duvall, Jr., J. W. Harvey, & M. A. Pomerantz.* 422, L29, 36-E5 (1994)

The Solar f-Mode as an Interfacial Mode at the Chromosphere-Corona Transition. *C. S. Rosenthal & D. O. Gough.* 423, 488, 52-C1 (1994)

Dynamical Properties of the Chromosphere In and Out of the Solar Magnetic Network. *Karine Bocchialini, Jean-Claude Vial, & Serge Koutchmy.* 423, L67, 54-B8 (1994)

Excitation of Solar p-Modes. *Peter Goldreich, Norman Murray, & Pawan Kumar.* 424, 466, 67-E12 (1994)

The Effects of Scattering on Solar Oscillations. *Peter Goldreich & Norman Murray.* 424, 480, 67-F14 (1994)

Effects of Heavy-Element Settling on Solar Neutrino Fluxes and Interior Structures. *Charles R. Proffitt.* 425, 849, 92-C13 (1994)

Measuring the Helium Abundance in the Solar Envelope: The Role of the Equation of State. *H. M. Antia & Sarbani Basu.* 426, 801, 108-D9 (1994)

Effect of Nonlinear Interactions on *p*-Mode Frequencies and Line Widths. *Pawan Kumar, Peter Goldreich, & Richard Kerswell.* 427, 483, 116-A5 (1994)

Properties of Acoustic Sources in the Sun. *Pawan Kumar.* 428, 827, 140-E7 (1994)

High-Resolution Observations of the Evershed Effect in Sunspots. *R. A. Shine, A. M. Title, T. D. Tarbell, K. Smith, Z. A. Frank, & Göran Scharmer.* 430, 413, 164-C11 (1994)

A Seismic Model of the Sun's Interior. *W. A. Dziembowski, Philip R. Goode, A. A. Pamyatnykh, & R. Sienkiewicz.* 432, 417, 198-C13 (1994)

Imaging Spectroscopy of the Solar CO Lines at 4.67 Microns. *Han Uitenbroek, R. W. Noyes, & Douglas Rabin.* 432, L67, 200-B5 (1994)

On Comparing Helioseismic Two-dimensional Inversion Methods. *J. Schou, J. Christensen-Dalsgaard, & M. J. Thompson.* 433, 389, 213-B13 (1994)

Waves and Instabilities of a Toroidal Magnetic Flux Tube in a Rotating Star. *A. Ferriz-Mas & M. Schüssler.* 433, 852, 221-F10 (1994)

On the Rotation Rate in the Solar Convection Zone. *Jesper Schou & Timothy M. Brown.* 434, 378, 230-F9 (1994)

Variation of the Frequencies of Very Low *l* *p*-Modes. *C. Régulo, A. Jiménez, P. L. Pallé, F. Pérez Hernández, & T. Roca Cortés.* 434, 384, 230-G4 (1994)

Use of Acoustic Wave Travel-Time Measurements to Probe the Near-Surface Layers of the Sun. *S. M. Jefferies, Y. Osaki, H. Shibahashi, T. L. Duvall, Jr., J. W. Harvey, & M. A. Pomerantz.* 434, 795, 238-G6 (1994)

Solar *p*-Mode Frequencies and Their Dependence on Solar Activity: Recent Results from the BISON Network. *Y. Elsworth, R. Howe, G. R. Isaak, C. P. McLeod, B. A. Miller, R. New, C. C. Speake, & S. J. Wheeler.* 434, 801, 239-A1 (1994)

The Rotation of the Solar Core. *Antonio Jiménez, Fernando Pérez Hernández, Antonio Claret, Pere LLuis Pallé, Clara Régulo, & Teodoro Roca Cortés.* 435, 874, 258-B10 (1994)

Acoustic Mode Mixing in Sunspots. *Sydney D'Silva.* 435, 881, 258-C6 (1994)

Multiple Scattering and Resonant Absorption of *p*-Modes by Fibril Sunspots. *R. Keppens, T. J. Bogdan, & M. Goossens.* 436, 372, 266-E2 (1994)

The Effects of a Hot Outer Atmosphere on Acoustic-Gravity Waves. *Bradley W. Hindman & Ellen G. Zweibel.* 436, 929, 278-D11 (1994)

Solar Neutrinos: Sensitivity to Pre–Main-Sequence Evolution and to the Depth of the Convective Zone. *John N. Bahcall & Ami Glasner.* 437, 485, 289-F13 (1994)

Umbral Oscillations in Sunspots: Absorption of *p*-Modes and Active Region Heating by Mode Conversion. *P. S. Cally, T. J. Bogdan, & E. G. Zweibel.* 437, 505, 290-A11 (1994)

The Sun as a Probe of Varying *G*. *P. Demarque, Lawrence M. Krauss, D. B. Guenther, & David Nydam.* 437, 870, 297-E10 (1994)

The Role of Photospheric Magnetic Fields in the Variation of Solar Oscillation Eigenfrequencies. *C. S. Rosenthal.* 438, 434, 7-D13 (1995)

Forward Analysis of the BBSO Frequency-splitting Coefficients for 1986. *P. R. Wilson & D. Burtonclay.* 438, 445, 7-F1 (1995)

Time-Distance Helioseismology in the Vicinity of Sunspots. *Sydney D'Silva & Thomas L. Duvall, Jr.* 438, 454, 7-G1 (1995)

A Measurement of the Background Solar Velocity Spectrum. *P. L. Pallé, A. Jiménez, F. Pérez Hernández, C. Régulo, T. Roca Cortés, & L. Sánchez.* 441, 952, 75-A9 (1995)

Helioseismic Bounds on the Central Temperature of the Sun. *H. M. Antia & S. M. Chitre.* 442, 434, 83-A2 (1995)

Oscillation-Convection Coupling: Cause of Supergranulation? *Charles L. Wolff.* 443, 423, 100-G12 (1995)

Measurement of High-Degree Solar Oscillation Frequencies. *K. T. Bachmann, T. L. Duvall, Jr., J. W. Harvey, & F. Hill.* 443, 837, 109-D3 (1995)

Uncertainties for Two-dimensional Models of Solar Rotation from Helioseismic Eigenfrequency Splitting. *Christopher R. Genovese, Philip B. Stark, & Michael J. Thompson.* 443, 843, 109-D13 (1995)

A Numerical Study of Resonant Absorption in a Magnetohydrodynamic Cavity Driven by a Broadband Spectrum. *Andrew N. Wright & Graham J. Rickard.* 444, 458, 119-G13 (1995)

Acoustic Wave Propagation in the Solar Atmosphere. I. Rediscussion of the Linearized Theory Including Nonstationary Solutions. *Zhengzhi Wang, Roger K. Ulrich, & Ferdinand V. Coroniti.* 444, 879, 128-E10 (1995)

Dark Lanes in Granulation and the Excitation of Solar Oscillations. *Thomas R. Rimmele, Philip R. Goode, Elliotte Harold, & Robin T. Stebbins.* 444, L119, 131-C4 (1995)

Sensitivity of Solar *g*-Modes to Varying *G* Cosmologies. *D. B. Guenther, Ken Sills, Pierre Demarque, & Lawrence M. Krauss.* 445, 148, 134-D4 (1995)

Updated Seismic Solar Model. *W. A. Dziembowski, Philip R. Goode, A. A. Pamyatnykh, & R. Sienkiewicz.* 445, 509, 139-E6 (1995)

Rotation, Diffusion, and Overshoot in the Sun: Effects on the Oscillation Frequencies and the Neutrino Flux. *Brian Chaboyer, P. Demarque, D. B. Guenther, & M. H. Pinsonneault.* 446, 435, 159-C3 (1995)

Magnetohydrodynamic Waves in a Bounded Inhomogeneous Medium with Prominence-Corona Properties. *R. Oliver & J. L. Ballester.* 448, 444, 198-C8 (1995)

Measurement of the Rotation Rate in the Deep Solar Interior. *S. Tomczyk, J. Schou, & M. J. Thompson.* 448, L57, 200-C5 (1995)

Early Solar Mass Loss, Element Diffusion, and Solar Oscillation Frequencies. *Joyce A. Guzik & Arthur N. Cox.* 448, 905, 207-D7 (1995)

Effects of Weak-to-Moderate Vertical Magnetic Fields on Solar *f*- and *p*-Modes. *P. S. Cally.* 451, 372, 251-A8 (1995)

The Influence of a Vertical Magnetic Field on Oscillations in an Isothermal Stratified Atmosphere. II. *Dipankar Banerjee, S. S. Hasan, & J. Christensen-Dalsgaard.* 451, 825, 258-E11 (1995)

Seismology of the Solar *f*-Mode. I. Basic Signatures of Shearing Velocity Fields. *Pranab Ghosh, H. M. Antia, & S. M. Chitre.* 451, 851, 259-A1 (1995)

Scattering of *p*-Modes by Sunspots. I. Observations. *D. C. Braun.* 451, 859, 259-A12 (1995)

Scattering of *p*-Modes by Sunspots. II. Calculations of Phase Shifts from a Phenomenological Model. *Y. Fan, D. C. Braun, & D.-Y. Chou.* 451, 877, 259-C6 (1995)

Jacket Modes: Solar Acoustic Oscillations Confined to Regions Surrounding Sunspots and Plage. *T. J. Bogdan & P. S. Cally.* 453, 919, 296-F1 (1995)

The Damping of Compressional Alfvén Waves near Magnetic Cusp Configurations. *R. A. Scheper & A. B. Hassam.* 455, 693, 331-D11 (1995)

Velocity Fields within the Solar Convection Zone: Evidence from Oscillation Ring Diagram Analysis of Mount Wilson Dopplergrams. *J. Patrón, F. Hill, E. J. Rhodes, Jr., S. G. Korzennik, & A. Cacciani.* 455, 746, 332-B10 (1995)

SUN: PARTICLE EMISSION

High Coronal Flares and Impulsive Acceleration of Solar Energetic Particles. *E. Cliver & S. Kahler.* 366, L91, 11-E11 (1991)

Solar Abundances from Gamma-Ray Spectroscopy: Comparisons with Energetic Particle, Photospheric, and Coronal Abundances. *R. J. Murphy, R. Ramaty, B. Kozlovsky, & D. V. Reames.* 371, 793, 71-D6 (1991)

Coronal Proton Transport in the Presence of Alfvén Waves and Implications for Gamma-Ray Burst Models. *D. F. Smith & S. H. Brecht.* 373, 289, 89-E9 (1991)

A Catastrophe Mechanism for Coronal Mass Ejections. *T. G. Forbes & P. A. Isenberg.* 373, 294, 89-F1 (1991)

Solar Particle Abundances at Energies Greater than 1 MeV per Nucleon and the Role of Interplanetary Shocks. *H. V. Cane, D. V. Reames, & T. T. von Rosenvinge.* 373, 675, 96-D1 (1991)

Magnetohydrodynamic Turbulence Dissipation and Stochastic Proton Acceleration in Solar Flares. *James A. Miller.* 376, 342, 129-B11 (1991)

Particle Injection following Solar Flares on 1980 May 28 and June 8: Evidence for Different Injection Time-Histories in Impulsive and Gradual Events? *M.-B. Kallenrode & G. Wibberenz.* 376, 787, 136-B8 (1991)

Coronal Mass Ejections and Streamers Associated with the New Cycle Active Regions at Solar Minimum. *S. Kahler.* 378, 398, 155-G9 (1991)

Solar Gamma-Ray-Line Flares, Type II Radio Bursts, and Coronal Mass Ejections. *E. W. Cliver, H. V. Cane, D. J. Forrest, M. J. Koomen, R. A. Howard, & C. S. Wright.* 379, 741, 174-A2 (1991)

Multispacecraft Observations of Solar ^{3}He-rich Events. *D. V. Reames, M.-B. Kallenrode, & R. G. Stone.* 380, 287, 179-G1 (1991)

Maximum Energy of Semi-infinite Magnetic Field Configurations. *P. A. Sturrock.* 380, 655, 186-C8 (1991)

Statistical Properties of Shock-accelerated Ions in the Outer Heliosphere. *L. J. Lanzerotti, R. E. Gold, D. J. Thomson, R. E. Decker, C. G. Maclennan, & S. M. Krimigis.* 380, L93, 188-F10 (1991)

Parametric Study of the Formation of Magnetohydrodynamic Shocks. III. Fast and Slow Shocks. *Y. C. Whang.* 381, 559, 197-E10 (1991)

Large Solar Flares: Analysis of the Events Recorded by the Mont Blanc Neutrino Detector. *M. Aglietta, G. Badino, G. Bologna, C. Castagnoli, A. Castellina, V. L. Dadykin, W. Fulgione, P. Galeotti, F. F. Kalchukov, I. V. Korolkova, P. V. Kortchaguin, V. A. Kudryavtsev, A. S. Malguin,*

L. Periale, V. G. Ryassny, O. G. Ryazhskaya, O. Saavedra, G. Trinchero, S. Vernetto, V. F. Yakushev, & G. T. Zatsepin. 382, 344, 204-D9 (1991)

Interplanetary Transport of Decay Protons from Solar Flare Neutrons. *D. Ruffolo.* 382, 688, 210-B12 (1991)

Energy Spectra of Ions from Impulsive Solar Flares. *D. V. Reames, I. G. Richardson, & K.-P. Wenzel.* 387, 715, 47-E11 (1992)

Superevents: Their Origin and Propagation through the Heliosphere from 0.3 to 35 AU. *Wolfgang Dröge, Reinhold Müller-Mellin, & Edward W. Cliver.* 387, L97, 48-E10 (1992)

High-Energy Gamma-Ray Emission from Pion Decay in a Solar Flare Magnetic Loop. *Natalie Mandzhavidze & Reuven Ramaty.* 389, 739, 70-E6 (1992)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. II. On the Energy Dependence of the Onset of New Modulation in 1987. *J. A. Le Roux & M. S. Potgieter.* 390, 661, 83-E1 (1992)

The Influence of the Large-Scale Interplanetary Shock Structure on a Low-Energy Particle Event. *A. M. Heras, B. Sanahuja, Z. K. Smith, T. Detman, & M. Dryer.* 391, 359, 90-C13 (1992)

Composition and Azimuthal Spread of Solar Energetic Particles from Impulsive and Gradual Flares. *M.-B. Kallenrode, E. W. Cliver, & G. Wibberenz.* 391, 370, 90-D12 (1992)

The Production of ^{3}He and Heavy Ion Enrichments in ^{3}He-rich Flares by Electromagnetic Hydrogen Cyclotron Waves. *M. Temerin & I. Roth.* 391, L105, 100-B1 (1992)

Probing the Heliosphere with Energetic Hydrogen Atoms. *K. C. Hsieh, K. L. Shih, J. R. Jokipii, & S. Grzedzielski.* 393, 756, 125-C1 (1992)

Stochastic Gyroresonant Electron Acceleration in a Low-Beta Plasma. I. Interaction with Parallel Transverse Cold Plasma Waves. *Jürgen Steinacker & James A. Miller.* 393, 764, 125-C10 (1992)

Propagation Conditions of Relativistic Electrons in the Inner Heliosphere. *M.-B. Kallenrode, G. Wibberenz, & S. Hucke.* 394, 351, 132-C11 (1992)

Ion Injection and Fermi Acceleration at Earth's Bow Shock: The 1984 September 12 Event Revisited. *M. Scholer, K. J. Trattner, & H. Kucharek.* 395, 675, 151-F1 (1992)

Gamma Rays from Pion Decay: Evidence for Long-Term Trappings of Particles in Solar Flares. *Natalie Mandzhavidze & Reuven Ramaty.* 396, L111, 167-F7 (1992)

Kinetic Description of Electron Beams in the Solar Chromosphere. *Daniel O. Gómez & Pablo J. D. Mauas.* 398, 682, 192-E6 (1992)

Stochastic Gyroresonant Electron Acceleration in a Low-Beta Plasma. II. Implications of Thermal Effects in a Solar Flare Plasma. *James A. Miller & Jürgen Steinacker.* 399, 284, 198-F12 (1992)

Observation of Solar Neutrons Associated with the Large Flare on 1991 June 4. *Y. Muraki, K. Murakami, M. Miyazaki, K. Mitsui, S. Shibata, S. Sakakibara, T. Sakai, T. Takahashi, T. Yamada, & K. Yamaguchi.* 400, L75, 220-F1 (1992)

The Energy Spectra of Solar Flare Hydrogen, Helium, Oxygen, and Iron: Evidence for Stochastic Acceleration. *J. E. Mazur, G. M. Mason, B. Klecker, & R. E. McGuire.* 401, 398, 226-A5 (1992)

The Abundances of Hydrogen, Helium, Oxygen, and Iron Accelerated in Large Solar Particle Events. *J. E. Mazur, G. M. Mason, B. Klecker, & R. E. McGuire.* 404, 810, 39-A8 (1993)

Coronal Proton Acceleration by Magnetohydrodynamic Waves and Related Proton Transport. *D. F. Smith & S. H. Brecht.* 406, 298, 58-F10 (1993)

Quasi-linear Theory and the Phenomenology of Interplanetary Solar Particle Transport. *Wolfgang Dröge, Ulrich Achatz, Wolfgang Wanner, Reinhard Schlickeiser, & Gerd Wibberenz.* 407, L95, 82-G1 (1993)

Bidirectional $\sim$ 1 MeV amu^{-1} Ion Intervals in 1973–1991 Observed by the Goddard Space Flight Center Instruments on *IMP 8* and *ISEE 3/ICE*. *I. G. Richardson & D. V. Reames.* 85, 411, 12-G7 (1993)

Lower Hybrid Resonance Acceleration of Electrons and Ions in Solar Flares and the Associated Microwave Emission. *K. G. McClements, R. Bingham, J. J. Su, J. M. Dawson, & D. S. Spicer.* 409, 465, 102-F9 (1993)

Magnetic Field Power Density Spectra during "Scatter-free" Solar Particle Events. *L. C. Tan & G. M. Mason.* 409, L29, 104-E1 (1993)

Solar Neutron and Proton Production during the 1990 May 24 Cosmic-Ray Flare Increases. *H. Debrunner, J. A. Lockwood, & J. M. Ryan.* 409, 822, 109-D1 (1993)

The Free Energies of Partially Open Coronal Magnetic Fields. *B. C. Low & D. F. Smith.* 410, 412, 117-B10 (1993)

Ion Acceleration and Abundance Enhancements by Electron Beam Instabilities in Impulsive Solar Flares. *James A. Miller & Adolfo F. Viñas.* 412, 386, 146-G12 (1993)

A Doppler Dimming Determination of Coronal Outflow Velocity. *Leonard Strachan, John L. Kohl, Heinz Weiser, George L. Withbroe, & Richard H. Munro.* 412, 410, 147-B13 (1993)

Simulations of the Ca XIX Spectral Emission from a Flaring Solar Coronal Loop. II. Impulsive Heating by Accelerated Electrons. *E. Antonucci, M. A. Dodero, R. Martin, G. Peres, F. Reale, & S. Serio.* 413, 786, 166-B11 (1993)

Ion Acceleration in Impulsive Solar Flares. *Jürgen Steinacker, Uwe Jaekel, & Reinhard Schlickeiser.* 415, 342, 189-C1 (1993)

Quasi-periodic Particle Injection into Coronal Loops. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Victor Gaizauskas.* 416, 857, 214-B5 (1993)

The Timing of Electron Beam Signatures in Hard X-Ray and Radio: Solar Flare Observations by BATSE/*Compton Gamma-Ray Observatory* and PHOENIX. *Markus J. Aschwanden, Arnold O. Benz, & Richard A. Schwartz.* 417, 790, 229-C3 (1993)

Energy Requirements for Opening the Solar Corona. *Richard Wolfson.* 419, 382, 251-A1 (1993)

Temperature and Hard X-Ray Signatures for Energetic Proton Events. *Howard A. Garcia.* 420, 422, 6-B3 (1994)

Neutral Hydrogen in the Solar Wind Acceleration Region. *Espen Lyngdal Olsen, Egil Leer, & Thomas E. Holzer.* 420, 913, 14-C4 (1994)

A Survey of Bidirectional $\geq$ 1 MeV Ion Flows during the *Helios 1* and *Helios* 2 Missions: Observations from the Goddard Space Flight Center Instruments. *I. G. Richardson.* 420, 926, 14-D5 (1994)

A Comparison of Nonrelativistic Electron Escape Efficiencies for Solar Flares with and without Coronal Mass Ejections. *S. W. Kahler, E. I. Daibog, V. G. Kurt, & V. G. Stolpovskii.* 422, 394, 35-A1 (1994)

Transport of Solar Energetic Particles. *Wolfgang Dröge.* 90, 567, 10-G3 (1994)

Energetic-Particle Abundances in Impulsive Solar Flare Events. *D. V. Reames, J. P. Meyer, & T. T. von Rosenvinge.* 90, 649, 11-G7 (1994)

Focused Interplanetary Transport of $\sim$ 1MeV Solar Energetic Protons through Self-generated Alfvén Waves. *C. K. Ng & D. V. Reames.* 424, 1032, 77-F7 (1994)

New Description of Charged Particle Propagation in Random Magnetic Fields. *James A. Earl.* 425, 331, 84-D7 (1994)

Injection Profiles of Solar Energetic Particles as Functions of Coronal Mass Ejection Heights. *S. Kahler.* 428, 837, 140-F5 (1994)

Evidence of Additional Production of High-Energy Neutrons during the Solar Flare on 1991 June 4. *A. Struminsky, M. Matsuoka, & K. Takahashi.* 429, 400, 149-A13 (1994)

On the Correlation of Solar Surface Magnetic Flux with Solar Neutrino Capture Rate. *David S. Oakley, Herschel B. Snodgrass, Roger K. Ulrich, & Toni L. VanDeKop.* 437, L63, 292-C7 (1994)

A Dynamical Model of Magnetic Clouds. *Tyan Yeh.* 438, 975, 17-E7 (1995)

The Propagation of Solar Energetic Protons: Comparative Studies in Two Cases with Markedly Different Scattering Conditions. *J. F. Valdés-Galicia, W. Wanner, M.-B. Kallenrode, & G. Wibberenz.* 439, 482, 27-F8 (1995)

Effect of Adiabatic Deceleration on the Focused Transport of Solar Cosmic Rays. *D. Ruffolo.* 442, 861, 92-A12 (1995)

The ^{3}He/^{4}He Ratios for Solar Energetic Particle Events during the *Combined Release and Radiation Effects Satellite* Mission. *Jiasheng Chen, T. Gregory Guzik, & John P. Wefel.* 442, 875, 92-C1 (1995)

Shear-induced Opening of the Coronal Magnetic Field. *Richard Wolfson.* 443, 810, 109-A11 (1995)

Flare Plasma Dynamics Observed with the *Yohkoh* Bragg Crystal Spectrometer. III. Spectral Signatures of Electron-Beam–heated Atmospheres. *John T. Mariska.* 444, 478, 120-B12 (1995)

The Mean Ionic Charge State of Solar Energetic Fe Ions above 200 MeV per Nucleon. *A. J. Tylka, P. R. Boberg, J. H. Adams, Jr., L. P. Beahm, W. F. Dietrich, & T. Kleis.* 444, L109, 131-B1 (1995)

Three Low-Energy Particle Events: Modeling the Influence of the Parent Interplanetary Shock. *A. M. Heras, B. Sanahuja, D. Lario, Z. K. Smith, T. Detman, & M. Dryer.* 445, 497, 139-D4 (1995)

Alfvén Turbulence Dissipation in Proton Injection and Acceleration in Solar Flares. *Dean F. Smith & James A. Miller.* 446, 390, 158-E12 (1995)

Derivation of Analytical Particle Spectra from the Solution of the Transport Equation by the WKBJ Method. *A. Gallegos-Cruz & J. Pérez-Peraza.* 446, 400, 158-F11 (1995)

The Velocity Differential Emission Measure: Diagnostic of Bulk Plasma Motion in Solar Flares. *E. K. Newton, A. G. Emslie, & J. T. Mariska.* 447, 915, 188-E1 (1995)

Electron Time-of-Flight Differences in Solar Flares. *Markus J. Aschwanden, Richard A. Schwartz, & Daniel M. Alt.* 447, 923, 188-E12 (1995)

Heavy Ion Acceleration beyond 10 MeV per Nucleon in Impulsive Solar Flares. *J. E. Mazur, G. M. Mason, & B. Klecker.* 448, L53, 200-B11 (1995)

A Reconciliation of the Discrepancy on the Cosmic-Ray Interplanetary Diffusion Mean Free Path. *L. Dennis Zhang.* 449, 386, 215-D6 (1995)

Solar ^{3}He-rich Events and Ion Acceleration in Two Stages. *T. X. Zhang.* 449, 916, 225-D6 (1995)

Charge State Measurements of Solar Energetic Particles Observed with *SAMPEX*. *G. M. Mason, J. E. Mazur, M. D. Looper, & R. A. Mewaldt.* 452, 901, 277-B7 (1995)

Stochastic Proton Acceleration by Cascading Alfvén Waves in Impulsive Solar Flares. *James A. Miller & D. Aaron Roberts.* 452, 912, 277-C7 (1995)

Gamma-Ray Measurements of Flare-to-Flare Variations in Ambient Solar Abundances. *Gerald H. Share & Ronald J. Murphy.* 452, 933, 277-E4 (1995)

Pitch Angle Diffusion Coefficient in an Extended Quasi-linear Theory. *C. K. Ng & D. V. Reames.* 453, 890, 296-C3 (1995)

The Escape of Magnetic Flux from the Sun. *J. W. Bieber & D. M. Rust.* 453, 911, 296-E3 (1995)

Fractionation of Xe, Kr, and Ar in the Solar Corpuscular Radiation Deduced by Closed System Etching of Lunar Soils. *Rainer Wieler & Heinrich Baur.* 453, 987, 297-E7 (1995)

Coronal Heating and Solar Wind Energy Balance. *Ørnulf Sandbæk & Egil Leer.* 454, 486, 306-A7 (1995)

Solar Electron Beams Detected in Hard X-Rays and Radio Waves. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Richard A. Schwartz.* 455, 347, 322-G12 (1995)

Accuracy, Uncertainties, and Delay Distribution of Electron Time-of-Flight Measurements in Solar Flares. *Markus J. Aschwanden & Richard A. Schwartz.* 455, 699, 331-E6 (1995)

SUN: PHOTOSPHERE

Localized Sources of Propagating Acoustic Waves in the Solar Photosphere. *Timothy M. Brown, Thomas J. Bogdan, Bruce W. Lites, & John H. Thomas.* 394, L65, 139-E7 (1992)

Electric Currents and Coronal Heating in NOAA Active Region 6952. *T. R. Metcalf, R. C. Canfield, H. S. Hudson, D. L. Mickey, J.-P. Wülser, P. C. H. Martens, & S. Tsuneta.* 428, 860, 141-A10 (1994)

Dark Lanes in Granulation and the Excitation of Solar Oscillations. *Thomas R. Rimmele, Philip R. Goode, Elliotte Harold, & Robin T. Stebbins.* 444, L119, 131-C4 (1995)

On the Dynamics of Bright Features in Sunspot Umbrae. *Michal Sobotka, Jos/'e A. Bonet, Manuel V/'azquez, & Arnold Hanslmeier.* 447, L133, 191-D1 (1995)

SUN: PLAGES

Weak Magnetic Fields and Solar Irradiance Variations. *J. K. Lawrence, G. A. Chapman, & S. R. Walton.* 375, 771, 122-C1 (1991)

Large-Scale Features of the Sun at 20 Centimeter Wavelength. *N. Gopalswamy, S. M. White, & M. R. Kundu.* 379, 366, 167-E9 (1991)

Multicolor Continuum Analysis of the Solar Granulation in Quiet and Active Regions. *C. U. Keller & S. Koutchmy.* 379, 751, 174-B1 (1991)

SUN: PROMINENCES

A Twisted Flux-Tube Model for Solar Prominences. III. Magnetic Support. *C. Ridgway, E. R. Priest, & T. Amari.* 367, 321, 16-A10 (1991)

Opacity Effects on the Radiative Losses of Coronal Loops. *N. P. M. Kuin & A. I. Poland.* 370, 763, 57-G11 (1991)

Evolution to Nonequilibrium in Simple Models of Prominence Filaments. *Ellen G. Zweibel.* 376, 761, 135-G1 (1991)

A Model for the Formation of Solar Prominences. *S. K. Antiochos & J. A. Klimchuk.* 378, 372, 155-E6 (1991)

Prominence Sheets Supported by Constant-Current Force-free Fields. I. Imposition of Normal Magnetic Field Components at the Current Sheet and the Photosphere. *C. Ridgway, T. Amari, & E. R. Priest.* 378, 773, 162-A1 (1991)

Large-Scale Features of the Sun at 20 Centimeter Wavelength. *N. Gopalswamy, S. M. White, & M. R. Kundu.* 379, 366, 167-E9 (1991)

Prominence Sheets Supported by Constant-Current Force-free Fields. II. Imposition of Normal Photospheric Field Component and Prominence Surface Current. *C. Ridgway, T. Amari, & E. R. Priest.* 385, 718, 22-A10 (1992)

Weighted Current Sheets Supported in Normal and Inverse Configurations: A Model for Prominence Observations. *P. Démoulin & T. G. Forbes.* 387, 394, 41-G5 (1992)

The Effect of Line Tying on Parker's Instability. *Ellen G. Zweibel & David L. Bruhwiler.* 399, 318, 199-C11 (1992)

Magnetohydrodynamic Waves in a Solar Prominence. *R. Oliver, J. L. Ballester, A. W. Hood, & E. R. Priest.* 400, 369, 213-E1 (1992)

The He II 1640 Å Multiplet Observed from Solar Prominences. *J. M. Laming & U. Feldman.* 403, 434, 19-B11 (1993)

Three-dimensional Structures of Magnetostatic Atmospheres. VI. Examples of Coupled Electric Current Systems. *B. C. Low.* 408, 693, 93-G7 (1993)

Force-free Magnetic Fields with Singular Current-Density Surfaces. *B. C. Low.* 409, 798, 109-A12 (1993)

Oscillations of a Quiescent Solar Prominence Embedded in a Hot Corona. *R. Oliver, J. L. Ballester, A. W. Hood, & E. R. Priest.* 409, 809, 109-B12 (1993)

Formation, Levitation, and Stability of Prominences in the Magnetized Solar Atmosphere. *J. F. Drake, Y. Mok, & G. Van Hoven.* 413, 416, 161-D9 (1993)

Catastrophic Evolution of a Force-free Flux Rope: A Model for Eruptive Flares. *P. A. Isenberg, T. G. Forbes, & P. Démoulin.* 417, 368, 222-B7 (1993)

A Study of Solar Prominences near $\lambda = 1$ Millimeter. *T. S. Bastian, M. W. Ewell, Jr., & H. Zirin.* 418, 510, 237-C13 (1993)

The Magnetic Field of Solar Prominences. *S. K. Antiochos, R. B. Dahlburg, & J. A. Klimchuk.* 420, L41, 7-F1 (1994)

A Necessary Condition for the Stability of a Class of Three-dimensional Laminated Equilibria. *A. W. Longbottom, J. P. Melville, & A. W. Hood.* 423, 496, 52-C11 (1994)

Stability Criteria for Massive Current Sheets in Two-dimensional Potential Magnetic Fields. *J. J. Aly, S. Colombi, & T. Lepeltier.* 432, 793, 205-G9 (1994)

Abundance Ratios of Oxygen, Neon, and Magnesium in Solar Active Regions and Flares: The FIP Effect. *K. G. Widing & U. Feldman.* 442, 446, 83-B3 (1995)

Magnetostatic Structures of the Solar Corona. II. The Magnetic Topology of Quiescent Prominences. *B. C. Low & J. R. Hundhausen.* 443, 818, 109-B9 (1995)

The Possible Ascent of a Closed Magnetic System through the Photosphere. *B. W. Lites, B. C. Low, V. Martínez Pillet, P. Seagraves, A. Skumanich, Z. A. Frank, R. A. Shine, & S. Tsuneta.* 446, 877, 168-B13 (1995)

Magnetohydrodynamic Waves in a Bounded Inhomogeneous Medium with Prominence-Corona Properties. *R. Oliver & J. L. Ballester.* 448, 444, 198-C8 (1995)

SUN: RADIO RADIATION

Strong Magnetic Fields and Inhomogeneity in the Solar Corona. *S. M. White, M. R. Kundu, & N. Gopalswamy.* 366, L43, 6-E7 (1991)

First Interferometric Observations of Solar Microwave Millisecond Spike Bursts. *Dale E. Gary, G. J. Hurford, & D. J. Flees.* 369, 255, 39-B1 (1991)

A Search for the 154 Day Periodicity in the Occurrence Rate of Solar Flares Using Ottawa 2.8 GHz Burst Data, 1955–1990. *J. N. Kile & E. W. Cliver.* 370, 442, 52-F13 (1991)

Solar Radio Microbursts at 1.4 GHz. *T. S. Bastian.* 370, L49, 53-F11 (1991)

The Microwave Brightness Temperature Spectrum of the Quiet Sun. *H. Zirin, B. M. Baumert, & G. J. Hurford.* 370, 779, 58-B12 (1991)

Solar and Stellar Radio Spikes: Limits on the Saturation of the Electron-Cyclotron Maser. *Donat G. Wentzel & Markus J. Aschwanden.* 372, 688, 84-C1 (1991)

Direct Radiation from a Strong DC Electric Field. *Donat G. Wentzel.* 373, 285, 89-E3 (1991)

Coronal Magnetic Structures Observing Campaign. I. Simultaneous Microwave and Soft X-Ray Observations of Active Regions at the Solar Limb. *N. Nitta, S. M. White, M. R. Kundu, N. Gopalswamy, G. D. Holman, J. W. Brosius, J. T. Schmelz, J. L. R. Saba, & K. T. Strong.* 374, 374, 102-F11 (1991)

Telescope Beam-Profile Diagnostics and the Solar Limb. *Charles A. Lindsey & Thomas L. Roellig.* 375, 414, 116-A9 (1991)

First Observations of Macrospicules at 4.8 GHz at the Solar Limb in Polar Coronal Holes. *Shadia Rifai Habbal & Raymond D. Gonzalez.* 376, L25, 130-D1 (1991)

Multi–Wave Band *SMM*–VLA Observations of an M2 Flare and an Associated Coronal Mass Ejection. *Robert F. Willson, Joan T. Schmelz, Raymond D. Gonzalez, Kenneth R. Lang, & Kermit L. Smith.* 378, 360, 155-D6 (1991)

Large-Scale Features of the Sun at 20 Centimeter Wavelength. *N. Gopalswamy, S. M. White, & M. R. Kundu.* 379, 366, 167-E9 (1991)

Solar Gamma-Ray-Line Flares, Type II Radio Bursts, and Coronal Mass Ejections. *E. W. Cliver, H. V. Cane, D. J. Forrest, M. J. Koomen, R. A. Howard, & C. S. Wright.* 379, 741, 174-A2 (1991)

Emission at Cyclotron Harmonics Due to Coalescence of z-Mode Waves. *D. B. Melrose.* 380, 256, 179-C1 (1991)

Multispacecraft Observations of Solar ^{3}He-rich Events. *D. V. Reames, M.-B. Kallenrode, & R. G. Stone.* 380, 287, 179-G1 (1991)

The Solar Chromospheric Supergranular Network in 850 Micron Radiation. *Charles A. Lindsey & John T. Jefferies.* 383, 443, 217-G1 (1991)

Multifrequency Observations of a Remarkable Solar Radio Burst. *S. M. White, M. R. Kundu, T. S. Bastian, D. E. Gary, G. J. Hurford, T. Kucera, & J. H. Bieging.* 384, 656, 10-C5 (1992)

Coronal Magnetic Structures Observing Campaign. IV. Multiwaveband Observations of Sunspot and Plage-associated Coronal Emission. *Jeffrey W. Brosius, Robert F. Willson, Gordon D. Holman, & Joan T. Schmelz.* 386, 347, 28-E1 (1992)

High Dynamic Range Multifrequency Radio Observations of a Solar Active Region. *S. M. White, M. R. Kundu, & N. Gopalswamy.* 78, 599, 11-A13 (1992)

Connection between Ambient Density Fluctuations and Clumpy Langmuir Waves in Type III Radio Sources. *P. A. Robinson, I. H. Cairns, & D. A. Gurnett.* 387, L101, 48-F1 (1992)

Estimation of the Mass of a Coronal Mass Ejection from Radio Observations. *N. Gopalswamy & M. R. Kundu.* 390, L37, 78-F1 (1992)

Decimetric Solar Type U Bursts: VLA and PHOENIX Observations. *Markus J. Aschwanden, T. S. Bastian, A. O. Benz, & J. W. Brosius.* 391, 380, 90-E13 (1992)

A Thermal/Nonthermal Model for Solar Microwave Bursts. *Stephen G. Benka & Gordon D. Holman.* 391, 854, 98-E7 (1992)

Coronal Magnetic Structures Observing Campaign. II. Magnetic and Plasma Properties of a Solar Active Region. *J. T. Schmelz, G. D. Holman, J. W. Brosius, & R. D. Gonzalez.* 399, 733, 207-B1 (1992)

Band Splitting in Solar Type II Radio Bursts. *R. A. Treumann & J. LaBelle.* 399, L167, 208-E7 (1992)

Measurement of the Solar Limb Brightness Profile at 3 Millimeters during the Total Eclipse of 1991 July 11. *L. Belkora, G. J. Hurford, Dale E. Gary, & D. P. Woody.* 400, 692, 219-B1 (1992)

The Coevolution of Decimetric Millisecond Spikes and Hard X-Ray Emission during Solar Flares. *Markus J. Aschwanden & Manuel Güdel.* 401, 736, 231-F1 (1992)

Plasma Emission from Isotropic Langmuir Turbulence: Are Radio Microbursts Structureless? *N. Gopalswamy.* 402, 326, 5-B13 (1993)

Submillimeter Observations of the 1991 July 11 Total Solar Eclipse. *M. W. Ewell, Jr., H. Zirin, J. B. Jensen, & T. S. Bastian.* 403, 426, 19-B1 (1993)

A New Explanation of Solar Radio Millisecond "Spikes." *Donat G. Wentzel.* 407, 380, 73-F11 (1993)

Clumpy Langmuir Waves in Type III Radio Sources: Comparison of Stochastic-Growth Theory with Observations. *P. A. Robinson, I. H. Cairns, & D. A. Gurnett.* 407, 790, 80-C9 (1993)

Dynamics of Langmuir and Ion-Sound Waves in Type III Solar Radio Sources. *P. A. Robinson, A. J. Willes, & I. H. Cairns.* 408, 720, 94-B9 (1993)

Lower Hybrid Resonance Acceleration of Electrons and Ions in Solar Flares and the Associated Microwave Emission. *K. G. McClements, R. Bingham, J. J. Su, J. M. Dawson, & D. S. Spicer.* 409, 465, 102-F9 (1993)

Simultaneous Observations of Solar Plage with the Solar Extreme Ultraviolet Rocket Telescope and Spectrograph (SERTS), the VLA, and the Kitt Peak Magnetograph. *Jeffrey W. Brosius, Joseph M. Davila, William T. Thompson, Roger J. Thomas, Gordon D. Holman, N. Gopalswamy, Stephen M. White, Mukul R. Kundu, & Harrison P. Jones.* 411, 410, 132-E4 (1993)

Multiple Wavelength Observations of an Off-Limb Eruptive Solar Flare. *T. A. Kucera, G. A. Dulk, A. L. Kiplinger, R. M. Winglee, T. S. Bastian, & M. Graeter.* 412, 853, 154-D10 (1993)

VLA-BATSE Observations of an Intense Solar Decimetric and Hard X-Ray Burst. *Robert F. Willson.* 413, 798, 166-C11 (1993)

The Center-to-Limb Brightness Variation of the Sun at $\lambda = 850$ Microns. *T. S. Bastian, M. W. Ewell, Jr., & H. Zirin.* 415, 364, 189-D13 (1993)

Evaluation of Emission Mechanisms at ω_{pe} Using *Ulysses* Observations of Type III Bursts. *G. Thejappa, D. Lengyel-Frey, R. G. Stone, & M. L. Goldstein.* 416, 831, 213-G1 (1993)

Quasi-periodic Particle Injection into Coronal Loops. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Victor Gaizauskas.* 416, 857, 214-B5 (1993)

The Timing of Electron Beam Signatures in Hard X-Ray and Radio: Solar Flare Observations by BATSE/*Compton Gamma-Ray Observatory* and PHOENIX. *Markus J. Aschwanden, Arnold O. Benz, & Richard A. Schwartz.* 417, 790, 229-C3 (1993)

Particle Acceleration and Flare Triggering in Large-Scale Magnetic Loops Joining Widely Spaced Active Regions. *Robert F. Willson, Kenneth R. Lang, & Dale E. Gary.* 418, 490, 237-B1 (1993)

Stochastic Growth Theory of Type III Solar Radio Emission. *P. A. Robinson & I. H. Cairns.* 418, 506, 237-C8 (1993)

A Study of Solar Prominences near $\lambda = 1$ Millimeter. *T. S. Bastian, M. W. Ewell, Jr., & H. Zirin.* 418, 510, 237-C13 (1993)

Magnetospheres of Solar Active Regions Inferred from Spectral-Polarization Observations with High Spatial Resolution. *K. R. Lang, R. F. Willson, J. N. Kile, J. Lemen, K. T. Strong, V. L. Bogod, G. B. Gelfreikh, B. I. Ryabov, S. R. Hafizov, V. E. Abramov, & S. V. Svetkov.* 419, 398, 251-B7 (1993)

Coronal Temperature, Density, and Magnetic Field Maps of a Solar Active Region Using the Owens Valley Solar Array. *Dale E. Gary & G. J. Hurford.* 420, 903, 14-B6 (1994)

Dynamics and Efficiency of Type III Solar Radio Emission. *P. A. Robinson, I. H. Cairns, & A. J. Willes.* 422, 870, 42-F5 (1994)

Electron Acceleration at Quasi-parallel Shocks in the Solar Corona and Its Signature in Solar Type II Radio Bursts. *G. Mann & H. Lühr.* 90, 577, 11-A1 (1994)

Strong Double Layers, Existence Criteria, and Annihilation: An Application to Solar Flares. *Martin Volwerk & Jan Kuijpers.* 90, 589, 11-B2 (1994)

Millimeter, Microwave, Hard X-Ray, and Soft X-Ray Observations of Energetic Electron Populations in Solar Flares. *M. R. Kundu, S. M. White, N. Gopalswamy, & J. Lim.* 90, 599, 11-C1 (1994)

Solar Hard X-Ray and Gamma-Ray Observations from *Granat*. *N. Vilmer.* 90, 611, 11-D1 (1994)

Pulsed Acceleration in Solar Flares. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Mukul R. Kundu.* 90, 631, 11-E11 (1994)

Microwave Burst Timescales and Solar Flare Acceleration Processes. *A. Krüger, B. Kliem, J. Hildebrandt, & V. V. Zaitsev.* 90, 683, 12-C3 (1994)

Microwave Type III-RS Bursts. *Hanumant S. Sawant, Francisco C. R. Fernandes, & José Ângelo C. F. Neri.* 90, 689, 12-C11 (1994)

Solar Simple Bursts Observed with High Spectral Resolution in the 18–23 GHz Range. *H. S. Sawant, R. R. Rosa, J. R. Cecatto, & N. Gopalswamy.* 90, 693, 12-D2 (1994)

Another Clue About Particle Acceleration in Impulsive Hard X-Ray/Microwave Bursts. *David Batchelor.* 90, 697, 12-D7 (1994)

Efficiency for Electron Acceleration in Solar Energy Release Region as Estimated in the Context of Plasma Mechanism of Radio Emission. *B. N. Levin, V. M. Fridman, & O. A. Sheiner.* 90, 713, 12-E13 (1994)

Nonthermal Radio Emission Associated with a Coronal Disconnection Event. *N. Gopalswamy, M. R. Kundu, & O. C. St. Cyr.* 424, L135, 79-F3 (1994)

The Coronal Electron Density Distribution Determined from Dual-Frequency Ranging Measurements during the 1991 Solar Conjunction of the *Ulysses* Spacecraft. *M. K. Bird, H. Volland, M. Pätzold, P. Edenhofer, S. W. Asmar, & J. P. Brenkle.* 426, 373, 100-G5 (1994)

VLA Stereoscopy of Solar Active Regions. I. Method and Tests. *Markus J. Aschwanden & T. S. Bastian.* 426, 425, 101-E2 (1994)

VLA Stereoscopy of Solar Active Regions. II. Altitude, Relative Motion, and Center-to-Limb Darkening of 20 Centimeter Emission. *Markus J. Aschwanden & T. S. Bastian.* 426, 434, 101-E13 (1994)

Angular Scattering of Solar Radio Emission by Coronal Turbulence. *T. S. Bastian.* 426, 774, 108-B3 (1994)

Nonthermal Processes in Flaring X-Ray–bright Points. *M. R. Kundu, K. T. Strong, M. Pick, S. M. White, H. S. Hudson, K. L. Harvey, & S. R. Kane.* 427, L59, 118-A1 (1994)

Detection of Linear Polarization in the Microwave Emission of Solar Active Regions. *C. E. Alissandrakis & F. Chiuderi-Drago.* 428, L73, 142-G8 (1994)

Imaging Spectroscopy of Solar Microwave Radiation. I. Flaring Emission. *Jeremy Lim, Dale E. Gary, Gordon J. Hurford, & James R. Lemen.* 430, 425, 164-E13 (1994)

Coherent-Phase or Random-Phase Acceleration of Electron Beams in Solar Flares. *Markus J. Aschwanden, Arnold O. Benz, & Maria L. Montello.* 431, 432, 181-D7 (1994)

Detection of 17 GHz Radio Emission from X-Ray–bright Points. *M. R. Kundu, K. Shibasaki, S. Enome, & N. Nitta.* 431, L155, 192-E13 (1994)

Microwave Spectral Imaging, Hα, and Hard X-Ray Observations of a Solar Limb Flare. *H. Wang, D. E. Gary, J. Lim, & R. A. Schwartz.* 433, 379, 213-A9 (1994)

A Multisource Limb Flare Observed at Multiple Radio Wavelengths. *T. A. Kucera, G. A. Dulk, D. E. Gary, & T. S. Bastian.* 433, 875, 222-A11 (1994)

Coalescence of Two Current Loops with a Kink Instability Simulated by a Three-dimensional Electromagnetic Particle Code. *Ken-Ichi Nishikawa, Jun-ichi Sakai, Jie Zhao, Torsten Neubert, & Oscar Buneman.* 434, 363, 230-D7 (1994)

Transition to Turbulence in Solar Surges. *Russell B. Dahlburg & Judith T. Karpen.* 434, 766, 238-D1 (1994)

Coronal Magnetic Structures Observing Campaign. III. Coronal Plasma and Magnetic Field Diagnostics Derived from Multiwaveband Active Region Observations. *J. T. Schmelz, G. D. Holman, J. W. Brosius, & R. F. Willson.* 434, 786, 238-F8 (1994)

Gamma-Ray and Millimeter-Wave Emissions from the 1991 June X-Class Solar Flares. *Reuven Ramaty, Richard A. Schwartz, Shinzo Enome, & Hiroshi Nakajima.* 436, 941, 278-E13 (1994)

Chromospheric Evaporation and Decimetric Radio Emission in Solar Flares. *Markus J. Aschwanden & Arnold O. Benz.* 438, 997, 17-G7 (1995)

Angular Scattering of Radio Waves: Implications for Mode Coupling in the Solar Corona. *T. S. Bastian.* 439, 494, 27-G9 (1995)

The 1991 October 24 Flare: A Challenge for Standard Models. *J.-F. de La Beaujardière, R. C. Canfield, H. S. Hudson, J.-P. Wülser, L. Acton, T. Kosugi, & S. Masuda.* 440, 386, 46-E3 (1995)

Sequences of Correlated Hard X-Ray and Type III Bursts during Solar Flares. *Markus J. Aschwanden, Maria L. Montello, Brian R. Dennis, & Arnold O. Benz.* 440, 394, 46-E14 (1995)

Metric Type III Bursts from a Flaring X-Ray Bright Point near an Active Region. *M. R. Kundu, J. P. Raulin, M. Pick, & K. T. Strong.* 444, 922, 129-B3 (1995)

The Microwave and Hα Sources of the 1992 January 13 Flare. *H. Wang, D. E. Gary, H. Zirin, T. Kosugi, R. A. Schwartz, & G. Linford.* 444, L115, 131-B9 (1995)

Radio Interferometer Observations of Solar Wind Turbulence from the Orbit of *Helios* to the Solar Corona. *Steven R. Spangler & Takayuki Sakurai.* 445, 999, 149-B10 (1995)

Detection of Nonthermal Radio Emission from Coronal X-Ray Jets. *M. R. Kundu, J. P. Raulin, N. Nitta, H. S. Hudson, M. Shimojo, K. Shibata, & A. Raoult.* 447, L135, 191-D7 (1995)

A Comparison of Active Region Temperatures and Emission Measures Observed in Soft X-Rays and Microwaves and Implications for Coronal Heating. *J. A. Klimchuk & D. E. Gary.* 448, 925, 207-F6 (1995)

Detectability of Electrostatic Decay Products in *Ulysses* and *Galileo* Observations of Type III Solar Radio Sources. *Iver H. Cairns.* 449, L95, 217-E8 (1995)

The Radio Properties of Solar Active Region Soft X-Ray Transient Brightenings. *S. M. White, M. R. Kundu, T. Shimizu, K. Shibasaki, & S. Enome.* 450, 435, 234-A5 (1995)

Coordinated OVRO, BATSE, *Yohkoh*, and BBSO Observations of the 1992 June 25 M1.4 Flare. *H. Wang, D. E. Gary, H. Zirin, R. A. Schwartz, T. Sakao, T. Kosugi, & K. Shibata.* 453, 505, 288-A9 (1995)

The Sun in Submillimeter and Near-Millimeter Radiation. *C. Lindsey, G. Kopp, T. A. Clark, & G. Watt.* 453, 511, 288-B7 (1995)

Submillimeter Radiometry of Sunspots. *C. Lindsey & G. Kopp.* 453, 517, 288-C9 (1995)

Ion Acoustic Wave Frequencies and Onset Times during Type III Solar Radio Bursts. *Iver H. Cairns & P. A. Robinson.* 453, 959, 297-C1 (1995)

Solar Rotation Stereoscopy in Microwaves. *Markus J. Aschwanden, Jeremy Lim, Dale E. Gary, & James A. Klimchuk.* 454, 512, 306-C12 (1995)

Microwave and Hard X-Ray Observations of Footpoint Emission from Solar Flares. *M. R. Kundu, N. Nitta, S. M. White, K. Shibasaki, S. Enome, T. Sakao, T. Kosugi, & T. Sakurai.* 454, 522, 306-D11 (1995)

Solar Electron Beams Detected in Hard X-Rays and Radio Waves. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Richard A. Schwartz.* 455, 347, 322-G12 (1995)

VLA and *Yohkoh* Observations of an M1.5 Flare. *N. Gopalswamy, J.-P. Raulin, M. R. Kundu, N. Nitta, J. R. Lemen, R. Herrmann, D. Zarro, & T. Kosugi.* 455, 715, 331-G1 (1995)

SUN: ROTATION

Rotation of the Sun's Outer White-Light Corona Determined from Solwind Data. *Ana G. Nash.* 366, 592, 10-D1 (1991)

What We Know about the Sun's Internal Rotation from Solar Oscillations. *Philip R. Goode, W. A. Dziembowski, S. G. Korzennik, & E. J. Rhodes, Jr.* 367, 649, 21-C11 (1991)

A Unified Approach to the Helioseismic Forward and Inverse Problems of Differential Rotation. *Michael H. Ritzwoller & Eugene M. Lavely.* 369, 557, 44-F5 (1991)

Magnetic Flux Transport and the Sun's Dipole Moment: New Twists to the Babcock-Leighton Model. *Y.-M. Wang & N. R. Sheeley, Jr.* 375, 761, 122-B5 (1991)

Does the Solar Interior Rotate Rigidly? *Andrew Gould.* 377, 707, 148-D7 (1991)

Observational Constraints on Theories of the Solar Differential Rotation. *Bernard R. Durney.* 378, 378, 155-F1 (1991)

A New Solar Cycle Model Including Meridional Circulation. *Y.-M. Wang, N. R. Sheeley, Jr., & A. G. Nash.* 383, 431, 217-F1 (1991)

A Torsional Oscillation in the Rotation of the Solar Magnetic Field. *Herschel B. Snodgrass.* 383, L85, 226-F10 (1991)

Tests of the Detection and Mode Classifications of Low-Degree Solar Gravity Modes with 1978 Solar Diameter Observations. *Henry A. Hill.* 78, 283, 5-F1 (1992)

The Resolving Power of Current Helioseismic Inversions for the Sun's Internal Rotation. *J. Schou, J. Christensen-Dalsgaard, & M. J. Thompson.* 385, L59, 23-E1 (1992)

Search for Evidence of a Clock Related to the Solar 154 Day Complex of Periodicities. *P. A. Sturrock & T. Bai.* 397, 337, 172-A13 (1992)

An Examination of the $m = 1$ Instability in a Low-Mass Protoplanetary Disk. *Hyerim Noh, Ethan T. Vishniac, & William D. Cochran.* 397, 347, 172-B11 (1992)

Helioseismology Data and the Solar Dynamo. *P. R. Wilson.* 399, 294, 198-G11 (1992)

A New Determination of the Solar Rotation Rate. *N. R. Sheeley, Jr., Y.-M. Wang, & A. G. Nash.* 401, 378, 225-F9 (1992)

Solar Activity and Oscillation Frequency Splittings. *M. F. Woodard & K. G. Libbrecht.* 402, L77, 13-B1 (1993)

A Model of the "Steady" and "Fluctuating" Parts of the Sun's Internal Magnetic Field. *M. H. Gokhale & K. M. Hiremath.* 407, 359, 73-E1 (1993)

On the Solar Differential Rotation: Meridional Motions Associated with a Slowly Varying Angular Velocity. *Bernard R. Durney.* 407, 367, 73-E11 (1993)

Can Equipartition Fields Produce the Tilts of Bipolar Magnetic Regions? *Sydney D'Silva.* 407, 385, 73-G3 (1993)

A Solar Dynamo Surface Wave at the Interface between Convection and Nonuniform Rotation. *E. N. Parker.* 408, 707, 94-A9 (1993)

Understanding the Rotation of Coronal Holes. *Y.-M. Wang & N. R. Sheeley, Jr.* 414, 916, 182-F7 (1993)

Are the 1986–1988 Changes in Solar Free-Oscillation Frequency Splitting Significant? *Douglas Gough & Philip B. Stark.* 415, 376, 189-E13 (1993)

Differential Rotation and Turbulent Convection: A New Reynolds Stress Model and Comparison with Solar Data. *V. M. Canuto, F. O. Minotti, & O. Schilling.* 425, 303, 84-A9 (1994)

The Rotation of Photospheric Magnetic Fields: A Random Walk Transport Model. *Y.-M. Wang & N. R. Sheeley, Jr.* 430, 399, 164-B9 (1994)

On Comparing Helioseismic Two-dimensional Inversion Methods. *J. Schou, J. Christensen-Dalsgaard, & M. J. Thompson.* 433, 389, 213-B13 (1994)

On the Rotation Rate in the Solar Convection Zone. *Jesper Schou & Timothy M. Brown.* 434, 378, 230-F9 (1994)

The Rotation of the Solar Core. *Antonio Jiménez, Fernando Pérez Hernández, Antonio Claret, Pere LLuis Pallé, Clara Régulo, & Teodoro Roca Cortés.* 435, 874, 258-B10 (1994)

Dynamics of Emerging Active Region Flux Loops. *Y. Fan, G. H. Fisher, & A. N. McClymont.* 436, 907, 278-B13 (1994)

Forward Analysis of the BBSO Frequency-splitting Coefficients for 1986. *P. R. Wilson & D. Burtonclay.* 438, 445, 7-F1 (1995)

Stellar Models with Microscopic Diffusion and Rotational Mixing. I. Application to the Sun. *Brian Chaboyer, P. Demarque, & M. H. Pinsonneault.* 441, 865, 73-G13 (1995)

Uncertainties for Two-dimensional Models of Solar Rotation from Helioseismic Eigenfrequency Splitting. *Christopher R. Genovese, Philip B. Stark, & Michael J. Thompson.* 443, 843, 109-D13 (1995)

Rotation, Diffusion, and Overshoot in the Sun: Effects on the Oscillation Frequencies and the Neutrino Flux. *Brian Chaboyer, P. Demarque, D. B. Guenther, & M. H. Pinsonneault.* 446, 435, 159-C3 (1995)

"Steady" and "Fluctuating" Parts of the Sun's Internal Magnetic Field: Improved Model. *K. M. Hiremath & M. H. Gokhale.* 448, 437, 198-B12 (1995)

Measurement of the Rotation Rate in the Deep Solar Interior. *S. Tomczyk, J. Schou, & M. J. Thompson.* 448, L57, 200-C5 (1995)

On the Interaction of Convection and Rotation in Stars. *Pawan Kumar, Ramesh Narayan, & Abraham Loeb.* 453, 480, 287-F6 (1995)

Solar Rotation Stereoscopy in Microwaves. *Markus J. Aschwanden, Jeremy Lim, Dale E. Gary, & James A. Klimchuk.* 454, 512, 306-C12 (1995)

SUN: SOLAR-TERRESTRIAL RELATIONS

Direct Evidence of the Interplanetary Magnetic Field Effect on the Cosmic-Ray Shadow by the Sun. *M. Amenomori, Z. Cao, L. K. Ding, Z. Y. Feng, K. Hibino, N. Hotta, Q. Huang, A. X. Huo, H. G. Jia, G. Z. Jiang, S. Q. Jiao, F. Kajino, K. Kasahara, Labaciren, D. M. Mei, L. Meng, X. R. Meng, Mimaciren, K. Mizutani, J. Mu, H. Nanjo, M. Nishizawa, Nusang, A. Oguro, M. Ohnishi, I. Ohta, T. Ouchi, J. R. Ren, T. Saito, M. Sakata, Z. Z. Shi, M. Shibata, T. Shirai, H. Sugimoto, X. X. Sun, K. Taira, Y. H. Tan, N. Tateyama, S. Torii, H. Wang, C. Z. Wen, Y. Yamamoto, X. Y. Yao, G. C. Yu, P. Yuan, T. Yuda, J. G. Zeng, C. S. Zhang, H. M. Zhang, L. Zhang, Zhasang, Zhaxiciren, & W. D. Zhou (The Tibet ASγ Collaboration).* 415, L147, 200-G1 (1993)

Nonthermal Radio Emission Associated with a Coronal Disconnection Event. *N. Gopalswamy, M. R. Kundu, & O. C. St. Cyr.* 424, L135, 79-F3 (1994)

A Method of Determining Possible Brightness Variations of the Sun in Past Centuries from Observations of Solar-Type Stars. *Q. Zhang, W. H. Soon, S. L. Baliunas, G. W. Lockwood, B. A. Skiff, & R. R. Radick.* 427, L111, 127-D3 (1994)

Cross-Correlation of Point Series Using a New Method. *Richard B. Stothers.* 429, 415, 149-C5 (1994)

Comparative Studies of Hard X-Ray Spectral Evolution in Solar Flares with High-Energy Proton Events Observed at Earth. *Alan L. Kiplinger.* 453, 973, 297-D4 (1995)

SUN: SOLAR WIND

Densities and Abundances of Hot Cometary Ions in the Coma of P/Halley. *M. Neugebauer, R. Goldstein, B. E. Goldstein, S. A. Fuselier, H. Balsiger, & W.-H. Ip.* 372, 291, 77-E6 (1991)

Why Fast Solar Wind Originates from Slowly Expanding Coronal Flux Tubes. *Y.-M. Wang & N. R. Sheeley, Jr.* 372, L45, 79-F1 (1991)

Latitudinal Dynamics of Steady Solar Wind Flows. *W.-H. Yang & R. W. Schunk.* 372, 703, 84-D5 (1991)

Heating Solar Coronal Holes. *E. N. Parker.* 372, 719, 84-E11 (1991)

The Influence of the Interface between the Heliosphere and the Local Interstellar Medium on the Penetration of the H Atoms to the Solar System. *V. B. Baranov, M. G. Lebedev, & Yu. G. Malama.* 375, 347, 115-C1 (1991)

Radio Range Measurements of Coronal Electron Densities at 13 and 3.6 Centimeter Wavelengths during the 1988 Solar Conjunction of *Voyager 2*. *T. P. Krisher, J. D. Anderson, D. D. Morabito, S. W. Asmar, S. E. Borutzki, M. L. Delitsky, A. C. Densmore, P. M. Eshe, G. D. Lewis, M. J. Maurer, D. C. Roth, Y. H. Son, T. R. Spilker, D. N. Sweetnam, A. H. Taylor, G. L. Tyler, D. L. Gresh, & P. A. Rosen.* 375, L57, 124-C6 (1991)

The Phase Mixing of Alfvén Waves, Coordinated Modes, and Coronal Heating. *E. N. Parker.* 376, 355, 129-C11 (1991)

The Interaction of Collisionless Shocks in Astrophysical Plasmas. *P. J. Cargill.* 376, 771, 136-A1 (1991)

Can Neutron Stars Ablate Their Companions? *Amir Levinson & David Eichler.* 379, 359, 167-E1 (1991)

Observations of Solar Wind Ion Charge Exchange in the Comet Halley Coma. *S. A. Fuselier, E. G. Shelley, B. E. Goldstein, R. Goldstein, M. Neugebauer, W.-H. Ip, H. Balsiger, & H. Rème.* 379, 734, 173-G8 (1991)

Parametric Study of the Formation of Magnetohydrodynamic Shocks. III. Fast and Slow Shocks. *Y. C. Whang.* 381, 559, 197-E10 (1991)

On the Differences in Element Abundances of Energetic Ions from Corotating Events and from Large Solar Events. *D. V. Reames, I. G. Richardson, & L. M. Barbier.* 382, L43, 205-E7 (1991)

Connection between Ambient Density Fluctuations and Clumpy Langmuir Waves in Type III Radio Sources. *P. A. Robinson, I. H. Cairns, & D. A. Gurnett.* 387, L101, 48-F1 (1992)

Variable Carbon and Oxygen Abundances in the Solar Wind as Observed in Earth's Magnetosheath by *AMPTE/CCE*. *R. von Steiger, S. P. Christon, G. Gloeckler, & F. M. Ipavich.* 389, 791, 71-B10 (1992)

Evidence for Mass Outflow in the Low Solar Corona over a Large Sunspot. *Werner M. Neupert, Jeffrey W. Brosius, Roger J. Thomas, & William T. Thompson.* 392, L95, 113-F6 (1992)

Constraints on the Acceleration of Anomalous Cosmic Rays. *J. R. Jokipii.* 393, L41, 120-F8 (1992)

Ion Injection and Fermi Acceleration at Earth's Bow Shock: The 1984 September 12 Event Revisited. *M. Scholer, K. J. Trattner, & H. Kucharek.* 395, 675, 151-F1 (1992)

A New Way to Convert Alfvén Waves into Heat in Solar Coronal Holes: Intermittent Magnetic Levitation. *R. L. Moore, R. Hammer, Z. E. Musielak, S. T. Suess, & C.-H. An.* 397, L55, 173-G5 (1992)

Why All Stars Should Possess Circumstellar Temperature Inversions. *Jack D. Scudder.* 398, 319, 185-F11 (1992)

A Parameter Study of the Two-Fluid Solar Wind. *Ørnulf Sandbæk, Egil Leer, & Thomas E. Holzer.* 400, 362, 213-D8 (1992)

The Gradient of Galactic Cosmic Rays at the Solar-Wind Termination Shock. *J. R. Jokipii, J. Kóta, & E. Merényi.* 405, 782, 52-G1 (1993)

Clumpy Langmuir Waves in Type III Radio Sources: Comparison of Stochastic-Growth Theory with Observations. *P. A. Robinson, I. H. Cairns, & D. A. Gurnett.* 407, 790, 80-C9 (1993)

Quasi-linear Theory and the Phenomenology of Interplanetary Solar Particle Transport. *Wolfgang Dröge, Ulrich Achatz, Wolfgang Wanner, Reinhard Schlickeiser, & Gerd Wibberenz.* 407, L95, 82-G1 (1993)

Bidirectional ~ 1 MeV amu^{-1} Ion Intervals in 1973–1991 Observed by the Goddard Space Flight Center Instruments on *IMP 8* and *ISEE 3/ICE*. *I. G. Richardson & D. V. Reames.* 85, 411, 12-G7 (1993)

Dynamics of Langmuir and Ion-Sound Waves in Type III Solar Radio Sources. *P. A. Robinson, A. J. Willes, & I. H. Cairns.* 408, 720, 94-B9 (1993)

Flux-Tube Divergence, Coronal Heating, and the Solar Wind. *Y.-M. Wang.* 410, L123, 126-D13 (1993)

A Doppler Dimming Determination of Coronal Outflow Velocity. *Leonard Strachan, John L. Kohl, Heinz Weiser, George L. Withbroe, & Richard H. Munro.* 412, 410, 147-B13 (1993)

A Model of Solar Coronal Heating by Classical Inverse Bremsstrahlung and Generation of the Solar Wind. *A. H. Øien & G. Alendal.* 412, 827, 154-B6 (1993)

How Reliable are Coronal Hole Temperatures Deduced from Observations? *S. R. Habbal, R. Esser, & M. B. Arndt.* 413, 435, 161-F6 (1993)

A Two-Region Model of the Solar Wind with Collisionless Electron Heat Flux. *P. Alexander.* 414, 372, 174-E11 (1993)

Elemental Abundances in the Upper Solar Atmosphere of Quiet and Coronal Hole Regions ($T_e \approx 4.3 \times 10^5$ K). *U. Feldman & K. G. Widing.* 414, 381, 174-F9 (1993)

Direct Evidence of the Interplanetary Magnetic Field Effect on the Cosmic-Ray Shadow by the Sun. *M. Amenomori, Z. Cao, L. K. Ding, Z. Y. Feng, K. Hibino, N. Hotta, Q. Huang, A. X. Huo, H. G. Jia, G. Z. Jiang, S. Q. Jiao, F. Kajino, K. Kasahara, Labaciren, D. M. Mei, L. Meng, X. R. Meng, Mimaciren, K. Mizutani, J. Mu, H. Nanjo, M. Nishizawa, Nusang, A. Oguro, M. Ohnishi, I. Ohta, T. Ouchi, J. R. Ren, T. Saito, M. Sakata, Z. Z. Shi, M. Shibata, T. Shirai, H. Sugimoto, X. X. Sun, K. Taira, Y. H. Tan, N. Tateyama, S. Torii, H. Wang, C. Z. Wen, Y. Yamamoto, X. Y. Yao, G. C. Yu, P. Yuan, T. Yuda, J. G. Zeng, C. S. Zhang, H. M. Zhang, L. Zhang, Zhasang, Zhaxiciren, & W. D. Zhou (The Tibet ASγ Collaboration).* 415, L147, 200-G1 (1993)

Evaluation of Emission Mechanisms at ω_{p_e} Using *Ulysses* Observations of Type III Bursts. *G. Thejappa, D. Lengyel-Frey, R. G. Stone, & M. L. Goldstein.* 416, 831, 213-G1 (1993)

Stochastic Growth Theory of Type III Solar Radio Emission. *P. A. Robinson & I. H. Cairns.* 418, 506, 237-C8 (1993)

Neutral Hydrogen in the Solar Wind Acceleration Region. *Espen Lyngdal Olsen, Egil Leer, & Thomas E. Holzer.* 420, 913, 14-C4 (1994)

A Survey of Bidirectional $\geq$ 1 MeV Ion Flows during the *Helios 1* and *Helios 2* Missions: Observations from the Goddard Space Flight Center Instruments. *I. G. Richardson.* 420, 926, 14-D5 (1994)

On the Derivation of Empirical Limits on the Helium Abundance in Coronal Holes below 1.5 $R_{\odot}$. *Shadia Rifai Habbal & Ruth Esser.* 421, L59, 22-C5 (1994)

Dynamics and Efficiency of Type III Solar Radio Emission. *P. A. Robinson, I. H. Cairns, & A. J. Willes.* 422, 870, 42-F5 (1994)

Evidence for Particle Acceleration during Magnetospheric Substorms. *Ramon E. Lopez & Daniel N. Baker.* 90, 531, 10-C13 (1994)

Transport of Solar Energetic Particles. *Wolfgang Dröge.* 90, 567, 10-G3 (1994)

On the Asymmetry of the Distribution of the Anomalous Cosmic-Ray Component in the Heliosphere. *Horst Fichtner, S. Ranga Sreenivasan, Hans-Jörg Fahr, Daniel Rucinski, & Stanislaw Grzedzielski.* 90, 595, 11-B9 (1994)

Acceleration and Heating of Two-Fluid Solar Wind by Alfvén Waves. *Ørnulf Sandbæk & Egil Leer.* 423, 500, 52-D1 (1994)

A Model of the Proton Heat Flux Appropriate for Collisionless Plasmas. *L. L. Williams.* 424, L143, 79-G3 (1994)

The Coronal Electron Density Distribution Determined from Dual-Frequency Ranging Measurements during the 1991 Solar Conjunction of the *Ulysses* Spacecraft. *M. K. Bird, H. Volland, M. Pätzold, P. Edenhofer, S. W. Asmar, & J. P. Brenkle.* 426, 373, 100-G5 (1994)

Angular Scattering of Solar Radio Emission by Coronal Turbulence. *T. S. Bastian.* 426, 774, 108-B3 (1994)

Ion and Electron Suprathermal Tail Strengths in the Transition Region: Support for the Velocity Filtration Model of the Corona. *Jack D. Scudder.* 427, 446, 115-D6 (1994)

Injection Profiles of Solar Energetic Particles as Functions of Coronal Mass Ejection Heights. *S. Kahler.* 428, 837, 140-F5 (1994)

Coupling of the Coronal Helium Abundance to the Solar Wind. *Viggo H. Hansteen, Egil Leer, & Thomas E. Holzer.* 428, 843, 140-G1 (1994)

Diffusive Shock Acceleration in the Presence of Current Sheets. *J. Kóta & J. R. Jokipii.* 429, 385, 148-G8 (1994)

The Power Density Spectrum Break in an Alfvén Wave–driven Solar Wind. *V. Jatenco-Pereira, R. Opher, & L. C. Yamamoto.* 432, 409, 198-C3 (1994)

From Supersonic Winds to Accretion: Comments on the Stability of Stellar Winds and Related Flows. *M. Velli.* 432, L55, 199-G13 (1994)

On a Thermodynamic Origin of the Cometary Ion Rays. *W.-H. Ip.* 432, L143, 207-D11 (1994)

The Study of Coronal Plasma Structures and Fluctuations with Faraday Rotation Measurements. *Takayuki Sakurai & Steven R. Spangler.* 434, 773, 238-E6 (1994)

Polar Plumes and the Solar Wind. *Y.-M. Wang.* 435, L153, 260-E4 (1994)

On the Relation between Coronal Heating, Flux Tube Divergence, and the Solar Wind Proton Flux and Flow Speed. *Ørnulf Sandbæk, Egil Leer, & Viggo H. Hansteen.* 436, 390, 266-F9 (1994)

Two Types of Slow Solar Wind. *Y.-M. Wang.* 437, L67, 292-D1 (1994)

Galactic Cosmic-Ray Mediation of a Spherical Solar Wind Flow. I. The Steady State Cold Gas Hydrodynamical Approximation. *J. A. le Roux & V. S. Ptuskin.* 438, 427, 7-D2 (1995)

Disruption of a Helmet Streamer by Photospheric Shear. *Jon A. Linker & Zoran Mikić.* 438, L45, 10-D7 (1995)

The Propagation of Solar Energetic Protons: Comparative Studies in Two Cases with Markedly Different Scattering Conditions. *J. F. Valdés-Galicia, W. Wanner, M.-B. Kallenrode, & G. Wibberenz.* 439, 482, 27-F8 (1995)

Contact and Pressure Balance Structures in Two-Fluid Cosmic-Ray Hydrodynamics. *G. M. Webb, M. Brio, G. P. Zank, & T. Story.* 442, 822, 91-E2 (1995)

Effect of Adiabatic Deceleration on the Focused Transport of Solar Cosmic Rays. *D. Ruffolo.* 442, 861, 92-A12 (1995)

Charge State of Anomalous Cosmic-Ray Nitrogen, Oxygen, and Neon: *SAMPEX* Observations. *B. Klecker, M. C. McNab, J. B. Blake, D. C. Hamilton, D. Hovestadt, H. Kästle, M. D. Looper, G. M. Mason, J. E. Mazur, & M. Scholer.* 442, L69, 94-F9 (1995)

The Mean Ionic Charge State of Solar Energetic Fe Ions above 200 MeV per Nucleon. *A. J. Tylka, P. R. Boberg, J. H. Adams, Jr., L. P. Beahm, W. F. Dietrich, & T. Kleis.* 444, L109, 131-B1 (1995)

Radio Interferometer Observations of Solar Wind Turbulence from the Orbit of *Helios* to the Solar Corona. *Steven R. Spangler & Takayuki Sakurai.* 445, 999, 149-B10 (1995)

Identification of Low-Latitude Coronal Plumes in Extreme-Ultraviolet Spectroheliograms. *Y.-M. Wang & N. R. Sheeley, Jr.* 446, L51, 161-A8 (1995)

Solar Implications of *Ulysses* Interplanetary Field Measurements. *Y.-M. Wang & N. R. Sheeley, Jr.* 447, L143, 191-E9 (1995)

HST/GHRS Observations of the Interplanetary Medium Downwind and in the Inner Solar System. *John T. Clarke, Rosine Lallement, Jean-Loup Bertaux, & Eric Quemerais.* 448, 893, 207-C5 (1995)

Early Solar Mass Loss, Element Diffusion, and Solar Oscillation Frequencies. *Joyce A. Guzik & Arthur N. Cox.* 448, 905, 207-D7 (1995)

Fine-Scale Filamentary Structure in Coronal Streamers. *Richard Woo, John W. Armstrong, Michael K. Bird, & Martin Pätzold.* 449, L91, 217-E1 (1995)

Detectability of Electrostatic Decay Products in *Ulysses* and *Galileo* Observations of Type III Solar Radio Sources. *Iver H. Cairns.* 449, L95, 217-E8 (1995)

Empirical Relationship between the Magnetic Field and the Mass and Energy Flux in the Source Regions of the Solar Wind. *Y.-M. Wang.* 449, L157, 227-F8 (1995)

Galactic Cosmic-Ray Mediation of a Spherical Solar Wind Flow. II. The Steady State Hydromagnetic Approximation. *J. A. le Roux & V. S. Ptuskin.* 452, 423, 267-G11 (1995)

Coronal Plumes and Their Relationship to Network Activity. *Y.-M. Wang & N. R. Sheeley, Jr.* 452, 457, 268-D1 (1995)

Heat Flux and Viscosity of Protons in the Collisionless Solar Wind. *L. L. Williams.* 453, 953, 297-B6 (1995)

Ion Acoustic Wave Frequencies and Onset Times during Type III Solar Radio Bursts. *Iver H. Cairns & P. A. Robinson.* 453, 959, 297-C1 (1995)

Fractionation of Xe, Kr, and Ar in the Solar Corpuscular Radiation Deduced by Closed System Etching of Lunar Soils. *Rainer Wieler & Heinrich Baur.* 453, 987, 297-E7 (1995)

Coronal Heating and Solar Wind Energy Balance. *Ørnulf Sandbæk & Egil Leer.* 454, 486, 306-A7 (1995)

SUN: SPECTRA

Fe XII Line Ratios in Solar Flares. *S. S. Tayal, Ronald J. W. Henry, F. P. Keenan, S. M. McCann, & K. G. Widing.* 369, 567, 44-G1 (1991)

Analysis of the Solar O II/O III Multiplets at 834 Å: Implications for the Emission Measure Distribution in the Vicinity of 40,000 K. *R. R. Meier, K. G. Widing, & U. Feldman.* 369, 570, 44-G7 (1991)

The Solar Spectrum between 914 and 1177 Å. *U. Feldman & G. A. Doschek.* 75, 925, 14-B13 (1991)

High-Resolution Studies of the Structure of the Solar Atmosphere Using a New Imaging Algorithm. *Margarita Karovska & Shadia Rifai Habbal.* 371, 402, 65-B1 (1991)

An Ultraviolet Spectral Atlas of a Sunspot and an Active Region 1190–1730 Å. *P. Brekke, O. Kjeldseth-Moe, J.-D. F. Bartoe, & G. E. Brueckner.* 75, 1337, 23-C1 (1991)

Line-blanketing Variations in the Irradiance Spectrum of the Sun from Maximum to Minimum of the Solar Cycle. *W. E. Mitchell, Jr., & W. C. Livingston.* 372, 336, 78-B6 (1991)

On the Inference of Magnetic Field Vectors from Stokes Profiles. *John T. Jefferies & Donald L. Mickey.* 372, 694, 84-C9 (1991)

Fe XIV Line Ratios in the Sun. *F. P. Keenan, P. L. Dufton, M. B. Boylan, A. E. Kingston, & K. G. Widing.* 373, 695, 96-E13 (1991)

Solar Gravitational Redshift from the Infrared Oxygen Triplet. *James C. LoPresto, Charles Schrader, & A. Keith Pierce.* 376, 757, 135-F11 (1991)

Characteristics of Intermediate-Degree Solar *p*-Mode Line Widths. *S. M. Jefferies, T. L. Duvall, Jr., J. W. Harvey, Y. Osaki, & M. A. Pomerantz.* 377, 330, 142-A11 (1991)

The Solar Mg I Spectrum from ATMOS. I. Identification and Preliminary Discussion. *John T. Jefferies.* 377, 337, 142-B5 (1991)

The O VII Soft X-Ray Spectrum and Its Application to Hot Plasmas in Astrophysics. *A. H. Gabriel, F. Bely-Dubau, P. Faucher, & L. W. Acton.* 378, 438, 156-D1 (1991)

The $3s^2 3p\ ^2P$–$3s 3p^2\ ^4P$ Intercombination Lines of Fe XIV in the Sun. *F. P. Keenan, P. L. Dufton, E. S. Conlon, M. B. Boylan, A. E. Kingston, & K. G. Widing.* 379, 406, 168-A11 (1991)

Chromospheric and Transition Region Diagnostics Using Emission-Line Intensities. *R. Grant Athay & K. P. Dere.* 379, 776, 174-D1 (1991)

On Solar Emission Lines. *G. P. Malik, L. K. Pande, & Vijaya S. Varma.* 379, 788, 174-E1 (1991)

Velocity Gradients in the Chromosphere-Corona Transition Region. *R. Grant Athay & K. P. Dere.* 381, 323, 193-A6 (1991)

Improved Line Ratio Calculations Involving $\Delta n = 1$ (2–3) Transitions in O V and a Reanalysis of *Skylab* Observations of Solar Flares. *F. P. Keenan, P. L. Dufton, L. K. Harra, E. S. Conlon, K. A. Berrington, A. E. Kingston, & K. G. Widing.* 382, 349, 204-E1 (1991)

Electric Field Strengths from the Solar 12 Micron Lines. *Edward S. Chang & William G. Schoenfeld.* 383, 450, 217-G9 (1991)

SUN: SUNSPOTS

Strong Magnetic Fields and Inhomogeneity in the Solar Corona. *S. M. White, M. R. Kundu, & N. Gopalswamy.* 366, L43, 6-E7 (1991)

On the Subadiabatic Magnetohydrodynamic Overstability in Background Polytropes. *Yu-Qing Lou.* 367, 367, 16-E9 (1991)

Can the Starpatch on ξ Bootis A Be Explained by Using Tangential Flows? *Clifford G. Toner & Barry J. LaBonte.* 368, 633, 33-A10 (1991)

Scattering of Acoustic Waves from a Magnetic Flux Tube Embedded in a Radiating Fluid. *T. J. Bogdan & M. Knölker.* 369, 219, 38-F1 (1991)

The Resonant Absorption of *p*-Modes by Sunspots with Twisted Magnetic Fields. *S. M. Chitre & Joseph M. Davila.* 371, 785, 71-C10 (1991)

An Ultraviolet Spectral Atlas of a Sunspot and an Active Region 1190–1730 Å. *P. Brekke, O. Kjeldseth-Moe, J.-D. F. Bartoe, & G. E. Brueckner.* 75, 1337, 23-C1 (1991)

High-Resolution Spectra of Solar Magnetic Features. II. Magnetic Fields of Umbral Brightenings. *Bruce W. Lites, Thomas A. Bida, A. Johannesson, & G. B. Scharmer.* 373, 683, 96-D11 (1991)

Siphon Flows in Isolated Magnetic Flux Tubes. IV. Critical Flows with Standing Tube Shocks. *John H. Thomas & Benjamin Montesinos.* 375, 404, 115-G11 (1991)

Linear and Circular Digital Spectral Analysis of Serial Data. *Richard B. Stothers.* 375, 423, 116-B6 (1991)

Large-Scale Features of the Sun at 20 Centimeter Wavelength. *N. Gopalswamy, S. M. White, & M. R. Kundu.* 379, 366, 167-E9 (1991)

Multiple Scattering of Acoustic Waves by a Pair of Uniformly Magnetized Flux Tubes. *Thomas J. Bogdan & David C. Fox.* 379, 758, 174-B10 (1991)

Relative Abundances in the Lower Solar Transition Region. *G. A. Doschek, K. P. Dere, & P. A. Lund.* 381, 583, 198-A1 (1991)

Vector Magnetic Fields in Sunspots. I. Stokes Profile Analysis Using the Marshall Space Flight Center Magnetograph. *K. S. Balasubramaniam & E. A. West.* 382, 699, 210-C11 (1991)

Linear Resistive Magnetohydrodynamic Computations of Resonant Absorption of Acoustic Oscillations in Sunspots. *Marcel Goossens & Stefaan Poedts.* 384, 348, 5-C8 (1992)

New Information on Solar Activity, 1779–1818, from Sir William Herschel's Unpublished Notebooks. *Douglas V. Hoyt & Kenneth H. Schatten.* 384, 361, 5-D9 (1992)

Detection of "Invisible Sunspots." *Harold Zirin & Haimin Wang.* 385, L27, 17-C12 (1992)

Sir William Herschel's Notebooks: Abstracts of Solar Observations. *Douglas V. Hoyt & Kenneth H. Schatten.* 78, 301, 5-G9 (1992)

Coronal Magnetic Structures Observing Campaign. IV. Multiwaveband Observations of Sunspot and Plage-associated Coronal Emission. *Jeffrey W. Brosius, Robert F. Willson, Gordon D. Holman, & Joan T. Schmelz.* 386, 347, 28-E1 (1992)

High Dynamic Range Multifrequency Radio Observations of a Solar Active Region. *S. M. White, M. R. Kundu, & N. Gopalswamy.* 78, 599, 11-A13 (1992)

Solar Si II Line Ratios from the High-Resolution Telescope and Spectrograph. *F. P. Keenan, J. W. Cook, P. L. Dufton, & A. E. Kingston.* 387, 726, 47-F9 (1992)

Structure of Sunspot Penumbrae: Fallen Magnetic Flux Tubes. *Donat G. Wentzel.* 388, 211, 51-E11 (1992)

Vortex Attraction and the Formation of Sunspots. *E. N. Parker.* 390, 290, 77-E8 (1992)

The Conversion of *p*-Modes to Slow Modes and the Absorption of Acoustic Waves by Sunspots. *H. C. Spruit & T. J. Bogdan.* 391, L109, 100-B7 (1992)

Scattering of *p*-Modes by a Sunspot. *D. C. Braun, T. L. Duvall, Jr., B. J. LaBonte, S. M. Jefferies, J. W. Harvey, & M. A. Pomerantz.* 391, L113, 100-C1 (1992)

On Neutralized Currents in the Solar Corona. *Ladye Kathryn Wilkinson, A. Gordon Emslie, & G. Allen Gary.* 392, L39, 106-E7 (1992)

Evidence for Mass Outflow in the Low Solar Corona over a Large Sunspot. *Werner M. Neupert, Jeffrey W. Brosius, Roger J. Thomas, & William T. Thompson.* 392, L95, 113-F6 (1992)

Predicting Wolf's Sunspot Numbers with and without the Assumption of Periodicity. *Patricia B. Cerrito.* 393, 795, 125-G1 (1992)

Search for Evidence of a Clock Related to the Solar 154 Day Complex of Periodicities. *P. A. Sturrock & T. Bai.* 397, 337, 172-A13 (1992)

Observation and Interpretation of the Asymmetric Stokes *Q*, *U*, and *V* Line Profiles in Sunspots. *J. Sánchez Almeida & B. W. Lites.* 398, 359, 186-C1 (1992)

Three-dimensional Structures of Magnetostatic Atmospheres. IV. Magnetic Structures over a Solar Active Region. *B. C. Low.* 399, 300, 199-A6 (1992)

X-Ray Observations of Sunspot Penumbral Structure. *B. J. Sams III, L. Golub, & N. O. Weiss.* 399, 313, 199-B8 (1992)

Solar *p*-Modes in a Vertical Magnetic Field: Trapped and Damped π-Modes. *P. S. Cally & T. J. Bogdan.* 402, 721, 11-E3 (1993)

On the Magnetic and Velocity Field Geometry of Simple Sunspots. *Alan M. Title, Zoe A. Frank, Richard A. Shine, Theodore D. Tarbell, Kenneth P. Topka, Göran Scharmer, & Wolfgang Schmidt.* 403, 780, 25-D13 (1993)

On the North-South Asymmetry of Solar Activity Cycles. *V. K. Verma.* 403, 797, 25-G1 (1993)

Wave Generation in a Sunspot. *Jeongwoo W. Lee.* 404, 372, 32-D11 (1993)

The Magnetohydrodynamics of Umbral Flux Tubes. I. Theoretical Model. *Detlev Degenhardt & Bruce W. Lites.* 404, 383, 32-E9 (1993)

A Numerical Simulation of Two-dimensional Radiative Equilibrium in Magnetostatic Flux Tubes. I. The Model. *V. J. Pizzo, K. B. MacGregor, & P. B. Kunasz.* 404, 788, 38-F10 (1993)

The Absorption of *p*-Modes by Sunspots: Variations with Degree and Order. *Thomas J. Bogdan, Timothy M. Brown, Bruce W. Lites, & John H. Thomas.* 406, 723, 66-G13 (1993)

Can Equipartition Fields Produce the Tilts of Bipolar Magnetic Regions? *Sydney D'Silva.* 407, 385, 73-G3 (1993)

A Siphon-Flow Model of the Photospheric Evershed Flow in a Sunspot. *John H. Thomas & Benjamin Montesinos.* 407, 398, 74-A3 (1993)

Visibility of Sunspots. *Bradley E. Schaefer.* 411, 909, 141-B8 (1993)

The Magnetic Field in the Corona above Sunspots at the Eclipse of 1991 July 11. *D. E. Gary, Y. Leblanc, G. A. Dulk, & L. Golub.* 412, 421, 147-C13 (1993)

The Sunspot Transition Region: Where Are the Bright Plumes and the Downflows? *Joseph B. Gurman.* 412, 865, 154-E13 (1993)

The Source of 5 Minute Period Photospheric Umbral Oscillations. *M. J. Penn & B. J. LaBonte.* 415, 383, 189-F7 (1993)

A High-Resolution Study of Inhomogeneities in Sunspot Umbrae. *Michal Sobotka, José A. Bonet, & Manuel Vázquez.* 415, 832, 198-B13 (1993)

The Magnetohydrodynamics of Umbral Flux Tubes. II. Spectroscopic Properties. *Detlev Degenhardt & Bruce W. Lites.* 416, 875, 214-C11 (1993)

Stokes Profile Analysis and Vector Magnetic Fields. VI. Fine Scale Structure of a Sunspot. *B. W. Lites, D. F. Elmore, P. Seagraves, & A. P. Skumanich.* 418, 928, 244-B10 (1993)

A Possible Mechanism for Enhanced Absorption of *p*-Modes in Sunspot and Plage Regions. *Barry J. LaBonte & Margarita Ryutova.* 419, 388, 251-A9 (1993)

Interactions between Nested Sunspots. I. The Formation and Breakup of a Delta-Type Sunspot. *V. Gaizauskas, K. L. Harvey, & M. Proulx.* 422, 883, 42-G6 (1994)

Separation of Low First Ionization Potential Ions from High First Ionization Potential Neutrals in the Low Chromosphere. *R. Grant Athay.* 423, 516, 52-E5 (1994)

Evidence for Supersonic Downflows in the Photosphere of a Delta Sunspot. *V. Martínez Pillet, B. W. Lites, A. Skumanich, & D. Degenhardt.* 425, L113, 95-A1 (1994)

Patterns of Helicity in Solar Active Regions. *Alexei A. Pevtsov, Richard C. Canfield, & Thomas R. Metcalf.* 425, L117, 95-A7 (1994)

A High-Resolution Study of the Structure of Sunspot Light Bridges and Abnormal Granulation. *Michal Sobotka, José A. Bonet, & Manuel Vázquez.* 426, 404, 101-C1 (1994)

The Solar Abundance of Helium Determined from a Redshifted Plasma Flow over a Sunspot. *J. M. Laming & U. Feldman.* 426, 414, 101-D3 (1994)

High-Resolution Observations of the Evershed Effect in Sunspots. *R. A. Shine, A. M. Title, T. D. Tarbell, K. Smith, Z. A. Frank, & Göran Scharmer.* 430, 413, 164-C11 (1994)

Observations of Changes in the Bolometric Contrast of Sunspots. *G. A. Chapman, A. M. Cookson, & J. J. Dobias.* 432, 403, 198-B9 (1994)

Acoustic Mode Mixing in Sunspots. *Sydney D'Silva.* 435, 881, 258-C6 (1994)

Multiple Scattering and Resonant Absorption of *p*-Modes by Fibril Sunspots. *R. Keppens, T. J. Bogdan, & M. Goossens.* 436, 372, 266-E2 (1994)

On the Temperature and Velocity through the Photosphere of a Sunspot Penumbra. *J. C. del Toro Iniesta, T. D. Tarbell, & B. Ruiz Cobo.* 436, 400, 266-G8 (1994)

Umbral Oscillations in Sunspots: Absorption of *p*-Modes and Active Region Heating by Mode Conversion. *P. S. Cally, T. J. Bogdan, & E. G. Zweibel.* 437, 505, 290-A11 (1994)

Transient Microwave Brightenings in Solar Active Regions: Comparison between VLA and *Yohkoh* Observations. *N. Gopalswamy, T. E. W. Payne, E. J. Schmahl, M. R. Kundu, J. R. Lemen, K. T. Strong, R. C. Canfield, & J. de La Beaujardiere.* 437, 522, 290-C3 (1994)

Time-Distance Helioseismology in the Vicinity of Sunspots. *Sydney D'Silva & Thomas L. Duvall, Jr.* 438, 454, 7-G1 (1995)

Comparisons between Theory and Observation of Active Region Tilts. *G. H. Fisher, Y. Fan, & R. F. Howard.* 438, 463, 8-A1 (1995)

The Propagation of Solar Energetic Protons: Comparative Studies in Two Cases with Markedly Different Scattering Conditions. *J. F. Valdés-Galicia, W. Wanner, M.-B. Kallenrode, & G. Wibberenz.* 439, 482, 27-F8 (1995)

A Volcanic Origin for High-FIP Material in the Solar Atmosphere. *N. R. Sheeley, Jr.* 440, 884, 55-C12 (1995)

Latitudinal Variation of Helicity of Photospheric Magnetic Fields. *Alexei A. Pevtsov, Richard C. Canfield, & Thomas R. Metcalf.* 440, L109, 58-E1 (1995)

Brunt-Väisälä Growth Rate and the Radial Emergence of Equipartition Fields. *Sydney D'Silva.* 443, 444, 101-B11 (1995)

Neural Network Prediction of Solar Activity. *R. A. Calvo, H. A. Ceccatto, & R. D. Piacentini.* 444, 916, 129-A8 (1995)

Sun Center Observations of the Evershed Effect. *Thomas R. Rimmele.* 445, 511, 139-E11 (1995)

The Possible Ascent of a Closed Magnetic System through the Photosphere. *B. W. Lites, B. C. Low, V. Martínez Pillet, P. Seagraves, A. Skumanich, Z. A. Frank, R. A. Shine, & S. Tsuneta.* 446, 877, 168-B13 (1995)

On the Dynamics of Bright Features in Sunspot Umbrae. *Michal Sobotka, Jos/'e A. Bonet, Manuel V/'azquez, & Arnold Hanslmeier.* 447, L133, 191-D1 (1995)

Flux Retraction and Recycling: Negative Buoyancy–induced Oscillations as an Alternative to Parker's Thermal Relaxation Oscillations. *Sydney D'Silva.* 448, 459, 198-D12 (1995)

Magnetic Buoyancy, Vorticity, and Three-dimensional Flux-Tube Formation. *P. C. Matthews, D. W. Hughes, & M. R. E. Proctor.* 448, 938, 207-G11 (1995)

Are Variations in the Length of the Activity Cycle Related to Changes in Brightness in Solar-Type Stars? *Sallie Baliunas & Willie Soon.* 450, 896, 243-C8 (1995)

Scattering of *p*-Modes by Sunspots. I. Observations. *D. C. Braun.* 451, 859, 259-A12 (1995)

Scattering of *p*-Modes by Sunspots. II. Calculations of Phase Shifts from a Phenomenological Model. *Y. Fan, D. C. Braun, & D.-Y. Chou.* 451, 877, 259-C6 (1995)

The Sun in Submillimeter and Near-Millimeter Radiation. *C. Lindsey, G. Kopp, T. A Clark, & G. Watt.* 453, 511, 288-B7 (1995)

Submillimeter Radiometry of Sunspots. *C. Lindsey & G. Kopp.* 453, 517, 288-C9 (1995)

Jacket Modes: Solar Acoustic Oscillations Confined to Regions Surrounding Sunspots and Plage. *T. J. Bogdan & P. S. Cally.* 453, 919, 296-F1 (1995)

Turbulent and Chaotic Dynamics Underlying Solar Magnetic Variability. *J. K. Lawrence, A. C. Cadavid, & A. A. Ruzmaikin.* 455, 366, 323-B9 (1995)

SUN: TRANSITION REGION

Non-Maxwellian Electron Distributions in Models of the Solar Atmosphere. *P. MacNeice, J. Fontenla, & N. N. Ljepojevic.* 369, 544, 44-E1 (1991)

The Magnetic Network Location of Explosive Events Observed in the Solar Transition Region. *J. G. Porter & K. P. Dere.* 370, 775, 58-A11 (1991)

The Microwave Brightness Temperature Spectrum of the Quiet Sun. *H. Zirin, B. M. Baumert, & G. J. Hurford.* 370, 779, 58-B12 (1991)

Stability, Structure, and Evolution of Cool Loops. *P. S. Cally & T. D. Robb.* 372, 329, 78-A11 (1991)

Systematic Radial Flows in the Chromosphere, Transition Region, and Corona of the Quiet Sun. *Donald M. Hassler, Gary J. Rottman, & Frank Q. Orrall.* 372, 710, 84-E1 (1991)

The Effects of Mass Flow on the Temperature and Abundance Structure of the Solar Transition Region. *D. Tod Woods & Thomas E. Holzer.* 375, 800, 122-E7 (1991)

Energy Balance in the Solar Transition Region. II. Effects of Pressure and Energy Input on Hydrostatic Models. *J. M. Fontenla, E. H. Avrett, & R. Loeser.* 377, 712, 148-E1 (1991)

Joule Heating as an Explanation for the Differential Emission Measure Structure and Systematic Redshifts in the Sun's Lower Transition Region. *George Roumeliotis.* 379, 392, 167-G9 (1991)

Chromospheric and Transition Region Diagnostics Using Emission-Line Intensities. *R. Grant Athay & K. P. Dere.* 379, 776, 174-D1 (1991)

Numerical Simulations of Microflare Evolution in the Solar Transition Region and Corona. *Alphonse C. Sterling, John T. Mariska, Kazunari Shibata, & Yoshinori Suematsu.* 381, 313, 192-G8 (1991)

Velocity Gradients in the Chromosphere-Corona Transition Region. *R. Grant Athay & K. P. Dere.* 381, 323, 193-A6 (1991)

Relative Abundances in the Lower Solar Transition Region. *G. A. Doschek, K. P. Dere, & P. A. Lund.* 381, 583, 198-A1 (1991)

Nonequilibrium Ionization Effects in Asymmetrically Heated Loops. *D. Spadaro, S. K. Antiochos, & J. T. Mariska.* 382, 338, 204-D1 (1991)

Energy Balance in Coronal Funnels. *Douglas Rabin.* 383, 407, 217-D1 (1991)

Solar Si II Line Ratios from the High-Resolution Telescope and Spectrograph. *F. P. Keenan, J. W. Cook, P. L. Dufton, & A. E. Kingston.* 387, 726, 47-F9 (1992)

On the Density and Field Sensitivities of Dielectronic Recombination. *Daniel B. Reisenfeld, John C. Raymond, Albert R. Young, & John L. Kohl.* 389, L37, 66-E5 (1992)

Steady Siphon Flows in Closed Coronal Structures: Comparison with Extreme-Ultraviolet Observations. *G. Peres, D. Spadaro, & G. Noci.* 389, 777, 71-A8 (1992)

Pervasive Variability in the Quiet Solar Transition Region. *Douglas Rabin & James F. Dowdy, Jr.* 398, 665, 192-D1 (1992)

Solar Doppler-Shift Measurements in the Ne VII 465 Å Emission Line. *John T. Mariska & James F. Dowdy, Jr.* 401, 754, 231-G8 (1992)

Diffusion Effects on the Helium Abundance of the Solar Transition Region and Corona. *Viggo H. Hansteen, Thomas E. Holzer, & Egil Leer.* 402, 334, 5-C10 (1993)

A New Interpretation of the Redshift Observed in Optically Thin Transition Region Lines. *Viggo Hansteen.* 402, 741, 11-G1 (1993)

A Burst Model for Line Emission in the Solar Atmosphere. III. A Reassessment of the Assumptions of Constant Pressure and Steady State Coronal Equilibrium in the Solar Transition Region. *U. Feldman & J. M. Laming.* 404, 799, 38-G9 (1993)

Energy Balance in the Solar Transition Region. III. Helium Emission in Hydrostatic, Constant-Abundance Models with Diffusion. *J. M. Fontenla, E. H. Avrett, & R. Loeser.* 406, 319, 59-A7 (1993)

Solar Chromospheric and Transition Region Response to Energy Deposition in the Middle and Upper Chromosphere. *Alphonse C. Sterling, Kazunari Shibata, & John T. Mariska.* 407, 778, 80-B9 (1993)

Electric Field Effects on Dielectronic Recombination in a Collisional-Radiative Model. *N. R. Badnell, M. S. Pindzola, W. J. Dickson, H. P. Summers, D. C. Griffin, & J. Lang.* 407, L91, 82-F11 (1993)

Observed Redshifts in O V and Downflows in the Solar Transition Region. *P. Brekke.* 408, 735, 94-C11 (1993)

Observational Evidence for Hotter Transition Region Loops within the Supergranular Network. *James F. Dowdy, Jr.* 411, 406, 132-D8 (1993)

The Sunspot Transition Region: Where Are the Bright Plumes and the Downflows? *Joseph B. Gurman.* 412, 865, 154-E13 (1993)

Discrete High-Frequency *p*-Modes as Probes of Structures in the Chromosphere, Transition Region, and Lower Corona of the Sun. *Yu-Qing Lou.* 414, L141, 186-E1 (1993)

The Solar *f*-Mode as an Interfacial Mode at the Chromosphere-Corona Transition. *C. S. Rosenthal & D. O. Gough.* 423, 488, 52-C1 (1994)

Ion and Electron Suprathermal Tail Strengths in the Transition Region: Support for the Velocity Filtration Model of the Corona. *Jack D. Scudder.* 427, 446, 115-D6 (1994)

Observational Tests for Nonequilibrium Ionization in the Solar Corona. *D. Spadaro, P. Leto, & S. K. Antiochos.* 427, 453, 115-E1 (1994)

Coupling of the Coronal Helium Abundance to the Solar Wind. *Viggo H. Hansteen, Egil Leer, & Thomas E. Holzer.* 428, 843, 140-G1 (1994)

Solar Fine-Scale Structures in the Corona, Transition Region, and Lower Atmosphere. *Dan Moses, J. W. Cook, J.-D. F. Bartoe, G. E. Brueckner, K. P. Dere, D. F. Webb, J. M. Davis, J. W. Harvey, F. Recely, S. F. Martin, & H. Zirin.* 430, 913, 173-C9 (1994)

Gravity Waves in the Lower Solar Corona. *Yu-Qing Lou.* 442, 401, 82-E1 (1995)

Ultraviolet Observations of the Structure and Dynamics of an Active Region at the Limb. *C. M. Korendyke, K. P. Dere, D. G. Socker, G. E. Brueckner, & B. Schmieder.* 443, 869, 109-G10 (1995)

Observed Redshifts in the Solar Transition Region above Active and Quiet Regions. *H. Achour, P. Brekke, O. Kjeldseth-Moe, & P. Maltby.* 453, 945, 297-A9 (1995)

Quiet-Sun Connection between Intensity, Doppler Shift, and Line Broadening in Solar Ultraviolet Emission Lines. *N. Brynildsen, O. Kjeldseth-Moe, & P. Maltby.* 455, L81, 325-G8 (1995)

On the Failure of Standard Emission Measure Analysis for Solar Extreme-Ultraviolet and Ultraviolet Irradiance Spectra. *P. G. Judge, T. N. Woods, P. Brekke, & G. J. Rottman.* 455, L85, 326-A2 (1995)

SUN: UV RADIATION

C IV Line Ratios in the Sun. *F. P. Keenan, E. S. Conlon, L. K. Harra, V. M. Burke, & K. G. Widing.* 385, 381, 16-E9 (1992)

Solar Si II Line Ratios from the High-Resolution Telescope and Spectrograph. *F. P. Keenan, J. W. Cook, P. L. Dufton, & A. E. Kingston.* 387, 726, 47-F9 (1992)

Ne V Line Ratios in the EUV Spectra of Solar Flares. *F. P. Keenan, E. S. Conlon, L. K. Harra, K. M. Aggarwal, & K. G. Widing.* 389, 440, 65-D1 (1992)

On the Density and Field Sensitivities of Dielectronic Recombination. *Daniel B. Reisenfeld, John C. Raymond, Albert R. Young, & John L. Kohl.* 389, L37, 66-E5 (1992)

A Rotating Tomographic Imager for Solar Extreme-Ultraviolet/Soft X-Ray Emission. *Joseph M. Davila & W. T. Thompson.* 389, L91, 73-F8 (1992)

The Sun as a Star: High Spectral Resolution Solar Data Degraded to Low-Dispersion *IUE* Resolution. *J. G. Doyle & J. W. Cook.* 391, 393, 90-G1 (1992)

Evidence for Mass Outflow in the Low Solar Corona over a Large Sunspot. *Werner M. Neupert, Jeffrey W. Brosius, Roger J. Thomas, & William T. Thompson.* 392, L95, 113-F6 (1992)

The *Galileo* and *Pioneer Venus* Ultraviolet Spectrometer Experiments: Solar Lyman-α Latitude Variation at Solar Maximum from Interplanetary Lyman-α Observations. *W. R. Pryor, J. M. Ajello, C. A. Barth, C. W. Hord, A. I. F. Stewart, K. E. Simmons, W. E. McClintock, B. R. Sandel, & D. E. Shemansky.* 394, 363, 132-D11 (1992)

Dielectronic Recombination as a Function of Electric Field Strength. *Daniel B. Reisenfeld.* 398, 386, 186-E9 (1992)

Extreme Ultraviolet Line Ratios for Ca XV Applicable to Solar Flare Spectra. *F. P. Keenan, E. S. Conlon, V. J. Foster, K. M. Aggarwal, & K. G. Widing.* 401, 411, 226-B5 (1992)

Photon Escape Probabilities from Resolved Sources: Application to Solar C III Limb Emission. *S. O. Kastner & A. K. Bhatia.* 401, 416, 226-C1 (1992)

Solar Doppler-Shift Measurements in the Ne VII 465 Å Emission Line. *John T. Mariska & James F. Dowdy, Jr.* 401, 754, 231-G8 (1992)

O I Lines in the Sun and Stars. I. Understanding the Resonance Lines. *M. Carlsson & P. G. Judge.* 402, 344, 5-D9 (1993)

The He II 1640 Å Multiplet Observed from Solar Prominences. *J. M. Laming & U. Feldman.* 403, 434, 19-B11 (1993)

Identification of the Fe XV $3s3p\ ^1P$–$3p^2\ ^1S$ Line in Solar Flare Spectra and Its Use as an Electron Density Diagnostic. *F. P. Keenan, P. L. Dufton, E. S. Conlon, V. J. Foster, A. E. Kingston, & K. G. Widing.* 405, 798, 53-A7 (1993)

Energy Balance in the Solar Transition Region. III. Helium Emission in Hydrostatic, Constant-Abundance Models with Diffusion. *J. M. Fontenla, E. H. Avrett, & R. Loeser.* 406, 319, 59-A7 (1993)

Solar Coronal Observations and Formation of the He II 304 Å Line. *S. D. Jordan, W. T. Thompson, R. J. Thomas, & W. M. Neupert.* 406, 346, 59-C8 (1993)

Theoretical Emission-Line Strengths for Fe XXIII and a Comparison with Solar Observational Data. *F. P. Keenan, E. S. Conlon, G. A. Warren, A. W. Boone, & P. H. Norrington.* 406, 350, 59-D1 (1993)

Observed Redshifts in O V and Downflows in the Solar Transition Region. *P. Brekke.* 408, 735, 94-C11 (1993)

Atomic Transition Probabilities of Fe II Lines Determined from Solar Emission Spectra. I. The 2000–2800 Å Wavelength Range. *J. O. Ekberg & U. Feldman.* 86, 611, 22-D7 (1993)

Observational Evidence for Hotter Transition Region Loops within the Supergranular Network. *James F. Dowdy, Jr.* 411, 406, 132-D8 (1993)

Simultaneous Observations of Solar Plage with the Solar Extreme Ultraviolet Rocket Telescope and Spectrograph (SERTS), the VLA, and the Kitt Peak Magnetograph. *Jeffrey W. Brosius, Joseph M. Davila, William T. Thompson, Roger J. Thomas, Gordon D. Holman, N. Gopalswamy, Stephen M. White, Mukul R. Kundu, & Harrison P. Jones.* 411, 410, 132-E4 (1993)

A Doppler Dimming Determination of Coronal Outflow Velocity. *Leonard Strachan, John L. Kohl, Heinz Weiser, George L. Withbroe, & Richard H. Munro.* 412, 410, 147-B13 (1993)

An Ultraviolet Spectral Atlas of the Sun between 1190 and 1730 Å. *P. Brekke.* 87, 443, 33-C9 (1993)

How Reliable are Coronal Hole Temperatures Deduced from Observations? *S. R. Habbal, R. Esser, & M. B. Arndt.* 413, 435, 161-F6 (1993)

Nonphotospheric Abundances in a Solar Active Region. *K. G. Widing & U. Feldman.* 416, 392, 206-A1 (1993)

Ne VI Line Ratios in the Sun. *F. P. Keenan, E. S. Conlon, G. A. Warren, A. K. Pradhan, H. L. Zhang, D. H. Sampson, & K. G. Widing.* 421, 851, 28-G8 (1994)

Extreme Ultraviolet Spectrum of a Solar Active Region from SERTS. *Roger J. Thomas & Werner M. Neupert.* 91, 461, 24-G4 (1994)

Time Evolution of a Miniflare as Seen in Hα, UV Lines, and X-Rays. *J. Fontenla, B. Schmieder, G. M. Simnett, & E. Tandberg-Hanssen.* 424, 1022, 77-E3 (1994)

Solar Coronal Temperature Diagnostics Using Emission Lines from Multiple Stages of Ionization of Iron. *Jeffrey W. Brosius, Joseph M. Davila, Roger J. Thomas, & William T. Thompson.* 425, 343, 84-E7 (1994)

The Allowed Lines of O IV near 1340 Å in High Electron Density Solar Flares. *J. W. Cook, F. P. Keenan, & A. K. Bhatia.* 425, 861, 92-E1 (1994)

The Solar Abundance of Helium Determined from a Redshifted Plasma Flow over a Sunspot. *J. M. Laming & U. Feldman.* 426, 414, 101-D3 (1994)

Observational Tests for Nonequilibrium Ionization in the Solar Corona. *D. Spadaro, P. Leto, & S. K. Antiochos.* 427, 453, 115-E1 (1994)

The Fe XIV Spectrum: Predicted Line Intensities and Solar Identifications. *A. K. Bhatia, S. O. Kastner, F. P. Keenan, E. S. Conlon, & K. G. Widing.* 427, 497, 116-B8 (1994)

Exploring the Fine Structure at the Limb in Coronal Holes. *Margarita Karovska, Solon F. Blundell, & Shadia Rifai Habbal.* 428, 854, 141-A1 (1994)

New Radiometric Values of the Solar Ultraviolet Continuum Radiation from 1500 to 1700 Å. *P. Brekke & O. Kjeldseth-Moe.* 431, L55, 183-B1 (1994)

Dynamical Structure of Extreme Ultraviolet Macrospicules. *Margarita Karovska & Shadia Rifai Habbal.* 431, L59, 183-B7 (1994)

The Determination of Electron Densities in the Solar Atmosphere from the 1718.56 Å/1486.51 Å Emission-Line Ratio in N IV. *F. P. Keenan, L. K. Harra, G. A. Doschek, & J. W. Cook.* 432, 806, 206-A10 (1994)

Fe XVI Line Ratios in the Sun. *F. P. Keenan, E. S. Conlon, V. J. Foster, S. S. Tayal, & K. G. Widing.* 432, 809, 206-B1 (1994)

The Formation of the Solar He II 1640.4 Å Emission Line. *Cathrine Wahlstrøm & Mats Carlsson.* 433, 417, 213-E1 (1994)

Simultaneous Ultraviolet and X-Ray Observations of Solar Microflares. *J. G. Porter, J. M. Fontenla, & G. M. Simnett.* 438, 472, 8-B1 (1995)

Abundance Ratios of Oxygen, Neon, and Magnesium in Solar Active Regions and Flares: The FIP Effect. *K. G. Widing & U. Feldman.* 442, 446, 83-B3 (1995)

The Solar Lyα Line Profile. *Thomas N. Woods, Gary J. Rottman, O. R. White, Juan Fontenla, & E. H. Avrett.* 442, 898, 92-E4 (1995)

Stellar Coronal Abundances. III. The Solar First Ionization Potential Effect Determined from Full-Disk Observation. *J. Martin Laming, Jeremy J. Drake, & Kenneth G. Widing.* 443, 416, 100-G2 (1995)

Ultraviolet Observations of the Structure and Dynamics of an Active Region at the Limb. *C. M. Korendyke, K. P. Dere, D. G. Socker, G. E. Brueckner, & B. Schmieder.* 443, 869, 109-G10 (1995)

The O IV and S IV Intercombination Lines in Solar and Stellar Ultraviolet Spectra. *J. W. Cook, F. P. Keenan, P. L. Dufton, A. E. Kingston, A. K. Pradhan, H. L. Zhang, J. G. Doyle, & M. A. Hayes.* 444, 936, 129-C9 (1995)

Identification of Low-Latitude Coronal Plumes in Extreme-Ultraviolet Spectroheliograms. *Y.-M. Wang & N. R. Sheeley, Jr.* 446, L51, 161-A8 (1995)

The Mg I λ285.21 Nanometer Line: An Example of Non-LTE Line Formation. *Han Uitenbroek & Carine Briand.* 447, 453, 178-F9 (1995)

Solution to the Bivariate Integral Inversion Problem: The Determination of Emission Measures Differential in Temperature and Density. *Veronika Hubeny & Philip G. Judge.* 448, L61, 200-C13 (1995)

Coronal Plumes and Their Relationship to Network Activity. *Y.-M. Wang & N. R. Sheeley, Jr.* 452, 457, 268-D1 (1995)

Solar Lyman Series Line Profiles and Atomic Hydrogen Excitation Rates. *R. R. Meier.* 452, 462, 268-E1 (1995)

Extreme Ultraviolet Emission Lines of Fe XIII in Solar and Stellar Spectra. *F. P. Keenan, V. J. Foster, J. J. Drake, S. S. Tayal, & K. G. Widing.* 453, 906, 296-D9 (1995)

Observed Redshifts in the Solar Transition Region above Active and Quiet Regions. *H. Achour, P. Brekke, O. Kjeldseth-Moe, & P. Maltby.* 453, 945, 297-A9 (1995)

Quiet-Sun Connection between Intensity, Doppler Shift, and Line Broadening in Solar Ultraviolet Emission Lines. *N. Brynildsen, O. Kjeldseth-Moe, & P. Maltby.* 455, L81, 325-G8 (1995)

On the Failure of Standard Emission Measure Analysis for Solar Extreme-Ultraviolet and Ultraviolet Irradiance Spectra. *P. G. Judge, T. N. Woods, P. Brekke, & G. J. Rottman.* 455, L85, 326-A2 (1995)

SUN: X-RAYS

A Study of Solar Flare Energy Transport Based on Coordinated Hα and X-Ray Observations. *Richard C. Canfield, Dominic M. Zarro, Jean-Pierre Wülser, & Brian R. Dennis.* 367, 671, 21-E11 (1991)

On the Transport and Acceleration of Solar Flare Particles in a Coronal Loop. *James M. Ryan & Martin A. Lee.* 368, 316, 26-A7 (1991)

Solar Radio Microbursts at 1.4 GHz. *T. S. Bastian.* 370, L49, 53-F11 (1991)

A Slingshot Model for Solar Flares. *Gregory Benford.* 373, 671, 96-C9 (1991)

Consequences of Strong Pitch-Angle Diffusion of Particles in Solar Flares. *P. A. Bespalov, V. V. Zaitsev, & A. V. Stepanov.* 374, 369, 102-F5 (1991)

Coronal Magnetic Structures Observing Campaign. I. Simultaneous Microwave and Soft X-Ray Observations of Active Regions at the Solar Limb. *N. Nitta, S. M. White, M. R. Kundu, N. Gopalswamy, G. D. Holman, J. W. Brosius, J. T. Schmelz, J. L. R. Saba, & K. T. Strong.* 374, 374, 102-F11 (1991)

Interrelation of Soft and Hard X-Ray Emissions during Solar Flares. I. Observations. *R. M. Winglee, A. L. Kiplinger, D. M. Zarro, G. A. Dulk, & J. R. Lemen.* 375, 366, 115-D13 (1991)

Interrelation of Soft and Hard X-Ray Emissions during Solar Flares. II. Simulation Model. *R. M. Winglee, G. A. Dulk, P. L. Bornmann, & J. C. Brown.* 375, 382, 115-F1 (1991)

Coronal Dynamics of a Quiescent Active Region. *Julia L. R. Saba & Keith T. Strong.* 375, 789, 122-D9 (1991)

Flares Observed by the Normal Incidence X-Ray Telescope on 1989 September 11. *M. Herant, F. Pardo, E. Spiller, & L. Golub.* 376, 797, 136-C6 (1991)

Magnetohydrodynamics of an Impulsively Heated, Hard X-Ray Emitting Filament. *George Roumeliotis & A. Gordon Emslie.* 377, 685, 148-B9 (1991)

Multi–Wave Band *SMM*–VLA Observations of an M2 Flare and an Associated Coronal Mass Ejection. *Robert F. Willson, Joan T. Schmelz, Raymond D. Gonzalez, Kenneth R. Lang, & Kermit L. Smith.* 378, 360, 155-D6 (1991)

Center-to-Limb Variations of Characteristics of Solar Flare Hard X-Ray and Gamma-Ray Emission. *James M. McTiernan & Vahé Petrosian.* 379, 381, 167-F11 (1991)

The Iron-to-Calcium Abundance Ratio in the 20×10^6 K Plasma of Medium and Large Solar Flares. *K. J. H. Phillips & U. Feldman.* 379, 401, 168-A5 (1991)

Avalanches and the Distribution of Solar Flares. *Edward T. Lu & Russell J. Hamilton.* 380, L89, 188-F5 (1991)

Soft X-Ray Emission from Electron-Beam–heated Solar Flares. *John T. Mariska & Dominic M. Zarro.* 381, 572, 197-F10 (1991)

Relationships between Temperature and Emission Measure in Solar Flares Determined from Highly Ionized Iron Spectra and from Broadband X-Ray Detectors. *U. Feldman, G. A. Doschek, J. T. Mariska, & C. M. Brown.* 450, 441, 234-B1 (1995)

Observations and Interpretation of Soft X-Ray Limb Absorption Seen by the Normal Incidence X-Ray Telescope. *A. Daw, E. E. DeLuca, & L. Golub.* 453, 929, 296-G1 (1995)

SUN: X-RAYS, GAMMA RAYS

Energetics and Dynamics in a Large Solar Flare of 1989 March. *Jean-Pierre Wülser, Dominic M. Zarro, & Richard C. Canfield.* 384, 341, 5-B13 (1992)

Fluid Flow in a Jet and the Ca XIX Line Profiles Observed during Solar Flares. *P. L. Bornmann & J. R. Lemen.* 385, 363, 16-D1 (1992)

Fe XVIII Emission-Line Intensities in the Sun. *D. L. McKenzie, F. P. Keenan, S. M. McCann, K. A. Berrington, A. Hibbert, & M. Mohan.* 385, 378, 16-E5 (1992)

Transitions from Metastable Levels Emitted during Short-Duration Bursts: How Valid Are Their Calculated Intensities? *Uri Feldman.* 385, 758, 22-E1 (1992)

Coronal Magnetic Structures Observing Campaign. IV. Multiwaveband Observations of Sunspot and Plage-associated Coronal Emission. *Jeffrey W. Brosius, Robert F. Willson, Gordon D. Holman, & Joan T. Schmelz.* 386, 347, 28-E1 (1992)

Energy Spectra of Ions from Impulsive Solar Flares. *D. V. Reames, I. G. Richardson, & K.-P. Wenzel.* 387, 715, 47-E11 (1992)

High-Energy Gamma-Ray Emission from Pion Decay in a Solar Flare Magnetic Loop. *Natalie Mandzhavidze & Reuven Ramaty.* 389, 739, 70-E6 (1992)

Characteristics of Hard X-Ray Spectra of Impulsive Solar Flares. *G. A. Dulk, A. L. Kiplinger, & R. M. Winglee.* 389, 756, 70-F11 (1992)

Variations in the Relative Elemental Abundances of Oxygen, Neon, Magnesium, and Iron in High-Temperature Solar Active-Region and Flare Plasmas. *D. L. McKenzie & U. Feldman.* 389, 764, 70-G7 (1992)

A Rotating Tomographic Imager for Solar Extreme-Ultraviolet/Soft X-Ray Emission. *Joseph M. Davila & W. T. Thompson.* 389, L91, 73-F8 (1992)

Stereoscopic Observations of a Solar Flare Hard X-Ray Source in the High Corona. *S. R. Kane, J. McTiernan, J. Loran, E. E. Fenimore, R. W. Klebesadel, & J. G. Laros.* 390, 687, 83-G7 (1992)

Impulsive Phase Fe Kα Emission in a Flare of 1989 March. *D. M. Zarro, B. R. Dennis, & G. L. Slater.* 391, 865, 98-F6 (1992)

X-Ray Emission-Line Ratios in Mg XI as Electron Temperature Diagnostics for Solar Flares and Active Regions. *F. P. Keenan, K. J. H. Phillips, L. K. Harra, E. S. Conlon, & A. E. Kingston.* 393, 815, 126-A9 (1992)

Observation of Upflows during Soft X-Ray Solar Flares. *J. F. Seely & Uri Feldman.* 394, 697, 138-B9 (1992)

On the Process of Resistive Heating Instability and the Formation of Coronal Loop Structures. *Yu-Qing Lou.* 395, 682, 151-F13 (1992)

Resonance Scattering of Fe XVII: A Density Diagnostic. *J. T. Schmelz, J. L. R. Saba, & K. T. Strong.* 398, L115, 194-F6 (1992)

X-Ray Observations of Sunspot Penumbral Structure. *B. J. Sams III, L. Golub, & N. O. Weiss.* 399, 313, 199-B8 (1992)

Coronal Magnetic Structures Observing Campaign. II. Magnetic and Plasma Properties of a Solar Active Region. *J. T. Schmelz, G. D. Holman, J. W. Brosius, & R. D. Gonzalez.* 399, 733, 207-B1 (1992)

Observation of Solar Neutrons Associated with the Large Flare on 1991 June 4. *Y. Muraki, K. Murakami, M. Miyazaki, K. Mitsui, S. Shibata, S. Sakakibara, T. Sakai, T. Takahashi, T. Yamada, & K. Yamaguchi.* 400, L75, 220-F1 (1992)

A Hybrid Thermal/Nonthermal Model for the Energetic Emissions from Solar Flares. *Gordon D. Holman & Stephen G. Benka.* 400, L79, 220-F8 (1992)

The Coevolution of Decimetric Millisecond Spikes and Hard X-Ray Emission during Solar Flares. *Markus J. Aschwanden & Manuel Güdel.* 401, 736, 231-F1 (1992)

On the Absolute Abundance of Calcium in Solar Flares. *Alphonse C. Sterling, George A. Doschek, & Uri Feldman.* 404, 394, 32-F7 (1993)

The Scattered Solar X-Ray Background of the *ROSAT* PSPC. *S. L. Snowden & M. J. Freyberg.* 404, 403, 32-G3 (1993)

Variability of the Occurrence Frequency of Solar Flares as a Function of Peak Hard X-Ray Rate. *T. Bai.* 404, 805, 39-A1 (1993)

The Solar White-Light Flare of 1989 March 7: Simultaneous Multiwavelength Observations at High Time Resolution. *Donald F. Neidig, Alan L. Kiplinger, Howard S. Cohl, & Philip H. Wiborg.* 406, 306, 58-G6 (1993)

Lower Hybrid Resonance Acceleration of Electrons and Ions in Solar Flares and the Associated Microwave Emission. *K. G. McClements, R. Bingham, J. J. Su, J. M. Dawson, & D. S. Spicer.* 409, 465, 102-F9 (1993)

Evidence for a Spatially Extended Component of Gamma Rays from Solar Flares. *W. Thomas Vestrand & David J. Forrest.* 409, L69, 111-F8 (1993)

The Distribution of Flare Parameters and Implications for Coronal Heating. *Theodore T. Lee, Vahé Petrosian, & James M. McTiernan.* 412, 401, 147-B1 (1993)

Multiple Wavelength Observations of an Off-Limb Eruptive Solar Flare. *T. A. Kucera, G. A. Dulk, A. L. Kiplinger, R. M. Winglee, T. S. Bastian, & M. Graeter.* 412, 853, 154-D10 (1993)

Simulations of the Ca XIX Spectral Emission from a Flaring Solar Coronal Loop. II. Impulsive Heating by Accelerated Electrons. *E. Antonucci, M. A. Dodero, R. Martin, G. Peres, F. Reale, & S. Serio.* 413, 786, 166-B11 (1993)

VLA-BATSE Observations of an Intense Solar Decimetric and Hard X-Ray Burst. *Robert F. Willson.* 413, 798, 166-C11 (1993)

Long-Term Containment of Energetic Particles in Coronal Loops. *Yun-Tung Lau, Theodore G. Northrop, & John M. Finn.* 414, 908, 182-E10 (1993)

The 1992 January 5 Flare at 13.3 UT: Observations from *Yohkoh*. *G. A. Doschek, K. T. Strong, R. D. Bentley, C. M. Brown, J. L. Culhane, A. Fludra, E. Hiei, J. Lang, J. T. Mariska, K. J. H. Phillips, C. D. Pike, A. C. Sterling, T. Watanabe, L. W. Acton, M. E. Bruner, T. Hirayama, S. Tsuneta, E. Rolli, T. Kosugi, M. Yoshimori, H. S. Hudson, T. R. Metcalf, J.-P. Wuelser, Y. Uchida, & Y. Ogawara.* 416, 845, 214-A1 (1993)

Quasi-periodic Particle Injection into Coronal Loops. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Victor Gaizauskas.* 416, 857, 214-B5 (1993)

Temperature and Density Structure of the 1991 November 2 Flare Observed by the *YOHKOH* Soft X-Ray Telescope and Hard X-Ray Telescope. *James M. McTiernan, Sharad R. Kane, Jon M. Loran, James R. Lemen, Loren W. Acton, Hirohisa Hara, Saku Tsuneta, & Takeo Kosugi.* 416, L91, 216-F6 (1993)

Implications of the Soft X-Ray versus Hard X-Ray Temporal Relationship in Solar Flares. *Peng Li, A. Gordon Emslie, & John T. Mariska.* 417, 313, 221-D6 (1993)

Two Accelerated Electron Populations in the 1980 June 27 Solar Flare. *R. P. Lin & Christopher M. Johns.* 417, L53, 223-E1 (1993)

The Timing of Electron Beam Signatures in Hard X-Ray and Radio: Solar Flare Observations by BATSE/*Compton Gamma-Ray Observatory* and PHOENIX. *Markus J. Aschwanden, Arnold O. Benz, & Richard A. Schwartz.* 417, 790, 229-C3 (1993)

The Coronal Structure above Sunspots and Pores. *R. Harmon, R. Rosner, H. Zirin, E. Spiller, & L. Golub.* 417, L83, 230-E1 (1993)

Particle Acceleration and Flare Triggering in Large-Scale Magnetic Loops Joining Widely Spaced Active Regions. *Robert F. Willson, Kenneth R. Lang, & Dale E. Gary.* 418, 490, 237-B1 (1993)

Magnetospheres of Solar Active Regions Inferred from Spectral-Polarization Observations with High Spatial Resolution. *K. R. Lang, R. F. Willson, J. N. Kile, J. Lemen, K. T. Strong, V. L. Bogod, G. B. Gelfreikh, B. I. Ryabov, S. R. Hafizov, V. E. Abramov, & S. V. Svetkov.* 419, 398, 251-B7 (1993)

Flare Plasma Dynamics Observed with the *Yohkoh* Bragg Crystal Spectrometer. I. Properties of the Ca XIX Resonance Line. *John T. Mariska, G. A. Doschek, & R. D. Bentley.* 419, 418, 251-D7 (1993)

Helium-like Argon Line Emission in Solar Flares. *K. J. H. Phillips, L. K. Harra, F. P. Keenan, D. M. Zarro, & M. Wilson.* 419, 426, 251-E3 (1993)

Current Sheets and Reconnection Driven by Footpoint Motion in Two-dimensional Coronal Loops with X-Type Neutral Lines. *Xiaogang Wang & A. Bhattacharjee.* 420, 415, 6-A9 (1994)

Temperature and Hard X-Ray Signatures for Energetic Proton Events. *Howard A. Garcia.* 420, 422, 6-B3 (1994)

Solar Coronal Abundances of Elements with Low First Ionization Potential: Chromium, Calcium, and Aluminum. *D. L. McKenzie & U. Feldman.* 420, 892, 14-A7 (1994)

Searching for Hard X-Ray Directivity during the Rise, Peak, and Decay Phases of Solar Flares. *Peng Li.* 421, 381, 20-F7 (1994)

The Correlation of Solar Flare Hard X-Ray Bursts with Doppler Blueshifted Soft X-Ray Flare Emission. *R. D. Bentley, G. A. Doschek, G. M. Simnett, M. L. Rilee, J. T. Mariska, J. L. Culhane, T. Kosugi, & T. Watanabe.* 421, L55, 22-B13 (1994)

Very Impulsive Solar Flares Observed with the *Yohkoh* Spacecraft. *U. Feldman, E. Hiei, K. J. H. Phillips, C. M. Brown, & J. Lang.* 421, 843, 28-F7 (1994)

Loop Models of Low Coronal Structures Observed by the Normal Incidence X-Ray Telescope (NIXT). *G. Peres, F. Reale, & L. Golub.* 422, 412, 35-B11 (1994)

Impulsive Behavior in Solar Soft X-Radiation. *H. S. Hudson, K. T. Strong, B. R. Dennis, D. Zarro, M. Inda, T. Kosugi, & T. Sakao.* 422, L25, 36-D13 (1994)

Thickness Variations along Coronal Loops Inferred from Vector Magnetograph Data. *A. N. McClymont & Z. Mikić.* 422, 899, 43-B3 (1994)

Morphology of Active Region Transient Brightenings with the *Yohkoh* Soft X-Ray Telescope. *Toshifumi Shimizu, Saku Tsuneta, Loren W. Acton, James R. Lemen, Yoshiaki Ogawara, & Yutaka Uchida.* 422, 906, 43-B13 (1994)

Millimeter, Microwave, Hard X-Ray, and Soft X-Ray Observations of Energetic Electron Populations in Solar Flares. *M. R. Kundu, S. M. White, N. Gopalswamy, & J. Lim.* 90, 599, 11-C1 (1994)

Solar Hard X-Ray and Gamma-Ray Observations from *Granat*. *N. Vilmer.* 90, 611, 11-D1 (1994)

Pulsed Acceleration in Solar Flares. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Mukul R. Kundu.* 90, 631, 11-E11 (1994)

Gamma-Ray Spectral Observations with *Yohkoh*. *M. Yoshimori, K. Suga, K. Morimoto, T. Hiraoka, J. Sato, K. Kawabata, & K. Ohki.* 90, 639, 11-F7 (1994)

Gamma-Ray Precursors of Solar Flares. *E. Rieger.* 90, 645, 11-G1 (1994)

Positron Annihilation Radiation from the 1991 November 15 Flare. *K. Kawabata, M. Yoshimori, K. Suga, K. Morimoto, T. Hiraoka, J. Sato, & K. Ohki.* 90, 701, 12-D13 (1994)

The Flare of 1989 September 9 09:09 UT: Does Coronal Loop Collision Initiate Efficient Gamma-Ray Emission? *H. Aurass, A. Hofmann, & E. Rieger.* 90, 707, 12-E6 (1994)

Electron-Beam Evolution in Partially Ionized Hydrogenic Plasma with Return Currents. *D. V. Syniavskii & V. V. Zharkova.* 90, 729, 12-G4 (1994)

The Morphology of the 10^7 K Plasma in Solar Flares. I. Nonimpulsive Flares. *U. Feldman, J. F. Seely, G. A. Doschek, K. T. Strong, L. W. Acton, Y. Uchida, & S. Tsuneta.* 424, 444, 67-D1 (1994)

Multispectral Observations of Chromospheric Evaporation in the 1991 November 15 X-Class Solar Flare. *Jean-Pierre Wülser, Richard C. Canfield, Loren W. Acton, J. Leonard Culhane, Andrew Phillips, Andrzej Fludra, Taro Sakao, Satoshi Masuda, Takeo Kosugi, & Saku Tsuneta.* 424, 459, 67-E4 (1994)

Time Evolution of a Miniflare as Seen in Hα, UV Lines, and X-Rays. *J. Fontenla, B. Schmieder, G. M. Simnett, & E. Tandberg-Hanssen.* 424, 1022, 77-E3 (1994)

Evidence for Intense Coronal Prompt Gamma-Ray Line Emission from a Solar Flare. *C. Barat, G. Trottet, N. Vilmer, J.-P. Dezalay, R. Talon, R. Sunyaev, O. Terekhov, & A. Kuznetsov.* 425, L109, 94-G10 (1994)

Si XIII Emission Lines in Solar Flare X-Ray Spectra Obtained with the *P78-1* Satellite. *F. P. Keenan, D. L. McKenzie, K. J. H. Phillips, & E. S. Conlon.* 426, 454, 101-G10 (1994)

Directivity of 100–500 keV Solar Flare Hard X-Ray Emission. *P. Li, K. Hurley, C. Barat, M. Niel, R. Talon, & V. Kurt.* 426, 758, 107-G10 (1994)

Are Solar Gamma-Ray–Line Flares Different from Other Large Flares? *E. W. Cliver, N. B. Crosby, & B. R. Dennis.* 426, 767, 108-A8 (1994)

A Converging Flux Model of an X-Ray Bright Point and an Associated Canceling Magnetic Feature. *E. R. Priest, C. E. Parnell, & S. F. Martin.* 427, 459, 115-E9 (1994)

Nonthermal Processes in Flaring X-Ray–bright Points. *M. R. Kundu, K. T. Strong, M. Pick, S. M. White, H. S. Hudson, K. L. Harvey, & S. R. Kane.* 427, L59, 118-A1 (1994)

Electric Currents and Coronal Heating in NOAA Active Region 6952. *T. R. Metcalf, R. C. Canfield, H. S. Hudson, D. L. Mickey, J.-P. Wülser, P. C. H. Martens, & S. Tsuneta.* 428, 860, 141-A10 (1994)

The Composition of a Coronal Active Region. *K. Waljeski, D. Moses, K. P. Dere, J. L. R. Saba, K. T. Strong, D. F. Webb, & D. M. Zarro.* 429, 909, 157-A5 (1994)

Imaging Spectroscopy of Solar Microwave Radiation. I. Flaring Emission. *Jeremy Lim, Dale E. Gary, Gordon J. Hurford, & James R. Lemen.* 430, 425, 164-E13 (1994)

Solar Fine-Scale Structures in the Corona, Transition Region, and Lower Atmosphere. *Dan Moses, J. W. Cook, J.-D. F. Bartoe, G. E. Brueckner, K. P. Dere, D. F. Webb, J. M. Davis, J. W. Harvey, F. Recely, S. F. Martin, & H. Zirin.* 430, 913, 173-C9 (1994)

Coherent-Phase or Random-Phase Acceleration of Electron Beams in Solar Flares. *Markus J. Aschwanden, Arnold O. Benz, & Maria L. Montello.* 431, 432, 181-D7 (1994)

A Gigantic Coronal Jet Ejected from a Compact Active Region in a Coronal Hole. *K. Shibata, N. Nitta, K. T. Strong, R. Matsumoto, T. Yokoyama, T. Hirayama, H. Hudson, & Y. Ogawara.* 431, L51, 183-A9 (1994)

The 1991 November 9 Flare at 03.2 UT: Observations from *Yohkoh*. *G. A. Doschek, J. T. Mariska, K. T. Strong, R. D. Bentley, C. M. Brown, J. L. Culhane, J. Lang, A. C. Sterling, & T. Watanabe.* 431, 888, 189-F10 (1994)

Detection of 17 GHz Radio Emission from X-Ray–bright Points. *M. R. Kundu, K. Shibasaki, S. Enome, & N. Nitta.* 431, L155, 192-E13 (1994)

Microwave Spectral Imaging, Hα, and Hard X-Ray Observations of a Solar Limb Flare. *H. Wang, D. E. Gary, J. Lim, & R. A. Schwartz.* 433, 379, 213-A9 (1994)

Gamma-Ray Emission and Electron Accleration in Solar Flares. *Vahé Petrosian, James M. McTiernan, & Holger Marschhäuser.* 434, 747, 238-B2 (1994)

Flare Plasma Dynamics Observed with the *Yohkoh* Bragg Crystal Spectrometer. II. Properties of the Fe XXV, Ca XIX, and S XV Resonance Lines. *John T. Mariska.* 434, 756, 238-C1 (1994)

A Thermal/Nonthermal Model for Solar Hard X-Ray Bursts. *Stephen G. Benka & Gordon D. Holman.* 435, 469, 249-G11 (1994)

Iron Kβ Line Emission in Solar Flares Observed by *Yohkoh* and the Solar Abundance of Iron. *K. J. H. Phillips, C. D. Pike, J. Lang, T. Watanabe, & M. Takahashi.* 435, 888, 258-D3 (1994)

Fe XXV Temperatures in Flares from the *Yohkoh* Bragg Crystal Spectrometer. *Alphonse C. Sterling, George A. Doschek, & C. David Pike.* 435, 898, 258-E3 (1994)

Gamma-Ray and Millimeter-Wave Emissions from the 1991 June X-Class Solar Flares. *Reuven Ramaty, Richard A. Schwartz, Shinzo Enome, & Hiroshi Nakajima.* 436, 941, 278-E13 (1994)

Transient Microwave Brightenings in Solar Active Regions: Comparison between VLA and *Yohkoh* Observations. *N. Gopalswamy, T. E. W. Payne, E. J. Schmahl, M. R. Kundu, J. R. Lemen, K. T. Strong, R. C. Canfield, & J. de La Beaujardiere.* 437, 522, 290-C3 (1994)

Simultaneous Ultraviolet and X-Ray Observations of Solar Microflares. *J. G. Porter, J. M. Fontenla, & G. M. Simnett.* 438, 472, 8-B1 (1995)

The Bright Knots at the Tops of Soft X-Ray Loops: Quantitative Results from *Yohkoh*. *G. A. Doschek, K. T. Strong, & S. Tsuneta.* 440, 370, 46-C7 (1995)

The 1991 October 24 Flare: A Challenge for Standard Models. *J.-F. de La Beaujardière, R. C. Canfield, H. S. Hudson, J.-P. Wülser, L. Acton, T. Kosugi, & S. Masuda.* 440, 386, 46-E3 (1995)

Sequences of Correlated Hard X-Ray and Type III Bursts during Solar Flares. *Markus J. Aschwanden, Maria L. Montello, Brian R. Dennis, & Arnold O. Benz.* 440, 394, 46-E14 (1995)

Testing the DC-Electric Field Model in a Solar Flare Observed by *Yohkoh* and the *Compton Gamma-Ray Observatory*. *D. M. Zarro, J. T. Mariska, & B. R. Dennis.* 440, 888, 55-D8 (1995)

The Magnetic Evolution of AR 6555 Which Led to Two Impulsive, Relatively Compact, X-Type Flares. *J. M. Fontenla, A. Ambastha, B. Kalman, & Gy. Csepura.* 440, 894, 55-E4 (1995)

Directivity and Its Energy Dependence in Solar Flare Energetic Emission. *Peng Li.* 443, 855, 109-F1 (1995)

Flare Plasma Dynamics Observed with the *Yohkoh* Bragg Crystal Spectrometer. III. Spectral Signatures of Electron-Beam–heated Atmospheres. *John T. Mariska.* 444, 478, 120-B12 (1995)

Metric Type III Bursts from a Flaring X-Ray Bright Point near an Active Region. *M. R. Kundu, J. P. Raulin, M. Pick, & K. T. Strong.* 444, 922, 129-B3 (1995)

PHOBOS-GOES Soft X-Ray Observations of the Sun. *F. Farnik & H. Garcia.* 444, 929, 129-B13 (1995)

The Microwave and Hα Sources of the 1992 January 13 Flare. *H. Wang, D. E. Gary, H. Zirin, T. Kosugi, R. A. Schwartz, & G. Linford.* 444, L115, 131-B9 (1995)

Coordinated Observation of the Solar Corona Using the Norikura Coronagraph and the *Yohkoh* Soft X-Ray Telescope. *K. Ichimoto, H. Hara, A. Takeda, K. Kumagai, T. Sakurai, T. Shimizu, & H. S. Hudson.* 445, 978, 148-F8 (1995)

The Electrical Current Structure Associated with Solar Flare Electrons Accelerated by Large-Scale Electric Fields. *A. Gordon Emslie & Jean-Claude Hénoux.* 446, 371, 158-D1 (1995)

Energy Release and Dissipation during Giant Solar Flares. *S. R. Kane, K. Hurley, J. M. McTiernan, M. Sommer, M. Boer, & M. Niel.* 446, L47, 161-A1 (1995)

Morphology and Physical Parameters for Two Long-Duration Solar Flares: Observations from *Yohkoh*. *U. Feldman, J. F. Seely, G. A. Doschek, C. M. Brown, K. J. H. Phillips, & J. Lang.* 446, 860, 168-A4 (1995)

The Velocity Differential Emission Measure: Diagnostic of Bulk Plasma Motion in Solar Flares. *E. K. Newton, A. G. Emslie, & J. T. Mariska.* 447, 915, 188-E1 (1995)

Electron Time-of-Flight Differences in Solar Flares. *Markus J. Aschwanden, Richard A. Schwartz, & Daniel M. Alt.* 447, 923, 188-E12 (1995)

Absolute Abundances of Flaring Coronal Plasma Derived from *SMM* Spectral Observations. *A. Fludra & J. T. Schmelz.* 447, 936, 188-G1 (1995)

Detection of Nonthermal Radio Emission from Coronal X-Ray Jets. *M. R. Kundu, J. P. Raulin, N. Nitta, H. S. Hudson, M. Shimojo, K. Shibata, & A. Raoult.* 447, L135, 191-D7 (1995)

X-Ray Emission from the Sun in Its Youth and Old Age. *J. D. Dorren, M. Güdel, & E. F. Guinan.* 448, 431, 198-B3 (1995)

The Neupert Effect and the Chromospheric Evaporation Model for Solar Flares. *Theodore T. Lee, Vahé Petrosian, & James M. McTiernan.* 448, 915, 207-E7 (1995)

A Comparison of Active Region Temperatures and Emission Measures Observed in Soft X-Rays and Microwaves and Implications for Coronal Heating. *J. A. Klimchuk & D. E. Gary.* 448, 925, 207-F6 (1995)

Particle Simulation of a Collision between a Plasma Cloud and a Current Loop. *Jie Zhao, Jun-Ichi Sakai, & Ken-Ichi Nishikawa.* 449, L161, 227-G1 (1995)

The Radio Properties of Solar Active Region Soft X-Ray Transient Brightenings. *S. M. White, M. R. Kundu, T. Shimizu, K. Shibasaki, & S. Enome.* 450, 435, 234-A5 (1995)

Relationship between Cold and Hot Post–Solar Flare Loops and the Impact on the Reconnection Flare Model. *U. Feldman & J. F. Seely.* 450, 902, 243-D3 (1995)

Hot-Plasma Ejections Associated with Compact-Loop Solar Flares. *K. Shibata, S. Masuda, M. Shimojo, H. Hara, T. Yokoyama, S. Tsuneta, T. Kosugi, & Y. Ogawara.* 451, L83, 261-B2 (1995)

DC Electric Field Acceleration of Ions in Solar Flares. *Gordon D. Holman.* 452, 451, 268-C6 (1995)

Coronal Plumes and Their Relationship to Network Activity. *Y.-M. Wang & N. R. Sheeley, Jr.* 452, 457, 268-D1 (1995)

Gamma-Ray Measurements of Flare-to-Flare Variations in Ambient Solar Abundances. *Gerald H. Share & Ronald J. Murphy.* 452, 933, 277-E4 (1995)

A Novel Maximum-Likelihood Method for Image Reconstruction with Increased Sampling. *George Roumeliotis.* 452, 944, 277-F5 (1995)

Yohkho Soft X-Ray Spectroscopic Observations of the Bright Loop-Top Kernels of Solar Flares. *Josef I. Khan, Louise K. Harra-Murnion, Hugh S. Hudson, James R. Lemen, & Alphonse C. Sterling.* 452, L153, 280-F13 (1995)

Coordinated OVRO, BATSE, *Yohkoh*, and BBSO Observations of the 1992 June 25 M1.4 Flare. *H. Wang, D. E. Gary, H. Zirin, R. A. Schwartz, T. Sakao, T. Kosugi, & K. Shibata.* 453, 505, 288-A9 (1995)

Comparative Studies of Hard X-Ray Spectral Evolution in Solar Flares with High-Energy Proton Events Observed at Earth. *Alan L. Kiplinger.* 453, 973, 297-D4 (1995)

Soft X-Ray Loops and Coronal Heating. *Lisa J. Porter & James A. Klimchuk.* 454, 499, 306-B10 (1995)

Microwave and Hard X-Ray Observations of Footpoint Emission from Solar Flares. *M. R. Kundu, N. Nitta, S. M. White, K. Shibasaki, S. Enome, T. Sakao, T. Kosugi, & T. Sakurai.* 454, 522, 306-D11 (1995)

Scaling Law of Solar Coronal Loops Obtained with *Yohkoh*. *Ryouhei Kano & Saku Tsuneta.* 454, 934, 314-F7 (1995)

Solar Electron Beams Detected in Hard X-Rays and Radio Waves. *Markus J. Aschwanden, Arnold O. Benz, Brian R. Dennis, & Richard A. Schwartz.* 455, 347, 322-G12 (1995)

Accuracy, Uncertainties, and Delay Distribution of Electron Time-of-Flight Measurements in Solar Flares. *Markus J. Aschwanden & Richard A. Schwartz.* 455, 699, 331-E6 (1995)

VLA and *Yohkoh* Observations of an M1.5 Flare. *N. Gopalswamy, J.-P. Raulin, M. R. Kundu, N. Nitta, J. R. Lemen, R. Herrmann, D. Zarro, & T. Kosugi.* 455, 715, 331-G1 (1995)

Statistical Studies of *ISEE 3/ICE* Observations of Impulsive Hard X-Ray Solar Flares. *Kenneth R. Bromund, James M. McTiernan, & Sharad R. Kane.* 455, 733, 332-A8 (1995)

Solar Atmopheric Abundances and Energy Content in Flare Accelerated Ions from Gamma-Ray Spectroscopy. *Reuven Ramaty, Natalie Mandzhavidze, Benzion Kozlovsky, & Ronald J. Murphy.* 455, L193, 335-A4 (1995)

SURVEYS

A Magnitude-limited Survey of Cepheid Companions in the Ultraviolet. *Nancy Remage Evans.* 384, 220, 3-F4 (1992)

A Redshift Survey of *IRAS* Galaxies. IV. The Galaxy Distribution and the Inferred Density Field. *Michael A. Strauss, Marc Davis, Amos Yahil, & John P. Huchra.* 385, 421, 18-D11 (1992)

Star Formation in Taurus. I. The *IRAS* Faint Source Survey. *C. A. Beichman, F. Boulanger, & M. Moshir.* 386, 248, 27-C5 (1992)

Predicted Galaxy Counts in CO Emission. *Frances Verter.* 386, 398, 30-D1 (1992)

The Extended Medium Sensitivity Survey Distant Cluster Sample: X-Ray Data and Interpretation of the Luminosity Evolution. *J. P. Henry, I. M. Gioia, T. Maccacaro, S. L. Morris, J. T. Stocke, & A. Wolter.* 386, 408, 30-D13 (1992)

A Study of a 21 Centimeter–selected Sample of Galaxies. I. The Survey. *P. A. Henning.* 78, 365, 7-D3 (1992)

Spectroscopy and Spectral Types for 387 Stellar Objects from the Large, Bright QSO Survey. *Christopher Berg, Gary Wegner, Craig B. Foltz, Frederic H. Chaffee, Jr., & Paul C. Hewett.* 78, 409, 8-B7 (1992)

The Bell Laboratories H I Survey. *Antony A. Stark, Charles F. Gammie, Robert W. Wilson, John Bally, Richard A. Linke, Carl Heiles, & Mark Hurwitz.* 79, 77, 13-D1 (1992)

H I Observations of Galaxies in the Hercules Supercluster. II. Additional UGC Galaxies and Galaxies in Selected CGCG Fields. *Wolfram Freudling, Martha P. Haynes, & Riccardo Giovanelli.* 79, 157, 16-B1 (1992)

A Near-Infrared Imaging Survey of Interacting Galaxies: The Small Angular-Size Arp Systems. *Howard A. Bushouse & S. Adam Stanford.* 79, 213, 16-G11 (1992)

A New Catalog of 30,239 1.4 GHz Sources. *Richard L. White & Robert H. Becker.* 79, 331, 18-G9 (1992)

Relation of Redshift Surveys to Matter Distribution in Spherically Symmetric Dust Universes. *Hannu Kurki-Suonio & Edison Liang.* 390, 5, 74-B7 (1992)

The Stromlo–APM Redshift Survey. I. The Luminosity Function and Space Density of Galaxies. *J. Loveday, B. A. Peterson, G. Efstathiou, & S. J. Maddox.* 390, 338, 79-D5 (1992)

Mg II Absorption in the Spectra of 103 QSOs: Implications for the Evolution of Gas in High-Redshift Galaxies. *Charles C. Steidel & Wallace L. W. Sargent.* 80, 1, 22-B1 (1992)

The Emission-Line Properties of Low-Redshift Quasi-stellar Objects. *Todd A. Boroson & Richard F. Green.* 80, 109, 23-G9 (1992)

The Structure of Southern Extragalactic Radio Sources. *Paul A. Jones & W. Bruce McAdam.* 80, 137, 24-C3 (1992)

Compact Radio Sources near the Galactic Plane. *D. J. Helfand, S. Zoonematkermani, R. H. Becker, & R. L. White.* 80, 211, 25-B1 (1992)

The *Einstein* Slew Survey. *Martin Elvis, David Plummer, Jonathan Schachter, & G. Fabbiano.* 80, 257, 25-E9 (1992)

Radio Properties of Optically Selected Quasars. *K. L. Visnovsky, C. D. Impey, C. B. Foltz, P. C. Hewett, R. J. Weymann, & S. L. Morris.* 391, 560, 94-G11 (1992)

A 20 Centimeter VLA Survey of Abell Clusters of Galaxies. II. Images and Optical Identifications. *Frazer N. Owen, Richard A. White, & Jack O. Burns.* 80, 501, 30-D13 (1992)

Gravitational Lensing of Quasars as Seen by the *Hubble Space Telescope* Snapshot Survey. *D. Maoz, J. N. Bahcall, R. Doxsey, D. P. Schneider, N. A. Bahcall, O. Lahav, & B. Yanny.* 394, 51, 128-F6 (1992)

A Complete CO Survey of the Cygnus X Region. *Helen O. Leung & P. Thaddeus.* 81, 267, 38-F3 (1992)

Near-Infrared Observations of Young Stellar Objects in the ρ Ophiuchi Dark Cloud. *Thomas P. Greene & Erick T. Young.* 395, 516, 149-B5 (1992)

A Southern Sky Survey of the Peculiar Velocities of 1355 Spiral Galaxies. *D. S. Mathewson, V. L. Ford, & M. Buchhorn.* 81, 413, 41-B1 (1992)

The Spectroscopic and Photometric Evolution of Novae in the Bulge of M31. *Austin B. Tomaney & Allen W. Shafter.* 81, 683, 45-C11 (1992)

An *IRAS* Survey of Galactic Supernova Remnants. *Jon M. Saken, Robert A. Fesen, & J. Michael Shull.* 81, 715, 45-F9 (1992)

Optical Identification, Radio Galaxy Environment, and Statistical Properties for a Homogeneous Sample of 3196 Radio Sources from the Texas Survey. *Elizabeth P. Bozyan.* 82, 1, 49-B1 (1992)

The Case Low-Dispersion Northern Sky Survey. XIII. A Region in Central Bootes and Corona Borealis. *C. B. Stephenson, Peter Pesch, & D. Jack MacConnell.* 82, 471, 55-D3 (1992)

Pearson-Readhead Survey Sources: Properties of the Centimeter-Wavelength Flux and Polarization of a Complete Radio Sample. *M. F. Aller, H. D. Aller, & P. A. Hughes.* 399, 16, 195-C8 (1992)

A Redshift Survey of *IRAS* Galaxies. VII. The Infrared and Redshift Data for the 1.936 Jansky Sample. *Michael A. Strauss, John P. Huchra, Marc Davis, Amos Yahil, Karl B. Fisher, & John Tonry.* 83, 29, 57-D3 (1992)

Large-Scale Structure in the Universe: Results from the Stromlo-APM Redshift Survey. *J. Loveday, G. Efstathiou, B. A. Peterson, & S. J. Maddox.* 400, L43, 220-B1 (1992)

The CFHT North Galactic Pole Faint Galaxy Survey. *L. Infante & C. J. Pritchet.* 83, 237, 61-B1 (1992)

Detection and Selection Effects in Observations of Faint Galaxies. *Yuzuru Yoshii.* 403, 552, 22-D11 (1993)

Microjansky Source Counts and Spectral Indices at 8.44 GHz. *Rogier A. Windhorst, Edward B. Fomalont, R. Bruce Partridge, & James D. Lowenthal.* 405, 498, 49-C5 (1993)

A New Survey of Nebulae around Galactic Wolf-Rayet Stars in the Northern Sky. *Grant J. Miller & You-Hua Chu.* 85, 137, 7-G9 (1993)

Far-Ultraviolet Stellar Photometry: A Field in Monoceros. *Edward G. Schmidt & George R. Carruthers.* 408, 484, 91-C1 (1993)

A Highly Sensitive Radio Survey of Symbiotic Stars at 3.6 Centimeters. *E. R. Seaquist, M. Krogulec, & A. R. Taylor.* 410, 260, 115-C12 (1993)

VLA Observations of 91 Quasars at $0.35 < z < 1$. *Rob Price, Ann C. Gower, J. B. Hutchings, S. Talon, D. Duncan, & G. Ross.* 86, 365, 19-D9 (1993)

High-Resolution Infrared Maps from *IRAS* Observations of Large Galaxies. I. *S. K. Ghosh, R. P. Verma, T. N. Rengarajan, B. Das, & H. T. Saraiya.* 86, 401, 19-G9 (1993)

The Case Low-Dispersion Northern Sky Survey. XIV. A–F Stars in a Region in Southern Canes Venatici. *D. Jack MacConnell, C. B. Stephenson, & Peter Pesch.* 86, 453, 20-D9 (1993)

A VLA Survey of Optically Visible Galactic H II Regions. *Michel Fich.* 86, 475, 20-F7 (1993)

The Radio Properties of High-Redshift Quasars. I. Dual-Frequency Observations of 79 Steep-Spectrum Quasars at $z > 1.5$. *C. J. Lonsdale, P. D. Barthel, & G. K. Miley.* 87, 63, 27-G1 (1993)

A 20 Centimeter VLA Survey of Abell Clusters of Galaxies. III. Images and Optical Identifications. *Frazer N. Owen, Richard A. White, & JingPing Ge.* 87, 135, 28-E5 (1993)

Ten New BL Lacertae Objects Discovered by an Efficient X-Ray/Radio/Optical Technique. *Jonathan F. Schachter, John T. Stocke, Eric Perlman, Martin Elvis, Ron Remillard, Arno Granados, Jane Luu, John P. Huchra, Roberta Humphreys, C. Megan Urry, & John Wallin.* 412, 541, 150-D9 (1993)

Streaming Motions in the Local Universe: Evidence for Large-Scale, Low-Amplitude Density Fluctuations. *Stéphane Courteau, S. M. Faber, Alan Dressler, & Jeffrey A. Willick.* 412, L51, 155-B10 (1993)

The Faintest Stars: From Schmidt Plates to Luminosity Functions. *C. G. Tinney, I. N. Reid, & J. R. Mould.* 414, 254, 173-B12 (1993)

Spectroscopic Study of the CfA Sample of Seyfert Galaxies. *Donald E. Osterbrock & André Martel.* 414, 552, 178-B2 (1993)

Milliarcsecond Polarization Structure of 24 Objects from the Pearson-Readhead Sample of Bright Extragalactic Radio Sources. I. The Images. *T. V. Cawthorne, J. F. C. Wardle, D. H. Roberts, D. C. Gabuzda, & L. F. Brown.* 416, 496, 209-D11 (1993)

The Analysis of Gravitational Lens Surveys. I. Selection Functions and Ambiguous Candidates. *Christopher S. Kochanek.* 417, 438, 224-G1 (1993)

Faint Object Camera Far-Ultraviolet Objective Prism Observations of 12 $z > 3$ Quasars. *P. Jakobsen, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 417, 528, 225-G10 (1993)

The Extended 12 Micron Galaxy Sample. *Brian Rush, Matthew A. Malkan, & Luigi Spinoglio.* 89, 1, 49-B1 (1993)

New OH/IR Stars from Color-selected *IRAS* Sources. III. A Complete Survey. *Jayaram N. Chengalur, B. M. Lewis, J. Eder, & Yervant Terzian.* 89, 189, 51-D3 (1993)

Far-Ultraviolet Stellar Photometry: A Field in Orion. *Edward G. Schmidt & George R. Carruthers.* 89, 259, 53-B2 (1993)

Topological Analysis of the CfA Redshift Survey. *Michael S. Vogeley, Changbom Park, Margaret J. Geller, John P. Huchra, & J. Richard Gott III.* 420, 525, 9-B8 (1994)

The Parkes-MIT-NRAO (PMN) Map Catalog of Radio Sources Covering $-88° < \delta < -37°$ at 4.85 GHz. *P. C. Gregory, J. D. Vavasour, W. K. Scott, & J. J. Condon.* 90, 173, 3-B12 (1994)

The Parkes-MIT-NRAO (PMN) Surveys. III. Source Catalog for the Tropical Survey ($-29° < \delta < -9.5°$). *Mark R. Griffith, Alan E. Wright, B. F. Burke, & R. D. Ekers.* 90, 179, 3-C6 (1994)

A Wide-Field Multicolor Survey for High-Redshift Quasars, $z \geq 2.2$. III. The Luminosity Function. *Stephen J. Warren, Paul C. Hewett, & Patrick S. Osmer.* 421, 412, 23-C11 (1994)

The Parkes-MIT-NRAO (PMN) Surveys. II. Source Catalog for the Southern Survey ($-87.5° < \delta < -37°$). *Alan E. Wright, Mark R. Griffith, B. F. Burke, & R. D. Ekers.* 91, 111, 18-E13 (1994)

A 5 GHz VLA Survey of the Galactic Plane. *Robert H. Becker, Richard L. White, David J. Helfand, & S. Zoonematkermani.* 91, 347, 23-C1 (1994)

A Deep Imaging Survey of the Pleiades with *ROSAT*. *J. R. Stauffer, J.-P. Caillault, M. Gagné, C. F. Prosser, & L. W. Hartmann.* 91, 625, 28-A6 (1994)

Power-Spectrum Analysis of Three-dimensional Redshift Surveys. *Hume A. Feldman, Nick Kaiser, & John A. Peacock.* 426, 23, 96-D2 (1994)

A Redshift Survey in Quasar Fields. I. Photometric and Spectroscopic Catalog. *E. Ellingson & H. K. C. Yee.* 92, 33, 31-D8 (1994)

A Sensitive 1.5 GHz Radio Survey around the North Ecliptic Pole. *Ronald I. Kollgaard, Wolfgang Brinkmann, Margaret McMath Chester, Eric D. Feigelson, Paul Hertz, Patricia Reich, & Richard Wielebinski.* 93, 145, 43-F10 (1994)

Supplement to the Arecibo 1612 MHz Survey of Color-selected *IRAS* Sources. *B. M. Lewis.* 93, 549, 50-D9 (1994)

A CCD Survey for Faint High-Latitude Carbon Stars. *Paul J. Green, Bruce Margon, Scott F. Anderson, & Kem H. Cook.* 434, 319, 229-G6 (1994)

The Hawaii K-Band Galaxy Survey. III. Spectroscopy of $K < 20$ Galaxies. *A. Songaila, L. L. Cowie, E. M. Hu, & J. P. Gardner.* 94, 461, 58-C1 (1994)

A K' Imaging Survey of Molecular Outflow Sources. *Klaus-Werner Hodapp.* 94, 615, 60-D12 (1994)

The Morphology of Faint Galaxies in Medium Deep Survey Images Using WFPC2. *R. E. Griffiths, S. Casertano, K. U. Ratnatunga, L. W. Neuschaefer, R. S. Ellis, G. F. Gilmore, K. Glazebrook, B. Santiago, J. P. Huchra, R. A. Windhorst, S. M. Pascarelle, R. F. Green, G. D. Illingworth, D. C. Koo, & A. J. Tyson.* 435, L19, 251-E1 (1994)

A Survey of Faint Galaxy Pairs. *R. G. Carlberg, C. J. Pritchet, & L. Infante.* 435, 540, 253-E9 (1994)

A Sample of Gigahertz Peaked Spectrum Candidate Radio Sources Located South of $\delta = -9.5°$. *J. C. Cersosimo, M. Lebron Santos, S. I. Cintrón, & Z. M. Quinviento.* 95, 157, 66-C1 (1994)

The *Hubble Space Telescope* Medium Deep Survey with the Wide Field and Planetary Camera. I. Methodology and Results on the Field near 3C 273. *R. E. Griffiths, K. U. Ratnatunga, L. W. Neuschaefer, S. Casertano, M. Im, E. W. Wyckoff, R. S. Ellis, G. F. Gilmore, R. A. W. Elson, K. Glazebrook, D. J. Schade, R. A. Windhorst, P. C. Schmidtke, J. M. Gordon, S. M. Pascarelle, G. D. Illingworth, D. C. Koo, M. A. Bershady, D. A. Forbes, A. C. Phillips, R. F. Green, V. Sarajedini, J. P. Huchra, & A. J. Tyson.* 437, 67, 284-B3 (1994)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. I. The $7° < |B| < 8°$ Strips. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 437, 419, 288-G11 (1994)

The Second Caltech–Jodrell Bank VLBI Survey. I. Observations of 91 of 193 Sources. *G. B. Taylor, R. C. Vermeulen, T. J. Pearson, A. C. S. Readhead, D. R. Henstock, I. W. A. Browne, & P. N. Wilkinson.* 95, 345, 69-B1 (1994)

Survey of Emission-Line Galaxies: Universidad Complutense de Madrid List 1. *J. Zamorano, M. Rego, J. Gallego, A. G. Vitores, R. González-Riestra, & G. Rodríguez-Caderot.* 95, 387, 69-E10 (1994)

The Evolutionary Status of the Stellar Population in the ρ Ophiuchi Cloud Core. *Karen M. Strom, Jeremy Kepner, & Stephen E. Strom.* 438, 813, 15-D7 (1995)

Active Galaxies Observed during the *Extreme Ultraviolet Explorer* All-Sky Survey. *H. L. Marshall, A. Fruscione, & T. E. Carone.* 439, 90, 22-D6 (1995)

Gamma-Ray Emission from Cataclysmic Variables. I. The *Compton* EGRET Survey. *Eric M. Schlegel, Paul E. Barrett, O. C. De Jager, G. Chanmugam, S. Hunter, & J. Mattox.* 439, 322, 25-E10 (1995)

Observation and Reduction Methods of Deep Palomar 200 Inch 4-Shooter Mosaics. *Lyman W. Neuschaefer & Rogier A. Windhorst.* 96, 371, 7-D9 (1995)

Far-Ultraviolet Stellar Photometry: Fields in Sagittarius and Scorpius. *Edward G. Schmidt & George R. Carruthers.* 96, 605, 10-A8 (1995)

High-Resolution X-Ray Imaging of M33. *Eric Schulman & Joel N. Bregman.* 441, 568, 69-G6 (1995)

A Volume-limited Survey of High Galactic Latitude Planetary Nebulae with the *Extreme Ultraviolet Explorer*. *Antonella Fruscione, Jeremy J. Drake, Kelley McDonald, & Roger F. Malina.* 441, 726, 72-A1 (1995)

The Stromlo-APM Redshift Survey. II. Variation of Galaxy Clustering with Morphology and Luminosity. *J. Loveday, S. J. Maddox, G. Efstathiou, & B. A. Peterson.* 442, 457, 86-C1 (1995)

Much Ado about Nothing: Several Large-Area Surveys for Radio Pulsars from Arecibo. *Paul S. Ray, W. T. S. Deich, S. R. Kulkarni, Thomas A. Prince, S. E. Thorsett, Gautam Vasisht, A. Wolszczan, Donald C. Backer, John H. Holliman II, & John Middleditch.* 443, 265, 98-G8 (1995)

The Parkes-MIT-NRAO (PMN) Surveys. VI. Source Catalog for the Equatorial Survey ($-9.5° < \delta < +10.0°$). *Mark R. Griffith, Alan E. Wright, B. F. Burke, & R. D. Ekers.* 97, 347, 16-D11 (1995)

Interpretation of the Faint Galaxy Number Counts in the K Band. *Yuzuru Yoshii & Bruce A. Peterson.* 444, 15, 113-D5 (1995)

Structure and Photometry of an $I < 20.5$ Galaxy Sample from the *Hubble Space Telescope* Medium Deep Survey. *Andrew C. Phillips, Matthew A. Bershady, Duncan A. Forbes, David C. Koo, Garth D. Illingworth, David B. Reitzel, Richard E. Griffiths, & Rogier A. Windhorst.* 444, 21, 113-E2 (1995)

Radio Properties of Optically Selected Quasars. *Eric J. Hooper, Chris D. Impey, Craig B. Foltz, & Paul C. Hewett.* 445, 62, 133-C3 (1995)

The First Caltech–Jodrell Bank VLBI Survey. I. $\lambda = 18$ Centimeter Observations of 87 Sources. *A. G. Polatidis, P. N. Wilkinson, W. Xu, A. C. S. Readhead, T. J. Pearson, G. B. Taylor, & R. C. Vermeulen.* 98, 1, 21-B1 (1995)

The First Caltech–Jodrell Bank VLBI Survey. II. $\lambda = 18$ Centimeter Observations of 25 Sources. *D. D. Thakkar, W. Xu, A. C. S. Readhead, T. J. Pearson, G. B. Taylor, R. C. Vermeulen, A. G. Polatidis, & P. N. Wilkinson.* 98, 33, 21-D8 (1995)

The Case Low-Dispersion Northern Sky Survey. XV. A Region in Ursa Major and Canes Venatici. *Peter Pesch, C. B. Stephenson, & D. Jack MacConnell.* 98, 41, 21-E5 (1995)

The FCRAO Extragalactic CO Survey. I. The Data. *Judith S. Young, Shuding Xie, Linda Tacconi, Pat Knezek, Paul Viscuso, Lowell Tacconi-Garman, Nick Scoville, Steve Schneider, F. Peter Schloerb, Steve Lord, Amy Lesser, Jeff Kenney, Yi-Long Huang, Nick Devereux, Mark Claussen, James Case, John Carpenter, Mike Berry, & Lori Allen.* 98, 219, 23-E3 (1995)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. II. The $4° < |b| < 5°$ Strips. *H. Izumiura, R. Catchpole, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, K. Sekiguchi, N. Ukita, & I. Yamamura.* 98, 271, 25-E14 (1995)

Deep Optical Counterpart Searches of Gamma-Ray Burst Localizations. *Frederick J. Vrba, Dieter H. Hartmann, & Mark C. Jennings.* 446, 115, 154-G4 (1995)

The Optical Redshift Survey: Sample Selection and the Galaxy Distribution. *Basílio X. Santiago, Michael A. Strauss, Ofer Lahav, Marc Davis, Alan Dressler, & John P. Huchra.* 446, 457, 162-D2 (1995)

A Multifrequency Radio Continuum and *IRAS* Faint Source Survey of Markarian Galaxies. *M. D. Bicay, G. Kojoian, J. Seal, D. F. Dickinson, & M. A. Malkan.* 98, 369, 28-B1 (1995)

A Near-Infrared Faint Galaxy Survey: The Catalog. *J. P. Gardner.* 98, 441, 29-B6 (1995)

Patterns of High-Velocity Molecular Gas near Sagittarius A*. *H. S. Liszt & W. B. Burton.* 98, 679, 32-F4 (1995)

A Photometric and Spectroscopic Survey for Young Stars in the Halo of M31. *N. C. Hambly, A. Fitzsimmons, F. P. Keenan, P. L. Dufton, P. J. F. Brown, M. J. Irwin, & W. R. J. Rolleston.* 448, 628, 203-D9 (1995)

ROSAT All-Sky Survey Observations of the Hyades Cluster. *Robert A. Stern, Jürgen H. M. M. Schmitt, & Peter T. Kahabka.* 448, 683, 204-B12 (1995)

A Search for Fast Pulsars along the Galactic Plane. *D. J. Nice, A. S. Fruchter, & J. H. Taylor.* 449, 156, 212-C11 (1995)

Centennial Challenge Essay: Quo Vadis, Astronomia? *George W. Collins II.* 449, 399, 218-C1 (1995)

Groups of Galaxies in the *ROSAT* North Ecliptic Pole Survey. *J. P. Henry, I. M. Gioia, J. P. Huchra, R. Burg, B. McLean, H. Böhringer, R. G. Bower, U. G. Briel, W. Voges, H. MacGillivray, & R. G. Cruddace.* 449, 422, 218-E6 (1995)

The First Caltech–Jodrell Bank VLBI Survey. III. VLBI and MERLIN Observations at 5 GHz and VLA Observations at 1.4 GHz. *W. Xu, A. C. S. Readhead, T. J. Pearson, A. G. Polatidis, & P. N. Wilkinson.* 99, 297, 39-B1 (1995)

VLA Maps of Radio Galaxies to $z = 1$. *S. G. Neff, L. Roberts, & J. B. Hutchings.* 99, 349, 39-F1 (1995)

The CfA Redshift Survey: Data for the NGP +36 Zone. *John P. Huchra, Margaret J. Geller, & Harold G. Corwin, Jr.* 99, 391, 40-D10 (1995)

The *Einstein* Extended Medium-Sensitivity Survey Second Epoch: Results for the Stars. *Thomas A. Fleming, Silvano Molendi, Tommaso Maccacaro, & Anna Wolter.* 99, 701, 44-D12 (1995)

The Soft X-Ray Properties of a Large Optical QSO Sample: *ROSAT* Observations of the Large Bright Quasar Survey. *Paul J. Green, Norbert Schartel, Scott F. Anderson, Paul C. Hewett, Craig B. Foltz, Wolfgang Brinkmann, Henner Fink, Joachim Trümper, & Bruce Margon.* 450, 51, 228-G1 (1995)

A Study of Ultraviolet Objects near the North Galactic Pole with FAUST. *N. Brosch, E. Almoznino, E. M. Leibowitz, H. Netzer, T. P. Sasseen, S. Bowyer, M. Lampton, & X. Wu.* 450, 137, 230-A1 (1995)

The FIRST Survey: Faint Images of the Radio Sky at Twenty Centimeters. *Robert H. Becker, Richard L. White, & David J. Helfand.* 450, 559, 238-D12 (1995)

A Study of a 21 Centimeter–selected Sample of Galaxies. II. Analysis of the Sample. *P. A. Henning.* 450, 578, 238-F6 (1995)

The Second Caltech–Jodrell Bank VLBI Survey. II. Observations of 102 of 193 Sources. *D. R. Henstock, I. W. A. Browne, P. N. Wilkinson, G. B. Taylor, R. C. Vermeulen, T. J. Pearson, & A. C. S. Readhead.* 100, 1, 46-B1 (1995)

The *IRAS* 1.2 Jy Survey: Redshift Data. *Karl B. Fisher, John P. Huchra, Michael A. Strauss, Marc Davis, Amos Yahil, & David Schlegel.* 100, 69, 46-G5 (1995)

An Out-of-Plane CO ($J = 2$–1) Survey of the Milky Way. I. The Data. *Seiichi Sakamoto, Tetsuo Hasegawa, Masahiko Hayashi, Toshihiro Handa, & Tomoharu Oka.* 100, 125, 47-E1 (1995)

ROSAT Extended Medium-Deep Sensitivity Survey: Source Counts for 130 Fields. *A. Vikhlinin, W. Forman, C. Jones, & S. Murray.* 451, 553, 254-G10 (1995)

ROSAT Extended Medium-Deep Sensitivity Survey: Average Source Spectra. *A. Vikhlinin, W. Forman, C. Jones, & S. Murray.* 451, 564, 255-A10 (1995)

A Spectrophotometric Survey of Merging Galaxies. *Charles T. Liu & Robert C. Kennicutt, Jr.* 100, 325, 50-E8 (1995)

An *IRAS*-based Search for New Dusty Late-Type WC Wolf-Rayet Stars. *Martin Cohen.* 100, 413, 51-G1 (1995)

The Contribution of Late-Type/Irregulars to the Faint Galaxy Counts from *Hubble Space Telescope* Medium-Deep Survey Images. *Simon P. Driver, Rogier A. Windhorst, & Richard E. Griffiths.* 453, 48, 281-G10 (1995)

New "Einstein Cross" Gravitational Lens Candidates in *Hubble Space Telescope* WFPC2 Survey Images. *Kavan U. Ratnatunga, Eric J. Ostrander, Richard E. Griffiths, & Myungshin Im.* 453, L5, 289-B12 (1995)

Structural Parameters of Faint Galaxies from Prerefurbishment *Hubble Space Telescope* Medium Deep Survey Observations. *S. Casertano, K. U. Ratnatunga, R. E. Griffiths, M. Im, L. W. Neuschaefer, E. J. Ostrander, & R. A. Windhorst.* 453, 599, 292-B9 (1995)

A Revised and Extended Catalog of Magellanic System Clusters, Associations, and Emission Nebulae. I. Small Magellanic Cloud and Bridge. *Eduardo L. D. Bica & Henrique R. Schmitt.* 101, 41, 53-E4 (1995)

First Maps of the Soft X-Ray Diffuse Background from the *ROSAT* XRT/PSPC All-Sky Survey. *S. L. Snowden, M. J. Freyberg, P. P. Plucinsky, J. H. M. M. Schmitt, J. Trümper, W. Voges, R. J. Edgar, D. McCammon, & W. T. Sanders.* 454, 643, 310-D9 (1995)

Faint Blue Objects at High Galactic Latitude. VII. Spectroscopy of Narrow-Line Objects and the Morphological Selection Criterion of the US Survey. *P. D. Usher, K. J. Mitchell, & K.-L. Huang.* 454, 654, 310-F4 (1995)

The Large Bright QSO Survey for Damped Lyα Absorption Systems. *Arthur M. Wolfe, Kenneth M. Lanzetta, Craig B. Foltz, & Frederic H. Chaffee.* 454, 698, 311-C9 (1995)

A High Galactic Latitude Pulsar Survey of the Arecibo Sky. *R. S. Foster, B. J. Cadwell, A. Wolszczan, & S. B. Anderson.* 454, 826, 313-B12 (1995)

The Canada-France Redshift Survey. I. Introduction to the Survey, Photometric Catalogs, and Surface Brightness Selection Effects. *S. J. Lilly, O. Le Fèvre, David Crampton, F. Hammer, & L. Tresse.* 455, 50, 318-G12 (1995)

The Canada-France Redshift Survey. V. Global Properties of the Sample. *David Crampton, O. Le Fèvre, S. J. Lilly, & F. Hammer.* 455, 96, 319-E8 (1995)

A Very Luminous Binary Millisecond Pulsar. *José Navarro, A. G. de Bruyn, D. A. Frail, S. R. Kulkarni, & A. G. Lyne.* 455, L55, 325-C1 (1995)

Identification and Spectroscopy of Radio Sources from the B3VLA Survey. *S. G. Djorgovski, D. Thompson, L. Maxfield, M. Vigotti, & G. Grueff.* 101, 255, 57-B1 (1995)

H II Region Populations in Seyfert Galaxies. I. Database. *Zlatan I. Tsvetanov & Artashes R. Petrosian.* 101, 287, 57-F4 (1995)

TECHNIQUES: IMAGE PROCESSING

Comparing Restored *HST* and VLA Imagery of R Aquarii. *J. M. Hollis, J. E. Dorband, & F. Yusef-Zadeh.* 386, 293, 27-G3 (1992)

Optical Tracers of Spiral Wave Resonances in Galaxies. II. Hidden Three-Arm Spirals in a Sample of 18 Galaxies. *Bruce G. Elmegreen, Debra Meloy Elmegreen, & Luis Montenegro.* 79, 37, 12-E9 (1992)

Atmospheric Fluctuations: Empirical Structure Functions and Projected Performance of Future Instruments. *M. Bester, W. C. Danchi, C. G. Degiacomi, L. J. Greenhill, & C. H. Townes.* 392, 357, 105-D1 (1992)

Mapping Cygnus A at 3 Millimeter Wavelength with the MIRIAD System. *M. C. H. Wright & R. J. Sault.* 402, 546, 9-C11 (1993)

Direct 75 Milliarcsecond Images from the Multiple Mirror Telescope with Adaptive Optics. *M. Lloyd-Hart, R. Dekany, B. McLeod, D. Wittman, D. Colucci, D. McCarthy, & R. Angel.* 402, L81, 13-B7 (1993)

The Structure of the Core of 47 Tucanae from *Hubble Space Telescope* Observations. *Guido De Marchi, Francesco Paresce, & Francesco R. Ferraro.* 85, 293, 11-B3 (1993)

The First Detection of a Collapsed Core Globular Cluster in M31. *O. Bendinelli, C. Cacciari, S. Djorgovski, L. Federici, F. R. Ferraro, F. Fusi Pecci, G. Parmeggiani, N. Weir, & F. Zavatti.* 409, L17, 104-C7 (1993)

High-Resolution Infrared Maps from *IRAS* Observations of Large Galaxies. I. *S. K. Ghosh, R. P. Verma, T. N. Rengarajan, B. Das, & H. T. Saraiya.* 86, 401, 19-G9 (1993)

Restoration of Astronomical Images by Iterative Blind Deconvolution. *Stuart M. Jefferies & Julian C. Christou.* 415, 862, 198-F9 (1993)

An Iterative Method of Imaging. *L. W. Kebede.* 423, 878, 59-F11 (1994)

VLA Stereoscopy of Solar Active Regions. I. Method and Tests. *Markus J. Aschwanden & T. S. Bastian.* 426, 425, 101-E2 (1994)

VLA Stereoscopy of Solar Active Regions. II. Altitude, Relative Motion, and Center-to-Limb Darkening of 20 Centimeter Emission. *Markus J. Aschwanden & T. S. Bastian.* 426, 434, 101-E13 (1994)

A Coronagraphic Search for Brown Dwarfs around Nearby Stars. *T. Nakajima, S. T. Durrance, D. A. Golimowski, & S. R. Kulkarni.* 428, 797, 140-B11 (1994)

WFPC2 Observations of the Globular Cluster M30. *Brian Yanny, Puragra Guhathakurta, Donald P. Schneider, & John N. Bahcall.* 435, L59, 252-D13 (1994)

High-Resolution Imaging of the Pluto-Charon System with the Faint Object Camera of the *Hubble Space Telescope*. *R. Albrecht, C. Barbieri, H.-M. Adorf, G. Corrain, A. Gemmo, P. Greenfield, O. Hainaut, R. N. Hook, D. J. Tholen, J. C. Blades, & W. B. Sparks.* 435, L75, 252-G3 (1994)

Formal Results Regarding Metric Space Techniques for the Study of Astrophysical Maps. *Fred C. Adams & Jennifer J. Wiseman.* 435, 693, 255-E12 (1994)

An X-Ray Image of the Large Magellanic Cloud. *S. L. Snowden & R. Petre.* 436, L123, 281-A1 (1994)

Photoevaporating Stellar Envelopes Observed with Rayleigh Beacon Adaptive Optics. *P. R. McCullough, R. Q. Fugate, J. C. Christou, B. L. Ellerbroek, C. H. Higgins, J. M. Spinhirne, R. A. Cleis, & J. F. Moroney.* 438, 394, 6-G11 (1995)

Adaptive Optics Experiments Using Sodium Laser Guide Stars. *M. Lloyd-Hart, J. R. P. Angel, B. Jacobsen, D. Wittman, R. Dekany, D. McCarthy, E. Kibblewhite, W. Wild, B. Carter, & J. Beletic.* 439, 455, 27-D2 (1995)

Estimating the Cramér-Rao Bound for Restored Astronomical Observations. *T. S. Zaccheo, R. A. Gonsalves, S. M. Ebstein, & P. Nisenson.* 439, L43, 40-C11 (1995)

Adaptive Optics Imaging of Proto–Planetary Nebulae: Frosty Leo and the Red Rectangle. *F. Roddier, C. Roddier, J. E. Graves, & M. J. Northcott.* 443, 249, 98-E7 (1995)

A First Determination of the Surface Density of Galaxy Clusters at Very Low X-Ray Fluxes. *Piero Rosati, Roberto Della Ceca, Richard Burg, Colin Norman, & Riccardo Giacconi.* 445, L11, 140-C3 (1995)

Rayleigh Beacon Adaptive Optics Imaging of ADS 9731: Measurements of the Isoplanatic Field of View. *Julian C. Christou, Brent Ellerbroek, Robert Q. Fugate, Domenico Bonaccini, & Ruggero Stanga.* 450, 369, 233-A12 (1995)

Automated Source Classification Using a Kohonen Network. *P. H. Mähönen & P. J. Hakala.* 452, L77, 270-G1 (1995)

A Novel Maximum-Likelihood Method for Image Reconstruction with Increased Sampling. *George Roumeliotis.* 452, 944, 277-F5 (1995)

Does the Crab Have a Shell? *D. A. Frail, N. E. Kassim, T. J. Cornwell, & W. M. Goss.* 454, L129, 316-C8 (1995)

TECHNIQUES: INTERFEROMETRIC

Positions of the Radio Recombination Line Masers in MWC 349. *P. Planesas, J. Martín-Pintado, & E. Serabyn.* 386, L23, 29-D1 (1992)

The Structure and Dynamics of the Gaseous and Stellar Components in Centaurus A. *Richard A. Nicholson, Jonathan Bland-Hawthorn, & Keith Taylor.* 387, 503, 45-A1 (1992)

Discovery of Extended Faraday Rotation Compatible with Spiral Structure in an Intervening Galaxy at $z = 0.395$: New Observations of PKS 1229−021. *Philipp P. Kronberg, Judith J. Perry, & Edwin L. H. Zukowski.* 387, 528, 45-C1 (1992)

First Results of an On-Line Adaptive Optics System with Atmospheric Wavefront Sensing by an Artificial Neural Network. *M. Lloyd-Hart, P. Wizinowich, B. McLeod, D. Wittman, D. Colucci, R. Dekany, D. McCarthy, J. R. P. Angel, & D. Sandler.* 390, L41, 78-F8 (1992)

The Structure of Southern Extragalactic Radio Sources. *Paul A. Jones & W. Bruce McAdam.* 80, 137, 24-C3 (1992)

A VLBI Search for AGN Radio Cores in Starburst Galaxies. *Colin J. Lonsdale, Carol J. Lonsdale, & Harding E. Smith.* 391, 629, 95-G6 (1992)

A Measurement of the Primordial Helium Abundance Using μ Cassiopeiae. *James W. Haywood, Dennis J. Hegyi, & Donald H. Gudehus.* 392, 172, 103-B1 (1992)

A Completely Sampled Aperture Synthesis Map of the CO Emission in M51. *David S. Adler, K. Y. Lo, Melvyn C. H. Wright, Gustav Rydbeck, Raymond L. Plante, & Ronald J. Allen.* 392, 497, 108-D11 (1992)

Three-Epoch VLBI Observations of the Nucleus in the Lobe-dominated Quasar 3C 334. *D. H. Hough, A. C. S. Readhead, D. A. Wood, Jr., & J. J. Feldmeier.* 393, 81, 115-B1 (1992)

High-Resolution Images of Dust Emission from Orion-KL. *Melvyn Wright, Goeran Sandell, David J. Wilner, & Richard L. Plambeck.* 393, 225, 117-A1 (1992)

A Speckle Hologram of the Interstellar Plasma. *K. M. Desai, C. R. Gwinn, J. Reynolds, E. A. King, D. Jauncey, C. Flanagan, G. Nicolson, R. A. Preston, & D. L. Jones.* 393, L75, 127-E7 (1992)

Detectability of the Gravitational Wave Signal from a Close Neutron Star Binary with Mass Transfer. *Piotr Jaranowski & Andrzej Krolak.* 394, 586, 136-F1 (1992)

VLBI Observations of the X-Ray Binary LS I +61°303. *A. R. Taylor, H. T. Kenny, R. E. Spencer, & A. Tzioumis.* 395, 268, 143-D11 (1992)

The Compact Triples 0710+439 and 2352+495: A New Morphology of Radio Galaxy Nuclei. *J. E. Conway, T. J. Pearson, A. C. S. Readhead, S. C. Unwin, W. Xu, & R. L. Mutel.* 396, 62, 155-G7 (1992)

Interstellar Scattering toward the Galactic Center as Probed by OH/IR Stars. *Huib Jan van Langevelde, Dale A. Frail, James M. Cordes, & Philip J. Diamond.* 396, 686, 165-G9 (1992)

Kinematics of W3(OH): First Proper Motions of OH Masers from VLBI Measurements. *E. E. Bloemhof, M. J. Reid, & J. M. Moran.* 397, 500, 177-A12 (1992)

Kinematics of the Parsec-Scale Relativistic Jet in 3C 345. *Stephen C. Unwin & Ann E. Wehrle.* 398, 74, 183-A1 (1992)

Radio Images of Sagittarius. I. Overview, Sagittarius D, and Sagittarius E. *Harvey S. Liszt.* 82, 495, 55-G1 (1992)

Imaging Spectrophotometry of the Orion Nebula Core. I. Emission-Line Mapping and Physical Conditions. *Richard W. Pogge, J. Michael Owen, & Bruce Atwood.* 399, 147, 197-A9 (1992)

VLBI Observations of the 6.7 GHz Methanol Masers toward W3(OH). *K. M. Menten, M. J. Reid, P. Pratap, J. M. Moran, & T. L. Wilson.* 401, L39, 227-F1 (1992)

The Parsec-Scale Radio Jet of 4C 39.25. *A. Alberdi, J. M. Marcaide, A. P. Marscher, Y. F. Zhang, P. Elósegui, J. L. Gómez, & D. B. Shaffer.* 402, 160, 3-A13 (1993)

Speckle Observations of Mira's Companion. *M. Karovska, P. Nisenson, & J. Beletic.* 402, 311, 5-A7 (1993)

Mapping Cygnus A at 3 Millimeter Wavelength with the MIRIAD System. *M. C. H. Wright & R. J. Sault.* 402, 546, 9-C11 (1993)

Direct 75 Milliarcsecond Images from the Multiple Mirror Telescope with Adaptive Optics. *M. Lloyd-Hart, R. Dekany, B. McLeod, D. Wittman, D. Colucci, D. McCarthy, & R. Angel.* 402, L81, 13-B7 (1993)

A Molecular Spiral Arm Segment of M51 at 3.5 Arcsecond Resolution. *Richard J. Rand.* 404, 593, 36-C14 (1993)

Near-Infrared Imaging of the Becklin-Neugebauer–IRc2 Region in Orion with Subarcsecond Resolution. *C. Dougados, P. Léna, S. T. Ridgway, J. C. Christou, & R. G. Probst.* 406, 112, 56-E5 (1993)

Angular Diameter Measurements of Cool Giant Stars in Strong TiO Bands and in the Continuum. *A. Quirrenbach, D. Mozurkewich, J. T. Armstrong, D. F. Buscher, & C. A. Hummel.* 406, 215, 57-F9 (1993)

The Halo Radio Source Coma C and the Origin of Halo Sources. *G. Giovannini, L. Feretti, T. Venturi, K.-T. Kim, & P. P. Kronberg.* 406, 399, 62-F1 (1993)

Spiral Structure of the Giant Galaxy UGC 2885: Hα Kinematics. *Blaise Canzian, R. J. Allen, & R. P. J. Tilanus.* 406, 457, 63-D7 (1993)

VLBI Observations of a Complete Sample of Radio Galaxies. II. The Parsec-Scale Structure of NGC 315. *T. Venturi, G. Giovannini, L. Feretti, G. Comoretto, & A. E. Wehrle.* 408, 81, 84-B4 (1993)

Imaging with Ultra-Resolution in the Presence of Strong Scattering. *T. J. Cornwell & Ramesh Narayan.* 408, L68, 89-G1 (1993)

VLBI Observations of a Complete Sample of Radio Galaxies. III. The Two-sided Milliarcsecond Structure of 3C 338. *L. Feretti, G. Comoretto, G. Giovannini, T. Venturi, & A. E. Wehrle.* 408, 446, 90-F7 (1993)

Detection of Magnetohydrodynamic Shocks in the L1551 Outflow. *M. Barsony, N. Z. Scoville, & C. J. Chandler.* 409, 275, 100-E4 (1993)

Angular Broadening of Pulsars and the Distribution of Interstellar Plasma Fluctuations. *C. R. Gwinn, N. Bartel, & J. M. Cordes.* 410, 673, 122-A13 (1993)

VLBI Astrometric Identification of the Radio-emitting Region in Algol and Determination of the Orientation of the Close Binary. *Jean-François Lestrade, Robert B. Phillips, Mark W. Hodges, & Robert A. Preston.* 410, 808, 123-G1 (1993)

A 20 Centimeter VLA Survey of Abell Clusters of Galaxies. III. Images and Optical Identifications. *Frazer N. Owen, Richard A. White, & JingPing Ge.* 87, 135, 28-E5 (1993)

Accurate Measurement of the Geometry for a Full-Disk Solar Image and Estimation of the Observational Point Spread Function. *C. G. Toner & S. M. Jefferies.* 415, 852, 198-E11 (1993)

The Asymmetric Envelope of γ Cassiopeiae Observed with the Mk III Optical Interferometer. *A. Quirrenbach, C. A. Hummel, D. F. Buscher, J. T. Armstrong, D. Mozurkewich, & N. M. Elias II.* 416, L25, 207-D7 (1993)

Milliarcsecond Polarization Structure of 24 Objects from the Pearson-Readhead Sample of Bright Extragalactic Radio Sources. I. The Images. *T. V. Cawthorne, J. F. C. Wardle, D. H. Roberts, D. C. Gabuzda, & L. F. Brown.* 416, 496, 209-D11 (1993)

Detection of the Angular Expansion Rate and Determination of the Distance of the Planetary Nebula NGC 6302. *Yolanda Gómez, Luis F. Rodríguez, & James M. Moran.* 416, 620, 211-B1 (1993)

Optical Shop Tests of a f/1.2 2.5 Meter Diameter Liquid Mirror. *E. F. Borra, R. Content, & L. Girard.* 418, 943, 244-D1 (1993)

Maps of GHz Methyl Cyanide Emission in Orion-KL. *D. J. Wilner, M. C. H. Wright, & R. L. Plambeck.* 422, 642, 39-G7 (1994)

Radio-Size Estimates of SN 1993J. *J. M. Marcaide, A. Alberdi, P. Elósegui, J. C. Guirado, F. Mantovani, E. Pérez, M. I. Ratner, A. Rius, A. E. E. Rogers, B. P. Schmidt, I. I. Shapiro, & A. R. Whitney.* 424, L25, 69-D6 (1994)

On the Apparent Velocity of Integrated Sunlight. II. 1983–1992 and Comparisons with Magnetograms. *Drake Deming & Claude Plymate.* 426, 382, 101-A2 (1994)

Toward Estimation of H_0 from VLBI Observations of the Gravitational Lens System 0957+561. *R. M. Campbell, B. E. Corey, E. E. Falco, I. I. Shapiro, M. V. Gorenstein, P. Elósegui, J. M. Marcaide, & K. Alvi.* 426, 486, 104-D5 (1994)

Hubble Space Telescope Fine Guidance Sensor Interferometric Observations of the Core of 30 Doradus. *M. G. Lattanzi, J. L. Hershey, R. Burg, L. G. Taff, S. T. Holfeltz, B. Bucciarelli, I. N. Evans, R. Gilmozzi, J. Pringle, & N. R. Walborn.* 427, L21, 117-D1 (1994)

Linear Polarization Radio Imaging at Milliarcsecond Resolution. *D. H. Roberts, J. F. C. Wardle, & L. F. Brown.* 427, 718, 121-F2 (1994)

The S140 Core: Aperture Synthesis HCO^+ and SO Observations. *D. J. Wilner & W. J. Welch.* 427, 898, 123-G3 (1994)

VLBI Data for Compact Radio Sources versus Exotic Forms of Matter in the Universe. *J. Stelmach.* 428, 61, 129-A5 (1994)

Superluminal Motion Statistics and Cosmology. *R. C. Vermeulen & M. H. Cohen.* 430, 467, 167-E3 (1994)

Star Formation in NGC 4449: MAMA-Detector UV Imagery and Fabry-Perot Balmer-Line Imagery. *Robert S. Hill, Allen T. Home, Andrew M. Smith, Fred C. Bruhweiler, K. P. Cheng, Paul M. N. Hintzen, & Ronald J. Oliversen.* 430, 568, 168-G5 (1994)

Imaging Spectroscopy with High Spatial Resolution. *Naoshi Baba, Susumu Kuwamura, Noriaki Miura, & Yuji Norimoto.* 431, L111, 192-A1 (1994)

On Cepheid Diameter and Distance Measurement. *Dimitar D. Sasselov & Margarita Karovska.* 432, 367, 197-F6 (1994)

Small-Scale Structure and Position of Sagittarius A* from VLBI at 3 Millimeter Wavelength. *Alan E. E. Rogers, Sheperd Doeleman, Melvyn C. H. Wright, Geoffrey C. Bower, Donald C. Backer, Stephen Padin, J. A. Philips, Darrel T. Emerson, Lincoln Greenhill, James M. Moran, & Kenneth I. Kellermann.* 434, L59, 241-E8 (1994)

VLBI Observations of a Complete Sample of Radio Galaxies. IV. The Radio Galaxies NGC 2484, 3C 109, and 3C 382. *G. Giovannini, L. Feretti, T. Venturi, L. Lara, J. Marcaide, M. Rioja, S. R. Spangler, & A. E. Wehrle.* 435, 116, 245-A1 (1994)

Unusual Evolution in the VLBI Structure of 0735+178. *D. C. Gabuzda, J. F. C. Wardle, D. H. Roberts, M. F. Aller, & H. D. Aller.* 435, 128, 245-B3 (1994)

Evolution of the Millarcsecond Total Intensity and Polarization Structures of BL Lacertae Objects. *D. C. Gabuzda, C. M. Mullan, T. V. Cawthorne, J. F. C. Wardle, & D. H. Roberts.* 435, 140, 245-C5 (1994)

A Search for Diffuse Hα Emission from Lyα Absorption Clouds toward 3C 273. *J. Bland-Hawthorn, K. Taylor, S. Veilleux, & P. L. Shopbell.* 437, L95, 299-A1 (1994)

The Second Caltech–Jodrell Bank VLBI Survey. I. Observations of 91 of 193 Sources. *G. B. Taylor, R. C. Vermeulen, T. J. Pearson, A. C. S. Readhead, D. R. Henstock, I. W. A. Browne, & P. N. Wilkinson.* 95, 345, 69-B1 (1994)

Detection of a Subparsec Diameter Disk in the Nucleus of NGC 4258. *L. J. Greenhill, D. R. Jiang, J. M. Moran, M. J. Reid, K. Y. Lo, & M. J. Claussen.* 440, 619, 51-F8 (1995)

The Deceleration Powering of Synchrotron Emission from Ejecta Components of Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 441, 307, 63-E9 (1995)

Fabry-Perot Imaging of O III λ = 5007 Å Emission in the Io Plasma Torus. *M. Küppers & K. Jockers.* 441, L101, 76-E4 (1995)

The Parsec-Scale Jet in Quasar 3C 345. *J. Anton Zensus, Marshall H. Cohen, & Stephen C. Unwin.* 443, 35, 95-F9 (1995)

A New Method for Determining the Angular Separation of Double Stars. *Daniel F. V. James, H. C. Kandpal, & Emil Wolf.* 445, 406, 138-B4 (1995)

The First Caltech–Jodrell Bank VLBI Survey. I. λ = 18 Centimeter Observations of 87 Sources. *A. G. Polatidis, P. N. Wilkinson, W. Xu, A. C. S. Readhead, T. J. Pearson, G. B. Taylor, & R. C. Vermeulen.* 98, 1, 21-B1 (1995)

The First Caltech–Jodrell Bank VLBI Survey. II. λ = 18 Centimeter Observations of 25 Sources. *D. D. Thakkar, W. Xu, A. C. S. Readhead, T. J. Pearson, G. B. Taylor, R. C. Vermeulen, A. G. Polatidis, & P. N. Wilkinson.* 98, 33, 21-D8 (1995)

Radio Interferometer Observations of Solar Wind Turbulence from the Orbit of *Helios* to the Solar Corona. *Steven R. Spangler & Takayuki Sakurai.* 445, 999, 149-B10 (1995)

Extragalactic Ionized Hydrogen in the Fornax Cluster. *J. Bland-Hawthorn, R. D. Ekers, W. van Breugel, A. Koekemoer, & K. Taylor.* 447, L77, 190-C13 (1995)

Interferometric Observations of the SiO Masers and Dust Shell of VX Sagittarii. *L. J. Greenhill, F. Colomer, J. M. Moran, D. C. Backer, W. C. Danchi, & M. Bester.* 449, 365, 215-B7 (1995)

Sub-Arcsecond Imaging of W3(OH) at 87.7 GHz. *D. J. Wilner, W. J. Welch, & J. R. Forster.* 449, L73, 217-C1 (1995)

VLBI Observations of a Complete Sample of Radio Galaxies. V. 3C 346 and 4C 31.04: Two Unusual Compact Steep Spectrum Sources. *W. D. Cotton, L. Feretti, G. Giovannini, T. Venturi, L. Lara, J. Marcaide, & A. E. Wehrle.* 452, 605, 273-A6 (1995)

Vertical Scales of Turbulence at the Mount Wilson Observatory. *Robert N. Treuhaft, Stephen T. Lowe, Manfred Bester, William C. Danchi, & Charles H. Townes.* 453, 522, 288-D12 (1995)

TECHNIQUES: PHOTOMETRIC

A Complete, Multicolor Survey of Absolute Proper Motions to $B \sim 22.5$: Galactic Structure and Kinematics at the North Galactic Pole. *Steven Raymond Majewski.* 78, 87, 2-F11 (1992)

A New Solar Irradiance Calibration from 3295 Å to 8500 Å Derived from Absolute Spectrophotometry of Vega. *G. W. Lockwood, H. Tüg, & N. M. White.* 390, 668, 83-E9 (1992)

Extending the MACHO Search to $\sim 10^6\ M_\odot$. *Andrew Gould.* 392, 442, 107-G1 (1992)

New Cepheid Distances to Nearby Galaxies Based on *BVRI* CCD Photometry. III. NGC 300. *Wendy L. Freedman, Barry F. Madore, S. L. Hawley, Irwin K. Horowitz, Jeremy Mould, Mauricio Navarrete, & Shauna Sallmen.* 396, 80, 156-A13 (1992)

CCD Photometry in the Globular Cluster NGC 288. I. Blue Stragglers and Main-Sequence Binary Stars. *Michael Bolte.* 82, 145, 51-B7 (1992)

Intensive High-Precision Photometric Monitoring of the Variable WN6 Wolf-Rayet Star HD 191765. *I. I. Antokhin, T. R. Irsmambetova, A. F. J. Moffat, A. M. Cherepashchuk, & S. V. Marchenko.* 82, 395, 54-G9 (1992)

Photometric Imaging of VW Cephei. *Paul D. Hendry, Stefan W. Mochnacki, & Andrew Collier Cameron.* 399, 246, 198-C8 (1992)

A Method for Obtaining the Age and Scale Height of the Thick Disk from Faint Strömgren Photometry. *Ted von Hippel & Gregory D. Bothun.* 407, 115, 70-E1 (1993)

The Crab Pulsar in the Visible and Ultraviolet with 10 Microsecond Time Resolution. *J. W. Percival, J. D. Biggs, J. F. Dolan, E. L. Robinson, M. J. Taylor, R. C. Bless, J. L. Elliot, M. J. Nelson, T. F. Ramseyer, G. W. van Citters, & E. Zhang.* 407, 276, 72-E1 (1993)

Far-Ultraviolet Stellar Photometry: A Field in Monoceros. *Edward G. Schmidt & George R. Carruthers.* 408, 484, 91-C1 (1993)

Ultraviolet Continuum Variability and Visual Flickering in the Peculiar Object MWC 560. *A. G. Michalitsianos, M. Perez, S. N. Shore, S. P. Maran, M. Karovska, G. Sonneborn, J. R. Webb, Thomas G. Barnes III, Marian L. Frueh, R. J. Oliversen, & S. G. Starrfield.* 409, L53, 111-D8 (1993)

A Study of Carina OB2 Association. I. Observational Data. *Beatriz García.* 87, 197, 29-F3 (1993)

A $UBV\beta$ Data Base for Stephenson-Sanduleak Southern Luminous Stars. *B. Cameron Reed.* 87, 367, 31-F13 (1993)

30 Doradus: Ultraviolet and Optical Stellar Photometry. *Jesse K. Hill, Ralph C. Bohlin, Kwang-Ping Cheng, Michael N. Fanelli, Paul Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 413, 604, 164-A5 (1993)

The Faintest Stars: The Luminosity and Mass Functions at the Bottom of the Main Sequence. *Christopher G. Tinney.* 414, 279, 173-D12 (1993)

A Catalog of Blue and Red Supergiants in M33. *Georgi R. Ivanov, Wendy L. Freedman, & Barry F. Madore.* 89, 85, 50-A9 (1993)

Far-Ultraviolet Stellar Photometry: A Field in Orion. *Edward G. Schmidt & George R. Carruthers.* 89, 259, 53-B2 (1993)

Young Open Clusters as Probes of the Star Formation Process. I. An Atlas of Open Cluster Photometry. *Randy L. Phelps & Kenneth A. Janes.* 90, 31, 1-D6 (1994)

Surface Brightness Fluctuations in Globular Clusters and Stellar Populations in Galaxies. *Edward A. Ajhar & John L. Tonry.* 429, 557, 152-F2 (1994)

Dust Extinction and Molecular Gas in the Dark Cloud IC 5146. *Charles J. Lada, Elizabeth A. Lada, Dan P. Clemens, & John Bally.* 429, 694, 154-C11 (1994)

Color Excesses for Classical Cepheids from *BV* Photometry. *J. D. Fernie.* 429, 844, 156-B9 (1994)

CCD Photometry for Six Metal-rich Galactic Globular Clusters. *Ata Sarajedini & John E. Norris.* 93, 161, 44-A2 (1994)

A Multisite *UBV* Photometric Campaign on 53 Persei in 1991 January. *L. Huang, Z. Guo, J. Hao, J. R. Percy, M. S. Fieldus, R. Fried, K Pavlovski, H. Božić, Ž. Ružić, M. Paparó, & B. Vetö.* 431, 850, 189-C5 (1994)

Deep Infrared Array Photometry of Globular Clusters. II. M71. *T. J. Davidge & D. A. Simons.* 435, 207, 246-B11 (1994)

Stellar Photometry Including Saturated Images: Results on M67 with WFPC2. *Ronald L. Gilliland.* 435, L63, 252-E9 (1994)

Single-Sideband Calibration for CO, ^{13}CO, HCN, and CS Lines near 345 GHz. *Yangsheng Wang, Daniel T. Jaffe, Urs U. Graf, & Neal J. Evans II.* 95, 503, 71-C7 (1994)

CCD Photometry of Globular Cluster Core Structure. II. *U*-Band Profiles for 15 Candidate Collapsed-Core Clusters. *Phyllis M. Lugger, Haldan N. Cohn, & Jonathan E. Grindlay.* 439, 191, 23-G10 (1995)

A Catalog of Far-Ultraviolet Point Sources Detected with the FAUST Telescope on ATLAS-1. *Stuart Bowyer, Timothy P. Sasseen, Xiaoyi Wu, & Michael Lampton.* 96, 461, 8-D9 (1995)

Far-Ultraviolet Stellar Photometry: Fields in Sagittarius and Scorpius. *Edward G. Schmidt & George R. Carruthers.* 96, 605, 10-A8 (1995)

Automated Software for Surface Photometry of Galaxies. *M. Doi, M. Fukugita, & S. Okamura.* 97, 59, 11-F8 (1995)

Socket Stars: *UBVRIJK* Radial Profiles. *Bradley E. Schaefer.* 444, 739, 126-D13 (1995)

Deep Optical Counterpart Searches of Gamma-Ray Burst Localizations. *Frederick J. Vrba, Dieter H. Hartmann, & Mark C. Jennings.* 446, 115, 154-G4 (1995)

A Search for a Pulsar in the Remnant of SN 1987A with the *Hubble Space Telescope* High-Speed Photometer. *J. W. Percival, P. T. Boyd, J. D. Biggs, J. F. Dolan, R. C. Bless, J. L. Elliot, M. J. Nelson, E. L. Robinson, M. J. Taylor, G. W. van Citters, & K. G. Wolinski.* 446, 832, 167-E4 (1995)

Luminosity Attenuation and Distances of Red Giant Stars. *L. Celis S.* 98, 701, 33-A1 (1995)

Synthetic Mean Colors for RR Lyrae Variables. *Giuseppe Bono, Filippina Caputo, & Robert F. Stellingwerf.* 99, 263, 37-F8 (1995)

The B_jRI Photometric System. *Craig A. Gullixson, Patricia C. Boeshaar, J. Anthony Tyson, & Patrick Seitzer.* 99, 281, 38-A1 (1995)

TECHNIQUES: POLARIMETRIC

Spectropolarimetry of SN 1993J in NGC 3031. *Susan R. Trammell, Dean C. Hines, & J. Craig Wheeler.* 414, L21, 175-E2 (1993)

Ultraviolet Interstellar Polarization Observed with the *Hubble Space Telescope*. *W. B. Somerville, R. G. Allen, D. J. Carnochan, Lida He, D. McNally, P. G. Martin, D. H. Morgan, K. Nandy, J. R. Walsh, D. C. B. Whittet, R. Wilson, & M. J. Wolff.* 427, L47, 117-F13 (1994)

Circular and Linear Polarization of the SiO Masers in VY Canis Majoris. *G. C. McIntosh, C. Read Predmore, & Nimesh A. Patel.* 428, L29, 134-E1 (1994)

COBE DIRBE Near-Infrared Polarimetry of the Zodiacal Light: Initial Results. *G. B. Berriman, N. W. Boggess, M. G. Hauser, T. Kelsall, C. M. Lisse, S. H. Moseley, W. T. Reach, & R. F. Silverberg.* 431, L63, 183-C1 (1994)

Magnetic Fields around Bok Globules: CCD Polarimetry of CB 4. *Brian D. Kane, Dan P. Clemens, Robert W. Leach, & Richard Barvainis.* 445, 269, 136-C2 (1995)

TECHNIQUES: RADAR ASTRONOMY

A Potential New Test for Unseen Matter in the Outer Solar System. *Timothy P. Krisher.* 433, 666, 219-C13 (1994)

TECHNIQUES: RADIAL VELOCITIES

Radial Velocities of Carbon Stars: CO versus Optical Measurements. *Cecilia Barnbaum.* 385, 694, 21-F10 (1992)

Radial Velocity Observations of the Sun at Night. *R. S. McMillan, T. L. Moore, M. L. Perry, & P. H. Smith.* 403, 801, 25-G8 (1993)

The Stellar Velocity Dispersion in the Nucleus of M82. *Niall I. Gaffney, Dan F. Lester, & C. M. Telesco.* 407, L57, 82-C6 (1993)

Mapping Spherical Potentials with Discrete Radial Velocities. *David Merritt & Prasenjit Saha.* 409, 75, 97-G10 (1993)

The Radial Velocities of Planetary Nebulae in NGC 3379. *Robin Ciardullo, George H. Jacoby, & Herwig B. Dejonghe.* 414, 454, 176-G3 (1993)

Proper Motions and Radial Velocities in the Globular Cluster M22 and the Cluster Distance. *Ruth C. Peterson & Kyle M. Cudworth.* 420, 612, 10-C7 (1994)

Study of Spectroscopic Binaries with TODCOR. I. A New Two-dimensional Correlation Algorithm to Derive the Radial Velocities of the Two Components. *S. Zucker & T. Mazeh.* 420, 806, 13-A3 (1994)

A Study of the Spectrum of HD 108, An Unusual Of Star. *Anne B. Underhill.* 420, 869, 13-F6 (1994)

A Search for Binaries in the Globular Cluster NGC 3201. *Patrick Côté, Douglas L. Welch, Philippe Fischer, G. S. Da Costa, Peter Tamblyn, Patrick Seitzer, & M. J. Irwin.* 90, 83, 2-B5 (1994)

Radial Velocities of M Giants at 300 Parsec Projected Radius from the Galactic Center. *R. D. Blum, J. S. Carr, D. L. DePoy, K. Sellgren, & D. M. Terndrup.* 422, 111, 31-D9 (1994)

Short-Period Radial Velocity Variations of α Bootis: Evidence for Radial Pulsations. *Artie P. Hatzes & William D. Cochran.* 422, 366, 34-E11 (1994)

An Analysis of the Radial Velocity Residuals for Various Models of SS 433. *George W. Collins II & Christopher J. Garasi.* 431, 836, 189-B1 (1994)

The Radial Velocity Variability of the K Giant β Ophiuchi. I. The Detection of Low-Amplitude, Short-Period Pulsations. *Artie P. Hatzes & William D. Cochran.* 432, 763, 205-E1 (1994)

First Radial Velocities for 146 Bright F- and G-Type Stars. *Helmut A. Abt & Daryl W. Willmarth.* 94, 677, 61-D1 (1994)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. I. The $7° < |B| < 8°$ Strips. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 437, 419, 288-G11 (1994)

Radial Velocities of Stars in the Globular Cluster M4 and the Cluster Distance. *Ruth C. Peterson, Richard F. Rees, & Kyle M. Cudworth.* 443, 124, 96-G11 (1995)

Planetary Nebulae as Probes of Dark Matter in NGC 3384. *Benoit Tremblay, David Merritt, & T. B. Williams.* 443, L5, 102-B8 (1995)

On Spectral Line Formation and Measurement in Cepheids: Implications to Distance Determination. *C. N. Sabbey, D. D. Sasselov, M. S. Fieldus, J. B. Lester, K. A. Venn, & R. P. Butler.* 446, 250, 156-F2 (1995)

M Giant Kinematics in Off-Axis Fields between 150 and 300 Parsecs from the Galactic Center. *R. D. Blum, J. S. Carr, K. Sellgren, & D. M. Terndrup.* 449, 623, 221-C11 (1995)

A Study of the Spectra of Seven Of Stars. I. Radial Velocities. *Anne B. Underhill.* 100, 433, 52-A10 (1995)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. III. Kinematics of the Bulge Stars. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 453, 837, 295-D7 (1995)

Dynamics of the Galactic Globular Cluster NGC 3201. *Patrick Côté, Douglas L. Welch, Philippe Fischer, & K. Gebhardt.* 454, 788, 312-F3 (1995)

TECHNIQUES: SPECTROSCOPIC

Infrared Emission Spectra of Benzene and Naphthalene: Implications for the Interstellar Polycyclic Aromatic Hydrocarbon Hypothesis. *Jerrell D. Brenner & John R. Barker.* 388, L39, 52-D6 (1992)

The Comet-Tail (A–X) System of CO^+: Precise Molecular Constants of Its $X\ ^2\Sigma^+$, $A\ ^2\Pi_i$, and $B\ ^2\Sigma^+$ States. *C. Haridass, C. V. V. Prasad, & S. Paddi Reddy.* 388, 669, 58-E1 (1992)

A Spectrophotometric Atlas of Galaxies. *Robert C. Kennicutt, Jr.* 79, 255, 17-F7 (1992)

A New Solar Irradiance Calibration from 3295 Å to 8500 Å Derived from Absolute Spectrophotometry of Vega. *G. W. Lockwood, H. Tüg, & N. M. White.* 390, 668, 83-E9 (1992)

Vacuum Ultraviolet Extinction Measurements on Cosmic Dust Analog Carbon Grains. *L. Colangeli, A. Blanco, S. Fonti, & E. Bussoletti.* 392, 284, 104-E1 (1992)

Submillimeter Spectrum of Low-Temperature Hydrogen: The Pure Translational Band of H_2 and the $R(0)$ Line of HD. *E. H. Wishnow, I. Ozier, & H. P. Gush.* 392, L43, 106-F1 (1992)

Measurement of CO Overtone Line Profiles in SVS 13. *John S. Carr & Alan T. Tokunaga.* 393, L67, 127-D7 (1992)

High-Resolution Photoabsorption Cross Sections of $E^1\Pi$–$X^1\Sigma^+$ Vibrational Bands of ^{12}CO and ^{13}CO. *G. Stark, P. L. Smith, K. Ito, & K. Yoshino.* 395, 705, 152-B5 (1992)

A New Library of Stellar Optical Spectra. *David R. Silva & Mark E. Cornell.* 81, 865, 48-A9 (1992)

Analysis of the Photospheric Epoch Spectra of Type Ia Supernovae SN 1990N and SN 1991T. *David J. Jeffery, Bruno Leibundgut, Robert P. Kirshner, Stefano Benetti, David Branch, & George Sonneborn.* 397, 304, 171-F4 (1992)

An Extension of the High-Resolution Millimeter- and Submillimeter-Wave Spectrum of Methanol to High Angular Momentum Quantum Numbers. *Todd Anderson, Eric Herbst, & Frank C. De Lucia.* 82, 405, 55-A9 (1992)

The Redshift Evolution of the Lyman-Alpha Forest: Blending Effects. *Dario Trevese, Emanuele Giallongo, & Luca Camurani.* 398, 491, 190-C1 (1992)

Microwave Spectra and Electric Dipole Moments for Low-J Levels of Interstellar Radicals: SO, C_2S, C_3S, c-HC_3, CH_2CC, and c-C_3H_2. *F. J. Lovas, R. D. Suenram, T. Ogata, & S. Yamamoto.* 399, 325, 199-D7 (1992)

Laboratory Measurement of the Millimeter and Submillimeter Wave Spectrum of $C_2H_3^+$. *M. Bogey, M. Cordonnier, C. Demuynck, & J. L. Destombes.* 399, L103, 201-E3 (1992)

Abundance of Interstellar Carbon toward ζ Ophiuchi. *Jason A. Cardelli, John S. Mathis, Dennis C. Ebbets, & Blair D. Savage.* 402, L17, 6-D1 (1993)

Automated Galaxy Redshift Measurements from Very Low Dispersion Objective Prism Schmidt Plates. *Peter Schuecker.* 84, 39, 1-E11 (1993)

Transition Rates for ZrO from a Laboratory Absorption Spectrum. *J. E. Littleton, Sumner P. Davis, & Mei Song.* 404, 412, 33-A1 (1993)

Variations of the Ultraviolet Fe II and Balmer Continuum Emission in the Seyfert Galaxy NGC 5548. *D. Maoz, H. Netzer, B. M. Peterson, J. Bechtold, R. Bertram, N. G. Bochkarev, T. E. Carone, M. Dietrich, A. V. Filippenko, W. Kollatschny, K. T. Korista, A. I. Shapovalova, J. C. Shields, P. S. Smith, U. Thiele, & R. M. Wagner.* 404, 576, 36-B8 (1993)

A Critical List of Voigt-fitted Equivalent Width Measurements Based on the Solar Flux Spectrum. *Thomas Meylan, Ingemar Furenlid, Michael S. Wiggs, & R. L. Kurucz.* 85, 163, 8-D1 (1993)

High-Resolution Absorption Cross Section Measurements of Carbon Monoxide at 20 K between 96.7 and 98.8 Nanometers. *G. Stark, K. Yoshino, P. L. Smith, J. R. Esmond, K. Ito, & M. H. Stevens.* 410, 837, 124-B8 (1993)

The *Hubble Space Telescope* Quasar Absorption Line Key Project. II. Data Calibration and Absorption-Line Selection. *Donald P. Schneider, George F. Hartig, Buell T. Jannuzi, Sofia Kirhakos, David H. Saxe, Ray J. Weymann, John N. Bahcall, Jacqueline Bergeron, Alec Boksenberg, W. L. W. Sargent, Blair D. Savage, David A. Turnshek, & Arthur M. Wolfe.* 87, 45, 27-E9 (1993)

A Study of Carina OB2 Association. I. Observational Data. *Beatriz García.* 87, 197, 29-F3 (1993)

The Meinel System ($A^2\Pi_i$–$X^2\Sigma^+$) of $^{14}N_2^+$, $^{14}N^{15}N^+$, and $^{15}N_2^+$. *A. Bernard, M. Larzilliere, C. Effantin, & A. J. Ross.* 413, 829, 166-F7 (1993)

Spectropolarimetry of SN 1993J in NGC 3031. *Susan R. Trammell, Dean C. Hines, & J. Craig Wheeler.* 414, L21, 175-E2 (1993)

Detection of [O III] λ5007 Emission from the Io Plasma Torus. *Nicolas Thomas.* 414, L41, 175-G2 (1993)

Ultraviolet Transitions of Low Condensation Temperature Heavy Elements and New Data for Interstellar Arsenic, Selenium, Tellurium, and Lead. *Jason A. Cardelli, S. R. Federman, David L. Lambert, & C. E. Theodosiou.* 416, L41, 207-F5 (1993)

The Mount Wilson Observatory Metallicity Index, C_{RV}: Comparison with Other Photometric Systems. *W. H. Soon, Q. Zhang, S. L. Baliunas, & R. L. Kurucz.* 416, 787, 213-C1 (1993)

New Observations of the Optical Spectrum of SiO^+ and the Prediction of Its Rotational Spectrum. *L. Zhang, R. Cameron, R. A. Holt, T. J. Scholl, & S. D. Rosner.* 418, 307, 234-G5 (1993)

The Laboratory Spectrum of Acetaldehyde at 1 Millimeter (230–325 GHz). *W. L. Barclay, Jr., M. A. Anderson, L. M. Ziurys, I. Kleiner, & J. T. Hougen.* 89, 221, 51-G3 (1993)

Size Effects on Dissociation Rates of Polycyclic Aromatic Hydrocarbon Cations: Laboratory Studies and Astrophysical Implications. *H. W. Jochims, E. Rühl, H. Baumgärtel, S. Tobita, & S. Leach.* 420, 307, 4-F6 (1994)

A High-Resolution ^{13}C Isotope Study in the Vacuum Ultraviolet of Spectra of CO($A \rightarrow X$), C I, and C II. *C. Haridass & K. P. Huber.* 420, 433, 6-C1 (1994)

Interstellar Detection of the Intersystem Line Si II] λ2335 toward ζ Ophiuchi. *Jason A. Cardelli, Ulysses J. Sofia, Blair D. Savage, Francis P. Keenan, & Philip L. Dufton.* 420, L29, 7-D13 (1994)

Comparison of New Experimental and Astrophysical f-Values for Some Ru II Lines, Observed in *HST* Spectra of χ Lupi. *Sveneric G. Johansson, Ali Joueizadeh, Ulf Litzén, Jörgen Larsson, Anders Persson, Claes-Göran Wahlström, Sune Svanberg, David S. Leckrone, & Glenn M. Wahlgren.* 421, 809, 28-C8 (1994)

New Measurement of the $^{12}C(n, \gamma)^{13}C$ Reaction Cross Section. *T. Ohsaki, Y. Nagai, M. Igashira, T. Shima, K. Takeda, S. Seino, & T. Irie.* 422, 912, 43-C9 (1994)

Stellar Spectral Classification Using Automated Schemes. *R. K. Gulati, Ranjan Gupta, Pradeep Gothoskar, & Shyam Khobragade.* 426, 340, 100-D5 (1994)

Fourier Transform Spectroscopy of the Swan ($d\ ^3\Pi_g$–$a\ ^3\Pi_u$) System of the Jet-cooled C_2 Molecule. *C. V. V. Prasad & P. F. Bernath.* 426, 812, 108-E9 (1994)

Accurate Determination of Predissociation Rates and Transition Frequencies for Carbon Monoxide. *W. Ubachs, K. S. E. Eikema, P. F. Levelt, W. Hogervorst, M. Drabbels, W. L. Meerts, & J. J. ter Meulen.* 427, L55, 117-G10 (1994)

The Activity Cycle of τ Ceti. *David F. Gray & Sallie L. Baliunas.* 427, 1042, 125-E8 (1994)

Infrared Spectra of Crystalline Phase Ices Condensed on Silicate Smokes at $T < 20$ K. *Marla H. Moore, Robert F. Ferrante, Reggie L. Hudson, Joseph A. Nuth III, & Bertram Donn.* 428, L81, 143-A7 (1994)

Ultraviolet Spectra of Quenched Carbonaceous Composite Derivatives: Comparison to the "217 Nanometer" Interstellar Absorption Feature. *Akira Sakata, Setsuko Wada, Alan T. Tokunaga, Takatoshi Narisawa, Hidehiro Nakagawa, & Hiroshi Ono.* 430, 311, 163-A7 (1994)

Zeeman Enhancement of Lines in Extremely Active K Dwarfs. *Gibor Basri & Geoffrey W. Marcy.* 431, 844, 189-B11 (1994)

Imaging Spectroscopy with High Spatial Resolution. *Naoshi Baba, Susumu Kuwamura, Noriaki Miura, & Yuji Norimoto.* 431, L111, 192-A1 (1994)

Highly Unsaturated Hydrocarbons as Potential Carriers of Some Diffuse Interstellar Bands. *P. Freivogel, J. Fulara, & J. P. Maier.* 431, L151, 192-E7 (1994)

Abundances, Planetary Nebulae, and Stellar Evolution. *Lawrence H. Aller.* 432, 427, 201-C1 (1994)

MEPSICRON Spectrophotometry of Seyfert Galaxies. I. Spectral Atlas. *Irene Cruz-González, Luis Carrasco, Alfonso Serrano, José Guichard, Deborah Dultzin-Hacyan, & Gian Franco Bisiacchi.* 94, 47, 52-E9 (1994)

Two Micron Spectrophotometry of the Orion Nebula and the Detection of Significant [Fe III] Emission. *D. L. DePoy & Richard W. Pogge.* 433, 725, 220-B1 (1994)

A Spectrum Synthesis Program for Binary Stars. *Albert P. Linnell & Ivan Hubeny.* 434, 738, 238-A4 (1994)

A Search for Diffuse Hα Emission from Lyα Absorption Clouds toward 3C 273. *J. Bland-Hawthorn, K. Taylor, S. Veilleux, & P. L. Shopbell.* 437, L95, 299-A1 (1994)

The Faint Limit of the *Hubble Space Telescope* Faint Object Spectrograph and Rejection of the Cosmic-Ray Background. *David Tytler & Christopher Davis.* 438, 420, 7-C5 (1995)

Precise Laboratory Measurements of Methanol Rotational Transition Frequencies in the 5 to 13 GHz Region. *S. M. Breckenridge & S. G. Kukolich.* 438, 504, 8-E11 (1995)

High-Resolution Absorption Cross Section Measurements of Supersonic Jet-cooled Carbon Monoxide between 92.5 and 97.4 Nanometers. *K. Yoshino, G. Stark, J. R. Esmond, P. L. Smith, K. Ito, & T. Matsui.* 438, 1013, 18-A13 (1995)

First Measurement of a $p(n, \gamma)d$ Reaction Cross Section between 10 and 80 keV. *T. S. Suzuki, Y. Nagai, T. Shima, T. Kikuchi, H. Sato, T. Kii, & M. Igashira.* 439, L59, 40-F5 (1995)

Measurement of the $^{16}O(n, \gamma)^{17}O$ Reaction Cross Section at Stellar Energy and the Critical Role of Nonresonant p-Wave Neutron Capture. *M. Igashira, Y. Nagai, K. Masuda, T. Ohsaki, & H. Kitazawa.* 441, L89, 76-C11 (1995)

Neural Network Classification of the Near-Infrared Spectra of A-Type Stars. *Wm. Bruce Weaver & Ana V. Torres-Dodgen.* 446, 300, 157-D1 (1995)

Extragalactic Ionized Hydrogen in the Fornax Cluster. *J. Bland-Hawthorn, R. D. Ekers, W. van Breugel, A. Koekemoer, & K. Taylor.* 447, L77, 190-C13 (1995)

EXAFS and XANES: New Astrophysical Tools to Study the Solid State Structure of Interstellar Grains. *Jonathan W. Woo.* 447, L129, 191-C8 (1995)

Solution to the Bivariate Integral Inversion Problem: The Determination of Emission Measures Differential in Temperature and Density. *Veronika Hubeny & Philip G. Judge.* 448, L61, 200-C13 (1995)

An Infrared Spectroscopic Survey of the ρ Ophiuchi Young Stellar Cluster: Masses and Ages from the H-R Diagram. *Thomas P. Greene & Michael R. Meyer.* 450, 233, 231-C3 (1995)

Satellites on Lyman Alpha Due to H-H and H-H^+ Collisions. *John F. Kielkopf & Nicole F. Allard.* 450, L75, 245-A8 (1995)

Study of Spectroscopic Binaries with TODCOR. III. Application to Triple-lined Systems. *Shay Zucker, Guillermo Torres, & Tsevi Mazeh.* 452, 863, 276-E10 (1995)

Absolute Measurements of Starspot Area and Temperature: II Pegasi in 1989 October. *James E. Neff, Douglas O'Neal, & Steven H. Saar.* 452, 879, 276-G6 (1995)

The Canada-France Redshift Survey. II. Spectroscopic Program: Data for the 0000−00 and 1000+25 Fields. *Olivier Le Fèvre, David Crampton, Simon J. Lilly, Francois Hammer, & Laurence Tresse.* 455, 60, 319-A12 (1995)

TELESCOPES

High Rate for Type Ic Supernovae. *Richard A. Muller, Heidi Jo Marvin Newberg, Carlton R. Pennypacker, Saul Perlmutter, Timothy P. Sasseen, & Craig K. Smith.* 384, L9, 6-B7 (1992)

The Snapshot Survey: A Search for Gravitationally Lensed Quasars with the *Hubble Space Telescope*. *J. N. Bahcall, D. Maoz, R. Doxsey, D. P. Schneider, N. A. Bahcall, O. Lahav, & B. Yanny.* 387, 56, 37-F6 (1992)

Hard X-Ray Imaging of the Galactic Black Hole Candidate GX 339−4. *C. E. Covault, J. E. Grindlay, & R. P. Manandhar.* 388, L65, 59-C12 (1992)

Liquid Mirror Surface Aberrations. I. Wavefront Analysis. *Brad K. Gibson & Paul Hickson.* 391, 409, 91-B1 (1992)

The Case for Liquid Mirrors in Orbiting Telescopes. *Ermanno F. Borra.* 392, 375, 105-E7 (1992)

Optimal Grazing Incidence Optics and Its Application to Wide-Field X-Ray Imaging. *Christopher J. Burrows, Richard Burg, & Riccardo Giacconi.* 392, 760, 111-F13 (1992)

Liquid Mirrors: Optical Shop Tests and Contributions to the Technology. *E. F. Borra, R. Content, L. Girard, S. Szapiel, L. M. Tremblay, & E. Boily.* 393, 829, 126-C1 (1992)

The Ultraviolet Imaging Telescope: Design and Performance. *Theodore P. Stecher, Gerald R. Baker, Donna D. Bartoe, Frank H. Bauer, Albert Blum, Ralph C. Bohlin, Harvey R. Butcher, Peter C. Chen, Nicholas R. Collins, Robert H. Cornett, John J. Deily, Michael R. Greason, Gregory S. Hennessy, Jesse K. Hill, Robert S. Hill, Paul M. Hintzen, Joan E. Isensee, Peter J. Kenny, Wayne B. Landsman, David L. Linard, Stephen P. Maran, Susan G. Neff, Granville R. Nichols, Joseph Novello, Robert W. O'Connell, Joel D. Offenberg, Ronald A. Parise, Barbara B. Pfarr, Thomas B. Plummer, Foy F. Richardson, Morton S. Roberts, Susan D. Sitko, Andrew M. Smith, Alfred K. Stober, John D. Stolarik, & Jack C. Tebay.* 395, L1, 144-C7 (1992)

The Advanced Cosmic Microwave Explorer: A Millimeter-Wave Telescope and Stabilized Platform. *P. R. Meinhold, A. O. Chingcuanco, J. O. Gundersen, J. A. Schuster, M. D. Seiffert, P. M. Lubin, D. Morris, & T. Villela.* 406, 12, 55-C1 (1993)

Tip-Tilt Compensation: Resolution Limits for Ground-based Telescopes Using Laser Guide Star Adaptive Optics. *Scot S. Olivier, Claire E. Max, Donald T. Gavel, & James M. Brase.* 407, 428, 74-D1 (1993)

Imaging with Ultra-Resolution in the Presence of Strong Scattering. *T. J. Cornwell & Ramesh Narayan.* 408, L68, 89-G1 (1993)

Calibration of the Energetic Gamma-Ray Experiment Telescope (EGRET) for the *Compton Gamma-Ray Observatory*. *D. J. Thompson, D. L. Bertsch, C. E. Fichtel, R. C. Hartman, R. Hofstadter, E. B. Hughes, S. D. Hunter, B. W. Hughlock, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, C. von Montigny, P. L. Nolan, H. I. Nel, K. Pinkau, H. Rothermel, E. J. Schneid, M. Sommer, P. Sreekumar, D. Tieger, & A. H. Walker.* 86, 629, 22-F1 (1993)

Instrument Description and Performance of the Imaging Gamma-Ray Telescope COMPTEL aboard the *Compton Gamma-Ray Observatory*. *V. Schönfelder, H. Aarts, K. Bennett, H. de Boer, J. Clear, W. Collmar, A. Connors, A. Deerenberg, R. Diehl, A. von Dordrecht, J. W. den Herder, W. Hermsen, M. Kippen, L. Kuiper, G. Lichti, J. Lockwood, J. Macri, M. McConnell, D. Morris, R. Much, J. Ryan, G. Simpson, M. Snelling, G. Stacy, H. Steinle, A. Strong, B. N. Swanenburg, B. Taylor, C. de Vries, & C. Winkler.* 86, 657, 23-A5 (1993)

In-Flight Performance and Preliminary Results from the Far Ultraviolet Space Telescope (Faust) Flown on ATLAS-1. *Stuart Bowyer, Timothy P. Sasseen, Michael Lampton, & Xiaoyi Wu.* 415, 875, 198-G12 (1993)

Optical Shop Tests of a f/1.2 2.5 Meter Diameter Liquid Mirror. *E. F. Borra, R. Content, & L. Girard.* 418, 943, 244-D1 (1993)

A Wide Sky Coverage Ferrofluid Mercury Telescope. *William L. H. Shuter & Lorne A. Whitehead.* 424, L139, 79-F12 (1994)

The Infrared Telescope in Space (IRTS). *H. Murakami, J. Bock, M. M. Freund, H. Guo, T. Hirao, A. E. Lange, H. Matsuhara, T. Matsumoto, S. Matsuura, T. J. McMahon, M. Murakami, T. Nakagawa, M. Noda, K. Noguchi, H. Okuda, K. Okumura, T. Onaka, T. L. Roellig, S. Sato, H. Shibai, T. Tanabé, T. Watabe, T. Yagi, N. Yajima, & M. Yui.* 428, 354, 132-E8 (1994)

INTEGRAL: Mission and Satellite. *Oscar Pace, Dominique Pawlak, & Chris Winkler.* 92, 339, 36-C13 (1994)

The *Compton Gamma Ray Observatory*. *N. Gehrels, E. Chipman, & D. Kniffen.* 92, 351, 36-E1 (1994)

A Positron Annihilation Radiation Telescope Using Laue Diffraction in a Crystal Lens. *Peter von Ballmoos & Robert K. Smither.* 92, 663, 40-F7 (1994)

A New Telescope for Wide-Band Gamma-Ray Astronomy: The Silicon Compton Recoil Telescope (SCRT). *O. Tümay Tümer, Farid Ait-Ouamer, Scott C. Blair, Gary L. Case, Brendan P. O'Neill, Terrence J. O'Neill, R. Stephen White, & Allen D. Zych.* 92, 671, 40-G2 (1994)

Cylindrical Gamma-Ray Montitor (CYGAM) Concept. *N. G. Leikov & G. S. Bisnovatyi-Kogan.* 92, 679, 41-A1 (1994)

The Polarization Sensitivity of the Liquid Xenon Imaging Telescope. *E. Aprile, A. Bolotnikov, D. Chen, R. Mukherjee, & F. Xu.* 92, 689, 41-A13 (1994)

Detection of a VLBI Counterjet in NGC 1275: A Possible Probe of the Parsec-Scale Accretion Region. *R. C. Walker, J. D. Romney, & J. M. Benson.* 430, L45, 165-F13 (1994)

UBC/Laval 2.7 Meter Liquid Mirror Telescope. *Paul Hickson, Ermanno F. Borra, Rémi Cabanac, Robert Content, Brad K. Gibson, & Gordon A. H. Walker.* 436, L201, 282-F2 (1994)

Adaptive Optics Experiments Using Sodium Laser Guide Stars. *M. Lloyd-Hart, J. R. P. Angel, B. Jacobsen, D. Wittman, R. Dekany, D. McCarthy, E. Kibblewhite, W. Wild, B. Carter, & J. Beletic.* 439, 455, 27-D2 (1995)

Determination of the Galactic ^{26}Al Source Distribution with a Novel Imaging Telescope. *E. Aprile, E. L. Chupp, A. Bolotnikov, & P. P. Dunphy.* 453, 685, 293-C5 (1995)

Performance and Preliminary Calibration of the Hopkins Ultraviolet Telescope on the Astro-2 Mission. *Jeffrey W. Kruk, Samuel T. Durrance, Gerard A. Kriss, Arthur F. Davidsen, William P. Blair, Brian R. Espey, & David S. Finley.* 454, L1, 307-C1 (1995)

TRANSITION PROBABILITIES

Dielectronic Recombination Rate Coefficients for S^{q+} (q = 1–5) Ions. *N. R. Badnell.* 379, 356, 167-D9 (1991)

Atomic Data for Resonance Absorption Lines. I. Wavelengths Longward of the Lyman Limit. *Donald C. Morton.* 77, 119, 45-B1 (1991)

Collisional Rates and Cooling within Atomic Hydrogen Plasmas. *T. T. Scholz & H. R. J. Walters.* 380, 302, 180-A5 (1991)

A Table of Astronomically Important Ro-vibrational Transitions for the H_3^+ Molecular Ion. *Lancelot Kao, Takeshi Oka, Steven Miller, & Jonathan Tennyson.* 77, 317, 48-E1 (1991)

Collision Strengths and Excitation Rate Coefficients for Transitions in Fe XXI. *Kanti M. Aggarwal.* 77, 677, 54-A1 (1991)

TRANSITION RATES

Collisional Excitation and Radiative Properties of N II: The Strong Intercombination (^1D–$^3P^o$) Transition at 748 Å. *T. M. Tripp, D. E. Shemansky, G. K. James, & J. M. Ajello.* 368, 641, 33-B6 (1991)

High-Resolution Absorption Cross Sections of Carbon Monoxide Bands at 295 K between 91.7 and 100.4 Nanometers. *G. Stark, K. Yoshino, Peter L. Smith, K. Ito, & W. H. Parkinson.* 369, 574, 44-G13 (1991)

Cross Sections for Production of H($2p$, $2s$, $1s$) by Electron Collisional Dissociation of H_2. *J. M. Ajello, D. E. Shemansky, & G. K. James.* 371, 422, 65-D5 (1991)

Accurate Oscillator Strengths of Astrophysical Interest for Neutral Oxygen. *E. Biémont, A. Hibbert, M. Godefroid, N. Vaeck, & B. C. Fawcett.* 375, 818, 122-G1 (1991)

Effective Collision Strengths among Fine-Structure Levels of Ca XV: Erratum. *K. M. Aggarwal, K. A. Berrington, & F. P. Keenan.* 77, 441, 50-F1 (1991)

TURBULENCE

On the Transport and Acceleration of Solar Flare Particles in a Coronal Loop. *James M. Ryan & Martin A. Lee.* 368, 316, 26-A7 (1991)

Turbulent Compressible Convection. *Fausto Cattaneo, Nicholas H. Brummell, Juri Toomre, Andrea Malagoli, & Neal E. Hurlburt.* 370, 282, 50-F10 (1991)
Stellar Turbulent Convection: A New Model and Applications. *V. M. Canuto & I. Mazzitelli.* 370, 295, 51-A1 (1991)
VLA and VLBI Angular Broadening Measurements: The Distribution of Interstellar Scattering at Low Galactic Latitudes. *A. L. Fey, S. R. Spangler, & J. M. Cordes.* 372, 132, 75-F1 (1991)
Thermal and Mechanical Damping of Solar *p*-Modes. *Peter Goldreich & Pawan Kumar.* 374, 366, 102-F1 (1991)
Consequences of Strong Pitch-Angle Diffusion of Particles in Solar Flares. *P. A. Bespalov, V. V. Zaitsev, & A. V. Stepanov.* 374, 369, 102-F5 (1991)
On the Orbital Circularization of Close Binaries. *Itzhak Goldman & Tsevi Mazeh.* 376, 260, 128-B8 (1991)
The Dissipation of Magnetohydrodynamic Turbulence Responsible for Interstellar Scintillation and the Heating of the Interstellar Medium. *Steven R. Spangler.* 376, 540, 133-B5 (1991)
First Results from the Goddard High-Resolution Spectrograph: Evidence for Photospheric Microturbulence in Early O Stars: Are Surface Gravities Systematically Underestimated? *I. Hubeny, S. R. Heap, & B. Altner.* 377, L33, 143-D11 (1991)
On Molecular Cloud Scaling Laws and Star Formation. *R. N. Henriksen.* 377, 500, 146-A1 (1991)
The Edges of Molecular Clouds: Fractal Boundaries and Density Structure. *E. Falgarone, T. G. Phillips, & C. K. Walker.* 378, 186, 153-C8 (1991)
Turbulence, Convection, and Stability in Accretion Disks. *César Meirelles Filho.* 378, 266, 154-C4 (1991)
Coherent Radiation from Energetic Electron Streams via Collisionless Bremsstrahlung in Strong Plasma Turbulence. *James C. Weatherall & Gregory Benford.* 378, 543, 159-B8 (1991)
Dynamo Magnetic Field Modes in Thin Astrophysical Disks: An Adiabatic Computational Approximation. *T. F. Stepinski & E. H. Levy.* 379, 343, 167-C9 (1991)
Turbulently Generated Magnetic Fields in Clusters of Galaxies. *Itzhak Goldman & Yoel Rephaeli.* 380, 344, 182-E8 (1991)
Time Variability of Pulsar Dispersion Measures. *J. A. Phillips & A. Wolszczan.* 382, L27, 205-D1 (1991)
Faraday Rotation Measure Irregularities through the Supernova Remnant CTA 1: A Site of Enhanced Interstellar Plasma Turbulence. *John H. Simonetti.* 386, 170, 26-C3 (1992)
Galaxy-driven Turbulence and the Growth of Intracluster Magnetic Fields. *David S. De Young.* 386, 464, 31-B8 (1992)
Turbulence in Cooling Flows. *Catherine F. Westbury & R. N. Henriksen.* 388, 64, 49-G12 (1992)
Proton Acceleration in Neutron Star Magnetospheres. *I. A. Smith, J. I. Katz, & P. H. Diamond.* 388, 148, 50-G7 (1992)
Further Improvements of a New Model for Turbulent Convection in Stars. *V. M. Canuto & I. Mazzitelli.* 389, 724, 70-D1 (1992)
A Self-consistent Turbulent Model for Solar Coronal Heating. *J. Heyvaerts & E. R. Priest.* 390, 297, 77-F3 (1992)
Turbulent Convection with Overshooting: Reynolds Stress Approach. *V. M. Canuto.* 392, 218, 103-F1 (1992)
Atmospheric Fluctuations: Empirical Structure Functions and Projected Performance of Future Instruments. *M. Bester, W. C. Danchi, C. G. Degiacomi, L. J. Greenhill, & C. H. Townes.* 392, 357, 105-D1 (1992)
Dynamo Action in Stratified Convection with Overshoot. *Åke Nordlund, Axel Brandenburg, Richard L. Jennings, Michel Rieutord, Juha Ruokolainen, Robert F. Stein, & Ilkka Tuominen.* 392, 647, 110-C6 (1992)
Nonlinear Restrictions on Dynamo Action. *Samuel I. Vainshtein & Fausto Cattaneo.* 393, 165, 116-B5 (1992)
Swinging Spiral Waves and Alfvén Turbulence in Accretion Disks. *M. Tagger, R. Pellat, & F. V. Coroniti.* 393, 708, 124-F1 (1992)
Propagation Conditions of Relativistic Electrons in the Inner Heliosphere. *M.-B. Kallenrode, G. Wibberenz, & S. Hucke.* 394, 351, 132-C11 (1992)
Development of Magnetohydrodynamic Turbulence in Coronal Loops. *Daniel O. Gómez & Constantino Ferro Fontán.* 394, 662, 137-F8 (1992)
Pressure-confined Clumps in Magnetized Molecular Clouds. *Frank Bertoldi & Christopher F. McKee.* 395, 140, 142-A1 (1992)
Enhanced Damping of Alfvén Waves in the Solar Corona by a Turbulent Wave Spectrum. *Robert G. Kleva & J. F. Drake.* 395, 697, 152-A5 (1992)
The Spectrum of Random Magnetic Fields in the Mean Field Dynamo Theory of the Galactic Magnetic Field. *Russell M. Kulsrud & Stephen W. Anderson.* 396, 606, 165-A1 (1992)
Evidence for Transonic Flows in the Solar Granulation. *A. Nesis, T. J. Bogdan, F. Cattaneo, A. Hanslmeier, M. Knölker, & A. Malagoli.* 399, L99, 201-D10 (1992)
On the Virial Theorem for Turbulent Molecular Clouds. *Christopher F. McKee & Ellen G. Zweibel.* 399, 551, 204-F7 (1992)
Band Splitting in Solar Type II Radio Bursts. *R. A. Treumann & J. LaBelle.* 399, L167, 208-E7 (1992)
Fast Dynamos, Cosmic Rays, and the Galactic Magnetic Field. *E. N. Parker.* 401, 137, 222-F7 (1992)
Interstellar Cloud Shapes: A Minimum-Hypothesis Account Involving a Purely Gravitational Effect. *Robert C. Fleck, Jr.* 401, 146, 222-G3 (1992)
The Observation of Correlated Velocity Structures in a Translucent Molecular Cloud and Implications for Turbulence. *L. Magnani, T. N. LaRosa, & S. N. Shore.* 402, 226, 3-G10 (1993)
Helioseismological Test of a New Model for Stellar Convection. *L. Paternò, R. Ventura, V. M. Canuto, & I. Mazzitelli.* 402, 733, 11-F3 (1993)
Direct 75 Milliarcsecond Images from the Multiple Mirror Telescope with Adaptive Optics. *M. Lloyd-Hart, R. Dekany, B. McLeod, D. Wittman, D. Colucci, D. McCarthy, & R. Angel.* 402, L81, 13-B7 (1993)
Refractive Interstellar Scintillation of Pulsar Intensities at 74 MHz. *Y. Gupta, B. J. Rickett, & W. A. Coles.* 403, 183, 16-C3 (1993)
608 MHz VLBI Observations of the Compact Double Radio Source 2050+364: Constraints on Interstellar Scattering. *Alan L. Fey & Robert L. Mutel.* 404, 197, 30-D1 (1993)
Wave Generation in a Sunspot. *Jeongwoo W. Lee.* 404, 372, 32-D11 (1993)
On the Generation of "Strong" Magnetic Fields. *S. I. Vainshtein, E. N. Parker, & R. Rosner.* 404, 773, 38-E5 (1993)
On the Relation between Fanaroff-Riley Types I and II Radio Galaxies. *David S. De Young.* 405, L13, 47-C8 (1993)
Normal Incidence X-Ray Telescope Power Spectra of X-Ray Emission from Solar Active Regions. I. Observations. *Daniel O. Gómez, Petrus C. H. Martens, & Leon Golub.* 405, 767, 52-E9 (1993)
Normal Incidence X-Ray Telescope Power Spectra of X-Ray Emission from Solar Active Regions. II. Theory. *Daniel O. Gómez, Petrus C. H. Martens, & Leon Golub.* 405, 773, 52-F3 (1993)
Shock Propagation in a Turbulent Cloud. *Toshiya Kimura & Makoto Tosa.* 406, 512, 64-B10 (1993)
Turbulent Mixing Layers in the Interstellar Medium of Galaxies. *Jonathan D. Slavin, J. Michael Shull, & Mitchell C. Begelman.* 407, 83, 70-B7 (1993)
A Theory of Nonlocal Mixing-Length Convection. I. The Moment Formalism. *Scott A. Grossman, Ramesh Narayan, & David Arnett.* 407, 284, 72-F1 (1993)
On the Generation of Sound by Turbulent Convection. I. A Numerical Experiment. *Thomas J. Bogdan, Fausto Cattaneo, & Andrea Malagoli.* 407, 316, 73-A7 (1993)
Tip-Tilt Compensation: Resolution Limits for Ground-based Telescopes Using Laser Guide Star Adaptive Optics. *Scot S. Olivier, Claire E. Max, Donald T. Gavel, & James M. Brase.* 407, 428, 74-D1 (1993)
Turbulent Magnetohydrodynamic Dynamo for Accretion Disks Using the Cross-Helicity Effect. *Akira Yoshizawa & Nobumitsu Yokoi.* 407, 540, 77-C8 (1993)
Quasi-linear Theory and the Phenomenology of Interplanetary Solar Particle Transport. *Wolfgang Dröge, Ulrich Achatz, Wolfgang Wanner, Reinhard Schlickeiser, & Gerd Wibberenz.* 407, L95, 82-G1 (1993)
Cosmic Turbulence Revisited. *I. Goldman & V. M. Canuto.* 409, 495, 105-B1 (1993)
A Similarity Solution to the Kinematic $\alpha^2\omega$ Dynamo Equation with Time-dependent Coefficients. *Chung-Ming Ko.* 410, 128, 113-F8 (1993)
The Dynamics of Magnetic Flux Rings. *E. E. DeLuca, G. H. Fisher, & B. M. Patten.* 411, 383, 132-B4 (1993)
A Turbulent Model of Time Variability in X-Ray Binary Pulsars. *Masahiro Hoshino & Toshiaki Takeshima.* 411, L79, 142-D9 (1993)
The Effects of Zonal Atmospheric Currents on the Spectra of Rotating Early-Type Stars. *Steven R. Cranmer & George W. Collins II.* 412, 720, 152-F12 (1993)
High-Resolution Observations of Turbulence in the Subcondensation TMC-1C in Heiles' Cloud 2: Estimation of the Velocity Spectrum of Turbulence. *Y. Kitamura, K. Sunada, M. Hayashi, & T. Hasegawa.* 413, 221, 159-A9 (1993)
Turbulent Convection with Overshooting: Reynolds Stress Approach. II. *V. M. Canuto.* 416, 331, 205-B12 (1993)
Turbulent Generation of Trapped Oscillations in Black Hole Accretion Disks. *Michael A. Nowak & Robert V. Wagoner.* 418, 187, 233-D1 (1993)

On the Formation of Spheroidal Stellar Systems and the Nature of Supersonic Turbulence in Star-forming Regions. *Guillermo Tenorio-Tagle, Casiana Muñoz-Tuñon, & Donald P. Cox.* 418, 767, 242-B3 (1993)

Star Formation at Compressed Interfaces in Turbulent Self-gravitating Clouds. *B. G. Elmegreen.* 419, L29, 252-E1 (1993)

The Evolution of Accreting Stars with Turbulent Mixing. *M. Y. Fujimoto.* 419, 768, 257-B13 (1993)

Flame Modeling in Supernovae. *A. Khokhlov.* 419, L77, 259-E1 (1993)

Proton and Electron Mean Free Paths: The Palmer Consensus Revisited. *John W. Bieber, William H. Matthaeus, Charles W. Smith, Wolfgang Wanner, May-Britt Kallenrode, & Gerd Wibberenz.* 420, 294, 4-E5 (1994)

Dynamics of the Magnetic Shearing Instability and Magnetohydrodynamic Turbulence in Accretion Disks. I. Vertical Magnetic Field. *W. Zhang, P. H. Diamond, & E. T. Vishniac.* 420, 705, 11-F2 (1994)

The Dynamics of Charged Particles in Turbulent Astrophysical Plasmas. *Rüdiger Dung & Vahé Petrosian.* 421, 550, 25-A6 (1994)

Turbulent Acceleration in Solar Flares. *D. B. Melrose.* 90, 623, 11-E1 (1994)

Weightiness of the Dispersive Rate in Stochastic Acceleration Processes. *J. Pérez-Peraza & A. Gallegos-Cruz.* 90, 669, 12-B1 (1994)

On Sound Generation by Turbulent Convection: A New Look at Old Results. *Z. E. Musielak, R. Rosner, R. F. Stein, & P. Ulmschneider.* 423, 474, 52-A13 (1994)

Hierarchical Structure in Nearly Pressureless Flows as a Consequence of Self-similar Statistics. *Enrique Vázquez-Semadeni.* 423, 681, 57-A12 (1994)

Supernovae Deflagrations in Three Dimensions. *A. Khokhlov.* 424, L115, 79-D1 (1994)

Differential Rotation and Turbulent Convection: A New Reynolds Stress Model and Comparison with Solar Data. *V. M. Canuto, F. O. Minotti, & O. Schilling.* 425, 303, 84-A9 (1994)

A New Path for the Electron Bulk Energization in Solar Flares: Fermi Acceleration by Magnetohydrodynamic Turbulence in Reconnection Outflows. *T. N. LaRosa, R. L. Moore, & S. N. Shore.* 425, 856, 92-D8 (1994)

Angular Scattering of Solar Radio Emission by Coronal Turbulence. *T. S. Bastian.* 426, 774, 108-B3 (1994)

Anisotropic Scattering of OH/IR Stars toward the Galactic Center. *Dale A. Frail, Philip J. Diamond, James M. Cordes, & Huib Jan Van Langevelde.* 427, L43, 117-F6 (1994)

Eigenfunction Solution of Boltzmann's Equation for the Case of a Focusing Magnetic Field with Finite Helicity. *H. L. Pauls & R. A. Burger.* 427, 927, 124-B9 (1994)

Flat Rotation Curves: A Result of the Helical Inverse Cascade in Turbulent Media? *R. D. Prabhu & V. Krishan.* 428, 483, 136-B13 (1994)

Large Eddy Simulation of Turbulence: A Subgrid Scale Model Including Shear, Vorticity, Rotation, and Buoyancy. *V. M. Canuto.* 428, 729, 139-C13 (1994)

Properties of Acoustic Sources in the Sun. *Pawan Kumar.* 428, 827, 140-E7 (1994)

Hypersonic Acceleration and Turbulence of H_2O Masers in W49N. *C. R. Gwinn.* 429, 241, 147-B3 (1994)

Statistical Analysis of Turbulence in Molecular Clouds. *Mark S. Miesch & John Bally.* 429, 645, 153-F13 (1994)

High-Resolution Simulations of Compressible Convection Using the Piecewise-parabolic Method. *David H. Porter & Paul R. Woodward.* 93, 309, 45-G1 (1994)

A Summary of Extreme Scattering Events and a Descriptive Model. *R. Fiedler, B. Dennison, K. J. Johnston, E. B. Waltman, & R. S. Simon.* 430, 581, 169-A13 (1994)

Galactic Structures Associated with Extreme Scattering Events in the Radio Light Curves of NRAO 140, 0954+658, and 2352+495. *R. Fiedler, T. Pauls, K. J. Johnston, & B. Dennison.* 430, 595, 169-C1 (1994)

Charged-Particle Motion in Multidimensional Magnetic Field Turbulence. *J. Giacalone & J. R. Jokipii.* 430, L137, 175-B10 (1994)

Stochastic Reacceleration of Cosmic Rays in the Interstellar Medium. *E. S. Seo & V. S. Ptuskin.* 431, 705, 187-C10 (1994)

Toward a Theory of Interstellar Turbulence. I. Weak Alfvénic Turbulence. *S. Sridhar & P. Goldreich.* 432, 612, 203-E11 (1994)

On the Effects of a Weak Magnetic Field on Turbulent Transport. *Fausto Cattaneo.* 434, 200, 228-B12 (1994)

Highly Ionized Gas in the Galactic Disk: The $l = 295°$, $b = 0°$ Interarm Direction. *Kenneth R. Sembach.* 434, 244, 228-G3 (1994)

Transition to Turbulence in Solar Surges. *Russell B. Dahlburg & Judith T. Karpen.* 434, 766, 238-D1 (1994)

The Study of Coronal Plasma Structures and Fluctuations with Faraday Rotation Measurements. *Takayuki Sakurai & Steven R. Spangler.* 434, 773, 238-E6 (1994)

Synthesized Spectra of Turbulent Clouds. *E. Falgarone, D. C. Lis, T. G. Phillips, A. Pouquet, D. H. Porter, & P. R. Woodward.* 436, 728, 275-E1 (1994)

Ensemble-averaged Thermonuclear Reaction Rates for Turbulent Convection in Stellar Interiors. *Lawrence D. Cloutman.* 437, 384, 288-D9 (1994)

Toward a Theory of Interstellar Turbulence. II. Strong Alfvénic Turbulence. *P. Goldreich & S. Sridhar.* 438, 763, 14-F12 (1995)

The Wall of Reconnection-driven Magnetohydrodynamic Turbulence in a Large Solar Flare. *R. L. Moore, T. N. LaRosa, & L. E. Orwig.* 438, 985, 17-F6 (1995)

Adaptive Optics Experiments Using Sodium Laser Guide Stars. *M. Lloyd-Hart, J. R. P. Angel, B. Jacobsen, D. Wittman, R. Dekany, D. McCarthy, E. Kibblewhite, W. Wild, B. Carter, & J. Beletic.* 439, 455, 27-D2 (1995)

Angular Scattering of Radio Waves: Implications for Mode Coupling in the Solar Corona. *T. S. Bastian.* 439, 494, 27-G9 (1995)

Equipartition of Energy for Turbulent Astrophysical Fluids: Accounting for the Unseen Energy in Molecular Clouds. *Ellen G. Zweibel & Christopher F. McKee.* 439, 779, 35-C13 (1995)

Turbulent Diffusion and Its Effects on the Chemistry of Molecular Clouds. *Taoling Xie, Mark Allen, & William D. Langer.* 440, 674, 52-E1 (1995)

Alfvén Waves in Interstellar Gasdynamics. *Christopher F. McKee & Ellen G. Zweibel.* 440, 686, 52-F2 (1995)

Propagation of Galactic Cosmic Rays under Diffusive Reacceleration. *U. Heinbach & M. Simon.* 441, 209, 62-C4 (1995)

A Turbulent Model for the Interstellar Medium. I. Threshold Star Formation and Self-Gravity. *Enrique Vázquez-Semadeni, Thierry Passot, & Annick Pouquet.* 441, 702, 71-F1 (1995)

Large HCO^+ and HCN Abundances in the Translucent Cloud toward PKS 0528+134. *Michiel R. Hogerheijde, Eugène J. de Geus, Marco Spaans, Huib Jan van Langevelde, & Ewine F. van Dishoeck.* 441, L93, 76-D4 (1995)

On Magnetic Turbulence in Interstellar Clouds. *P. C. Myers & V. K. Khersonsky.* 442, 186, 79-F9 (1995)

Modeling of Shallow and Inefficient Convection in the Outer Layers of the Sun Using Realistic Physics. *Yong-Cheol Kim, Peter A. Fox, Sabatino Sofia, & Pierre Demarque.* 442, 422, 82-G1 (1995)

Turbulent Convection in Thin Accretion Disks. *Itzhak Goldman & Amri Wandel.* 443, 187, 97-F6 (1995)

Electron Density Power Spectrum in the Local Interstellar Medium. *J. W. Armstrong, B. J. Rickett, & S. R. Spangler.* 443, 209, 98-A6 (1995)

On the Supersonic Turbulence of NGC 604. *Nanci S. P. Sabalisck, Guillermo Tenorio-Tagle, Héctor O. Castañeda, & Casiana Muñoz-Tuñón.* 444, 200, 116-B8 (1995)

GHRS Observations of Cool, Low-Gravity Stars. II. Flow and Turbulent Velocities in the Outer Atmosphere of γ Crucis (M3.4 III). *Kenneth G. Carpenter, Richard D. Robinson, & Philip G. Judge.* 444, 424, 119-D7 (1995)

Nonlinear Alfvén Wave Propagation in Nonhomogeneous Collisionless Media. *Ildar K. Khabibrakhmanov & Danny Summers.* 444, 796, 127-D9 (1995)

Numerical Simulations of Stratified Compressible Convection with Internal Heating and Disklike Variable Gravity. *W. Cabot, K. W. Thompson, & J. B. Pollack.* 98, 315, 26-C4 (1995)

Radio Interferometer Observations of Solar Wind Turbulence from the Orbit of *Helios* to the Solar Corona. *Steven R. Spangler & Takayuki Sakurai.* 445, 999, 149-B10 (1995)

The Dynamics of Flux Tubes in a High-β Plasma. I. A General Description. *Ethan T. Vishniac.* 446, 724, 166-B1 (1995)

Dynamo-generated Turbulence and Large-Scale Magnetic Fields in a Keplerian Shear Flow. *Axel Brandenburg, Åke Nordlund, Robert F. Stein, & Ulf Torkelsson.* 446, 741, 166-C7 (1995)

Anisotropic Modal Energy Transfer in Interstellar Turbulence. *David Montgomery & William H. Matthaeus.* 447, 706, 185-F10 (1995)

The Dynamics of Two-dimensional Local and Finite Perturbations in Envelopes of Rotating White Dwarfs. I. *Patrick Godon & Giora Shaviv.* 447, 797, 187-A3 (1995)

Turbulence in Molecular Clouds. *John Dubinski, Ramesh Narayan, & T. G. Phillips.* 448, 226, 195-C6 (1995)

On the Generation of Flux-Tube Waves in Stellar Convection Zones. II. Improved Treatment of Longitudinal Tube Wave Generation. *Z. E. Musielak, R. Rosner, H. P. Gail, & P. Ulmschneider.* 448, 865, 206-G7 (1995)

The First Second of a Type II Supernova: Convection, Accretion, and Shock Propagation. *H.-Thomas Janka & Ewald Müller.* 448, L109, 209-D9 (1995)

Propagation of Turbulent Flames in Supernovae. *Alexei M. Khokhlov.* 449, 695, 222-D7 (1995)

Self-Consistency Constraints on the Dynamo Mechanism. *A. Bhattacharjee & Y. Yuan.* 449, 739, 223-A6 (1995)

Sequential Star Formation in OB Associations: The Role of Molecular Cloud Turbulence. *Bruce G. Elmegreen, Toshiya Kimura, & Makoto Tosa.* 451, 675, 256-E1 (1995)

A Numerical Study of Rayleigh-Taylor Instability in Magnetic Fluids. *Byung-Il Jun, Michael L. Norman, & James M. Stone.* 453, 332, 285-F9 (1995)

On the Interaction of Convection and Rotation in Stars. *Pawan Kumar, Ramesh Narayan, & Abraham Loeb.* 453, 480, 287-F6 (1995)

Vertical Scales of Turbulence at the Mount Wilson Observatory. *Robert N. Treuhaft, Stephen T. Lowe, Manfred Bester, William C. Danchi, & Charles H. Townes.* 453, 522, 288-D12 (1995)

Acceleration Rates and Injection Efficiencies in Oblique Shocks. *Donald C. Ellison, Matthew G. Baring, & Frank C. Jones.* 453, 873, 296-A7 (1995)

The H II Region Sharpless 170: A Multiscale Analysis of the Hα Velocity Field. *Marc-Antoine Miville-Deschênes, Gilles Joncas, & Daniel Durand.* 454, 316, 303-F1 (1995)

Optimization and Performance of Adaptive Optics for Imaging Extrasolar Planets. *Steven M. Stahl & David G. Sandler.* 454, L153, 316-F13 (1995)

Turbulent and Chaotic Dynamics Underlying Solar Magnetic Variability. *J. K. Lawrence, A. C. Cadavid, & A. A. Ruzmaikin.* 455, 366, 323-B9 (1995)

A Turbulent Model for the Interstellar Medium. II. Magnetic Fields and Rotation. *Thierry Passot, Enrique Vázquez-Semadeni, & Annick Pouquet.* 455, 536, 329-D1 (1995)

ULTRAVIOLET: GALAXIES

Hard X-Ray Tests of the Unified Model for an Ultraviolet-detected Sample of Seyfert 2 Galaxies. *John S. Mulchaey, Richard F. Mushotzky, & Kimberly A. Weaver.* 390, L69, 84-G1 (1992)

Lyα Emission from Cooling Flows and Measures of the Dust Content of Rich Clusters of Galaxies. *Esther M. Hu.* 391, 608, 95-E7 (1992)

From Fairall 9 to High-z Objects: Pattern of Change in Ionization Structure. *Wei Zheng, Li-Zhi Fang, & Luc Binette.* 392, 74, 102-A1 (1992)

Intergalactic Ionizing Flux from Active Galactic Nuclei. *Nobuo Terasawa.* 392, L15, 106-C1 (1992)

Hopkins Ultraviolet Telescope Observations of the Far-Ultraviolet Spectrum of NGC 4151. *G. A. Kriss, A. F. Davidsen, William P. Blair, C. W. Bowers, W. V. Dixon, S. T. Durrance, P. D. Feldman, H. C. Ferguson, R. C. Henry, R. A. Kimble, J. W. Kruk, Knox S. Long, H. W. Moos, & O. Vancura.* 392, 485, 108-C10 (1992)

Correlated Hard X-Ray and Ultraviolet Variability in NGC 5548. *J. Clavel, K. Nandra, F. Makino, K. A. Pounds, G. A. Reichert, C. M. Urry, W. Wamsteker, M. Peracaula-Bosch, G. C. Stewart, & C. Otani.* 393, 113, 115-E1 (1992)

Ultraviolet Imaging Telescope Ultraviolet Images: Large-Scale Structure, H II Regions, and Extinction in M81. *Jesse K. Hill, Ralph C. Bohlin, Kwang-Ping Cheng, Paul M. N. Hintzen, Wayne B. Landsman, Susan G. Neff, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L37, 145-B9 (1992)

Ultraviolet Imaging Telescope Observations of the Scl Galaxy NGC 628 (M74). *Peter C. Chen, Robert H. Cornett, Morton S. Roberts, Ralph C. Bohlin, Susan G. Neff, Robert W. O'Connell, Ronald A. Parise, Andrew M. Smith, & Theodore P. Stecher.* 395, L41, 145-C5 (1992)

The Ultraviolet Absorption Spectrum of the Quasar H1821+643 ($z = 0.297$). *John N. Bahcall, Buell T. Jannuzi, Donald P. Schneider, George F. Hartig, & Richard F. Green.* 397, 68, 168-G10 (1992)

An Objective Classification Scheme for QSO Spectra. *Paul J. Francis, Paul C. Hewett, Craig B. Foltz, & Frederic H. Chaffee.* 398, 476, 190-A13 (1992)

Seyfert Galaxy Ultraviolet Emission-Line Intensities and Variability: A Self-consistent Photoionization Analysis Applied to Broad-Line–emitting Gas in NGC 3783. *Anuradha P. Koratkar & Gordon M. MacAlpine.* 401, 110, 222-D3 (1992)

A Survey of Ultraviolet Variability in Blazars. *Rick Edelson.* 401, 516, 229-B1 (1992)

The Ultraviolet Color Gradient in the Late-Type Spiral Galaxy M33. *Wayne B. Landsman, Morton S. Roberts, Ralph C. Bohlin, Robert W. O'Connell, Andrew M. Smith, & Theodore P. Stecher.* 401, L83, 233-B3 (1992)

Implications of Lyman-Alpha Equivalent Widths in Active Galactic Nuclei. *Joseph C. Shields & Gary J. Ferland.* 402, 425, 8-A1 (1993)

Simultaneous *ROSAT*, *GINGA*, VLA, *IUE*, and Optical Observations of the Bright Quasar H1821+643. *Michiel Kolman, Jules P. Halpern, Chris R. Shrader, Alexei V. Filippenko, Henner H. Fink, & Stephan G. Schaeidt.* 402, 514, 9-A1 (1993)

The Ultraviolet–to–Near-Infrared Spectral Flux Distribution of Four BL Lacertae Objects. *R. Falomo, A. Treves, L. Chiappetti, L. Maraschi, E. Pian, & E. G. Tanzi.* 402, 532, 9-B7 (1993)

Ultraviolet Imaging Telescope Images: Limits on Recent Star Formation in Holmberg IX. *Jesse K. Hill, Susan E. Gessner, Ralph C. Bohlin, Kwang-Ping Cheng, Paul M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 402, L45, 12-E1 (1993)

NGC 5018: A Metal-poor Giant Elliptical. *Francesco Bertola, David Burstein, & Lucio M. Buson.* 403, 573, 22-F10 (1993)

An *IUE* Search for Star Formation in Ellipticals with Gaseous Disks. *Francesco Bertola, David Burstein, Lucio M. Buson, & Alvio Renzini.* 403, 577, 22-G1 (1993)

Simultaneous *Ginga* and *IUE* Observations of the Seyfert Galaxy NGC 3516. *Michiel Kolman, Jules P. Halpern, Christopher Martin, Hisamitsu Awaki, & Katsuji Koyama.* 403, 592, 23-A8 (1993)

Ultraviolet Polarimetry and Spectroscopy of the BL Lacertae Object PKS 2155−304. *Richard G. Allen, Paul S. Smith, J. R. P. Angel, Bryan W. Miller, Scott F. Anderson, & Bruce Margon.* 403, 610, 23-C1 (1993)

Extended Near-Ultraviolet Continuum Emission and the Nature of the Polarized Broad-Line Seyfert 2 Galaxies. *Richard W. Pogge & M. M. De Robertis.* 404, 563, 36-A7 (1993)

Variations of the Ultraviolet Fe II and Balmer Continuum Emission in the Seyfert Galaxy NGC 5548. *D. Maoz, H. Netzer, B. M. Peterson, J. Bechtold, R. Bertram, N. G. Bochkarev, T. E. Carone, M. Dietrich, A. V. Filippenko, W. Kollatschny, K. T. Korista, A. I. Shapovalova, J. C. Shields, P. S. Smith, U. Thiele, & R. M. Wagner.* 404, 576, 36-B8 (1993)

Ultraviolet Spectra of QSOs, BL Lacertae Objects, and Seyfert Galaxies. *Kenneth M. Lanzetta, David A. Turnshek, & Jennifer Sandoval.* 84, 109, 3-B1 (1993)

The Ultraviolet Absorption Spectrum of the Quasar PKS 0405−12 and the Local Density of Lyman-Alpha Absorption Systems. *John N. Bahcall, Buell T. Jannuzi, Donald P. Schneider, & George F. Hartig.* 405, 491, 49-B11 (1993)

Spectral Evolution of Stellar Populations Using Isochrone Synthesis. *Gustavo Bruzual A., & Stéphane Charlot.* 405, 538, 49-F11 (1993)

Damped Lyman-Alpha Absorption in Q0957+561A, B. *David A. Turnshek & Ralph C. Bohlin.* 407, 60, 69-G7 (1993)

Multifrequency Observations of the Optically Active Radio-quiet Quasar GQ Comae. II. Ultraviolet, Optical, and Infrared Continuum Variability. *Michael L. Sitko, Annamaria K. Sitko, Aneta Siemiginowska, & R. Szczerba.* 409, 139, 98-F5 (1993)

An Atlas of Ultraviolet Spectra of Star-forming Galaxies. *A. L. Kinney, R. C. Bohlin, D. Calzetti, N. Panagia, & Rosemary F. G. Wyse.* 86, 5, 14-B9 (1993)

The Narrow-Line Region of High-Luminosity Active Galactic Nuclei. *Beverley J. Wills, H. Netzer, M. S. Brotherton, Mingsheng Han, D. Wills, J. A. Baldwin, G. J. Ferland, & I. W. A. Browne.* 410, 534, 120-C11 (1993)

The Time Variability of the Ultraviolet Continuum and Lyman-Alpha in 3C 273. *M.-H. Ulrich, T. J.-L. Courvoisier, & W. Wamsteker.* 411, 125, 128-E13 (1993)

Multiwavelength Monitoring of the BL Lacertae Object PKS 2155−304. I. The *IUE* Campaign. *C. M. Urry, L. Maraschi, R. Edelson, A. Koratkar, J. Krolik, G. Madejski, E. Pian, G. Pike, G. Reichert, A. Treves, W. Wamsteker, R. Bohlin, J. Bregman, W. Brinkmann, L. Chiappetti, T. Courvoisier, A. V. Filippenko, H. Fink, I. M. George, Y. Kondo, P. G. Martin, H. R. Miller, P. O'Brien, J. M. Shull, M. Sitko, A. E. Szymkowiak, G. Tagliaferri, S. Wagner, & R. Warwick.* 411, 614, 137-C9 (1993)

The Influence of QSO Emission-Line Velocity Shifts on Estimates of the Intergalactic Background Intensity. *Brian R. Espey.* 411, L59, 142-B7 (1993)

The Ultraviolet Radiation in Metal-rich Elliptical Galaxies. *Uffe Gråe Jørgensen & Peter Thejll.* 411, L67, 142-C5 (1993)

Ultraviolet Photometry of OB Associations in M31. *Jesse K. Hill, Joan E. Isensee, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 414, L9, 175-C11 (1993)

Statistics of QSO Broad Emission-Line Profiles. I. The C IV λ1549 Line and the λ1400 Feature. *Beverley J. Wills, M. S. Brotherton, D. Fang, Charles C. Steidel, & Wallace L. W. Sargent.* 415, 563, 194-G8 (1993)

Lyman-Alpha Emission from Galaxies. *Stéphane Charlot & S. Michael Fall.* 415, 580, 195-A13 (1993)

First Ultraviolet Spectropolarimetry of Radio-selected BL Lacertae Objects. *Paul S. Smith, Richard G. Allen, & J. R. P. Angel.* 415, L83, 199-F6 (1993)

The Ultraviolet Continua of Blazars: A Reconsideration of *IUE* Archives. *E. Pian & A. Treves.* 416, 130, 202-E14 (1993)

Variable C IV Absorption in the Seyfert Galaxy NGC 5548: A Connection to Broad Absorption Line Quasi-stellar Objects? *J. Michael Shull & Elise R. Sachs.* 416, 536, 210-A10 (1993)

Population Synthesis and the Ultraviolet Spectrum of Elliptical Galaxies. *Gladis Magris C., & Gustavo Bruzual A.* 417, 102, 218-E6 (1993)

Ultraviolet Imaging Telescope: Globular Clusters in M31. *Ralph C. Bohlin, Eric W. Deutsch, Kerry A. McQuade, Jesse K. Hill, Wayne B. Landsman, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 417, 127, 218-G11 (1993)

Faint Object Camera Far-Ultraviolet Objective Prism Observations of 12 $z > 3$ Quasars. *P. Jakobsen, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 417, 528, 225-G10 (1993)

Synthetic UV Lines of Si IV, C IV, and He II from a Population of Massive Stars in Starburst Galaxies. *Carmelle Robert, Claus Leitherer, & Timothy M. Heckman.* 418, 749, 241-G7 (1993)

On the Lyman-Alpha Emission of Starburst Galaxies. *David Valls-Gabaud.* 419, 7, 246-B9 (1993)

Ultraviolet Radiation from Evolved Stellar Populations. I. Models. *Ben Dorman, Robert T. Rood, & Robert W. O'Connell.* 419, 596, 255-B8 (1993)

The Ultraviolet Emission Properties of Five Low-Redshift Active Galactic Nuclei at High Signal-to-Noise Ratio and Spectral Resolution. *Ari Laor, John N. Bahcall, Buell T. Jannuzi, Donald P. Schneider, Richard F. Green, & George F. Hartig.* 420, 110, 2-C12 (1994)

Ultraviolet Observations of the Gamma-Ray Blazar 3C 279 following the Gamma-Ray Flare of 1991 June. *Jerry T. Bonnell, W. Thomas Vestrand, & J. Gregory Stacy.* 420, 545, 9-D3 (1994)

HST Observations of the [O III] Emission-Line Region in Markarian 78. *A. Capetti, F. Macchetto, W. B. Sparks, & A. Boksenberg.* 421, 87, 17-B4 (1994)

Conditions in the $z = 0.692$ Absorber toward 3CR 286. *Ross D. Cohen, Thomas A. Barlow, E. A. Beaver, Vesa T. Junkkarinen, Ronald W. Lyons, & Harding E. Smith.* 421, 453, 23-G1 (1994)

Models for the Evolution of the Spectral Energy Distribution of Elliptical Galaxies for Ultraviolet to Far-Infrared Wavelengths. *P. Mazzei, G. De Zotti, & C. Xu.* 422, 81, 31-A13 (1994)

The Multifrequency Spectral Evolution of Blazar 3C 345 during the 1991 Outburst. *J. R. Webb, C. R. Shrader, T. J. Balonek, D. M. Crenshaw, D. Kazanas, S. Clements, A. G. Smith, A. D. Nair, R. J. Leacock, P. P. Gombola, A. Sadun, H. R. Miller, I. Robson, R. Fujimoto, F. Makino, T. Kii, H. Aller, M. Aller, P. Hughes, E. Valtaoja, H. Teräsranta, E. Salonen, M. Tornikoski, & W. Chism.* 422, 570, 38-G11 (1994)

Extreme Ultraviolet Spectroscopy of PKS 2155−304. *Antonella Fruscione, Stuart Bowyer, Arieh Königl, & Steven M. Kahn.* 422, L55, 44-G6 (1994)

Steps toward Determination of the Size and Structure of the Broad-Line Region in Active Galactic Nuclei. V. Variability of the Ultraviolet Continuum and Emission Lines of NGC 3783. *G. A. Reichert, P. M. Rodríguez-Pascual, D. Alloin, J. Clavel, D. M. Crenshaw, G. A. Kriss, J. H. Krolik, M. A. Malkan, H. Netzer, B. M. Peterson, W. Wamsteker, A. Altamore, B. Altieri, K. S. Anderson, J. H. Blackwell, Jr., C. Boisson, N. Brosch, T. E. Carone, M. Dietrich, M .N. England, I. N. Evans, A. V. Filippenko, C. M. Gaskell, M. Goad, P. M. Gondhalekar, K. Horne, D. Kazanas, W. Kollatschny, A. P. Koratkar, K. T. Korista, G. M. MacAlpine, D. Maoz, T. Mazeh, B. McCollum, H. R. Miller, C. Mendes de Oliveira, P. T. O'Brien, M. G. Pastoriza, D. Pelat, E. Pérez, G. C. Perola, R. W. Pogge, R. L. Ptak, M. C. Recondo-González, J. Rodríguez-Espinosa, E. I. Rosenblatt, A. C. Sadun, M. Santos-Lleó, J. C. Shields, C. R. Shrader, J. M. Shull, S. M. Simkin, M. L. Sitko, M. A. J. Snijders, L. S. Sparke, G. M. Stirpe, R. Stoner, T. Storchi-Bergmann, W.-H. Sun, T. Wang, W. F. Welsh, R. J. White, C. Winge, & W. Zheng.* 425, 582, 89-A1 (1994)

UIT: Ultraviolet Surface Photometry of the Spiral Galaxy M74 (NGC 628). *Robert H. Cornett, Robert W. O'Connell, Michael R. Greason, Joel D. Offenberg, Ronald J. Angione, Ralph C. Bohlin, K. P. Cheng, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, Fred D. Talbert, & Theodore P. Stecher.* 426, 553, 105-C7 (1994)

The *HST* Quasar Absorption Line Key Project. IV. *HST* Faint Object Spectrograph and Ground-based Observations of the Unusual Low-Redshift Broad Absorption Line Quasi-stellar Object PG 0043+039. *David A. Turnshek, Brian R. Espey, Michael Kopko, Jr., Michael Rauch, Ray J. Weymann, Buell T. Jannuzi, Alec Boksenberg, Jacqueline Bergeron, George F. Hartig, W. L. W. Sargent, Blair D. Savage, Donald P. Schneider, & Arthur M. Wolfe.* 428, 93, 129-D1 (1994)

The Intrinsic Nuclear Spectrum of NGC 1068. *Edward A. Pier, Robert Antonucci, Todd Hurt, Gerard Kriss, & Julian Krolik.* 428, 124, 129-F8 (1994)

Multiwavelength Analysis of Quasars, Seyfert Galaxies, and Starbursts. *J. Miguel Mas-Hesse, Pedro M. Rodríguez-Pascual, Lourdes Sanz Fernández de Córdoba, & I. Félix Mirabel.* 92, 599, 39-G4 (1994)

The Reddening Law outside the Local Group Galaxies: The Case of NGC 7552 and NGC 5236. *Anne L. Kinney, Daniela Calzetti, Eduardo Bica, & Thaisa Storchi-Bergmann.* 429, 172, 146-C2 (1994)

Dust Extinction of the Stellar Continua in Starburst Galaxies: The Ultraviolet and Optical Extinction Law. *Daniela Calzetti, Anne L. Kinney, & Thaisa Storchi-Bergmann.* 429, 582, 153-A1 (1994)

The Optical–Ultraviolet–Gamma-Ray Spectrum of 3C 279. *Hagai Netzer, D. Kazanas, Beverley J. Wills, D. Wills, Mingsheng Han, M. S. Brotherton, J. A. Baldwin, G. J. Ferland, & I. W. A. Browne.* 430, 191, 161-D10 (1994)

HST Ultraviolet Spectropolarimetry of NGC 1068. *Robert Antonucci, Todd Hurt, & Joseph Miller.* 430, 210, 161-F5 (1994)

Ultraviolet Imaging of the AGN + Starburst Galaxy NGC 1068. *Susan G. Neff, Michael N. Fanelli, Laura J. Roberts, Robert W. O'Connell, Ralph Bohlin, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 430, 545, 168-E1 (1994)

The Global Second Parameter Phenomenon and the Origin of the Ultraviolet Radiation from Elliptical Galaxies. *Young-Wook Lee.* 430, L113, 174-G3 (1994)

Misdirected Quasars and Evolved Stars in Distant Radio Galaxies. *Sperello di Serego Alighieri, Andrea Cimatti, & Robert A. E. Fosbury.* 431, 123, 177-F5 (1994)

The Near-Infrared–Optical–Ultraviolet Emission of BL Lacertae Objects. *E. Pian, R. Falomo, R. Scarpa, & A. Treves.* 432, 547, 202-F11 (1994)

The Linear Polarization of 3C 345 in the Ultraviolet. *Joseph F. Dolan, Patricia T. Boyd, Karen G. Wolinski, Paul S. Smith, C. D. Impey, Robert C. Bless, M. J. Nelson, J. W. Percival, M. J. Taylor, J. L. Elliot, Edward L. Robinson, & G. W. van Citters.* 432, 560, 203-A1 (1994)

Lyα Emission and Absorption Features in the Spectra of Galaxies. *W. L. Chen & David A. Neufeld.* 432, 567, 203-A10 (1994)

Spectral Energy Distributions of the Brightest Palomar-Green Quasars at Intermediate Redshifts. *Todd M. Tripp, Jill Bechtold, & Richard F. Green.* 433, 533, 217-E12 (1994)

High-Resolution Optical and UV Observations of the Centers of NGC 1316 and NGC 3998 with the *Hubble Space Telescope*. *G. Fabbiano, C. Fassnacht, & G. Trinchieri.* 434, 67, 226-B1 (1994)

The *HST* Quasar Absorption Line Key Project. IX. An Emission-Line Study of PG 2251+113. *Brian R. Espey, David A. Turnshek, Lincoln Lee, Jacqueline Bergeron, Alec Boksenberg, George F. Hartig, Buell T. Jannuzi, W. L. W. Sargent, Blair D. Savage, Donald P. Schneider, Ray J. Weymann, & Arthur M. Wolfe.* 434, 484, 234-D2 (1994)

The X-Ray and Ultraviolet Absorbing Outflow in 3C 351. *Smita Mathur, Belinda Wilkes, Martin Elvis, & Fabrizio Fiore.* 434, 493, 234-E1 (1994)

IUE Spectra and Photoionization Models of the Seyfert 2 Galaxies NGC 7674 and I Zw 92. *Steven B. Kraemer, Chi-Chao Wu, D. Michael Crenshaw, & J. Patrick Harrington.* 435, 171, 245-F1 (1994)

The 1993 Multiwavelength Campaign on 3C 279: The Radio to Gamma-Ray Energy Distribution in Low State. *L. Maraschi, P. Grandi, C. M. Urry, A. E. Wehrle, G. M. Madejski, H. H. Fink, G. Ghisellini, R. C. Hartman, A. P. Koratkar, C. von Montigny, E. Pian, H. C. Thomas, A. Treves, M. F. Aller, H. D. Aller, C. D. Bailyn, T. J. Balonek, H. Bock, W. Collmar, I. S. Glass, S. J. Litchfield, I. M. McHardy, R. Méndez, J. Pesce, H. P. Reuter,*

E. I. Robson, H. Steppe, J. A. Stevens, H. Teräsranta, & S. J. Wagner. 435, L91, 259-D8 (1994)

Emission Lines from Condensing Intracluster Gas. *G. Mark Voit, Megan Donahue, & Jonathan D. Slavin.* 95, 87, 65-C8 (1994)

Effects of Intergalactic Absorption on the Visibility of Young Galaxies. *Yuzuru Yoshii & Bruce A. Peterson.* 436, 551, 273-B3 (1994)

Multiwavelength Tests of the Dusty Torus Model for Seyfert Galaxies. *John S. Mulchaey, Anuradha Koratkar, Martin J. Ward, Andrew S. Wilson, Mark Whittle, Robert R. J. Antonucci, Anne L. Kinney, & Todd Hurt.* 436, 586, 273-E10 (1994)

Luminosity Effects and the Emission-Line Properties of Quasars with $0 < z < 3.8$. *Patrick S. Osmer, Alain C. Porter, & Richard F. Green.* 436, 678, 274-G7 (1994)

Multiwavelength Monitoring of the BL Lacertae Object PKS 2155−304. III. Ground-based Observations in 1991 November. *T. J.-L. Courvoisier, A. Blecha, P. Bouchet, P. Bratschi, M. T. Carini, M. Donahue, R. Edelson, E. D. Feigelson, A. V. Filippenko, I. S. Glass, J. Heidt, R. I. Kollgaard, T. Matheson, H. R. Miller, J. C. Noble, K. Sekiguchi, P. S. Smith, C. M. Urry, & S. J. Wagner.* 438, 108, 2-G2 (1995)

Multiwavelength Monitoring of the BL Lacertae Object PKS 2155−304. IV. Multiwavelength Analysis. *R. Edelson, J. Krolik, G. Madejski, L. Maraschi, G. Pike, C. M. Urry, W. Brinkmann, T. J.-L. Courvoisier, J. Ellithorpe, K. Horne, A. Treves, S. Wagner, W. Wamsteker, R. Warwick, H. D. Aller, M. F. Aller, M. Ashley, A. Blecha, P. Bouchet, P. Bratschi, J. N. Bregman, M. Carini, A. Celotti, M. Donahue, E. Feigelson, A. V. Filippenko, H. Fink, I. George, I. Glass, J. Heidt, J. Hewitt, P. Hughes, R. Kollgaard, Y. Kondo, A. Koratkar, K. Leighly, A. Marscher, P. G. Martin, T. Matheson, H. R. Miller, J. C. Noble, P. O'Brien, E. Pian, G. Reichert, J. M. Saken, J. M. Shull, M. Sitko, P. S. Smith, W.-H. Sun, & G. Tagliaferri.* 438, 120, 3-A4 (1995)

Ultraviolet Imaging Telescope and Optical Emission-Line Observations of H II Regions in M81. *Jesse K. Hill, K. P. Cheng, Ralph C. Bohlin, Robert H. Cornett, P. M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 438, 181, 3-G2 (1995)

New Observations with the *HST* Goddard High Resolution Spectrograph of the Low-Redshift Lyman-Alpha Clouds in the 3C 273 Line of Sight. *Ray Weymann, Michael Rauch, Robert Williams, Simon Morris, & Sally Heap.* 438, 650, 13-B4 (1995)

Hubble Space Telescope Far-Ultraviolet Imaging of M31, M32, and NGC 205. *F. Bertola, A. Bressan, D. Burstein, L. M. Buson, C. Chiosi, & S. di Serego Alighieri.* 438, 680, 13-E4 (1995)

Active Galaxies Observed during the *Extreme Ultraviolet Explorer* All-Sky Survey. *H. L. Marshall, A. Fruscione, & T. E. Carone.* 439, 90, 22-D6 (1995)

The Ultraviolet Spectrum of the Gravitational Lens Candidate UM 425 = QSO 1120+019: Evidence for Broad Absorption Line (BAL) Structure. *A. G. Michalitsianos & R. J. Oliversen.* 439, 599, 32-E13 (1995)

Ultraviolet Spectropolarimetry of High-Redshift Quasars with the *Hubble Space Telescope*. *C. D. Impey, Matthew A. Malkan, Wayne Webb, & C. E. Petry.* 440, 80, 42-C8 (1995)

Detection of Compact Ultraviolet Nuclear Emission in LINER Galaxies. *Dan Maoz, Alexei V. Filippenko, Luis C. Ho, Hans-Walter Rix, John N. Bahcall, Donald P. Schneider, & F. Duccio Macchetto.* 440, 91, 42-D9 (1995)

Intermediate-Resolution Spectroscopy of the Radio Galaxy B2 0902+34 at $z \approx 3.4$. *J. M. Martín-Mirones, E. Martínez-González, J. I. González-Serrano, & J. L. Sanz.* 440, 191, 43-G2 (1995)

Relation between O VI Emission and X-Ray Intensity in Active Galactic Nuclei. *Wei Zheng, Gerard A. Kriss, & Arthur F. Davidsen.* 440, 606, 51-E2 (1995)

Emission Spectrum Integrated over an Accretion Disk: Comparison with Observations of Active Galactic Nuclei. *Toshiya Shimura & Fumio Takahara.* 440, 610, 51-E9 (1995)

A Catalog of Far-Ultraviolet Point Sources Detected with the FAUST Telescope on ATLAS-1. *Stuart Bowyer, Timothy P. Sasseen, Xiaoyi Wu, & Michael Lampton.* 96, 461, 8-D9 (1995)

Radiative Transfer in a Clumpy Universe: The Colors of High-Redshift Galaxies. *Piero Madau.* 441, 18, 59-D13 (1995)

The Gravitational Lens System Q0957+561 in the Ultraviolet. *J. F. Dolan, A. G. Michalitsianos, R. W. Thompson, P. T. Boyd, K. G. Wolinski, R. C. Bless, M. J. Nelson, J. W. Percival, M. J. Taylor, J. L. Elliot, & G. W. van Citters.* 442, 87, 78-D5 (1995)

Ultraviolet Radiation from Evolved Stellar Populations. II. The Ultraviolet Upturn Phenomenon in Elliptical Galaxies. *Ben Dorman, Robert W. O'Connell, & Robert T. Rood.* 442, 105, 78-F6 (1995)

The Gaseous Extent of Galaxies and the Origin of Lyman-Alpha Absorption Systems: A Survey of Galaxies in the Fields of *Hubble Space Telescope* Spectroscopic Target QSOs. *Kenneth M. Lanzetta, David V. Bowen, David Tytler, & John K. Webb.* 442, 538, 87-D1 (1995)

Multifrequency Observations of Kaz 102 during the *ROSAT* All-Sky Survey. *A. Treves, H. H. Fink, M. Malkan, S. J. Wagner, B. J. Wilkes, F. Baganoff, J. Heidt, E. Pian, A. Sadun, S. Schaeidt, J. T. Bonnell, W. Brinkmann, D. de Martino, L. Maraschi, E. G. Tanzi, M. H. Ulrich, & W. Wamsteker.* 442, 589, 88-A9 (1995)

The Evolution of C/O in Dwarf Galaxies from *Hubble Space Telescope* FOS Observations. *Donald R. Garnett, Evan D. Skillman, Reginald J. Dufour, Manuel Peimbert, Silvia Torres-Peimbert, Roberto Terlevich, Elena Terlevich, & Gregory A. Shields.* 443, 64, 96-B6 (1995)

The Heating of Dust in Starburst Galaxies: The Contribution of the Nonionizing Radiation. *Daniela Calzetti, Ralph C. Bohlin, Anne L. Kinney, Thaisa Storchi-Bergmann, & Timothy M. Heckman.* 443, 136, 97-A12 (1995)

Ne VIII λ774 and Time Variable Associated Absorption in the QSO UM 675. *Fred Hamann, Thomas A. Barlow, E. A. Beaver, E. M. Burbidge, Ross D. Cohen, Vesa Junkkarinen, & R. Lyons.* 443, 606, 106-C1 (1995)

Steps toward Determination of the Size and Structure of the Broad-Line Region in Active Galactic Nuclei. VIII. An Intensive *HST*, *IUE*, and Ground-based Study of NGC 5548. *K. T. Korista, D. Alloin, P. Barr, J. Clavel, R. D. Cohen, D. M. Crenshaw, I. N. Evans, K. Horne, A. P. Koratkar, G. A. Kriss, J. H. Krolik, M. A. Malkan, S. L. Morris, H. Netzer, P. T. O'Brien, B. M. Peterson, G. A. Reichert, P. M. Rodríguez-Pascual, W. Wamsteker, K. S. J. Anderson, D. J. Axon, E. Benitez, P. Berlind, R. Bertram, J. H. Blackwell, Jr., N. G. Bochkarev, C. Boisson, M. Carini, R. Carrillo, T. E. Carone, F.-Z. Cheng, J. A. Christensen, K. K. Chuvaev, M. Dietrich, J. J. Dokter, V. Doroshenko, D. Dultzin-Hacyan, M. N. England, B. R. Espey, A. V. Filippenko, C. M. Gaskell, M. R. Goad, L. C. Ho, J. P. Huchra, X. J. Jiang, S. Kaspi, W. Kollatschny, A. Laor, J.-P. Luminet, G. M. MacAlpine, J. W. MacKenty, Yu. F. Malkov, D. Maoz, P. G. Martin, T. Matheson, B. McCollum, N. Merkulova, L. Metik, M. Mignoli, H. R. Miller, M. G. Pastoriza, D. Pelat, J. Penfold, M. Perez, G. C. Perola, J. L. Persaud, J. Peters, R. Pitts, R. W. Pogge, I. Pronik, V. I. Pronik, R. L. Ptak, L. Rawley, M. C. Recondo-González, J. M. Rodríguez-Espinosa, W. Romanishin, A. C. Sadun, I. Salamanca, M. Santos-Lleó, K. Sekiguchi, S. G. Sergeev, A. I. Shapovalova, J. C. Shields, C. Shrader, J. M. Shull, N. A. Silbermann, M. L. Sitko, D. R. Skillman, H. A. Smith, S. M. Smith, M. A. J. Snijders, L. S. Sparke, G. M. Stirpe, R. E. Stoner, W.-H. Sun, U. Thiele, S. Tokarz, Z. I. Tsvetanov, D. A. Turnshek, S. Veilleux, R. M. Wagner, S. J. Wagner, I. Wanders, T. Wang, W. F. Welsh, R. J. Weymann, R. J. White, B. J. Wilkes, B. J. Wills, C. Winge, H. Wu, & Z. L. Zou.* 97, 285, 15-F7 (1995)

Ultraviolet to Optical Spectral Distributions of Northern Star-forming Galaxies. *Kerry McQuade, Daniela Calzetti, & Anne L. Kinney.* 97, 331, 16-C5 (1995)

The *Hubble Space Telescope* Quasar Absorption Line Key Project. V. Redshift Evolution of Lyman Limit Absorption in the Spectra of a Large Sample of Quasars. *Erik A. Stengler-Larrea, Alec Boksenberg, Charles C. Steidel, W. L. W. Sargent, John N. Bahcall, Jacqueline Bergeron, George F. Hartig, Buell T. Jannuzi, Sofia Kirhakos, Blair D. Savage, Donald P. Schneider, David A. Turnshek, & Ray J. Weymann.* 444, 64, 114-B7 (1995)

The Polarization and Ultraviolet Spectrum of Markarian 231. *Paul S. Smith, Gary D. Schmidt, Richard G. Allen, & J. R. P. Angel.* 444, 146, 115-D1 (1995)

Astro-1 and Ground-based Observations of Markarian 335: Evidence for an Accretion Disk. *W. Zheng, G. A. Kriss, A. F. Davidsen, G. Lee, A. D. Code, K. S. Bjorkman, P. S. Smith, D. Weistrop, M. A. Malkan, F. K. Baganoff, & B. M. Peterson.* 444, 632, 125-A10 (1995)

Ultraviolet to Near-Infrared Spectral Distributions of Star-forming and Seyfert 2 Galaxies. *Thaisa Storchi-Bergmann, Anne L. Kinney, & Peter Challis.* 98, 103, 22-C2 (1995)

HST Imaging Polarimetry of NGC 1068. *A. Capetti, D. J. Axon, F. Macchetto, W. B. Sparks, & A. Boksenberg.* 446, 155, 155-C9 (1995)

The Extreme Ultraviolet Spectrum of the BL Lacertae Object PKS 2155−304. *Arieh Königl, John F. Kartje, Stuart Bowyer, Steven M. Kahn, & Chorng-Yuan Hwang.* 446, 598, 164-D1 (1995)

The *Hubble Space Telescope* Sample of Radio-loud Quasars: The Lyα/Hβ Ratio. *Hagai Netzer, M. S. Brotherton, Beverley J. Wills, Mingsheng Han, D. Wills, J. A. Baldwin, G. J. Ferland, & I. W. A. Browne.* 448, 27, 192-E10 (1995)

Discovery of Extreme-Ultraviolet Radiation from the Seyfert Galaxy Ton S180 (= EUVE J0057−223). *Stéphane Vennes, Elisha Polomski, Stuart Bowyer, & John R. Thorstensen.* 448, L9, 199-C3 (1995)

The Ultraviolet Emission Properties of 13 Quasars. *Ari Laor, John N. Bahcall, Buell T. Jannuzi, Donald P. Schneider, & Richard F. Green.* 99, 1, 34-C1 (1995)

Emission-Line Imaging of 3CR Radio Galaxies. I. Imaging Data. *Patrick J. McCarthy, Hyron Spinrad, & Wil van Breugel.* 99, 27, 34-E4 (1995)

Interstellar Mg II Absorption Lines from Low-Redshift Galaxies. *David V. Bowen, J. Chris Blades, & Max Pettini.* 448, 634, 203-E5 (1995)

Quasar Lyman Edge Regions in Polarized Light. *A. Koratkar, R. R. J. Antonucci, R. W. Goodrich, H. Bushouse, & A. L. Kinney.* 450, 501, 237-F1 (1995)

Toward Understanding the Fanaroff-Riley Dichotomy in Radio Source Morphology and Power. *Stefi A. Baum, Esther L. Zirbel, & Christopher P. O'Dea.* 451, 88, 247-C13 (1995)

Are Galaxies Optically Thin to Their Own Lyman-Continuum Radiation? I. M33. *Kanan Patel & Christine D. Wilson.* 451, 607, 255-E11 (1995)

Testing Unified X-Ray/Ultraviolet Absorber Models with NGC 5548. *Smita Mathur, Martin Elvis, & Belinda Wilkes.* 452, 230, 265-C2 (1995)

The Nature of the Ultraviolet Continuum in Type 2 Seyfert Galaxies. *T. Heckman, J. Krolik, G. Meurer, D. Calzetti, A. Kinney, A. Koratkar, C. Leitherer, C. Robert, & A. Wilson.* 452, 549, 272-C3 (1995)

Observational Tests for Ultraviolet Sources in Elliptical Galaxies. *Sukyoung Yi, Ehsan Afshari, Pierre Demarque, & Augustus Oemler, Jr.* 453, L69, 298-C1 (1995)

The Far-Ultraviolet Spectrum of NGC 4151 as Observed with the Hopkins Ultraviolet Telescope on Astro-2. *Gerard A. Kriss, Arthur F. Davidsen, Wei Zheng, Jeffrey W. Kruk, & Brian R. Espey.* 454, L7, 307-C11 (1995)

Far-Ultraviolet Spectrum of Fairall 9 with the Hopkins Ultraviolet Telescope. *Wei Zheng, Gerard A. Kriss, Arthur F. Davidsen, & Jeffrey W. Kruk.* 454, L11, 307-D4 (1995)

Hopkins Ultraviolet Telescope Observations of Six Elliptical and S0 Galaxies. *Thomas H. Brown, Henry C. Ferguson, & Arthur F. Davidsen.* 454, L15, 307-D11 (1995)

The Lyman Continuum in Starburst Galaxies Observed with the Hopkins Ultraviolet Telescope. *Claus Leitherer, Henry C. Ferguson, Timothy M. Heckman, & James D. Lowenthal.* 454, L19, 307-E5 (1995)

A Search for Far-Ultraviolet Emission Lines from Diffuse Hot Gas in the Halo of NGC 4631. *Henry C. Ferguson, W. Van Dyke Dixon, Arthur F. Davidsen, & Ralf-Juergen Dettmar.* 454, L23, 307-E13 (1995)

Broad Ne VIII λ744 Emission from the Quasar PG 1148+549. *Fred Hamann, Joseph C. Shields, Gary J. Ferland, & Kirk T. Korista.* 454, 688, 311-B9 (1995)

ULTRAVIOLET: GENERAL

A Search for Circumstellar Dust around HR 10, a Proposed β Pictoris Star. *Kwang-Ping Cheng, C. A. Grady, & Frederick C. Bruhweiler.* 366, L87, 11-E7 (1991)

The Imaging Performance of the *Hubble Space Telescope*. *Christopher J. Burrows, Jon A. Holtzman, S. M. Faber, Pierre Y. Bely, Hashima Hasan, C. R. Lynds, & Daniel Schroeder.* 369, L21, 45-C1 (1991)

First Results from the Faint Object Camera: SN 1987A. *P. Jakobsen, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, W. B. Sparks, R. P. Kirshner, & N. Panagia.* 369, L63, 46-B1 (1991)

Evidence for a 250 Second Brightness Oscillation at 1600 Å in the Solar Temperature Minimum Region. *J. W. Cook & J. A. Ewing.* 371, 804, 71-E5 (1991)

Vacuum Ultraviolet Imagery of the Virgo Cluster Region. III. Diffuse Far-Ultraviolet Radiation at High Galactic Latitudes. *Takashi Onaka & Keiichi Kodaira.* 379, 532, 171-C5 (1991)

Spectroscopic Limits to an Extragalactic Far-Ultraviolet Background. *Christopher Martin, Mark Hurwitz, & Stuart Bowyer.* 379, 549, 171-D10 (1991)

Spatially Resolved Ultraviolet Spectroscopy of the Liner Galaxy NGC 3998. *G. A. Reichert, G. Branduardi-Raymont, A. V. Filippenko, K. O. Mason, E. M. Puchnarewicz, & C.-C. Wu.* 387, 536, 45-C11 (1992)

Partially Coherent Scattering in Stellar Chromospheres. III. A Second-Order Escape Probability Method. *K. G. Gayley.* 390, 583, 82-E5 (1992)

An Upper Limit on the Cosmic Ultraviolet Background. *Edward L. Wright.* 391, 34, 86-D11 (1992)

The Hopkins Ultraviolet Telescope: Performance and Calibration during the Astro-1 Mission. *Arthur F. Davidsen, Knox S. Long, Samuel T. Durrance, William P. Blair, Charles W. Bowers, Steven J. Conard, Paul D. Feldman, Henry C. Ferguson, Glen H. Fountain, Randy A. Kimble, Gerard A. Kriss, H. Warren Moos, & Kenneth A. Potocki.* 392, 264, 104-C1 (1992)

The Nature of the Recurrent Nova T Coronae Borealis: Ultraviolet Evidence for a White Dwarf Accretor. *Pier Luigi Selvelli, Angelo Cassatella, & Roberto Gilmozzi.* 393, 289, 117-F12 (1992)

A Multiwavelength Study of the Supernova Remnant N49 in the Large Magellanic Cloud. *Olaf Vancura, William P. Blair, Knox S. Long, & John C. Raymond.* 394, 158, 130-A1 (1992)

Evidence for Shock-heated Gas in the Hopkins Ultraviolet Telescope Spectrum of NGC 1068. *Gerard A. Kriss, Arthur F. Davidsen, William P. Blair, Henry C. Ferguson, & Knox S. Long.* 394, L37, 139-B7 (1992)

Ultraviolet Imaging Telescope Observations of the Cygnus Loop. *Robert H. Cornett, Edward B. Jenkins, Ralph C. Bohlin, Kwang-Ping Cheng, Theodore R. Gull, Robert W. O'Connell, Robert A. R. Parker, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L9, 144-D7 (1992)

Astro-1 Ultraviolet Imaging of the 30 Doradus and SN 1987A Fields with the Ultraviolet Imaging Telescope. *Kwang-Ping Cheng, Andrew G. Michalitsianos, Paul Hintzen, Ralph C. Bohlin, Robert W. O'Connell, Robert H. Cornett, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L29, 145-A1 (1992)

Ultraviolet Imaging Telescope Photometry of Massive Stars: The OB Association NGC 206 in M31. *Jesse K. Hill, Barbara B. Pfarr, Ralph C. Bohlin, Joan E. Isensee, Robert W. O'Connell, Susan G. Neff, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L33, 145-B1 (1992)

Ultraviolet Imaging of Old Populations in Nearby Galaxies. *Robert W. O'Connell, Ralph C. Bohlin, Nicholas R. Collins, Robert H. Cornett, Jesse K. Hill, Robert S. Hill, Wayne B. Landsman, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L45, 145-D1 (1992)

The Colorado *IUE* Active Galaxy Survey. I. Blazars. *Rick Edelson, Gregory F. Pike, Jon M. Saken, Anne Kinney, & J. Michael Shull.* 83, 1, 57-B1 (1992)

High-Resolution Absorption Cross Section Measurements of Carbon Monoxide at 20 K between 96.7 and 98.8 Nanometers. *G. Stark, K. Yoshino, P. L. Smith, J. R. Esmond, K. Ito, & M. H. Stevens.* 410, 837, 124-B8 (1993)

Constraints on Axions from the Extragalactic Background Light. *J. M. Overduin & P. S. Wesson.* 414, 449, 176-F10 (1993)

Excitation Rate Coefficients and Line Ratios for the Optical and Ultraviolet Transitions in S II. *Wei Cai & Anil K. Pradhan.* 88, 329, 44-C7 (1993)

In-Flight Performance and Preliminary Results from the Far Ultraviolet Space Telescope (Faust) Flown on ATLAS-1. *Stuart Bowyer, Timothy P. Sasseen, Michael Lampton, & Xiaoyi Wu.* 415, 875, 198-G12 (1993)

Ultraviolet Background Radiation. *Richard C. Henry & Jayant Murthy.* 418, L17, 238-C1 (1993)

A Search for Ultraviolet Circumstellar Gas Absorption Features in α Piscis Austrinus (Fomalhaut), A Possible β Pictoris–like System. *K.-P. Cheng, Fred C. Bruhweiler, & Yoji Kondo.* 425, L33, 85-E7 (1994)

Accurate Calculation of the Isotope Shift and Hyperfine Structure in the Boron (B II) Line at 1362 Å. *Per Jönsson, Sveneric G. Johansson, & Charlotte Froese Fischer.* 429, L45, 150-F7 (1994)

Ultraviolet Spectra of Quenched Carbonaceous Composite Derivatives: Comparison to the "217 Nanometer" Interstellar Absorption Feature. *Akira Sakata, Setsuko Wada, Alan T. Tokunaga, Takatoshi Narisawa, Hidehiro Nakagawa, & Hiroshi Ono.* 430, 311, 163-A7 (1994)

UIT: Ultraviolet Observations of the Small Magellanic Cloud. *Robert H. Cornett, J. K. Hill, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 430, L117, 174-G9 (1994)

In-Orbit Performance of the COSTAR-corrected Faint Object Camera. *R. I. Jedrzejewski, G. Hartig, P. Jakobsen, J. H. Crocker, & H. C. Ford.* 435, L7, 251-B12 (1994)

High-Resolution Absorption Cross Section Measurements of Supersonic Jet-cooled Carbon Monoxide between 92.5 and 97.4 Nanometers.

K. Yoshino, G. Stark, J. R. Esmond, P. L. Smith, K. Ito, & T. Matsui. 438, 1013, 18-A13 (1995)

Medium-Resolution Far-Ultraviolet Spectroscopy of PKS 2155−304. *I. Appenzeller, H. Mandel, J. Krautter, S. Bowyer, M. Hurwitz, M. Grewing, G. Krämer, & N. Kappelmann.* 439, L33, 40-B9 (1995)

The Circumstellar Nature of the Metallic Features in a Hot DA White Dwarf. *J. B. Holberg, F. C. Bruhweiler, & J. Andersen.* 443, 753, 108-C1 (1995)

The First Search for a Gamma-Ray Burst Quiescent Counterpart in the Extreme Ultraviolet with *EUVE*. *K. Hurley, P. Li, J. Laros, G. Fishman, C. Kouveliotou, & C. Meegan.* 445, 348, 137-C9 (1995)

Transition Probabilities for the UV0.01 Multiplet in N III. *Tomas Brage, Charlotte Froese Fischer, & Philip G. Judge.* 445, 457, 138-G7 (1995)

Observations of the Galactic and Extragalactic Background with the Far-Ultraviolet Space Telescope (FAUST). *T. P. Sasseen, M. Lampton, S. Bowyer, & X. Wu.* 447, 630, 184-G3 (1995)

A Model of the Diffuse Ultraviolet Radiation Field. *Jayant Murthy & R. C. Henry.* 448, 848, 206-E7 (1995)

Accurate Multiconfiguration Hartree-Fock Calculations of Oscillator Strengths in Light Atoms: The Boron (B II) Line at 1362 Å. *Michel Godefroid, Jeppe Olsen, Per Jönsson, & Charlotte Froese Fischer.* 450, 473, 234-E3 (1995)

Electron Excitation Function of the N_2 Second Positive System. *D. E. Shemansky, J. M. Ajello, & I. Kanik.* 452, 472, 268-F1 (1995)

Fine-Structure Branching in N_2 $c_4' \, {}^1\Sigma_u^+$ (0). *D. E. Shemansky, I. Kanik, & J. M. Ajello.* 452, 480, 268-F13 (1995)

Performance and Preliminary Calibration of the Hopkins Ultraviolet Telescope on the Astro-2 Mission. *Jeffrey W. Kruk, Samuel T. Durrance, Gerard A. Kriss, Arthur F. Davidsen, William P. Blair, Brian R. Espey, & David S. Finley.* 454, L1, 307-C1 (1995)

ULTRAVIOLET: INTERSTELLAR

The First Spectropolarimetric Study of the Wavelength Dependence of Interstellar Polarization in the Ultraviolet. *Geoffrey C. Clayton, Christopher M. Anderson, Antonio Mario Magalhães, Arthur D. Code, Kenneth H. Nordsieck, Marilyn R. Meade, Michael J. Wolff, Brian Babler, Karen S. Bjorkman, Regina E. Schulte-Ladbeck, MaryJane Taylor, & Barbara A. Whitney.* 385, L53, 23-D7 (1992)

On Graphite and the Variations in the Ultraviolet Extinction Curve. *Per A. Aannestad.* 386, 627, 33-B5 (1992)

Dense Clumps of Ionized Gas near π Scorpii, as Revealed by the Fine-Structure Excitation of N II. *Frank Bertoldi & Edward B. Jenkins.* 388, 495, 56-D9 (1992)

The Structure of the Inner Arcsecond of R Aquarii Observed with the *Hubble Space Telescope*. *Denis Burgarella & Francesco Paresce.* 389, L29, 66-D10 (1992)

The Interstellar Deuterium-to-Hydrogen Ratio: A Reevaluation of Lyman Absorption-Line Measurements. *Peter R. McCullough.* 390, 213, 76-E10 (1992)

Spectrophotometry of Bowen Resonance Fluorescence Lines in Three Planetary Nebulae. *C. R. O'Dell & Christopher O. Miller.* 390, 219, 76-F4 (1992)

Highly Ionized Atoms toward HD 93521. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 391, L41, 92-C11 (1992)

Vacuum Ultraviolet Extinction Measurements on Cosmic Dust Analog Carbon Grains. *L. Colangeli, A. Blanco, S. Fonti, & E. Bussoletti.* 392, 284, 104-E1 (1992)

Ultraviolet, Optical, and Infrared Observations of the High-Latitude Molecular Cloud toward HD 210121. *Daniel E. Welty & James R. Fowler.* 393, 193, 116-D13 (1992)

The Anomalous Extinction Curve in the Direction of ρ Ophiuchi from 950 to 1180 Å. *James C. Green, Theodore P. Snow, Timothy A. Cook, Webster C. Cash, & Orion Poplawski.* 395, 289, 143-E9 (1992)

Ultraviolet Imaging Telescope Images of the Reflection Nebula NGC 7023: Derivation of Ultraviolet Scattering Properties of Dust Grains. *Adolf N. Witt, Jens K. Petersohn, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L5, 144-D1 (1992)

Spatial Heterodyne Spectroscopy for the Exploration of Diffuse Interstellar Emission Lines at Far-Ultraviolet Wavelengths. *J. Harlander, R. J. Reynolds, & F. L. Roesler.* 396, 730, 166-D3 (1992)

Global O VI Line Emission from the Cygnus Loop Supernova Remnant and Direct Kinematic Measurement of the Associated Shock. *Andrew Rasmussen & Christopher Martin.* 396, L103, 167-E7 (1992)

CNO Abundances and Temperature Fluctuations in the Orion Nebula. *Donald K. Walter, Reginald J. Dufour, & J. Jeff Hester.* 397, 196, 170-D7 (1992)

Deviations of Interstellar Extinctions from the Mean R-dependent Extinction Law. *John S. Mathis & Jason A. Cardelli.* 398, 610, 191-F7 (1992)

Far-Ultraviolet Observations of the Crab Nebula Using the Hopkins Ultraviolet Telescope. *William P. Blair, Knox S. Long, Olaf Vancura, Charles W. Bowers, Sarah Conger, Arthur F. Davidsen, Gerard A. Kriss, & Richard B. C. Henry.* 399, 611, 205-E1 (1992)

Spectroscopy of a Balmer-dominated Filament in the Cygnus Loop with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Olaf Vancura, Charles W. Bowers, Arthur F. Davidsen, & John C. Raymond.* 400, 214, 211-E8 (1992)

Far-Ultraviolet Observations of the Supernova Remnant N49 Using the Hopkins Ultraviolet Telescope. *Olaf Vancura, William P. Blair, Knox S. Long, Arthur F. Davidsen, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Henry C. Ferguson, Richard C. Henry, Randy A. Kimble, Gerard A. Kriss, Jeffrey W. Kruk, & H. Warren Moos.* 401, 220, 223-G1 (1992)

Accurate Oscillator Strengths for Ultraviolet Lines of Ar I: Implications for Interstellar Material. *S. R. Federman, D. J. Beideck, R. M. Schectman, & D. G. York.* 401, 367, 225-E9 (1992)

Ultraviolet Observations of the Gas Phase Abundances in the Diffuse Clouds toward ζ Ophiuchi at 3.5 Kilometers per Second Resolution. *Blair D. Savage, Jason A. Cardelli, & Ulysses J. Sofia.* 401, 706, 231-C9 (1992)

Abundance of Interstellar Carbon toward ζ Ophiuchi. *Jason A. Cardelli, John S. Mathis, Dennis C. Ebbets, & Blair D. Savage.* 402, L17, 6-D1 (1993)

Goddard High-Resolution Spectrograph Observations of the Local Interstellar Medium and the Deuterium/Hydrogen Ratio along the Line of Sight toward Capella. *Jeffrey L. Linsky, Alexander Brown, Ken Gayley, Athanassios Diplas, Blair D. Savage, Thomas R. Ayres, Wayne Landsman, Steven N. Shore, & Sara R. Heap.* 402, 694, 11-C1 (1993)

Model Atmospheres: Tool for Identifying Interstellar Features. *P. C. Frisch, S. E. Slojkowski, T. Rodriguez-Bell, & D. York.* 84, 55, 1-G3 (1993)

Ultraviolet Interstellar Linear Polarization. I. Applicability of Current Dust Grain Models. *Michael J. Wolff, Geoffrey C. Clayton, & Marilyn R. Meade.* 403, 722, 24-F7 (1993)

Accurate Oscillator Strengths for Interstellar Ultraviolet Lines of Cl I. *R. M. Schectman, S. R. Federman, D. J. Beideck, & D. G. Ellis.* 406, 735, 67-B6 (1993)

The Ultraviolet Spectrum of Annealed Hydrogenated Amorphous Carbon Grains. *A. Blanco, E. Bussoletti, L. Colangeli, S. Fonti, V. Mennella, & J. R. Stephens.* 406, 739, 67-B12 (1993)

A Catalog of Stellar Lyman-Alpha Fluxes. *Wayne Landsman & Theodore Simon.* 408, 305, 87-A1 (1993)

Radiative Lifetimes, Branching Ratios, and Absolute Transition Probabilities in Cr II and Zn II. *S. D. Bergeson & J. E. Lawler.* 408, 382, 88-A3 (1993)

Extreme Ultraviolet Observations of HZ 43 and the Local H/He Ratio with the Hopkins Ultraviolet Telescope. *Randy A. Kimble, Arthur F. Davidsen, Knox S. Long, & Paul D. Feldman.* 408, L41, 89-C1 (1993)

Neutrino Decay and the Heat Budget of the Warm Interstellar Medium. *D. W. Sciama.* 409, L25, 104-D9 (1993)

Voyager 2 Observations of NGC 7023: Dust Scattering Shortward of 1600 Å. *A. N. Witt, J. K. Petersohn, J. B. Holberg, J. Murthy, A. Dring, & R. C. Henry.* 410, 714, 122-E13 (1993)

The *Hubble Space Telescope* Quasar Absorption Line Key Project. III. First Observational Results on Milky Way Gas. *Blair D. Savage, Limin Lu, John N. Bahcall, Jacqueline Bergeron, Alec Boksenberg, George F. Hartig, Buell T. Jannuzi, Sofia Kirhakos, Felix J. Lockman, W. L. W. Sargent, Donald P. Schneider, David Turnshek, Ray J. Weymann, & Arthur M. Wolfe.* 413, 116, 157-E6 (1993)

Silicon and Carbon Abundances in the Orion Nebula. *Robert H. Rubin, Reginald J. Dufour, & Donald K. Walter.* 413, 242, 159-C6 (1993)

High-Resolution Ultraviolet Observations of the Interstellar Diffuse Clouds toward μ Columbae. *Ulysses J. Sofia, Blair D. Savage, & Jason A. Cardelli.* 413, 251, 159-D3 (1993)

Detection of Boron, Cobalt, and Other Weak Interstellar Lines toward ζ Ophiuchi. *S. R. Federman, Y. Sheffer, D. L. Lambert, & R. L. Gilliland.* 413, L51, 162-G7 (1993)

On Graphite and the 2175 Å Extinction Profile. *B. T. Draine & Sangeeta Malhotra.* 414, 632, 179-B1 (1993)

Oscillator Strengths of the Si II 181 Nanometer Resonance Multiplet. *S. D. Bergeson & J. E. Lawler.* 414, L137, 186-D9 (1993)

Electron Density Diagnostics for Gaseous Nebulae Involving the O IV Intercombination Lines near 1400 Å. *F. P. Keenan, E. S. Conlon, D. A. Bowden, W. A. Feibelman, & A. K. Pradhan.* 88, 169, 42-E1 (1993)

Forbidden Velocity Gas Detected in Ultraviolet Interstellar Absorption toward Four Distant Inner Galaxy Stars. *Todd M. Tripp, Kenneth R. Sembach, & Blair D. Savage.* 415, 652, 196-A1 (1993)

A Determination of the Distance to the High-Velocity Cloud Complex M. *Laura Danly, C. E. Albert, & K. D. Kuntz.* 416, L29, 207-D13 (1993)

Ultraviolet Transitions of Low Condensation Temperature Heavy Elements and New Data for Interstellar Arsenic, Selenium, Tellurium, and Lead. *Jason A. Cardelli, S. R. Federman, David L. Lambert, & C. E. Theodosiou.* 416, L41, 207-F5 (1993)

EUVE First Light Observation of the Diffuse Sky Background. *Richard Lieu, Stuart Bowyer, Michael Lampton, Patrick Jelinsky, & Jerry Edelstein.* 417, L41, 223-C8 (1993)

A Far-Ultraviolet Study of the Cygnus Loop Using the *Voyager* Ultraviolet Spectrometers. *Olaf Vancura, William P. Blair, Knox S. Long, John C. Raymond, & J. B. Holberg.* 417, 663, 227-E11 (1993)

Extreme-Ultraviolet Extinction Measurements on Hydrogenated and Dehydrogenated Amorphous Carbon Grains. *L. Colangeli, V. Mennella, A. Blanco, S. Fonti, E. Bussoletti, H. E. Gumlich, H. C. Mertins, & Ch. Jung.* 418, 435, 236-D7 (1993)

Ultraviolet Background Radiation. *Richard C. Henry & Jayant Murthy.* 418, L17, 238-C1 (1993)

Chemical Composition of M8 Based on *IUE* and Visual Observations. *M. Peimbert, S. Torres-Peimbert, & R. J. Dufour.* 418, 760, 242-A8 (1993)

Voyager Observations of Diffuse Far-Ultraviolet Continuum and Line Emission in Eridanus. *Jayant Murthy, M. Im, R. C. Henry, & J. B. Holberg.* 419, 739, 256-G7 (1993)

ULTRAVIOLET: ISM

Highly Ionized Gas Absorption in the Disk and Halo toward HD 167756 at 3.5 Kilometers per Second Resolution. *Blair D. Savage, Kenneth R. Sembach, & Jason A. Cardelli.* 420, 183, 3-C1 (1994)

Size Effects on Dissociation Rates of Polycyclic Aromatic Hydrocarbon Cations: Laboratory Studies and Astrophysical Implications. *H. W. Jochims, E. Rühl, H. Baumgärtel, S. Tobita, & S. Leach.* 420, 307, 4-F6 (1994)

Interstellar Detection of the Intersystem Line Si II] λ2335 toward ζ Ophiuchi. *Jason A. Cardelli, Ulysses J. Sofia, Blair D. Savage, Francis P. Keenan, & Philip L. Dufton.* 420, L29, 7-D13 (1994)

The Origin of Variations in the 2175 Å Extinction Bump. *John S. Mathis.* 422, 176, 32-C8 (1994)

IUE Spectra and Optical Imaging of the Oxygen-rich Supernova Remnant N132D. *William P. Blair, John C. Raymond, & Knox S. Long.* 423, 334, 50-C7 (1994)

N III Intercombination Lines in the *IUE* Spectra of Gaseous Nebulae. *F. P. Keenan, P. L. Dufton, W. A. Feibelman, K. L. Bell, A. Hibbert, & R. P. Stafford.* 423, 882, 59-G3 (1994)

Spectrum of IC 2149 and Its Central Star. *Walter A. Feibelman, Siek Hyung, & Lawrence H. Aller.* 426, 653, 106-E6 (1994)

Composition of Interstellar Clouds in the Disk and Halo. II. γ^2 Velorum. *Edward L. Fitzpatrick & Lyman Spitzer, Jr.* 427, 232, 112-G8 (1994)

An *IUE* Survey of Interstellar H I Lyman-Alpha Absorption. II. Interpretations. *Athanassios Diplas & Blair D. Savage.* 427, 274, 113-D1 (1994)

Ultraviolet Interstellar Polarization Observed with the *Hubble Space Telescope*. *W. B. Somerville, R. G. Allen, D. J. Carnochan, Lida He, D. McNally, P. G. Martin, D. H. Morgan, K. Nandy, J. R. Walsh, D. C. B. Whittet, R. Wilson, & M. J. Wolff.* 427, L47, 117-F13 (1994)

The Galactic Far-Ultraviolet Sky as Seen by FAUST: Modeling and Observations. *Martin Cohen, Timothy P. Sasseen, & Stuart Bowyer.* 427, 848, 123-B9 (1994)

Voyager Observations of Dust Scattering near the Coalsack Nebula. *Jayant Murthy, R. C. Henry, & J. B. Holberg.* 428, 233, 131-A13 (1994)

An *IUE* Survey of Interstellar H I Lyα Absorption. I. Column Densities. *Athanassios Diplas & Blair D. Savage.* 93, 211, 44-F1 (1994)

The Abundant Elements in Interstellar Dust. *Ulysses J. Sofia, Jason A. Cardelli, & Blair D. Savage.* 430, 650, 170-A2 (1994)

High-Resolution Oscillator Strength Measurements for the $A(v')$–$X(0)$ Bands of Carbon Monoxide with $11 \leq v' \leq 14$. *Peter L. Smith, G. Stark, K. Yoshino, & K. Ito.* 431, L143, 192-D11 (1994)

The C_4H Radical and the Diffuse Interstellar Bands: An Ab Initio Study. *M. Kolbuszewski.* 432, L63, 200-A13 (1994)

The Far-Ultraviolet Dust Albedo in the Upper Scorpius Subgroup of the Scorpius OB2 Association. *Karl D. Gordon, Adolf N. Witt, George R. Carruthers, Susan A. Christensen, & Brian C. Dohne.* 432, 641, 204-A3 (1994)

Intersystem Transitions of Interstellar Carbon Monoxide toward ζ Ophiuchi. *S. R. Federman, Jason A. Cardelli, Yaron Sheffer, David L. Lambert, & D. C. Morton.* 432, L139, 207-D5 (1994)

Far-Ultraviolet Emission from the Taurus Molecular Cloud. *M. Hurwitz.* 433, 149, 210-B4 (1994)

Properties of the Highly Ionized Disk and Halo Gas toward Two Distant High-Latitude Stars. *Blair D. Savage & Kenneth R. Sembach.* 434, 145, 227-B6 (1994)

Highly Ionized Gas in the Galactic Disk: The $l = 295°$, $b = 0°$ Interarm Direction. *Kenneth R. Sembach.* 434, 244, 228-G3 (1994)

Hot Gas in the Interstellar Medium: A Reanalysis of O VI Absorption Data. *R. L. Shelton & D. P. Cox.* 434, 599, 236-B2 (1994)

Oscillator Strengths for Fe II Transitions at 224.918 and 226.008 Nanometers. *S. D. Bergeson, K. L. Mullman, & J. E. Lawler.* 435, L157, 260-E11 (1994)

A Compilation of Electronic Transitions in the CO Molecule and the Interpretation of Some Puzzling Interstellar Absorption Features. *Donald C. Morton & Louis Noreau.* 95, 301, 67-F11 (1994)

The Abundance of Interstellar Oxygen toward Orion: Evidence for Recent Infall? *David M. Meyer, M. Jura, Isabel Hawkins, & Jason A. Cardelli.* 437, L59, 292-C1 (1994)

A Study of the Ultraviolet Absorption Lines through the Complete Galactic Halo by the Analysis of *HST* Faint Object Spectrograph Spectra of Active Galactic Nuclei. I. *Geoffrey S. Burks, Frank Bartko, J. Michael Shull, John T. Stocke, Elise R. Sachs, E. Margaret Burbidge, Ross D. Cohen, Vesa T. Junkkarinen, Richard J. Harms, & Derck Massa.* 437, 630, 294-D7 (1994)

N IV Emission Lines in the Ultraviolet Spectra of Gaseous Nebulae. *F. P. Keenan, C. A. Ramsbottom, K. L. Bell, K. A. Berrington, A. Hibbert, W. A. Feibelman, & W. P. Blair.* 438, 500, 8-E3 (1995)

GHRS Observations of Mass-loaded Flows in Abell 78. *J. Patrick Harrington, Kazimierz J. Borkowski, & Zlatan Tsvetanov.* 439, 264, 24-G1 (1995)

Gas Phase Abundances and Conditions along the Sight Line to the Low-Halo, Inner Galaxy Star HD 167756. *Jason A. Cardelli, Kenneth R. Sembach, & Blair D. Savage.* 440, 241, 44-E2 (1995)

First Spectral Observations of the Diffuse Background with the *Extreme Ultraviolet Explorer*. *P. Jelinsky, J. V. Vallerga, & J. Edelstein.* 442, 653, 89-A8 (1995)

Discovery and Imaging of a Galactic Cirrus Cloud with the Far Ultraviolet Space Telescope. *Lauri K. Haikala, Kalevi Mattila, Stuart Bowyer, Timothy P. Sasseen, Michael Lampton, & Jens Knude.* 443, L33, 102-F8 (1995)

Ultraviolet Extinction to 10.8 Inverse Microns. *Per A. Aannestad.* 443, 653, 106-G11 (1995)

Interstellar Graphitic Particles Generated by Annealing of Nanodiamonds and Their Relation to the 2175 Å Peak Carrier. *Daniel Ugarte.* 443, L85, 112-B4 (1995)

A Dehydrogenation Study of Cosmic Carbon Analogue Grains. *V. Mennella, L. Colangeli, A. Blanco, E. Bussoletti, S. Fonti, P. Palumbo, & H. C. Mertins.* 444, 288, 117-D4 (1995)

Hopkins Ultraviolet Telescope Observations of H_2 toward the Planetary Nebula NGC 1535. *Charles W. Bowers, William P. Blair, Knox S. Long, & Arthur F. Davidsen.* 444, 748, 126-E11 (1995)

Properties of the +70 Kilometers per Second Cloud toward HD 203664. *Kenneth R. Sembach.* 445, 314, 136-G3 (1995)

Vibrationally Excited H_2, HCl, and NO^+ in the Diffuse Clouds toward ζ Ophiuchi. *S. R. Federman, Jason A. Cardelli, Ewine F. van Dishoeck, David L. Lambert, & J. H. Black.* 445, 325, 137-A4 (1995)

Ultraviolet Interstellar Linear Polarization. II. The Wavelength Dependence. *Geoffrey C. Clayton, Michael J. Wolff, R. G. Allen, & O. L. Lupie.* 445, 947, 148-C11 (1995)

Scattering Properties of the Dust in the Reflection Nebula IC 435. *Daniela Calzetti, Ralph C. Bohlin, Karl D. Gordon, Adolf N. Witt, & Luciana Bianchi.* 446, L97, 171-C7 (1995)

The Distribution of Metal-absorbing High-Velocity Clouds in the Galaxy. *David V. Bowen, J. Chris Blades, & Max Pettini.* 448, 662, 203-G10 (1995)

Decaying Neutrinos, the Metagalactic Radiation Field, and the Ionization of Nitrogen in the Interstellar Medium. *D. W. Sciama.* 448, 667, 204-A4 (1995)

The *IUE* Spectrum of the Planetary Nebula NGC 6751. *Walter A. Feibelman.* 448, 766, 205-C11 (1995)

Probing the Galactic Disk and Halo. III. The Galactic and Intergalactic Sight Line to H1821+643. *Blair D. Savage, Kenneth R. Sembach, & Limin Lu.* 449, 145, 212-B11 (1995)

Coronal Gas in the Galactic Halo: ORFEUS Observations of NGC 346 No. 1 and PKS 2155−304. *M. Hurwitz, S. Bowyer, R.-P. Kudritzki, & D. J. Lennon.* 450, 149, 230-B2 (1995)

Detection of Hot Gas in the Interstellar Medium. *Jia-Sheng Huang, Antoinette Songaila, Lennox L. Cowie, & Edward B. Jenkins.* 450, 163, 230-C8 (1995)

On the Electronic Structure of Small Carbon Grains of Astrophysical Interest. *V. Mennella, L. Colangeli, E. Bussoletti, G. Monaco, P. Palumbo, & A. Rotundi.* 100, 149, 47-G9 (1995)

R_V-dependent Interstellar Photodestruction Rates. *Cesare Cecchi-Pestellini, Santi Aiello, & Bruno Barsella.* 100, 187, 48-E2 (1995)

Discovery of Highly Ionized High-Velocity Clouds toward Markarian 509. *Kenneth R. Sembach, Blair D. Savage, Limin Lu, & Edward M. Murphy.* 451, 616, 255-F12 (1995)

Atomic Physics with the Goddard High-Resolution Spectrograph on the *Hubble Space Telescope*. II. Oscillator Strengths for Singly Ionized Iron. *Jason A. Cardelli & Blair D. Savage.* 452, 275, 266-A1 (1995)

Detection of Ultraviolet Emission Lines in SN 1006 with the Hopkins Ultraviolet Telescope. *John C. Raymond, William P. Blair, & Knox S. Long.* 454, L31, 307-G2 (1995)

A Far-Ultraviolet Spectrum of the Puppis A Supernova Remnant Using the Hopkins Ultraviolet Telescope. *William P. Blair, John C. Raymond, Knox S. Long, & Gerard A. Kriss.* 454, L35, 307-G12 (1995)

Time-dependent Photodissociation Regions. *David Hollenbach & Antonella Natta.* 455, 133, 320-A12 (1995)

Hydrogen Molecules in SN 1987A. *Michael Culhane & Richard McCray.* 455, 335, 322-F7 (1995)

High-Resolution Electron-Impact Study of the Far-Ultraviolet Emission Spectrum of Molecular Hydrogen. *Xianming Liu, Syed M. Ahmed, Rosalie A. Multari, Geoffrey K. James, & Joseph M. Ajello.* 101, 375, 59-A3 (1995)

ULTRAVIOLET: SOLAR SYSTEM

A Burst Model for Line Emission in the Solar Atmosphere. I. XUV Lines of He I and He II in Impulsive Flares. *J. M. Laming & U. Feldman.* 386, 364, 28-F8 (1992)

Mg IX Line Ratios in the Sun. *F. P. Keenan, E. S. Conlon, L. K. Harra, & K. G. Widing.* 386, 371, 28-G1 (1992)

Steady Siphon Flows in Closed Coronal Structures: Comparison with Extreme-Ultraviolet Observations. *G. Peres, D. Spadaro, & G. Noci.* 389, 777, 71-A8 (1992)

Element Abundances and Plasma Properties in a Coronal Polar Plume. *K. G. Widing & U. Feldman.* 392, 715, 111-B5 (1992)

The Potential for Plasma Diagnostics from Stellar Extreme-Ultraviolet Observations. *U. Feldman, P. Mandelbaum, J. F. Seely, G. A. Doschek, & H. Gursky.* 81, 387, 40-D3 (1992)

Interplanetary Lyman-α Spectra as a Diagnostic of the Local Interstellar Plasma Density: The Baranov Two-Shocks Heliosphere Case. *R. Lallement, Y. G. Malama, E. Quemerais, J. L. Bertaux, & N. A. Zaitzev.* 396, 696, 166-A7 (1992)

Pervasive Variability in the Quiet Solar Transition Region. *Douglas Rabin & James F. Dowdy, Jr.* 398, 665, 192-D1 (1992)

The Abundance of Ammonia in Comet P/Halley Derived from Ultraviolet Spectrophotometry of NH by *ASTRON* and *IUE*. *P. D. Feldman, K. B. Fournier, V. P. Grinin, & A. M. Zvereva.* 404, 348, 32-B11 (1993)

The Spectrum of the Jovian Dayglow Observed at 3 Å Resolution with the Hopkins Ultraviolet Telescope. *P. D. Feldman, M. A. McGrath, H. W. Moos, S. T. Durrance, D. F. Strobel, & A. F. Davidsen.* 406, 279, 58-E1 (1993)

The OH Distribution in Cometary Atmospheres: A Collisional Monte Carlo Model for Heavy Species. *Michael R. Combi, Brent J. Bos, & William H. Smyth.* 408, 668, 93-E1 (1993)

Atomic Transition Probabilities of Fe II Lines Determined from Solar Emission Spectra. I. The 2000–2800 Å Wavelength Range. *J. O. Ekberg & U. Feldman.* 86, 611, 22-D7 (1993)

Detection of [O II] λ2471 from the Io Plasma Torus. *M. A. McGrath, P. D. Feldman, D. F. Strobel, H. W. Moos, & G. E. Ballester.* 415, L55, 192-D7 (1993)

Hopkins Ultraviolet Telescope Determination of the Io Torus Electron Temperature. *D. T. Hall, C. J. Bednar, S. T. Durrance, P. D. Feldman, M. A. McGrath, H. W. Moos, & D. F. Strobel.* 420, L45, 7-F7 (1994)

Detection of CO Cameron Band Emission in Comet P/Hartley 2 (1991 XV) with the *Hubble Space Telescope*. *H. A. Weaver, P. D. Feldman, J. B. McPhate, M. F. A'Hearn, C. Arpigny, & T. E. Smith.* 422, 374, 34-F7 (1994)

Extreme Ultraviolet Explorer Satellite Observation of Jupiter's Io Plasma Torus. *D. T. Hall, G. R. Gladstone, H. W. Moos, F. Bagenal, J. T. Clarke, P. D. Feldman, M. A. McGrath, N. M. Schneider, D. E. Shemansky, D. F. Strobel, & J. H. Waite.* 426, L51, 103-G1 (1994)

Coronal Electron Density Diagnostic from Fe XII. *J. W. Cook, F. P. Keenan, L. K. Harra, & S. S. Tayal.* 429, 924, 157-B9 (1994)

Neutral Sulfur Emission from the Io Torus Measured with the Hopkins Ultraviolet Telescope. *Samuel T. Durrance, Paul D. Feldman, William P. Blair, Arthur F. Davidsen, Gerard A. Kriss, Jeffrey W. Kruk, Knox S. Long, & H. Warren Moos.* 447, 408, 178-A10 (1995)

High-Resolution Ultraviolet Spectroscopy of Jupiter's Aurora with the *Hubble Space Telescope*. *Y. H. Kim, J. J. Caldwell, & J. L. Fox.* 447, 906, 188-D3 (1995)

HST/GHRS Observations of the Interplanetary Medium Downwind and in the Inner Solar System. *John T. Clarke, Rosine Lallement, Jean-Loup Bertaux, & Eric Quemerais.* 448, 893, 207-C5 (1995)

The Ultraviolet Reflectivity of Jupiter at 3.5 Å Resolution from Astro-1 and Astro-2. *Patrick F. Morrissey, Paul D. Feldman, Melissa A. McGrath, Brian C. Wolven, & H. Warren Moos.* 454, L65, 308-E2 (1995)

Ultraviolet Albedo of the Moon with the Hopkins Ultraviolet Telescope. *Richard C. Henry, Paul D. Feldman, Jeffrey W. Kruk, Arthur F. Davidsen, & Samuel T. Durrance.* 454, L69, 308-E11 (1995)

ULTRAVIOLET: SPECTRA

Steps toward Determination of the Size and Structure of the Broad-Line Region in Active Galactic Nuclei. I. An 8 Month Campaign of Monitoring NGC 5548 with *IUE*. *J. Clavel, G. A. Reichert, D. Alloin, D. M. Crenshaw, G. Kriss, J. H. Krolik, M. A. Malkan, H. Netzer, B. M. Peterson, W. Wamsteker, A. Altamore, T. Baribaud, P. Barr, S. Beck, L. Binette, G. E. Bromage, N. Brosch, A. I. Diaz, A. V. Filippenko, K. Fricke, C. M. Gaskell, P. Giommi, I. S. Glass, P. Gondhalekar, R. L. Hackney, J. P. Halpern, D. J. Hutter, S. Jörsäter, A. L. Kinney, W. Kollatschny, A. Koratkar, K. T. Korista, A. Laor, J.-P. Lasota, E. Leibowitz, D. Maoz, P. G. Martin, T. Mazeh, E. J. A. Meurs, A. D. Nair, P. O'Brien, D. Pelat, E. Perez, G. C. Perola, R. L. Ptak, P. Rodríguez-Pascual, E. I. Rosenblatt, A. C. Sadun, M. Santos-Lleo, R. A. Shaw, P. S. Smith, G. M. Stirpe, R. Stoner, W. H. Sun, M.-H. Ulrich, E. van Groningen, & W. Zheng.* 366, 64, 1-G7 (1991)

Circumstellar Material around the Massive Close Binary DH Cephei. *M. F. Corcoran.* 366, 308, 4-G8 (1991)

A Study of the Ultraviolet Evolution of U Geminorum between Outbursts. *Alan L. Kiplinger, Edward M. Sion, & Paula Szkody.* 366, 569, 10-B1 (1991)

Stellar Lyman-Alpha Emission and the Local Interstellar Medium. *Wayne Landsman & Theodore Simon.* 366, L79, 11-D9 (1991)

The Circumstellar Disks of β Pictoris Analogs. *C. A. Grady, Frederick C. Bruhweiler, K. P. Cheng, W. A. Chiu, & Y. Kondo.* 367, 296, 15-F9 (1991)

Circumstellar Material around λ Eridani (B2e). I. Geometry and Kinematics during 1987–1988. *Myron A. Smith, Geraldine J. Peters, & C. A. Grady.* 367, 302, 15-G1 (1991)

PW Vulpeculae: A Nova with Nearly Solar Abundances. *Pedro Saizar, Sumner Starrfield, Gary J. Ferland, R. Mark Wagner, James W. Truran, Scott J. Kenyon, Warren M. Sparks, Robert E. Williams, & L. L. Stryker.* 367, 310, 15-G11 (1991)

Dark Matter Decay and the Temperature of Lyman-Alpha Clouds. *D. W. Sciama.* 367, L39, 22-A11 (1991)

Simulated Optical Images of Galaxies at $z \sim 1$ Using Ultraviolet Images of Nearby Galaxies. *Ralph C. Bohlin, Robert H. Cornett, Jesse K. Hill, Robert S. Hill, Wayne B. Landsman, Robert W. O'Connell, Susan G. Neff, Andrew M. Smith, & Theodore P. Stecher.* 368, 12, 23-C1 (1991)

Coordinated X-Ray, Ultraviolet, and Optical Observations of 3C 120. *L. Maraschi, L. Chiappetti, R. Falomo, B. Garilli, M. Malkan, G. Tagliaferri, E. G. Tanzi, & A. Treves.* 368, 138, 24-F9 (1991)

Ultraviolet Interstellar Lines in the Spectrum of π Scorpii Recorded at 2 Kilometers per Second Resolution. *Charles L. Joseph & Edward B. Jenkins.* 368, 201, 25-E9 (1991)

On Winds and X-Rays of O-Type Stars. *Tomasz Chlebowski & Catharine D. Garmany.* 368, 241, 26-B1 (1991)

Energy Distributions of Symbiotic Novae. *Greg L. Bryan & Sun Kwok.* 368, 252, 26-C1 (1991)

New Ultraviolet Spectroscopic Features Found in Comet Brorsen-Metcalf (1989o). *C. R. O'Dell, Christopher O. Miller, Anita L. Cochran, William D. Cochran, Chet B. Opal, & Edwin S. Barker.* 368, 616, 32-G1 (1991)

Collisional Excitation and Radiative Properties of N II: The Strong Intercombination (^1D–$^3P^o$) Transition at 748 Å. *T. M. Tripp, D. E. Shemansky, G. K. James, & J. M. Ajello.* 368, 641, 33-B6 (1991)

Predicted Profiles of Ultraviolet Interstellar Absorption Lines. *D. E. Welty, L. M. Hobbs, & D. G. York.* 75, 425, 6-E5 (1991)

A Spectrophotometric Atlas of White Dwarfs Compiled from the *IUE* Archives. *Gary Wegner & Steven R. Swanson.* 75, 507, 7-E13 (1991)

Criteria for the Spectral Classification of B Stars in the Ultraviolet. *Janet Rountree & George Sonneborn.* 369, 515, 44-B5 (1991)

High-Resolution Absorption Cross Sections of Carbon Monoxide Bands at 295 K between 91.7 and 100.4 Nanometers. *G. Stark, K. Yoshino, Peter L. Smith, K. Ito, & W. H. Parkinson.* 369, 574, 44-G13 (1991)

Multiwavelength Observations of Nova LMC 1990 Number 2: The First Extragalactic Recurrent Nova. *Steven N. Shore, George Sonneborn, Sumner G. Starrfield, M. Hamuy, R. E. Williams, A. Cassatella, & H. Drechsel.* 370, 193, 49-E8 (1991)

A Critical Analysis of the Ultraviolet Temperature Scale of the Helium-dominated DB and DBV White Dwarfs. *Peter Thejll, Stéphane Vennes, & Harry L. Shipman.* 370, 355, 51-F5 (1991)

An Ultraviolet Atlas of Quasar and Blazar Spectra. *A. L. Kinney, R. C. Bohlin, J. C. Blades, & D. G. York.* 75, 645, 10-C7 (1991)

Structure and Kinematics of the Broad-Line Regions in Active Galaxies from *IUE* Variability Data. *Anuradha P. Koratkar & C. Martin Gaskell.* 75, 719, 11-B5 (1991)

The Solar Spectrum between 914 and 1177 Å. *U. Feldman & G. A. Doschek.* 75, 925, 14-B13 (1991)

The Shape of the Ultraviolet Continuum of Quasars and Intergalactic Dust. *F. H. Cheng, C. Martin Gaskell, & Anuradha P. Koratkar.* 370, 487, 54-D9 (1991)

The Ultraviolet Spectrum of Scorpius X-1 as Observed by *IUE*: 1978–1988. *T. R. Kallman, J. C. Raymond, & S. D. Vrtilek.* 370, 717, 57-C11 (1991)

C IV Line Profile Correlations in NGC 4151. *R. P. Fahey, A. G. Michalitsianos, & D. Kazanas.* 371, 136, 61-F9 (1991)

The Ionization Structure of Planetary Nebulae. X. NGC 2392. *Timothy Barker.* 371, 217, 62-G5 (1991)

The Ultraviolet Continuum and the Fluorescent H_2 Lines in Low-Excitation Herbig-Haro Objects. *K.-H. Böhm, D. M. Scott, & J. Solf.* 371, 248, 63-C1 (1991)

High-Resolution Studies of the Structure of the Solar Atmosphere Using a New Imaging Algorithm. *Margarita Karovska & Shadia Rifai Habbal.* 371, 402, 65-B1 (1991)

Premaximum Observations of the Type Ia SN 1990N. *Bruno Leibundgut, Robert P. Kirshner, Alexei V. Filippenko, Joseph C. Shields, Craig B. Foltz, Mark M. Phillips, & George Sonneborn.* 371, L23, 66-D1 (1991)

Mass Outflow in the Nearby Proto–Planetary System β Pictoris. *Frederick C. Bruhweiler, Yoji Kondo, & C. A. Grady.* 371, L27, 66-D7 (1991)

Ultraviolet Variability of NGC 5548: Dynamics of the Continuum Production Region and Geometry of the Broad-Line Region. *J. H. Krolik, Keith Horne, T. R. Kallman, M. A. Malkan, R. A. Edelson, & G. A. Kriss.* 371, 541, 68-C6 (1991)

Observations of the Peculiar Object MWC 560 in Outburst. *A. G. Michalitsianos, S. P. Maran, R. J. Oliversen, B. Bopp, E. Kontizas, A. Dapergolas, & M. Kontizas.* 371, 761, 71-A7 (1991)

Spectral Observations of the Extreme Ultraviolet Background. *Simon E. Labov & Stuart Bowyer.* 371, 810, 71-F1 (1991)

An Ultraviolet Spectral Atlas of a Sunspot and an Active Region 1190–1730 Å. *P. Brekke, O. Kjeldseth-Moe, J.-D. F. Bartoe, & G. E. Brueckner.* 75, 1337, 23-C1 (1991)

Ultraviolet Interstellar Absorption toward HD 156359, a Halo Star at 11 Kiloparsecs in the Direction $l = 329°$ and $b = -15°$. *Kenneth R. Sembach, Blair D. Savage, & Derck Massa.* 372, 81, 75-A11 (1991)

The Albedo and Scattering Phase Function of Interstellar Dust and the Diffuse Background at Far-Ultraviolet Wavelengths. *Mark Hurwitz, Stuart Bowyer, & Christopher Martin.* 372, 167, 76-A12 (1991)

The Isolated Massive DA White Dwarf GD 50. *P. Bergeron, K. M. Kidder, J. B. Holberg, James Liebert, F. Wesemael, & Rex A. Saffer.* 372, 267, 77-C5 (1991)

Rapid Ultraviolet Variability in the BL Lacertae Object PKS 2155−304. *R. A. Edelson, J. Saken, G. Pike, C. M. Urry, I. M. George, R. S. Warwick, H. R. Miller, M. T. Carini, & J. R. Webb.* 372, L9, 79-B5 (1991)

The Binary Feige 24: The Mass, Radius, and Gravitational Redshift of the DA White Dwarf. *Stéphane Vennes, John R. Thorstensen, Peter Thejll, & Harry L. Shipman.* 372, L37, 79-E5 (1991)

The Local Interstellar Medium toward the Center of Loop I. *Miriam Centurion & Giovanni Vladilo.* 372, 494, 82-A1 (1991)

Classical Cepheid Luminosities from Binary Companions. *Nancy Remage Evans.* 372, 597, 83-B1 (1991)

Rotational Modulation in *IUE* Spectra of Cool Dwarf Chromospheres. I. Data Analysis and Period Search Techniques. *K. L. Hallam, B. Altner, & A. S. Endal.* 372, 610, 83-C1 (1991)

Systematic Radial Flows in the Chromosphere, Transition Region, and Corona of the Quiet Sun. *Donald M. Hassler, Gary J. Rottman, & Frank Q. Orrall.* 372, 710, 84-E1 (1991)

The Ultraviolet Spectrum and Continuum Energy Distribution of the Bright Quasar H1821+643. *Michiel Kolman, Jules P. Halpern, Chris R. Shrader, & Alexei V. Filippenko.* 373, 57, 86-F8 (1991)

Si IV and C IV Resonance Lines as Indicators of Massive Stars in Starburst Galaxies. *Claus Leitherer & Henny J. G. L. M. Lamers.* 373, 89, 87-B6 (1991)

The Interoutburst Behavior of Cataclysmic Variables. *Paula Szkody, Janet A. Mattei, Elizabeth O. Waagen, & Clay Stablein.* 76, 359, 29-E1 (1991)

High-Resolution *IUE* Spectra of the Nova-like Variable IX Velorum. *Christopher W. Mauche.* 373, 624, 95-F7 (1991)

Bowen Fluorescence in AM Herculis Stars. *Jonathan Schachter, Alexei V. Filippenko, Steven M. Kahn, & Frits B. S. Paerels.* 373, 633, 95-G4 (1991)

Ultraviolet High-Excitation Fe II Fluorescence Lines Excited by O VI, C IV, and H I Resonance Emission As Seen in *IUE* Spectra. *Walter A. Feibelman, Frederick C. Bruhweiler, & Sveneric Johansson.* 373, 649, 96-A8 (1991)

Fe XIV Line Ratios in the Sun. *F. P. Keenan, P. L. Dufton, M. B. Boylan, A. E. Kingston, & K. G. Widing.* 373, 695, 96-E13 (1991)

New Observations of the Gas Cloud Associated with the Quasar-Galaxy Pair 3C 232/NGC 3067. *John T. Stocke, James Case, Megan Donahue, J. Michael Shull, & Theodore P. Snow.* 374, 72, 98-G7 (1991)

Far-Ultraviolet Mapping of the Cygnus Loop with the *Voyager 2* Ultraviolet Spectrometer. *William P. Blair, Knox S. Long, Olaf Vancura, & J. B. Holberg.* 374, 202, 100-E5 (1991)

Inefficient Accretion by the DA2 White Dwarf in V471 Tauri. *D. J. Mullan, H. L. Shipman, E. M. Sion, & J. MacDonald.* 374, 707, 107-G8 (1991)

X-Ray to Infrared Observations of the AM Herculis System E1405−451 (V834 Centauri). *R. M. Sambruna, L. Chiappetti, A. Treves, J. M. Bonnet-Bidaud, P. Bouchet, L. Maraschi, C. Motch, & M. Mouchet.* 374, 744, 108-C10 (1991)

IUE Observations of NGC 5548, 1978–1988: The Sizes and Kinematics of the Broad-Line Region. *Anuradha P. Koratkar & C. Martin Gaskell.* 375, 85, 112-A13 (1991)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. I. AO Cassiopeiae. *Douglas R. Gies & Michael S. Wiggs.* 375, 321, 114-G10 (1991)

The Ultraviolet Spectrum of KX Trianguli Australis. *Walter A. Feibelman.* 375, 335, 115-A12 (1991)

IUE Observations of Early-Type Stars at High Galactic Latitudes. *D. A. Quin, P. J. F. Brown, E. S. Conlon, P. L. Dufton, & F. P. Keenan.* 375, 342, 115-B7 (1991)

The Many Faces of F Stars: A Rotational Modulation Study of Capella, Procyon, and Caph with the *International Ultraviolet Explorer*. *Thomas R. Ayres.* 375, 704, 121-D11 (1991)

Absolute Far-Ultraviolet Spectrophotometry of Hot Subluminous Stars from *Voyager*. *J. B. Holberg, B. Ali, T. E. Carone, & R. S. Polidan.* 375, 716, 121-E11 (1991)

The Chromospheric Emission–Age Relation for Stars of the Lower Main Sequence and Its Implications for the Star Formation Rate. *David R. Soderblom, Douglas K. Duncan, & Dean R. H. Johnson.* 375, 722, 121-F5 (1991)

Tomographic Separation of Composite Spectra: The Components of the O-Star Spectroscopic Binary AO Cassiopeiae. *William G. Bagnuolo, Jr., & Douglas R. Gies.* 376, 266, 128-C1 (1991)

Ultraviolet Variability of the Massive W-R Binary System HDE 311884 = WR 47. *Gloria Koenigsberger, Anthony F. J. Moffat, & Lawrence H. Auer.* 376, 272, 128-C9 (1991)

Observations of Scorpius X-1 with *IUE*: Ultraviolet Results from a Multiwavelength Campaign. *S. D. Vrtilek, W. Penninx, J. C. Raymond, F. Verbunt, P. Hertz, K. Wood, W. H. G. Lewin, & K. Mitsuda.* 376, 278, 128-D1 (1991)

The Featureless Continua and Hydrogen Lines of Seyfert 2 Galaxies. *A. L. Kinney, R. R. J. Antonucci, M. J. Ward, A. S. Wilson, & M. Whittle.* 377, 100, 139-C5 (1991)

Ultraviolet and Optical Spectroscopy of the R Aquarii Symmetrical Jet. *J. M. Hollis, R. J. Oliversen, M. Kafatos, A. G. Michalitsianos, & R. M. Wagner.* 377, 227, 140-F11 (1991)

Ultraviolet Fe VII Absorption and Fe II Emission Lines of Central Stars of Planetary Nebulae. *Kwang-Ping Cheng, Walter A. Feibelman, & Frederick C. Bruhweiler.* 377, 235, 140-G7 (1991)

Far-Ultraviolet Spectroscopy of the Quasar UM 675 with the Faint Object Spectrograph on the *Hubble Space Telescope*. *E. A. Beaver, E. M. Burbidge, Ross D. Cohen, Vesa T. Junkkarinen, Ronald W. Lyons, E. I. Rosenblatt, George F. Hartig, Bruce Margon, & A. F. Davidsen.* 377, L1, 143-B1 (1991)

Faint Object Spectrograph Spectroscopy of Resolved Structure in the Nucleus of NGC 1068. *S. Caganoff, R. R. J. Antonucci, H. C. Ford, G. A. Kriss, G. Hartig, L. Armus, I. N. Evans, E. Rosenblatt, R. C. Bohlin, & A. L. Kinney.* 377, L9, 143-B11 (1991)

Faint Object Spectrograph Observations of the Low-Luminosity Seyfert Galaxy NGC 1566. *G. A. Kriss, G. F. Hartig, L. Armus, William P. Blair, S. Caganoff, & L. Dressel.* 377, L13, 143-C1 (1991)

First Results from the Goddard High-Resolution Spectrograph: The Galactic Halo and the Lyα Forest at Low Redshift in 3C 273. *Simon L. Morris, Ray J. Weymann, Blair D. Savage, & Ronald L. Gilliland.* 377, L21, 143-C11 (1991)

First Results from the Goddard High-Resolution Spectrograph: Spectroscopic Determination of Stellar Parameters of Melnick 42, an O3f Star in the Large Magellanic Cloud. *S. R. Heap, B. Altner, D. Ebbets, I. Hubeny, J. B. Hutchings, R. P. Kudritzki, S. A. Voels, S. Haser, A. Pauldrach, J. Puls, & K. Butler.* 377, L29, 143-D6 (1991)

First Results from the Goddard High-Resolution Spectrograph: Evidence for Photospheric Microturbulence in Early O Stars: Are Surface Gravities Systematically Underestimated? *I. Hubeny, S. R. Heap, & B. Altner.* 377, L33, 143-D11 (1991)

First Results from the Goddard High-Resolution Spectrograph: High-Resolution Observations of the 1942 Å Resonance Line of Hg II in the Chemically Peculiar B Star, χ Lupi. *David S. Leckrone, Glenn M. Wahlgren, & Sveneric G. Johansson.* 377, L37, 143-E1 (1991)

First Results from the Goddard High-Resolution Spectrograph: A Demonstration of Spectral Resolution and Experiments with Deconvolution. *Glenn M. Wahlgren, David S. Leckrone, Steven N. Shore, Don J. Lindler, Ronald L. Gilliland, & Dennis C. Ebbets.* 377, L41, 143-E6 (1991)

First Results from the Goddard High-Resolution Spectrograph: The Chromosphere of α Tauri. *Kenneth G. Carpenter, Richard D. Robinson, Glenn M. Wahlgren, Thomas B. Ake, Dennis C. Ebbets, Jeffrey L. Linsky, Alexander Brown, & Frederick M. Walter.* 377, L45, 143-E11 (1991)

First Results from the Goddard High-Resolution Spectrograph: Resolved Velocity and Density Structure in the β Pictoris Circumstellar Gas. *A. Boggess, Frederick C. Bruhweiler, C. A. Grady, Dennis C. Ebbets, Yoji Kondo, L. M. Trafton, John C. Brandt, & S. R. Heap.* 377, L49, 143-F1 (1991)

First Results from the Goddard High-Resolution Spectrograph: Element Abundances as a Function of Velocity in the Neutral Gas toward ξ Persei. *Blair D. Savage, Jason A. Cardelli, Frederick C. Bruhweiler, Andrew M. Smith, Dennis C. Ebbets, & Kenneth R. Sembach.* 377, L53, 143-F6 (1991)

First Results from the Goddard High-Resolution Spectrograph: Elemental Abundances in the Diffuse Clouds toward ξ Persei. *Jason A. Cardelli, Blair D. Savage, Frederick C. Bruhweiler, Andrew M. Smith, Dennis C. Ebbets, Kenneth R. Sembach, & Ulysses J. Sofia.* 377, L57, 143-F11 (1991)

First Results from the Goddard High-Resolution Spectrograph: C I, S I, and CO toward ξ Persei and the Physical Conditions in Diffuse Clouds. *Andrew M. Smith, Frederick C. Bruhweiler, David L. Lambert, Blair D. Savage, Jason A. Cardelli, Dennis C. Ebbets, Cheng-Hsuan Lyu, & Yaron Sheffer.* 377, L61, 143-G1 (1991)

IUE Investigation of Mass Flow in the Interacting Binary U Sagittae. *George E. McCluskey, Jr., Carolina Paciencia Salas McCluskey, & Yoji Kondo.* 378, 281, 154-D9 (1991)

A Cool Supergiant with Anomalous Behavior of the 2800 Mg II Doublet. *G. A. Gurzadyan, Y. Kondo, S. S. Rustambekyan, Yervant Terzian, & Mario R. Perez.* 378, 298, 154-F1 (1991)

Heating Mechanism(s) for Transition Layers in Giants. *Erika Böhm-Vitense & José Mena-Werth.* 378, 718, 161-C8 (1991)

The Great Flare of 1985 April 12 on AD Leonis. *Suzanne L. Hawley & Bjørn R. Pettersen.* 378, 725, 161-D1 (1991)

The Analysis of Apparent Optical Depth Profiles for Interstellar Absorption Lines. *Blair D. Savage & Kenneth R. Sembach.* 379, 245, 166-B5 (1991)

The $3s^23p\ ^2P$–$3s3p^2\ ^4P$ Intercombination Lines of Fe XIV in the Sun. *F. P. Keenan, P. L. Dufton, E. S. Conlon, M. B. Boylan, A. E. Kingston, & K. G. Widing.* 379, 406, 168-A11 (1991)

Discovery of a Fast Radiative Shock Wave in the Cygnus Loop Using the Hopkins Ultraviolet Telescope. *William P. Blair, Knox S. Long, Olaf Vancura, Charles W. Bowers, Arthur F. Davidsen, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Henry C. Ferguson, Richard C. Henry, Randy A. Kimble, Gerard A. Kriss, Jeffrey W. Kruk, H. Warren Moos, & Theodore R. Gull.* 379, L33, 169-D1 (1991)

Observations of Comet Levy (1990c) with the Hopkins Ultraviolet Telescope. *P. D. Feldman, A. F. Davidsen, W. P. Blair, C. W. Bowers, W. V. Dixon, S. T. Durrance, H. C. Ferguson, R. C. Henry, R. A. Kimble, G. A. Kriss, J. W. Kruk, K. S. Long, H. W. Moos, O. Vancura, & T. R. Gull.* 379, L37, 169-D7 (1991)

Fe II Emission Lines. I. Chromospheric Spectra of Red Giants. *P. G. Judge & C. Jordan.* 77, 75, 44-E1 (1991)

Atomic Data for Resonance Absorption Lines. I. Wavelengths Longward of the Lyman Limit. *Donald C. Morton.* 77, 119, 45-B1 (1991)

IUE Observations of NGC 1068: The Extremely Luminous Starburst Knots. *F. C. Bruhweiler, K. Q. Truong, & B. Altner.* 379, 596, 172-B1 (1991)

IUE Observations of NGC 1068: The Extended High-Ionization Emission Region. *K. Q. Truong & F. C. Bruhweiler.* 379, 609, 172-C1 (1991)

Wind Collision Effects in the Early-Type Close Binaries HD 47129 and AO Cassiopeiae. *Jorge Sahade & Estela Brandi.* 379, 706, 173-E1 (1991)

Chromospheric and Transition Region Diagnostics Using Emission-Line Intensities. *R. Grant Athay & K. P. Dere.* 379, 776, 174-D1 (1991)

The Onset of Chromospheric Activity among the A and F Stars. *Theodore Simon & Wayne Landsman.* 380, 200, 178-E3 (1991)

Predicted Extreme-Ultraviolet Line Emission for Nearby Main-Sequence B Stars. *J. J. MacFarlane, J. P. Cassinelli, B. Y. Welsh, P. W. Vedder, J. V. Vallerga, & W. L. Waldron.* 380, 564, 185-C1 (1991)

Circumstellar Emission from SN 1987A. *Peter Lundqvist & Claes Fransson.* 380, 575, 185-D1 (1991)

A Non–Local Thermodynamic Equilibrium, Line-blanketed Synthetic Spectrum of Iota Herculis: C, Al, and Si Lines. *James A. Grigsby.* 380, 606, 185-F9 (1991)

Probing the Galactic Halo along the 3C 273 Sight Line Using *IUE*. *Geoffrey S. Burks, Donald G. York, J. Chris Blades, Ralph C. Bohlin, & Willem Wamsteker.* 381, 55, 189-F5 (1991)

Velocity Gradients in the Chromosphere-Corona Transition Region. *R. Grant Athay & K. P. Dere.* 381, 323, 193-A6 (1991)

The Evolution of the Diffuse Cosmic Ultraviolet Background Constrained by *Hubble Space Telescope* Observations of 3C 273. *Satoru Ikeuchi & Edwin L. Turner.* 381, L1, 194-A9 (1991)

Spectroscopy of Z Camelopardalis in Outburst with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Arthur F. Davidsen, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Richard C. Henry, Gerard A. Kriss, Jeffrey W. Kruk, H. Warren Moos, Olaf Vancura, Henry C. Ferguson, & Randy A. Kimble.* 381, L25, 194-D5 (1991)

IUE Spectra of the Eclipsing Binary NN Serpentis. *Janet H. Wood & Thomas R. Marsh.* 381, 551, 197-E1 (1991)

Relative Abundances in the Lower Solar Transition Region. *G. A. Doschek, K. P. Dere, & P. A. Lund.* 381, 583, 198-A1 (1991)

Improved Line Ratio Calculations Involving $\Delta n = 1$ (2–3) Transitions in O V and a Reanalysis of *Skylab* Observations of Solar Flares. *F. P. Keenan, P. L. Dufton, L. K. Harra, E. S. Conlon, K. A. Berrington, A. E. Kingston, & K. G. Widing.* 382, 349, 204-E1 (1991)

The Ultraviolet Spectrum of NGC 4151 from 1978 to 1990: General Characteristics and Evolution. *M.-H. Ulrich, A. Boksenberg, G. E. Bromage, J. Clavel, A. Elvius, M. V. Penston, G. C. Perola, & M. A. J. Snijders.* 382, 483, 207-E7 (1991)

The Connection between Coronal Bright Points and the Variability of the Quiet-Sun Extreme-Ultraviolet Emission. *Shadia Rifai Habbal & Edmund Grace.* 382, 667, 209-G11 (1991)

Inference of the Extreme-Ultraviolet Continuum Shape of Quasars. *Wei Zheng.* 382, L55, 211-A11 (1991)

Constraints on the Origin of the Ultraviolet Upturn in Elliptical Galaxies from Hopkins Ultraviolet Telescope Observations of NGC 1399. *Henry C. Ferguson, Arthur F. Davidsen, Gerard A. Kriss, William P. Blair, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Richard C. Henry, Jeffrey W. Kruk, H. Warren Moos, Olaf Vancura, Knox S. Long, & Randy A. Kimble.* 382, L69, 211-C1 (1991)

First Ultraviolet Spectropolarimetry of Hot Supergiants. *M. Taylor, A. D. Code, K. H. Nordsieck, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, R. E. Schulte-Ladbeck, & B. A. Whitney.* 382, L85, 211-D5 (1991)

Hydrogenated Amorphous Carbon Grains and the 2175 Å Interstellar Hump. *Armando Blanco, Ezio Bussoletti, Luigi Colangeli, Sergio Fonti, & John R. Stephens.* 382, L97, 211-E8 (1991)

Determination of Ionic Abundances in the Io Torus Using the Hopkins Ultraviolet Telescope. *H. W. Moos, P. D. Feldman, S. T. Durrance, W. P. Blair, C. W. Bowers, A. F. Davidsen, W. V. Dixon, H. C. Ferguson, R. C. Henry, R. A. Kimble, G. A. Kriss, J. W. Kruk, K. S. Long, & O. Vancura.* 382, L105, 211-F3 (1991)

The Ultraviolet Spectra of Nearby Radio Galaxies. *William C. Keel & Rogier A. Windhorst.* 383, 135, 213-F3 (1991)

Constraints on the Optical Properties of Interstellar Dust in the Far-Ultraviolet: *Voyager* Observations of the Diffuse Sky Background. *Jayant Murthy, R. C. Henry, & J. B. Holberg.* 383, 198, 214-E1 (1991)

Interstellar Gas Phase Abundance of Carbon, Oxygen, Nitrogen, Copper, Gallium, Germanium, and Krypton toward ζ Ophiuchi. *Jason A. Cardelli, Blair D. Savage, & Dennis C. Ebbets.* 383, L23, 219-D1 (1991)

IUE Observations of Solar-Type Stars in the Pleiades and the Hyades. *Jean-Pierre Caillault, Osmi Vilhu, & Jeffrey L. Linsky.* 383, 594, 221-F1 (1991)

An Interactive Companion to the S Star HD 35155. *Thomas B. Ake III, Hollis R. Johnson, & Mudhaffer M. Ameen.* 383, 842, 224-F7 (1991)

First Ultraviolet Spectropolarimetry of Be Stars from the Wisconsin Ultraviolet Photo-Polarimeter Experiment. *K. S. Bjorkman, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, G. C. Clayton, A. M. Magalhães, M. R. Meade, M. A. Nook, R. E. Schulte-Ladbeck, M. Taylor, & B. A. Whitney.* 383, L67, 226-E1 (1991)

Probing the Galactic Disk and Halo. II. Hot Interstellar Gas toward the Inner Galaxy Star HD 156359. *Kenneth R. Sembach, Blair D. Savage, & Limin Lu.* 439, 672, 33-F12 (1995)

The Abundances of Pt, Au, and Hg in the Chemically Peculiar HgMn-Type Stars κ Cancri and χ Lupi. *Glenn M. Wahlgren, David S. Leckrone, Sveneric G. Johansson, Maria Rosberg, & Tomas Brage.* 444, 438, 119-E11 (1995)

ULTRAVIOLET: STARS

A Magnitude-limited Survey of Cepheid Companions in the Ultraviolet. *Nancy Remage Evans.* 384, 220, 3-F4 (1992)

The Unusual Ultraviolet Chromospheric Spectrum of the R Coronae Borealis Star, V854 Centauri (NSV 6708), at Minimum Light. *Geoffrey C. Clayton, Barbara A. Whitney, S. Adam Stanford, John S. Drilling, & P. G. Judge.* 384, L19, 6-C8 (1992)

The Luminosity of the Double-Mode Cepheid Y Carinae. *Nancy Remage Evans.* 385, 680, 21-E6 (1992)

Tomographic Separation of Composite Spectra. I. The Components of Plaskett's Star. *William G. Bagnuolo, Jr., Douglas R. Gies, & Michael S. Wiggs.* 385, 708, 21-G12 (1992)

The Origin of the Far-Ultraviolet Continuum in Solar and Stellar Flares. *K. J. H. Phillips, G. E. Bromage, & J. G. Doyle.* 385, 731, 22-B11 (1992)

Properties of the Massive X-Ray Binary 4U 1700−37 = HD 153919. *S. R. Heap & M. F. Corcoran.* 387, 340, 41-B11 (1992)

Improved Calculations for the C III $\lambda\lambda$1907,1909 and Si III $\lambda\lambda$1883,1892 Electron Density Sensitive Emission-Line Ratios, and a Comparison with *IUE* Observations. *F. P. Keenan, W. A. Feibelman, & K. A. Berrington.* 389, 443, 65-D5 (1992)

Fe II Fluorescence and Anomalous C IV Doublet Intensities in Symbiotic Novae. *A. G. Michalitsianos, M. Kafatos, & S. R. Meier.* 389, 649, 69-D12 (1992)

New Calibrators for the Cepheid Period-Luminosity Relation. *Nancy Remage Evans.* 389, 657, 69-E8 (1992)

Time Series Observations of O Stars. I. *IUE* Observations of Variability in the Stellar Wind of ζ Puppis. *R. K. Prinja, L. A. Balona, C. T. Bolton, R. A. Crowe, M. S. Fieldus, A. W. Fullerton, D. R. Gies, I. D. Howarth, D. McDavid, & A. H. N. Reid.* 390, 266, 77-C6 (1992)

The Constitution of the Atmospheric Layers and the Extreme Ultraviolet Spectrum of Hot Hydrogen-rich White Dwarfs. *Stéphane Vennes.* 390, 590, 82-F1 (1992)

The Sun as a Star: High Spectral Resolution Solar Data Degraded to Low-Dispersion *IUE* Resolution. *J. G. Doyle & J. W. Cook.* 391, 393, 90-G1 (1992)

Coordinated *Ginga*, *IUE*, and VLA Observations of Stellar Activity in σ^2 Coronae Borealis. *R. A. Stern, Y. Uchida, F. Walter, O. Vilhu, D. Hannikainen, A. Brown, A. Veale, & B. M. Haisch.* 391, 760, 97-D7 (1992)

Iron Abundance in the Hot DA White Dwarfs Feige 24 and G191 B2B. *Stéphane Vennes, Pierre Chayer, John R. Thorstensen, Stuart Bowyer, & Harry L. Shipman.* 392, L27, 106-D5 (1992)

Spherically Symmetric, Expanding, Non–LTE Model Atmospheres for Novae during Their Early Stages. *P. H. Hauschildt, R. Wehrse, S. Starrfield, & G. Shaviv.* 393, 307, 118-A4 (1992)

Ultraviolet and Optical Spectral Morphology of Melnick 42 and Radcliffe 136a in 30 Doradus. *Nolan R. Walborn, Dennis C. Ebbets, Joel Wm. Parker, Joy Nichols-Bohlin, & Richard L. White.* 393, L13, 120-C1 (1992)

The Coolest DA White Dwarfs Detected at Soft X-Ray Wavelengths. *K. M. Kidder, J. B. Holberg, M. A. Barstow, R. W. Tweedy, & F. Wesemael.* 394, 288, 131-E7 (1992)

Ultraviolet and Radio Observations of Milky Way Halo Gas. *Laura Danly, Felix J. Lockman, Marilyn R. Meade, & Blair D. Savage.* 81, 125, 36-F9 (1992)

The Orbital Parameters and the *IUE* Spectrum of the Single-lined Spectroscopic Binary HD 698. *Jorge Sahade, Rodolfo Barbá, & Yoji Kondo.* 81, 303, 39-B1 (1992)

Ultraviolet Observations of the Symbiotic Star AS 296. *A. Gutiérrez-Moreno, H. Moreno, & W. A. Feibelman.* 395, 295, 143-G1 (1992)

An Ultraviolet Imaging Telescope Study of the Globular Cluster M79 (NGC 1904). *Robert S. Hill, Jesse K. Hill, Wayne B. Landsman, Ralph C. Bohlin, K.-P. Cheng, Paul M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L17, 144-F1 (1992)

The Ultraviolet-bright Stars of Omega Centauri, M3, and M13. *Wayne B. Landsman, Robert W. O'Connell, Jonathan H. Whitney, Ralph C. Bohlin, Robert S. Hill, Stephen P. Maran, Ronald A. Parise, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L21, 144-F9 (1992)

Observations of the Light Echoes from SN 1987A Using the *Astro-1* Ultraviolet Imaging Telescope. *Arlin P. S. Crotts, Wayne B. Landsman, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L25, 144-G7 (1992)

Highly Ionized Gas in the Gum Nebula and Elsewhere: A Comparison of *IUE* and *Copernicus* Satellite Results. *Richard J. Edgar & Blair D. Savage.* 396, 124, 156-F4 (1992)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. II. Plaskett's Star (HD 47129). *Michael S. Wiggs & Douglas R. Gies.* 396, 238, 158-A12 (1992)

Extreme Ultraviolet Spectroscopy of G191-B2B: Direct Observation of Ionization Edges. *Erik Wilkinson, James C. Green, & Webster Cash.* 397, L51, 173-F13 (1992)

Spectral Synthesis in the Ultraviolet. IV. A Library of Mean Stellar Groups. *Michael N. Fanelli, Robert W. O'Connell, David Burstein, & Chi-Chao Wu.* 82, 197, 52-A1 (1992)

Observations of R Coronae Borealis Stars in Decline: Empirical Arguments for Dust Formation near the Stellar Surface. *Geoffrey C. Clayton, Barbara A. Whitney, S. Adam Stanford, & John S. Drilling.* 397, 652, 179-B10 (1992)

The *Hubble Space Telescope* Observations of X-Ray Nova Muscae 1991 and Its Spectral Evolution. *F. H. Cheng, Keith Horne, N. Panagia, C. R. Shrader, R. Gilmozzi, F. Paresce, & N. Lund.* 397, 664, 179-C11 (1992)

Detection of a Proton Beam during the Impulsive Phase of a Stellar Flare. *Bruce E. Woodgate, Richard D. Robinson, Kenneth G. Carpenter, Stephen P. Maran, & Steven N. Shore.* 397, L95, 181-C1 (1992)

Extreme Ultraviolet Spectroscopy of Capella. *James C. Green, Erik Wilkinson, Thomas R. Ayres, & Webster Cash.* 397, L99, 181-C8 (1992)

A Multiwavelength Study of Nova QU Vulpeculae 1984. *Pedro Saizar, Sumner Starrfield, Gary J. Ferland, R. Mark Wagner, James W. Truran, Scott J. Kenyon, Warren M. Sparks, Robert E. Williams, & L. L. Stryker.* 398, 651, 192-B13 (1992)

Observations of Highly Ionized Gas in the Galactic Halo. *Kenneth R. Sembach & Blair D. Savage.* 83, 147, 58-G11 (1992)

An Interpretation of the Spectral Properties of Hot Hydrogen-rich White Dwarfs with Stratified H/He Model Atmospheres. *Stéphane Vennes & Gilles Fontaine.* 401, 288, 224-E7 (1992)

The Abundance of Boron in Three Halo Stars. *Douglas K. Duncan, David L. Lambert, & Michael Lemke.* 401, 584, 229-G6 (1992)

Companions to Bright S and MS Stars: Technetium Deficiency and Binarity. *Hollis R. Johnson, Thomas B. Ake, & Mudhaffer M. Ameen.* 402, 667, 10-G11 (1993)

The Hydrogen Lyman-Alpha Emission of Capella. *Thomas R. Ayres, A. Brown, K. G. Gayley, & Jeffrey L. Linsky.* 402, 710, 11-D5 (1993)

The Circumstellar Gas Surrounding 51 Ophiuchi: A Candidate Proto–Planetary System Similar to β Pictoris. *C. A. Grady & J. M. S. Silvis.* 402, L61, 12-G1 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. II. Chromospheric Activity and Variability. *D. Dravins, P. Linde, K. Fredga, & G. F. Gahm.* 403, 396, 18-F9 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. III. Transition Region, Corona, and Stellar Wind. *D. Dravins, P. Linde, T. R. Ayres, J. L. Linsky, B. Monsignori-Fossi, T. Simon, & F. Wallinder.* 403, 412, 18-G13 (1993)

A 25 m$\AA$ Isotope Shift in B I at 2090 $\AA$: A Possible Diagnostic of the Cosmic $^{11}B/^{10}B$ Ratio? *Sveneric G. Johansson, Ulf Litzén, Jörg Kasten, & Manfred Kock.* 403, L25, 20-C11 (1993)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. IV. ι Orionis. *Douglas R. Gies, Michael S. Wiggs, & William G. Bagnuolo, Jr.* 403, 752, 25-B4 (1993)

On the Chromospheric Structure of ζ Aurigae. *Joel A. Eaton.* 404, 305, 31-F1 (1993)

A Spectroscopic and Photometric Study of FK Comae in 1989. *David P. Huenemoerder, Lawrence W. Ramsey, Derek L. Buzasi, & Harold L. Nations.* 404, 316, 31-G1 (1993)

Extreme Ultraviolet Observations of G191-B2B and the Local Interstellar Medium with the Hopkins Ultraviolet Telescope. *Randy A. Kimble, Arthur F. Davidsen, William P. Blair, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Henry C. Ferguson, Richard C. Henry, Gerard A. Kriss, Jeffrey W. Kruk, Knox S. Long, H. Warren Moos, & Olaf Vancura.* 404, 663, 37-B13 (1993)

Extended Variability of the Symbiotic Star AG Draconis. *M. Kafatos, S. R. Meier, & I. Martin.* 84, 201, 4-B7 (1993)

Observations of the White Dwarf in the U Geminorum System with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Charles W. Bowers, Arthur F. Davidsen, Gerard A. Kriss, Edward M. Sion, & Ivan Hubeny.* 405, 327, 45-C1 (1993)

Spectroscopic Observations of the Detached Binary PG 1413+015. *Michael S. Fulbright, James Liebert, P. Bergeron, & Richard Green.* 406, 240, 58-A11 (1993)

Far-Ultraviolet Radiation from Disk Globular Clusters. *R. Michael Rich, Dante Minniti, & James W. Liebert.* 406, 489, 63-G9 (1993)

The Crab Pulsar in the Visible and Ultraviolet with 10 Microsecond Time Resolution. *J. W. Percival, J. D. Biggs, J. F. Dolan, E. L. Robinson, M. J. Taylor, R. C. Bless, J. L. Elliot, M. J. Nelson, T. F. Ramseyer, G. W. van Citters, & E. Zhang.* 407, 276, 72-E1 (1993)

A Catalog of Stellar Lyman-Alpha Fluxes. *Wayne Landsman & Theodore Simon.* 408, 305, 87-A1 (1993)

Dynamic Processes in Be Star Atmospheres. I. "Dimple" Formation in the He sci λ6678 Line of λ Eridani. *Myron A. Smith & Ronald S. Polidan.* 408, 323, 87-B8 (1993)

Extreme Ultraviolet Observations of HZ 43 and the Local H/He Ratio with the Hopkins Ultraviolet Telescope. *Randy A. Kimble, Arthur F. Davidsen, Knox S. Long, & Paul D. Feldman.* 408, L41, 89-C1 (1993)

Far-Ultraviolet Stellar Photometry: A Field in Monoceros. *Edward G. Schmidt & George R. Carruthers.* 408, 484, 91-C1 (1993)

Effective Collision Strengths for O II. *Brendan M. McLaughlin & Kenneth L. Bell.* 408, 753, 94-E3 (1993)

Hopkins Ultraviolet Telescope Observations of Far-Ultraviolet Scattering in NGC 7023: The Dust Albedo. *Jayant Murthy, Andrew Dring, Richard C. Henry, Jeffrey W. Kruk, William P. Blair, Randy A. Kimble, & Samuel T. Durrance.* 408, L97, 95-E3 (1993)

Composition of Interstellar Clouds in the Disk and Halo. I. HD 93521. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 409, 299, 100-G3 (1993)

Ultraviolet Continuum Variability and Visual Flickering in the Peculiar Object MWC 560. *A. G. Michalitsianos, M. Perez, S. N. Shore, S. P. Maran, M. Karovska, G. Sonneborn, J. R. Webb, Thomas G. Barnes III, Marian L. Frueh, R. J. Oliversen, & S. G. Starrfield.* 409, L53, 111-D8 (1993)

Ultraviolet Properties of Individual Hot Stars in Globular Cluster Cores. I. NGC 1904 (M79). *B. Altner & T. A. Matilsky.* 410, 116, 113-E8 (1993)

Hubble Space Telescope Spectra of the Phase-modulated Wind in the SMC O+WR Binary R31. *J. B. Hutchings, L. Bianchi, & S. C. Morris.* 410, 803, 123-F10 (1993)

Ultraviolet Line Diagnostics of Accretion Disk Winds in Cataclysmic Variables. *Peter Vitello & Isaac Shlosman.* 410, 815, 123-G11 (1993)

The First Detection of Ionized Helium in the Local ISM: *EUVE* and *IUE* Spectroscopy of the Hot DA Dwarf GD 246. *Stéphane Vennes, Jean Dupois, Todd Rumph, Jeremy Drake, Stuart Bowyer, Pierre Chayer, & Gilles Fontaine.* 410, L119, 126-D7 (1993)

He 3-519: A Peculiar Post-LBV, Pre-WN Star? *Kris Davidson, Roberta M. Humphreys, Arsen Hajian, & Yervant Terzian.* 411, 336, 131-D9 (1993)

Goddard High-Resolution Spectrograph Observations of Narrow Discrete Stellar Wind Absorption Features in the Ultraviolet Spectrum of the O7.5 III Star ξ Persei. *Steven N. Shore, Bruce Altner, C. T. Bolton, Jason A. Cardelli, & Dennis C. Ebbets.* 411, 864, 140-E5 (1993)

An Improved Ultraviolet Spectral Line List for the Symbiotic Star RR Telescopii. *G. A. Doschek & W. A. Feibelman.* 87, 331, 31-C7 (1993)

IUE Short-Wavelength High-Dispersion Line List for the Symbiotic Nova RR Telescopii. *Jason P. Aufdenberg.* 87, 337, 31-D3 (1993)

Ultraviolet Spectropolarimetry of the Be Star PP Carinae with the Wisconsin Ultraviolet Photo-Polarimeter Experiment. *K. S. Bjorkman, M. R. Meade, K. H. Nordsieck, C. M. Anderson, B. L. Babler, G. C. Clayton, A. D. Code, A. M. Magalhães, R. E. Schulte-Ladbeck, M. Taylor, & B. A. Whitney.* 412, 810, 153-G11 (1993)

Ultraviolet and Optical Studies of Binaries with Luminous Cool Primaries and Hot Companions. IV. Further *IUE* Detections. *Sidney B. Parsons & Thomas B. Ake.* 412, 814, 154-A3 (1993)

Scattered Light in the Echelle Modes of the Goddard High Resolution Spectrograph aboard the *Hubble Space Telescope*. II. Analysis of In-Flight Spectroscopic Observations. *Jason A. Cardelli, Dennis C. Ebbets, & Blair D. Savage.* 413, 401, 161-C5 (1993)

30 Doradus: Ultraviolet and Optical Stellar Photometry. *Jesse K. Hill, Ralph C. Bohlin, Kwang-Ping Cheng, Michael N. Fanelli, Paul Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 413, 604, 164-A5 (1993)

Detection of an Ultraviolet and Visible Counterpart of the NGC 6624 X-Ray Burster. *I. R. King, S. A. Stanford, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, M. J. Disney, J. M. Deharveng, P. Jakobsen, T. M. Kamperman, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, W. B. Sparks, & C. Sosin.* 413, L117, 169-A12 (1993)

A Search for Proton Beams during Flares on AU Microscopii. *R. D. Robinson, K. G. Carpenter, B. E. Woodgate, & S. P. Maran.* 414, 872, 182-B5 (1993)

Extreme Ultraviolet Explorer Deep Survey Observations of a Large Flare on AU Microscopii. *Scott L. Cully, Oswald H. W. Siegmund, Peter W. Vedder, & John V. Vallerga.* 414, L49, 185-B1 (1993)

Extreme Ultraviolet Emission from Late-Type Stars: Initial Results from *Extreme Ultraviolet Explorer*. *Peter W. Vedder, Robert J. Patterer, Patrick Jelinsky, Alex Brown, & Stuart Bowyer.* 414, L61, 185-C5 (1993)

Intense Extreme Ultraviolet Emission from the B Star ϵ Canis Majoris. *John V. Vallerga, Peter W. Vedder, & Barry Y. Welsh.* 414, L65, 185-C11 (1993)

Winds in Central Stars of Planetary Nebulae. *A. Modigliani, P. Patriarchi, & M. Perinotto.* 415, 258, 188-B12 (1993)

Ultraviolet Observations of Selective Wind Eclipses in γ Velorum and Evidence for Colliding Winds. *N. St-Louis, A. J. Willis, & I. R. Stevens.* 415, 298, 188-F8 (1993)

Detection of Accreting Gas toward HD 45677: A Newly Recognized, Herbig Be Proto–Planetary System. *C. A. Grady, K. S. Bjorkman, D. Shepherd, R. E. Schulte-Ladbeck, M. R. Pérez, D. de Winter, & P. S. Thé.* 415, L39, 192-B6 (1993)

SN 1992A: Ultraviolet and Optical Studies Based on *HST*, *IUE*, and CTIO Observations. *Robert P. Kirshner, David J. Jeffery, Bruno Leibundgut, Peter M. Challis, George Sonneborn, M. M. Phillips, N. B. Suntzeff, R. Chris Smith, P. Frank Winkler, Cláudia Winge, Mario Hamuy, Deidre A. Hunter, Katherine C. Roth, J. C. Blades, David Branch, Roger A. Chevalier, Claes Fransson, Nino Panagia, Robert V. Wagoner, J. Craig Wheeler, & Robert P. Harkness.* 415, 589, 195-B10 (1993)

In-Flight Performance and Preliminary Results from the Far Ultraviolet Space Telescope (Faust) Flown on ATLAS-1. *Stuart Bowyer, Timothy P. Sasseen, Michael Lampton, & Xiaoyi Wu.* 415, 875, 198-G12 (1993)

On the Interpretation of the Ultraviolet Spectra of Symbiotic Stars and Recurrent Novae. I. *Steven N. Shore & Jason P. Aufdenberg.* 416, 355, 205-D10 (1993)

The Spectrum of EZ Canis Majoris (HD 50896) to the Lyman Limit with the Hopkins Ultraviolet Telescope. *Stephan R. McCandliss, Richard H. Buss, Jr., William P. Blair, Charles W. Bowers, Arthur F. Davidsen, Paul D. Feldman, & Jeffrey W. Kruk.* 416, 372, 205-F3 (1993)

Ultraviolet Spectroscopy of Herbig-Haro Objects: Spatial Structure, Spectroscopic Diagnostics, and Variability. *K.-H. Böhm, A. Noriega-Crespo, & J. Solf.* 416, 647, 211-D11 (1993)

Two New Extremely Iron-rich Hot DA White Dwarfs and the Nature of the EUV Opacity. *J. B. Holberg, M. A. Barstow, D. A. H. Buckley, A. Chen, S. Dreizler, M. C. Marsh, D. O'Donoghue, E. M. Sion, R. W. Tweedy, G. Vauclair, & K. Werner.* 416, 806, 213-D13 (1993)

Initial White Dwarf Results from the *Extreme Ultraviolet Explorer*. *David S. Finley, Patrick Jelinsky, Jean Dupuis, & Detlev Koester.* 417, 259, 220-F3 (1993)

Time-Series Observations of O Stars. III. *IUE* and *HST* Spectroscopy of ζ Ophiuchi and Implications for the "Photospheric Connection." *Ian D. Howarth, C. T. Bolton, R. A. Crowe, D. C. Ebbets, M. S. Fieldus, A. W. Fullerton, D. R. Gies, D. McDavid, R. K. Prinja, A. H. N. Reid, S. N. Shore, & K. C. Smith.* 417, 338, 221-F10 (1993)

Discovery of a Magnetic/Nonmagnetic Double-degenerate Binary System. *James Liebert, P. Bergeron, Gary D. Schmidt, & Rex A. Saffer.* 418, 426, 236-C10 (1993)

Ultraviolet Morphologies of Globular Clusters Observed with the Ultraviolet Imaging Telescope. *Eric P. Smith, Wayne B. Landsman, Robert S. Hill, Ralph C. Bohlin, Kwang-Ping Cheng, Paul Hintzen, Stephen P. Maran, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 418, 850, 243-B8 (1993)

The Abundances of the Elements in Sharp-lined Early-Type Stars from *IUE* High-Dispersion Spectrograms. I. Cr, Mn, Fe, Ni, and Co. *Saul J. Adelman, Charles R. Cowley, David S. Leckrone, Scott W. Roby, & Glenn M. Wahlgren.* 419, 276, 249-E11 (1993)

The Population of Massive Stars in R136 from Faint Object Camera Ultraviolet Observations. *Guido De Marchi, Antonella Nota, Claus Leitherer, Roberto Ragazzoni, & Cesare Barbieri.* 419, 658, 255-G10 (1993)

Far-Ultraviolet Stellar Photometry: A Field in Orion. *Edward G. Schmidt & George R. Carruthers.* 89, 259, 53-B2 (1993)

A Synoptic Study of Hα Line Profile Variability in the T Tauri Star SU Aurigae. *Mark S. Giampapa, Gibor S. Basri, Christopher M. Johns, & Catherine L. Imhoff.* 89, 321, 54-A8 (1993)

Emission Lines in the Long-Period Cepheid *l* Carinae. *Erika Böhm-Vitense & Stanley G. Love.* 420, 401, 5-G5 (1994)

A Far-Ultraviolet Flare on a Pleiades G Dwarf. *T. R. Ayres, J. R. Stauffer, Theodore Simon, R. A. Stern, S. K. Antiochos, G. S. Basri, J. A. Bookbinder, A. Brown, G. A. Doschek, J. L. Linsky, L. W. Ramsey, & F. M. Walter.* 420, L33, 7-E4 (1994)

The Early Bolometric Evolution of Nova Cygni 1992. *Steven N. Shore, George Sonneborn, Sumner Starrfield, Rosario Gonzalez-Riestra, & Ronald S. Polidan.* 421, 344, 20-B13 (1994)

A *Hubble Space Telescope* Ultraviolet Spectrum of SN 1993J. *David J. Jeffery, Robert P. Kirshner, Peter M. Challis, Chun S. J. Pun, Alexei V. Filippenko, Thomas Matheson, David Branch, Roger A. Chevalier, Claes Fransson, Nino Panagia, Robert V. Wagoner, J. Craig Wheeler, & Alejandro Clocchiatti.* 421, L27, 21-F9 (1994)

Low Density of Neutral Hydrogen and Helium in the Local Interstellar Medium: *Extreme Ultraviolet Explorer* Photometry of the Lyman Continuum of the Hot White Dwarfs MCT 0501−2858, MCT 0455−2812, HZ 43, and GD 153. *Stéphane Vennes, Jean Dupuis, Stuart Bowyer, Gilles Fontaine, Alexandria Wiercigroch, Patrick Jelinsky, François Wesemael, & Roger Malina.* 421, L35, 21-G12 (1994)

The Extreme Ultraviolet Coronal Spectrum of the Solar-Type Star χ^1 Orionis. *Bernhard Haisch, Jeremy J. Drake, & J. H. M. M. Schmitt.* 421, L39, 22-A5 (1994)

Spectroscopy of Chromospheric Lines of Giants in the Globular Cluster NGC 6752. *A. K. Dupree, Lee Hartmann, Graeme H. Smith, A. W. Rodgers, W. H. Roberts, & D. B. Zucker.* 421, 542, 24-G9 (1994)

Al III, Si IV, and C IV Absorption toward ζ Ophiuchi: Evidence for Photoionized and Collisionally Ionized Gas. *Kenneth R. Sembach, Blair D. Savage, & Edward B. Jenkins.* 421, 585, 25-D12 (1994)

Analysis of the *IUE* Satellite and the Ground-based Observations of SW Lacertae. *Jang Hae Jeong, Yong Woon Kang, Woo Baik Lee, & Eon Chang Sung.* 421, 779, 27-G13 (1994)

Ultraviolet Light Curves of β Lyrae: Comparison of *OAO* A-2, *IUE*, and *Voyager* Observations. *Yoji Kondo, George E. McCluskey, Jeffrey M. S. Silvis, Ronald S. Polidan, Carolina P. S. McCluskey, & Joel A. Eaton.* 421, 787, 28-A9 (1994)

Observing Stellar Coronae with the Goddard High Resolution Spectrograph. I. The dMe Star AU Microscopii. *S. P. Maran, R. D. Robinson, S. N. Shore, J. W. Brosius, K. G. Carpenter, B. E. Woodgate, J. L. Linsky, A. Brown, P. B. Byrne, M. R. Kundu, S. White, J. C. Brandt, R. A. Shine, & F. M. Walter.* 421, 800, 28-B10 (1994)

Comparison of New Experimental and Astrophysical *f*-Values for Some Ru II Lines, Observed in *HST* Spectra of χ Lupi. *Sveneric G. Johansson, Ali Joueizadeh, Ulf Litzén, Jörgen Larsson, Anders Persson, Claes-Göran Wahlström, Sune Svanberg, David S. Leckrone, & Glenn M. Wahlgren.* 421, 809, 28-C8 (1994)

The Stellar Population in the Core of M15. *Guido De Marchi & Francesco Paresce.* 422, 597, 39-C6 (1994)

Non–LTE Model Atmosphere Analysis of Nova Cygni 1992. *P. H. Hauschildt, S. Starrfield, S. Austin, R. M. Wagner, S. N. Shore, & G. Sonneborn.* 422, 831, 42-C1 (1994)

An Ultraviolet-Visible Investigation of the Globular Cluster NGC 1851. *Ronald A. Parise, Stephen P. Maran, Wayne B. Landsman, Ralph C. Bohlin, Kwang-Ping Cheng, Michael R. Greason, Paul M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 423, 305, 49-G7 (1994)

Tomographic Separation of Composite Spectra. II. The Components of 29 UW Canis Majoris. *William G. Bagnuolo, Jr., Douglas R. Gies, Michael E. Hahula, Rafael Wiemker, & Michael S. Wiggs.* 423, 446, 51-F7 (1994)

Constraints on Accreting, Isolated Neutron Stars from the *ROSAT* and *EUVE* Surveys. *Piero Madau & Omer Blaes.* 423, 748, 57-G10 (1994)

Optical, *IUE*, and *ROSAT* Observations of the Eclipsing Nova-like Variable V347 Puppis (LB 1800). *Christopher W. Mauche, John C. Raymond, David A. H. Buckley, Martine Mouchet, Jerry Bonnell, Denis J. Sullivan, Jean-Marc Bonnet-Bidaud, & Wolfram H. Bunk.* 424, 347, 66-B12 (1994)

Cooling of the White Dwarf in U Geminorum between Outbursts. *Knox S. Long, Edward M. Sion, Min Huang, & Paula Szkody.* 424, L49, 69-F13 (1994)

Initial Mass Functions from Ultraviolet Stellar Photometry: A Comparison of Lucke and Hodge OB Associations near 30 Doradus with the Nearby Field. *Jesse K. Hill, Joan E. Isensee, Robert H. Cornett, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 425, 122, 81-F5 (1994)

A Search for Ultraviolet Circumstellar Gas Absorption Features in α Piscis Austrinus (Fomalhaut), A Possible β Pictoris–like System. *K.-P. Cheng, Fred C. Bruhweiler, & Yoji Kondo.* 425, L33, 85-E7 (1994)

Hot Gas and the Origin of the Nebular Continuum in Novae. *Pedro Saizar & Gary J. Ferland.* 425, 755, 91-B10 (1994)

ROSAT Observations of Cataclysmic Variables: A Search for the Boundary Layer Emission. *S. D. Vrtilek, A. Silber, J. C. Raymond, & J. Patterson.* 425, 787, 91-E8 (1994)

The Discovery of Ni V in the Photospheres of the Hot DA White Dwarfs RE 2214−492 and G191-B2B. *J. B. Holberg, I. Hubeny, M. A. Barstow, T. Lanz, E. M. Sion, & R. W. Tweedy.* 425, L105, 94-G5 (1994)

A Statistical Equilibrium Analysis of Interstellar CO toward ζ Ophiuchi as Recorded by the Goddard High Resolution Spectrograph. *Cheng-Hsuan*

Lyu, Andrew M. Smith, & Frederick C. Bruhweiler. 426, 254, 99-C7 (1994)

Modeling and Interpretation of the Optical and *HST* UV Spectrum of SN 1993J. *E. Baron, P. H. Hauschildt, & D. Branch.* 426, 334, 100-C11 (1994)

Observations of the Bright Novalike Variable IX Velorum with the Hopkins Ultraviolet Telescope. *Knox S. Long, Richard A. Wade, William P. Blair, Arthur F. Davidsen, & Ivan Hubeny.* 426, 704, 107-B13 (1994)

Evolution of Solitary Density Waves in Stellar Winds of Early-Type Stars: A Simple Explanation of Discrete Absorption Component Behavior. *Wayne L. Waldron, Larry Klein, & Bruce Altner.* 426, 725, 107-D10 (1994)

A Dwarf Nova in the Core of 47 Tucanae. *Francesco Paresce & Guido De Marchi.* 427, L33, 117-E6 (1994)

Geometry and Physical Conditions in the Stellar Wind of AG Carinae. *Claus Leitherer, Richard Allen, Bruce Altner, Augusto Damineli, Laurent Drissen, Thais Idiart, Olivia Lupie, Antonella Nota, Carmelle Robert, Werner Schmutz, & Steven N. Shore.* 428, 292, 131-G4 (1994)

A Search for Chromospheric Emission in A-Type Stars Using the Goddard High-Resolution Spectrograph. *Theodore Simon, Wayne B. Landsman, & Ronald L. Gilliland.* 428, 319, 132-B5 (1994)

GHRS Observations of Cool, Low-Gravity Stars. I. The Far-Ultraviolet Spectrum of α Orionis (M2 Iab). *Kenneth G. Carpenter, Richard D. Robinson, Glenn M. Wahlgren, Jeffrey L. Linsky, & Alexander Brown.* 428, 329, 132-C6 (1994)

HD 129333: The Sun in Its Infancy. *J. David Dorren & Edward F. Guinan.* 428, 805, 140-C9 (1994)

Hot Degenerates in the Montreal-Cambridge-Tololo Survey. II. Two New Hybrid White Dwarfs, MCT 0128−3846 and MCT 0453−2933, and the Nature of the DAB Stars. *F. Wesemael, P. Bergeron, R. Lamontagne, G. Fontaine, A. Beauchamp, S. Demers, M. J. Irwin, J. B. Holberg, S. O. Kepler, & S. Vennes.* 429, 369, 148-F2 (1994)

Ultraviolet Observations of the Accretion Disk in LMC X-3. *A. P. Cowley, P. C. Schmidtke, J. B. Hutchings, & D. Crampton.* 429, 826, 156-A1 (1994)

High-Velocity Plasma in the Transition Region of AU Microscopii: Evidence for Magnetic Reconnection and Saturated Heating during Quiescent and Flaring Conditions. *Jeffrey L. Linsky & Brian E. Wood.* 430, 342, 163-D8 (1994)

The "Monochromatic Density Diagnostic" Technique: First Detection of Multiple Density Components in the Chromosphere of α Tauri. *P. G. Judge.* 430, 351, 163-E5 (1994)

Hubble Space Telescope Goddard High-Resolution Spectrograph Observation of U Geminorum during Quiescence: Evidence for a Slowly Rotating White Dwarf. *Edward M. Sion, Knox S. Long, Paula Szkody, & Min Huang.* 430, L53, 165-G12 (1994)

Star Formation in NGC 4449: MAMA-Detector UV Imagery and Fabry-Perot Balmer-Line Imagery. *Robert S. Hill, Allen T. Home, Andrew M. Smith, Fred C. Bruhweiler, K. P. Cheng, Paul M. N. Hintzen, & Ronald J. Oliversen.* 430, 568, 168-G5 (1994)

Evolution of Macromolecular Dust: Far-Ultraviolet Spectral Dust Extinction and Gas Absorption of Stellar Light as Measured with the Hopkins Ultraviolet Telescope. *Richard H. Buss, Jr., Marsha Allen, Stephan McCandliss, Jeffrey Kruk, Ji-Cheng Liu, & Tom Brown.* 430, 630, 169-F5 (1994)

Analytic Lyman-Alpha Wing Diagnostics and the Chromospheric Excitation Balance in Cool Dwarfs. *K. G. Gayley.* 431, 806, 188-F4 (1994)

The First *Extreme Ultraviolet Explorer* Source Catalog. *S. Bowyer, R. Lieu, M. Lampton, J. Lewis, X. Wu, J. J. Drake, & R. F. Malina.* 93, 569, 50-F3 (1994)

Multiwavelength Study of the Magnetically Active T Tauri Star HD 283447. *Eric D. Feigelson, Alan D. Welty, Catherine L. Imhoff, Jeffrey C. Hall, Paul B. Etzel, Robert B. Phillips, & Colin J. Lonsdale.* 432, 373, 197-G1 (1994)

An Ultraviolet and Visible Spectroscopic Study of a Pulsational Cycle of RY Sagittarii. *Geoffrey C. Clayton, W. A. Lawson, P. L. Cottrell, Barbara A. Whitney, S. Adam Stanford, & Frank de Ruyter.* 432, 785, 205-F13 (1994)

The Ultraviolet Pulsations of the Cataclysmic Variable AE Aquarii as Observed with the *Hubble Space Telescope*. *Michael Eracleous, Keith Horne, Edward L. Robinson, Er-Ho Zhang, Thomas R. Marsh, & Janet H. Wood.* 433, 313, 212-C1 (1994)

Discovery of a New White Dwarf in a Binary System (EUVE 0720−317) in the *Extreme Ultraviolet Explorer* Survey and Implications for the Late Stages of Stellar Evolution. *Stéphane Vennes & John R. Thorstensen.* 433, L29, 214-G13 (1994)

A Far-Ultraviolet Atlas of Symbiotic Stars Observed with *IUE*. I. The SWP Range. *S. R. Meier, M. Kafatos, R. P. Fahey, & A. G. Michalitsianos.* 94, 183, 54-C2 (1994)

Thermally Unstable Perturbations in Stratified Conducting Atmospheres. *Fabio Reale, Salvatore Serio, & Giovanni Peres.* 433, 811, 221-C1 (1994)

The Early Ultraviolet, Optical, and Radio Evolution of the Soft X-Ray Transient GRO J0422+32. *C. R. Shrader, R. Mark Wagner, R. M. Hjellming, X. H. Han, & S. G. Starrfield.* 434, 698, 237-D4 (1994)

Evidence for a Disk in the Wind of HD 93521: UV Line Profiles from an Axisymmetric Model. *J. E. Bjorkman, R. Ignace, T. M. Tripp, & J. P. Cassinelli.* 435, 416, 249-B12 (1994)

Acoustic Heating of the Chromosphere and Cool Corona in the F Star α Canis Minoris (Procyon). *D. J. Mullan & Q. Q. Cheng.* 435, 435, 249-D7 (1994)

A Coronal Mass Ejection Model for the 1992 July 15 Flare on AU Microscopii Observed by the *Extreme Ultraviolet Explorer*. *Scott L. Cully, George H. Fisher, Mark J. Abbott, & Oswald H. W. Siegmund.* 435, 449, 249-E11 (1994)

GHRS Spectroscopy of Individual Stars in R136a. *Sara R. Heap, Dennis Ebbets, Eliot M. Malumuth, Stephen P. Maran, Alex de Koter, & Ivan Hubeny.* 435, L39, 252-A11 (1994)

Far-Ultraviolet Imaging of the Globular Cluster NGC 6681 with WFPC2. *Alan M. Watson, Jeremy R. Mould, John S. Gallagher III, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Richard E. Griffiths, J. Jeff Hester, John G. Hoessel, Jon A. Holtzman, Paul A. Scowen, Karl R. Stapelfeldt, John T. Trauger, & James A. Westphal.* 435, L55, 252-D4 (1994)

The Pursuit of Heavy Elements in the HgMn-Type Star χ Lupi: Observations with the GHRS in the COSTAR Era. *Glenn M. Wahlgren, Tomas Brage, Ronald L. Gilliland, Sveneric G. Johansson, David S. Leckrone, Don J. Lindler, & Ulf Litzén.* 435, L67, 252-F3 (1994)

Theoretical Modeling of GHRS Observations of the Of/WN-Type Star R136a5. *Alex de Koter, Ivan Hubeny, Sara R. Heap, & Thierry Lanz.* 435, L71, 252-F9 (1994)

Ultraviolet Spectra of HZ Herculis/Hercules X-1 from *HST*: Hot Gas during Total Eclipse of the Neutron Star. *Scott F. Anderson, Stefanie Wachter, Bruce Margon, Ronald A. Downes, William P. Blair, & Jules P. Halpern.* 436, 319, 265-F5 (1994)

An Atlas of Ultraviolet P Cygni Profiles. *Theodore P. Snow, Henny J. G. L. M. Lamers, Douglas M. Lindholm, & Andrew P. Odell.* 95, 163, 66-C8 (1994)

Ultraviolet Spectra of Amorphous Carbon Grains: Comparison with the Circumstellar Extinction around C-rich Objects. *A. M. Muci, A. Blanco, S. Fonti, & V. Orofino.* 436, 831, 277-B3 (1994)

Determination of Plasma Temperatures and Luminosities Using Multiple Extreme-Ultraviolet and X-Ray Filters. *Brian E. Wood, Alexander Brown, & Jeffrey L. Linsky.* 438, 350, 6-C9 (1995)

RE 0044+09: A New K Dwarf Rapid Rotator with a White Dwarf Companion? *Barry J. Kellett, Gordon E. Bromage, Alexander Brown, Robin D. Jeffries, David J. James, David Kilkenny, Russell M. Robb, David Wonnacott, Christopher Lloyd, & C. Clayton.* 438, 364, 6-D13 (1995)

Late-Time Spectra and Type Ia Supernova Models: New Clues from the *Hubble Space Telescope*. *P. Ruiz-Lapuente, R. P. Kirshner, M. M. Phillips, P. M. Challis, B. P. Schmidt, A. V. Filippenko, & J. C. Wheeler.* 439, 60, 22-A9 (1995)

Stellar-Wind Variability in *IUE* Spectra of 68 Cygni. *Ian D. Howarth & Keith C. Smith.* 439, 431, 27-B3 (1995)

The RIASS Coronathon: Joint X-Ray and Ultraviolet Observations of Normal F–K Stars. *Thomas R. Ayres, T. A. Fleming, T. Simon, B. M. Haisch, A. Brown, D. Lenz, W. Wamsteker, D. de Martino, C. Gonzalez, J. Bonnell, J. M. Mas-Hesse, C. Rosso, J. H. M. M. Schmitt, J. Trümper, W. Voges, J. Pye, R. C. Dempsey, J. L. Linsky, E. F. Guinan, G. M. Harper, C. Jordan, B. M. Montesinos, I. Pagano, & M. Rodonò.* 96, 223, 4-E7 (1995)

Non-LTE Line-blanketed Model Atmospheres of Hot Stars. II. Hot, Metal-rich White Dwarfs. *T. Lanz & I. Hubeny.* 439, 905, 37-B1 (1995)

Hubble Space Telescope FOS Spectroscopy of the Ultrashort-Period Dwarf Nova WZ Sagittae: The Underlying Degenerate. *Edward M. Sion, F. H. Cheng, Knox S. Long, Paula Szkody, Ron L. Gilliland, Min Huang, & Ivan Hubeny.* 439, 957, 37-G3 (1995)

Chromospheric Models for Altair (A7 IV–V). *R. Freire Ferrero, P. Gouttebroze, S. Catalano, E. Marilli, F. Bruhweiler, Y. Kondo, K. van der Hucht, & A. Talavera.* 439, 1011, 38-E12 (1995)

ORFEUS Observations of AM Herculis. *John C. Raymond, Christopher W. Mauche, Stuart Bowyer, & Mark Hurwitz.* 440, 331, 45-F7 (1995)

The Growth of Solids, Destruction of Molecules, and Shielding of Radiation in the Young Stellar Disk of HD 45677. *Thomas M. Brown, Richard Buss, Jr., Carol Grady, & Karen Bjorkman.* 440, 865, 55-A11 (1995)

A Catalog of Far-Ultraviolet Point Sources Detected with the FAUST Telescope on ATLAS-1. *Stuart Bowyer, Timothy P. Sasseen, Xiaoyi Wu, & Michael Lampton.* 96, 461, 8-D9 (1995)

Far-Ultraviolet Stellar Photometry: Fields in Sagittarius and Scorpius. *Edward G. Schmidt & George R. Carruthers.* 96, 605, 10-A8 (1995)

A Volume-limited Survey of High Galactic Latitude Planetary Nebulae with the *Extreme Ultraviolet Explorer*. *Antonella Fruscione, Jeremy J. Drake, Kelley McDonald, & Roger F. Malina.* 441, 726, 72-A1 (1995)

Mg II *h* and *k* Profiles in High-Luminosity, Late-Type Stars. *R. D. Robinson & K. G. Carpenter.* 442, 328, 81-E12 (1995)

The Active Phase of the Hot Component of Z Andromedae. *T. Fernández-Castro, R. González-Riestra, A. Cassatella, A. R. Taylor, & E. R. Seaquist.* 442, 366, 82-B4 (1995)

The Transition Regions of Capella. *Jeffrey L. Linsky, Brian E. Wood, Philip Judge, Alexander Brown, Catherine Andrulis, & Thomas R. Ayres.* 442, 381, 82-C9 (1995)

The Threshold for Stellar Winds in Hot Main-Sequence Stars. *James A. Grigsby & Nancy D. Morrison.* 442, 794, 91-B7 (1995)

White Dwarfs and Mass Segregation in the Core of 47 Tucanae. *Francesco Paresce, Guido De Marchi, & Robert Jedrzejewski.* 442, L57, 94-D12 (1995)

Recent Changes in the *IUE* Spectrum of the Very Young Planetary Nebula He 3-1357 (=SAO 244567). *Walter A. Feibelman.* 443, 245, 98-D13 (1995)

Outer Layers of a Carbon Star: The View from the *Hubble Space Telescope*. *Hollis R. Johnson, Lisa M. Ensman, David R. Alexander, Eugene H. Avrett, Alexander Brown, Kenneth G. Carpenter, Kjell Eriksson, Bengt Gustafsson, Uffe G. Jørgensen, Philip D. Judge, Jeffrey L. Linsky, Donald G. Luttermoser, Francois Querci, Monique Querci, Richard D. Robinson, & Robert F. Wing.* 443, 281, 99-B6 (1995)

Hubble Space Telescope Observations of the Dwarf Nova Z Chamaeleontis through Two Eruption Cycles. *E. L. Robinson, Janet H. Wood, R. C. Bless, J. C. Clemens, J. F. Dolan, J. L. Elliot, M. J. Nelson, J. W. Percival, M. J. Taylor, G. W. van Citters, & E. Zhang.* 443, 295, 99-C9 (1995)

A Reanalysis of the SWP-HI *IUE* Observations of Capella. *Brian E. Wood & Thomas R. Ayres.* 443, 329, 99-F7 (1995)

Stellar Coronal Abundances. II. The First Ionization Potential Effect and Its Absence in the Corona of Procyon. *Jeremy J. Drake, J. Martin Laming, & Kenneth G. Widing.* 443, 393, 100-E2 (1995)

New Model of Iron Spectra in the Extreme Ultraviolet and Application to SERTS and *EUVE* Observations: A Solar Active Region and Capella. *N. S. Brickhouse, J. C. Raymond, & B. W. Smith.* 97, 551, 19-F4 (1995)

GHRS Observations of Cool, Low-Gravity Stars. II. Flow and Turbulent Velocities in the Outer Atmosphere of γ Crucis (M3.4 III). *Kenneth G. Carpenter, Richard D. Robinson, & Philip G. Judge.* 444, 424, 119-D7 (1995)

EUVE Observations of Algol: Detection of a Continuum and Implications for the Coronal [Fe/H] Abundance. *Robert A. Stern, James R. Lemen, Jürgen H. M. M. Schmitt, & John P. Pye.* 444, L45, 121-G7 (1995)

The Stellar Content of 30 Doradus Derived from Spatially Integrated Ultraviolet Spectra: A Test of Spectral Synthesis Models. *William D. Vacca, Carmelle Robert, Claus Leitherer, & Peter S. Conti.* 444, 647, 125-C3 (1995)

ϵ Canis Majoris and the Ionization of the Local Cloud. *J. V. Vallerga & B. Y. Welsh.* 444, 702, 126-A9 (1995)

The O IV and S IV Intercombination Lines in Solar and Stellar Ultraviolet Spectra. *J. W. Cook, F. P. Keenan, P. L. Dufton, A. E. Kingston, A. K. Pradhan, H. L. Zhang, J. G. Doyle, & M. A. Hayes.* 444, 936, 129-C9 (1995)

Composition of Interstellar Clouds in the Disk and Halo. III. HD 149881. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 445, 196, 135-C3 (1995)

The Mass Ratios of Cepheid Binaries. *Nancy Remage Evans.* 445, 393, 138-A1 (1995)

Transition Probabilities for the UV0.01 Multiplet in N III. *Tomas Brage, Charlotte Froese Fischer, & Philip G. Judge.* 445, 457, 138-G7 (1995)

Extreme Ultraviolet Spectroscopy and Photometry of VV Puppis during a High Accretion State. *Stéphane Vennes, Paula Szkody, Edward M. Sion, & Knox S. Long.* 445, 921, 148-A1 (1995)

Interpretation of Anomalous Ultraviolet Transitions of Fe II Observed in Laboratory Fourier Transform Spectra and Stellar *HST* and *IUE* Spectra. *Sveneric Johansson, Tomas Brage, David S. Leckrone, Gillian Nave, & Glenn M. Wahlgren.* 446, 361, 158-C1 (1995)

UV Spectrophotometry of the Hottest Stars from the Southern HK Survey. *John S. Drilling & Timothy C. Beers.* 446, L27, 160-E7 (1995)

UIT and Optical Imagery of Large Magellanic Cloud Associations LH 52 and LH 53: Ages and Initial Mass Function Slopes. *Robert S. Hill, K.-P. Cheng, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 446, 622, 164-F10 (1995)

ORFEUS Observations of G191-B2B: Neutral and Ionized Gas in the Local Interstellar Medium. *M. Hurwitz & S. Bowyer.* 446, 812, 167-C4 (1995)

A Search for a Pulsar in the Remnant of SN 1987A with the *Hubble Space Telescope* High-Speed Photometer. *J. W. Percival, P. T. Boyd, J. D. Biggs, J. F. Dolan, R. C. Bless, J. L. Elliot, M. J. Nelson, E. L. Robinson, M. J. Taylor, G. W. van Citters, & K. G. Wolinski.* 446, 832, 167-E4 (1995)

EUVE Observations of the Anomalous 1993 August Outburst of SS Cygni. *Christopher W. Mauche, John C. Raymond, & Janet A. Mattei.* 446, 842, 167-F7 (1995)

Ultraviolet and Optical Observations of OB Associations in M31. *Jesse K. Hill, Joan E. Isensee, Ralph C. Bohlin, K. P. Cheng, P. M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 98, 595, 31-F10 (1995)

New Insights into Nonradiative Heating in Late A Star Chromospheres. *Frederick M. Walter, Lynn D. Matthews, & Jeffrey L. Linsky.* 447, 353, 177-C6 (1995)

Goddard High-Resolution Spectrograph Observations of the Interacting Binary System W Serpentis. *J. L. Weiland, S. N. Shore, E. A. Beaver, R. W. Lyons, & E. I. Rosenblatt.* 447, 401, 177-G13 (1995)

Tomography/Power Spectrum Techniques for Removal of Fixed Pattern Noise from *Hubble Space Telescope* Spectra. *Cheng-Hsuan Lyu, Frederick C. Bruhweiler, & Andrew M. Smith.* 447, 880, 188-A10 (1995)

The Visual and Ultraviolet Polarimetric Data of α Camelopardalis and κ Cassiopeia: Evidence of Shocked Regions. *Geoffrey K. Fox, John C. Brown, & Karen S. Bjorkman.* 447, 889, 188-B8 (1995)

A Model for the Amorphous Carbon Grains around C-rich Objects. *A. Blanco, S. Fonti, & V. Orofino.* 448, 339, 196-G6 (1995)

High-Speed Photometer Observations of the LMC Pulsar B0540−69. *P. T. Boyd, G. W. van Citters, J. F. Dolan, K. G. Wolinski, J. W. Percival, R. C. Bless, J. L. Elliot, M. J. Nelson, & M. J. Taylor.* 448, 365, 197-B13 (1995)

Hubble Space Telescope and *R*-Band Eclipse Maps of the UX Ursae Majoris Accretion Disk. *R. Baptista, Keith Horne, R. W. Hilditch, K. O. Mason, & J. E. Drew.* 448, 395, 197-E13 (1995)

Atlas of Synthetic Ultraviolet Spectra of Massive Star Populations. *Claus Leitherer, Carmelle Robert, & Timothy M. Heckman.* 99, 173, 36-F1 (1995)

Ultraviolet Observations of SN 1987A with the *IUE* Satellite. *Chun S. J. Pun, Robert P. Kirshner, George Sonneborn, Peter Challis, George Nassiopoulos, Richard Arquilla, D. Michael Crenshaw, Chris Shrader, Terry Teays, Angelo Cassatella, Roberto Gilmozzi, Antonio Talavera, Willem Wamsteker, Claes Fransson, & Nino Panagia.* 99, 223, 37-B13 (1995)

Tomographic Separation of Composite Spectra. III. Ultraviolet Detection of the Hot Companion of ϕ Persei. *Michelle L. Thaller, William G. Bagnuolo, Jr., Douglas R. Gies, & Laura R. Penny.* 448, 878, 207-A10 (1995)

Optical and Ultraviolet Analyses of ZZ Ceti Stars and Study of the Atmospheric Convective Efficiency in DA White Dwarfs. *P. Bergeron, F. Wesemael, R. Lamontagne, G. Fontaine, R. A. Saffer, & N. F. Allard.* 449, 258, 213-F10 (1995)

Far-Ultraviolet (912–1900 Å) Energy Distribution in Early-Type Main-Sequence Stars. *M. Chavez, R. Stalio, & J. B. Holberg.* 449, 280, 214-A7 (1995)

Phase-resolved *IUE* and Optical Observations of the Polar BY Camelopardalis. *D. B. Zucker, J. C. Raymond, A. Silber, P. Mason, S. Curiel, S. Vrtilek, & E. Schlegel.* 449, 310, 214-D1 (1995)

Extreme-Ultraviolet Spectroscopy and Photometry of EQ Pegasi. *Brunella C. Monsignori Fossi, Massimo Landini, Antonella Fruscione, & Jean Dupuis.* 449, 376, 215-C7 (1995)

The *IUE* Spectrum of the "O VI Sequence" Planetary Nebula He 2–55. *Walter A. Feibelman.* 449, L87, 217-D9 (1995)

A Search for *r*-Process Elements in the Vela Supernova Remnant. *George Wallerstein, Andrew D. Vanture, Edward B. Jenkins, & George M. Fuller.* 449, 688, 222-C10 (1995)

Spectroscopic *EUVE* Observations of the Active Star AB Doradus. *Slavek M. Rucinski, Rolf Mewe, Jelle S. Kaastra, Osmi Vilhu, & Stephen M. White.* 449, 900, 225-B11 (1995)

A Study of Ultraviolet Objects near the North Galactic Pole with FAUST. *N. Brosch, E. Almoznino, E. M. Leibowitz, H. Netzer, T. P. Sasseen, S. Bowyer, M. Lampton, & X. Wu.* 450, 137, 230-A1 (1995)

Deuterium and the Local Interstellar Medium Properties for the Procyon and Capella Lines of Sight. *Jeffrey L. Linsky, Athanassios Diplas, Brian E. Wood, Alexander Brown, Thomas R. Ayres, & Blair D. Savage.* 451, 335, 250-E2 (1995)

Ultraviolet Temporal Variability of the Peculiar Star R Aquarii. *S. R. Meier & M. Kafatos.* 451, 359, 250-G5 (1995)

A Search for Microflaring Activity on dMe Flare Stars. I. Observations of the dM8e Star CN Leonis. *R. D. Robinson, K. G. Carpenter, J. W. Percival, & J. A. Bookbinder.* 451, 795, 258-B6 (1995)

A Semiempirical Determination of the Wind Velocity Structure for the Hybrid-Chromosphere Star α Trianguli Australis. *Graham M. Harper, Brian E. Wood, Jeffrey L. Linsky, Philip D. Bennett, Thomas R. Ayres, & Alexander Brown.* 452, 407, 267-F6 (1995)

Discovery of Faint Ultraviolet Sources in the Globular Cluster NGC 6624 with the *Hubble Space Telescope*. *Craig Sosin & Adrienne M. Cool.* 452, L29, 269-F13 (1995)

The *IUE* MEGA Campaign: Wind Variability and Rotation in Early-Type Stars. *D. Massa, A. W. Fullerton, J. S. Nichols, S. P. Owocki, R. K. Prinja, N. St-Louis, A. J. Willis, B. Altner, C. T. Bolton, J. P. Cassinelli, D. Cohen, R. G. Cooper, A. Feldmeier, K. G. Gayley, T. Harries, S. R. Heap, R. N. Henriksen, I. D. Howarth, I. Hubeny, E. Kambe, L. Kaper, G. Koenigsberger, S. Marchenko, S. R. McCandliss, A. F. J. Moffat, T. Nugis, J. Puls, C. Robert, R. E. Schulte-Ladbeck, L. J. Smith, M. A. Smith, W. L. Waldron, & R. L. White.* 452, L53, 270-C8 (1995)

The *IUE* MEGA Campaign: Wind Structure and Variability of HD 50896 (WN5). *Nicole St-Louis, M. J. Dalton, S. V. Marchenko, A. F. J. Moffat, & A. J. Willis.* 452, L57, 270-D3 (1995)

The *IUE* MEGA Campaign: Modulated Structure in the Wind of HD 64760 (B0.5 Ib). *Raman K. Prinja, Derck Massa, & Alexander W. Fullerton.* 452, L61, 270-D13 (1995)

The *IUE* MEGA Campaign: The Rotationally Modulated Wind of ζ Puppis. *Ian D. Howarth, Raman K. Prinja, & Derck Massa.* 452, L65, 270-E6 (1995)

Wind Variability of B Supergiants. I. The Rapid Rotator HD 64760 (B0.5 Ib). *Derck Massa, Raman K. Prinja, & Alexander W. Fullerton.* 452, 842, 276-C7 (1995)

Ultraviolet Observations of the Eruption in the Small Magellanic Cloud Wolf-Rayet System HD 5980. *Gloria Koenigsberger, Ed Guinan, Lawrence Auer, & Leonid Georgiev.* 452, L107, 279-G11 (1995)

C IV and O VI Transitions in the Region $\lambda\lambda$1100–2000 and Examples Found in *IUE* Spectra of Hot Stars. *Walter A. Feibelman & Sveneric Johansson.* 100, 405, 51-F3 (1995)

The *EUVE* and *IUE* Spectra of the Hot DA White Dwarf GD 659. *J. B. Holberg, M. A. Barstow, F. C. Bruhweiler, & E. M. Sion.* 453, 313, 285-D12 (1995)

Simultaneous *Extreme-Ultraviolet Explorer* and Optical Observations of AD Leonis: Evidence for Large Coronal Loops and the Neupert Effect in Stellar Flares. *Suzanne L. Hawley, George H. Fisher, Theodore Simon, Scott L. Cully, Susana E. Deustua, Marek Jablonski, Christopher M. Johns-Krull, Bjørn R. Pettersen, Verne Smith, William J. Spiesman, & Jeffrey Valenti.* 453, 464, 287-D14 (1995)

Extreme Ultraviolet Emission Lines of Fe XIII in Solar and Stellar Spectra. *F. P. Keenan, V. J. Foster, J. J. Drake, S. S. Tayal, & K. G. Widing.* 453, 906, 296-D9 (1995)

Accreting, Isolated Neutron Stars. III. Preheating of Infalling Gas and Cometary H II Regions. *Omer Blaes, Orlando Warren, & Piero Madau.* 454, 370, 304-D3 (1995)

Extreme Ultraviolet Emission from the Millisecond Pulsar J0437–4715. *J. Edelstein, R. S. Foster, & S. Bowyer.* 454, 442, 305-D4 (1995)

Hopkins Ultraviolet Telescope Observations of Six Elliptical and S0 Galaxies. *Thomas H. Brown, Henry C. Ferguson, & Arthur F. Davidsen.* 454, L15, 307-D11 (1995)

A Reconnaissance of the 900–1200 Å Spectra of Early O Stars in the Magellanic Clouds. *Nolan R. Walborn, Knox S. Long, Daniel J. Lennon, & Rolf-Peter Kudritzki.* 454, L27, 307-F9 (1995)

Hopkins Ultraviolet Telescope Observations of U Geminorum Far from Outburst. *Knox S. Long, William P. Blair, & John C. Raymond.* 454, L39, 308-A8 (1995)

Observations of the Ultraviolet-Bright Star in 47 Tucanae with the Hopkins Ultraviolet Telescope. *W. Van Dyke Dixon, Arthur F. Davidsen, & Henry C. Ferguson.* 454, L47, 308-B9 (1995)

New Far-Ultraviolet Intrinsic Spectral Fluxes of Hot Stars and Their Photospheric Temperatures. *Richard H. Buss, Jr., J. W. Kruk, & H. C. Ferguson.* 454, L55, 308-C12 (1995)

Simultaneous Observation of Direct and Raman-scattered O VI Lines in the Symbiotic Nova RR Telescopii. *Brian R. Espey, Regina E. Schulte-Ladbeck, Gerard A. Kriss, Fred Hamann, Hans M. Schmid, & Joni J. Johnson.* 454, L61, 308-D8 (1995)

Terminal Velocities and the Bistability of Stellar Winds. *Henny J. G. L. M. Lamers, Theodore P. Snow, & Douglas M. Lindholm.* 455, 269, 321-G7 (1995)

A Non-LTE Analysis of the ζ Aurigae B-Type Secondary. I. Determination of the Fundamental Stellar Parameters. *Philip D. Bennett, Alexander Brown, & Jeffrey L. Linsky.* 455, 317, 322-D14 (1995)

Hot White Dwarfs in the Local Interstellar Medium: Hydrogen and Helium Interstellar Column Densities and Stellar Effective Temperatures from *Extreme-Ultraviolet Explorer* Spectroscopy. *Jean Dupuis, Stéphane Vennes, Stuart Bowyer, Anil K. Pradhan, & Peter Thejll.* 455, 574, 329-G3 (1995)

VIDEOTAPES

The Void Spectrum in Two-dimensional Numerical Simulations of Gravitational Clustering. *Guinevere Kauffmann & Adrian L. Melott.* 393, 415, 121-B1 (1992)

The Three-Point Function in an Ensemble of Numerical Simulations. *J. N. Fry, Adrian L. Melott, & Sergei F. Shandarin.* 393, 431, 121-C5 (1992)

Coherent Structures in the Universe and the Adhesion Model. *Lev Kofman, Dmitri Pogosyan, Sergei F. Shandarin, & Adrian L. Melott.* 393, 437, 121-D1 (1992)

Percolation Analysis of Nonlinear Structures in Scale-free Two-dimensional Simulations. *Kurt G. Dominik & Sergei F. Shandarin.* 393, 450, 121-E1 (1992)

Transformations of Galaxies. I. Mergers of Equal-Mass Stellar Disks. *Joshua E. Barnes.* 393, 484, 121-G9 (1992)

Off-Center Nuclei in Galaxies. *R. H. Miller & B. F. Smith.* 393, 508, 122-B7 (1992)

Three-dimensional Hydrodynamic Simulations of Narrow-Angle–Tail Radio Sources. I. The Begelman, Rees, and Blandford Model. *Dinshaw S. Balsara & Michael L. Norman.* 393, 631, 123-F3 (1992)

On the Differences between Plage and Quiet Sun in the Solar Photosphere. *Alan M. Title, Kenneth P. Topka, Theodore D. Tarbell, Wolfgang Schmidt, Christiaan Balke, & Göran Scharmer.* 393, 782, 125-E1 (1992)

A Simulation Atlas of Tidal Features in Galaxies. *Sethanne Howard, William C. Keel, Gene Byrd, & Jordan Burkey.* 417, 502, 225-E8 (1993)

Numerical Simulations of Shock-driven Accretion. *M. Różyczka & H. C. Spruit.* 417, 677, 227-G1 (1993)

The Coronal Structure above Sunspots and Pores. *R. Harmon, R. Rosner, H. Zirin, E. Spiller, & L. Golub.* 417, L83, 230-E1 (1993)

Simulation of the Instability of Mach 2 and Mach 4 Gaseous Jets in Two and Three Dimensions. *Gene M. Bassett & Paul R. Woodward.* 441, 582, 70-B1 (1995)

A Turbulent Model for the Interstellar Medium. I. Threshold Star Formation and Self-Gravity. *Enrique Vázquez-Semadeni, Thierry Passot, & Annick Pouquet.* 441, 702, 71-F1 (1995)

Theoretical Overview and Modeling of the Sodium and Potassium Atmospheres of Mercury. *William H. Smyth & M. L. Marconi.* 441, 839, 73-E12 (1995)

Emerging Flux Tubes in the Solar Convection Zone. I. Asymmetry, Tilt, and Emergence Latitude. *P. Caligari, F. Moreno-Insertis, & M. Schüssler.* 441, 886, 74-B12 (1995)

Magnetoconvection Dynamics in a Stratified Layer. I. Two-dimensional Simulations and Visualization. *Steven R. Lantz & R. N. Sudan.* 441, 903, 74-D4 (1995)

Magnetoconvection Dynamics in a Stratified Layer. II. A Low-Order Model of the Tilting Instability. *Steven R. Lantz.* 441, 925, 74-F2 (1995)

Nonlinear Hydrodynamics of Cosmological Sheets. II. Fragmentation and the Gravitational, Cooling, and Thin-Shell Instabilities. *Wenbo Y. Anninos, Michael L. Norman, & Peter Anninos.* 450, 1, 228-B1 (1995)

Gravitational Microlensing by Random Motion of Stars: Analysis of Light Curves. *Joachim Wambsganss & Tomislav Kundić.* 450, 19, 228-C11 (1995)

High-Resolution Observation of Disk Spicules. I. Evolution and Kinematics of Spicules in the Enhanced Network. *Yoshinori Suematsu, Haimin Wang, & Harold Zirin.* 450, 411, 233-E12 (1995)

The Role of Magnetic Reconnection in Chromospheric Eruptions. *Judith T. Karpen, Spiro K. Antiochos, & C. Richard DeVore.* 450, 422, 233-G3 (1995)

The Structure of the Io Torus. *Nicholas M. Schneider & John T. Trauger.* 450, 450, 234-B13 (1995)

WAVE MOTIONS

Nonaxisymmetric Instabilities in Rotating Shear Flows: Internal Gravity Modes in Stratified Media and Analogies with Plane Flows. *P. Ghosh & M. A. Abramowicz.* 366, 221, 3-F13 (1991)

Coronal Loop Heating by Wave-Particle Interactions. *Altair S. de Assis & King H. Tsui.* 366, 324, 5-B1 (1991)

Scattering of Acoustic Waves from a Magnetic Flux Tube Embedded in a Radiating Fluid. *T. J. Bogdan & M. Knölker.* 369, 219, 38-F1 (1991)

Spectral Distortions of the Microwave Background Radiation Resulting from the Damping of Pressure Waves. *R. A. Daly.* 371, 14, 60-C3 (1991)

Viscosity and Inertia in Cosmic-Ray Transport: Effects of an Average Magnetic Field. *L. L. Williams & J. R. Jokipii.* 371, 639, 69-E3 (1991)

Heating Solar Coronal Holes. *E. N. Parker.* 372, 719, 84-E11 (1991)

Coronal Proton Transport in the Presence of Alfvén Waves and Implications for Gamma-Ray Burst Models. *D. F. Smith & S. H. Brecht.* 373, 289, 89-E9 (1991)

Measurements of High-Frequency Solar Oscillation Modes. *T. L. Duvall, Jr., J. W. Harvey, S. M. Jefferies, & M. A. Pomerantz.* 373, 308, 89-G1 (1991)

Magnetohydrodynamic Turbulence Dissipation and Stochastic Proton Acceleration in Solar Flares. *James A. Miller.* 376, 342, 129-B11 (1991)

The Phase Mixing of Alfvén Waves, Coordinated Modes, and Coronal Heating. *E. N. Parker.* 376, 355, 129-C11 (1991)

Li Depletion in F Stars by Internal Gravity Waves. *Ramón J. García López & Hendrik C. Spruit.* 377, 268, 141-C7 (1991)

Alfvén Wave Trapping, Network Microflaring, and Heating in Solar Coronal Holes. *R. L. Moore, Z. E. Musielak, S. T. Suess, & C.-H. An.* 378, 347, 155-C5 (1991)

Diskoseismology: Probing Accretion Disks. I. Trapped Adiabatic Oscillations. *Michael A. Nowak & Robert V. Wagoner.* 378, 656, 160-E9 (1991)

A Mechanism for Gamma-Ray Bursts by Alfvén-Wave Acceleration in a Nonuniform Atmosphere. *K. A. Holcomb & T. Tajima.* 378, 682, 160-G10 (1991)

Multiple Scattering of Acoustic Waves by a Pair of Uniformly Magnetized Flux Tubes. *Thomas J. Bogdan & David C. Fox.* 379, 758, 174-B10 (1991)

Emission at Cyclotron Harmonics Due to Coalescence of z-Mode Waves. *D. B. Melrose.* 380, 256, 179-C1 (1991)

Propagation of Magnetoacoustic Waves in the Solar Atmosphere with Random Inhomogeneities of Density and Magnetic Fields. *M. Ryutova, M. Kaisig, & T. Tajima.* 380, 268, 179-D1 (1991)

WAVES

Orbital Evolution of Bodies Crossing Disks Due to Density and Bending Wave Excitation. *Pawel Artymowicz.* 423, 581, 55-F8 (1994)

Linear Wave Propagation in Mildly Relativistic Thermal Pair Plasmas. *Paola Pietrini & Julian H. Krolik.* 423, 693, 57-B13 (1994)

Electron Injection and Acceleration at Nonlinear Shocks: Results of Numerical Simulations. *Amir Levinson.* 426, 327, 100-C1 (1994)

Properties of Acoustic Sources in the Sun. *Pawan Kumar.* 428, 827, 140-E7 (1994)

Stellar Winds with Non-WKB Alfvén Waves. I. Wind Models for Solar Coronal Conditions. *K. B. MacGregor & P. Charbonneau.* 430, 387, 164-A9 (1994)

Gravitational Damping of Alfvén Waves in Stellar Atmospheres and Winds. *I. K. Khabibrakhmanov & D. J. Mullan.* 430, 814, 172-A7 (1994)

Acoustic Instability Driven by Cosmic-Ray Streaming. *Mitchell C. Begelman & Ellen G. Zweibel.* 431, 689, 187-B6 (1994)

Stochastic Reacceleration of Cosmic Rays in the Interstellar Medium. *E. S. Seo & V. S. Ptuskin.* 431, 705, 187-C10 (1994)

Shock Propagation and the Generation of Magnetohydrodynamic Wave Fields in Inhomogeneous Molecular Clouds. *Mark S. Miesch & Ellen G. Zweibel.* 432, 622, 203-F9 (1994)

Chromospheric Heating and Metal Deficiency in Cool Giants: Theoretical Results versus Observations. *M. Cuntz, W. Rammacher, & P. Ulmschneider.* 432, 690, 204-E12 (1994)

Waves and Instabilities of a Toroidal Magnetic Flux Tube in a Rotating Star. *A. Ferriz-Mas & M. Schüssler.* 433, 852, 221-F10 (1994)

Use of Acoustic Wave Travel-Time Measurements to Probe the Near-Surface Layers of the Sun. *S. M. Jefferies, Y. Osaki, H. Shibahashi, T. L. Duvall, Jr., J. W. Harvey, & M. A. Pomerantz.* 434, 795, 238-G6 (1994)

The Possible Role of MHD Waves in Heating the Solar Corona. *Lisa J. Porter, James A. Klimchuk, & Peter A. Sturrock.* 435, 482, 250-B1 (1994)

The Possible Role of High-Frequency Waves in Heating Solar Coronal Loops. *Lisa J. Porter, James A. Klimchuk, & Peter A. Sturrock.* 435, 502, 250-C10 (1994)

Simulation of Interactions of an Orbiting Compact Star with an Accretion Disk by Smoothed Particle Hydrodynamics. *Diego Molteni, G. Gerardi, & Sandip K. Chakrabarti.* 436, 249, 264-F1 (1994)

Multiple Scattering and Resonant Absorption of p-Modes by Fibril Sunspots. *R. Keppens, T. J. Bogdan, & M. Goossens.* 436, 372, 266-E2 (1994)

The Effects of a Hot Outer Atmosphere on Acoustic-Gravity Waves. *Bradley W. Hindman & Ellen G. Zweibel.* 436, 929, 278-D11 (1994)

On the Dynamics of Warped Accretion Disks. *J. C. B. Papaloizou & D. N. C. Lin.* 438, 841, 15-G2 (1995)

Alfvén Waves in Interstellar Gasdynamics. *Christopher F. McKee & Ellen G. Zweibel.* 440, 686, 52-F2 (1995)

On Magnetic Turbulence in Interstellar Clouds. *P. C. Myers & V. K. Khersonsky.* 442, 186, 79-F9 (1995)

Gravity Waves in the Lower Solar Corona. *Yu-Qing Lou.* 442, 401, 82-E1 (1995)

Contact and Pressure Balance Structures in Two-Fluid Cosmic-Ray Hydrodynamics. *G. M. Webb, M. Brio, G. P. Zank, & T. Story.* 442, 822, 91-E2 (1995)

A Numerical Study of Resonant Absorption in a Magnetohydrodynamic Cavity Driven by a Broadband Spectrum. *Andrew N. Wright & Graham J. Rickard.* 444, 458, 119-G13 (1995)

Coronal Heating by the Resonant Absorption of Alfvén Waves: Wavenumber Scaling Laws. *L. Ofman, J. M. Davila, & R. S. Steinolfson.* 444, 471, 120-B1 (1995)

Nonlinear Alfvén Wave Propagation in Nonhomogeneous Collisionless Media. *Ildar K. Khabibrakhmanov & Danny Summers.* 444, 796, 127-D9 (1995)

Acoustic Wave Propagation in the Solar Atmosphere. I. Rediscussion of the Linearized Theory Including Nonstationary Solutions. *Zhengzhi Wang, Roger K. Ulrich, & Ferdinand V. Coroniti.* 444, 879, 128-E10 (1995)

Hydromagnetic Waves and the Linewidth-Size Relation in Interstellar Molecular Clouds. *Telemachos Ch. Mouschovias & Dimitrios Psaltis.* 444, L105, 131-A8 (1995)

Magnetic Interchange Instability in Accretion Disks. *Stephen H. Lubow & Hendrik C. Spruit.* 445, 337, 137-B9 (1995)

Gradual Approach to Coalescence for Compact Stars Orbiting Massive Black Holes. *Dieter Hils & Peter L. Bender.* 445, L7, 140-B10 (1995)

Gravity Wave–induced Polarization of the Cosmic Microwave Background Radiation. *Ka Lok Ng & Kin-Wang Ng.* 445, 521, 142-C1 (1995)

Alfvén Turbulence Dissipation in Proton Injection and Acceleration in Solar Flares. *Dean F. Smith & James A. Miller.* 446, 390, 158-E12 (1995)

Nonlinear Evolution of Internal Gravity Waves in Cluster Cooling Flows. *Eric A. Lufkin, Steven A. Balbus, & John F. Hawley.* 446, 529, 163-D5 (1995)

Fokker-Planck Equations of Stochastic Acceleration: Green's Functions and Boundary Conditions. *Brian T. Park & Vahé Petrosian.* 446, 699, 165-F10 (1995)

Instabilities in Photoionized Interstellar Gas. *Edvige Corbelli & Andrea Ferrara.* 447, 708, 185-G1 (1995)

"Steady" and "Fluctuating" Parts of the Sun's Internal Magnetic Field: Improved Model. *K. M. Hiremath & M. H. Gokhale.* 448, 437, 198-B12 (1995)

Magnetohydrodynamic Waves in a Bounded Inhomogeneous Medium with Prominence-Corona Properties. *R. Oliver & J. L. Ballester.* 448, 444, 198-C8 (1995)

On the Generation of Flux-Tube Waves in Stellar Convection Zones. II. Improved Treatment of Longitudinal Tube Wave Generation. *Z. E. Musielak, R. Rosner, H. P. Gail, & P. Ulmschneider.* 448, 865, 206-G7 (1995)

Detectability of Electrostatic Decay Products in *Ulysses* and *Galileo* Observations of Type III Solar Radio Sources. *Iver H. Cairns.* 449, L95, 217-E8 (1995)

Millisecond Pulsars: Detectable Sources of Continuous Gravitational Waves? *Kimberly C. B. New, G. Chanmugam, Warren W. Johnson, & Joel E. Tohline.* 450, 757, 241-B9 (1995)

The Effects on Mass Flows on the Dissipation of Alfvén Waves in the Upper Layers of the Solar Atmosphere. *Margarita P. Ryutova & Shadia R. Habbal.* 451, 381, 251-B7 (1995)

Klein-Gordon Equation and the Local Critical Frequency for Alfvén Waves Propagating in an Isothermal Atmosphere. *Z. E. Musielak & R. L. Moore.* 452, 434, 268-A11 (1995)

Coronal Loop Oscillations Driven by Footpoint Motions: Analytical Results for a Model Problem. *David Berghmans & Peter De Bruyne.* 453, 495, 287-G10 (1995)

Jacket Modes: Solar Acoustic Oscillations Confined to Regions Surrounding Sunspots and Plage. *T. J. Bogdan & P. S. Cally.* 453, 919, 296-F1 (1995)

Ion Acoustic Wave Frequencies and Onset Times during Type III Solar Radio Bursts. *Iver H. Cairns & P. A. Robinson.* 453, 959, 297-C1 (1995)

Coronal Heating and Solar Wind Energy Balance. *Ørnulf Sandbæk & Egil Leer.* 454, 486, 306-A7 (1995)

Stellar Winds with Non-WKB Alfvén Waves. II. Wind Models for Cool, Evolved Stars. *P. Charbonneau & K. B. MacGregor.* 454, 901, 314-C3 (1995)

The Damping of Compressional Alfvén Waves near Magnetic Cusp Configurations. *R. A. Scheper & A. B. Hassam.* 455, 693, 331-D11 (1995)

X-RAYS: BINARIES

The Orbital Ephemeris and Eclipse Transitions of the Low-Mass X-Ray Binary EXO 0748−676. *A. N. Parmar, A. P. Smale, F. Verbunt, & R. H. D. Corbet.* 366, 253, 4-B9 (1991)

Neutron Star Crustal Plate Tectonics. I. Magnetic Dipole Evolution in Millisecond Pulsars and Low-Mass X-Ray Binaries. *M. Ruderman.* 366, 261, 4-C5 (1991)

Spectroscopy of FO Aquarii: Evidence for Reprocessing in a Hot Wind. *Phillip J. Martell & Ronald H. Kaitchuck.* 366, 286, 4-E5 (1991)

Sigma Observation of the Pulsar OAO 1657−415: Precise Localization at Hard X-Ray Energy and Discovery of Spin-down. *S. Mereghetti, J. Ballet, A. Lambert, P. Mandrou, L. Natalucci, J. Paul, J. P. Roques, L. Salotti, M. Gilfanov, R. Sunyaev, G. Babalyan, E. Churazov, N. Khavenson, A. Kuznetsov, D. Stepanov, & S. Yunin.* 366, L23, 6-C11 (1991)

Birthrates of Galactic Millisecond Pulsars and Their Low-Mass X-Ray Binary Precursors. *Marco Tavani.* 366, L27, 6-D1 (1991)

"Superlow-State" Hard X-Ray Observation of Cygnus X-1. *P. Ubertini, A. Bazzano, F. Perotti, E. Quadrini, A. Court, A. J. Dean, N. Dipper, R. Lewis, L. Bassani, & J. B. Stephen.* 366, 544, 9-G1 (1991)

Application of a General Relativistic Accretion Disk Model to LMC X-1, LMC X-3, X1608−522, and X1636−536. *Ken Ebisawa, Kazuhisa Mitsuda, & Tomoyuki Hanawa.* 367, 213, 14-F8 (1991)

Ginga Observation of an AM Herculis Type Source H0538+608. *M. Ishida, A. Silber, H. V. Bradt, R. A. Remillard, K. Makishima, & T. Ohashi.* 367, 270, 15-D6 (1991)

Conditions for Accretion-induced Collapse of White Dwarfs. *Ken'ichi Nomoto & Yoji Kondo.* 367, L19, 17-D1 (1991)

Structure of Thermal Pair Clouds around Gamma-Ray–emitting Black Holes. *Edison P. Liang.* 367, 470, 19-C1 (1991)

Accretion Powered Pulsars: Continuum Spectra and Light Curves of Settling Accretion Mounds. *David J. Burnard, Jonathan Arons, & Richard I. Klein.* 367, 575, 20-D10 (1991)

On the Detectability of Pulsars in Close Binary Systems. *Helen M. Johnston & Shrinivas R. Kulkarni.* 368, 504, 31-D1 (1991)

Accretion Mechanisms in the Be/X-Ray Transient System A0535+26. *C. Motch, L. Stella, E. Janot-Pacheco, & M. Mouchet.* 369, 490, 43-G5 (1991)

X-Ray Echoes from Gamma-Ray Bursts. *Charles D. Dermer, Kevin C. Hurley, & Dieter H. Hartmann.* 370, 341, 51-E1 (1991)

Problems of Ultra–High-Energy Particle Acceleration in Cygnus X-3: A Critical Reappraisal. *Abhas Mitra.* 370, 345, 51-E7 (1991)

Multimission Observations of 4U 1538−52. *L. R. Cominsky & F. Moraes.* 370, 670, 56-F10 (1991)

The Ultraviolet Spectrum of Scorpius X-1 as Observed by *IUE*: 1978–1988. *T. R. Kallman, J. C. Raymond, & S. D. Vrtilek.* 370, 717, 57-C11 (1991)

The Discovery of an X-Ray Burst and a Study of Aperiodic Variability from SMC X-1. *L. Angelini, L. Stella, & N. E. White.* 371, 332, 64-C1 (1991)

Enhanced Winds and Tidal Streams in Massive X-Ray Binaries. *John M. Blondin, Ian R. Stevens, & Timothy R. Kallman.* 371, 684, 70-B1 (1991)

Accretion in Wind-driven X-Ray Sources. *Ronald E. Taam, Albert Fu, & B. A. Fryxell.* 371, 696, 70-C1 (1991)

Magnetic Two-Photon Scattering and Two-Photon Emission: Cross Sections and Redistribution Functions. *S. G. Alexander & P. Mészáros.* 372, 554, 82-E11 (1991)

Cyclotron Harmonics in Accreting Pulsars and Gamma-Ray Bursters: Effect of Two-Photon Processes. *S. G. Alexander & P. Mészáros.* 372, 565, 82-F9 (1991)

Stationary Accelerators around Keplerian Disks of Aligned Magnetized Collapsed Objects: Pair Production and Gamma-Ray Emission. *K. S. Cheng & M. Ruderman.* 373, 187, 88-C9 (1991)

The Near-Infrared Spectra of Low-Mass X-Ray Binaries and Related Objects. *A. P. Cowley, P. C. Schmidtke, D. Crampton, J. B. Hutchings, & M. Bolte.* 373, 228, 88-G1 (1991)

Observations of Ultra–High-Energy Photons from Cygnus X-3. *Y. Muraki, S. Shibata, T. Aoki, K. Mitsui, A. Okada, Y. Ohashi, K. Kobayakawa, H. Kojima, T. Kitamura, Y. Kato, T. Takahashi, & I. Nakamura.* 373, 657, 96-B4 (1991)

Changes in the 11 Minute Period of 4U 1820−30. *J. Tan, E. Morgan, W. H. G. Lewin, W. Penninx, M. van der Klis, J. van Paradijs, K. Makishima, H. Inoue, T. Dotani, & K. Mitsuda.* 374, 291, 101-F6 (1991)

The Effects of X-Ray Illumination on Accretion Disk Interiors. *Yuan-Kuen Ko & Timothy R. Kallman.* 374, 721, 108-A10 (1991)

A Jet Model for a Very High State of GX 339−4. *Sigenori Miyamoto & Shunji Kitamoto.* 374, 741, 108-C6 (1991)

X-Ray to Infrared Observations of the AM Herculis System E1405−451 (V834 Centauri). *R. M. Sambruna, L. Chiappetti, A. Treves, J. M. Bonnet-Bidaud, P. Bouchet, L. Maraschi, C. Motch, & M. Mouchet.* 374, 744, 108-C10 (1991)

Detection of Coherent 7.6 Hz Oscillations during a Burst from Aquila X-1. *R. J. Schoelkopf & R. L. Kelley.* 375, 696, 121-D1 (1991)

Flares in the X-Ray Source EXO 2030+375. *Krishna M. V. Apparao.* 375, 701, 121-D7 (1991)

Cyclotron Line Features in the Spectrum of the Transient X-Ray Pulsar X0115+634. *F. Nagase, T. Dotani, Y. Tanaka, K. Makishima, T. Mihara, T. Sakao, H. Tsunemi, S. Kitamoto, K. Tamura, A. Yoshida, & H. Nakamura.* 375, L49, 124-B11 (1991)

The X-Ray Properties of GX 301−2 (4U 1223−62). *F. Haberl.* 376, 245, 128-A5 (1991)

Optical Emission Enhancements in Be Stars. *Krishna M. V. Apparao.* 376, 256, 128-B3 (1991)

Observations of Scorpius X-1 with *IUE*: Ultraviolet Results from a Multiwavelength Campaign. *S. D. Vrtilek, W. Penninx, J. C. Raymond, F. Verbunt, P. Hertz, K. Wood, W. H. G. Lewin, & K. Mitsuda.* 376, 278, 128-D1 (1991)

SMM/HXRBS Observations of Cygnus X-1 from 1986 December to 1988 April. *R. A. Schwartz, L. E. Orwig, B. R. Dennis, J. C. Ling, & W. A. Wheaton.* 376, 312, 128-G1 (1991)

Mayflower Mine 1500 GV Detector: Cosmic-Ray Anisotropy and Search for Cygnus X-3. *D. J. Cutler & D. E. Groom.* 376, 322, 128-G12 (1991)

Collisions of Giant Stars with Compact Objects: Hydrodynamical Calculations. *Frederic A. Rasio & Stuart L. Shapiro.* 377, 559, 146-F1 (1991)

On the Nature and Evolution of the Windy Binary Pulsar PSR 1744−24A. *Jacob Shaham & Marco Tavani.* 377, 588, 147-A11 (1991)

On Spectra of X-Ray Bursters in the Expansion Phase. *I. I. Lapidus.* 377, L93, 150-E1 (1991)

The *Einstein* Objective Grating Spectrometer Survey of Galactic Binary X-Ray Sources. *S. D. Vrtilek, J. E. McClintock, F. D. Seward, S. M. Kahn, & B. J. Wargelin.* 76, 1127, 41-C1 (1991)

Turbulence, Convection, and Stability in Accretion Disks. *César Meirelles Filho.* 378, 266, 154-C4 (1991)

A Model for the 35 Day Variations in the Pulse Profile of Hercules X-1. *J. A. Petterson, R. E. Rothschild, & D. E. Gruber.* 378, 696, 161-A11 (1991)

A New Candidate Orbital Period for KO Velorum (E1013−477). *K. Mukai & R. H. D. Corbet.* 378, 701, 161-B3 (1991)

Searches for Millisecond Pulsations in Low-Mass X-Ray Binaries. *K. S. Wood, J. P. Norris, P. Hertz, B. A. Vaughan, P. F. Michelson, K. Mitsuda, W. H. G. Lewin, J. van Paradijs, W. Penninx, & M. van der Klis.* 379, 295, 166-F9 (1991)

X-Ray–illuminated Stellar Winds: Optically Thick Wind Models for Massive X-Ray Binaries. *Ian R. Stevens.* 379, 310, 167-A1 (1991)

Can Neutron Stars Ablate Their Companions? *Amir Levinson & David Eichler.* 379, 359, 167-E1 (1991)

Discovery with the Sigma Telescope of Hard X-Rays from the Globular Cluster Terzan 2. *D. Barret, S. Mereghetti, J. P. Roques, P. Mandrou, L. Salotti, F. Lebrun, Ph. Laurent, J. Ballet, E. Churazov, M. Gifanov, R. Sunyaev, N. Khavenson, I. Chulkov, B. Novikov, A. Kuznetzov, & A. Dyachkov.* 379, L21, 169-C1 (1991)

UBVRI Photometry of Stars in the Fields of X-Ray Selected BL Lacertae Objects. *Paul S. Smith, Buell T. Jannuzi, & Richard Elston.* 77, 67, 44-D1 (1991)

The Eclipsing AM Herculis Variable H1907+690. *R. A. Remillard, B. A. Stroozas, S. Tapia, & A. Silber.* 379, 715, 173-E13 (1991)

Discovery of a Cyclotron Resonance Feature at 30 keV from the Transient X-Ray Pulsar Cepheus X-4. *T. Mihara, K. Makishima, S. Kamijo, T. Ohashi, F. Nagase, Y. Tanaka, & K. Koyama.* 379, L61, 175-C6 (1991)

Discovery of Periodic Eclipses in the X-Ray Pulsar 1H 0253+193. *Yuichi Kamata, Yuzuru Tawara, & Katsuji Koyama.* 379, L65, 175-C13 (1991)

"Hidden" Millisecond Pulsars. *Marco Tavani.* 379, L69, 175-D5 (1991)

LMC X-4: *Ginga* Observations and Search for Orbital Period Changes. *A. Levine, S. Rappaport, A. Putney, R. Corbet, & F. Nagase.* 381, 101, 190-C7 (1991)

A Model of Pulsed Gamma Radiation from the X-Ray Binary Hercules X-1/HZ Herculis. *F. A. Aharonian & A. M. Atoyan.* 381, 220, 191-F8 (1991)

A Search for the 2.223 MeV Neutron Capture Gamma-Ray Line from the Directions of Cygnus and the Galactic Center. *Michael J. Harris & Gerald H. Share.* 381, 439, 196-B10 (1991)

Discovery of a Long-Term Periodic Variation in LMC X-3. *A. P. Cowley, P. C. Schmidtke, K. Ebisawa, F. Makino, R. A. Remillard, D. Crampton, J. B. Hutchings, S. Kitamoto, & A. Treves.* 381, 526, 197-C1 (1991)

N III Line Emission in Planetary Nebulae: Not Bowen Fluorescence. *S. O. Kastner & A. K. Bhatia.* 381, L59, 199-D7 (1991)

Polarization Properties of Emission Lines from Relativistic Accretion Disks. *Kaiyou Chen & Douglas M. Eardley.* 382, 125, 201-F10 (1991)

Low-Flux Hard X-Ray Observation of Cygnus X-1. *P. Ubertini, A. Bazzano, C. La Padula, R. K. Manchanda, V. F. Polcaro, R. Staubert, E. Kendziorra, & F. Perotti.* 383, 263, 215-D9 (1991)

Spectral Signatures of the MeV–PeV Radiation from Accreting Neutron Stars. *B. Rudak & P. Mészáros.* 383, 269, 215-E3 (1991)

The Radio "Lobes" of Scorpius X-1 Are Unrelated Background Sources. *E. B. Fomalont & B. J. Geldzahler.* 383, 289, 215-G1 (1991)

Decrease in the Orbital Period of Hercules X-1. *John E. Deeter, Paul E. Boynton, Sigenori Miyamoto, Shunji Kitamoto, Fumiaki Nagase, & Nobuyuki Kawai.* 383, 324, 216-C1 (1991)

Evolution of Compact Binary Systems with X-Ray Heating. *Amos Harpaz & Saul Rappaport.* 383, 739, 223-D3 (1991)

X-Ray Variability of GX 339−4 in Its Very High State. *Sigenori Miyamoto, Kazuhiro Kimura, Shunji Kitamoto, Tadayasu Dotani, & Ken Ebisawa.* 383, 784, 224-A3 (1991)

A Study of the Hα Line in X1735−444. *Alan P. Smale & Robin H. D. Corbet.* 383, 853, 224-G6 (1991)

OSSE Observations of GX 339−4. *D. A. Grabelsky, S. M. Matz, W. R. Purcell, M. P. Ulmer, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, & G. V. Jung.* 441, 800, 73-A6 (1995)

X-RAYS: BURSTS

Monte Carlo Simulation of Comptonization in Plasma Accreting onto Neutron Stars. *Tomoyuki Hanawa.* 366, 495, 9-B9 (1991)

The Discovery of an X-Ray Burst and a Study of Aperiodic Variability from SMC X-1. *L. Angelini, L. Stella, & N. E. White.* 371, 332, 64-C1 (1991)

Accretion in Wind-driven X-Ray Sources. *Ronald E. Taam, Albert Fu, & B. A. Fryxell.* 371, 696, 70-C1 (1991)

Detection of Coherent 7.6 Hz Oscillations during a Burst from Aquila X-1. *R. J. Schoelkopf & R. L. Kelley.* 375, 696, 121-D1 (1991)

Flares in the X-Ray Source EXO 2030+375. *Krishna M. V. Apparao.* 375, 701, 121-D7 (1991)

Model Atmospheres and X-Ray Spectra of Bursting Neutron Stars. *Jerzy Madej.* 376, 161, 127-A4 (1991)

Magnetohydrodynamics of an Impulsively Heated, Hard X-Ray Emitting Filament. *George Roumeliotis & A. Gordon Emslie.* 377, 685, 148-B9 (1991)

On Spectra of X-Ray Bursters in the Expansion Phase. *I. I. Lapidus.* 377, L93, 150-E1 (1991)

X-Ray Detectability of Gamma-Ray Bursts from M31. *Edison P. Liang.* 380, L55, 188-B11 (1991)

Thermal Structure of Neutron Stars with Very Low Accretion Rates. *J. L. Zdunik, P. Haensel, B. Paczyński, & J. Miralda-Escudé.* 384, 129, 2-E12 (1992)

The Fate of Accreted CNO Elements in Neutron Star Atmospheres: X-Ray Bursts and Gamma-Ray Lines. *Lars Bildsten, Edwin E. Salpeter, & Ira Wasserman.* 384, 143, 2-G1 (1992)

Disk Instability and Outburst Properties of the Intermediate Polar GK Persei. *Soon-Wook Kim, J. Craig Wheeler, & Shin Mineshige.* 384, 269, 4-C7 (1992)

Radiation Dynamics in X-Ray Binaries. I. Type 1 Bursts. *Mark A. Walker.* 385, 642, 21-B1 (1992)

Radiation Dynamics in X-Ray Binaries. II. Type 2 Bursts. *Mark A. Walker.* 385, 651, 21-B12 (1992)

Radiation Dynamics in X-Ray Binaries. III. Extremely Compact Objects. *Mark A. Walker.* 385, 661, 21-C10 (1992)

Transitions from Metastable Levels Emitted during Short-Duration Bursts: How Valid Are Their Calculated Intensities? *Uri Feldman.* 385, 758, 22-E1 (1992)

Light Curves of Rotating, Oscillating Neutron Stars. *T. E. Strohmayer.* 388, 138, 50-F9 (1992)

CNO Destruction by Spallation and Type I X-Ray Bursts. *Jason C. Tillett & James MacDonald.* 388, 555, 57-B7 (1992)

The X-Ray Outburst from X0115+634 in 1990 February. *Keisuke Tamura, Hiroshi Tsunemi, Shunji Kitamoto, Kiyoshi Hayashida, & Fumiaki Nagase.* 389, 676, 69-G1 (1992)

Characteristics of Hard X-Ray Spectra of Impulsive Solar Flares. *G. A. Dulk, A. L. Kiplinger, & R. M. Winglee.* 389, 756, 70-F11 (1992)

Thermonuclear Flash Model for Long X-Ray Tails from Aquila X-1. *Ikko Fushiki, Ronald E. Taam, S. E. Woosley, & D. Q. Lamb.* 390, 634, 83-B9 (1992)

Canonical Time Variations of X-Rays from Black Hole Candidates in the Low-Intensity State. *Sigenori Miyamoto, Shunji Kitamoto, Sayuri Iga, Hitoshi Negoro, & Kentaro Terada.* 391, L21, 92-B1 (1992)

Sigma Detection of Hard X-Ray Emission from the Soft Transient Type I X-Ray Burster KS 1731−260. *D. Barret, L. Bouchet, P. Mandrou, J. P. Roques, B. Cordier, Ph. Laurent, F. Lebrun, J. Paul, R. Sunyaev, E. Churazov, M. Gilfanov, A. Diachkov, N. Khavenson, B. Novikov, I. Chulkov, & A. Kuznetsov.* 394, 615, 137-B1 (1992)

Radiative-hydrodynamical Simulations of X-Ray Burst–induced Accretion Disk Coronae. *Fulvio Melia, Gregory J. Zylstra, & Bruce Fryxell.* 396, L27, 160-E8 (1992)

Stochastic Acceleration of Electrons. I. Effects of Collisions in Solar Flares. *Russell J. Hamilton & Vahé Petrosian.* 398, 350, 186-B5 (1992)

An Interpretation of the Multipeaked Structure in X-Ray Bursts. *Fulvio Melia & Gregory J. Zylstra.* 398, L53, 188-A1 (1992)

X-Ray Flashes from M31 Based on Extended Halo Models of Gamma-Ray Bursts. *Hui Li & Edison P. Liang.* 400, L59, 220-D3 (1992)

An Instability Associated with a Magnetosphere-Disk Interaction. *H. C. Spruit & Ronald E. Taam.* 402, 593, 10-A5 (1993)

Can We Observe Accreting, Isolated Neutron Stars? *Omer Blaes & Piero Madau.* 403, 690, 24-C8 (1993)

Relativistic Frequency-dependent Transfer in Spherical Flows. I. Method and Numerical Tests. *Luciano Nobili, Roberto Turolla, & Luca Zampieri.* 404, 686, 37-D12 (1993)

Successive X-Ray Bursts from Accreting Neutron Stars. *Ronald E. Taam, S. E. Woosley, T. A. Weaver, & D. Q. Lamb.* 413, 324, 160-C8 (1993)

Detection of an Ultraviolet and Visible Counterpart of the NGC 6624 X-Ray Burster. *I. R. King, S. A. Stanford, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, M. J. Disney, J. M. Deharveng, P. Jakobsen, T. M. Kamperman, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, W. B. Sparks, & C. Sosin.* 413, L117, 169-A12 (1993)

Rings of Fire: Nuclear Burning as the Origin of Sub-Hertz Noise and Weak X-Ray Bursts in Accreting Neutron Stars. *Lars Bildsten.* 418, L21, 238-C8 (1993)

The Evolution of Accreting Stars with Turbulent Mixing. *M. Y. Fujimoto.* 419, 768, 257-B13 (1993)

Simultaneous Optical and *ROSAT* Soft X-Ray Observations of Impulsive Bursts on the Flare Star UV Ceti. *J. H. M. M. Schmitt, Bernhard Haisch, & H. Barwig.* 419, L81, 259-E7 (1993)

On High Mass Accretion Rates in Magnetized Column Accretion onto White Dwarfs. *Insu Yi.* 422, 289, 33-F5 (1994)

Another Clue About Particle Acceleration in Impulsive Hard X-Ray/Microwave Bursts. *David Batchelor.* 90, 697, 12-D7 (1994)

Electron Acceleration in Short-lived Radio Transients. *Lewis Ball.* 90, 889, 14-G4 (1994)

SIGMA Hard X-Ray Observations of the Burst Source MXB 1728−34. *A. Claret, A. Goldwurm, B. Cordier, J. Paul, J.-P. Roques, L. Bouchet, M.-C. Schmitz-Fraysse, P. Mandrou, E. Churazov, M. Gilfanov, R. Sunyaev, N. Khavenson, A. Diachkov, B. Novikov, R. Kremnev, & V. Kovtunenko.* 423, 436, 51-E5 (1994)

X-Ray Halos as Tracers of the Distance of the Gamma-Ray Bursters. *S. Klose.* 423, L23, 53-D5 (1994)

Structure of X-Ray Shots of Cygnus X-1 in Its Low State. *Hitoshi Negoro, Sigenori Miyamoto, & Shunji Kitamoto.* 423, L127, 61-A13 (1994)

X-Ray Images of the Galactic Center Obtained with Art-P/*Granat*: Discovery of New Sources, Variability of Persistent Sources, and Localization of X-Ray Bursters. *M. N. Pavlinsky, S. A. Grebenev, & R. A. Sunyaev.* 425, 110, 81-E5 (1994)

1ES 1113+432: Luminous, Soft X-Ray Outburst from a Nearby Cataclysmic Variable (AR Ursae Majoris). *R. A. Remillard, J. F. Schachter, A. D. Silber, & P. Slane.* 426, 288, 99-F5 (1994)

A Wide-Field Monitor for *INTEGRAL*. *Niels Lund.* 92, 337, 36-C9 (1994)

SIGMA Observations of the Bright X-Ray Transient Nova Persei: A New Black Hole Candidate? *J. P. Roques, L. Bouchet, E. Jourdain, P. Mandrou, A. Goldwurm, J. Ballet, A. Claret, F. Lebrun, A. Finoguenov, E. Churazov, M. Gilfanov, R. Sunyaev, B. Novikov, I. Chulkov, N. Kuleshova, & I. Tserenin.* 92, 451, 37-G2 (1994)

Discovery and Observations by WATCH of the X-Ray Transient GRS 1915+105. *Alberto J. Castro-Tirado, Søren Brandt, Niels Lund, Igor Lapshov, Rashid A. Sunyaev, Aleksei A. Shlyapnikov, Sergei Guziy, & Elena P. Pavlenko.* 92, 469, 38-B1 (1994)

On the Spectra of X-Ray Bursters: Expansion and Contraction Stages. *Lev Titarchuk.* 429, 340, 148-C6 (1994)

On the Nature of Photospheric Oscillations in Strong X-Ray Bursts. *Iosif Lapidus, Luciano Nobili, & Roberto Turolla.* 431, L103, 191-F13 (1994)

Reaction Rates and Reaction Sequences in the rp-Process. *L. Van Wormer, J. Görres, C. Iliadis, M. Wiescher, & F.-K. Thielemann.* 432, 326, 197-C1 (1994)

The X-Ray Spectrum of the Soft Gamma Repeater 1806−20. *E. E. Fenimore, J. G. Laros, & A. Ulmer.* 432, 742, 205-C3 (1994)

Winds from Neutron Stars and Strong Type I X-Ray Bursts. *Luciano Nobili, Roberto Turolla, & Iosif Lapidus.* 433, 276, 211-F11 (1994)

Accretion Rates in X-Ray Bursting Sources. *Iosif Lapidus, Luciano Nobili, & Roberto Turolla.* 433, 287, 211-G11 (1994)

The Early Ultraviolet, Optical, and Radio Evolution of the Soft X-Ray Transient GRO J0422+32. *C. R. Shrader, R. Mark Wagner, R. M. Hjellming, X. H. Han, & S. G. Starrfield.* 434, 698, 237-D4 (1994)

Recurrence Times and Periodicities in 4U 1608−52 as Observed by *VELA 5B*. *James C. Lochner & Diane Roussel-Dupré.* 435, 840, 257-F1 (1994)

Observations of the Small Magellanic Cloud by the *Vela 5B* X-Ray Monitor. *L. Whitlock & James C. Lochner.* 437, 841, 297-B7 (1994)

Super-Eddington Radiation Transfer in Soft Gamma Repeaters. *Andrew Ulmer.* 437, L111, 299-C1 (1994)

Propagation of Nuclear Burning Fronts on Accreting Neutron Stars: X-Ray Bursts and Sub-Hertz Noise. *Lars Bildsten.* 438, 852, 16-A2 (1995)

EXOSAT Observations of the Low-Luminosity X-Ray Burster 4U 0614+091: Evidence for a Hard Power-Law Tail. *Didier Barret & Jonathan E. Grindlay.* 440, 841, 54-F6 (1995)

Detection of the A1742−294 X-Ray Burster above 35 keV. *E. Churazov, M. Gilfanov, R. Sunyaev, B. Novickov, I. Chulkov, V. Kovtunenko, A. Sheikhet, K. Sukhanov, A. Goldwurm, B. Cordier, J. Paul, P. O. Petrucci, E. Jourdain, J. P. Roques, L. Bouchet, & P. Mandrou.* 443, 341, 99-G8 (1995)

Nonradial Oscillations in Neutron Star Oceans: A Source of Quasi-periodic X-Ray Oscillations? *Lars Bildsten & Curt Cutler.* 449, 800, 223-F12 (1995)

The Evolution of Accretion Disks with Coronae: A Model for the Low-Frequency Quasi-periodic Oscillations in X-Ray Binaries. *Marek A. Abramowicz, Xingming Chen, & Ronald E. Taam.* 452, 379, 267-C11 (1995)

Directions for Future X-Ray, Optical, and Radio Follow-up Observations of Gamma-Ray Burst Counterparts. *B. J. McNamara, T. E. Harrison, & C. L. Williams.* 452, L25, 269-F6 (1995)

Statistics of X-Ray Fluctuations from Cygnus X-1: Reservoirs in the Disk? *H. Negoro, S. Kitamoto, M. Takeuchi, & S. Mineshige.* 452, L49, 270-C1 (1995)

X-RAYS: GALAXIES

EXOSAT X-Ray Spectra of Quasars. *Andrea Comastri, Giancarlo Setti, Giovanni Zamorani, Martin Elvis, Paolo Giommi, Belinda J. Wilkes, & Jonathan C. McDowell.* 384, 62, 1-G1 (1992)

X-Ray Study of NGC 1399 in the Fornax Cluster of Galaxies. *Y. Ikebe, T. Ohashi, K. Makishima, T. Tsuru, G. Fabbiano, D.-W. Kim, G. Trinchieri, I. Hatsukade, K. Yamashita, & H. Kondo.* 384, L5, 6-B1 (1992)

Dark Matter in NGC 4472. *Michael Loewenstein.* 384, 474, 8-A9 (1992)

X-Ray Spectral Variability of the Seyfert I Galaxy NGC 4051. *Hideyo Kunieda, Satio Hayakawa, Yuzuru Tawara, Katsuji Koyama, Sachiko Tsuruta, & Karen Leighly.* 384, 482, 8-B5 (1992)

Microflare Heating of the Galactic Halo. *John C. Raymond.* 384, 502, 8-D1 (1992)

Distant Cooling Flows. *Megan Donahue, John T. Stocke, & Isabella M. Gioia.* 385, 49, 12-E13 (1992)

X-Ray Continuum and Line Emission of the Seyfert Galaxy MCG−5-23-16. *K. P. Singh, A. R. Rao, & M. N. Vahia.* 385, 132, 13-E10 (1992)

The Extended Medium Sensitivity Survey Distant Cluster Sample: X-Ray Data and Interpretation of the Luminosity Evolution. *J. P. Henry, I. M. Gioia, T. Maccacaro, S. L. Morris, J. T. Stocke, & A. Wolter.* 386, 408, 30-D13 (1992)

Abundance of Rich Clusters of Galaxies: A Test for Cosmological Parameters. *Per B. Lilje.* 386, L33, 36-B1 (1992)

A Comprehensive X-Ray Study of the Small Magellanic Cloud. *Qingde Wang & Xiaoyi Wu.* 78, 391, 7-G5 (1992)

The Spectral Archive of Cosmic X-Ray Sources Observed by the *Einstein Observatory* Focal Plane Crystal Spectrometer. *Kenneth S. K. Lum, Claude R. Canizares, George W. Clark, Joan M. Coyne, Thomas H. Markert, Pablo J. Saez, Mark L. Schattenburg, & P. Frank Winkler.* 78, 423, 8-E11 (1992)

Interstellar Matter in Early-Type Galaxies. II. The Relationship between Gaseous Components and Galaxy Types. *Joel N. Bregman, David E. Hogg, & Morton S. Roberts.* 387, 484, 44-F9 (1992)

X-Ray Properties of Bright Far-Infrared Galaxies. *L. P. David, C. Jones, & W. Forman.* 388, 82, 50-B4 (1992)

Where Have All the Cluster Halos Gone? *Jack O. Burns, Martin E. Sulkanen, Galen R. Gisler, & Rick A. Perley.* 388, L49, 59-B1 (1992)

The X-Ray Spectra of High-Luminosity Active Galactic Nuclei Observed by *Ginga*. *O. R. Williams, M. J. L. Turner, G. C. Stewart, R. D. Saxton, T. Ohashi, K. Makishima, T. Kii, H. Inoue, F. Makino, K. Hayashida, & K. Koyama.* 389, 157, 62-A5 (1992)

EXOSAT Observations of the Broad-Line Radio Galaxy 3C 382. *K. K. Ghosh & S. Soundararajaperumal.* 389, 179, 62-C1 (1992)

The Properties of X-Ray Selected Active Galactic Nuclei. II. A Deeper Look at the Cosmological Evolution. *Roberto Della Ceca, Tommaso Maccacaro, Isabella M. Gioia, Anna Wolter, & John T. Stocke.* 389, 491, 67-E8 (1992)

X-Ray–emitting Filaments in the Cooling Flow Cluster A2029. *Craig L. Sarazin, Robert W. O'Connell, & Brian R. McNamara.* 389, L59, 73-C8 (1992)

A2163: An Exceptionally Hot Cluster of Galaxies. *M. Arnaud, J. P. Hughes, W. Forman, C. Jones, M. Lachièze-Rey, K. Yamashita, & I. Hatsukade.* 390, 345, 79-E1 (1992)

The Braided Jets in the Spiral Galaxy NGC 4258. *Gerald Cecil, Andrew S. Wilson, & R. Brent Tully.* 390, 365, 79-G1 (1992)

Hard X-Ray Tests of the Unified Model for an Ultraviolet-detected Sample of Seyfert 2 Galaxies. *John S. Mulchaey, Richard F. Mushotzky, & Kimberly A. Weaver.* 390, L69, 84-G1 (1992)

The Contribution of Galaxy Clusters to the Soft X-Ray Background. *A. Blanchard, K. Wachter, A. E. Evrard, & Joseph Silk.* 391, 1, 86-B1 (1992)

Evidence for an Ionized Reprocessor in NGC 6814. *T. Jane Turner, Christine Done, Richard Mushotzky, Greg Madejski, & Hideyo Kunieda.* 391, 102, 87-C4 (1992)

An X-Ray Image of the Seyfert Galaxy NGC 1068. *A. S. Wilson, M. Elvis, A. Lawrence, & J. Bland-Hawthorn.* 391, L75, 99-E11 (1992)

A Deep Image of the Diffuse Soft X-Ray Background at the Galactic Plane. *Qingde Wang.* 392, 509, 108-E11 (1992)

An X-Ray Catalog and Atlas of Galaxies. *G. Fabbiano, D.-W. Kim, & G. Trinchieri.* 80, 531, 31-A11 (1992)

The X-Ray Spectra of Galaxies. I. Spectral Fits of Individual Galaxies and X-Ray Colors. *D.-W. Kim, G. Fabbiano, & G. Trinchieri.* 80, 645, 32-D7 (1992)

Correlated Hard X-Ray and Ultraviolet Variability in NGC 5548. *J. Clavel, K. Nandra, F. Makino, K. A. Pounds, G. A. Reichert, C. M. Urry, W. Wamsteker, M. Peracaula-Bosch, G. C. Stewart, & C. Otani.* 393, 113, 115-E1 (1992)

The X-Ray Spectra of Galaxies. II. Average Spectral Properties and Emission Mechanisms. *D.-W. Kim, G. Fabbiano, & G. Trinchieri.* 393, 134, 115-F12 (1992)

Characteristic-based Models for the Evolution of Cooling Flows. *Stephen D. Murray & Steven A. Balbus.* 395, 99, 141-C11 (1992)

Using Electron Scattering to Probe the Environment of Cluster Cooling Flows. *Michael W. Wise & Craig L. Sarazin.* 395, 387, 147-B5 (1992)

X-Ray Spectral Structure of the Seyfert Galaxy NGC 6814. *M. Yamauchi, M. Matsuoka, N. Kawai, & A. Yoshida.* 395, 453, 148-A13 (1992)

A New Hard X-Ray Source 15′ Away from 3C 273? *E. Jourdain, L. Bassani, J. P. Roques, P. Mandrou, J. Ballet, A. Claret, A. Goldwurm, F. Lebrun, A. Finogenov, E. Churazov, M. Gilfanov, R. Sunyaev, A. Dyachkov, N. Khavenson, B. Novikov, & N. Kuleshova.* 395, L69, 153-F6 (1992)

Active Galactic Nuclei with Ultrasoft X-Ray Emission. *F. A. Córdova, J. F. Kartje, R. J. Thompson, Jr., K. O. Mason, E. M. Puchnarewicz, & F. R. Harnden, Jr.* 81, 661, 45-A11 (1992)

SIGMA Observation of Two Quasars: 3C 273 and 0241+62. *L. Bassani, E. Jourdain, J. P. Roques, L. Bouchet, J. Ballet, F. Lebrun, Ph. Laurent, B. Cordier, R. Sunyaev, E. Churazov, M. Gilfanov, A. Finogenov, A. Dyachkov, N. Khavenson, B. Novikov, & I. Chulkov.* 396, 504, 163-F11 (1992)

X-Ray and Optical Emission-Line Filaments in the Cooling Flow Cluster 2A 0335+096. *Craig L. Sarazin, Robert W. O'Connell, & Brian R. McNamara.* 397, L31, 173-D10 (1992)

X-Ray Luminosity and Spectral Variability of Hard X-Ray–selected Active Galactic Nuclei. *P. Grandi, G. Tagliaferri, P. Giommi, P. Barr, & G. G. C. Palumbo.* 82, 93, 50-C9 (1992)

Clusters in Collision? *M. P. Ulmer, G. D. Wirth, & M. P. Kowalski.* 397, 430, 176-A9 (1992)

High-Energy X Emission from the Coma Cluster. *Yoel Rephaeli & Oleg Goldshmidt.* 397, 438, 176-B6 (1992)

The X-Ray Spectrum of Abell 665. *John P. Hughes & Yasuo Tanaka.* 398, 62, 182-G1 (1992)

X-Ray Spectra of Bright Core-dominant Quasars: NRAO 140 and 4C 34.47. *T. Ohashi, M. Tashiro, K. Makishima, T. Kii, F. Makino, M. J. L. Turner, & O. R. Williams.* 398, 87, 183-B1 (1992)

Nonthermal Electron-Positron Pairs and the Break in the Hard X-Ray Spectrum of NGC 4151. *Paolo S. Coppi & Andrzej A. Zdziarski.* 398, L37, 187-F1 (1992)

X-Ray Observations of the Seyfert 1 Galaxy MCG 2-58-22. *K. K. Ghosh & S. Soundararajaperumal.* 398, 501, 190-D1 (1992)

The Nucleus of M31. *Fulvio Melia.* 398, L95, 194-C8 (1992)

X-Ray Emission from SN 1986J in NGC 891. *Joel N. Bregman & Rachel A. Pildis.* 398, L107, 194-E7 (1992)

Hard X-Ray Emission from a Narrow-Line Radio Galaxy IC 5063 and Obscured Active Nucleus. *Katsuji Koyama, Hisamitu Awaki, Kazushi Iwasawa, & Martin J. Ward.* 399, L129, 208-A9 (1992)

The X-Ray Variability of NGC 6814: Power Spectrum. *C. Done, G. M. Madejski, R. F. Mushotzky, T. J. Turner, K. Koyama, & H. Kunieda.* 400, 138, 210-F1 (1992)

The BL Lacertae Object PKS 1413+135: Is It within or behind a Spiral Galaxy? *John T. Stocke, Ron Wurtz, Qingde Wang, Richard Elston, & Buell T. Jannuzi.* 400, L17, 214-C5 (1992)

X-Ray Constraints on the Shape of the Dark Matter in Five Abell Clusters. *David A. Buote & Claude R. Canizares.* 400, 385, 215-B3 (1992)

Analysis of Soft X-Ray Excesses of Quasi-stellar Objects by Using Their IPC Spectra. *Y. Y. Zhou & K. N. Yu.* 400, 430, 215-F1 (1992)

Numerical Simulation of X-Ray–heated Winds in Seyfert Galaxies. I. The Case of Zero Angular Momentum. *Dinshaw S. Balsara & Julian H. Krolik.* 402, 109, 2-D9 (1993)

X-Ray Light Curves of Active Galactic Nuclei Are Phase Incoherent. *Julian Krolik, Chris Done, & Grzegorz Madejski.* 402, 432, 8-A9 (1993)

Simultaneous *ROSAT*, *GINGA*, VLA, *IUE*, and Optical Observations of the Bright Quasar H1821+643. *Michiel Kolman, Jules P. Halpern, Chris R. Shrader, Alexei V. Filippenko, Henner H. Fink, & Stephan G. Schaeidt.* 402, 514, 9-A1 (1993)

On the Relation of the X-Ray and Emission-Line Properties of Low-Redshift QSOs. *Michael R. Corbin.* 403, L9, 20-B1 (1993)

Simultaneous *Ginga* and *IUE* Observations of the Seyfert Galaxy NGC 3516. *Michiel Kolman, Jules P. Halpern, Christopher Martin, Hisamitsu Awaki, & Katsuji Koyama.* 403, 592, 23-A8 (1993)

The X-Ray Spectral Variability of the BL Lacertae Type Object PKS 2155−304. *S. Sembay, R. S. Warwick, C. Megan Urry, J. Sokoloski, I. M. George, F. Makino, T. Ohashi, & M. Tashiro.* 404, 112, 29-D5 (1993)

Diffuse X-Ray Emission from the NGC 2300 Group of Galaxies: Implications for Dark Matter and Galaxy Evolution in Small Groups. *John S. Mulchaey, David S. Davis, Richard F. Mushotzky, & David Burstein.* 404, L9, 33-D7 (1993)

Ginga Observations of the Coma Cluster and Studies of the Spatial Distribution of Iron. *John P. Hughes, Jackie A. Butcher, Gordon C. Stewart, & Yasuo Tanaka.* 404, 611, 36-E8 (1993)

The 6.7 keV Iron Line Distribution in the Galaxy. *Shigeo Yamauchi & Katsuji Koyama.* 404, 620, 36-F5 (1993)

The Soft X-Ray Background and Galaxy Clusters. *R. Burg, A. Cavaliere, & N. Menci.* 404, L55, 40-D1 (1993)

On Compton Reflection in the Sources of the Cosmic X-Ray Background. *Andrzej A. Zdziarski, Piotr T. Życki, Roland Svensson, & Elihu Boldt.* 405, 125, 42-E8 (1993)

A Stochastic Model for the Variability of NGC 6814. *R. Vio, R. Turolla, S. Cristiani, & C. Barbieri.* 405, 163, 43-A13 (1993)

A New X-Ray Spectral Observation of NGC 1068. *F. E. Marshall, H. Netzer, K. A. Arnaud, E. A. Boldt, S. S. Holt, K. M. Jahoda, R. Kelley, R. F. Mushotzky, R. Petre, P. J. Serlemitsos, A. P. Smale, J. H. Swank, A. E. Szymkowiak, & K. A. Weaver.* 405, 168, 43-B7 (1993)

Soft Variability and Reflection Features in the X-Ray Spectrum of the Seyfert Galaxy NGC 5506. *I. A. Bond, M. Matsuoka, & M. Yamauchi.* 405, 179, 43-C7 (1993)

The Insignificance of "Heating Flows" in "Cooling Flow" Clusters of Galaxies. *Claude R. Canizares, Thomas H. Markert, Sera Markoff, & John P. Hughes.* 405, L17, 47-D1 (1993)

Upper Limits on TeV Gamma-Ray Emission from Centaurus A, Vela X-1, Centaurus X-3, and Circinus X-1. *W. H. Allen, I. A. Bond, E. Budding, M. J. Conway, A. Daniel, K. B. Fenton, H. Fujii, Z. Fujii, N. Hayashida, K. Hibino, M. Honda, J. E. Humble, S. Kabe, K. Kasahara, T. Kifune, G. D. Lythe, A. Masaike, Y. Matsubara, K. Mitsui, Y. Miura, M. Mori, Y. Muraki, M. Nagano, T. Nakamura, M. Nishizawa, P. M. Norris, S. Ogio, To. Saito, M. Sakata, H. Sato, H. M. Shimizu, M. Spencer, J. R. Storey, T. Tanimori, M. Teshima, S. Torii, A. Wadsworth, Y. Watase, M. D. Woodhams, Y. Yamamoto, P. C. M. Yock, & T. Yuda (The JANZOS Collaboration).* 405, 554, 50-A1 (1993)

A Catalog of X-Ray Spectra of BL Lacertae Objects. *P. Ciliegi, L. Bassani, & E. Caroli.* 85, 111, 7-D7 (1993)

The Radio Structure of X-Ray–selected BL Lacertae Objects. *Eric S. Perlman & John T. Stocke.* 406, 430, 63-A13 (1993)

ROSAT Observations of the Blazar PKS 0537−441. *A. Treves, T. Belloni, R. Falomo, H. Fink, L. Maraschi, R. M. Sambruna, G. Tagliaferri, & H. U. Zimmermann.* 406, 447, 63-C5 (1993)

Does the Baryon Fraction in Clusters Imply an Open Universe? *Arif Babul & Neal Katz.* 406, L51, 68-B13 (1993)

BBXRT and *Ginga* Observations of the Seyfert 1 Galaxy Markarian 335. *T. J. Turner, K. Nandra, A. A. Zdziarski, K. Jahoda, G. M. Madejski, F. Marshall, R. F. Mushotzky, R. Petre, K. A. Pounds, A. P. Smale, P. Serlemitsos, & K. Weaver.* 407, 556, 77-D13 (1993)

The Center of the Galaxy in the Recent Past: A View from *GRANAT*. *R. A. Sunyaev, M. Markevitch, & M. Pavlinsky.* 407, 606, 78-B7 (1993)

When Clusters Collide: A Numerical Hydro/N-Body Simulation of Merging Galaxy Clusters. *Kurt Roettiger, Jack Burns, & Chris Loken.* 407, L53, 82-C1 (1993)

X-Ray Spectra of 12 Distant Clusters of Galaxies. *Qingde Wang & John T. Stocke.* 408, 71, 84-A4 (1993)

A Spectral Study of Four X-Ray–selected BL Lacertae Objects with *EXOSAT*. *R. M. Sambruna, P. Barr, L. Maraschi, G. Tagliaferri, & A. Treves.* 408, 452, 90-G1 (1993)

X-Ray Evidence for Seyfert Activity Buried in the Infrared Galaxy NGC 4945. *K. Iwasawa, K. Koyama, H. Awaki, H. Kunieda, K. Makishima, T. Tsuru, T. Ohashi, & N. Nakai.* 409, 155, 98-G9 (1993)

Features of the Fluorescent Iron Line from Highly Inclined Disks: Some Possible Examples for NGC 6814. *G. Bao.* 409, L41, 111-C1 (1993)

Discovery of a New Component in the Gravitationally Lensed Quasar 0957+561. *C. Jones, C. Stern, E. Falco, W. Forman, L. David, I. Shapiro, & A. C. Fabian.* 410, 21, 112-D1 (1993)

Quasar X-Ray Spectra Revisited. *P. Shastri, B. J. Wilkes, M. Elvis, & J. McDowell.* 410, 29, 112-D11 (1993)

Self-absorbed Active Galactic Nuclei and the Cosmic X-Ray Background. *Piero Madau, Gabriele Ghisellini, & A. C. Fabian.* 410, L7, 117-F8 (1993)

High-Resolution X-Ray Observations of the Central Region of M31 with the *ROSAT* Satellite. *F. A. Primini, W. Forman, & C. Jones.* 410, 615, 121-C12 (1993)

BL Lacertae Objects, Fanaroff-Riley Type I Radio Sources, and Cluster Cooling Flows. *Craig L. Sarazin & Michael W. Wise.* 411, 55, 127-F13 (1993)

Ionized Absorbers, Ionized Emitters, and the X-Ray Spectrum of Active Galactic Nuclei. *Hagai Netzer.* 411, 594, 137-A10 (1993)

Angular Correlations of the X-Ray Background and Clustering of Extragalactic X-Ray Sources. *L. Danese, L. Toffolatti, A. Franceschini, J. M. Martín-Mirones, & G. De Zotti.* 412, 56, 142-F9 (1993)

ROSAT Position Sensitive Proportional Counter Spectra of Six Seyfert 1 Galaxies. *T. J. Turner, I. M. George, & R. F. Mushotzky.* 412, 72, 143-A1 (1993)

Nuclear Winds in Active Elliptical Galaxies. II. Observational Signatures. *Steven J. Smith, C. F. Kennel, & F. V. Coroniti.* 412, 82, 143-A13 (1993)

Hierarchical Galaxy Formation: Overmerging and the Formation of an X-Ray Cluster. *Neal Katz & Simon D. M. White.* 412, 455, 149-C1 (1993)

A Catalog of Intracluster Gas Temperatures. *L. P. David, A. Slyz, C. Jones, W. Forman, S. D. Vrtilek, & K. A. Arnaud.* 412, 479, 149-E9 (1993)

Spartan 1 X-Ray Observations of the Perseus Cluster. III. The Distribution of Iron in the Intracluster Gas. *M. P. Kowalski, R. G. Cruddace, W. A. Snyder, G. G. Fritz, M. P. Ulmer, & E. E. Fenimore.* 412, 489, 149-F8 (1993)

Ten New BL Lacertae Objects Discovered by an Efficient X-Ray/Radio/Optical Technique. *Jonathan F. Schachter, John T. Stocke, Eric Perlman, Martin Elvis, Ron Remillard, Arno Granados, Jane Luu, John P. Huchra, Roberta Humphreys, C. Megan Urry, & John Wallin.* 412, 541, 150-D9 (1993)

The X-Ray Structure and Spectrum of NGC 6251. *M. Birkinshaw & D. M. Worrall.* 412, 568, 150-G4 (1993)

On the Hard X-Ray Variability of Centaurus A. *E. Jourdain, L. Bassani, J. P. Roques, P. Mandrou, J. Ballet, A. Claret, P. Laurent, F. Lebrun, A. Finogenov, E. Churazov, M. Gilfanov, R. Sunyaev, A. Dyachkov, N. Khavenson, K. Sukhanov, & R. Kremnev.* 412, 586, 151-A11 (1993)

The X-Ray Baldwin Effect. *Kazushi Iwasawa & Yoshiaki Taniguchi.* 413, L15, 162-C8 (1993)

An X-Ray Method for Detecting Substructure in Galaxy Clusters: Application to Perseus, A2256, Centaurus, Coma, and Sersic 40/6. *Joseph J. Mohr, Daniel G. Fabricant, & Margaret J. Geller.* 413, 492, 162-F1 (1993)

X-Ray Spectra from Two-Phase Accretion Disks. *Francesco Haardt & Laura Maraschi.* 413, 507, 162-G3 (1993)

Broad-Band X-Ray Telescope Observations of the Hot Interstellar Media in NGC 1399 and NGC 4472. *P. J. Serlemitsos, M. Loewenstein, R. F. Mushotzky, F. E. Marshall, & R. Petre.* 413, 518, 163-A1 (1993)

The Dark Matter Distribution of M87 and NGC 1399. *John C. Tsai.* 413, L59, 168-B7 (1993)

Soft X-Ray Spectra of Seyfert 2 Galaxies. *John S. Mulchaey, Edward Colbert, Andrew S. Wilson, Richard F. Mushotzky, & Kimberly A. Weaver.* 414, 144, 171-G1 (1993)

Active Galactic Nuclei Make the Cosmic X-Ray Background. *Andrzej A. Zdziarski, Piotr T. Życki, & Julian H. Krolik.* 414, L81, 185-E8 (1993)

X-Ray Variability of Active Galactic Nuclei: A Universal Power Spectrum with Luminosity-dependent Amplitude. *A. Lawrence & I. Papadakis.* 414, L85, 185-F1 (1993)

Acceleration Efficiency in Nonthermal Sources and the Soft Gamma Rays from NGC 4151 Observed by OSSE and SIGMA. *Andrzej A. Zdziarski, Alan P. Lightman, & Andrzej Maciołek-Niedźwiecki.* 414, L93, 185-F13 (1993)

X-Rays from SN 1986J: Emission of a Shocked Clumpy Wind. *N. N. Chugai.* 414, L101, 185-G10 (1993)

On Cosmological Constraints from Statistics of X-Ray Clusters. *Hitoshi Hanami.* 415, 42, 185-E6 (1993)

Distant Clusters of Galaxies Detected by X-Rays. *A. Cavaliere, S. Colafrancesco, & N. Menci.* 415, 50, 185-F1 (1993)

The X-Ray Spectra of Cluster Cooling Flows. I. Optically Thin Models. *Michael W. Wise & Craig L. Sarazin.* 415, 58, 185-F10 (1993)

The *ROSAT* Spectrum of 3C 351: A Warm Absorber in an X-Ray–"quiet" Quasar? *Fabrizio Fiore, Martin Elvis, Smita Mathur, Belinda J. Wilkes, & Jonathan C. McDowell.* 415, 129, 186-F1 (1993)

The Relation between Velocity Dispersion and Temperature in Clusters: Limiting the Velocity Bias. *Lori M. Lubin & Neta A. Bahcall.* 415, L17, 191-G5 (1993)

X-Ray Emission from the Starburst Galaxy IC 342. *Joel N. Bregman. Caroline V. Cox, & Kohji Tomisaka.* 415, L79, 199-E13 (1993)

Unified Model for X-Ray– and Radio-selected BL Lacertae Objects. *A. Celotti, L. Maraschi, G. Ghisellini, A. Caccianiga, & T. Maccacaro.* 416, 118, 202-D13 (1993)

The Iron K Line as a Probe of Beamed X-Ray Emission in Active Galactic Nuclei. *T. Yaqoob, B. McKernan, C. Done, P. J. Serlemitsos, & K. A. Weaver.* 416, L5, 207-B7 (1993)

The Complex, Gravitationally Lensed Arc System in the X-Ray–selected Cluster of Galaxies MS 0440+0204. *G. A. Luppino, I. M. Gioia, J. Annis, O. Le Fèvre, & F. Hammer.* 416, 444, 208-G8 (1993)

Helium-like Iron Line Temperature Diagnostics in Clusters of Galaxies. *Douglas A. Swartz & Martin E. Sulkanen.* 417, 487, 225-D3 (1993)

Comptonization of the Cosmic Microwave Background by Gas in Superclusters of Galaxies. *Yoel Rephaeli.* 418, 1, 231-B1 (1993)

Contributions of Starburst Galaxies and Reflection-dominated Active Galactic Nuclei to the Cosmic X-Ray Background. *Paul M. Ricker & P. Mészáros.* 418, 49, 231-F8 (1993)

The Association of Faint Radio Sources with Fluctuations in the X-Ray Background. *T. T. Hamilton & D. J. Helfand.* 418, 55, 231-G1 (1993)

Polarized Scattering in the Vicinity of Galaxies. *Brian W. Murphy & David F. Chernoff.* 418, 60, 231-G7 (1993)

A BBXRT Observation of the High-Luminosity Quasar H1821+643. *T. Yaqoob, P. J. Serlemitsos, R. F. Mushotzky, K. A. Weaver, F. E. Marshall, & R. Petre.* 418, 638, 240-D6 (1993)

The Broad-Band X-Ray Spectrum of the Nucleus of M81. *R. Petre, R. F. Mushotzky, P. J. Serlemitsos, K. Jahoda, & F. E. Marshall.* 418, 644, 240-E1 (1993)

Position Sensitive Proportional Counter Soft X-Ray Observations of Seyfert 2 Galaxies. *T. J. Turner, C. M. Urry, & R. F. Mushotzky* 418, 653, 240-E13 (1993)

The Heavy Element Abundance in the Hot Corona of the Bright Elliptical Galaxy NGC 4472. *W. Forman, C. Jones, L. David, M. Franx, K. Makishima, & T. Ohashi.* 418, L55, 245-B1 (1993)

Accurate Period Determination of an Eclipsing Binary X-Ray Source in M33. *Eric Schulman, Joel N. Bregman, Alfonso Collura, Fabio Reale, & Giovanni Peres.* 418, L67, 245-C6 (1993)

Spatially Resolved X-Ray Spectroscopy of the Merging Galaxy Cluster A2256. *T. Miyaji, R. F. Mushotzky, M. Loewenstein, P. J. Serlemitsos, F. E. Marshall, R. Petre, K. M. Jahoda, E. A. Boldt, S. S. Holt, J. Swank, A. E. Szymkowiak, & R. Kelley.* 419, 66, 247-A2 (1993)

X-Ray Observations of the Warm Absorber in NGC 3783. *T. J. Turner, K. Nandra, I. M. George, A. C. Fabian, & K. A. Pounds.* 419, 127, 247-F8 (1993)

A Morphology-Cosmology Connection for X-Ray Clusters. *August E. Evrard, Joseph J. Mohr, Daniel G. Fabricant, & Margaret J. Geller.* 419, L9, 252-B13 (1993)

A Measurement of the Hubble Constant from the X-Ray Properties and the Sunyaev-Zel'dovich Effect of Abell 2218. *M. Birkinshaw & J. P. Hughes.* 420, 33, 1-D9 (1994)

ROSAT Observations of X-Ray–selected Active Galactic Nuclei. *R. J. Thompson, Jr., E. M. Puchnarewicz, F. A. Córdova, & K. O. Mason.* 420, 136, 2-F1 (1994)

X-Ray Continuum and Iron K Emission Line from the Radio Galaxy 3C 390.3. *M. Inda, K. Makishima, Y. Kohmura, M. Tashiro, T. Ohashi, P. Barr, K. Hayashida, G. G. C. Palumbo, G. Trinchieri, M. Elvis, & G. Fabbiano.* 420, 143, 2-F9 (1994)

Extended and Compact X-Ray Emission in Powerful Radio Galaxies. *D. M. Worrall, C. R. Lawrence, T. J. Pearson, & A. C. S. Readhead.* 420, L17, 7-C11 (1994)

X-Ray–emitting Gas Surrounding the Spiral Galaxy NGC 891. *Joel N. Bregman & Rachel A. Pildis.* 420, 570, 9-F7 (1994)

X-Ray Bumps, Iron Kα Lines, and X-Ray Suppression by Obscuring Tori in Seyfert Galaxies. *Julian H. Krolik, Piero Madau, & Piotr T. Życki.* 420, L57, 15-B13 (1994)

Two Very Luminous Variable X-Ray Sources in M82. *A. Collura, Fabio Reale, Eric Schulman, & Joel N. Bregman.* 420, L63, 15-C6 (1994)

Optical Caustics in a Kerr Spacetime and the Origin of Rapid X-Ray Variability in Active Galactic Nuclei. *Kevin P. Rauch & Roger D. Blandford.* 421, 46, 16-F1 (1994)

Evidence for X-Ray Flux and Spectral Modulation by Absorption in NGC 6814. I. The Nature of the Most Rapid Variability. *Karen Leighly, Hideyo Kunieda, Yoshiyuki Tsusaka, Hisamitsu Awaki, & Sachiko Tsuruta.* 421, 69, 16-G12 (1994)

The X-Ray Luminosity Functions of Abell Clusters from the *Einstein* Cluster Survey. *R. Burg, R. Giacconi, W. Forman, & C. Jones.* 422, 37, 30-E1 (1994)

Absorption in X-Ray Spectra of High-Redshift Quasars. *Martin Elvis, Fabrizio Fiore, Belinda Wilkes, Jonathan McDowell, & Jill Bechtold.* 422, 60, 30-G1 (1994)

Einstein Observations of Ultrasoft X-Ray Sources in the Magellanic Clouds. *Thomas Brown, France Córdova, Robin Ciardullo, Richard Thompson, & Howard Bond.* 422, 118, 31-E4 (1994)

X-Ray Clusters and Gravitational Instability Theories. *S. Colafrancesco & N. Vittorio.* 422, 443, 37-D5 (1994)

Infrared Spectroscopy of Seyfert 2 Galaxies: A Look through the Obscuring Torus? *Robert W. Goodrich, Sylvain Veilleux, & Gary J. Hill.* 422, 521, 38-C12 (1994)

The Multifrequency Spectral Evolution of Blazar 3C 345 during the 1991 Outburst. *J. R. Webb, C. R. Shrader, T. J. Balonek, D. M. Crenshaw, D. Kazanas, S. Clements, A. G. Smith, A. D. Nair, R. J. Leacock, P. P. Gombola, A. Sadun, H. R. Miller, I. Robson, R. Fujimoto, F. Makino, T. Kii, H. Aller, M. Aller, P. Hughes, E. Valtaoja, H. Teräsranta, E. Salonen, M. Tornikoski, & W. Chism.* 422, 570, 38-G11 (1994)

The "Drop-off" Frequency in the X-Ray Variability Power Spectrum of Active Galactic Nuclei: A Possible Characteristic Timescale in X-Ray Emission of NGC 4051. *G. Bao & E. Østgaard.* 422, L51, 44-G1 (1994)

Extreme Ultraviolet Spectroscopy of PKS 2155−304. *Antonella Fruscione, Stuart Bowyer, Arieh Königl, & Steven M. Kahn.* 422, L55, 44-G6 (1994)

Clumped X-Ray Emission around Radio Galaxies in Abell Clusters. *Jack O. Burns, George Rhee, Frazer N. Owen, & Jason Pinkney.* 423, 94, 47-C9 (1994)

Reanalysis of X-Ray Emission from M87. I. The Single-Phase Medium. *John C. Tsai.* 423, 143, 47-G9 (1994)

X-Ray Emission from a Simulated Cluster of Galaxies. *John C. Tsai, Neal Katz, & Edmund Bertschinger.* 423, 553, 55-D4 (1994)

The Complex Soft X-Ray Excess in NGC 4151. *K. A. Weaver, R. F. Mushotzky, K. A. Arnaud, P. J. Serlemitsos, F. E. Marshall, R. Petre, K. M. Jahoda, A. P. Smale, & H. Netzer.* 423, 621, 56-C1 (1994)

Einstein X-Ray Observations of the Core of the Shapley Supercluster in Northern Centaurus. *Jeffrey Breen, Somak Raychaudhury, William Forman, & Christine Jones.* 424, 59, 62-F9 (1994)

Dust and Ionized Gas in NGC 3607. *K. P. Singh, T. P. Prabhu, A. K. Kembhavi, & P. N. Bhat.* 424, 638, 72-G2 (1994)

The Detection of X-Ray Emission from the Highest Redshift Galaxy Clusters. *Francisco J. Castander, Richard S. Ellis, Carlos S. Frenk, Alan Dressler, & James E. Gunn.* 424, L79, 78-F9 (1994)

Dark Matter in Hierarchical Cluster Evolution. *Mark J. Henriksen.* 425, 35, 80-E8 (1994)

X-Ray Absorption toward the Red Quasar 3C 212. *Martin Elvis, Fabrizio Fiore, Smita Mathur, & Belinda J. Wilkes.* 425, 103, 81-D10 (1994)

Cluster Evolution and Microwave Source Counts. *M. Markevitch, G. R. Blumenthal, W. Forman, C. Jones, & R. A. Sunyaev.* 426, 1, 96-B1 (1994)

Is the Universe Gravitationally Dominated by Nonbaryonic Dark Matter? *Makoto Hattori.* 426, 19, 96-C9 (1994)

The Correlation Function of Flux-limited X-Ray Clusters. *Neta A. Bahcall & Renyue Cen.* 426, L15, 103-B13 (1994)

Resolving the Beta-Discrepancy for Clusters of Galaxies. *Neta A. Bahcall & Lori M. Lubin.* 426, 513, 104-F11 (1994)

Geometrical Evidence for Dark Matter: X-Ray Constraints on the Mass of the Elliptical Galaxy NGC 720. *David A. Buote & Claude R. Canizares.* 427, 86, 111-A12 (1994)

Multiple X-Ray Emission Components in Low-Power Radio Galaxies. *D. M. Worrall & M. Birkinshaw.* 427, 134, 111-E10 (1994)

The *Einstein* Database of IPC X-Ray Observations of Optically Selected and Radio-selected Quasars. I. *Belinda J. Wilkes, Harvey Tananbaum, D. M. Worrall, Yoram Avni, M. S. Oey, & Joan Flanagan.* 92, 53, 31-G2 (1994)

The Coma Cluster after Lunch: Has a Galaxy Group Passed through the Cluster Core? *Jack O. Burns, Kurt Roettiger, Michael Ledlow, & Anatoly Klypin.* 427, L87, 127-A5 (1994)

Hot Gas in the Cold Dark Matter Scenario: X-Ray Clusters from a High-Resolution Numerical Simulation. *Hyesung Kang, Renyue Cen, Jeremiah P. Ostriker, & Dongsu Ryu.* 428, 1, 128-C1 (1994)

The Intrinsic Nuclear Spectrum of NGC 1068. *Edward A. Pier, Robert Antonucci, Todd Hurt, Gerard Kriss, & Julian Krolik.* 428, 124, 129-F8 (1994)

X-Ray Clusters from a High-Resolution Hydrodynamic PPM Simulation of the Cold Dark Matter Universe. *Greg L. Bryan, Renyue Cen, Michael L. Norman, Jeremiah P. Ostriker, & James M. Stone.* 428, 405, 135-C1 (1994)

Mapping the Dark Matter in the NGC 5044 Group with *ROSAT*: Evidence for a Nearly Homogeneous Cooling Flow with a Cooling Wake. *Laurence P. David, Christine Jones, William Forman, & Stuart Daines.* 428, 544, 137-A11 (1994)

ROSAT PSPC Observations of NGC 4636: Interaction with Virgo Gas? *G. Trinchieri, D.-W. Kim, G. Fabbiano, & C. R. C. Canizares.* 428, 555, 137-B11 (1994)

Nonthermal Pair Models, Reflection, and X-Ray Spectral Variability of Active Galaxies. *P. Grandi, C. Done, & C. M. Urry.* 428, 599, 137-F5 (1994)

The Nonthermal Pair Model for the X-Ray and Gamma-Ray Spectra from Active Galactic Nuclei. *Roland Svensson.* 92, 585, 39-E12 (1994)

Multiwavelength Analysis of Quasars, Seyfert Galaxies, and Starbursts. *J. Miguel Mas-Hesse, Pedro M. Rodríguez-Pascual, Lourdes Sanz Fernández de Córdoba, & I. Félix Mirabel.* 92, 599, 39-G4 (1994)

Is the X-Ray Source of 3C 273 Really Compact? *Roland Walter.* 92, 619, 40-B3 (1994)

Gamma-Ray Bright Quasars and BL Lacertae Objects: EGRET Data. *Jonathan Schachter & Martin Elvis.* 92, 623, 40-B9 (1994)

Do Active Galactic Nuclei Produce the Cosmic X-Ray Background? *Amri Wandel.* 92, 633, 40-C10 (1994)

X-Ray Clusters in a Cold Dark Matter + Λ Universe: A Direct, Large-Scale, High-Resolution, Hydrodynamic Simulation. *Renyue Cen & Jeremiah P. Ostriker.* 429, 4, 144-C6 (1994)

Models of Hot Galactic Coronae around Early-Type Galaxies. *W. Forman, C. Jones, & W. Tucker.* 429, 77, 145-B7 (1994)

ROSAT PSPC Observations of Two X-Ray–faint Early-Type Galaxies: NGC 4365 and NGC 4382. *G. Fabbiano, D.-W. Kim, & G. Trinchieri.* 429, 94, 145-C12 (1994)

The Very Soft X-Ray Emission of X-Ray–faint Early-Type Galaxies. *S. Pellegrini & G. Fabbiano.* 429, 105, 145-D11 (1994)

Reanalysis of X-Ray Emission from M87. II. The Multiphase Medium. *John C. Tsai.* 429, 119, 145-E13 (1994)

Nonpolytropic Model for the Coma Cluster. *R. Fusco-Femiano & John P. Hughes.* 429, 545, 152-D12 (1994)

OSSE Search for High-Energy X-Ray Emission from the Coma Cluster. *Yoel Rephaeli, Mel Ulmer, & Duane Gruber.* 429, 554, 152-E10 (1994)

Dynamics and X-Ray Emission of a Galactic Superwind Interacting with Disk and Halo Gas. *Anatoly A. Suchkov, Dinshaw S. Balsara, Timothy M. Heckman, & Claus Leitherer.* 430, 511, 168-B5 (1994)

The Properties of X-Ray–selected Active Galactic Nuclei. III. The Radio-quiet versus Radio-loud Samples. *Roberto Della Ceca, Giovanni Zamorani, Tommaso Maccacaro, Anna Wolter, Richard Griffiths, John T. Stocke, & Giancarlo Setti.* 430, 533, 168-D1 (1994)

Statistically Efficient Parallel Testing of the Hubble and Lundmark Laws in the Preevolutionary X-Ray Band. *I. E. Segal, J. F. Nicoll, & P. Wu.* 431, 52, 176-G5 (1994)

Implications for Gravitational Lensing and the Dark Matter Content in Clusters of Galaxies from Spatially Resolved X-Ray Spectra. *M. Loewenstein.* 431, 91, 177-C9 (1994)

X-Ray Observations of Cygnus A Using the *Ginga* Satellite. *Shiro Ueno, Katsuji Koyama, Minoru Nishida, Shigeo Yamauchi, & Martin J. Ward.* 431, L1, 182-C1 (1994)

Weak Soft X-Ray Excesses Need Not Result from the High-Frequency Tail of the Optical/Ultraviolet Bump in Active Galactic Nuclei. *Bożena Czerny & Piotr T. Życki.* 431, L5, 182-C7 (1994)

The Complex Optical to Soft X-Ray Spectrum of Low-Redshift Radio-quiet Quasars. I. The X-Ray Data. *Fabrizio Fiore, Martin Elvis, Jonathan C. McDowell, Aneta Siemiginowska, & Belinda J. Wilkes.* 431, 515, 185-A6 (1994)

Absorption in 3C 212. *Smita Mathur.* 431, L75, 191-C11 (1994)

Giant Explosion at the Galactic Center and Huge Shocked Shells in the Halo. *Yoshiaki Sofue.* 431, L91, 191-E8 (1994)

Temperatures of Distant Clusters of Galaxies. *J. P. Henry, L. Jiao, & I. M. Gioia.* 432, 49, 193-G3 (1994)

Radio and X-Ray Observations of the Gamma-Ray Bright Quasar PKS 0528+134. *Yun Fei Zhang, Alan P. Marscher, Hugh D. Aller, Margo F. Aller, Harri Teräsranta, & Esko Valtaoja.* 432, 91, 194-D1 (1994)

Inverse-Compton X-Ray Emission from the Superluminal Quasar 3C 345. *S. C. Unwin, A. E. Wehrle, C. M. Urry, D. M. Gilmore, E. J. Barton, B. C. Kjerulf, J. A. Zensus, & C. R. Rabaça.* 432, 103, 194-E1 (1994)

A Search for X-Ray Bright Distant Clusters of Galaxies. *R. C. Nichol, M. P. Ulmer, R. G. Kron, G. D. Wirth, & D. C. Koo.* 432, 464, 201-F5 (1994)

The Near-Infrared–Optical–Ultraviolet Emission of BL Lacertae Objects. *E. Pian, R. Falomo, R. Scarpa, & A. Treves.* 432, 547, 202-F11 (1994)

Soft X-Ray Spectrum of BL Lacertae Object AO 0235+164 as a Tracer of Elemental Abundances at $z \sim 0.5$. *Greg Madejski.* 432, 554, 202-G6 (1994)

Soft X-Ray Observations of the Interacting Galaxies NGC 1808 and NGC 1792. *Michael Dahlem, Gisela D. Hartner, & Norbert Junkes.* 432, 598, 203-D7 (1994)

Luminosity Functions of BL Lacertae Objects. *Anna Wolter, Alessandro Caccianiga, Roberto Della Ceca, & Tommaso Maccacaro.* 433, 29, 208-E6 (1994)

Predicted Optical/Ultraviolet Line Fluxes for the Warm Absorber in Abell 2256. *Shlomi Pistinner & Craig L. Sarazin.* 433, 577, 218-B8 (1994)

Abundance Gradients in Cooling Flow Clusters: *Ginga* Large Area Counters and *Einstein* Solid State Spectrometer Spectra of A496, A1795, A2142, and A2199. *Raymond E. White III, C. S. R. Day, Isamu Hatsukade, & John P. Hughes.* 433, 583, 218-C2 (1994)

The True Nature of *IRAS*-selected, X-Ray–luminous "Normal" Galaxies in the *ROSAT* All-Sky Survey. *Edward C. Moran, Jules P. Halpern, & David J. Helfand.* 433, L65, 223-E10 (1994)

A Statistical Analysis of the Broadband 0.1 to 3.5 keV Spectral Properties of X-Ray–selected Active Galactic Nuclei. *R. J. Thompson, Jr., & F. A. Córdova.* 434, 54, 225-G13 (1994)

The Cosmic X-Ray Background–*IRAS* Galaxy Correlation and the Local X-Ray Volume Emissivity. *Takamitsu Miyaji, Ofer Lahav, Keith Jahoda, & Elihu Boldt.* 434, 424, 233-E9 (1994)

Active Galactic Nuclei. V. X-Ray Variability and the Black Hole Cluster Paradigm. *A. G. Pacholczyk & W. R. Stoeger, S.J.* 434, 435, 233-F9 (1994)

The X-Ray Spectra of Blazars Observed with *EXOSAT*. *Rita M. Sambruna, Paul Barr, Paolo Giommi, Laura Maraschi, Gianpiero Tagliaferri, & Aldo Treves.* 434, 468, 234-B6 (1994)

The X-Ray and Ultraviolet Absorbing Outflow in 3C 351. *Smita Mathur, Belinda Wilkes, Martin Elvis, & Fabrizio Fiore.* 434, 493, 234-E1 (1994)

A *ROSAT* Observation of the Nearby Spiral Galaxy NGC 6946. *Eric M. Schlegel.* 434, 523, 235-A4 (1994)

High-Energy Spectra of Active Galactic Nuclei. I. The Catalog. *G. Malaguti, L. Bassani, & E. Caroli.* 94, 517, 59-B7 (1994)

The EMSS Catalog of X-Ray–selected Clusters of Galaxies. I. An Atlas of CCD Images of 41 Distant Clusters. *I. M. Gioia & G. A. Luppino.* 94, 583, 59-G13 (1994)

X-Ray Color Analysis of the Spectra of Active Galactic Nuclei. *Hagai Netzer, T. J. Turner, & Ian M. George.* 435, 106, 244-G1 (1994)

Mass Concentrations Associated with Extended X-Ray Sources in the Core of the Coma Cluster. *A. Vikhlinin, W. Forman, & C. Jones.* 435, 162, 245-E3 (1994)

The Soft X-Ray Properties of a Complete Sample of Optically Selected Quasars. I. First Results. *Ari Laor, Fabrizio Fiore, Martin Elvis, Belinda J. Wilkes, & Jonathan C. McDowell.* 435, 611, 254-E3 (1994)

The 1993 Multiwavelength Campaign on 3C 279: The Radio to Gamma-Ray Energy Distribution in Low State. *L. Maraschi, P. Grandi, C. M. Urry, A. E. Wehrle, G. M. Madejski, H. H. Fink, G. Ghisellini, R. C. Hartman, A. P. Koratkar, C. von Montigny, E. Pian, H. C. Thomas, A. Treves, M. F. Aller, H. D. Aller, C. D. Bailyn, T. J. Balonek, H. Bock, W. Collmar, I. S. Glass, S. J. Litchfield, I. M. McHardy, R. Méndez, J. Pesce, H. P. Reuter, E. I. Robson, H. Steppe, J. A. Stevens, H. Teräsranta, & S. J. Wagner.* 435, L91, 259-D8 (1994)

X-Ray Emission from Hickson's Compact Groups of Galaxies: Results from the *ROSAT* All-Sky Survey. *Harald Ebeling, Wolfgang Voges, & Hans Böhringer.* 436, 44, 261-G6 (1994)

A Unified Relativistic Beaming Model for BL Lacertae Objects and Flat Spectrum Radio Quasars. *Laura Maraschi & Fausto Rovetti.* 436, 79, 262-C13 (1994)

Rapid X-Ray Spectral Variability in NGC 3227. *A. Ptak, T. Yaqoob, P. J. Serlemitsos, R. Mushotzky, & C. Otani.* 436, L31, 268-G2 (1994)

Iron Line Emission and Two-Component Spectral Behavior in the *ASCA* Observation of the Seyfert 1 Galaxy NGC 7469. *Matteo Guainazzi, Masaru Matsuoka, Luigi Piro, Tatehiro Mihara, & Makoto Yamauchi.* 436, L35, 268-G10 (1994)

Detections of Hard X-Ray Emissions from Bright Early-Type Galaxies with *ASCA*. *K. Matsushita, K. Makishima, H. Awaki, C. R. Canizares, A. C. Fabian, Y. Fukazawa, M. Loewenstein, H. Matsumoto, T. Mihara, R. F. Mushotzky, T. Ohashi, G. R. Ricker, P. J. Serlemitsos, T. Tsuru, Y. Tsusaka, & T. Yamazaki.* 436, L41, 269-A5 (1994)

Fe K Emission from the Hidden Quasar IRAS P09104+4109. *A. C. Fabian, Y. Shioya, K. Iwasawa, K. Nandra, C. Crawford, R. Johnstone, H. Kunieda, R. McMahon, K. Makishima, T. Murayama, T. Ohashi, Y. Tanaka, Y. Taniguchi, & Y. Terashima.* 436, L51, 269-B9 (1994)

The X-Ray Spectrum of the Highly Polarized Quasar PKS 1502+106. *I. M. George, K. Nandra, T. J. Turner, & A. Celotti.* 436, L59, 269-C11 (1994)

Nonisothermality of the Hottest Cluster Abell 2163. *Maxim Markevitch, Koujun Yamashita, Akihiro Furuzawa, & Yuzuru Tawara.* 436, L71, 269-E7 (1994)

Emission Lines from Condensing Intracluster Gas. *G. Mark Voit, Megan Donahue, & Jonathan D. Slavin.* 95, 87, 65-C8 (1994)

Multiwavelength Tests of the Dusty Torus Model for Seyfert Galaxies. *John S. Mulchaey, Anuradha Koratkar, Martin J. Ward, Andrew S. Wilson, Mark Whittle, Robert R. J. Antonucci, Anne L. Kinney, & Todd Hurt.* 436, 586, 273-E10 (1994)

VLA Observations of the Rich X-Ray Cluster Abell 2256. *H. Röttgering, I. Snellen, G. Miley, J. P. de Jong, R. J. Hanisch, & R. Perley.* 436, 654, 274-E4 (1994)

An X-Ray Image of the Large Magellanic Cloud. *S. L. Snowden & R. Petre.* 436, L123, 281-A1 (1994)

A Simulation of the Intracluster Medium with Feedback from Cluster Galaxies. *Christopher A. Metzler & August E. Evrard.* 437, 564, 293-E8 (1994)

X-Ray Constraints on the Intergalactic Medium. *Thomas Aldcroft, Martin Elvis, Jonathan McDowell, & Fabrizio Fiore.* 437, 584, 293-G4 (1994)

X-Ray Reflection from Photoionized Media in Active Galactic Nuclei. *Piotr T. Życki, Julian H. Krolik, Andrzej A. Zdziarski, & Timothy R. Kallman.* 437, 597, 294-A6 (1994)

The X-Ray Spectra of Blazars: Analysis of the Complete *EXOSAT* Archive. *Rita M. Sambruna, Paul Barr, Paolo Giommi, Laura Maraschi, Gianpiero Tagliaferri, & Aldo Treves.* 95, 371, 69-D1 (1994)

Dark Matter in X-Ray–emitting Elliptical Galaxies. *F. De Paolis, G. Ingrosso, & F. Strafella.* 438, 83, 2-D11 (1995)

Rotating Cooling Flows. *Wilhelm Kley & William G. Mathews.* 438, 100, 2-F4 (1995)

Multiwavelength Monitoring of the BL Lacertae Object PKS 2155−304. III. Ground-based Observations in 1991 November. *T. J.-L. Courvoisier, A. Blecha, P. Bouchet, P. Bratschi, M. T. Carini, M. Donahue, R. Edelson, E. D. Feigelson, A. V. Filippenko, I. S. Glass, J. Heidt, R. I. Kollgaard, T. Matheson, H. R. Miller, J. C. Noble, K. Sekiguchi, P. S. Smith, C. M. Urry, & S. J. Wagner.* 438, 108, 2-G2 (1995)

Multiwavelength Monitoring of the BL Lacertae Object PKS 2155−304. IV. Multiwavelength Analysis. *R. Edelson, J. Krolik, G. Madejski, L. Maraschi, G. Pike, C. M. Urry, W. Brinkmann, T. J.-L. Courvoisier, J. Ellithorpe, K. Horne, A. Treves, S. Wagner, W. Wamsteker, R. Warwick, H. D. Aller, M. F. Aller, M. Ashley, A. Blecha, P. Bouchet, P. Bratschi,*

J. N. Bregman, M. Carini, A. Celotti, M. Donahue, E. Feigelson, A. V. Filippenko, H. Fink, I. George, I. Glass, J. Heidt, J. Hewitt, P. Hughes, R. Kollgaard, Y. Kondo, A. Koratkar, K. Leighly, A. Marscher, P. G. Martin, T. Matheson, H. R. Miller, J. C. Noble, P. O'Brien, E. Pian, G. Reichert, J. M. Saken, J. M. Shull, M. Sitko, P. S. Smith, W.-H. Sun, & G. Tagliaferri. 438, 120, 3-A4 (1995)

The Spectral Energy Distribution of the $z = 3$ Quasar: HS 1946+7658. *O. Kuhn, J. Bechtold, R. Cutri, M. Elvis, & M. Rieke.* 438, 643, 13-A8 (1995)

ROSAT Observations of the Luminous X-Ray Sources in M51. *A. P. Marston, D. Elmegreen, B. Elmegreen, W. Forman, C. Jones, & K. Flanagan.* 438, 663, 13-C9 (1995)

Joint *ROSAT–Compton GRO* Observations of the X-Ray–bright Seyfert Galaxy IC 4329A. *G. M. Madejski, A. A. Zdziarski, T. J. Turner, C. Done, R. F. Mushotzky, R. C. Hartman, N. Gehrels, A. Connors, A. C. Fabian, K. Nandra, A. Celotti, M. J. Rees, W. N. Johnson, J. E. Grove, & C. H. Starr.* 438, 672, 13-D7 (1995)

The Average X-Ray/Gamma-Ray Spectra of Seyfert Galaxies from *Ginga* and OSSE and the Origin of the Cosmic X-Ray Background. *Andrzej A. Zdziarski, W. Neil Johnson, Chris Done, David Smith, & Kellie McNaron-Brown.* 438, L63, 19-C11 (1995)

The Discovery of an O VII Emission Line in the *ASCA* Spectrum of the Seyfert Galaxy NGC 3783. *I. M. George, T. J. Turner, & H. Netzer.* 438, L67, 19-D4 (1995)

ROSAT HRI Images of Abell 85 and Abell 496: Evidence for Inhomogeneities in Cooling Flows. *Andrea H. Prestwich, Stephen J. Guimond, Christian B. Luginbuhl, & Marshall Joy.* 438, L71, 19-D11 (1995)

The Reliability of X-Ray Constraints of Intrinsic Cluster Shapes. *David A. Buote & John C. Tsai.* 439, 29, 21-E11 (1995)

On the X-Ray Spectra of BL Lacertae Objects. *P. Ciliegi, L. Bassani, & E. Caroli.* 439, 80, 22-C7 (1995)

ROSAT Observations of Coma Cluster Galaxies. *K. L. Dow & S. D. M. White.* 439, 113, 22-F9 (1995)

Extended Soft X-Ray Emission in Seyfert Galaxies: *ROSAT* HRI Observations of NGC 3516, NGC 4151, and Markarian 3. *Jon A. Morse, Andrew S. Wilson, Martin Elvis, & Kimberly A. Weaver.* 439, 121, 22-G6 (1995)

X-Ray Emission from Giant H II Regions in M101. *Rosa Murphy Williams & You-Hua Chu.* 439, 132, 23-A9 (1995)

High-Resolution X-Ray Imaging of the Starburst Galaxy M82. *Joel N. Bregman, Eric Schulman, & Kohji Tomisaka.* 439, 155, 23-C13 (1995)

ROSAT Detection of Diffuse Hot Gas in the Edge-on Galaxy NGC 4631. *Q. Daniel Wang, René A. M. Walterbos, Michael F. Steakly, Colin A. Norman, & Robert Braun.* 439, 176, 23-E13 (1995)

Abell 548: An X-Ray and Optical Analysis of Substructure. *David S. Davis, Christina M. Bird, Richard F. Mushotzky, & S. C. Odewahn.* 440, 48, 43-G9 (1995)

Pure Scattered Emission as an Explanation for the Hard X-Ray Spectra of Active Galactic Nuclei. *E. Jourdain & J. P. Roques.* 440, 128, 43-A2 (1995)

Low-Luminosity Active Galaxies: Are They Similar to Seyfert Galaxies? *A. Koratkar, S. E. Deustua, T. Heckman, A. V. Filippenko, L. C. Ho, & M. Rao.* 440, 132, 43-A9 (1995)

Hot Shocked Gas along the Jets of NGC 4258 (M106). *G. Cecil, A. S. Wilson, & C. De Pree.* 440, 181, 43-F3 (1995)

Relation between O VI Emission and X-Ray Intensity in Active Galactic Nuclei. *Wei Zheng, Gerard A. Kriss, & Arthur F. Davidsen.* 440, 606, 51-E2 (1995)

Emission Spectrum Integrated over an Accretion Disk: Comparison with Observations of Active Galactic Nuclei. *Toshiya Shimura & Fumio Takahara.* 440, 610, 51-E9 (1995)

ROSAT PSPC Observations of the Early-Type Galaxies NGC 507 and NGC 499: Central Cooling and Mass Determination. *Dong-Woo Kim & G. Fabbiano.* 441, 182, 61-G10 (1995)

The Interaction between Hot and Cold Gas in Early-Type Galaxies. *Joel N. Bregman, David E. Hogg, & Morton S. Roberts.* 441, 561, 69-F9 (1995)

High-Resolution X-Ray Imaging of M33. *Eric Schulman & Joel N. Bregman.* 441, 568, 69-G6 (1995)

A Multiparametric Analysis of the *Einstein* Sample of Early-Type Galaxies. I. Luminosity and ISM Parameters. *Paul B. Eskridge, Giuseppina Fabbiano, & Dong-Woo Kim.* 97, 141, 12-G6 (1995)

A Multiparametric Analysis of the *Einstein* Sample of Early-Type Galaxies. II. Galaxy Formation History and Properties of the Interstellar Medium. *Paul B. Eskridge, Giuseppina Fabbiano, & Dong-Woo Kim.* 442, 523, 87-B8 (1995)

Multifrequency Observations of Kaz 102 during the *ROSAT* All-Sky Survey. *A. Treves, H. H. Fink, M. Malkan, S. J. Wagner, B. J. Wilkes, F. Baganoff, J. Heidt, E. Pian, A. Sadun, S. Schaeidt, J. T. Bonnell, W. Brinkmann, D. de Martino, L. Maraschi, E. G. Tanzi, M. H. Ulrich, & W. Wamsteker.* 442, 589, 88-A9 (1995)

The Origin of the Soft X-Ray Excess in the Seyfert 2 Galaxy NGC 2110. *K. A. Weaver, R. F. Mushotzky, P. J. Serlemitsos, A. S. Wilson, M. Elvis, & U. Briel.* 442, 597, 88-B7 (1995)

ROSAT Observations of the Two Radio-selected Blazars PKS 1034−293 and PKS 1335−127. *L. Maraschi, A. Ciapi, G. Fossati, G. Tagliaferri, & A. Treves.* 443, 29, 95-E13 (1995)

An X-Ray Temperature Map of Abell 754: A Major Merger. *J. Patrick Henry & Ulrich G. Briel.* 443, L9, 102-C1 (1995)

ROSAT Observations of Compact Groups of Galaxies. *Rachel A. Pildis, Joel N. Bregman, & August E. Evrard.* 443, 514, 105-A1 (1995)

ROSAT Observations of Blazars from a Polarized Radio-selected Sample. *L. Maraschi, G. Fossati, G. Tagliaferri, & A. Treves.* 443, 578, 105-G4 (1995)

An Extended Galactic Population of Low-Luminosity X-Ray Sources (CVs?) and the Diffuse X-Ray Background. *Eyal Maoz & Jonathan E. Grindlay.* 444, 183, 115-G11 (1995)

A Search for "Failed Clusters" of Galaxies. *W. H. Tucker, H. Tananbaum, & R. A. Remillard.* 444, 532, 123-F11 (1995)

The Connection between X-Ray– and Radio-selected BL Lacertae Objects. *Paolo Padovani & Paolo Giommi.* 444, 567, 124-C2 (1995)

Diffuse Hot Gas in the NGC 4261 Group of Galaxies. *David S. Davis, Richard F. Mushotzky, John S. Mulchaey, D. M. Worrall, M. Birkinshaw, & David Burstein.* 444, 582, 124-D6 (1995)

Cooling Gas Outflows from Galaxies. *Boqi Wang.* 444, 590, 124-E3 (1995)

Detection of Soft Gamma-Ray Emission from the Seyfert 2 Galaxy NGC 4507 by the OSSE Telescope. *L. Bassani, G. Malaguti, E. Jourdain, J. P. Roques, & W. N. Johnson.* 444, L73, 130-C8 (1995)

ROSAT Observations of the Gravitationally Lensed System 0957+561. *G. Chartas, E. Falco, W. Forman, C. Jones, R. Schild, & I. Shapiro.* 445, 140, 134-C7 (1995)

A First Determination of the Surface Density of Galaxy Clusters at Very Low X-Ray Fluxes. *Piero Rosati, Roberto Della Ceca, Richard Burg, Colin Norman, & Riccardo Giacconi.* 445, L11, 140-C3 (1995)

Cosmological Implications of *ROSAT* Observations of Groups and Clusters of Galaxies. *Laurence P. David, Christine Jones, & William Forman.* 445, 578, 143-A8 (1995)

Wavelet Transform Analysis of the Small-Scale X-Ray Structure of the Cluster Abell 1367. *S. A. Grebenev, W. Forman, C. Jones, & S. Murray.* 445, 607, 143-D12 (1995)

ASCA and *ROSAT* Observations of NRAO 140 and IX Persei. *T. J. Turner, I. M. George, G. M. Madejski, S. Kitamoto, & T. Suzuki.* 445, 660, 144-B11 (1995)

ROSAT Observations of NGC 2146: Evidence for a Starburst-driven Superwind. *L. Armus, T. M. Heckman, K. A. Weaver, & M. D. Lehnert.* 445, 666, 144-C8 (1995)

Constraints on Cold Dark Matter Theories from Observations of Massive X-Ray–luminous Clusters of Galaxies at High Redshift. *G. A. Luppino & I. M. Gioia.* 445, L77, 150-D5 (1995)

The Effects of Substructure on Galaxy Cluster Mass Determinations. *Christina M. Bird.* 445, L81, 150-E1 (1995)

An Objective Multicolor Method for the Characterization of Low-Resolution X-Ray Spectra. *A. Collura, G. Micela, S. Sciortino, F. R. Harnden, Jr., & R. Rosner.* 446, 108, 154-F7 (1995)

Soft X-Ray Emission from the Spiral Galaxy NGC 1313. *Edward J. M. Colbert, Robert Petre, Eric M. Schlegel, & Stuart D. Ryder.* 446, 177, 155-F2 (1995)

Nonlinear Evolution of Internal Gravity Waves in Cluster Cooling Flows. *Eric A. Lufkin, Steven A. Balbus, & John F. Hawley.* 446, 529, 163-D5 (1995)

Evidence for an On-going Cluster/Group Merger in Abell 2255. *Jack O. Burns, Kurt Roettiger, Jason Pinkney, Rick A. Perley, Frazer N. Owen, & Wolfgang Voges.* 446, 583, 164-B8 (1995)

The Extreme Ultraviolet Spectrum of the BL Lacertae Object PKS 2155−304. *Arieh Königl, John F. Kartje, Stuart Bowyer, Steven M. Kahn, & Chorng-Yuan Hwang.* 446, 598, 164-D1 (1995)

Cosmological Constraints from Observed Cluster X-Ray Morphologies. *Joseph J. Mohr, August E. Evrard, Daniel G. Fabricant, & Margaret J. Geller.* 447, 8, 172-C12 (1995)

A Confirmation of 2–40 keV Spectral Complexity in Seyfert Galaxies. *K. A. Weaver, K. A. Arnaud, & R. F Mushotzky.* 447, 121, 173-G3 (1995)

Soft X-Ray Emission from NGC 5253 and the Ionized Interstellar Medium. *Crystal L. Martin & Robert C. Kennicutt, Jr.* 447, 171, 174-E2 (1995)

Observable Properties of X-Ray–heated Winds in Active Galactic Nuclei: Warm Reflectors and Warm Absorbers. *Julian H. Krolik & Gerard A. Kriss.* 447, 512, 182-G11 (1995)

Comparison of the Radio, Optical, and X-Ray Structures of the cD Galaxy in Abell 2597. *Craig L. Sarazin, Jack O. Burns, Kurt Roettiger, & Brian R. McNamara.* 447, 559, 183-D13 (1995)

ROSAT PSPC Observations of Two Dynamically Young Elliptical Galaxies: NGC 4125 and NGC 3610. *G. Fabbiano & François Schweizer.* 447, 572, 183-F7 (1995)

EXAFS and XANES: New Astrophysical Tools to Study the Solid State Structure of Interstellar Grains. *Jonathan W. Woo.* 447, L129, 191-C8 (1995)

A Multiparametric Analysis of the *Einstein* Sample of Early-Type Galaxies. III. Comparisons with the κ-Parameters. *Paul B. Eskridge, Giuseppina Fabbiano, & Dong-Woo Kim.* 448, 70, 193-B9 (1995)

An X-Ray and Optical Study of the Dwarf Galaxy NGC 1569: Evidence for a Starburst-driven Outflow. *Timothy M. Heckman, Michael Dahlem, Matthew D. Lehnert, Giuseppina Fabbiano, Diane Gilmore, & William H. Waller.* 448, 98, 193-E1 (1995)

Discovery of Extreme-Ultraviolet Radiation from the Seyfert Galaxy Ton S180 (= EUVE J0057−223). *Stéphane Vennes, Elisha Polomski, Stuart Bowyer, & John R. Thorstensen.* 448, L9, 199-C3 (1995)

A Search for Optically Quiet Quasars. *R. I. Kollgaard, E. D. Feigelson, S. A. Laurent-Muehleisen, H. Spinrad, A. Dey, & W. Brinkmann.* 449, 61, 211-A13 (1995)

The Complex Optical to Soft X-Ray Spectrum of Low-Redshift Radio-quiet Quasars. II. Comparison with Free-Free and Accretion Disk Models. *Fabrizio Fiore, Martin Elvis, Aneta Siemiginowska, Belinda J. Wilkes, Jonathan C. McDowell, & Smita Mathur.* 449, 74, 211-C1 (1995)

Pair Cascades in Extragalactic Jets. II. The Beamed X-Ray Spectrum. *Amir Levinson & Roger Blandford.* 449, 86, 211-D2 (1995)

The X-Ray Environment of the Dumbbell Radio Galaxy NGC 326. *D. M. Worrall, M. Birkinshaw, & R. A. Cameron.* 449, 93, 211-D13 (1995)

OSSE Observations of Gamma-Ray Emission from Centaurus A. *R. L. Kinzer, W. N. Johnson, C. D. Dermer, J. D. Kurfess, M. S. Strickman, J. E. Grove, R. A. Kroeger, D. A. Grabelsky, W. R. Purcell, M. P. Ulmer, G. V. Jung, & K. McNaron-Brown.* 449, 105, 211-F1 (1995)

Groups of Galaxies in the *ROSAT* North Ecliptic Pole Survey. *J. P. Henry, I. M. Gioia, J. P. Huchra, R. Burg, B. McLean, H. Böhringer, R. G. Bower, U. G. Briel, W. Voges, H. MacGillivray, & R. G. Cruddace.* 449, 422, 218-E6 (1995)

Velocity Bias from Merging in Clusters of Galaxies: The $\beta < 1$ Problem. *R. Fusco-Femiano & N. Menci.* 449, 431, 218-F13 (1995)

ROSAT Observations of Distant Clusters of Galaxies. *Megan Donahue & John T. Stocke.* 449, 554, 220-D8 (1995)

Spectral Variability of the X-Ray–bright BL Lacertae Object PKS 2005−489. *Rita M. Sambruna, C. Megan Urry, Gabriele Ghisellini, & Laura Maraschi.* 449, 567, 220-E12 (1995)

Discovery of Inverse-Compton X-Rays in Radio Lobes. *E. D. Feigelson, S. A. Laurent-Muehleisen, R. I. Kollgaard, & E. B. Fomalont.* 449, L149, 227-E6 (1995)

The Soft X-Ray Properties of a Large Optical QSO Sample: *ROSAT* Observations of the Large Bright Quasar Survey. *Paul J. Green, Norbert Schartel, Scott F. Anderson, Paul C. Hewett, Craig B. Foltz, Wolfgang Brinkmann, Henner Fink, Joachim Trümper, & Bruce Margon.* 450, 51, 228-G1 (1995)

Cooling Flow Models of the X-Ray Emission and Temperature Profiles for a Sample of Elliptical Galaxies. *G. Bertin & T. Toniazzo.* 451, 111, 247-F1 (1995)

An *ASCA* X-Ray Spectrum of a Prototype Bare Seyfert 1 Nucleus in MCG −2-58-22. *K. A. Weaver, J. Nousek, T. Yaqoob, K. Hayashida, & S. Murakami.* 451, 147, 248-B1 (1995)

Substructure: Clues to the Formation of Clusters of Galaxies. *Michael J. West, Christine Jones, & William Forman.* 451, L5, 252-B5 (1995)

Multifrequency Spectra of *EXOSAT* Blazars. *K. K. Ghosh & S. Soundararajaperumal.* 100, 37, 46-D12 (1995)

The Distribution of Mass and Gas in the Center of Clusters of Galaxies Implied by X-Ray and Lensing Observations. *Eli Waxman & Jordi Miralda-Escudé.* 451, 451, 253-E6 (1995)

Matched Filter Source Detection Applied to the *ROSAT* PSPC and the Determination of the Number-Flux Relation. *A. Vikhlinin, W. Forman, C. Jones, & S. Murray.* 451, 542, 254-F10 (1995)

ROSAT Extended Medium-Deep Sensitivity Survey: Source Counts for 130 Fields. *A. Vikhlinin, W. Forman, C. Jones, & S. Murray.* 451, 553, 254-G10 (1995)

ROSAT Extended Medium-Deep Sensitivity Survey: Average Source Spectra. *A. Vikhlinin, W. Forman, C. Jones, & S. Murray.* 451, 564, 255-A10 (1995)

OSSE Observations of Blazars. *K. McNaron-Brown, W. N. Johnson, G. V. Jung, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, C. D. Dermer, D. A. Grabelsky, W. R. Purcell, M. P. Ulmer, M. Kafatos, P. A. Becker, R. Staubert, & M. Maisack.* 451, 575, 255-B11 (1995)

Problems with Cold Clouds and Cooling Flows. *G. Mark Voit & Megan Donahue.* 452, 164, 264-C9 (1995)

Testing Unified X-Ray/Ultraviolet Absorber Models with NGC 5548. *Smita Mathur, Martin Elvis, & Belinda Wilkes.* 452, 230, 265-C2 (1995)

Quantifying the Morphologies and Dynamical Evolution of Galaxy Clusters. I. The Method. *David A. Buote & John C. Tsai.* 452, 522, 271-G11 (1995)

Spectral Evidence for Shock-ionized Gas along the Jets of NGC 4258. *Gerald Cecil, Jon A. Morse, & Sylvain Veilleux.* 452, 613, 273-B4 (1995)

Diffuse X-Ray Emission from M101. *S. L. Snowden & W. Pietsch.* 452, 627, 273-C12 (1995)

The Velocity Dispersion–Temperature Correlation from a Limited Cluster Sample. *Christina M. Bird, Richard F. Mushotzky, & Christopher A. Metzler.* 453, 40, 281-F13 (1995)

Detection of Inverse-Compton X-Rays from Lobes of the Radio Galaxy Fornax A. *H. Kaneda, M. Tashiro, Y. Ikebe, Y. Ishisaki, H. Kubo, K. Makishima, T. Ohashi, Y. Saito, H. Tabara, & T. Takahashi.* 453, L13, 289-D1 (1995)

No X-Ray–luminous Starbursts in the *Einstein* Medium Sensitivity Survey, Either. *Jules P. Halpern, David J. Helfand, & Edward C. Moran.* 453, 611, 292-C10 (1995)

On the Origin of Temperature Substructure within Merging Clusters of Galaxies: Abell 2256. *Kurt Roettiger, Jack O. Burns, & Jason Pinkney.* 453, 634, 292-E11 (1995)

Intracluster Globular Clusters. *Michael J. West, Patrick Côté, Christine Jones, William Forman, & Ronald O. Marzke.* 453, L77, 298-D1 (1995)

The Iron Kα Line Profile in NGC 4151. *T. Yaqoob, R. Edelson, K. A. Weaver, R. S. Warwick, R. F. Mushotzky, P. J. Serlemitsos, & S. S. Holt.* 453, L81, 298-D8 (1995)

Relativistic Jets and the Fanaroff-Riley Classification of Radio Galaxies. *Geoffrey V. Bicknell.* 101, 29, 53-D4 (1995)

First Maps of the Soft X-Ray Diffuse Background from the *ROSAT* XRT/PSPC All-Sky Survey. *S. L. Snowden, M. J. Freyberg, P. P. Plucinsky, J. H. M. M. Schmitt, J. Trümper, W. Voges, R. J. Edgar, D. McCammon, & W. T. Sanders.* 454, 643, 310-D9 (1995)

The Underlying Distribution of Optical to X-Ray Spectral Index for Quasars in the Presence of Detection Thresholds. *Y. Avni, D. M. Worrall, & W. A. Morgan, Jr.* 454, 673, 311-A1 (1995)

Strong X-Ray Absorption in a Broad Absorption Line Quasar: PHL 5200. *Smita Mathur, Martin Elvis, & K. P. Singh.* 455, L9, 324-D1 (1995)

Hard X-Ray Emission from Extragalactic *IRAS* 12 Micron Sources: Constraints on the Unified Active Galactic Nucleus Model and the Synthesis of the X-Ray Background. *Xavier Barcons, Alberto Franceschini, Gianfranco De Zotti, Luigi Danese, & Takamitsu Miyaji.* 455, 480, 328-E7 (1995)

The Destruction of a Compact Group of Galaxies. *Rachel A. Pildis.* 455, 492, 328-F8 (1995)

ROSAT X-Ray Observations of the 2A 0335+096 Cluster of Galaxies. *Jimmy A. Irwin & Craig L. Sarazin.* 455, 497, 328-G3 (1995)

The Hard X-Ray Emission of NGC 3628 and the Contribution of Low-Luminosity Spiral Galaxies to the Cosmic X-Ray Background. *Tahir Yaqoob, Peter J. Serlemitsos, Andy Ptak, Richard Mushotzky, Hideyo Kunieda, & Yuichi Terashima.* 455, 508, 329-A4 (1995)

Detection of the Angular Correlation of Faint X-Ray Sources. *A. Vikhlinin & W. Forman.* 455, L109, 333-D10 (1995)

X-RAYS: GENERAL

Birthrates of Galactic Millisecond Pulsars and Their Low-Mass X-Ray Binary Precursors. *Marco Tavani.* 366, L27, 6-D1 (1991)

Limits on the Density of Neutral Gas within 100 Parsecs from Observations of the Soft X-Ray Background. *M. Juda, J. J. Bloch, B. C. Edwards, D. McCammon, W. T. Sanders, S. L. Snowden, & J. Zhang.* 367, 182, 14-C8 (1991)

Comptonization of Gamma Rays by Cold Electrons. *Yueming Xu, Randy R. Ross, & Richard McCray.* 371, 280, 63-E11 (1991)

A Recipe for Making Hot Accretion Disks. *Gunnlaugur Björnsson & Roland Svensson.* 371, L69, 73-C10 (1991)

Unsaturated Comptonization of Isotropic Photon Spectra by Relativistic Electrons. *Abraham Loeb, Christopher F. McKee, & Ofer Lahav.* 374, 44, 98-E5 (1991)

Determination of Confidence Limits for Experiments with Low Numbers of Counts. *Ralph P. Kraft, David N. Burrows, & John A. Nousek.* 374, 344, 102-D1 (1991)

On the Distribution of the Diffuse Galactic Gamma-Ray Line Emissions at 1809 keV and 511 keV. *P. von Ballmoos.* 380, 98, 177-C1 (1991)

Search for Starbursts among X-Ray–selected Galaxies: Optical Spectroscopy. *Antonella Fruscione & Richard E. Griffiths.* 380, L13, 181-C1 (1991)

Supernova Remnants in Dense Clouds. I. Blast-Wave Dynamics and X-Ray Irradiation. *B. T. Draine & D. T. Woods.* 383, 621, 222-A6 (1991)

Variability of the Galactic Center in the Hard X-Ray Range. *A. Bazzano, C. La Padula, P. Ubertini, & R. K. Sood.* 385, L17, 17-C1 (1992)

The Semicircular Shell of CTB 109. *Zhenru Wang, Quinyue Qu, Ding Luo, Richard McCray, & Mordecai-Mark Mac Low.* 388, 127, 50-E10 (1992)

On the Optical Counterpart of 1E 1207.4−5209, the Central X-Ray Source of a Ring-shaped Supernova Remnant. *Giovanni F. Bignami, Patrizia A. Caraveo, & Sandro Mereghetti.* 389, L67, 73-D5 (1992)

X-Ray Nova in Musca (GRS 1124−68): Hard X-Ray Source with Narrow Annihilation Line. *R. Sunyaev, E. Churazov, M. Gilfanov, A. Dyachkov, N. Khavenson, S. Grebenev, R. Kremnev, K. Sukhanov, A. Goldwurm, J. Ballet, B. Cordier, J. Paul, M. Denis, G. Vedrenne, M. Niel, & E. Jourdain.* 389, L75, 73-E1 (1992)

SIGMA/*GRANAT* Soft Gamma-Ray Observations of the X-Ray Nova in Musca: Discovery of Positron Annihilation Emission Line. *A. Goldwurm, J. Ballet, B. Cordier, J. Paul, L. Bouchet, J. P. Roques, D. Barret, P. Mandrou, R. Sunyaev, E. Churazov, M. Gilfanov, A. Dyachkov, N. Khavenson, V. Kovtunenko, R. Kremnev, & K. Sukhanov.* 389, L79, 73-E6 (1992)

L-Shell X-Ray Opacity of Many-Electron Atoms. *Young-Dae Jung & Robert J. Gould.* 391, 403, 91-A7 (1992)

The *Einstein* Slew Survey. *Martin Elvis, David Plummer, Jonathan Schachter, & G. Fabbiano.* 80, 257, 25-E9 (1992)

Optimal Grazing Incidence Optics and Its Application to Wide-Field X-Ray Imaging. *Christopher J. Burrows, Richard Burg, & Riccardo Giacconi.* 392, 760, 111-F13 (1992)

The Particle Background of the *ROSAT* PSPC. *S. L. Snowden, P. P. Plucinsky, U. Briel, G. Hasinger, & E. Pfeffermann.* 393, 819, 126-B1 (1992)

A Jet Model for the Gamma-Ray–emitting Blazar 3C 279. *L. Maraschi, G. Ghisellini, & A. Celotti.* 397, L5, 173-B4 (1992)

Oriented Scintillation Spectrometer Experiment Observations of ^{57}Co in SN 1987A. *J. D. Kurfess, W. N. Johnson, R. L. Kinzer, R. A. Kroeger, M. S. Strickman, J. E. Grove, M. D. Leising, D. D. Clayton, D. A. Grabelsky, W. R. Purcell, M. P. Ulmer, R. A. Cameron, & G. V. Jung.* 399, L137, 208-B7 (1992)

Light Element Nucleosynthesis: A False Clue? *N. Yu. Gnedin & J. P. Ostriker.* 400, 1, 209-A13 (1992)

Photoelectric Absorption Cross Sections with Variable Abundances. *Monika Batucińska-Church & Dan McCammon.* 400, 699, 219-B11 (1992)

The Unstable Long-Term Periodicity of Aquila X-1. *Shunji Kitamoto, Hiroshi Tsunemi, Sigenori Miyamoto, & Diane Roussel-Dupre.* 403, 315, 17-F13 (1993)

High-Resolution Measurements, Line Identification, and Spectral Modeling of Kα Transitions in Fe XVIII–Fe XXV. *P. Beiersdorfer, T. Phillips, V. L. Jacobs, K. W. Hill, M. Bitter, S. von Goeler, & S. M. Kahn.* 409, 846, 109-F6 (1993)

On the Origin of the Soft X-Ray Background. *Q. Daniel Wang & Richard McCray.* 409, L37, 111-B8 (1993)

Ionized Absorbers, Ionized Emitters, and the X-Ray Spectrum of Active Galactic Nuclei. *Hagai Netzer.* 411, 594, 137-A10 (1993)

A Turbulent Model of Time Variability in X-Ray Binary Pulsars. *Masahiro Hoshino & Toshiaki Takeshima.* 411, L79, 142-D9 (1993)

A Comparison of the Cosmic Microwave and Cosmic X-Ray Backgrounds: Constraints on Local Sources of the Fluctuations Observed by *COBE*. *S. P. Boughn & K. Jahoda.* 412, L1, 148-A9 (1993)

An Updated Calibration of the *ROSAT* PSPC Particle Background for the Analysis of Diffuse and Extended Sources. *P. P. Plucinsky, S. L. Snowden, U. G. Briel, G. Hasinger, & E. Pfeffermann.* 418, 519, 237-D10 (1993)

Three Years of Monitoring GRS 1758−258: An Extremely Hard X-Ray Source near GX 5−1. *M. Gilfanov, E. Churazov, R. Sunyaev, N. Khavenson, B. Novikov, A. Dyachkov, R. Kremnev, K. Sukhanov, L. Bouchet, P. Mandrou, J. P. Roques, G. Vedrenne, B. Cordier, A. Goldwurm, P. Laurent, & J. Paul.* 418, 844, 243-A13 (1993)

ROSAT Observations of Nine Globular Clusters. *S. Rappaport, D. Dewey, A. Levine, & L. Macri.* 423, 633, 56-D2 (1994)

Analysis Procedures for *ROSAT* XRT/PSPC Observations of Extended Objects and the Diffuse Background. *S. L. Snowden, D. McCammon, D. N. Burrows, & J. A. Mendenhall.* 424, 714, 73-F7 (1994)

The Detection of X-Ray Emission from the Highest Redshift Galaxy Clusters. *Francisco J. Castander, Richard S. Ellis, Carlos S. Frenk, Alan Dressler, & James E. Gunn.* 424, L79, 78-F9 (1994)

X-Ray and Gamma-Ray Emission of Sagittarius A* as a Wind-accreting Black Hole. *A. Mastichiadis & L. M. Ozernoy.* 426, 599, 105-G7 (1994)

X-Ray Observations of Supernova Remnants as Distance Indicators. *Namir E. Kassim, Paul Hertz, Schuyler D. Van Dyk, & Kurt W. Weiler.* 427, L95, 127-B5 (1994)

A Review of Recent Results in Gamma-Ray Astronomy Obtained from High-Altitude Balloons. *B. J. Teegarden.* 92, 363, 36-F3 (1994)

Observation of Transient High-Energy Emission Features in the Spectra of Black Hole Candidates and the Crab Nebula by *GRANAT*/SIGMA. *M. Gilfanov, E. Churazov, R. Sunyaev, N. Khavenson, B. Novikov, A. Dyachkov, I. Tserenin, K. Sukhanov, L. Bouchet, M. Denis, M. C. Schmitz-Fraysse, P. Mandrou, J. Paul, B. Cordier, A. Goldwurm, & F. Lebrun.* 92, 411, 37-C6 (1994)

On Thermal Comptonization in $e^{\pm}$ Pair Plasmas. *Gabriele Ghisellini & Francesco Haardt.* 429, L53, 157-G7 (1994)

A Sensitive 1.5 GHz Radio Survey around the North Ecliptic Pole. *Ronald I. Kollgaard, Wolfgang Brinkmann, Margaret McMath Chester, Eric D. Feigelson, Paul Hertz, Patricia Reich, & Richard Wielebinski.* 93, 145, 43-F10 (1994)

MACHOs and the Diffuse X-Ray Background. *V. Kashyap, R. Rosner, D. Schramm, & J. Truran.* 431, L87, 191-E2 (1994)

Hard X-Rays from SN 1993J. *M. D. Leising, J. D. Kurfess, D. D. Clayton, D. A. Grabelsky, J. E. Grove, W. N. Johnson, G. V. Jung, R. L. Kinzer, R. A. Kroeger, W. R. Purcell, M. S. Strickman, L.-S. The, & M. P. Ulmer.* 431, L95, 191-F1 (1994)

A Model for the X-Ray and Ultraviolet Emission from Seyfert Galaxies and Galactic Black Holes. *Francesco Haardt, Laura Maraschi, & Gabriele Ghisellini.* 432, L95, 206-F7 (1994)

Statistical Uncertainties in Temperature Diagnostics for Hot Coronal Plasma Using the *ASCA* SIS. *Douglas A. Swartz, S. L. O'Dell, M. E. Sulkanen, & A. F. Tennant, Jr.* 435, L149, 260-D11 (1994)

The Evolution of X-Ray Clusters in a Cold Plus Hot Dark Matter Universe. *Greg L. Bryan, Anatoly Klypin, Chris Loken, Michael L. Norman, & Jack O. Burns.* 437, L5, 291-B8 (1994)

The Derived Population of Luminous Supersoft X-Ray Sources. *R. Di Stefano & S. Rappaport.* 437, 733, 295-G1 (1994)

An Accurate Galactic N_H Map of the North Ecliptic Pole. *Martin Elvis, Felix J. Lockman, & C. Fassnacht.* 95, 413, 70-A6 (1994)

New Calculations of Fe *L*-Shell X-Ray Spectra in High-Temperature Plasmas. *Duane A. Liedahl, Albert L. Osterheld, & William H. Goldstein.* 438, L115, 20-D2 (1995)

Calibrating the Broad Band X-Ray Telescope. *K. A. Weaver, K. A. Arnaud, E. A. Boldt, D. Christian, M. Corcoran, S. S. Holt, K. Jahoda, R. Kelley, F. E. Marshall, R. F. Mushotzky, R. Petre, G. Rawley, P. J. Serlemitsos, E. M. Schlegel, A. P. Smale, J. H. Swank, A. E. Szymkowiak, & S. Yamauchi.* 96, 303, 5-D13 (1995)

Images of HCO^+ (1–0) Emission in a Molecular Cloud near 1E 1740.7−2942. *J. A. Phillips & T. Joseph W. Lazio.* 442, L37, 85-B7 (1995)

The Nuclear X-Ray Source in NGC 3628: A Strange Active Galactic Nucleus or the Most Luminous High-Mass X-Ray Binary Known? *Michael Dahlem, Timothy M. Heckman, & Giuseppina Fabbiano.* 442, L49, 94-C9 (1995)

A First Determination of the Surface Density of Galaxy Clusters at Very Low X-Ray Fluxes. *Piero Rosati, Roberto Della Ceca, Richard Burg, Colin Norman, & Riccardo Giacconi.* 445, L11, 140-C3 (1995)

Infrared Response of H_2 to X-Rays. *R. Gredel & A. Dalgarno.* 446, 852, 167-G7 (1995)

The Galactic Distribution of Low-Mass X-Ray Binaries. *J. van Paradijs & N. White.* 447, L33, 181-A3 (1995)

On the Geometry of the X-Ray–Emitting Region in Seyfert Galaxies. *Boris E. Stern, Juri Poutanen, Roland Svensson, Marek Sikora, & Mitchell C. Begelman.* 449, L13, 216-B9 (1995)

Old Isolated Accreting Neutron Stars: Contribution to the Soft X-Ray Background in the 0.5–2 keV Band. *Silvia Zane, Roberto Turolla, Luca Zampieri, Monica Colpi, & Aldo Treves.* 451, 739, 257-D2 (1995)

Disk-Corona Model of Active Galactic Nuclei with Nonthermal Pairs. *Sachiko Tsuruta & Michael Kellen.* 453, L9, 289-C7 (1995)

First Maps of the Soft X-Ray Diffuse Background from the *ROSAT* XRT/PSPC All-Sky Survey. *S. L. Snowden, M. J. Freyberg, P. P. Plucinsky, J. H. M. M. Schmitt, J. Trümper, W. Voges, R. J. Edgar, D. McCammon, & W. T. Sanders.* 454, 643, 310-D9 (1995)

Fine-Structure Resolved Dielectronic Recombination Rates for the $n = 3$ Excited Configurations of Fe XVI–Fe XIX. *Arati Dasgupta.* 101, 401, 59-C4 (1995)

X-RAYS: INTERSTELLAR

Discovery of X-Ray Emission Associated with the Gum Nebula. *D. A. Leahy, J. Nousek, & G. Garmire.* 385, 561, 20-B4 (1992)

A New Scheme for Multidimensional Line Transfer. II. ETLA Method in One Dimension with Application to Iron Kα Lines. *John I. Castor, Pieter G. Dykema, & Richard I. Klein.* 387, 561, 45-F1 (1992)

ROSAT Wide Field Camera Minisurvey of the Diffuse Sky Background in 90–188 eV Soft X-Rays. *R. Lieu, J. J. Quenby, S. D. Sidher, T. J. Sumner, R. Willingale, R. G. West, A. W. Harris, S. L. Snowden, & K. Bickert.* 397, 158, 170-A1 (1992)

The Soft X-Ray Diffuse Background Observed with the *HEAO 1* Low-Energy Detectors. *G. P. Garmire, J. A. Nousek, K. M. V. Apparao, D. N. Burrows, R. L. Fink, & R. P. Kraft.* 399, 694, 206-E1 (1992)

The Radio Counterpart of the Hard X-Ray Source GRS 1758−258. *L. F. Rodríguez, I. F. Mirabel, & J. Martí.* 401, L15, 227-C1 (1992)

Hard X-Rays from the Orion Nebula Region. *Shigeo Yamauchi & Katsuji Koyama.* 405, 268, 44-D8 (1993)

A Multiwavelength Study of the Eridanus Soft X-Ray Enhancement. *D. N. Burrows, K. P. Singh, J. A. Nousek, G. P. Garmire, & J. Good.* 406, 97, 56-C7 (1993)

An Observation of the Galactic Center Hard X-Ray Source, 1E 1740.7−2942, with the Caltech Coded-Aperture Telescope. *William A. Heindl, Walter R. Cook, John M. Grunsfeld, David M. Palmer, Thomas A. Prince, Stephen M. Schindler, & Edward C. Stone.* 408, 507, 91-E7 (1993)

The X-Ray Shadow of the High-Latitude Molecular Cloud MBM 12. *S. L. Snowden, D. McCammon, & F. Verter.* 409, L21, 104-D1 (1993)

Radio and X-Ray Observations of OH 231.8+4.2. *Gregory B. Taylor & Mark Morris.* 409, 720, 108-A9 (1993)

On the Source Function of the Soft X-Ray Diffuse Background. *David N. Burrows & Ralph P. Kraft.* 411, 685, 138-C1 (1993)

Hot Bubbles in a Magnetic Interstellar Medium: Another Look at the Soft X-Ray Background. *Richard J. Edgar & Donald P. Cox.* 413, 190, 158-D10 (1993)

Hidden Supernova Remnants in the Large Magellanic Cloud H II Complex N44. *You-Hua Chu, Mordecai-Mark Mac Low, Guillermo Garcia-Segura, Bart Wakker, & Robert C. Kennicutt, Jr.* 414, 213, 172-F2 (1993)

High-Resolution X-Ray Spectroscopy of the Supernova Remnant N132D. *Una Hwang, John P. Hughes, Claude R. Canizares, & Thomas H. Markert.* 414, 219, 172-F11 (1993)

The Discovery of a Supernova Remnant Embedded in a Giant H II Region of M33. *Shawn M. Gordon, Robert P. Kirshner, Nebojsa Duric, & Knox S. Long.* 418, 743, 241-F10 (1993)

ROSAT Observations of the Composite Supernova Remnant G326.3−1.8. *Namir E. Kassim, Paul Hertz, & Kurt W. Weiler.* 419, 733, 256-F13 (1993)

X-RAYS: ISM

ROSAT Observations of VRO 42.05.01. *David N. Burrows & Zhiyu Guo.* 421, L19, 21-E7 (1994)

The Outer Shell of SNR 0540−69.3. *F. D. Seward & F. R. Harnden, Jr.* 421, 581, 25-D5 (1994)

Elemental Abundances of the Supernova Remnant G292.0+1.8: Evidence for a Massive Progenitor. *John P. Hughes & K. P. Singh.* 422, 126, 31-F1 (1994)

Two-Temperature X-Ray Emission from the Planetary Nebula NGC 7293. *D. A. Leahy, C. Y. Zhang, & Sun Kwok.* 422, 205, 32-F1 (1994)

An *Einstein* Survey of the 1 keV Soft X-Ray Background in the Galactic Plane. *John M. Stanford & Jean-Pierre Caillault.* 424, 671, 73-C1 (1994)

CCD Soft X-Ray Observations of the Puppis A Supernova Remnant. *G. D. Berthiaume, D. N. Burrows, G. P. Garmire, & J. A. Nousek.* 425, 132, 81-G8 (1994)

Multiwavelength Approach to Gamma-Ray Sources in the Galactic Center Region. *I. F. Mirabel.* 92, 369, 36-F12 (1994)

Is the Galactic Center Annihilator 1E 1740.7−2942 a Source of MeV Gamma-Ray Continuum Emission? *Philippe Laurent & Jacques Paul.* 92, 375, 36-G5 (1994)

On the X-Ray Spectrum of Kepler's Supernova Remnant. *Kazimierz J. Borkowski, Craig L. Sarazin, & John M. Blondin.* 429, 710, 154-E1 (1994)

Soft X-Ray and H I Surveys of the Low N_H Region in Ursa Major. *S. L. Snowden, G. Hasinger, K. Jahoda, Felix J. Lockman, D. McCammon, & W. T. Sanders.* 430, 601, 169-C9 (1994)

An X-Ray and Optical Study of the Supernova Remnant W44. *Jeonghee Rho, R. Petre, Eric M. Schlegel, & J. Jeff Hester.* 430, 757, 171-C8 (1994)

Ionization Nebulae Surrounding Supersoft X-Ray Sources. *S. Rappaport, E. Chiang, T. Kallman, & R. Malina.* 431, 237, 179-B1 (1994)

An X-Ray Study of Five Supernova Remnants in the Carina Spiral Arm. *Una Hwang & Thomas H. Markert.* 431, 819, 188-G5 (1994)

MACHOs and the Diffuse X-Ray Background. *V. Kashyap, R. Rosner, D. Schramm, & J. Truran.* 431, L87, 191-E2 (1994)

The Nature of the Compact X-Ray Source in the Supernova Remnant G27.4+0.0. *David J. Helfand, R. H. Becker, G. Hawkins, & R. L. White.* 434, 627, 236-D9 (1994)

Detections of Hard X-Ray Emissions from Bright Early-Type Galaxies with *ASCA*. *K. Matsushita, K. Makishima, H. Awaki, C. R. Canizares, A. C. Fabian, Y. Fukazawa, M. Loewenstein, H. Matsumoto, T. Mihara, R. F. Mushotzky, T. Ohashi, G. R. Ricker, P. J. Serlemitsos, T. Tsuru, Y. Tsusaka, & T. Yamazaki.* 436, L41, 269-A5 (1994)

An X-Ray Image of the Large Magellanic Cloud. *S. L. Snowden & R. Petre.* 436, L123, 281-A1 (1994)

ROSAT PSPC Observation of the Northeast Region of the Vela Supernova Remnant. I. Evidence of Thermal Structure on a Scale of 5′. *F. Bocchino, A. Maggio, & S. Sciortino.* 437, 209, 286-B1 (1994)

Nonequilibria in Thermal Emission from Supernova Remnants. *Kuniaki Masai.* 437, 770, 296-C2 (1994)

ROSAT Observations of the Eridanus Soft X-Ray Enhancement. *S. L. Snowden, D. N. Burrows, W. T. Sanders, B. Aschenbach, & E. Pfeffermann.* 439, 399, 26-E11 (1995)

Ionization Nebulae Surrounding CAL 83 and Other Supersoft X-Ray Sources. *R. A. Remillard, S. Rappaport, & L. M. Macri.* 439, 646, 33-C11 (1995)

A *ROSAT* Observation of the Supernova Remnant Kesteven 79. *F. D. Seward & T. Velusamy.* 439, 715, 34-D13 (1995)

ROSAT Observations of the Unusual Supernova Remnant CTB 80 Containing the Pulsar PSR 1951+32. *Samar Safi-Harb, Hakki Ögelman, & John P. Finley.* 439, 722, 34-E10 (1995)

Evidence for Elemental Variation in the Ejecta of the Tycho Supernova Remnant. *O. Vancura, P. Gorenstein, & John P. Hughes.* 441, 680, 71-D1 (1995)

ROSAT Observations of the Supernova Remnant 3C 400.2. *Jon M. Saken, Knox S. Long, William P. Blair, & P. Frank Winkler.* 443, 231, 98-C6 (1995)

High-Resolution Measurements of the Kα Spectra of Low-Ionization Species of Iron: A New Spectral Signature of Nonequilibrium Ionization Conditions in Young Supernova Remnants. *V. Decaux, P. Beiersdorfer, A. Osterheld, M. Chen, & S. M. Kahn.* 443, 464, 101-D13 (1995)

An X-Ray and Optical Study of the Interaction of the Cygnus Loop Supernova Remnant with an Interstellar Cloud. *James R. Graham, N. A. Levenson, J. J. Hester, J. C. Raymond, & R. Petre.* 444, 787, 127-C8 (1995)

ASCA Observations of the Large Magellanic Cloud Supernova Remnant Sample: Typing Supernovae from Their Remnants. *John P. Hughes, Ichizo Hayashi, David Helfand, Una Hwang, Masayuki Itoh, Robert Kirshner, Katsuji Koyama, Thomas Markert, Hiroshi Tsunemi, & Jonathan Woo.* 444, L81, 130-E1 (1995)

The Optical Counterpart to the Extremely Luminous X-Ray Source near Holmberg IX: A Possible Supershell in a Tidal Tail. *Bryan W. Miller.* 446, L75, 170-G4 (1995)

ROSAT Observations of the Supernova Remnant W51C. *Bon-Chul Koo, Kee-Tae Kim, & Frederick D. Seward.* 447, 211, 175-B8 (1995)

WFPC2 Studies of the Crab Nebula. I. *HST* and *ROSAT* Imaging of the Synchrotron Nebula. *J. Jeff Hester, Paul A. Scowen, Ravi Sankrit, Christopher J. Burrows, John S. Gallagher III, Jon A. Holtzman, Alan Watson, John T. Trauger, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, Richard E. Griffiths, John G. Hoessel, John Krist, Roger Lynds, Jeremy R. Mould, Earl J. O'Neil, Jr., Karl R. Stapelfeldt, & James A. Westphal.* 448, 240, 195-D12 (1995)

Diffuse X-Ray Emission from the Hydrogen-deficient Planetary Nebula Abell 30. *You-Hua Chu & Ching-Hwa Ho.* 448, L127, 209-F9 (1995)

A *ROSAT*-detected, New Galactic Supernova Remnant in Sagittarius, G13.3−1.3. *F. D. Seward, T. M. Dame, R. A. Fesen, & B. Aschenbach.* 449, 681, 222-B7 (1995)

X-Rays from Superbubbles in the Large Magellanic Cloud. III. X-Ray–dim Superbubbles. *You-Hua Chu, Hsiao-wei Chang, Yu-ling Su, & Mordecai-Mark Mac Low.* 450, 157, 230-B13 (1995)

Luminous Supersoft X-Ray Sources and the Planetary Nebula Luminosity Function. *R. Di Stefano, F. Paerels, & S. Rappaport.* 450, 705, 240-D10 (1995)

Discovery of Diffuse X-Ray Emission in 47 Tucanae. *Martin Krockenberger & Jonathan E. Grindlay.* 451, 200, 248-F11 (1995)

X-Ray Morphology, Kinematics, and Geometry of the Eridanus Soft X-Ray Enhancement. *Z. Guo, D. N. Burrows, W. T. Sanders, S. L. Snowden, & B. E. Penprase.* 453, 256, 284-E7 (1995)

X-Ray Emission from the Supernova Remnant CTA 1. *F. D. Seward, B. Schmidt, & P. Slane.* 453, 284, 285-A11 (1995)

The X-Ray Emission of 3C 58 Revisited. *David J. Helfand, Robert H. Becker, & Richard L. White.* 453, 741, 294-A12 (1995)

Radio Monitoring of GRS 1915+105. *L. F. Rodríguez, E. Gerard, I. F. Mirabel, Y. Gómez, & A. Velázquez.* 101, 173, 55-A5 (1995)

First Maps of the Soft X-Ray Diffuse Background from the *ROSAT* XRT/PSPC All-Sky Survey. *S. L. Snowden, M. J. Freyberg, P. P. Plucinsky, J. H. M. M. Schmitt, J. Trümper, W. Voges, R. J. Edgar, D. McCammon, & W. T. Sanders.* 454, 643, 310-D9 (1995)

PSR 1509−58 and Its Plerionic Environment. *C. Greiveldinger, S. Caucino, S. Massaglia, H. Ögelman, & E. Trussoni.* 454, 855, 313-E11 (1995)

A Gamma-Ray Monte Carlo Study of the Clumpy Debris of SN 1987A. *Adam Burrows & Kenneth A. Van Riper.* 455, 215, 321-B3 (1995)

X-RAYS: SOURCES

Cosmic X-Ray Background from Hot Gas. *R. D. Rogers & G. B. Field.* 366, 22, 1-C13 (1991)

A New X-Ray Pulsar GS 2138+56 (Cepheus X-4). *Katsuji Koyama, Mitsunobu Kawada, Yuzuru Tawara, Kazuhiro Kimura, Shunji Kitamoto, Sigenori Miyamoto, Hiroshi Tsunemi, Ken Ebisawa, & Fumiaki Nagase.* 366, L19, 6-C5 (1991)

X-Ray Luminosity Functions of Clusters of Galaxies. *A. Cavaliere, R. Burg, & R. Giacconi.* 366, L61, 11-B11 (1991)

The Proper Motion of the Soft X-Ray–emitting Radio Pulsar PSR 0656+14. *R. J. Thompson, Jr., F. A. Córdova, R. M. Hjellming, & E. B. Fomalont.* 366, L83, 11-E1 (1991)

Dynamic Effects on Cyclotron Scattering in Pulsar Accretion Columns. *J. J. Brainerd & P. Mészáros.* 369, 179, 38-B11 (1991)

A Search for Periodicities in the X-Ray Emission from Cataclysmic Variables. *Michael Eracleous, Joseph Patterson, & Jules Halpern.* 370, 330, 51-D1 (1991)

An X-Ray Image of the Violent Interstellar Medium in 30 Doradus. *Q. Wang & D. J. Helfand.* 370, 541, 55-B9 (1991)

Compton Reflection in Active Galactic Nuclei and the Cosmic X-Ray Background. *R. D. Rogers & G. B. Field.* 370, L57, 59-A11 (1991)

Discovery of 111 Second Pulsation from the X-Ray Source Scutum X-1. *K. Koyama, H. Kunieda, Y. Takeuchi, & Y. Tawara.* 370, L77, 59-D1 (1991)

Dust from Early Galaxies and the X-Ray Background Radiation. *B. Rudak & P. Mészáros.* 371, 29, 60-D5 (1991)

EXOSAT Observations of the X-Ray Source 2S 0114+65. *Krishna M. V. Apparao, P. Bisht, & K. P. Singh.* 371, 772, 71-B6 (1991)

A Recipe for Making Hot Accretion Disks. *Gunnlaugur Björnsson & Roland Svensson.* 371, L69, 73-C10 (1991)

Rapid Ultraviolet Variability in the BL Lacertae Object PKS 2155−304. *R. A. Edelson, J. Saken, G. Pike, C. M. Urry, I. M. George, R. S. Warwick, H. R. Miller, M. T. Carini, & J. R. Webb.* 372, L9, 79-B5 (1991)

Coded-Aperture Imaging of the Galactic Center Region at Gamma-Ray Energies. *Walter R. Cook, John M. Grunsfeld, William A. Heindl, David M. Palmer, Thomas A. Prince, Stephen M. Schindler, & Edward C. Stone.* 372, L75, 85-D1 (1991)

High-Energy X-Ray Production in a Boundary Layer of an Accreting Neutron Star. *Tomoyuki Hanawa.* 373, 222, 88-F9 (1991)

The Detection of X-Ray Emission from the OB Associations of the Large Magellanic Cloud. *Q. Wang & D. J. Helfand.* 373, 497, 94-B7 (1991)

W28 and 3C 400.2: Two Shell-like Radio Supernova Remnants with Centrally Peaked X-Ray Morphologies. *Knox S. Long, William P. Blair, Richard L. White, & Yutaka Matsui.* 373, 567, 95-A10 (1991)

Thermal X-Ray Emission from Classical Novae in Optical Decline. *James MacDonald & Stéphane Vennes.* 373, L51, 97-C4 (1991)

The Properties of X-Ray–selected Active Galactic Nuclei. I. Luminosity Function, Cosmological Evolution, and Contribution to the Diffuse X-Ray Background. *Tommaso Maccacaro, Roberto Della Ceca, Isabella M. Gioia, Simon L. Morris, John T. Stocke, & Anna Wolter.* 374, 117, 99-D11 (1991)

High-Speed Photometry of V404 Cygni in Outburst. *Eric Gotthelf, Joseph Patterson, & Richard J. Stover.* 374, 340, 102-C11 (1991)

The CfA *Einstein Observatory* Extended Deep X-Ray Survey. *F. A. Primini, S. S. Murray, J. Huchra, R. Schild, R. Burg, & R. Giacconi.* 374, 440, 104-E12 (1991)

The Detection of X-Rays from the Hot Interstellar Medium of the Large Magellanic Cloud. *Q. Wang, T. Hamilton, D. J. Helfand, & X. Wu.* 374, 475, 105-A10 (1991)

Bremsstrahlung and Energetic Electrons in Supernovae. *Donald D. Clayton & Lih-Sin The.* 375, 221, 113-F12 (1991)

The Formation and Detection of Strongly Magnetic White Dwarf Binaries in Globular Clusters. *G. Chanmugam, A. Ray, & K. P. Singh.* 375, 600, 120-B9 (1991)

Cyclotron Line Features in the Spectrum of the Transient X-Ray Pulsar X0115+634. *F. Nagase, T. Dotani, Y. Tanaka, K. Makishima, T. Mihara, T. Sakao, H. Tsunemi, S. Kitamoto, K. Tamura, A. Yoshida, & H. Nakamura.* 375, L49, 124-B11 (1991)

Shot Model Parameters for Cygnus X-1 through Phase Portrait Fitting. *James C. Lochner, J. H. Swank, & A. E. Szymkowiak.* 376, 295, 128-E9 (1991)

The *Einstein Observatory* Extended Medium-Sensitivity Survey. II. The Optical Identifications. *John T. Stocke, Simon L. Morris, I. M. Gioia, T. Maccacaro, R. Schild, A. Wolter, Thomas A. Fleming, & J. Patrick Henry.* 76, 813, 36-B1 (1991)

An X-Ray Pulsator in the Direction of Molecular Cloud MBM 12 (Lynds 1457). *K. Koyama, S. Takano, Y. Tawara, T. Matsumoto, K. Noguchi, Y. Fukui, T. Iwata, N. Ohashi, K. Tatematsu, N. Takahashi, T. Umemoto, K. W. Hodapp, J. Rayner, & K. Makishima.* 377, 240, 141-A1 (1991)

The *EXOSAT* High Galactic Latitude Survey. *P. Giommi, G. Tagliaferri, K. Beuermann, G. Branduardi-Raymont, R. Brissenden, U. Graser, K. O. Mason, J. D. P. Mittaz, P. Murdin, G. Pooley, H.-C. Thomas, & I. Tuohy.* 378, 77, 152-A5 (1991)

Optical Identification of the X-Ray Source GS 2023+338 as V404 Cygni. *R. Mark Wagner, Sumner G. Starrfield, Steve B. Howell, Tobias J. Kreidl, S. J. Bus, A. Cassatella, R. Bertram, & R. Fried.* 378, 293, 154-E10 (1991)

A Compton Reflection Model for the Cosmic X-Ray and Gamma-Ray Backgrounds. *R. D. Rogers & G. B. Field.* 378, L17, 157-C1 (1991)

Persistence and Change in the Soft X-Ray Spectrum of the Quasar PG 1211+143. *Martin Elvis, P. Giommi, Belinda J. Wilkes, & Jonathan McDowell.* 378, 537, 159-B1 (1991)

Cross-Correlation of the X-Ray Background with Nearby Galaxies. *Keith Jahoda, Ofer Lahav, Richard F. Mushotzky, & Elihu Boldt.* 378, L37, 162-D7 (1991)

Constraints on Models for the High- and Low-Energy X-Ray Backgrounds. *R. A. Daly.* 379, 37, 163-E1 (1991)

LMC-2 as the Blowout of a Hot Superbubble. *Qingde Wang & David J. Helfand.* 379, 327, 167-B5 (1991)

Discovery with the Sigma Telescope of Hard X-Rays from the Globular Cluster Terzan 2. *D. Barret, S. Mereghetti, J. P. Roques, P. Mandrou, L. Salotti, F. Lebrun, Ph. Laurent, J. Ballet, E. Churazov, M. Gifanov, R. Sunyaev,*

N. Khavenson, I. Chulkov, B. Novikov, A. Kuznetzov, & A. Dyachkov. 379, L21, 169-C1 (1991)

Small-Scale Fluctuations and Angular Correlations of the X-Ray Background in the *HEAO 1* A-2 Energy Band: Constraints on Clustering of X-Ray Sources. *J. M. Martín-Mirones, G. De Zotti, E. A. Boldt, F. E. Marshall, L. Danese, A. Franceschini, & M. Persic.* 379, 507, 171-A4 (1991)

The Intensity and Spectrum of the Diffuse X-Ray Background. *X. Wu, T. Hamilton, D. J. Helfand, & Q. Wang.* 379, 564, 171-F1 (1991)

Faint X-Ray Source Counts and the Origin of the X-Ray Background. *T. T. Hamilton, D. J. Helfand, & X. Wu.* 379, 576, 171-G1 (1991)

The Luminosity Function and Cosmological Evolution of X-Ray–selected BL Lacertae Objects. *Simon L. Morris, John T. Stocke, Isabella M. Gioia, Rudy E. Schild, Anna Wolter, Tommaso Maccacaro, & Roberto Della Ceca.* 380, 49, 176-F1 (1991)

Short-Term X-Ray Variability of the BL Lacertae Object PKS 2155−304: Power Spectrum and Cross-Correlation Analysis. *G. Tagliaferri, L. Stella, L. Maraschi, A. Treves, & A. Celotti.* 380, 78, 177-A5 (1991)

Search for Starbursts among X-Ray–selected Galaxies: Optical Spectroscopy. *Antonella Fruscione & Richard E. Griffiths.* 380, L13, 181-C1 (1991)

X-Ray Observations of the Seyfert 1 Galaxy Markarian 464. *L. Piro, G. Matt, E. Costa, D. Dal Fiume, F. Frontera, & E. Morelli.* 380, 357, 182-F9 (1991)

Interaction of Mass Lost in Globular Clusters with the Halo Medium. *D. J. Faulkner & Graeme H. Smith.* 380, 441, 183-F7 (1991)

The Diffuse Soft X-Ray Background As Seen with the *Einstein Observatory*. *G. Micela, F. R. Harnden, Jr., R. Rosner, S. Sciortino, & G. S. Vaiana.* 380, 495, 184-D1 (1991)

X-Ray Emission from Starburst Galaxies. *Yoel Rephaeli, Duane Gruber, Massimo Persic, & Dan MacDonald.* 380, L59, 188-C1 (1991)

Direct Evidence for Stellar Wind X-Ray Absorption in O Stars. *Wayne L. Waldron.* 382, 603, 209-A9 (1991)

The Coronal Dividing Line in the *ROSAT* X-Ray All-Sky Survey. *Bernhard Haisch, J. H. M. M. Schmitt, & C. Rosso.* 383, L15, 219-C1 (1991)

Relativistic Enhancement of the Compton-reflected Component in Active Galactic Nuclei. *R. D. Rogers.* 383, 550, 221-B4 (1991)

Three Spectral States of 1E 1740.7−2942: From Standard Cygnus X-1 Type Spectrum to the Evidence of Electron-Positron Annihilation Feature. *R. Sunyaev, E. Churazov, M. Gilfanov, M. Pavlinsky, S. Grebenev, G. Babalyan, I. Dekhanov, N. Khavenson, L. Bouchet, P. Mandrou, J. P. Roques, G. Vedrenne, B. Cordier, A. Goldwurm, F. Lebrun, & J. Paul.* 383, L49, 226-C6 (1991)

X-Ray and Radio Pulse Phase Comparison for PSR 1509−58. *N. Kawai, R. Okayasu, W. Brinkmann, R. Manchester, A. G. Lyne, & N. D'Amico.* 383, L65, 226-D12 (1991)

X-RAYS: SPECTRA

Ginga Observations of Three X-Ray–luminous Galaxies: NGC 4472, NGC 4636, and NGC 3998. *H. Awaki, K. Koyama, H. Kunieda, S. Takano, Y. Tawara, & T. Ohashi.* 366, 88, 2-B8 (1991)

A New X-Ray Pulsar GS 2138+56 (Cepheus X-4). *Katsuji Koyama, Mitsunobu Kawada, Yuzuru Tawara, Kazuhiro Kimura, Shunji Kitamoto, Sigenori Miyamoto, Hiroshi Tsunemi, Ken Ebisawa, & Fumiaki Nagase.* 366, L19, 6-C5 (1991)

"Superlow-State" Hard X-Ray Observation of Cygnus X-1. *P. Ubertini, A. Bazzano, F. Perotti, E. Quadrini, A. Court, A. J. Dean, N. Dipper, R. Lewis, L. Bassani, & J. B. Stephen.* 366, 544, 9-G1 (1991)

X-Ray Continuum and Evidence for an Iron Emission Line from the Quasar E1821+643. *T. Kii, O. R. Williams, T. Ohashi, H. Awaki, K. Hayashida, H. Inoue, H. Kondo, K. Koyama, F. Makino, K. Makishima, R. D. Saxton, G. C. Stewart, S. Takano, Y. Tanaka, & M. J. L. Turner.* 367, 455, 19-A11 (1991)

Fe XII Line Ratios in Solar Flares. *S. S. Tayal, Ronald J. W. Henry, F. P. Keenan, S. M. McCann, & K. G. Widing.* 369, 567, 44-G1 (1991)

A Ubiquitous Absorption Feature in the X-Ray Spectra of BL Lacertae Objects. *Greg M. Madejski, Richard F. Mushotzky, Kimberly A. Weaver, Keith A. Arnaud, & C. Megan Urry.* 370, 198, 49-F1 (1991)

Discovery of 111 Second Pulsation from the X-Ray Source Scutum X-1. *K. Koyama, H. Kunieda, Y. Takeuchi, & Y. Tawara.* 370, L77, 59-D1 (1991)

Spectral Observations of the Extreme Ultraviolet Background. *Simon E. Labov & Stuart Bowyer.* 371, 810, 71-F1 (1991)

X-Ray Luminosity and Spectral Variability in the Seyfert Type I Galaxy: PG 2130+099. *K. P. Singh, A. R. Rao, & M. N. Vahia.* 372, 49, 74-E13 (1991)

Magnetic Two-Photon Scattering and Two-Photon Emission: Cross Sections and Redistribution Functions. *S. G. Alexander & P. Mészáros.* 372, 554, 82-E11 (1991)

Cyclotron Harmonics in Accreting Pulsars and Gamma-Ray Bursters: Effect of Two-Photon Processes. *S. G. Alexander & P. Mészáros.* 372, 565, 82-F9 (1991)

Hard X-Ray Spectra from Gap Accretion onto Neutron Stars. *Włodzimierz Kluźniak & James R. Wilson.* 372, L87, 85-E1 (1991)

The Energies and Structure of X-Ray K-Absorption Edges. *Robert J. Gould & Young-Dae Jung.* 373, 271, 89-D1 (1991)

HEAO 1 A-2 Low-Energy Detector X-Ray Spectra of the Lupus Loop and SN 1006. *D. A. Leahy, J. Nousek, & A. J. S. Hamilton.* 374, 218, 100-G1 (1991)

Coronal Dynamics of a Quiescent Active Region. *Julia L. R. Saba & Keith T. Strong.* 375, 789, 122-D9 (1991)

Cyclotron Line Features in the Spectrum of the Transient X-Ray Pulsar X0115+634. *F. Nagase, T. Dotani, Y. Tanaka, K. Makishima, T. Mihara, T. Sakao, H. Tsunemi, S. Kitamoto, K. Tamura, A. Yoshida, & H. Nakamura.* 375, L49, 124-B11 (1991)

Line Profiles from a Disk around a Rotating Black Hole. *Ari Laor.* 376, 90, 126-B1 (1991)

The X-Ray Properties of GX 301−2 (4U 1223−62). *F. Haberl.* 376, 245, 128-A5 (1991)

SMM/HXRBS Observations of Cygnus X-1 from 1986 December to 1988 April. *R. A. Schwartz, L. E. Orwig, B. R. Dennis, J. C. Ling, & W. A. Wheaton.* 376, 312, 128-G1 (1991)

X-Ray Observations of the Bright Seyfert Galaxy IC 4329A. *K. P. Singh, A. R. Rao, & M. N. Vahia.* 377, 417, 145-A1 (1991)

The *Einstein* Objective Grating Spectrometer Survey of Galactic Binary X-Ray Sources. *S. D. Vrtilek, J. E. McClintock, F. D. Seward, S. M. Kahn, & B. J. Wargelin.* 76, 1127, 41-C1 (1991)

Origin of Cosmic X-Ray Background Radiation. *Nobuo Terasawa.* 378, L11, 157-B8 (1991)

Persistence and Change in the Soft X-Ray Spectrum of the Quasar PG 1211+143. *Martin Elvis, P. Giommi, Belinda J. Wilkes, & Jonathan McDowell.* 378, 537, 159-B1 (1991)

Discovery of a Cyclotron Resonance Feature at 30 keV from the Transient X-Ray Pulsar Cepheus X-4. *T. Mihara, K. Makishima, S. Kamijo, T. Ohashi, F. Nagase, Y. Tanaka, & K. Koyama.* 379, L61, 175-C6 (1991)

X-Ray Observations of the Seyfert 1 Galaxy Markarian 464. *L. Piro, G. Matt, E. Costa, D. Dal Fiume, F. Frontera, & E. Morelli.* 380, 357, 182-F9 (1991)

Radiative Widths and Splitting of Cyclotron Lines in Superstrong Magnetic Fields. *G. G. Pavlov, V. G. Bezchastnov, P. Mészáros, & S. G. Alexander.* 380, 541, 185-A1 (1991)

A Two-Phase Model for the X-Ray Emission from Seyfert Galaxies. *F. Haardt & L. Maraschi.* 380, L51, 188-B6 (1991)

Polarization Properties of Emission Lines from Relativistic Accretion Disks. *Kaiyou Chen & Douglas M. Eardley.* 382, 125, 201-F10 (1991)

Multifrequency Observations of BL Lacertae in 1988. *N. Kawai, M. Matsuoka, J. N. Bregman, H. D. Aller, M. F. Aller, P. A. Hughes, S. A. Balbus, T. J. Balonek, K. C. Chambers, R. E. S. Clegg, S. D. Clements, R. J. Leacock, A. G. Smith, R. Goodrich, J. S. Miller, M. Hereld, M. G. Hoare, V. A. Hughes, G. K. Miley, G. H. Moriarty-Schieven, K. Matthews, G. Neugebauer, T. Ohashi, P. F. Roche, H. A. Thronson, E. Valtaoja, H. Terasranta, J. R. Webb, B. J. Wills, & D. Wills.* 382, 508, 207-G8 (1991)

Low-Flux Hard X-Ray Observation of Cygnus X-1. *P. Ubertini, A. Bazzano, C. La Padula, R. K. Manchanda, V. F. Polcaro, R. Staubert, E. Kendziorra, & F. Perotti.* 383, 263, 215-D9 (1991)

X-Ray Variability of GX 339−4 in Its Very High State. *Sigenori Miyamoto, Kazuhiro Kimura, Shunji Kitamoto, Tadayasu Dotani, & Ken Ebisawa.* 383, 784, 224-A3 (1991)

X-RAYS: STARS

A Reanalysis of the Orbital Inclination of Cygnus XR-1 Determined Polarimetrically. *Joseph F. Dolan.* 384, 249, 4-A9 (1992)

Is There a Recycled Old Pulsar in Cygnus X-3? *Abhas Mitra.* 384, 255, 4-B3 (1992)

Time Variations in the X-Rays from Cygnus X-3 Observed with *Ginga*. *Shunji Kitamoto, Seiko Mizobuchi, Koujun Yamashita, & Hiroshi Nakamura.* 384, 263, 4-B13 (1992)

Disk Instability and Outburst Properties of the Intermediate Polar GK Persei. *Soon-Wook Kim, J. Craig Wheeler, & Shin Mineshige.* 384, 269, 4-C7 (1992)

A Study of the Stellar Population in the Chamaeleon Dark Clouds. *Lisa S. Gauvin & Karen M. Strom.* 385, 217, 14-F1 (1992)

Simultaneous X-Ray and Radio Observations of GX 5−1. *J. Tan, W. H. G. Lewin, R. M. Hjellming, W. Penninx, J. van Paradijs, M. van der Klis, & K. Mitsuda.* 385, 314, 15-G1 (1992)

Low-Mass X-Ray Binary Evolution and the Origin of Millisecond Pulsars. *Juhan Frank, Andrew R. King, & Jean-Pierre Lasota.* 385, L45, 23-C8 (1992)

Colliding Winds from Early-Type Stars in Binary Systems. *Ian R. Stevens, John M. Blondin, & A. M. T. Pollock.* 386, 265, 27-E1 (1992)

On the Power Spectra of the Wind-fed X-Ray Binary Pulsar GX 301−2. *Mauro Orlandini & G. E. Morfill.* 386, 703, 34-A9 (1992)

Hard X-Ray Observation of Scorpius X-1. *P. Ubertini, A. Bazzano, M. Cocchi, C. La Padula, & R. K. Sood.* 386, 710, 34-B4 (1992)

A Comprehensive X-Ray Study of the Small Magellanic Cloud. *Qingde Wang & Xiaoyi Wu.* 78, 391, 7-G5 (1992)

The Spectral Archive of Cosmic X-Ray Sources Observed by the *Einstein Observatory* Focal Plane Crystal Spectrometer. *Kenneth S. K. Lum, Claude R. Canizares, George W. Clark, Joan M. Coyne, Thomas H. Markert, Pablo J. Saez, Mark L. Schattenburg, & P. Frank Winkler.* 78, 423, 8-E11 (1992)

Properties of the Massive X-Ray Binary 4U 1700−37 = HD 153919. *S. R. Heap & M. F. Corcoran.* 387, 340, 41-B11 (1992)

X-Ray Activity as Statistical Age Indicator: The Disk G–K Giants. *G. Micela, A. Maggio, & G. S. Vaiana.* 388, 171, 51-B5 (1992)

Energy Dependence of Normal Branch Quasi-periodic Intensity Oscillations in Low-Mass X-Ray Binaries. *Guy S. Miller & Frederick K. Lamb.* 388, 541, 57-A5 (1992)

Time Variability Studies with Photon-counting Imaging Detectors. I. A Maximum Likelihood Technique. *S. Sciortino & G. Micela.* 388, 595, 57-E11 (1992)

ROSAT X-Ray All-Sky Survey Observations of Hybrid Stars. *Bernhard Haisch, J. H. M. M. Schmitt, & C. Rosso.* 388, L61, 59-C7 (1992)

Hard X-Ray Imaging of the Galactic Black Hole Candidate GX 339−4. *C. E. Covault, J. E. Grindlay, & R. P. Manandhar.* 388, L65, 59-C12 (1992)

Stellar Wind Collision and X-Ray Generation in Massive Binaries. *V. V. Usov.* 389, 635, 69-C10 (1992)

X-Ray Scattering and Fluorescence in the Wind of a Massive X-Ray Binary. *W. Lewis, S. Rappaport, A. Levine, & F. Nagase.* 389, 665, 69-F3 (1992)

H0538+608 (= BY Camelopardalis): An Asynchronously Rotating AM Herculis Binary? *A. Silber, H. V. Bradt, M. Ishida, T. Ohashi, & R. A. Remillard.* 389, 704, 70-B7 (1992)

X-Ray Nova in Musca (GRS 1124−68): Hard X-Ray Source with Narrow Annihilation Line. *R. Sunyaev, E. Churazov, M. Gilfanov, A. Dyachkov, N. Khavenson, S. Grebenev, R. Kremnev, K. Sukhanov, A. Goldwurm, J. Ballet, B. Cordier, J. Paul, M. Denis, G. Vedrenne, M. Niel, & E. Jourdain.* 389, L75, 73-E1 (1992)

Steady, Periodic Gamma-Ray Emission from Accreting X-Ray Pulsars. *K. S. Cheng, M. M. Lau, T. Cheung, P. P. Leung, & K. Y. Ding.* 390, 480, 81-C8 (1992)

The Constitution of the Atmospheric Layers and the Extreme Ultraviolet Spectrum of Hot Hydrogen-rich White Dwarfs. *Stéphane Vennes.* 390, 590, 82-F1 (1992)

Thermonuclear Flash Model for Long X-Ray Tails from Aquila X-1. *Ikko Fushiki, Ronald E. Taam, S. E. Woosley, & D. Q. Lamb.* 390, 634, 83-B9 (1992)

What Drives the Mass Transfer in Cygnus X-3? *Abhas Mitra.* 390, 645, 83-C8 (1992)

X-Ray Spectrum and Time Variation of X1850−087 in the Globular Cluster NGC 6712. *Shunji Kitamoto, Hiroshi Tsunemi, & Diane Roussel-Dupre.* 391, 220, 88-F7 (1992)

Periodic Variability in the Optical Counterpart of X-Ray Nova Muscae 1991. *Charles D. Bailyn.* 391, 298, 89-F1 (1992)

X-Ray Emission-Line Spectra of Photoionized Plasmas: Density Sensitivity of the Fe L-Shell Series. *Duane A. Liedahl, Steven M. Kahn, Albert L. Osterheld, & William H. Goldstein.* 391, 306, 89-F11 (1992)

Canonical Time Variations of X-Rays from Black Hole Candidates in the Low-Intensity State. *Sigenori Miyamoto, Shunji Kitamoto, Sayuri Iga, Hitoshi Negoro, & Kentaro Terada.* 391, L21, 92-B1 (1992)

Disk Instability and the Time-dependent X-Ray Emission from the Intermediate Polar GK Persei. *Insu Yi, Soon-Wook Kim, Ethan T. Vishniac, & J. Craig Wheeler.* 391, L25, 92-B6 (1992)

The *Einstein* Slew Survey. *Martin Elvis, David Plummer, Jonathan Schachter, & G. Fabbiano.* 80, 257, 25-E9 (1992)

Modeling the Stellar Contribution to the Galactic Component of the Diffuse Soft X-Ray Background. I. Background Fluxes and Number Counts. *V. Kashyap, R. Rosner, G. Micela, S. Sciortino, G. S. Vaiana, & F. R. Harnden, Jr.* 391, 667, 96-C12 (1992)

X-Ray to Infrared Observations of the Cataclysmic Variable KO Velorum (E1013−477). *R. M. Sambruna, L. Chiappetti, A. Treves, J. M. Bonnet-Bidaud, P. Bouchet, L. Maraschi, C. Motch, M. Mouchet, & S. Van Amerongen.* 391, 750, 97-C9 (1992)

Coordinated *Ginga*, *IUE*, and VLA Observations of Stellar Activity in σ^2 Coronae Borealis. *R. A. Stern, Y. Uchida, F. Walter, O. Vilhu, D. Hannikainen, A. Brown, A. Veale, & B. M. Haisch.* 391, 760, 97-D7 (1992)

Rapid Oscillations in Cataclysmic Variables. VIII. YY Draconis (=3A 1148+719. *J. Patterson, D. A. Schwartz, J. P. Pye, W. P. Blair, G. A. Williams, & J.-P. Caillault.* 392, 233, 103-G3 (1992)

SIGMA Observation of Hard X-Ray Emission from the Ultrasoft X-Ray Transient Triangulum Australe X-1 (A1524−62). *D. Barret, J. P. Roques, P. Mandrou, L. Bouchet, F. Lebrun, A. Goldwurm, P. Laurent, J. Paul, R. Sunyaev, E. Churazov, M. Gilfanov, A. Diachkov, N. Kavenson, B. Novikov, I. Chulkov, & A. Kuznetsov.* 392, L19, 106-C7 (1992)

Deep VLA Images of Globular Clusters: NGC 6624. *Helen M. Johnston & Shrinivas R. Kulkarni.* 393, L17, 120-C8 (1992)

On the Role of Radioactive Decays in Powering Gamma Rays and X-Rays from Novae. *Mario Livio, Apostolos Mastichiadis, Hakki Ögelman, & James W. Truran.* 394, 217, 130-F5 (1992)

Column Accretion with Radiation Drag and the Two-Branch Spectrum of the Low-Mass X-Ray Binary GX 5−1. *J. H. You, T. Lu, C. Y. Wei, & T. G. Wang.* 394, 283, 131-E1 (1992)

The Coolest DA White Dwarfs Detected at Soft X-Ray Wavelengths. *K. M. Kidder, J. B. Holberg, M. A. Barstow, R. W. Tweedy, & F. Wesemael.* 394, 288, 131-E7 (1992)

The Cooling of Neutron Stars by the Direct Urca Process. *Dany Page & James H. Applegate.* 394, L17, 133-C7 (1992)

ROSAT Observations of PSR 0656+14: A Pulsating and Cooling Neutron Star. *John P. Finley, Hakki Ögelman, & Ümit Kiziloğlu.* 394, L21, 133-C13 (1992)

Discovery and X-Ray Properties of GS 1124−683 (=Nova Muscae). *Shunji Kitamoto, Hiroshi Tsunemi, Sigenori Miyamoto, & Kiyoshi Hayashida.* 394, 609, 137-A6 (1992)

Sigma Detection of Hard X-Ray Emission from the Soft Transient Type I X-Ray Burster KS 1731−260. *D. Barret, L. Bouchet, P. Mandrou, J. P. Roques, B. Cordier, Ph. Laurent, F. Lebrun, J. Paul, R. Sunyaev, E. Churazov, M. Gilfanov, A. Diachkov, N. Khavenson, B. Novikov, I. Chulkov, & A. Kuznetsov.* 394, 615, 137-B1 (1992)

VLBI Observations of the X-Ray Binary LS I +61°303. *A. R. Taylor, H. T. Kenny, R. E. Spencer, & A. Tzioumis.* 395, 268, 143-D11 (1992)

An Ionized Accretion Disk in Cygnus X-1. *C. Done, J. S. Mulchaey, R. F. Mushotzky, & K. A. Arnaud.* 395, 275, 143-E5 (1992)

X-Ray Spectral Structure of the Seyfert Galaxy NGC 6814. *M. Yamauchi, M. Matsuoka, N. Kawai, & A. Yoshida.* 395, 453, 148-A13 (1992)

The Polar Cap Structure of the X-Ray Pulsar 4U 1538−52. *T. Bulik, P. Mészáros, J. W. Woo, F. Nagase, & K. Makishima.* 395, 564, 149-G9 (1992)

X-Ray Emission from Single Magnetic Early-Type Stars. *V. V. Usov & D. B. Melrose.* 395, 575, 150-B1 (1992)

Long-Term Variability in Low-Mass X-Ray Binaries: A Study Using Data from *Vela 5B*. *Alan P. Smale & James C. Lochner.* 395, 582, 150-B13 (1992)

An *Einstein Observatory* SAO-based Catalog of B-Type Stars. *F. Grillo, S. Sciortino, G. Micela, G. S. Vaiana, & F. R. Harnden, Jr.* 81, 795, 46-G13 (1992)

Ginga Observations of Centaurus X-3. *F. Nagase, R. H. D. Corbet, C. S. R. Day, H. Inoue, T. Takeshima, K. Yoshida, & T. Mihara.* 396, 147, 157-A3 (1992)

X-Ray Variability of Scorpius X-1 during a Multiwavelength Campaign. *P. Hertz, B. Vaughan, K. S. Wood, J. P. Norris, K. Mitsuda, P. F. Michelson, & T. Dotani.* 396, 201, 157-E12 (1992)

Radio Continuum and X-Ray Properties of the Coronae of RS Canum Venaticorum and Related Active Binary Systems. *Stephen A. Drake, Theodore Simon, & Jeffrey L. Linsky.* 82, 311, 53-F5 (1992)

X-Ray Observations of Planetary Nebulae with Binary Nuclei. *K. M. V. Apparao, G. D. Berthiaume, & J. A. Nousek.* 397, 534, 177-E5 (1992)

Observation of A0535+26 at Energies above 150 keV with the Figaro II Experiment. *G. Cusumano, T. Mineo, B. Sacco, L. Scarsi, G. Gerardi, B. Agrinier, E. Barouch, R. Comte, B. Parlier, J. L. Masnou, E. Massaro, G. Matt, E. Costa, M. Salvati, P. Mandrou, M. Niel, & J. F. Olive.* 398, L103, 194-E1 (1992)

Evidence for a Black Hole in the X-Ray Binary Nova Muscae 1991. *Ronald A. Remillard, Jeffrey E. McClintock, & Charles D. Bailyn.* 399, L145, 208-C7 (1992)

First Results from *ROSAT* All-Sky Survey Observations of the Hyades Cluster. *Robert A. Stern, Jürgen H. M. M. Schmitt, Cristina Rosso, John P. Pye, Simon T. Hodgkin, & John R. Stauffer.* 399, L159, 208-D9 (1992)

Ginga Observations of X-Ray Flares on Algol. *R. A. Stern, Y. Uchida, S. Tsuneta, & F. Nagase.* 400, 321, 212-G13 (1992)

Ginga Observations of the Dipping Low-Mass X-Ray Binaries XB 1916−053 and EXO 0748−676. *Alan P. Smale, Koji Mukai, O. Rees Williams, Mark H. Jones, & Robin H. D. Corbet.* 400, 330, 213-A10 (1992)

The Infrared Counterpart of the Eclipsing X-Ray Binary H0253+193. *B. Zuckerman, E. E. Becklin, I. S. McLean, & Joseph Patterson.* 400, 665, 218-F7 (1992)

EXOSAT Observations of the Be/X-Ray Binary 4U 2206+54. *Priyamvada Saraswat & Krishna M. V. Apparao.* 401, 678, 231-A1 (1992)

EXOSAT Observations of the X-Ray Binary Pulsar 4U 1538−52. *N. R. Robba, G. Cusumano, M. Orlandini, D. Dal Fiume, & F. Frontera.* 401, 685, 231-A10 (1992)

Periodic Photometric Variability of the Black Hole Binary V404 Cygni. *R. Mark Wagner, T. J. Kreidl, S. B. Howell, & S. G. Starrfield.* 401, L97, 233-C13 (1992)

ROSAT Detections of X-Ray Emission from Young B-Type Stars. *J. H. M. M. Schmitt, H. Zinnecker, R. Cruddace, & F. R. Harnden, Jr.* 402, L13, 6-C8 (1993)

An X-Ray Excited Wind in Centaurus X-3. *C. S. R. Day & Ian R. Stevens.* 403, 322, 17-G9 (1993)

Discovery of the Orbit of the X-Ray Pulsar OAO 1657−415. *Deepto Chakrabarty, John M. Grunsfeld, Thomas A. Prince, Lars Bildsten, Mark H. Finger, Robert B. Wilson, Gerald J. Fishman, Charles A. Meegan, & William S. Paciesas.* 403, L33, 20-D6 (1993)

Another Canonical Time Variation of X-Rays from Black Hole Candidates in the Very High Flare State? *Sigenori Miyamoto, Sayuri Iga, Shunji Kitamoto, & Yasuhide Kamado.* 403, L39, 20-D13 (1993)

Spectral Variations of LMC X-3 Observed with *Ginga*. *Ken Ebisawa, Fumiyoshi Makino, Kazuhisa Mitsuda, Tomaso Belloni, Anne P. Cowley, Paul C. Schmidtke, & Aldo Treves.* 403, 684, 24-B13 (1993)

Can We Observe Accreting, Isolated Neutron Stars? *Omer Blaes & Piero Madau.* 403, 690, 24-C8 (1993)

Positron Annihilation Radiation from X-Ray Binary Systems. *Mei Wu, Chun-sheng Zhang, & Ti-pei Li.* 404, 276, 31-C11 (1993)

Effects of Inclination Angle on the Spectra of X-Ray Binaries. *S. D. Vrtilek, Noam Soker, & J. C. Raymond.* 404, 696, 37-E10 (1993)

Hard X-Rays from the Orion Nebula Region. *Shigeo Yamauchi & Katsuji Koyama.* 405, 268, 44-D8 (1993)

Binary Structure and Accretion Flow of the New Intermediate Polar H0253+193. *Yuichi Kamata & Katsuji Koyama.* 405, 307, 45-A3 (1993)

Upper Limits on TeV Gamma-Ray Emission from Centaurus A, Vela X-1, Centaurus X-3, and Circinus X-1. *W. H. Allen, I. A. Bond, E. Budding, M. J. Conway, A. Daniel, K. B. Fenton, H. Fujii, Z. Fujii, N. Hayashida, K. Hibino, M. Honda, J. E. Humble, S. Kabe, K. Kasahara, T. Kifune, G. D. Lythe, A. Masaike, Y. Matsubara, K. Mitsui, Y. Miura, M. Mori, Y. Muraki, M. Nagano, T. Nakamura, M. Nishizawa, P. M. Norris, S. Ogio, To. Saito, M. Sakata, H. Sato, H. M. Shimizu, M. Spencer, J. R. Storey, T. Tanimori, M. Teshima, S. Torii, A. Wadsworth, Y. Watase, M. D. Woodhams, Y. Yamamoto, P. C. M. Yock, & T. Yuda (The JANZOS Collaboration).* 405, 554, 50-A1 (1993)

The Evolutionary Status of the Pulsar–Be Star Binary PSR 1259−63. *A. R. King.* 405, 727, 52-B5 (1993)

X-Ray/Microwave Relation of Different Types of Active Stars. *Manuel Güdel & Arnold O. Benz.* 405, L63, 54-C13 (1993)

Fitting Pulse Profiles of X-Ray Pulsars: The Effects of Relativistic Light Deflection. *H. Riffert, H.-P. Nollert, U. Kraus, & H. Ruder.* 406, 185, 57-D1 (1993)

X-Rays from Emission-Line Stars in the Herbig-Haro 1 Region. *Steven H. Pravdo & Lorella Angelini.* 407, 232, 72-A1 (1993)

Sigma Hard X-Ray Observations of GX 339−4 during the Hard State and a Transition to the Soft State. *L. Bouchet, E. Jourdain, P. Mandrou, J. P. Roques, Ph. Laurent, F. Lebrun, J. Paul, L. Salotti, R. Sunyaev, E. Churazov, M. Gilfanov, N. Khavenson, A. Diachkov, I. Chulkov, B. Novikov, & A. Kuznetsov.* 407, 739, 79-F7 (1993)

A Broad-Band X-Ray Telescope Spectrum of the Massive X-Ray Binary X Persei. *Eric M. Schlegel, Peter J. Seriemitsos, Keith Jahoda, Frank Marshall, Robert Petre, Elihu Boldt, Richard Mushotzky, Jean Swank, Andrew Szymkowiak, Alan Smale, & Kim Weaver.* 407, 744, 79-F13 (1993)

The Secondary Maxima in Black Hole X-Ray Nova Light Curves: Clues toward a Complete Picture. *Wan Chen, Mario Livio, & Neil Gehrels.* 408, L5, 88-E8 (1993)

Low-Mass X-Ray Binaries and Millisecond Pulsars in Globular Clusters. *Kaiyou Chen, John Middleditch, & Malvin Ruderman.* 408, L17, 88-G1 (1993)

Optical and X-Ray Observations of the Low-Mass X-Ray Binary EXO 0748−676. *Brian Thomas, Robin Corbet, Thomas Augusteijn, Paul Callanan, & Alan P. Smale.* 408, 651, 93-C7 (1993)

The Discovery of Pulsed Iron Line Emission from Centaurus X-3. *C. S. R. Day, F. Nagase, K. Asai, & T. Takeshima.* 408, 656, 93-D1 (1993)

Hydrodynamics of Winds from Irradiated Companion Stars in Low-Mass X-Ray Binaries. *Marco Tavani & Richard London.* 410, 281, 115-E8 (1993)

ROSAT Observations of the Large Magellanic Cloud Pulsar PSR 0540−69. *John P. Finley, Hakki Ögelman, Günther Hasinger, & Joachim Trümper.* 410, 323, 116-B1 (1993)

Discovery of Orbital Decay in SMC X-1. *A. Levine, S. Rappaport, J. E. Deeter, P. E. Boynton, & F. Nagase.* 410, 328, 116-B8 (1993)

Stellar Coronae at the End of the Main Sequence: A *ROSAT* Survey of the Late M Dwarfs. *Thomas A. Fleming, Mark S. Giampapa, J. H. M. M. Schmitt, & Jay A. Bookbinder.* 410, 387, 116-G8 (1993)

High-Frequency Emission of X-Ray Pulsar 1E 2259+586. *V. V. Usov.* 410, 761, 123-C1 (1993)

Resolving the Iron K Line in Cygnus X-2: An Observation with BBXRT. *A. P. Smale, C. Done, R. F. Mushotzky, K. A. Weaver, P. J. Serlemitsos, F. E. Marshall, R. Petre, K. M. Jahoda, E. A. Boldt, J. H. Swank, A. E. Szymkowiak, R. L. Kelley, & K. Arnaud.* 410, 796, 123-F1 (1993)

A Supersoft Variable Low-Luminosity X-Ray Source in the Globular Cluster M3. *P. Hertz, J. E. Grindlay, & C. D. Bailyn.* 410, L87, 126-A1 (1993)

Discovery of Multiple Low-Luminosity X-Ray Sources in NGC 6397. *Adrienne M. Cool, Jonathan E. Grindlay, Martin Krockenberger, & Charles D. Bailyn.* 410, L103, 126-B11 (1993)

The *ROSAT* All-Sky Survey of Active Binary Coronae. I. Quiescent Fluxes for the RS Canum Venaticorum Systems. *Robert C. Dempsey, Jeffrey L. Linsky, Thomas A. Fleming, & J. H. M. M. Schmitt.* 86, 599, 22-C3 (1993)

Hard Apex Transition in Quasi-periodic Oscillators: Closing of the Accretion Gap. *Garrett T. Biehle & Roger D. Blandford.* 411, 302, 131-A8 (1993)

Broad-Band X-Ray Telescope Observations of the Magnetic Cataclysmic Variable H0538+608 = BY Camelopardalis. *T. R. Kallman, E. M. Schlegel, P. J. Serlemitsos, R. Petre, F. Marshall, K. Jahoda, E. A. Boldt, S. S. Holt, R. F. Mushotzky, J. Swank, A. E. Szymkowiak, R. L. Kelley, A. Smale, K. Arnaud, K. Weaver, & F. B. Paerels.* 411, 869, 140-E12 (1993)

The Quasi-periodic Oscillations and Very Low Frequency Noise of Scorpius X-1 as Transient Chaos: A Dripping Handrail? *Jeffrey D. Scargle, Thomas Steiman-Cameron, Karl Young, David L. Donoho, James P. Crutchfield, & James Imamura.* 411, L91, 142-E13 (1993)

High-Energy Spectrum of Cygnus X-1 Revisited. *F. Haardt, C. Done, G. Matt, & A. C. Fabian.* 411, L95, 142-F5 (1993)

A Model of an X-Ray–illuminated Accretion Disk and Corona. *John C. Raymond.* 412, 267, 145-D6 (1993)

A *ROSAT* Upper Limit on X-Ray Emission from SN 1992A. *Eric M. Schlegel & Robert Petre.* 412, L29, 148-D1 (1993)

Stellar Birthrate in the Galaxy: Constraints from X-Ray Flux-limited Surveys. *G. Micela, S. Sciortino, & F. Favata.* 412, 618, 151-D10 (1993)

Broad-Band X-Ray Telescope Spectroscopy of ζ Puppis. *M. F. Corcoran, J. H. Swank, P. J. Serlemitsos, E. Boldt, R. Petre, F. E. Marshall, K. Jahoda, R. Mushotzky, A. Szymkowiak, K. Arnaud, A. P. Smale, K. Weaver, & S. S. Holt.* 412, 792, 153-F1 (1993)

ROSAT Observations of Pulsed Soft X-Ray Emission from PSR 1055−52. *Hakki Ögelman & John P. Finley.* 413, L31, 162-E5 (1993)

Thermal Evolution of Neutron Stars with Internal Heating in the Superfluid Core. *Armen D. Sedrakian & David M. Sedrakian.* 413, 658, 164-F1 (1993)

A Study of the Spatial and Spectral Characteristics of the Corona of AR Lacertae. *R. Ottmann, J. H. M. M. Schmitt, & M. Kürster.* 413, 710, 165-C6 (1993)

Can Isolated Stellar-Mass Black Holes Explain the Hard X-Ray Sources in the Galactic Center Region? *Sergio Campana & Sandro Mereghetti.* 413, L89, 168-E10 (1993)

Detection of an Ultraviolet and Visible Counterpart of the NGC 6624 X-Ray Burster. *I. R. King, S. A. Stanford, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, M. J. Disney, J. M. Deharveng, P. Jakobsen, T. M. Kamperman, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, W. B. Sparks, & C. Sosin.* 413, L117, 169-A12 (1993)

A Reprocessing Model for the Ultraviolet and Optical Light from 4U 1820−30. *Jonathan Arons & Ivan R. King.* 413, L121, 169-B4 (1993)

The Luminosity Dependence of the X-Ray Spectrum of the Transient 42 Second Pulsar EXO 2030+375. *A. P. Reynolds, A. N. Parmar, & N. E. White.* 414, 302, 173-F9 (1993)

X-Ray Emission at the Low-Mass End: Results from an Extensive *Einstein Observatory* Survey. *M. Barbera, G. Micela, S. Sciortino, F. R. Harnden, Jr., & R. Rosner.* 414, 846, 181-F10 (1993)

ROSAT High Resolution Imager Observations of PSR 0656+14. *S. B. Anderson, F. A. Córdova, G. G. Pavlov, C. R. Robinson, & R. J. Thompson, Jr.* 414, 867, 182-A12 (1993)

Extreme Ultraviolet Explorer Observations of the Magnetic Cataclysmic Variable RE 1938−461. *John K. Warren, John V. Vallerga, Christopher W. Mauche, Koji Mukai, & Oswald H. W. Siegmund.* 414, L69, 185-D2 (1993)

A Tight Correlation between Radio and X-Ray Luminosities of M Dwarfs. *Manuel Güdel, Jürgen H. M. M. Schmitt, Jay A. Bookbinder, & Thomas A. Fleming.* 415, 236, 188-A1 (1993)

Soft X-Ray Properties of the Geminga Pulsar. *J. P. Halpern & M. Ruderman.* 415, 286, 188-E8 (1993)

The Evolution of Stellar Coronae: Initial Results from a *ROSAT* PSPC Observation of IC 2391. *Brian M. Patten & Theodore Simon.* 415, L123, 200-D1 (1993)

ROSAT X-Ray Detection of ε Taurus: Revisiting the Coronal and Transition Region Emission of the Hyades Giants. *A. Collura, A. Maggio, G. Micela, S. Sciortino, F. R. Harnden, Jr., & R. Rosner.* 416, 204, 203-E8 (1993)

SMM Observations of Gamma-Ray Transients. I. A Search for Variable Emission at MeV Energies from Five Galactic and Extragalactic Sources. *M. J. Harris, G. H. Share, M. D. Leising, & J. E. Grove.* 416, 601, 210-G8 (1993)

ROSAT X-Ray Study of the Chamaeleon I Dark Cloud. I. The Stellar Population. *Eric D. Feigelson, Sophie Casanova, Thierry Montmerle, & Jean Guibert.* 416, 623, 211-B8 (1993)

Detection of the First Coronal X-Ray Source about a White Dwarf. *Thomas A. Fleming, Klaus Werner, & Martin A. Barstow.* 416, L79, 216-E6 (1993)

Soft Gamma Repeater 1806−20: Weak Evidence for a Periodicity following the Bursts. *A. Ulmer, E. E. Fenimore, R. I. Epstein, C. Ho, R. W. Klebesadel, J. G. Laros, & F. Delgado.* 418, 395, 235-G13 (1993)

Temperatures of Enhanced Stability in Hot Thin Plasmas. *Neil Gehrels & Ellen D. Williams.* 418, L25, 238-D1 (1993)

The *EXOSAT* Medium Energy (ME) Sample of Dwarf Novae. *K. Mukai & K. Shiokawa.* 418, 863, 243-C12 (1993)

Nonthermal Cyclotron Emission from Low-Luminosity Accretion onto Magnetic Neutron Stars. *Robert W. Nelson, E. E. Salpeter, & Ira Wasserman.* 418, 874, 243-D12 (1993)

Cygnus X-3 in an "Ultrahigh" X-Ray State with No Detected Kα Line Emission. *A. P. Smale, R. F. Mushotzky, E. M. Schlegel, K. A. Weaver, P. J. Serlemitsos, F. E. Marshall, R. Petre, & K. Jahoda.* 418, 894, 243-F7 (1993)

Detection, Identification, and Observed Properties of Large Magellanic Cloud Supersoft X-Ray Sources. *A. P. Cowley, P. C. Schmidtke, J. B. Hutchings, D. Crampton, & T. K. McGrath.* 418, L63, 245-B13 (1993)

Accurate Period Determination of an Eclipsing Binary X-Ray Source in M33. *Eric Schulman, Joel N. Bregman, Alfonso Collura, Fabio Reale, & Giovanni Peres.* 418, L67, 245-C6 (1993)

The X-Ray Spectrum of Cygnus X-1. *F. E. Marshall, R. F. Mushotzky, R. Petre, & P. J. Serlemitsos.* 419, 301, 250-A2 (1993)

On the Observability of Microsecond Temporal Structure in the Emission from X-Ray Binary Pulsars. *Mauro Orlandini & Elihu Boldt.* 419, 776, 257-C9 (1993)

Effects of Coronal and Shock-produced X-Rays on the Ionization Distribution in Hot Star Winds. *J. J. MacFarlane, W. L. Waldron, M. F. Corcoran, M. J. Wolff, P. Wang, & J. P. Cassinelli.* 419, 813, 257-F11 (1993)

Hydrodynamical Models for X-Ray Emissions from SN 1993J in M81. *Tomoharu Suzuki, Shiomi Kumagai, Toshikazu Shigeyama, Ken'ichi Nomoto, Hitoshi Yamaoka, & Hideyuki Saio.* 419, L73, 259-D11 (1993)

Simultaneous Optical and *ROSAT* Soft X-Ray Observations of Impulsive Bursts on the Flare Star UV Ceti. *J. H. M. M. Schmitt, Bernhard Haisch, & H. Barwig.* 419, L81, 259-E7 (1993)

X-Ray Emission from Chemically Peculiar Stars. *S. A. Drake, J. L. Linsky, J. H. M. M. Schmitt, & C. Rosso.* 420, 387, 5-F1 (1994)

Detection of X-Rays from SN 1987A with *ROSAT*. *Paul Gorenstein, John P. Hughes, & Wallace H. Tucker.* 420, L25, 7-D8 (1994)

Evolutionary Sequences of Very Hot, Low-Mass, Accreting White Dwarfs with Application to Symbiotic Variables and Ultrasoft/Supersoft Low-Luminosity X-Ray Sources. *Edward M. Sion & Sumner G. Starrfield.* 421, 261, 19-C1 (1994)

Hard X-Ray Timing Observation of the Crab Pulsar and Cygnus X-1. *P. Ubertini, A. Bazzano, M. Cocchi, C. La Padula, V. F. Polcaro, R. Staubert, & E. Kendziorra.* 421, 269, 19-C11 (1994)

The Extreme Ultraviolet Coronal Spectrum of the Solar-Type Star χ^1 Orionis. *Bernhard Haisch, Jeremy J. Drake, & J. H. M. M. Schmitt.* 421, L39, 22-A5 (1994)

Detection of Rotational Modulation in the Coronal Extreme-Ultraviolet Emission from V711 Tauri? *Jeremy J. Drake, Alex Brown, Robert J. Patterer, Peter W. Vedder, Stuart Bowyer, & Edward F. Guinan.* 421, L43, 22-A10 (1994)

X-Ray Emission from Near–Main-Sequence B Stars. *J. P. Cassinelli, D. H. Cohen, J. J. MacFarlane, W. T. Sanders, & B. Y. Welsh.* 421, 705, 27-A8 (1994)

The Time-Delay Spectrum of GX 5−1 in Its Horizontal Branch. *B. Vaughan, M. van der Klis, W. H. G. Lewin, R. A. M. J. Wijers, J. van Paradijs, T. Dotani, & K. Mitsuda.* 421, 738, 27-D6 (1994)

X-Ray Spectral Study of Two X-Ray Binaries: 4U 1957+11 and 2S 1543−624. *Kulinder P. Singh, Krishna M. V. Apparao, & Ralph P. Kraft.* 421, 753, 27-E9 (1994)

Einstein Observations of Ultrasoft X-Ray Sources in the Magellanic Clouds. *Thomas Brown, France Córdova, Robin Ciardullo, Richard Thompson, & Howard Bond.* 422, 118, 31-E4 (1994)

A Broad-Band X-Ray Telescope Observation of the Black Hole Candidate LMC X-1. *Eric M. Schlegel, F. E. Marshall, R. F. Mushotzky, A. P. Smale, K. A. Weaver, P. J. Serlemitsos, R. Petre, & K. M. Jahoda.* 422, 243, 33-B5 (1994)

On High Mass Accretion Rates in Magnetized Column Accretion onto White Dwarfs. *Insu Yi.* 422, 289, 33-F5 (1994)

Properties of a B0 I Stellar Wind and Interstellar Grains Derived from *Ginga* Observations of the Binary X-Ray Pulsar 4U 1538−52. *George W. Clark, Jonathan W. Woo, & Fumiaki Nagase.* 422, 336, 34-C3 (1994)

A Kinematic Model for Black Hole X-Ray Power Spectra. *Michael A. Nowak.* 422, 688, 40-D7 (1994)

Accretion Disk Corona Line Emission from X0614+091. *D. J. Christian, N. E. White, & J. H. Swank.* 422, 791, 41-F6 (1994)

An X-Ray Spectroscopic Study of the Pre-Eclipse Dips of Hercules X-1. *C. S. Choi, F. Nagase, F. Makino, T. Dotani, & K. W. Min.* 422, 799, 41-G5 (1994)

ROSAT Observations of Stellar Flares. *J. H. M. M. Schmitt.* 90, 735, 12-G12 (1994)

Gamma-Ray Observations of Pulsars. *M. P. Ulmer.* 90, 789, 13-E6 (1994)

Do Quiescent Soft X-Ray Transients Contain Millisecond Radio Pulsars? *L. Stella, S. Campana, M. Colpi, S. Mereghetti, & M. Tavani.* 423, L47, 53-F11 (1994)

Constraints on Accreting, Isolated Neutron Stars from the *ROSAT* and *EUVE* Surveys. *Piero Madau & Omer Blaes.* 423, 748, 57-G10 (1994)

Structure of X-Ray Shots of Cygnus X-1 in Its Low State. *Hitoshi Negoro, Sigenori Miyamoto, & Shunji Kitamoto.* 423, L127, 61-A13 (1994)

A Multiwavelength Study of Star Formation in the L1495E Cloud in Taurus. *Karen M. Strom & Stephen E. Strom.* 424, 237, 64-G4 (1994)

Generalized Spectral Model for 1–100 keV X-Ray Emission from Cygnus X-3 Based on *EXOSAT* Data. *M. R. Rajeev, V. R. Chitnis, A. R. Rao, & K. P. Singh.* 424, 376, 66-E7 (1994)

Discovery of a Low-Frequency Broad Quasi-periodic Oscillation Peak in the Power Density Spectrum of Cygnus X-1 with *Granat*/SIGMA. *A. Vikhlinin, E. Churazov, M. Gilfanov, R. Sunyaev, A. Dyachkov, N. Khavenson, R. Kremnev, K. Sukhanov, J. Ballet, P. Laurent, L. Salotti, A. Claret, J. F. Olive, M. Denis, P. Mandrou, & J. P. Roques.* 424, 395, 66-F14 (1994)

Disk-Overflow Accretion in GK Persei? *Coel Hellier & Mario Livio.* 424, L57, 69-G12 (1994)

Observations of Cygnus X-1 by COMPTEL during 1991. *M. McConnell, D. Forrest, J. Ryan, W. Collmar, V. Schönfelder, H. Steinle, A. Strong, R. van Dijk, W. Hermsen, & K. Bennett.* 424, 933, 76-D1 (1994)

Localization and Spectrum of the X-Ray Transient Source GRS 1915+105. *A. Finoguenov, E. Churazov, M. Gilfanov, R. Sunyaev, A. Vikhlinin, A. Dyachkov, N. Khavenson, I. Tserenin, M. C. Schmitz-Fraysse, M. Denis, J. P. Roques, P. Mandrou, A. Claret, J. Ballet, B. Cordier, & A. Goldwurm.* 424, 940, 76-D10 (1994)

On the Nature of the X-Ray Emission from 1E 1024.0−5732/Wack 2134: The First X-Ray–selected Wolf-Rayet Star. *Sandro Mereghetti, Tomaso Belloni, Michael Shara, & Laurent Drissen.* 424, 943, 76-E1 (1994)

Transition in the X-Ray Light Curve of the AM Herculis System V834 Centauri (E1405−451): 1985–1986 *EXOSAT* Observations. *Rita M. Sambruna, Arvind N. Parmar, Lucio Chiappetti, Laura Maraschi, & Aldo Treves.* 424, 947, 76-E7 (1994)

1H 1752+081: An Eclipsing Cataclysmic Variable with a Small Accretion Disk. *Andrew D. Silber, Ronald A. Remillard, Keith Horne, & Hale V. Bradt.* 424, 955, 76-F3 (1994)

A Tool for Probing the Structure of Neutron Stars: Transient X-Ray Emission. *N. Chong & K. S. Cheng.* 425, 210, 82-G8 (1994)

ROSAT Observations of Cataclysmic Variables: A Search for the Boundary Layer Emission. *S. D. Vrtilek, A. Silber, J. C. Raymond, & J. Patterson.* 425, 787, 91-E8 (1994)

A Deep Imaging Survey of the Pleiades with *ROSAT*. *J. R. Stauffer, J.-P. Caillault, M. Gagné, C. F. Prosser, & L. W. Hartmann.* 91, 625, 28-A6 (1994)

1ES 1113+432: Luminous, Soft X-Ray Outburst from a Nearby Cataclysmic Variable (AR Ursae Majoris). *R. A. Remillard, J. F. Schachter, A. D. Silber, & P. Slane.* 426, 288, 99-F5 (1994)

Simultaneous Soft and Hard X-Ray Spectroscopy of AM Herculis with *EXOSAT*: Discovery of Photospheric Absorption Features. *Frits Paerels, John Heise, & André van Teeseling.* 426, 313, 100-A10 (1994)

Spherical Accretion onto Neutron Stars Revisited: Are Hot Solutions Possible? *R. Turolla, L. Zampieri, M. Colpi, & A. Treves.* 426, L35, 103-E1 (1994)

Formation and Evolution of Luminous Supersoft X-Ray Sources. *S. Rappaport, R. Di Stefano, & J. D. Smith.* 426, 692, 107-A13 (1994)

ROSAT All-Sky Survey Observations of X-Ray Variability in Cool Giant Stars. *Bernhard Haisch & J. H. M. M. Schmitt.* 426, 716, 107-C13 (1994)

Evidence of Circumstellar Matter Surrounding the Hercules X-1 System. *C. S. Choi, T. Dotani, F. Nagase, F. Makino, J. E. Deeter, & K. W. Min.* 427, 400, 114-G5 (1994)

A New Transient Pulsar in the Small Magellanic Cloud with an Unusual X-Ray Spectrum. *John P. Hughes.* 427, L25, 117-D8 (1994)

Coronal X-Ray Sources in the Hyades: A 40 Kilosecond *ROSAT* Pointing. *Robert A. Stern, Jürgen H. M. M. Schmitt, John P. Pye, Simon T. Hodgkin, John R. Stauffer, & Theodore Simon.* 427, 808, 122-F6 (1994)

Detection of X-Ray Emission from the PSR 1259−63/SS 2883 Binary System. *Lynn Cominsky, Mallory Roberts, & Simon Johnston.* 427, 978, 124-G2 (1994)

Glitches in the X-Ray Pulsar 1E 2259+586. *V. V. Usov.* 427, 984, 124-G10 (1994)

Observation of Pulsed Hard X-Rays/γ-Rays from PSR 1509−58. *S. Gunji, M. Hirayama, T. Kamae, S. Miyazaki, Y. Sekimoto, T. Takahashi, T. Tamura, M. Tanaka, N. Yamasaki, T. Yamagami, M. Nomachi, H. Murakami, J. Braga, & J. A. Neri.* 428, 284, 131-F7 (1994)

The X-Ray Selected Cataclysmic Variables H0459+246 and H0857−242. *R. A. Remillard, H. V. Bradt, R. J. V. Brissenden, D. A. H. Buckley, D. A. Schwartz, A. Silber, B. A. Stroozas, & I. R. Tuohy.* 428, 785, 140-A11 (1994)

Variable Soft X-Ray Absorption and Excess of Vela X-1. *H. C. Pan, P. Kretschmar, G. K. Skinner, E. Kendziorra, R. A. Sunyaev, & K. N. Borozdin.* 92, 448, 37-F11 (1994)

Fast Optical Variability of GRO J0422+32. *C. Bartolini, A. Guarnieri, A. Piccioni, G. M. Beskin, & S. I. Neizvestny.* 92, 455, 37-G8 (1994)

Noise Variability of the Hard X-Ray Transient Nova Persei. *M. Denis, J.-F. Olive, P. Mandrou, J. P. Roques, J. Ballet, A. Goldwurm, Ph. Laurent, B. Cordier, A. Vikhlinin, E. Churazov, M. Gilfanov, R. Sunyaev, A. Dyachkov, N. Khavenson, R. Kremnev, & V. Kovtunenko.* 92, 459, 38-A1 (1994)

Compton Reflection in Scorpius X-1 and Cygnus X-3? *Michael Maisack, Eckhard Kendziorra, Hongchao Pan, Gerry Skinner, Jakob Englhauser, Claus Reppin, Valeri Efremov, & Rashid Sunyaev.* 92, 473, 38-B7 (1994)

Ionization Structure of Cygnus X-3: A Massive Iron-depleted Companion? *Nobuo Terasawa & Hiroshi Nakamura.* 92, 477, 38-B13 (1994)

Hard X-Ray Emission from Weakly Magnetized Neutron Stars. *Didier Barret & Gilbert Vedrenne.* 92, 505, 38-E7 (1994)

Light Curves of Close Binaries in TeV Energy Region. *I. V. Moskalenko & S. Karakula.* 92, 567, 39-D3 (1994)

ROSAT/Optical Observations of 2S 0114+65: A Study of the 2.8 Hour Periodic Outbursts. *John P. Finley, MaryJane Taylor, & Tomaso Belloni.* 429, 356, 148-D13 (1994)

ROSAT Observations of the Black Hole Candidate V404 Cygni in Quiescence. *R. Mark Wagner, S. G. Starrfield, R. M. Hjellming, S. B. Howell, & T. J. Kreidl.* 429, L25, 150-D3 (1994)

The Detection of Pulsed X-Ray Emission from a Nearby Radio Pulsar. *S. Yancopoulos, T. T. Hamilton, & D. J. Helfand.* 429, 832, 156-A9 (1994)

ROSAT Observation of the Decline of V838 Herculis (Nova Herculis 1991). *Paula Szkody & D. W. Hoard.* 429, 857, 156-C12 (1994)

A Volume-limited *ROSAT* Survey of Extreme Ultraviolet Emission from All Nondegenerate Stars within 10 Parsecs. *Brian E. Wood, Alexander Brown, Jeffrey L. Linsky, Barry J. Kellett, Gordon E. Bromage, Simon T. Hodgkin, & John P. Pye.* 93, 287, 45-E5 (1994)

Observations of 1E 1740.7−2942 with *ROSAT* and the VLA. *William A. Heindl, Thomas A. Prince, & John M. Grunsfeld.* 430, 829, 172-B12 (1994)

Emission Lines from X-Ray–heated Accretion Disks in Low-Mass X-Ray Binaries. *Yuan-Kuen Ko & Timothy R. Kallman.* 431, 273, 179-E4 (1994)

Neutron Star Cooling and Pion Condensation. *Hideyuki Umeda, Ken'ichi Nomoto, Sachiko Tsuruta, Takumi Muto, & Toshitaka Tatsumi.* 431, 309, 180-A3 (1994)

Spectral Variations in the Low-Mass X-Ray Binary 4U 0614+09. *K. P. Singh & K. M. V. Apparao.* 431, 826, 189-A1 (1994)

MACHOs and the Diffuse X-Ray Background. *V. Kashyap, R. Rosner, D. Schramm, & J. Truran.* 431, L87, 191-E2 (1994)

Multiwavelength Study of the Magnetically Active T Tauri Star HD 283447. *Eric D. Feigelson, Alan D. Welty, Catherine L. Imhoff, Jeffrey C. Hall, Paul B. Etzel, Robert B. Phillips, & Colin J. Lonsdale.* 432, 373, 197-G1 (1994)

ROSAT HRI Observations of Hot Stars in the Orion Nebula. *Jean-Pierre Caillault, Marc Gagné, & John R. Stauffer.* 432, 386, 198-A2 (1994)

ROSAT X-Ray Observations of Late-Type Evolved Stars: On the Relationship between Coronal Temperatures and Luminosities. *A. Maggio, S. Sciortino, & F. R. Harnden, Jr.* 432, 701, 204-F11 (1994)

Nonstandard Thermal Evolution of Neutron Stars. *Hideyuki Umeda, Sachiko Tsuruta, & Ken'ichi Nomoto.* 433, 256, 211-E1 (1994)

Correlation between X-Ray Intensity and Radio Outbursts of Cygnus X-3. *Hiroaki Watanabe, Shunji Kitamoto, Sigenori Miyamoto, R. L. Fiedler, E. B. Waltman, K. J. Johnston, & F. D. Ghigo.* 433, 350, 212-F1 (1994)

Evidence for a Soft X-Ray Excess in the Spectrum of GRS 1758−258. *S. Mereghetti, T. Belloni, & A. Goldwurm.* 433, L21, 214-F12 (1994)

Regimes of High-Energy Shock Emission from the Be Star/Pulsar System PSR 1259−63. *Marco Tavani, Jonathan Arons, & Victoria M. Kaspi.* 433, L37, 215-B1 (1994)

Episodic Mass Transfer in Binaries with X-Ray Heating. *A. Harpaz & S. Rappaport.* 434, 283, 229-C13 (1994)

The Pulsed Hard X-Ray Spectrum of PSR B1509−58. *S. M. Matz, M. P. Ulmer, D. A. Grabelsky, W. R. Purcell, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, & G. V. Jung.* 434, 288, 229-D7 (1994)

Spectral Evolution during Pre-Eclipse Dips in Hercules X-1. *D. A. Leahy, A. Yoshida, & M. Matsuoka.* 434, 341, 230-B6 (1994)

The PSR 1800−21/G8.7−0.1 Association: A View from *ROSAT*. *John P. Finley & Hakki Ögelman.* 434, L25, 232-D11 (1994)

Generalized Comptonization Models and Application to the Recent High-Energy Observations. *Lev Titarchuk.* 434, 570, 235-F7 (1994)

The Early Ultraviolet, Optical, and Radio Evolution of the Soft X-Ray Transient GRO J0422+32. *C. R. Shrader, R. Mark Wagner, R. M. Hjellming, X. H. Han, & S. G. Starrfield.* 434, 698, 237-D4 (1994)

Searches for Millisecond Pulsations in Low-Mass X-Ray Binaries. II. *B. A. Vaughan, M. van der Klis, K. S. Wood, J. P. Norris, P. Hertz, P. F. Michelson, J. van Paradijs, W. H. G. Lewin, K. Mitsuda, & W. Penninx.* 435, 362, 248-D1 (1994)

Normalized Power Spectral Densities of Two X-Ray Components from GS 1124−683. *Sigenori Miyamoto, Shunji Kitamoto, Sayuri Iga, Kiyoshi Hayashida, & Kentaro Terada.* 435, 398, 248-G10 (1994)

X-Ray Emission from 4U 2129+47 (=V1727 Cygni) in Quiescence. *Michael R. Garcia.* 435, 407, 249-A9 (1994)

X-Ray Emission of the Pulsar–Be Star Binary PSR 1259−63. *Andrew King & Lynn Cominsky.* 435, 411, 249-B3 (1994)

Accretion Disk Coronae in High-Luminosity Systems. *Stephen D. Murray, John I. Castor, Richard I. Klein, & Christopher F. McKee.* 435, 631, 254-F13 (1994)

Disk-Instability Model for Black Hole Transients: Interplay of Thermal and Tidal Instabilities. *S. Ichikawa, S. Mineshige, & T. Kato.* 435, 748, 256-D2 (1994)

The Shadow Wind in High-Mass X-Ray Binaries. *John M. Blondin.* 435, 756, 256-D13 (1994)

The Hard X-Ray Emission Spectra from Accretion Columns in Intermediate Polars. *Insu Yi & Ethan T. Vishniac.* 435, 829, 257-E1 (1994)

Recurrence Times and Periodicities in 4U 1608−52 as Observed by *VELA 5B*. *James C. Lochner & Diane Roussel-Dupré.* 435, 840, 257-F1 (1994)

Is a Black Hole Accretion Disk in a Self-organized Critical State? *S. Mineshige, M. Takeuchi, & H. Nishimori.* 435, L125, 260-A10 (1994)

Ultraviolet Spectra of HZ Herculis/Hercules X-1 from *HST*: Hot Gas during Total Eclipse of the Neutron Star. *Scott F. Anderson, Stefanie Wachter, Bruce Margon, Ronald A. Downes, William P. Blair, & Jules P. Halpern.* 436, 319, 265-F5 (1994)

Line-dominated Eclipse Spectrum of Vela X-1. *Fumiaki Nagase, Gregory Zylstra, Takashi Sonobe, Taro Kotani, Hajime Inoue, & Jonathan Woo.* 436, L1, 268-C1 (1994)

ASCA Measurements of the Grain-scattered X-Ray Halos of Eclipsing Massive X-Ray Binaries: Vela X-1 and Centaurus X-3. *Jonathan W. Woo, George W. Clark, Charles S. R. Day, Fumiaki Nagase, & Toshiaki Takeshima.* 436, L5, 268-C9 (1994)

Is the Changing Orbital Period of EXO 0748−676 Evidence for a Triple System? *R. H. D. Corbet, K. Asai, T. Dotani, & F. Nagase.* 436, L15, 268-D13 (1994)

ASCA Observations of SS Cygni during an Anomalous Outburst. *John A. Nousek, Christopher J. Baluta, Robin H. D. Corbet, Koji Makai, Julian P. Osborne, & Manabu Ishida.* 436, L19, 268-E7 (1994)

Properties of M33 X-8, the Nuclear Source in the Nearby Spiral Galaxy. *M. Takano, K. Mitsuda, Y. Fukazawa, & F. Nagase.* 436, L47, 269-B1 (1994)

ASCA Observations of the Coronal X-Ray Emission of Algol. *A. Antunes, F. Nagase, & N. E. White.* 436, L83, 269-G3 (1994)

ASCA X-Ray Spectra of the Active Single Stars β Ceti and π^1 Ursae Majoris. *S. A. Drake, K. P. Singh, N. E. White, & Theodore Simon.* 436, L87, 269-G11 (1994)

ASCA Solid State Imaging Spectrometer Observations of O Stars. *M. F. Corcoran, W. L. Waldron, J. J. MacFarlane, W. Chen, A. M. T. Pollock, K. Torii, S. Kitamoto, N. Miura, M. Egoshi, & Y. Ohno.* 436, L95, 270-B1 (1994)

Einstein X-Ray Observations of Herbig Ae/Be Stars. *F. Damiani, G. Micela, S. Sciortino, & F. R. Harnden, Jr.* 436, 807, 276-F12 (1994)

Quiescent Accretion Disks in Black Hole X-Ray Novae. *Jerome A. Orosz, Charles D. Bailyn, Ronald A. Remillard, Jeffrey E. McClintock, & Craig B. Foltz.* 436, 848, 277-D3 (1994)

Discovery of the Quasi-periodic Oscillations from V0332+53. *Toshiaki Takeshima, Tadayasu Dotani, Kazuhisa Mitsuda, & Fumiaki Nagase.* 436, 871, 277-F7 (1994)

ROSAT Observations of Six Millisecond Pulsars. *R. Danner, S. R. Kulkarni, & S. E. Thorsett.* 436, L153, 281-E7 (1994)

X-Ray–induced Ionization in the Winds of Near–Main-Sequence O and B Stars. *J. J. MacFarlane, D. H. Cohen, & P. Wang.* 437, 351, 288-A11 (1994)

The Complete *Einstein Observatory* X-Ray Survey of the Orion Nebula Region. *Marc Gagné & Jean-Pierre Caillault.* 437, 361, 288-B10 (1994)

X-Ray Variability and Period Determinations in the Eclipsing Polar DP Leonis. *Craig R. Robinson & France A. Córdova.* 437, 436, 289-B4 (1994)

Iron Line Intensity Variations of Hercules X-1 over the Pulse Phase and the 35 Day Cycle. *C. S. Choi, F. Nagase, F. Makino, T. Dotani, S. Kitamoto, & S. Takahama.* 437, 449, 289-C6 (1994)

X-Ray Emission from PSR 0355+54. *Patrick Slane.* 437, 458, 289-D4 (1994)

Observations of the Small Magellanic Cloud by the *Vela 5B* X-Ray Monitor. *L. Whitlock & James C. Lochner.* 437, 841, 297-B7 (1994)

An *EXOSAT* Detection of the Transient X-Ray Pulsar GRO J1008−57. *D. J. Macomb, C. R. Shrader, & A. B. Schultz.* 437, 845, 297-C1 (1994)

Inertial Confinement of Astrophysical Jets. *W. Peter & D. Eichler.* 438, 244, 4-F11 (1995)

Determination of Plasma Temperatures and Luminosities Using Multiple Extreme-Ultraviolet and X-Ray Filters. *Brian E. Wood, Alexander Brown, & Jeffrey L. Linsky.* 438, 350, 6-C9 (1995)

Eclipse Timings of the Low-Mass X-Ray Binary EXO 0748−676: Statistical Arguments against Orbital Period Changes. *Paul Hertz, Kent S. Wood, & Lynn Cominsky.* 438, 385, 6-F13 (1995)

The Soft Gamma-Ray Spectrum of A0535+26: Detection of an Absorption Feature at 110 keV by OSSE. *J. E. Grove, M. S. Strickman, W. N. Johnson, J. D. Kurfess, R. L. Kinzer, C. H. Starr, G. V. Jung, E. Kendziorra, P. Kretschmar, M. Maisack, & R. Staubert.* 438, L25, 10-A9 (1995)

The Faint X-Ray Sources In and Out of ω Centauri: X-Ray Observations and Optical Identifications. *Adrienne M. Cool, Jonathan E. Grindlay, Charles D. Bailyn, Paul J. Callanan, & Paul Hertz.* 438, 719, 14-B2 (1995)

A Potential Cyclotron Line Signature in Low-Luminosity X-Ray Sources. *Robert W. Nelson, John C. L. Wang, E. E. Salpeter, & Ira Wasserman.* 438, L99, 20-B1 (1995)

The RIASS Coronathon: Joint X-Ray and Ultraviolet Observations of Normal F–K Stars. *Thomas R. Ayres, T. A. Fleming, T. Simon, B. M. Haisch, A. Brown, D. Lenz, W. Wamsteker, D. de Martino, C. Gonzalez, J. Bonnell, J. M. Mas-Hesse, C. Rosso, J. H. M. M. Schmitt, J. Trümper, W. Voges, J. Pye, R. C. Dempsey, J. L. Linsky, E. F. Guinan, G. M. Harper, C. Jordan, B. M. Montesinos, I. Pagano, & M. Rodonò.* 96, 223, 4-E7 (1995)

Low-Mass X-Ray Binaries in Globular Clusters: A New Metallicity Effect. *M. Bellazzini, A. Pasquali, L. Federici, F. R. Ferraro, & F. Fusi Pecci.* 439, 687, 34-A12 (1995)

Discovery of Candidate Cataclysmic Variables in the Post–Core-Collapse Globular Cluster NGC 6397. *Adrienne M. Cool, Jonathan E. Grindlay, Haldan N. Cohn, Phyllis M. Lugger, & Shawn D. Slavin.* 439, 695, 34-B10 (1995)

ROSAT X-Ray Sources Embedded in the ρ Ophiuchi Cloud Core. *Sophie Casanova, Thierry Montmerle, Eric D. Feigelson, & Philippe André.* 439, 752, 35-A7 (1995)

X-Ray Spectra from Neutron Stars Accreting at Low Rates. *Luca Zampieri, Roberto Turolla, Silvia Zane, & Aldo Treves.* 439, 849, 36-C12 (1995)

Balloon-borne Measurements of the SN 1987A Hard X-Ray Continuum. *Geoffrey N. Pendleton, William S. Paciesas, Gerald J. Fishman, Charles A. Meegan, & Robert B. Wilson.* 439, 963, 37-G13 (1995)

A Search for an X-Ray Scattering Halo around Scorpius X-1. *Dennis Gallagher, Webster Cash, & James Green.* 439, 976, 38-B2 (1995)

High-Mass X-Ray Binary Populations. I. Galactic Modeling. *William W. Dalton & Craig L. Sarazin.* 440, 280, 45-A11 (1995)

Oscillatory Modes in Near-critical Accretion Flows. *Guy S. Miller & Myeong-Gu Park.* 440, 771, 53-F11 (1995)

The Long-Period AM Herculis–like Cataclysmic Variable RXJ 051541+0104.6. *Frederick M. Walter, Scott J. Wolk, & Nancy R. Adams.* 440, 834, 54-E10 (1995)

EXOSAT Observations of the Low-Luminosity X-Ray Burster 4U 0614+091: Evidence for a Hard Power-Law Tail. *Didier Barret & Jonathan E. Grindlay.* 440, 841, 54-F6 (1995)

ROSAT PSPC Observations of the Symbiotic CH Cygni. *D. A. Leahy & K. Volk.* 440, 847, 54-G1 (1995)

Optical and Infrared Observations of SGR 1806−20. *S. R. Kulkarni, K. Matthews, G. Neugebauer, I. N. Reid, M. H. van Kerkwijk, & G. Vasisht.* 440, L61, 57-E12 (1995)

Minioutbursts from the Black Hole Candidate Nova Velorum 1993. *Charles D. Bailyn & Jerome A. Orosz.* 440, L73, 57-G8 (1995)

A Search for Pre–Main-Sequence Stars in High-Latitude Molecular Clouds. III. A Survey of the *Einstein* Database. *Jean-Pierre Caillault, Loris Magnani, & Chris Fryer.* 441, 261, 62-G12 (1995)

X-Ray Emission from the PSR B1259−63 System near Apastron. *J. Greiner, M. Tavani, & T. Belloni.* 441, L43, 67-B9 (1995)

Hard X-Ray Variability of X-Ray Nova Persei 1992: *Granat*/SIGMA Results. *A. Vikhlinin, E. Churazov, M. Gilfanov, R. Sunyaev, A. Finoguenov, A. Dyachkov, R. Kremnev, K. Sukhanov, J. Ballet, A. Goldwurm, B. Cordier, A. Claret, M. Denis, J. F. Olive, J. P. Roques, & P. Mandrou.* 441, 779, 72-F7 (1995)

Observations of the X-Ray Nova GRO J0422+32. I. Outburst and the Decay to Quiescence. *Paul J. Callanan, Michael R. Garcia, Jeffrey E. McClintock, Ping Zhao, Ronald A. Remillard, Charles D. Bailyn, Jerome A. Orosz, B. Alan Harmon, & William S. Paciesas.* 441, 786, 72-G3 (1995)

Accretion Disk Boundary Layers in Cataclysmic Variables. I. Optically Thick Boundary Layers. *Robert Popham & Ramesh Narayan.* 442, 337, 81-F10 (1995)

The Dim Inner Accretion Disk of the Quiescent Black Hole A0620−00. *Jeffrey E. McClintock, Keith Horne, & Ronald A. Remillard.* 442, 358, 82-A6 (1995)

Large Hysteretic Behavior of Stellar Black Hole Candidate X-Ray Binaries. *Sigenori Miyamoto, Shunji Kitamoto, Kiyoshi Hayashida, & Wataru Egoshi.* 442, L13, 84-F1 (1995)

The Very Low Mass X-Ray Binary Pulsars: A New Class of Sources? *S. Mereghetti & L. Stella.* 442, L17, 84-F9 (1995)

Discovery of a Transient MeV Range Gamma-Ray Source. *M. S. Briggs, D. E. Gruber, J. L. Matteson, & L. E. Peterson.* 442, 638, 88-F9 (1995)

RX J0515.6+0105: An Unusual, Eclipsing, Magnetic Cataclysmic Variable. *A. W. Shafter, K. Reinsch, K. Beuermann, K. A. Misselt, D. A. H. Buckley, V. Burwitz, & A. D. Schwope.* 443, 319, 99-E8 (1995)

Detection of the A1742−294 X-Ray Burster above 35 keV. *E. Churazov, M. Gilfanov, R. Sunyaev, B. Novickov, I. Chulkov, V. Kovtunenko, A. Sheikhet, K. Sukhanov, A. Goldwurm, B. Cordier, J. Paul, P. O. Petrucci, E. Jourdain, J. P. Roques, L. Bouchet, & P. Mandrou.* 443, 341, 99-G8 (1995)

A Unified Picture for High-Energy Emission in Spin-powered Pulsars. *T. Kamae & Y. Sekimoto.* 443, 780, 108-E7 (1995)

The Spectrum and Pulses of 1E 2259+586 from *ASCA* and BBXRT Observations. *R. H. D. Corbet, A. P. Smale, M. Ozaki, K. Koyama, & K. Iwasawa.* 443, 786, 108-F3 (1995)

An Extended Galactic Population of Low-Luminosity X-Ray Sources (CVs?) and the Diffuse X-Ray Background. *Eyal Maoz & Jonathan E. Grindlay.* 444, 183, 115-G11 (1995)

Coronal Heating in Flare Stars: Resonant MHD Absorption? *D. J. Mullan & M. Johnson.* 444, 350, 118-C12 (1995)

Geometry and Pulse Profiles of X-Ray Pulsars: Asymmetric Relativistic Fits to 4U 1538−52 and Vela X-1. *T. Bulik, H. Riffert, P. Mészáros, K. Makishima, T. Mihara, & B. Thomas.* 444, 405, 119-B3 (1995)

A Luminous Companion to SGR 1806−20. *M. H. van Kerkwijk, S. R. Kulkarni, K. Matthews, & G. Neugebauer.* 444, L33, 121-F1 (1995)

Mass Transfer Cycles in Cataclysmic Variables. *A. R. King, J. Frank, U. Kolb, & H. Ritter.* 444, L37, 121-F7 (1995)

Deep *ROSAT* HRI Observations of the Orion Nebula Region. *Marc Gagné, Jean-Pierre Caillault, & John R. Stauffer.* 445, 280, 136-D2 (1995)

Low-State Disks and Low-Beta Disks. *Shin Mineshige, Masaaki Kusunose, & Ryoji Matsumoto.* 445, L43, 140-G11 (1995)

ASCA and *ROSAT* Observations of NRAO 140 and IX Persei. *T. J. Turner, I. M. George, G. M. Madejski, S. Kitamoto, & T. Suzuki.* 445, 660, 144-B11 (1995)

On the Spectral Hardening Factor of the X-Ray Emission from Accretion Disks in Black Hole Candidates. *Toshiya Shimura & Fumio Takahara.* 445, 780, 146-A4 (1995)

A Study of Coronal X-Ray Emission from Short-Period Algol Binaries. *K. P. Singh, S. A. Drake, & N. E. White.* 445, 840, 146-F13 (1995)

Wind Dynamics in SMC X-1. I. Hydrodynamic Simulation. *John M. Blondin & Jonathan W. Woo.* 445, 889, 147-D13 (1995)

Wind Dynamics in SMC X-1. II. *Ginga* and *ROSAT* Observations. *Jonathan W. Woo, George W. Clark, John M. Blondin, Timothy R. Kallman, & Fumiaki Nagase.* 445, 896, 147-E10 (1995)

Extreme Ultraviolet Light Curves of UZ Fornacis: Evidence for Accretion Stream Absorption and Vertical Extent of the Accretion Spot. *John K. Warren, Martin M. Sirk, & John V. Vallerga.* 445, 909, 147-F13 (1995)

First Detection of X-Ray Variability of η Carinae. *M. F. Corcoran, G. L. Rawley, J. H. Swank, & R. Petre.* 445, L121, 151-C9 (1995)

RX J0045.4+4154: A Recurrent Supersoft X-Ray Transient in M31. *N. E. White, P. Giommi, J. Heise, L. Angelini, & S. Fantasia.* 445, L125, 151-D5 (1995)

An Objective Multicolor Method for the Characterization of Low-Resolution X-Ray Spectra. *A. Collura, G. Micela, S. Sciortino, F. R. Harnden, Jr., & R. Rosner.* 446, 108, 154-F7 (1995)

Einstein Observations of T Tauri Stars in Taurus-Auriga. I. Properties of X-Ray Emission. *F. Damiani, G. Micela, S. Sciortino, & F. R. Harnden, Jr.* 446, 331, 157-F10 (1995)

Einstein Observations of T Tauri Stars in Taurus-Auriga. II. Relationships between X-Ray Emission and Pre–Main-Sequence Activity. *F. Damiani & G. Micela.* 446, 341, 157-G11 (1995)

Accretion Disk Structure and Branch Behavior of Cygnus X-2. *Akira Hirano, Shunji Kitamoto, Tatsuya T. Yamada, Shin Mineshige, & Jun Fukue.* 446, 350, 158-A10 (1995)

Discovery of the 18.7 Second Accreting X-Ray Pulsar GRO J1948+32. *Deepto Chakrabarty, Towsian Koh, Lars Bildsten, Thomas A. Prince, Mark H. Finger, Robert B. Wilson, Geoffrey N. Pendleton, & Bradley C. Rubin.* 446, 826, 167-D8 (1995)

Orbital Parameters of the Candidate Black Hole Binary GRO J0422+32. *Jerome A. Orosz & Charles D. Bailyn.* 446, L59, 170-D12 (1995)

The Optical Counterpart to the Extremely Luminous X-Ray Source near Holmberg IX: A Possible Supershell in a Tidal Tail. *Bryan W. Miller.* 446, L75, 170-G4 (1995)

Emission-Line Pre–Main-Sequence Stars and X-Ray Sources in Orion. *Steven H. Pravdo & Lorella Angelini.* 447, 342, 177-B3 (1995)

VLBI Observations of Cygnus X-3 during the 1985 October Radio Outburst. *C. J. Schalinski, K. J. Johnston, A. Witzel, R. E. Spencer, R. Fiedler, E. Waltman, G. G. Pooley, R. Hjellming, & L. A. Molnar.* 447, 752, 186-D1 (1995)

The Synchrotron Self-Compton Model for X-Ray and γ-Ray Emission from Pulsars. *K. S. Cheng & D. M. Wei.* 448, 281, 196-B1 (1995)

ROSAT All-Sky Survey Observations of the Hyades Cluster. *Robert A. Stern, Jürgen H. M. M. Schmitt, & Peter T. Kahabka.* 448, 683, 204-B12 (1995)

The X-Ray Halo of Nova V1974 Cygni (Nova Cygni 1992) and the Nature of Interstellar Dust. *John S. Mathis, David Cohen, John P. Finley, & J. Krautter.* 449, 320, 214-E1 (1995)

Neon Line Emission in the X-Ray Spectrum of the Pulsar 4U 1626−67. *L. Angelini, N. E. White, F. Nagase, T. R. Kallman, A. Yoshida, T. Takeshima, C. Becker, & F. Paerels.* 449, L41, 216-F3 (1995)

ROSAT Observation of the Old Classical Nova CP Puppis. *Şölen Balman, Marina Orio, & Hakki Ögelman.* 449, L47, 216-F11 (1995)

Nonradial Oscillations in Neutron Star Oceans: A Source of Quasi-periodic X-Ray Oscillations? *Lars Bildsten & Curt Cutler.* 449, 800, 223-F12 (1995)

Exact and Approximate Radiative Transfer in Differentially Moving Media. *Wei-Wei Yin & Guy S. Miller.* 449, 826, 224-B8 (1995)

ROSAT Observations of Scattered X-Rays from LMC X-4 in Its Low State. *Jonathan W. Woo, George W. Clark, & Alan M. Levine.* 449, 880, 224-G7 (1995)

The *Einstein* Extended Medium-Sensitivity Survey Second Epoch: Results for the Stars. *Thomas A. Fleming, Silvano Molendi, Tommaso Maccacaro, & Anna Wolter.* 99, 701, 44-D12 (1995)

Spectral and Temporal Characteristics of X-Ray–bright Stars in the Pleiades. *Marc Gagné, Jean-Pierre Caillault, & John R. Stauffer.* 450, 217, 231-A11 (1995)

Five Eclipses of Hercules X-1 Observed by *Ginga*. *D. A. Leahy.* 450, 339, 232-F1 (1995)

The X-Ray View of the Low-Mass Stars in the Solar Neighborhood. *Jürgen H. M. M. Schmitt, Thomas A. Fleming, & Mark S. Giampapa.* 450, 392, 233-C13 (1995)

Luminous Supersoft X-Ray Sources and the Planetary Nebula Luminosity Function. *R. Di Stefano, F. Paerels, & S. Rappaport.* 450, 705, 240-D10 (1995)

The Role of Chaos in the Circularization of Tidal Capture Binaries. I. The Chaos Boundary. *Rosemary A. Mardling.* 450, 722, 240-F7 (1995)

The Role of Chaos in the Circularization of Tidal Capture Binaries. II. Long-Time Evolution. *Rosemary A. Mardling.* 450, 732, 240-G6 (1995)

Burstlike Events in the Z Source Cygnus X-2. *E. Kuulkers, M. van der Klis, & J. van Paradijs.* 450, 748, 241-A11 (1995)

Analyzing X-Ray Pulsar Profiles: Asymmetry as a Key to Geometry and Beam Pattern. *U. Kraus, H.-P. Nollert, H. Ruder, & H. Riffert.* 450, 763, 241-C4 (1995)

Geminga's Soft X-Ray Emission and the Structure of Its Surface. *Dany Page, Yu. A. Shibanov, & V. E. Zavlin.* 451, L21, 252-D4 (1995)

A Model of the Galactic X-Ray Binary Population. I. High-Mass X-Ray Binaries. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 100, 217, 49-B1 (1995)

A Model of the Galactic X-Ray Binary Population. II. Low-Mass X-Ray Binaries in the Galactic Disk. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 100, 233, 49-C5 (1995)

Old Isolated Accreting Neutron Stars: Contribution to the Soft X-Ray Background in the 0.5–2 keV Band. *Silvia Zane, Roberto Turolla, Luca Zampieri, Monica Colpi, & Aldo Treves.* 451, 739, 257-D2 (1995)

The Correlation of Solar Flare Temperature and Emission Measure Extrapolated to the Case of Stellar Flares. *U. Feldman, J. M. Laming, & G. A. Doschek.* 451, L79, 261-A8 (1995)

The Evolution of Accretion Disks with Coronae: A Model for the Low-Frequency Quasi-periodic Oscillations in X-Ray Binaries. *Marek A. Abramowicz, Xingming Chen, & Ronald E. Taam.* 452, 379, 267-C11 (1995)

Statistics of X-Ray Fluctuations from Cygnus X-1: Reservoirs in the Disk? *H. Negoro, S. Kitamoto, M. Takeuchi, & S. Mineshige.* 452, L49, 270-C1 (1995)

An Archival Study of *Hubble Space Telescope* Observations of Hercules X-1/HZ Herculis. *F. H. Cheng, S. D. Vrtilek, & John C. Raymond.* 452, 825, 276-A10 (1995)

Soft X-Ray Emission from Selected Isolated Pulsars. *Patrick Slane & Nicole Lloyd.* 452, L115, 280-A12 (1995)

Periodic Outbursts from the Ultrasoft X-Ray Transient 4U 1630−47. *A. N. Parmar, L. Angelini, & N. E. White.* 452, L129, 280-C10 (1995)

X-Ray Detection of PSR B1259−63 at Periastron. *V. M. Kaspi, M. Tavani, F. Nagase, M. Hirayama, M. Hoshino, T. Aoki, N. Kawai, & J. Arons.* 453, 424, 287-A1 (1995)

ROSAT Pointed Observations of Cool Magnetic White Dwarfs. Z *E. Musielak, J. G. Porter, & J. M. Davis.* 453, L33, 289-F8 (1995)

Two X-Ray Sources in 30 Doradus: Wolf-Rayet + Black Hole Binaries? *Q. Daniel Wang.* 453, 783, 294-F9 (1995)

A New Magnetic Cataclysmic Variable: WGA J1047.1+6335. *K. P. Singh, P. Szkody, P. Barrett, N. E. White, E. Fierce, A. Silber, D. W. Hoard, P. J. Hakala, V. Piirola, & K. Sohl.* 453, L95, 298-F4 (1995)

Accreting, Isolated Neutron Stars. III. Preheating of Infalling Gas and Cometary H II Regions. *Omer Blaes, Orlando Warren, & Piero Madau.* 454, 370, 304-D3 (1995)

New Features of the X-Ray Dip Source 1755−338. *Kwang-Il Seon, Kyoung-Wook Min, Kenji Yoshida, Fumiyoshi Makino, Michiel van der Klis, Jan van Paradijs, & Walter H. G. Lewin.* 454, 463, 305-F3 (1995)

ASCA and *GRO* Observations of GX 301−2. *Steven H. Pravdo, Charles S. R. Day, Lorella Angelini, B. Alan Harmon, A. Yoshida, & P. Saraswat.* 454, 872, 313-G6 (1995)

The Accretion Disk Limit Cycle Instability in Black Hole X-Ray Binaries. *John K. Cannizzo, Wan Chen, & Mario Livio.* 454, 880, 314-A3 (1995)

Radiation Hydrodynamic Models of Eclipsing Low-Mass X-Ray Binaries. *Stephen D. Murray, D. Tod Woods, John I. Castor, Richard I. Klein, & Christopher F. McKee.* 454, L133, 316-D2 (1995)

X-Ray Spectra of Z Sources. *Dimitrios Psaltis, Frederick K. Lamb, & Guy S. Miller.* 454, L137, 316-D9 (1995)

X-Ray Emission from Magnetic Cataclysmic Variables and White Dwarf Mass Estimates. *Kinwah Wu, G. Chanmugam, & G. Shaviv.* 455, 260, 321-F8 (1995)

Identification of the Soft X-Ray Source WGA J1802.1+1804 with a New Magnetic Cataclysmic Variable. *Paula Szkody, Andrew Silber, D. W. Hoard, E. Fierce, K. P. Singh, P. Barrett, E. Schlegel, & V. Piirola.* 455, L43, 325-A6 (1995)

Spectroscopic Identification of Probable Cataclysmic Variables in the Globular Cluster NGC 6397. *J. E. Grindlay, A. M. Cool, P. J. Callanan, C. D. Bailyn, H. N. Cohn, & P. M. Lugger.* 455, L47, 325-B1 (1995)

Photon Splitting in Strongly Magnetized Cosmic Objects—Revisited. *Günter Wunner, Robert Sang, & Dagmar Berg.* 455, L51, 325-B8 (1995)

The Softest X-Ray Sources in the *ROSAT* Pointed Catalog: WGACAT. *K. P. Singh, P. Barrett, N. E. White, P. Giommi, & L. Angelini.* 455, 456, 328-C2 (1995)

A Spin-down Variation in the 6 Second X-Ray Pulsar 1E 1048.1−5937. *Sandro Mereghetti.* 455, 598, 330-B6 (1995)

The Mass of the Probable Black Hole in the X-Ray Nova GRO J0422+32. *Alexei V. Filippenko, Thomas Matheson, & Luis C. Ho.* 455, 614, 330-D1 (1995)

X-Rays from SN 1993J and Structures of Ejecta and Circumstellar Medium. *Tomoharu Suzuki & Ken'ichi Nomoto.* 455, 658, 331-A8 (1995)

Stellar Activity at the End of the Main Sequence: GHRS Observations of the M8 Ve Star VB 10. *Jeffrey L. Linsky, Brian E. Wood, Alexander Brown, Mark S. Giampapa, & Carol Ambruster.* 455, 670, 331-B10 (1995)

A Black Hole in the X-Ray Nova GS 2000+25. *Alexei V. Filippenko, Thomas Matheson, & Aaron J. Barth.* 455, L139, 334-A4 (1995)

ZEEMAN EFFECT

On the Inference of Magnetic Field Vectors from Stokes Profiles. *John T. Jefferies & Donald L. Mickey.* 372, 694, 84-C9 (1991)

Vector Magnetic Fields in Sunspots. I. Stokes Profile Analysis Using the Marshall Space Flight Center Magnetograph. *K. S. Balasubramaniam & E. A. West.* 382, 699, 210-C11 (1991)

ZODIACAL LIGHT

Zodiacal Emission. II. Dust near the Ecliptic. *William T. Reach.* 369, 529, 44-C13 (1991)

Spatial Distribution of the Interplanetary Dust Deduced by Infrared Observations. *P. de Bernardis, F. Feminella, & G. Moreno.* 370, 396, 52-B10 (1991)
